Item	Pages
1. Confirmation of the Chair	1 - 4
2. Declarations of interest	5 - 8
3. Scoping report	9 - 41

Housing Retrofit Task and Finish Group Members

Members of the committee, listed below, are summoned to attend the meeting to be held on Friday, 16 July 2021.

Kim Wright, Chief Executive
Thursday 8 July 2021

Councillor Louise Krupski (Chair)	
Councillor Tauseef Anwar	
Councillor Patrick Codd	
Councillor Aisling Gallagher	
Councillor Stephen Penfold	

Housing Retrofit Task and Finish Group

Confirmation of Chair of the housing retrofit task and finish group

Date: 16 July 2021

Key decision: No

Class: Part 1

Ward(s) affected: All

Contributors: Assistant Chief Executive (Scrutiny Manager)

Outline and recommendations

Further to the Annual General Meeting of Council and the Overview and Scrutiny Committee on 26 May 2021, this report informs members of the appointment of a Chair of the housing retrofit task and finish group.

Members are advised to:

- Confirm the election of Councillor Louise Krupski as Chair of the task and finish group.

1 Summary

1.1. On 26 May 2021 the Overview and Scrutiny Committee considered a report setting out the appointment of three time-limited scrutiny task and finish groups (TFGs) and the membership of each of these.

1.2. The agreed membership of the housing retrofit task and finish group is as follows:

- Cllr Louise Krupski (Chair)
- Councillor Tauseef Anwar
- Councillor Patrick Codd
- Councillor Aisling Gallagher
- Councillor Stephen Penfold

2. Recommendation

2.1. The task and finish group is recommended to:

- (i) Confirm the election of Councillor Louise Krupski as Chair of the TFG.

3. Policy context
 - 3.1. The Council's Corporate Strategy for 2018-2022 sets out the following priorities:
 - Open Lewisham** - Lewisham is a welcoming place of safety for all, where we celebrate the diversity that strengthens us.
 - Tackling the housing crisis** - Everyone has a decent home that is secure and affordable.
 - Giving children and young people the best start in life** - Every child has access to an outstanding and inspiring education, and is given the support they need to keep them safe, well and able to achieve their full potential.
 - Building an inclusive local economy** - Everyone can access high-quality job opportunities, with decent pay and security in our thriving and inclusive local economy.
 - Delivering and defending: health, social care and support** - Ensuring everyone receives the health, mental health, social care and support services they need.
 - Making Lewisham greener** - Everyone enjoys our green spaces, and benefits from a healthy environment as we work to protect and improve our local environment.
 - Building safer communities** - Every resident feels safe and secure living here as we work together towards a borough free from the fear of crime.
 - 3.2. Relating as it does to the issues of: safety, community, social justice, housing, health, opportunity, equality and economics - tackling the climate emergency is fundamental to the delivery of the Council's corporate strategy.
 - 3.3. The work of the task and finish group also aligns with the strategic themes set out in the Council's recovery strategy¹. The strategy describes how Lewisham will recover from the coronavirus crisis – and it places emphasis on the goal of attaining 'a greener future' and as such, the Council's response to the climate emergency will be a key part of the recovery.
4. Task and finish groups
 - 4.1. As a result of the Local Democracy Review, the Local Democracy Working Group recommended some changes to the Council's practice and approach to scrutiny, including the introduction of time limited Task and Finish Groups (TFGs) to look at topical issues of importance or concern. Most of the practice changes were put into practice during the 2021/22 municipal year, apart from the introduction of TFGs. This was put on hold due to the pandemic. It is now proposed to establish three TFGs.
 - 4.2. It has been agreed that:
 - The Overview and Scrutiny Committee will agree which TFGs should be established and their duration; but TFGs will not last longer than 12 months.
 - Each TFG will meet at least twice in public (one meeting to scope out the work required and one to agree a final report and recommendations).
 - Evidence will be collected in between formal meetings in a variety of ways. Methods will include, but will not be limited to, desktop research, telephone/MS Teams conferences, site visits, good practice visits and a wide range of

¹ [Future Lewisham announcement: our borough's recovery](#)

engagement activities. Some evidence may be collected at a formal, public meeting of the TFG where expert witnesses are asked to give evidence.

- The Overview and Scrutiny Committee will agree the membership of TFGs on the basis of political party nominations. The membership will be politically proportionate.
- Each TFG will have five members. However, the membership of any TFG looking at education matters will be open to the statutory parent governor and diocesan representatives, who can choose to sit on the group (as full members with voting rights) if they wish. Such TFGs will therefore have more than 5 members.
- TFGs are effectively time limited Select Committees with the same constitutional powers as standing Select Committees. This includes the power to make reports to the Executive.
- The TFG will conduct an investigation into the issue it was established to scrutinise, agree a report on the basis of the evidence heard and report directly to Mayor and Cabinet / the relevant external organisation for a response within two months.
- TFGs will focus on producing a small number of focused, evidence-based recommendations.
- A copy of each TFG's final report will be circulated by email to the Overview and Scrutiny Committee to note, and the Chair of Overview and Scrutiny may suggest that the report is presented to full Council to allow for wider debate, in addition to it being considered by the Mayor and Cabinet for an executive response¹ .
- The TFG will be disbanded once it has made its final report. Its final set of minutes will go to the Overview and Scrutiny Committee for agreement.
- The Mayoral response to the TFG will be considered by the Overview and Scrutiny Committee. The relevant TFG Members will be invited to lead the discussion on the response. The Overview and Scrutiny Committee may request an update on the implementation of agreed recommendations in six or 12 months' time to itself or an appropriate Select Committee.

5. Financial implications

- 5.1. Scrutiny work is managed within existing budgets. Formal recommendations to the Mayor arising out of any TFG investigations; specific work items within select committee work programmes; or items considered by the full Overview and Scrutiny Committee are evaluated in the usual way through the process of formal reports. There are no direct financial implications arising from this report.

6. Legal implications

- 6.1. The Council's Constitution provides at paragraph 6.11, Article 6 that the Overview and Scrutiny Committee may from time to time appoint sub-committees, to be known as task and finish groups which will exist for a period of no less than 3 months, nor more than 12 months from the date of their creation. It further adds that "Any task and finish group shall consist of 5 members and be established for the purpose of examining a particular issue in depth. The terms of reference of any task and finish group shall be agreed by the Overview and Scrutiny Committee which shall also appoint members to it."

Is this report easy to understand?

Please give us feedback so we can improve.

Page 3

7. Equalities implications
 - 7.1. The [Equality Act 2010](#) (The Act) legally protects people from discrimination in the workplace and in wider society. It replaced the previous anti-discrimination laws with a single act, making the law easier to understand and strengthen protection in certain situations. It covers the following nine protected characteristics: age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex and sexual orientation.
 - 7.2. The Act also imposes a public sector equality duty. This means that in public bodies, of which this Council is designated, they must consider all individuals in carrying out their day-to-day work when shaping policy, in delivering services and in relation to their own employees. It also requires public bodies to:
 - Have due regard to the need to eliminate discrimination
 - Advance equality of opportunity
 - Foster good relations between different people when carrying out their activities
 - 7.3. The Council recognises diversity is one of its strengths and is committed to creating a more inclusive community. Therefore, having due regard to the Act, is confirmation of the Council's commitment to eliminating all forms of discrimination against any group within the community and to actively promote an equality of opportunity and positive community partnership.
 - 7.4. The delivery of the Council's equalities objectives is to be achieved through the delivery of all of the Council's strategies, plans and procedures. As such, all select committees and other scrutiny bodies, when planning their work and scrutinising items, bear in mind the delivery of the Council's equality objectives.
 - 7.5. There are no direct equality implications arising from the implementation of the recommendation in this report.
8. Climate change and environmental implications
 - 8.1. There are no direct climate change or environmental implications arising from the implementation of the recommendation in this report.
9. Crime and disorder implications
 - 9.1. There are no direct crime and disorder implications arising from the implementation of the recommendation in this report.
10. Health and wellbeing implications
 - 10.1. There are no direct health and wellbeing implications arising from the implementation of the recommendation in this report.

Housing retrofit task and finish group

Declarations of interest

Key decision: No

Class: Part 1

Ward(s) affected: All

Contributors: Chief Executive (Director of Law, Corporate Governance and Elections)

Outline and recommendations

Members are asked to declare any personal interest they have in any item on the agenda.

1. Summary

1.1. Members must declare any personal interest they have in any item on the agenda. There are three types of personal interest referred to in the Council's Member Code of Conduct:

- (1) Disclosable pecuniary interests
- (2) Other registerable interests
- (3) Non-registerable interests.

1.2. Further information on these is provided in the body of this report.

2. Recommendation

2.1. Members are asked to declare any personal interest they have in any item on the agenda.

3. Disclosable pecuniary interests

3.1 These are defined by regulation as:

- (a) Employment, trade, profession or vocation of a relevant person* for profit or gain
- (b) Sponsorship –payment or provision of any other financial benefit (other than by the Council) within the 12 months prior to giving notice for inclusion in the register in respect of expenses incurred by you in carrying out duties as a member or towards your election expenses (including payment or financial benefit from a Trade Union).
- (c) Undischarged contracts between a relevant person* (or a firm in which they are a partner or a body corporate in which they are a director, or in the securities of which they have a beneficial interest) and the Council for goods, services or works.
- (d) Beneficial interests in land in the borough.
- (e) Licence to occupy land in the borough for one month or more.
- (f) Corporate tenancies – any tenancy, where to the member's knowledge, the Council is landlord and the tenant is a firm in which the relevant person* is a partner, a body corporate in which they are a director, or in the securities of which they have a beneficial interest.
- (g) Beneficial interest in securities of a body where:
 - (a) that body to the member's knowledge has a place of business or land in the borough; and
 - (b) either:
 - (i) the total nominal value of the securities exceeds £25,000 or 1/100 of the total issued share capital of that body; or
 - (ii) if the share capital of that body is of more than one class, the total nominal value of the shares of any one class in which the relevant person* has a beneficial interest exceeds 1/100 of the total issued share capital of that class.

*A relevant person is the member, their spouse or civil partner, or a person with whom they live as spouse or civil partner.

4. Other registerable interests

4.1 The Lewisham Member Code of Conduct requires members also to register the following interests:

- (a) Membership or position of control or management in a body to which you were appointed or nominated by the Council
- (b) Any body exercising functions of a public nature or directed to charitable purposes, or whose principal purposes include the influence of public opinion or policy, including any political party
- (c) Any person from whom you have received a gift or hospitality with an estimated value of at least £25.

5. Non registerable interests

- 5.1. Occasions may arise when a matter under consideration would or would be likely to affect the wellbeing of a member, their family, friend or close associate more than it would affect the wellbeing of those in the local area generally, but which is not required to be registered in the Register of Members' Interests (for example a matter concerning the closure of a school at which a Member's child attends).

6. Declaration and impact of interest on members' participation

- 6.1. Where a member has any registerable interest in a matter and they are present at a meeting at which that matter is to be discussed, they must declare the nature of the interest at the earliest opportunity and in any event before the matter is considered. The declaration will be recorded in the minutes of the meeting. If the matter is a disclosable pecuniary interest the member must take not part in consideration of the matter and withdraw from the room before it is considered. They must not seek improperly to influence the decision in any way. **Failure to declare such an interest which has not already been entered in the Register of Members' Interests, or participation where such an interest exists, is liable to prosecution and on conviction carries a fine of up to £5000**
- 6.2. Where a member has a registerable interest which falls short of a disclosable pecuniary interest they must still declare the nature of the interest to the meeting at the earliest opportunity and in any event before the matter is considered, but they may stay in the room, participate in consideration of the matter and vote on it unless paragraph 6.3 below applies.
- 6.3. Where a member has a registerable interest which falls short of a disclosable pecuniary interest, the member must consider whether a reasonable member of the public in possession of the facts would think that their interest is so significant that it would be likely to impair the member's judgement of the public interest. If so, the member must withdraw and take no part in consideration of the matter nor seek to influence the outcome improperly.
- 6.4. If a non-registerable interest arises which affects the wellbeing of a member, their, family, friend or close associate more than it would affect those in the local area generally, then the provisions relating to the declarations of interest and withdrawal apply as if it were a registerable interest.
- 6.5. Decisions relating to declarations of interests are for the member's personal judgement, though in cases of doubt they may wish to seek the advice of the Monitoring Officer.

7. Sensitive information

- 7.1. There are special provisions relating to sensitive interests. These are interests the disclosure of which would be likely to expose the member to risk of violence or intimidation where the Monitoring Officer has agreed that such interest need not be registered. Members with such an interest are referred to the Code and advised to seek advice from the Monitoring Officer in advance.

8. Exempt categories

- 8.1. There are exemptions to these provisions allowing members to participate in decisions notwithstanding interests that would otherwise prevent them doing so. These include:-
- (a) Housing – holding a tenancy or lease with the Council unless the matter relates to your particular tenancy or lease; (subject to arrears exception)
 - (b) School meals, school transport and travelling expenses; if you are a parent or

guardian of a child in full time education, or a school governor unless the matter relates particularly to the school your child attends or of which you are a governor

- (c) Statutory sick pay; if you are in receipt
- (d) Allowances, payment or indemnity for members
- (e) Ceremonial honours for members
- (f) Setting Council Tax or precept (subject to arrears exception).

Housing Retrofit Task and Finish Group

Task and finish group scoping report

Date: 16 July 2021

Key decision: No

Class: Part 1 (open)

Wards affected: All (none specific)

Contributors: Assistant Chief Executive (Scrutiny Manager)

Outline and recommendations

This report describes the role of the housing retrofit task and finish group, and outlines the scope of the work it will carry out.

Members of the task and finish group are asked to:

- consider and comment on the content of the report
- describe the intended outcomes of the task and finish group
- agree the group's key lines of enquiry
- agree a timetable for completion of this work.

Timeline of engagement and decision-making

The subject of this task and finish group was proposed by Councillor Louise Krupski.

The subject and membership of the task and finish group were both agreed by Overview and Scrutiny Committee on 26 May 2021.

The first meeting of the group is on 16 July 2021.

1. Summary

- 1.1. This report asks members of the task and finish group to consider the scope of the review and describe its intended outcomes.

2. Recommendations

- 2.1. Members of the task and finish group are asked to:
 - consider and comment on the content of the report
 - describe the intended outcomes of the task and finish group
 - agree the group's key lines of enquiry
 - agree a timetable for the completion of this work.

3. The role of the task and finish group

- 3.1. The role of the housing retrofit task and finish group is to explore the ways in which Lewisham Council can ensure that it is doing everything it can to retrofit and insulate homes, both those owned and managed by Lewisham and those in the private sector, in order to reach its Climate Change target by 2030.
- 3.2. The outline proposal for this task and finish group can be found at [appendix 1](#). The Key lines of enquiry are discussed in section 6 and are summarised below:

Key lines of enquiry

Meeting the retrofit challenge in social housing

- 3.3. Key line of enquiry 1: What are the aspirations of Lewisham's housing providers?
- 3.4. Key line of enquiry 2: How can we ensure that the planning and sequencing of current decent homes works or other cyclical/planned upgrades are in alignment with any future retrofit works? And - how do we ensure that our housing providers are best placed to make use of additional funding when it becomes available?
- 3.5. Key line of enquiry 3: Are there examples of good practice amongst councils in London (or elsewhere) in adapting their housing stock to meet the challenges of the climate emergency that we can learn from?

Exploring options for owner occupiers and the private rented sector

- 3.6. Key line of enquiry 4 - What are the principal barriers to enabling retrofit in Lewisham's private sector? And – are there planning policy (particularly in reference to the development of the new Local Plan) or building control related issues that need to be considered?
- 3.7. Key line of enquiry 5 – What are the current plans for licensing of landlords in relation to energy efficiency ratings?
- 3.8. Key line of enquiry 6 - What can the Council do in order to encourage and incentivise change in the private housing sector?
- 3.9. Key line of enquiry 7 - What options are there for Lewisham to become involved in the green recovery for jobs?

Is this report easy to understand?

Please give us feedback so we can improve.

Page 10

4. Context

'Climate change is happening and is due to human activity, this includes global warming and greater risk of flooding, droughts and heat waves¹.'

- 4.1. It is widely acknowledged that climate change is occurring due to human activity. It is also established that increases in global temperatures will lead to further volatility in weather systems and result in major upheavals for human societies and the ecosystems we depend on. The UK Government recognises that amongst the severe effects of climate change on human health, food production, ecosystems and economies it is the poorest people - globally and nationally - that will face the most damaging impacts.

Lewisham's climate emergency declaration

- 4.2. In 2019 Lewisham Council was one of the first local authorities in London to declare a **climate emergency**². The unanimous decision by councillors reflects the concern that changes to the world's climate will have significant detrimental impacts on people and communities generally as well as Lewisham's residents and citizens specifically- with the most significant and harmful impacts being dealt to the most vulnerable.

- 4.3. The motion states that, in Lewisham, the consequences of inaction to address this climate emergency will include:

- Increased risk of flooding and damage to buildings, infrastructure and the local economy.
- Health problems, particularly for children, older people and those with pre-existing conditions.
- Higher living costs including energy, food, travel and insurance costs.
- Increases in social injustice and inequality.
- Financial and emotional consequences for residents with families around the world adversely affected by the impact of a changing climate

- 4.4. The motion commits the Council to:

- Set specific and measurable targets to reduce carbon emissions for the Council and for the borough as a whole, including costed milestones to zero-carbon.
- Consider systematically the climate change impact of each area of the Council's activities.
- Increase local resilience to climate impacts already in the system.
- Continue to prioritise support for vulnerable residents through the Council's fuel poverty programmes working with partners at a community, borough wide and regional level to provide advice services and access to funding for heating, insulation and ventilation.
- Accelerate existing programmes to deliver reductions in greenhouse gas emissions including delivery of heat networks in the borough, low carbon development and high quality housing, an efficient and low carbon corporate estate and support for renewables and for community energy.
- Work with partner bodies across the borough and across London to ensure the

¹ <https://www.gov.uk/guidance/climate-change-explained>

² [link to the Council motion on the declaration of the climate emergency in February 2019](#)

climate emergency is adequately reflected in the development and implementation of all borough wide strategies and plans.

- Draw up a communications strategy to support delivery of a Zero-Carbon Lewisham and enable Lewisham residents to make low carbon choices.

Lewisham's corporate strategy

- 4.5. The Council's Corporate Strategy for 2018-2022 sets out the following priorities:

Open Lewisham - Lewisham is a welcoming place of safety for all, where we celebrate the diversity that strengthens us.

Tackling the housing crisis - Everyone has a decent home that is secure and affordable.

Giving children and young people the best start in life - Every child has access to an outstanding and inspiring education, and is given the support they need to keep them safe, well and able to achieve their full potential.

Building an inclusive local economy - Everyone can access high-quality job opportunities, with decent pay and security in our thriving and inclusive local economy.

Delivering and defending: health, social care and support - Ensuring everyone receives the health, mental health, social care and support services they need.

Making Lewisham greener - Everyone enjoys our green spaces, and benefits from a healthy environment as we work to protect and improve our local environment.

Building safer communities - Every resident feels safe and secure living here as we work together towards a borough free from the fear of crime.

- 4.6. Relating as it does to the issues of: safety, community, social justice, housing, health, opportunity, equality and economics - tackling the climate emergency is fundamental to the delivery of the Council's corporate strategy.

London's recovery from the coronavirus crisis

- 4.7. The Mayor of London has identified nine 'recovery missions' as part of plans for the city's recovery from the coronavirus crisis. Amongst these is **A Green New Deal** for London, through which the Mayor intends to: 'Tackle the climate and ecological emergencies and improve air quality by doubling the size of London's green economy by 2030 to accelerate job creation for all.' The task and finish group should consider how the Council might become more closely involved with initiatives happening in the London region and beyond. This should include work announced as part of the Mayor of London's 'retrofit revolution'³
- 4.8. London Councils' Transport and Environment Committee and the London Environment Directors Network met in late 2019 to discuss the climate emergency and to consider options and ideas for collaboration between London boroughs. They recognised the importance of action on the climate as central to councils' core mandates. They issued a joint statement⁴ outlining their support for a number of projects and programmes – including 'Retrofit London' - which has the ambition to retrofit all domestic and non-

³ [Mayor declares a retrofit revolution to tackle the climate emergency](#)

⁴ London Councils: [Joint Statement on Climate Change](#)

domestic buildings to an average level of emergency performance certificate⁵ (EPC) B between 2020 and 2030.

Future Lewisham⁶

- 4.9. The work of the task and finish group also aligns with the strategic themes set out in the Council's recovery strategy. The strategy describes how Lewisham will recover from the coronavirus crisis – and it places emphasis on the goal of attaining 'a greener future' and as such, the Council's response to the climate emergency will be a key part of the recovery.

Lewisham's climate emergency action plan

- 4.10. Following from the Council's declaration of a climate emergency, officers were tasked with developing an action plan⁷. The plan is based on in-depth modelling and analysis of Lewisham's current (and historic) carbon emissions and the likely actions that will need to be taken to reach the target of net zero emissions by 2030. Research carried out for the development of the plan indicates that over the 10 years to 2030, £1.6 billion in funding will be required for Lewisham to achieve its carbon neutral target.
- 4.11. The plan sets out activities across five delivery areas:
- Leading By Example
 - Sustainable Housing
 - Decarbonised Transport
 - Greener Adaptive Lewisham
 - Inspiring, Learning and Lobbying
- 4.12. The work of the task and finish group is most likely to relate closely to the 'sustainable housing' section of the plan (see appendix 2), which details the original measures identified across the different housing sectors to support the borough in its pursuit of the net zero target and as such, the task and finish group's work will further the progress already made by building on the necessary actions already identified.

⁵ See [the Energy Savings Trust's guide to energy performance certificates](#) for more information.

⁶ [Future Lewisham announcement: our borough's recovery](#)

⁷ [Lewisham Climate Emergency Strategic Action Plan 2020-2030](#)

- 4.13. The Sustainable Development Select Committee has been tasked with scrutinising the development and delivery of the plan. Following consideration of the draft action plan, the Committee made referrals to Mayor and Cabinet in [January 2020](#) and [January 2021](#). The Committee's comments emphasised the importance of: public engagement; the development of green infrastructure and the value of trees - as well as Council communications and provision of information.
- 4.14. At its meeting in March 2020, Lewisham's Mayor and Cabinet⁸ adopted the action plan and affirmed the ambition for the borough to reach carbon neutral by 2030.
- 4.15. In the [2021 update](#), officers acknowledged that the action plan would require reviewing and streamlining in order to align with the council's financial and organisational recovery plans as a result of the impact of the pandemic. The task and finish group is well placed to support this work.

Previous relevant scrutiny

- 4.16. As outlined above – the Sustainable Development Select Committee has taken the lead on this issue. Its work over a number of years has recognised the importance of sustainable use of resources and the protection of the environment. Moreover, as far back as 2010 it carried out an in-depth review of retrofitting measures:

Local warming: increasing home insulation in Lewisham, 2010⁹

'Reducing carbon emissions to combat climate change is one of the most urgent challenges we face today... If the urgency of climate change is not incentive enough to reduce our dependence on fossil fuels, dwindling global supplies and future volatility in energy prices should be. It is the poorest in our society who are most harshly affected by fluctuating energy prices. One of the most effective ways of tackling the fuel poverty this leads to is by improving home insulation.'

(Extract from the Chair's foreword, Local Warming review, 2010)

- 4.17. Councillors on the Sustainable Development Select Committee considered the opportunities and challenges of insulating the borough's homes as well as reviewing carbon emissions in the borough and examining examples of best practice. The Committee found that approaches to insulating Lewisham's housing stock were complicated by the age of and variation in housing types - as well as the different kinds of rental and ownership modes and the range of schemes and funding routes available for retrofit.

⁸ [Mayor and Cabinet decision on the climate emergency, March 2020](#)

⁹ [Sustainable Development Select Committee: local warming report 2010](#)

- 4.18. Also of interest - is the Housing Select Committee's [review into the health impact of damp and mould in social housing \(2011\)](#) , which found that whilst damp and mould in poorly insulated homes could not be isolated as the only source of ill health for occupants - the evidence demonstrated that the linkage between damp and mouldy conditions and ill health was strongest in older people, children and people with an existing chronic illness. Furthermore, it identified quality insulation as one of the means by which to reduce the cold and condensation that led to damp and mouldy living conditions.
- 4.19. The Housing Select Committee's [communal heating systems review \(2015\)](#) explored the issues relating to the installation and maintenance of heating systems – predominately in new buildings. The Committee found evidence of significant gaps between the expectations and the delivery of communal heating systems. It also found that this was exacerbated by poor understanding of some of the novel installations involved and some examples of low quality delivery and management of these systems. In order to meet that challenge of the climate emergency, it is likely that new technology and novel installations will be required. As a result, the Climate Emergency Action Plan (2.1.3) identifies the raising of standards in communal heating systems as a key action.

5. Meeting the criteria for a task and finish group

The scale of the challenge

- 5.1. Housing accounts for half of Lewisham’s measurable carbon emissions. The use of natural gas (for heating and hot water) is the largest source of direct¹⁰ emissions from homes – making up over a third of the borough’s total. In addition, the use of electricity in homes makes up a fifth of the borough’s (indirect) emissions. To reduce these emissions it is estimated that 80% of Lewisham housing needs to be retrofitted to meet the Council’s ambition to be carbon neutral by 2030.

¹⁰ Put simply - direct emissions are as the result of fuel consumption in the borough (the use of natural gas boilers in central heating systems, for example) – indirect emissions are as a result of energy used in the borough but produced elsewhere (a power station fuelling the electric grid, for example).

- 5.2. Lewisham has a mix of housing ownership and tenure types. Census data (2011¹¹) shows that owner occupiers (either owning outright or with a mortgage) make up the largest housing tenure in the borough at over 40% of households. Households living in socially rented homes make up approximately 30% (more than 36,000 households). The Council, through its arm's length management organisation, Lewisham Homes¹² (and Regenter B3) manages almost 20,000 (more than half) of these socially rented homes. Thirdly, the private rented sector accounts for nearly 25% of Lewisham households – with the remaining (approximately 5% of) households living rent free or in other types of socially rented homes or shared ownership properties. It is notable that the number of households in the private rented sector has doubled in the past 20 years¹³.
- 5.3. Work to tackle emissions from homes is evidently made more difficult by the complexity across different tenures in terms of responsibilities and the actions needed in each of the housing sectors. In order to meet the challenge of the climate crisis, Lewisham's climate emergency action plan sets out initiatives across all of the tenure types - with the involvement of Lewisham's home owners as well as social and private landlords. However, the Council clearly has the most responsibility for (and direct control over) its homes - managed by Lewisham Homes and Regenter B3.
- 5.4. Cost also presents a considerable challenge. Research for the development of Lewisham's climate emergency action plan found that £1.6 billion in funding would be needed over the ten years to 2030 in order to enable the systemic change needed for the borough to meet its ambition to be carbon neutral. Just over 50% of the investment needed (£843m) relates to private housing. Social housing and Lewisham Homes account for a further £393m (p8, Lewisham Climate Emergency Action Plan 2020).

Protecting the most vulnerable

- 5.5. Households are considered to be in fuel poverty if they spend more than ten percent of their income on maintaining a decent level of warmth. This is further complicated in London by the age and characteristics of the housing stock and is further compounded by issues of income inequality and systemic disparities in access to services.
- 5.6. As recognised in the Council's climate emergency declaration, the reverse situation is also true - with the same households likely to suffer from the worst impacts of heatwaves and overheating as well as flooding and the many other associated dangers linked to an increasingly volatile climate.
- 5.7. The unequal impact of the climate crisis is recognised in Lewisham's climate emergency action plan (2.4.3) which identifies the need for further equalities analysis and engagement in order to support affected groups to mitigate the effects of the climate crisis¹⁴.

¹¹ Housing ownership and tenancy: <https://www.observatory.lewisham.gov.uk/housing/>

¹² As a result of the Council's strategy for stock ownership, management and investment, which has been in place since the Lewisham Housing Commission of 2001, operational management of Council homes is undertaken by two organisations. These are - Lewisham Homes, an arms-length management organisation (or ALMO) - which manages 19,000 homes and Regenter B3, which is a special purpose vehicle for homes in Brockley as part of a private finance (PFI) arrangement - which manages just over 1800 homes.

¹³ [Lewisham Housing Strategy 2020-2026](#)

¹⁴ See also: <https://www.climatejust.org.uk/messages/adapting-buildings> (People can experience different intensities of climate impacts as a result of the type of housing that they live in).

Percentage of households in fuel poverty (from 2014 to 2019) for Lewisham

Period	% households in fuel poverty			
	%			
	Lewisham	Minimum for All London Boroughs (excl City)	Mean for All London Boroughs (excl City)	Maximum for All London Boroughs (excl City)
2014	10.5	8.1	10.7	14.3
2015	10.2	6.9	10.1	15.7
2016	10.7	6.9	10.0	15.3
2017	10.9	9.1	11.8	19.1
2018	12.1	8.4	11.4	16.1
2019	18.2	10.6	15.2	22.5

Source:
Department for Business, Energy & Industrial Strategy

Powered by LG Inform 15

- 5.8. Since the Sustainable Development Select Committee's 'local warming' review (see above for a summary) in the proportion of Lewisham households in fuel poverty has increased. The national data also indicates a steady worsening of this trend in urban areas. This is not to say that this issue is uncomplicated. The measures for fuel poverty are comprised of a balance of contributing factors (and have recently been changed) – although principally they are made up of the cost of fuel set against household income. Clearly, however, the reduction in energy demand for heating is a key way in which fuel poverty can be tackled¹⁶.
- 5.9. In summary, it is worth recalling that back in 2011, in its review of damp and mould, councillors on the Housing Select Committee acknowledged the impact of inadequately heated homes on vulnerable households. And, the effects of fuel poverty on both acute and long term physical and mental health conditions are well documented elsewhere¹⁷.

Options for reducing emissions

- 5.10. Retrofit is the introduction of new materials, products and technologies into an existing building to reduce the energy needed to occupy that building.¹⁸ The UK's Climate

¹⁵ [Local Government Association: households in fuel poverty London comparison](#)

¹⁶ In its recent interim report – the committee on fuel on fuel poverty indicates that it will ensure that the '...impact of the transition to Net Zero on those in fuel poverty is clearly costed and the measures are put in place to ensure that there is a just transition. Committee on fuel poverty [July 2021 interim report](#)

¹⁷ See for example, the evidence gathered for this report of the [Committee on Fuel Poverty, 2020](#)

¹⁸ From [Retrofit for the future: a guide to making retrofit work \(2014\)](#). The report by the Department for Business, Energy and Industrial Strategy notes that 'Retrofit is not the same as renovation or refurbishment, which often make good, repair or aesthetically enhance a building without aiming to reduce its energy use'.

Change Committee¹⁹ identifies four main areas for reducing emissions from buildings: behaviour change, increasing the energy efficiency of the building stock, improving the energy efficiency of lighting and electrical appliances, and switching away from fossil-fuel based heat. Retrofit relates to all of these areas and may include:

- Adding or improving insulation to walls, roof spaces, floors and windows (through improved/additional glazing);
- Installation of low energy lighting and appliances;
- Replacement boiler technology or heat pumps;
- Connection to heat networks
- Other measures to increase energy efficiency, such as draught proofing and upgrading ventilation systems.

5.11. Behavioural change also has a part to play in the retrofitting process. The reasons for this are twofold – firstly, there is potential for retrofitting to cause disruption during installation works, which may require the understanding of residents. Secondly, some of the technological changes require residents to adapt the way in which they inhabit their homes. These changes might include changed expectations about the instant provision of heat – or the consideration of energy conservation when using new appliances. More broadly (although not related to this review) there are behaviour change associated emissions savings to be made from reducing wasted energy (switching off lights and using heating controls, for example).

Barriers to retrofit in social housing

5.12. The Department for Business Energy and Industrial Strategy commissioned a report in 2018²⁰ on the barriers to retrofit in social housing. The report's authors carried out research with a number of housing associations and councils' arm's-length housing providers. They found a range of barriers to retrofit – not least amongst them was the financial cost of the works required, however – the report's authors also highlighted some of the key things that brought about change²¹:

- “An EPC target included within a sustainability or asset management strategy
- Heating system replacements as part of planned investment programmes
- Window and door replacements as part of planned investment programmes
- Voids between tenancies, when property is empty and works can be carried out
- Political intervention internally (i.e. Board members prioritising certain projects) or externally (i.e. media attention)
- Availability of external funding, such as ECO.”

5.13. The task and finish group is well placed to explore how these ‘triggers to action’ might be utilised in Lewisham. In the wake of the covid-19 pandemic, the group's work may also support the prioritisation of efforts through the Council's existing plans and strategies for change.

¹⁹ The Climate Change Committee (CCC) is an independent, statutory body established under the Climate Change Act 2008. Its purpose is to advise the UK and devolved governments on emissions targets and to report to Parliament on progress made in reducing greenhouse gas emissions and preparing for and adapting to the impacts of climate change. See its [Sixth Carbon Budget Buildings Report for details](#)

²⁰ Department for Business, Energy and Industrial Strategy (2018) [Barriers to retrofit in social housing](#)

²¹ p15 – what are the triggers to action?

6. Key lines of enquiry

- 6.1. The Council's climate emergency action plan sets out a range of actions required to reduce carbon emissions from homes. It is acknowledged that these will need to be prioritised as a result of the impact of the pandemic – and the associated (and as yet not fully foreseen) changes to the life, jobs and home lives of Lewisham's residents. And whilst there are initiatives, technologies and approaches that are applicable to both social and private housing – there are also distinct opportunities and challenges associated with the two (roughly defined) sectors. Accordingly, the key lines of enquiry are divided as follows:

Meeting the retrofit challenge in social housing

- 6.2. In relation to social housing - the plan agreed by Mayor and Cabinet in March 2021 makes specific reference to Lewisham Homes' development of a new 'asset management strategy' this was also identified in the initial proposal for the creation of this task and finish group (see appendix 1).
- 6.3. Key line of enquiry 1: What are the aspirations of Lewisham's housing providers?
- 6.4. Key line of enquiry 2: How can we ensure that the planning and sequencing of current decent homes works or other cyclical/planned upgrades are in alignment with any future retrofit works? And - how do we ensure that our housing providers are best placed to make use of additional funding when it becomes available?
- 6.5. Key line of enquiry 3: Are there examples of good practice amongst councils in London (or elsewhere) in adapting their housing stock to meet the challenges of the climate emergency that we can learn from?

Exploring options for owner occupiers and the private rented sector

- 6.6. Key line of enquiry 4 - What are the principal barriers to enabling retrofit in Lewisham's private sector? And – are there planning policy (particularly in reference to the development of the new Local Plan) or building control related issues that need to be considered?
- 6.7. Key line of enquiry 5 – What are the current plans for licensing of landlords in relation to energy efficiency ratings?
- 6.8. Key line of enquiry 6 - What can the Council do in order to encourage and incentivise change in the private housing sector?
- 6.9. Key line of enquiry 7 - What options are there for Lewisham to become involved in the green recovery for jobs?

How the task and finish group will be run

- 6.10. It is intended that task and finish groups will be run as projects, utilising an Agile methodology, and they are intended to be:

Collaborative – scrutiny officers, directorate officers and councillors working together to address a topical issue of concern, using a shared space on MS Teams

Time limited – to suggest solutions in a timely manner, with allocated tasks, progress checks and deadlines

Flexible – with a mixture of formal and informal meetings, visits, research, user engagement etc.

Focussed on residents – service user experience is key, the issue will be clearly defined, and solutions suggested, on the basis of understanding residents' experience

Focussed on solutions – the aim is to take evidence from a wide range of sources and good practice to develop affordable, practical solutions that are evidence based and implementable and that will have a positive impact on the lives of residents.

- 6.11. A 'double diamond' approach will be taken which will split the project into two parts (diamonds). The first part is the 'discovery' stage. The issue (the topic of the task and finish group) is the starting point and then research and evidence collection is carried out to really understand the issue and define it more clearly. Once the issue is well understood and well defined, the second stage begins. Further research and evidence collection is carried out, seeking inspiration from elsewhere and working with a range of different stakeholders and experts to investigate potential solutions. Then a clear set of recommendations can be produced.

7. Sources of evidence and engagement

- 7.1. The Cabinet Member for Housing and Planning as well as the Cabinet Member for Environment and Transport are key stakeholders in the Council's Executive and it is proposed that early discussions are held with both members about their vision and their ambitions for housing retrofit in Lewisham, particularly in the wake of the response to the covid-19 pandemic.
- 7.2. Officers in the Council's climate resilience team can provide a briefing on the latest updates to the climate emergency action plan and the current and most pressing issues the group should consider.
- 7.3. Council officers should provide an update on the licensing programme for the private rented sector, evidence may also be sought from tenants organisations and local groups involved in climate campaigning for their views on the role of the Council in enabling change in the private housing sector²².
- 7.4. Lewisham Homes and Regenter B3 – will be asked to set out their current plans and aspirations. As already noted, this should include consideration of the Lewisham Homes asset management and sustainability strategies at the earliest opportunity. The views of Lewisham's tenants and residents associations should also be sought on the

²² There is good evidence that the majority of Londoners are concerned about climate change and are willing to take action. See – 'what do Londoners think about climate change?': <https://www.londoncouncils.gov.uk/node/37827>

opportunities, challenges and their readiness for retrofit schemes.

- 7.5. Evidence of best practice will be sought from the councils leading on the 'Retrofit London' (London Councils) programme – specifically the London Boroughs of Enfield and Waltham Forest.
- 7.6. Further engagement should take place with the Greater London Authority regarding the opportunities for Lewisham to engage with the Mayor of London's retrofit accelerator and Green New Deal programmes.
- 7.7. Engagement will take place with Lewisham's social housing providers (Particularly the largest providers, including L&Q, Peabody, and Phoenix Community Homes). This may entail a call for evidence and a request for examples of good practice²³. The group should also consider holding focus groups or visits to hear directly from residents (of all tenures) and tenants regarding their views on retrofitting.
- 7.8. The task and finish group could issue a public [call for evidence](#) on the council website so that anyone resident in Lewisham can share their views about retrofit.

8. Timeframe and resources

- 8.1. The first meeting of the task and finish group will take place on 16 July 2021 and further desktop research, evidence gathering and engagement will take place over the seven months to February 2022. There will be further meetings of the group, either formal or informal, over the lifespan of the project and officers from the scrutiny team will work with council officers in the housing and climate resilience teams to provide information to Members. It is anticipated that officers from Lewisham Homes and Regenter B3 will also be involved with the review. The project will conclude with a final formal meeting of the task and finish group to consider the recommendations the group will make to Mayor and Cabinet and housing providers.

9. Intended outcomes

- 9.1. The work of the task and finish group is intended to support work to improve the following outcomes:
 - More housing in Lewisham retrofitted with insulation, connected to heat networks and other sources of low carbon heating.
 - Increased understanding and awareness among housing providers, owners and tenants about the importance of retrofit and the options available across housing tenures to implement changes.
 - Ensuring that the Council's housing providers (specifically Lewisham Homes) are considering the necessary financial, technical, operational and resident satisfaction implications of delivering carbon neutral standards across the stock.
- 9.2. Issues outside of the scope of the task and finish group include the other significant sources of carbon emissions in the borough – namely transport and industry/commercial operations as well as the Council's corporate buildings and schools.

²³ Building on the action set out under 2.3.18 of the climate emergency action plan (see appendix 2 for details)

10. Financial implications

- 10.1. There are no direct financial implications arising from the implementation of the recommendations in this report. Elements of the work of the task and finish group may have financial implications and these will need to be considered in due course.

11. Legal implications

- 11.1. The Council's Constitution provides at paragraph 6.11, Article 6 that the Overview and Scrutiny Committee may from time to time appoint sub-committees, to be known as task and finish groups which will exist for a period of no less than 3 months, nor more than 12 months from the date of their creation. It further adds that "Any task and finish group shall consist of 5 members and be established for the purpose of examining a particular issue in depth. The terms of reference of any task and finish group shall be agreed by the Overview and Scrutiny Committee which shall also appoint members to it."

12. Equalities implications

- 12.1. The [Equality Act 2010](#) (The Act) legally protects people from discrimination in the workplace and in wider society. It replaced the previous anti-discrimination laws with a single act, making the law easier to understand and strengthen protection in certain situations. It covers the following nine protected characteristics: age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex and sexual orientation.
- 12.2. The Act also imposes a public sector equality duty. This means that in public bodies, of which this Council is designated, they must consider all individuals in carrying out their day-to-day work when shaping policy, in delivering services and in relation to their own employees. It also requires public bodies to:
- Have due regard to the need to eliminate discrimination
 - Advance equality of opportunity
 - Foster good relations between different people when carrying out their activities
- 12.3. The Council recognises diversity is one of its strengths and is committed to creating a more inclusive community. Therefore, having due regard to the Act, is confirmation of the Council's commitment to eliminating all forms of discrimination against any group within the community and to actively promote an equality of opportunity and positive community partnership.
- 12.4. The delivery of the Council's equalities objectives is to be achieved through the delivery of all of the Council's strategies, plans and procedures. As such, all select committees and other scrutiny bodies, when planning their work and scrutinising items, bear in mind the delivery of the Council's equality objectives.
- 12.5. Scrutiny tries to make sure that its work reflects the diversity of Lewisham's communities and that the views of residents are fairly represented in scrutiny processes. Any recommendations arising from scrutiny work support the Council's corporate strategy and reflect the needs of local residents.
- 12.6. There are no direct equality implications arising as a result of the implementation of the recommendation in this report but there are likely to be equality implications arising as part of the task and finish group's work and there will need to be considered in due course.

13. Climate change and environmental implications

- 13.1. There are no direct climate change or environmental implications arising from the implementation of the recommendations in this report. However, (as outlined above) in February 2019 Lewisham Council declared a Climate Emergency and proposed a target to make the borough carbon neutral by 2030. The declaration tasked the Sustainable Development Committee with scrutinising the Council’s emerging plans. The work of this task and finish group will be in addition to the scrutiny carried out by the select committee. There will be climate change implications arising throughout the review and as part of any recommendations made by the group. These will need to be considered in due course.

14. Crime and disorder implications

- 14.1. There are no direct crime and disorder implications arising from the implementation of the recommendations in this report. Matters considered by the task and finish group may have crime and disorder implications and the task and finish group will need to give due consideration to this.

15. Health and wellbeing implications

- 15.1. There are no direct health and wellbeing implications arising from the implementation of the recommendations in this report. Matters considered by the task and finish group may have health and wellbeing implications, particularly in relation to housing quality and fuel poverty. These issues will be considered as part of the review.

16. Glossary

- 16.1. This list of terms incorporates the standard usage that will be applied throughout the work of the group for example: the term ‘climate crisis’ or ‘climate emergency’ will most often be used in preference to ‘climate change’.
- 16.2. [Link to Oxford English Dictionary here.](#)

Term	Definition
Carbon dioxide	Carbon dioxide (CO ₂) is a naturally occurring gas fixed by photosynthesis into organic matter and is a by-product of fossil fuel combustion, land use changes and other industrial processes. CO ₂ is the principal greenhouse gas associated with human activity and climate change (see below) and the reference against which other greenhouse gases are measured. Unless otherwise indicated the terms ‘carbon’ or ‘carbon dioxide’ are used in this report to refer to a combined measure of greenhouse gases (CO ₂ e or CO ₂ equivalent), of which carbon dioxide is the most common.
Carbon neutral	The term ‘carbon neutral’ is used in this report in line with the original declaration of a Climate Emergency in Lewisham. Carbon neutrality balances greenhouse gas emissions with carbon removals. As defined by the Committee on Climate Change, a net-zero or carbon neutral target requires “deep reductions in emissions, with any remaining sources offset by removals of CO ₂ from the atmosphere”. In the context of Lewisham’s target this means additional carbon removal and storage activity at the borough level or ‘carbon offsets’ funding an equivalent removal outside the borough.

Term	Definition
Climate	Climate is usually defined as the average weather, or more rigorously, as a statistical description in terms of the mean and variability of relevant quantities over a period of time ranging from months to thousands or millions of years. The relevant quantities are most often surface variables such as temperature, precipitation, and wind.
Climate change	Climate change, as used by the United Nations International Panel on Climate Change, refers to a change in the state of the climate that can be identified by changes in the mean and/or the variability of its properties, and that persists for an extended period, typically decades or longer.
Climate emergency	Recognition that a changing climate will have severe and enduring social, economic and environmental implications. Declaration acknowledges the current gap between understanding and the sustained effort needed to meet the challenge of climate change.
Climate emergency action plan	The Council's formal plan to reduce emissions. Formally first adopted in 2020 and reprioritised on an annual basis. It originally consisted of 143 actions across five key themes.
Fuel poverty	The Government's definition of fuel poverty for England and Wales states that a household is said to be in fuel poverty if: they have required fuel costs that are above average (the national median level), and, were they to spend that amount they would be left with a residual income below the official poverty line. There is a direct link between living in cold and damp conditions and poor health outcomes.
Green New Deal	The Mayor of London's plan to reduce emissions (and improve air quality) alongside a programme for skills, job creation and investment.
Housing tenure	Whether someone owns (with or without a mortgage or loan), rents (either from a private landlord – or - the council or a housing association (referred to as social renting)) – or otherwise has formal arrangements for occupying a property.
Retrofit	Retrofit is the introduction of new materials, products and technologies into an existing building to reduce the energy needed to occupy that building. In most cases this would include work to insulate a home – although the two terms are sometimes separated to draw a distinction between technological interventions or appliances (providing heat) and increasing thermal efficiency (retaining heat generated and/or levelling out fluctuating temperatures within a home)

17. Report author and contact

- 17.1. If you have any questions about this report please contact scrutiny managers: Timothy Andrew (timothy.andrew@lewisham.gov.uk) or Katie Wood (katie.wood@lewisham.gov.uk)

Appendix 1 – Task and finish group proforma

<p>Proposed title</p> <p><i>This should be written as a question. What is the main question that you are looking to answer? Ideally use “how” I.e. “How can we improve……XXX?”</i></p>	<p>How can Lewisham Council ensure that we are doing everything we can to retrofit and insulate homes, both owned and managed by Lewisham and in the private sector, in order to reach our Climate Change target by 2030?</p>
<p>Overview</p> <p><i>Provide 2-3 sentences explaining the proposed investigation in more detail including the key areas that you are proposing to look at.</i></p>	<ul style="list-style-type: none"> • Thorough investigation of what is being done to upgrade our housing stock by Lewisham Homes. • Benchmarking - what we are currently doing and how this compares with other London Boroughs of a similar make-up • Best practice from other boroughs and Local Authority advisory bodies – what can we learn to improve and speed up? • Implementation of enforcement of the Minimum Energy Efficiency standards infringements by private landlords. Is there a way to make this work and pay for itself? • What can we do as a Local authority to help home owners to upgrade their own homes? • Can this work, both of private and publicly owned housing, be part of a wider economic recovery for Lewisham Post-Covid and be our own “Green New Deal” creating local jobs in this sector?
<p>Reason for proposal</p> <p><i>Why do you think that a task and finish group is the most appropriate way to address this issue / answer this question? Where has the suggestion come from? (I.e. through resident engagement, casework, external inspection, performance information.)</i></p>	<p>We have discussed with officers, involved in the Climate Change work of the council, which issue they feel is the most pressing and this was clearly the most important. Currently we need to retrofit at least 80% of Lewisham’s housing stock which equates to 28 houses per day in order to reach our climate goals, and with every passing day this number increases. The cost of getting this work done will rise as the task increases in size and becomes more pressing, plus the value of the improvements for residents will be greater the earlier the work is completed.</p>

Is this report easy to understand?

Please give us feedback so we can improve.

<p>Policy Context</p> <p><i>How does the proposal support delivery of the Lewisham Corporate Strategy; national/regional policies, initiatives; legislation etc.</i></p>	<p>The Corporate Strategy states our housing aim to be:</p> <ul style="list-style-type: none"> • Everyone has a decent home that is secure and affordable <p>This Task and Finish group will work towards making housing more affordable, particularly in terms of energy costs and will focus on those most in need.</p> <p>Although the Corporate Strategy does not explicitly set goals towards reducing our carbon emissions we passed a Climate Emergency Motion in 2019 which states the aim of Lewisham Borough to be Carbon Neutral by 2030 and to do this the Council should:</p> <ul style="list-style-type: none"> • Set specific and measurable targets to reduce carbon emissions for the Council and for the borough as a whole, including costed milestones to zero-carbon. • Consider systematically the climate change impact of each area of the Council's activities • Increase local resilience to climate impacts already in the system. • Continue to prioritise support for vulnerable residents through the Council's fuel poverty programmes working with partners at a community, borough wide and regional level to provide advice services and access to funding for heating, insulation and ventilation. • Accelerate existing programmes to deliver reductions in greenhouse gas emissions including delivery of heat networks in the borough, low carbon development and high quality housing, an efficient and low carbon corporate estate and support for renewables and for community energy • Work with partner bodies across the borough and across London to ensure the climate emergency is adequately reflected in the development and implementation of all borough wide strategies and plans. • Draw up a communications strategy to support delivery of a Zero-Carbon Lewisham and enable Lewisham residents to make low carbon choices. <p>The GLA has pledged to make London Carbon Neutral by 2050</p> <p>The National target is 2050 together with a new target of 68% reduction in greenhouse gas emissions by the end of the decade compared to 1990 levels.</p>
---	--

Is this report easy to understand?

Please give us feedback so we can improve.

Page 26

Go to <https://lewisham.gov.uk/contact-us/send-us-feedback-on-our-reports>

<p>Criteria for the investigation</p> <p><i>(Essential)</i></p> <ul style="list-style-type: none"> • <i>Is the proposed investigation timely? Why?</i> • <i>Is it a strategic and significant issue? How?</i> • <i>Is it of concern to one or more sections of the population? Who?</i> <p><i>(Desirable)</i></p> <ul style="list-style-type: none"> • <i>Is the issue of concern to partners or stakeholders? How?</i> • <i>Will the investigation add value in terms of improving the council's or partner's performance or service delivery? How?</i> • <i>Will the investigation be duplicating any other work? What?</i> • <i>What control or influence does the Council have in this area?</i> 	<p>The proposal is timely because we have an extraordinarily huge task to reach our target of carbon neutrality by 2030 and unless we tackle the problem of how to control emissions from public and private housing stock we cannot reach this target. The quicker we work towards this target the easier and more efficient the journey will be.</p> <p>Post-Covid, the climate crisis will be one of the key drivers of all decisions made by the council as it will have to fulfil its responsibility to reach the targets set by both the GLA and National Government above.</p> <p>Climate Change will affect everybody, but the costs of increasing energy bills, contraction of economies, and migration of populations will hit the poorest in our community the hardest. Therefore we have a duty to do everything we can to mitigate this by acting now to reduce housing costs.</p> <p>The issue will be of interest to Lewisham Homes, as we will need to investigate their plans for how they will be retrofitting their housing stock.</p> <p>By increasing the amount of housing that is retrofitted we will improve the living conditions of those who rent from Lewisham Homes. Residents living in private accommodation which do not fulfil the required legislative standards will see an improvement in their living conditions.</p> <p>We have a team of highly committed officers working on our climate change policy but this work aims to support this team and we have checked with all parties to ensure that we are not duplicating their work.</p> <p>Lewisham Homes is developing a new Asset Management Strategy which is due to be presented to their board for approval soon. This document will, in part, include the work of Lewisham Homes on updating and maintaining all assets. Therefore this group would want to interrogate this document as soon as possible and possibly make recommendations as to possible amendments.</p> <p>The Council, through Lewisham Homes is responsible for the social housing stock of the borough, which needs to be brought up to a standard that fulfils our carbon target. We also have powers of enforcement over the rented sector.</p>
<p>Sources of evidence</p> <p><i>Do you have any thoughts/ideas on where you might gather evidence from? e.g. research or site visits. (Officers will be able to recommend suggestions and help with this.)</i></p>	<p>We would like to do the following (not exhaustive):</p> <ul style="list-style-type: none"> • Investigate good practice from other boroughs who have made good inroads into retrofitting to find out how this can be done efficiently and at speed. Possibly invite a representative from a council to speak to the group. • Investigate good private sector practice and how home owners can take affordable action on their own homes

Is this report easy to understand?

Please give us feedback so we can improve.

	<p>(possibly hear from the Association of Environmentally Conscious Builders)</p> <ul style="list-style-type: none"> • Take advice/read papers from APSE, LGA and co-operative Councils Innovation Network • Through APSE find examples of councils doing good work on enforcement of private landlords and take advice on how to make this cost-effective. • Investigate any possible grants available to help with funding. • Learn from other councils how they have either created a commercial body to implement this work or assisted in any way to help local companies to ensure that we create a benefit to our local economy.
<p>Co-optees / Technical advisors?</p> <p><i>Would the task and finish group benefit from having expert input such as an academic or local expert?</i></p>	<p>It would be useful for the group to have an over-view of the types of retrofitting and insulation available, and the costs of this work. Therefore, an expert in this field, either from the private or public sector, would be good to hear from.</p>
<p>Suggested timeframe</p> <p><i>Do you estimate / suggest that the investigation take 3, 6, 9 or 12 months? Outline your suggested timetable for evidence gathering.</i></p>	<p>We plan to take 9 months on this piece of work from June 2021 to February 2022. Finishing in February will avoid conflict with the run up to the May elections in 2022. We will prioritise the work so that should the scope be too large to be covered in 9 months a separate smaller project could be carried into the following administration. Advice from scrutiny officers will be sought during the initial scoping meeting as to how to structure the meetings, use of officer time and when to invite experts etc to inform members.</p>
<p>Equalities Impact</p> <p><i>Identify any equalities issues that might be applicable.</i></p>	<p>This work will affect all residents but in particular it will have the most positive effect on the poorest members of our community.</p>
<p>Councillor(s) submitting the proposal</p> <p><i>Please list the names of the submitting councillor(s)</i></p>	<p>This is being submitted by Cllr Louise Krupski who will be acting as chair of the group. Cllrs who have agreed to be part of the group are: Cllr Patrick Codd, Cllr Aisling Gallagher, Cllr Tauseef Anwar, Cllr Stephen Penfold.</p>

Appendix 2: 'sustainable housing' extract from Lewisham's climate emergency action plan 2021

2.1.1	<p>Deliver a new Asset Management Strategy that sets out a new ambition for energy and carbon performance across the Lewisham Homes' stock including: The requirements of achieving a minimum of SAP 86 EPC B across the Lewisham Homes stock.; Ensuring new build developments comply with existing and emerging local and national policy and legislation including SAP10.1 methodology (and future upgrades of SAP); Includes a focus on improving property ventilation; Sets out an option appraisal on poorly performing properties.</p>	2020/21	<p>Lewisham Homes has developed a new Asset Management Strategy during 2020 which will be presented for Board approval in Q4 2020 / Q1 2021.</p>
2.1.2	<p>Develop a new strategic approach to decarbonising heating across the stock with the aim of centralising plant and creating opportunities for heat networks. Assess the opportunities and risks of technologies such as heat pumps, and improvements to existing electric heating systems and storage heaters identify the optimum approach to boiler replacements.</p>	2020/21	<p>A new Heating Options Strategy has been in development and is expected in Q3 2021. The outcome from LBL North Lewisham study to establish new future proofing policy for retrofitting/cladding blocks. Funding will be a key constraint in terms of meeting the ambitions of Lewisham's Climate Emergency declaration. An application for funding under the Government's Green Homes Grant Local Authority Delivery scheme was submitted in partnership with Lewisham Council.</p>
2.1.3	<p>Raise standards in existing communal heating systems, ensuring compliance with regulation and installing metering and improved controls to systems. Develop a planned maintenance and investment plan that is informed by the emerging strategic approach to decarbonising heating across the stock.</p>	Short term	<p>The impact of COVID19 has limited potential for works beyond core maintenance to communal heating systems in 20/21 due to COVID. The future approach to communal systems will be aligned with the Energy Masterplanning work published by Lewisham Council and the potential to upgrade systems to benefit from decentralised energy and heat networks.</p>

2.1.4	Review procurement policies to increase the sustainability of major works, including selecting lower carbon materials and reusing structures and construction materials where possible.	Short term	This will be included in the Lewisham Homes Sustainability Strategy (see 2.2.1)
2.1.5	Delivery within the Lewisham Home's major works programme of cladding improvements that deliver improved thermal efficiency combined with the highest standards of building safety.	Medium term	Lewisham Council and Lewisham Homes were successful in a bid for £825k funding under the Government's Green Homes Grant Local Authority Delivery funding that will support window and insulation improvements benefiting 165 Lewisham Homes' properties.
2.1.6	Review and identify the financial, technical, operational and resident satisfaction implications of delivering a new homes programme to a carbon neutral standard, to include a understanding of: Building new homes to Passive House Standards (achieving a SAP rating of 92-100/EPC A); Delivering Energiesprong or similar retrofits; Early adoption of no gas; Meeting the new LETI (London Energy Transformation Initiative) design standard. Use the outcomes from the assessment to push central government and others for additional funding, investment in new technology, regulatory change and other actions that will enable this to be delivered in Lewisham.	Short term	This action will be addressed as part of proposals in the Asset Management Strategy.

2.1.7	Implement lessons learned from good practice elsewhere and the assessment in 2.1.6 into delivery on a scheme-by scheme basis including in relation to: the use of pre-manufactured elements; air/ ground source heat pumps; district heat networks; mechanical ventilation heat recovery (MVHR) units; alternative fuels and battery storage; energy efficient heating including underfloor; external shading devices; decentralised heating; green / living roofs and walls; sustainable drainage; AECB (Association of Environmentally Conscious Builders) standards; waste water heat recovery systems; smart water use; procurement and sourcing all materials and products from within 30 mile radius of site.	Medium term	This action will be addressed as part of proposals in the Asset Management Strategy.
2.1.8	Evaluate the application of the 'Soft Landings Framework' to new build projects.	Short term	This action will be addressed as part of proposals in the Asset Management Strategy.
2.2.1	Publish a Lewisham Homes to Sustainability Strategy document setting out an overarching approach to carbon reduction aligned to the Lewisham Homes' Asset Management Strategy. Set out baseline environmental performance metrics	2020/21	A Sustainability Strategy draft has been prepared and will be presented for Board approval in Q4 2020 with Q1 2021 for completion and sign off.
2.2.2	Develop a sustainable working protocol for LHL employees, to include: sustainable staff travel policy, recycling, office etiquette; An updated Employee Code of Conduct; Encouraging vegan catering, local sourcing of supplies; A ban on single-use plastic except where there's a specific health and safety reason.	2020/21	This work is currently on hold. The move to Laurence House was announced following this action's inclusion in the Climate Emergency Action Plan, and further work on this is to be integrated into any new post-covid return to work strategy, or a longer term work from home/agile working strategy. Expect clear directives to enable progression on this by Q2 2021

2.2.3	Ensure the Old Town Hall refurbishment promotes a sustainable office environment, including: Agile working; Improved cycling facilities and changing rooms; A paperless environment; Installation of smart and energy efficient products such as LED lighting, smart meters and water meters.	Short term	This work is currently on hold. The move to Laurence House was announced following this action, and further work on this is to be integrated into any new post-covid return to work strategy, or a longer term work from home/agile working strategy. Expect clear directives to enable progression on this by Q2 2021
2.2.4	Incrementally upgrade the Lewisham Homes' fleet to low emission combustion and hybrid with the aim of becoming fully powered by renewable electricity as soon as is practicable.	Short term	This work will be integrated into the Sustainability Strategy (2.2.1)
2.2.5	Recruit 100 resident 'Eco-Champions'.	2020/21	The Lewisham Homes comms team provided the residents who attended the "climate emergency boot camp" in 2019 with a summary of the discussions held. In-person resident engagement currently on hold, but LH are reviewing opportunities to host similar sessions online going forwards and one idea is to begin recruiting ECO Champions from attendees of the boot camp. A new resident engagement plan needed to properly plan for recruitment and education of resident ECO-Champions to ensure they are given the right tools and platform and with someone to manage internally. Discussion for progression by Q2 2021.
2.2.6	Develop a draft Sustainable Estate Parks and Gardens strategy.	2020/21	In development with a date of Q1 in 2021 for approval.
2.3.1	Assess the actions and investment needed to get all domestic buildings in the borough to an average of EPC Band B and develop more sophisticated methods of identifying which properties are energy inefficient, targeting resource where there will be most impact.	Short term	The council asks for Energy Performance Certificates as part of the licensing process. Officers check all licensing properties for hazards, which include excessive cold. If this is present in the property the works required to retain licence require measures on thermal efficiency.

2.3.2	Inspect all HMOs (house in multiple occupation) in the borough over 5 years, an estimated 6,000 properties, as part of the HMO expanded licensing scheme. Inspections will focus on the eradication of category 1 and 2 hazards on cold and thermal efficiency, especially for vulnerable residents.	Short term	This scheme paused during lockdown and is yet to be restarted. Officers continue to inspect mandatory and existing scheme additional properties.
2.3.3	Apply to the Secretary of State for a borough-wide licensing scheme with the intention of rolling out licensing to all 26,000 privately rented properties. Inspections of these properties will be conducted on a risk basis including analysis of potential poor standards in the stock, with a particular focus on damp and cold.	Short term	This is currently paused as a result of the impact of COVID19.
2.3.4	Explore the potential to provide a discount on the licence fee if the landlord takes the EPC rating of their property to C or above and assess whether further discounts could apply for ratings above C.	Short term	The Council is not currently offering this for mandatory or additional properties falling into existing scheme
2.3.5	Use the Council's online presence such as web pages and social media to promote energy efficiency advice to landlords.	Short term	The impact of the pandemic on capacity has reduced scope to do this.
2.3.6	Take enforcement under the Domestic Minimum Energy Efficiency Standards Regulation, which allow us to issue a Community Protection Notice (CPN) for renting accommodation under an EPC rating of E.	Ongoing	Budget proposals agreed by Mayor and Cabinet in December 2020 include plans for a significant and cross-cutting review of all Council enforcement activities be undertaken to deliver more customer-focussed, consistent, efficient, integrated and effective enforcement services. This will deliver a target operating model based on intelligence, evidenced demand and priorities and allow effective deployment of resource to deliver improved outcomes for the community. The Government is currently consulting on raising the minimum

			standard of EPCs.
2.3.7	Engage with landlord accreditation schemes that promote energy efficiency.	Short term	We offer a 20% discount for accredited landlords. This includes the RLA, who are running this campaign and the London Landlord's Accreditation scheme that promotes itself on the basis of being able to assist landlords to obtain grants to improve thermal efficiency (among other things).
2.3.8	Ensure all accommodation used as temporary accommodation by the Council meets the Minimum Energy Efficiency Standards including the current requirement for EPC rating E or above and has all the required gas and electrical certification.	Short term	All properties utilised by the Council for the provision of temporary accommodation have to meet the Council's health and safety compliance requirements. This process involves accommodation providers, producing a number of health and safety documents for properties that they provide to the Council. These documents include an EPC, Gas Safety Certificate and Electrical Installation Condition Report. The Council has also appointed a Compliance Officer, who is solely responsible for monitoring and managing all health and safety documents for the Council's TA portfolio. This includes monitoring when certificates expire and ensuring providers produce in date complaint certificates in the required timeframe.
2.3.9	Support a new PRS renters' union across the sector to provide a forum for renters; allowing us to raise awareness of the Climate Emergency and measures to tackle it and the union to flag up specific concerns to be addressed	Short term	Officers continue to liaise with the lead member for Housing to establish the best way of supporting a PRS renters union, and will use this union to raise the Climate Emergency and measures that can be taken to address this challenge.

2.3.10	Develop a programme to target high risk streets and neighbourhoods with tailored advice including the publication and promotion of initiatives.	Short term	Street surveys are not practical at present owing to the high level of risk assessment and planning that has to go into each property visit to be Covid safe. The Council's Lewisham Healthy Homes, providing practical energy advice to vulnerable residents offers households at risk of fuel poverty free and independent advice and support.
2.3.11	Develop the use of discretionary grant to support home owners. Roll out an active campaign to use this grant to improve energy standards in those properties that require it most.	2020/21	The Grants team recognises fuel poverty contributes to social and health inequities so to ensure we pick up on these households, we make every contact count. All of the team are trained to identify hazards which contribute to poor energy efficiency. When our surveyors inspect properties where applications have been made for discretionary assistance such as Emergency Home Repairs Grant (EHRG) and Home Repairs Grants (HRG) an assessment is carried out to ensure the heating in the property is sufficient, no damp is present, adequate ventilation exists and windows are checked to ensure they are effective during an Housing, health and Safety rating system (HHSRS) inspection. Grant officers identify and eliminate Category 1 and 2 hazards most of which contribute to poor energy efficiency. Where it is identified there may be a problem we offer a free gas check and provide boiler works up to £500. Our Health and Housing Coordinator who works from University Lewisham Hospital provides a referral pathway for those who attend or are admitted to hospital, suffering ill health due to a cold home.
2.3.12	Actively participate in a pan-London 'Setting the Standard' initiative that will support inspections of the worst standard of accommodation B&Bs, working to support enforcement action taken in Lewisham and other boroughs to drive up property standards.	Short term	LBL is one of 31 boroughs that has signed up to the pan London framework 'Setting the Standard'. LBL has a key contact that has been a part of all of the working groups and is up to date with all STS requirements. The project is currently in the provider on boarding stage and LBL is engaging with its providers to encourage them to sign up to the STS portal. LBL has set the PSHA group email as the contact to receive any

			Category 1 hazards identified, with a key contact who will allocate each notification to the appropriate enforcement officer.
2.3.13	Introduce new technology and approaches to identifying cold houses, such as external surveying tools or internal monitoring equipment and including collaboration with a MHCLG funded Greenwich pilot.	Short term	We are building partnerships with other teams and organisations to identify household with poor Energy Performance Certificates (EPC) ratings E,F or G in order to offer owners grant assistance. Linking into existing partnerships and developing new partnerships to develop new referral pathways – by using the New digital Economy Act 2017 powers to access data of households in Lewisham suffering from fuel poverty for the purpose of alleviating it. Raising awareness amongst frontline workers in Adult Social Care and Hospital Staff, GP Surgeries and schools will also ensure that vulnerable households are identified and targeted. All of our Surveyors carry hydrometers to ensure where damp is identified they have the tools to measure how severe the damp is.
2.3.14	Work with the GLA, London Councils and other London Boroughs to support the development of an offer to ‘able to pay’ home owners to increase home retrofit projects and to build trust and a joined-up approach in the supply chain to promote and respond to demand for home retrofits, such as affordable and independent whole-house audits.	Short term	Lewisham Council is part of 'Retrofit Together' a new platform that will offer home owners access to independent advice on home retrofit and access to suppliers that can deliver accredited works.
2.3.15	Explore potential for working with local community organisations to support bulk purchasing schemes that reduce the costs to homeowners of home energy	Short term	The Council is working with the Greater London Authority on future rounds of the pan-London solar together initiative and supports the work of South London Community Energy on community energy schemes. Officers have promoted the

	improvements.		Mayor of London's Community Energy Fund to local groups.
2.3.16	Investigate ways to ensure Lewisham grants are advertised on the government 'save energy' platform and promote the schemes available through the platform to residents.	Short term	The Housing team works closely with the Climate Resilience Team who lead on the South London Energy Partnership in order to promote our grants. This allows us to link in with or top up existing government energy schemes to ensure home owners in Lewisham have energy efficient properties.
2.3.17	Apply minimum insulation and efficiency standards to works undertaken at homeowners' properties.	2020/21	The Disabled Facilities Grant team will use grant agreements to raise the thermal efficiency of properties including meeting minimum energy efficiency standards.
2.3.18	Engage local registered social providers to encourage sharing of practice on carbon reduction and supporting all RPs to take meaningful action in relation to their stock in the borough.	2020/21	COVID19 has disrupted partnership engagement but officers have recently introduced a more regular liaison process with registered providers to address strategic concerns and to share best practice around housing issues in Lewisham. This group will be used as the vehicle to open up discussions on this action, from where activity against this action will become a more ongoing concern.
2.3.19	Officers within the Private Sector Housing Agency team will use public transport for all routine inspections.	2020/21	At present this cannot be implemented without a potential impact on officer health and safety and so is currently not in force.
2.4.1	Expansion of the South London Energy Efficiency Project led by Lewisham, providing practical support to vulnerable residents in south London. Support 1,600 households in 2019/20. Seek external funding and partnerships to deliver the same in 2020/21.	2020/21	Lewisham Council leads the South London Energy Efficiency Partnership covering 12 South London Boroughs. The partnership has accessed funding to deliver the South London Healthy Homes programme from a wide range of sources including the Greater London Authority, the Ofgem Redress Funds, British Gas Trust, UK Power Networks and

			boroughs. The South London Healthy Homes programme expects to support 2,895 households in 20/21.
2.4.2	Support low income and vulnerable residents in accessing external sources of funding for heating, insulation and ventilation.	2020/21	This action is being delivered as part of 2.4.2 and figures for funding accessed and measures installed will be reported at the end of 20/21
2.4.3	Undertake an assessment of the equalities implications of climate change and of the actions at national, regional and local level to reduce carbon and work with partners to find additional ways to support affected groups to mitigate the impact. Review the use of the Climate Just tool to understand the impact across different communities in the borough.	2020/21	Budget has been secured from once off funding but the work has not progressed due to pressures from COVID19.
2.5.1	Adopt a new Local Plan for the borough with Climate Emergency embedded within the document and development management policies supporting delivery of the ambition to be carbon neutral including achieving the London Plan policy for major developments to be zero carbon. We will seek that proposals for new self-contained major and minor residential development achieve the BRE Home Quality Mark and that proposals for major residential domestic refurbishment achieve a certified 'Excellent' rating under the BREEAM Domestic Refurbishment 2014 scheme, or future equivalent; and that proposals for new non-residential development of 500 square metres gross floor space or more, including mixed-use development, achieve an 'Excellent' rating under the BREEAM New Construction (Non-Domestic Buildings) 2018 scheme,	2020/21	The plan was approved at Council in November 2020 and public consultation (the Regulation 18 stage) is now underway.

	or future equivalent. We will seek that development proposals for major non-residential refurbishment, including mixed-use development, achieve a certified 'Excellent' rating under the BREEAM Non-Domestic Refurbishment scheme, or future equivalent.		
2.5.2	Monitor and report on the transition to a carbon neutral borough through implementation of the new Local Plan through the Authority Monitoring Report process to regularly assess performance against our strategic planning objectives.	2020/21	Data has been provided as part of the Authority Monitoring Report process.
2.5.3	Ensure that developments which cannot meet onsite carbon targets comply with policy through payment into Lewisham's carbon offset fund. The Fund will be used to drive local innovation and investment in ways that meet our objective to ensure our Climate Emergency responds to the needs of vulnerable residents. Annex B sets out further details of the approach we propose.	Short term	Engagement with developers has continued through 2020 with the aim of seeking to maximise the level of onsite delivery to meet planning policy but where this cannot be achieved the use of the Lewisham Carbon Offset Fund.
2.6.1	Work with Veolia to implement the joint memorandum of understanding agreed with the Council to deliver opportunities to utilise unused heat from the SELCHP	Short term	Officers are supporting Veolia's work to deliver the funding they have received to connect Convoys Wharf and the SELCHP facility.

	facility to supply local homes.		
2.6.2	Work with Lewisham Homes to evaluate the potential for connecting properties to a network supplied with heat from SELCHP.	Short term	Officers completed an externally funded study assessing potential for connecting existing blocks in the north of Lewisham and making recommendations to future proof Lewisham Homes cladding works to facilitate connections as heat networks develop. This work will inform Lewisham Homes Asset Management Strategy.
2.6.3	Carry out a borough-wide energy masterplanning study to assess opportunities for clusters of heat demand and identify the potential low carbon solutions to meeting that demand. This masterplan will inform planning guidance, development of the Council's new build housing programme and refurbishment plans for the Council's existing housing. The masterplan will be completed in 2020.	2020/21	In 2020 the Council published the outcome of energy masterplanning work https://lewisham.gov.uk/-/media/files/imported/accessible-lewisham-energy-masterplan.ashx?la=en that shows the potential role decentralised heating could play in Catford, Lewisham and the north of the borough. Further funding from the Government's Heat Network Investment Programme has been accessed to undertake detailed technical and economic assessments needed to progress this work and underpin the development of the Council's strategic approach.
2.6.4	Use new development management policies from the Local Plan and the borough-wide masterplanning to direct new connections and support viability of new heat networks.	Short term	A key output from the energy masterplanning and strategic heat decarbonisation study completed in 2020 is a greater geographical focus on ensuring that new developments fully contribute to areas of opportunity for decentralised energy. This will be further reinforced by the new Lewisham Local Plan.
