LSL Sexual Health Strategy Action Plan

1 Introduction

2 The Lambeth Southwark and Lewisham Sexual Health Strategy
Lambeth, Southwark and Lewisham (LSL) have the highest rates of sexually transmitted infections, HIV and teenage conception rates in London and the UK. The LSL Sexual Health Strategy 2014-17 outlines how LSL will tackle the high levels of need in the three boroughs and set clear prevention and promotion programmes in place.

The strategy describes the local HIV and sexual health landscape, assessing previous strategies, financial resources and sexual health services in Lambeth, Southwark and Lewisham, as follows:

- Promotion and prevention
- Sexual health services/GUM/psychosexual
- Primary Care
- HIV Care and support
- Termination of pregnancy (abortion)
- Young peoples services & teenage pregnancy

The strategy sets out the following vision and strategic priorities:

- Embedding good sexual health and wellness as part of a wider health agenda
- Actively promoting good sexual health and healthy safe relationships, not just the absence of disease
- Reducing the stigma attached to sexually transmitted infections (STIs)
- Focusing on those statistically most at risk thereby reducing health inequalities
- Reducing the rates of unplanned pregnancy and repeat terminations, especially for under 18 year olds
- Reducing rates of undiagnosed STIs and HIV
- Aligning strategic priorities with the intentions of our local CCGs
- Developing the workforce to deliver integrated and improved services
- Shifting the balance of care to community-based services that are accessible and responsive to the needs of service users

The strategy is based on a public health needs assessment (Lambeth, Southwark and Lewisham Sexual Health Epidemiology 2013) conducted and written by Lambeth, Southwark and Lewisham Public Health teams. The Strategy covers analysis of investment and service delivery and makes...
recommendations regarding a direction of travel for shifting investment from clinic-based services to community provision and prevention and promotion.

3 Key messages from LSL Lambeth, Southwark and Lewisham Sexual Health Epidemiology Report

The Lambeth, Southwark and Lewisham Sexual Health Epidemiology Report 2013, conducted and written by Lambeth, Southwark and Lewisham Public Health teams, includes a detailed analysis on sexual health need within the three boroughs. In particular the Report highlights:

- STI rates are high and continue to rise, particularly amongst MSM, young people and Black ethnic populations.
- HIV prevalence is high, with rates amongst MSM continuing to rise
- Under-18 conception rates in Southwark and Lambeth, although high, have been falling.
- Under-18 conception rates in Southwark and Lambeth, although high, have been falling.
- Under-18 conception rate in Lewisham has risen in the last year.
- Termination of pregnancy rates are high, with particular concern focused on repeat terminations.

Based on the local epidemiology identified in the LSL Sexual Health Epidemiology Report the priority groups for work in LSL are:

- MSM
- Black Ethnic populations
- Young people
- Other new and emerging vulnerable groups will require targeted interventions.

4 Other local strategies and plans

The LSL Sexual Health Strategy 2014-2017 and this Action Plan align with a number of other local strategies and plans. Wherever possible, commissioners will work in partnership with colleagues delivering on these aligned strategies to strengthen work. It is anticipated that aligned strategies include those listed in Appendix 1. This list is illustrative of the scope of sexual health. As such it is envisaged that a range of additional local and national strategy and policy will influence partnership working to deliver on the work outlined in the LSL Sexual Health Strategy.
## 5 The LSL Action Plan
### Year 1: 2014-2015

<table>

</thead>
</table>
| 1   | Invest in prevention and reshape the commissioning of sexual health promotion to deliver improved health outcomes | Develop commissioning plan and specification for procuring LSL-wide Sexual Health Promotion targeted at Black African communities and MSM. Programme to include:  
- HIV Prevention  
- LSL wide condom distribution  
- Expanding access to HIV testing  
- Direct interventions with individuals/communities  
- Focus on working with faith leaders and faith organisations  
- Focus on substance mis-use (eg ‘chemsex’)  
- Prioritising the most vulnerable (ie the most vulnerable within identified priority groups)  
- Responding to emerging local need in LSL as it arises (eg STI outbreak - Shigella) and specific local needs (eg FGM) | January 2015 |
<p>|     |                   | Consultation with stakeholders, including community sector organisations, on procurement of LSL-wide Sexual Health Promotion and HIV Prevention Programme. | March 2015 |
|     |                   | Continue to invest in and manage the London HIV Prevention Programme | Ongoing |
|     |                   | Support and link in with local work on Hepatitis including in partnership with substance misuse | Ongoing |
|     |                   | Support and link in with local work on female genital mutilation (FGM) including the joint Southwark and Lewisham plan for and Lambeth Violence Against Women and Girls. Ensuring all commissioned work, where appropriate, takes into account Multi-agency Practice Guidelines: Female Genital Mutilation (HM Govt 2014). | Ongoing |</p>

Appendix 1: Examples of aligned strategies

It is envisaged that a range of additional local and national strategy and policy will influence partnership working to deliver on the work outlined in the LSL Sexual Health Strategy.
