

Proposed dates for future meetings and the work plan for the coming year

1. Purpose of the Report

To provide dates and the work plan for future meetings over the coming year

2. Background

- 2.1. The work of the Forum is considerable, complex and involved. It is important that over the coming year it is planned in a logical and structured way. Attached is a suggested programme.
- 2.2. The fact that an item is not on the plan does not preclude it from being added after this meeting through the wishes of the Forum
- 2.3. It is expected that in the latter months of the plan a considerable number of items will be added to the work programme during the year.
- 2.4. For the June meeting an item has been added to look at the constitution of the Forum. The constitution is out of date as it refers to consultative bodies which are no longer in existence. This will also give the Forum the opportunity to look at the detail and consider a number of issues such as membership, terms of office and declarations of interests.
