SGN (Quod obo)	- 3	General LSA SA 01	<p>1 Introduction</p> <p>1.1 Quod is instructed by Scotia Gas Network (SGN) to submit representations to Lewisham Council in respect of its Regulation 18 – Local Plan “Main Issues and Preferred Approaches”. These representations are submitted within the consultation period of 15th January to 11th April 2021.</p> <p>1.2 SGN supports the Council’s ambition for growth and renewal across the borough and particularly towards the Bell Green / Lower Sydenham area. SGN is the owner of the ‘Former Bell Green Gas Holders’ (the “gas works site”) – Site Allocation 1, and to which these representations are principally focussed towards.</p> <p>The Site</p> <p>1.3 SGN is the current owners of the 0.77-hectare gas works site allocated for redevelopment within the Regulation 18 draft Local Plan. The site previously contained two gas holder structures that were removed in 2019 following the grant of prior approval for their removal under application DC/18/107607, which was determined in July 2018.</p> <p>1.4 SGN has previously engaged with Lewisham Council in promotion of the site for redevelopment as part of the adopted Local Plan – Site Allocations (2013), which identified the gas works site as part of wider Site Allocation SA26 (2013 Site Allocation Local Plan) for the Former Bell Green Gasworks (Phases II & III), Sydenham, SE26, which extends across 9.7 hectares.</p> <p>1.5 The existing SA26 allocation comprises Phase 2: Mixed use business, industrial or warehouse, non-food retail units and associated garden centre, restaurant and retention of Livesey Memorial Hall as a social club; and Phase 3: Mixed use residential and retail. The site is adjacent to the Sainsbury's supermarket at Bell Green, which was developed as Phase 1.</p>	The supplementary information is noted.	No change.

			<p>1.6 In support of the adopted Local Plan’s ambition, the existing site allocation SA26 has been the subject of large levels of development with Phase 2 and Phase 3 of the allocation built out to deliver the Bell Green Retail Park (DC/11/78646) and Pear Tree Court (DC/09/72403). At the time of the Local Plan adoption in 2013, the Gasworks were considered to be operational gas holders, to which the Health and Safety Executive PADHI guidance applied and therefore restricted the site’s redevelopment as part of the adjacent Phase 2 and Phase 3 developments.</p> <p>1.7 The gas works continues to be the subject of a Hazardous Substance Consent. SGN will ensure that this is revoked prior to the site coming forward for development.</p> <p>1.8 In view of its undeveloped status, the redevelopment of the gas works site continues to be promoted through the Regulation 18 Local Plan under Site Allocation 1, for a comprehensive mixed-use development with an indicative capacity of up to 178 homes, and up to 1,563sqm of non-residential floorspace. SGN remains supportive of the redevelopment ambition for the gas works site albeit believes that the current indicative capacity fails to optimise the residential capacity of this site in line with the adopted London Plan and wish to engage with Lewisham Council as part of the emerging Local Plan to address this.</p> <p>1.9 SGN worked with the Mayor of London to inform the policies of the adopted London Plan. Policy H1 allocates gasworks sites as a strategic source of housing, and footnote 59 specifically recognises the challenges of bringing forward these sites for development.</p>		
SGN (Quod obo)	- 3	General LSA SA 01	<p>2 Gasworks Policy - Conformity with National Planning Policy Framework and the London Plan</p> <p>2.1 SGN welcomes the opportunity to contribute to the emerging Regulation 18 Local Plan, which shall guide development across Lewisham. The Sydenham Gas Holder site represents a key development site within the wider Lewisham South area.</p> <p>2.2 Within this section, we identify national policy and London Plan policies that specifically relate to the redevelopment of gas works sites and which will need to be taken into account by Lewisham Council in formulating their site-specific allocation to ensure a sound approach.</p> <p>2.3 National Policy1 stipulates that plans and decisions should apply a presumption in favour of sustainable development.</p> <p>2.4 For plan-making this means that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change.</p> <p>2.5 Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound.</p> <p>2.6 Plans are ‘sound’ if they are:</p>	The supplementary information is noted.	No change.

		<p>a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.</p> <p>b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and</p> <p>d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.</p> <p>2.7 These tests of soundness will be applied to non-strategic policies in a proportionate way, taking into account the extent to which they are consistent with relevant strategic policies for the area.</p> <p>2.8 To meet the tests of soundness, the Regulation 18 Local Plan must remain in conformity with the London Plan and National Planning Policy. Below, we provide a detailed explanatory note of policy relevant to gasworks sites.</p> <p>National Planning Policy Framework</p> <p>2.9 The National Planning Policy Framework 2019 (“NPPF”) sets out the Government’s planning policies for England and how these are expected to be applied. It is an important material consideration when considering how to formulate and apply planning policy to planning decisions.</p> <p>2.10 The NPPF contains national policy on a range of topic areas including decision making, viability, affordable housing, design, open space, heritage, and the economy. The <i>“presumption in favour of sustainable development”</i> remains the central tenet of the NPPF.</p> <p>2.11 Significantly, the NPPF refers specifically to the need to deliver more homes, at a greater density, on brownfield land, especially on land that is contaminated.</p> <p>2.12 This is, in part, a reflection of the work that gas works companies have undertaken with Government to create a policy framework which supports and promotes the delivery of heavily contaminated sites for homes. This is important due to the <i>‘Do Nothing’</i> scenario which is a real consideration whereby the revenue generated by development is not sufficient to offset the abnormal costs. In such cases, the gas works site will remain in situ and underdeveloped, as has been evidenced across much of the UK.</p> <p>2.13 The Government’s objective of <i>“significantly boosting the supply of homes”</i> is a clear national policy objective as set out in the first paragraph of Chapter 5 of the NPPF, <i>‘Delivering a Sufficient Supply of Homes’</i>.</p> <p>2.14 National policy requires strategic policy-making authorities to have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability,</p>		
--	--	---	--	--

			<p>suitability and likely economic viability. Local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old.</p> <p>2.15 Chapter 11 of the NPPF sets out policies for <i>'Making Effective Use of Land'</i>. Planning policies and decisions should promote the effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously developed or brownfield land.</p> <p>2.16 National policy sets out the Government's approach to brownfield contaminated land, giving <i>"substantial weight"</i> to its redevelopment and remediation at Paragraph 118 Part (c), which is set out below:- <i>"(c) give substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs, and support appropriate opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land"</i></p> <p>2.17 It also promotes and supports the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing, where land supply is constrained, and available sites could be used more effectively.</p> <p>2.18 Chapter 11 considers the objective of achieving appropriate housing densities. The Government expects planning policies and decisions to support development that makes efficient use of land, taking into account viability. At Paragraph 123, national policy expects the optimal use of a site for housing. <i>"Where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site"</i>.</p> <p>2.19 National planning policy promotes the redevelopment of gas works site for housing, at optimal densities affording substantial weight to the value of using suitable brownfield land for homes.</p>		
SGN (Quod obo)	- 3	General LSA SA 01	<p>London Plan</p> <p>2.20 The recently adopted London Plan (2021) carries significant weight due to its conformity with the NPPF and recent testing at the examination in public. Importantly specific consideration has been applied to gas works sites, and they are referenced throughout the Plan. The reason for this is that gas utility companies (including SGN) were able to work with the GLA to examine the evidence base behind the challenges of delivering gas works sites. The background evidence base, as well as the determination of live planning applications considered by the GLA has helped to inform these policies, which have been subject to extensive and detailed consultation, review and examination in public. They have been found sound and are now formally adopted.</p>	The supplementary information is noted.	No change.

		<p>2.21 Three principal issues informed the policy debate. We consider these below and in assessing these factors conclude that the development of gas works sites can be treated as an exceptional form of development within London.</p> <p>Are gas works sites subject to abnormal costs?</p> <p>2.22 The evidence base to the London Plan (2021) recognises that remediation costs of gas works sites are significant. The London Industrial Land Demand Study 2017 explicitly recognises the limitation of land contamination at gas works sites, its cost, and the requirement to incentivise development through higher land values. It confirms the following: <i>“Land contamination can constrain the future of such land (e.g. for former gas holder sites): decontamination works are costly and can require the incentive of higher land values (e.g. from residential developments)”.</i></p> <p>2.23 The abnormal costs will be experienced at the very start of the project, which can also result in long lead in times as the environmental planning considerations are addressed (remediation, water sampling etc).</p> <p>2.24 Decontamination costs were considered at the Tower Hamlets Local Plan 2031 Examination in Public (September 2018). The Council’s evidence base to the examination included the Tower Hamlets Local Plan Viability Assessment 2018 Paragraph 7.17. This considered three Gasholder sites within its borough concluding that <i>“we have included an allowance of £3.2m/ha for the sites, based on our experience of the costs associated with decontamination of similar Gas Works sites in London”.</i> This is a conservative figure as it relates only to decontamination costs rather than other costs such as the need to relocate gas infrastructure on site to facilitate redevelopment; rationalise high pressure gas mains; the erection of new Pressure Reduction Stations; and the removal of gasholder structures on site. However, it remains a significant cost.</p> <p>2.25 Notwithstanding this, Tower Hamlet’s own viability evidence found that the three gas works sites could not deliver policy compliant levels of affordable housing (an average maximum reasonable affordable housing provision of 20% was evidenced across the three sites). To ensure deliverability for the purposes of the Local Plan Tower Hamlets found it necessary to identify lower levels of affordable housing (flexible tenure mix) or ensure policy flexibility through increased density and a flexible approach to housing mix to achieve a policy compliant level of affordable housing.</p> <p>Can gas works sites contribute strategically to the delivery of housing in the capital. If they can, should they be subject to affordable housing thresholds and review mechanisms which apply to industrial sites that are brought forward for housing?</p> <p>2.26 The London Plan categorises gas works sites as surplus utility sites, and these sites are identified as a strategic source of housing.</p> <p>2.27 Policy H1 <i>‘Increasing housing supply’</i> is the principal housing delivery policy of the London Plan (2021) and its purpose, as the policy name suggests is to increase housing supply across London. Part B(2) states that Boroughs should <i>“optimise the potential for housing delivery on all suitable and available</i></p>		
--	--	--	--	--

		<p><i>brownfield sites through their Development Plans and planning decisions, especially the following sources of capacity...".</i></p> <p>2.28 The policy lists six strategic sources of housing capacity. Sub paragraph (d) is relevant to gas works sites and identifies them for redevelopment as a strategic source of housing: <i>"d) the redevelopment of surplus utilities and public sector owned sites."</i></p> <p>2.29 Surplus utilities are distinguished from other categories of sites. For example, industrial sites planned for release under Policies E4, E5, E6 and E7 are a separate sub-category at Policy H1(b)(2)(f).</p> <p>2.30 Utilities sites are also considered in the Strategic Housing Land Availability Assessment 2017 (SHLAA) which forms part of the evidence base for the adopted London Plan (2021). The SHLAA confirms that <i>"surplus utilities sites"</i> have been retained within the 10-year housing target where they have been promoted for redevelopment unlike designated industrial sites.</p> <p>2.31 To incentivise and de-risk the delivery of surplus utilities sites, the London Plan (2021) exempts gas works sites from the London-wide affordable housing requirement (50%) applied to other industrial sites by Policy H4. Instead, it recognises that gas works sites will have a lower affordable threshold and exempts them from late-stage reviews, where challenges to delivery are evidenced.</p> <p>2.32 Footnote 59 of the new London Plan specifically sets out what tests surplus utility sites should undertake to demonstrate the challenges of delivery. Footnote 59 recognises the substantial costs of preparing surplus utilities sites for development. It therefore (inter alia) confirms that surplus utility sites can be subject to the 35% affordable housing fast track approach, conditional upon evidence being provided of extraordinary costs. <i>"It is recognised that some surplus utilities sites are subject to substantial decontamination, enabling and remediation costs. If it is robustly demonstrated that extraordinary decontamination, enabling or remediation costs must be incurred to bring a surplus utilities site forward for development, then a 35 percent affordable housing threshold could be applied, subject to detailed evidence, including viability evidence, being made available".</i></p> <p>2.33 Gasworks sites are therefore capable of having a 35% threshold level of affordable housing applied and follow the Fastrack Route. The Mayor requires the demonstration of decontamination requirements, and that enabling, or remediation costs must be incurred to bring surplus utility sites forward for development.</p> <p>2.34 In accordance with the approach taken across London to date, evidence will be submitted to demonstrate substantial decontamination, enabling and remediation costs during the pre-application process.</p> <p>Can gas works sites viably contribute towards London's industrial floorspace capacity?</p>		
--	--	---	--	--

			<p>2.35 The challenges of delivery of gas works sites are reflected in the economic policies of the London Plan.</p> <p>2.36 Supporting text to Policy E4 (Land for Industry, Logistics and Services to Support London’s Economic Function) previously confirmed that the principle of no net loss of industrial floorspace capacity does not apply to sites previously used for utilities infrastructure which are no longer required e.g., surplus utility sites, because of their delivery challenges. <i>“The principle of no net loss of floorspace capacity does not apply to sites used for utilities infrastructure or land for transport functions which are no longer required”.</i></p> <p>2.37 As a result of the Secretary of State’s decision to direct the Mayor to remove Policy E4(C) which sought, in overall terms across London, no net loss of industrial floorspace capacity (and operational yard space capacity) within designated SIL and LSIS, the supporting text to this policy has also been deleted (former paragraph 6.46-6.4.11).</p> <p>2.38 Paragraph 6.4.8 was also removed due to the blanket approach. The London Plan objective that gas works should not provide industrial capacity was however a principle tested at through the local plan review and remains an accepted policy principle.</p> <p>Summary</p> <p>2.39 The London Plan allocates gas works sites as a strategic sources of housing supply. The London SHLAA relies upon such sites for its 10-year housing target. Gas works sites are considered separately from industrial sites. The challenges of delivery result in their exceptional consideration within the Plan. They are expected to deliver a lower threshold of affordable housing, exempt from a late-stage review mechanism, and the economic policies of the Plan recognise that gas works should not provide industrial floorspace.</p> <p>2.40 SGN would welcome working with the Council to ensure that the Reg 18 Local Plan reflects these specific policy requirements - in particular, London Plan Policies H1 and E4, and Footnote 59 of the London Plan should be explicitly referenced.</p>		
SGN (Quod obo)	- 3	General LSA SA 01	<p>5 Lewisham Local Plan – Regulation 18 – Other Planning Policies</p> <p>5.1 The following section considers the draft policies of the Regulation 18 Local Plan and its supplementary text. It is requested that the following commentary is read collectively.</p> <p>5.2 Our commentary is tailored to the policies that we consider as directly relevant to Site Allocation 1 - Former Bell Green Gas Holders, and its future redevelopment. It should not therefore be assumed that where our representations are silent on certain policies that SGN are supportive.</p> <p>5.3 Quod on behalf of SGN, therefore reserve the right to make further comments on any draft policies not commented upon as part of these representation, either as a supplementary submission or as part of any future consultation of the Lewisham Local Plan.</p>	Comments noted.	No change.

SGN (Quod obo)	3	LSA SA 01	<p>6 Conclusion</p> <p>6.1 In conclusion, SGN are encouraged by the emerging policies of the Regulation 18 Local Plan and welcome the continued allocation of the Sydenham Gas Works site for a mixed-use development as part of the wider regeneration of South Lewisham.</p> <p>6.2 SGN remain concerned that the indicative capacities of the site allocation underutilise the site and not reflect its development potential, and the development necessary to bring this site forward for housing. This is contrary to the London Plan, which identified surplus utilities sites as <i>'strategic sources of housing'</i>. The site should be optimised to deliver up to 300 new homes. The current under-optimisation also undermines the strategic regeneration objectives of the Local Plan in promoting the Bell Green/Lower Sydenham Opportunity Area.</p> <p>6.3 To bring forward the site for redevelopment in accordance with the site allocation, suitable allowance for the significant decontamination costs associated with redeveloping gas work sites should be included.</p> <p>6.4 SGN are supportive of Lewisham's policy objective to deliver 35% affordable housing for all major development, however, to achieve this level, the gas works site should be allocated as an appropriate location for tall buildings. The justification for tall buildings is partly driven by viability but is further supported by: 1) the strategic ambition to promote Bell Green and Lower Sydenham as a new Opportunity Area, which the London Plan supports as an appropriate local for higher density development to optimise development capacities; 2) identification of adjacent site allocations as being appropriate for tall buildings, and 3) acknowledgement that the former gas holder structures which previously rose to a height of 35m in height acted as local landmarks for the area.</p> <p>6.5 SGN would welcome the opportunity for further engagement with Lewisham Council in respect of the Reg 18 Local Plan, and its future iterations.</p> <p>6.6 On behalf of SGN, Quod reserves the right to add to or amend these representations. This may be required where the Council issues new guidance or there is a change in policy at a local, regional or national level, or circumstances affecting the Sydenham gas works site.</p>	<p>Support and comments noted.</p> <p>Where pre-application discussions are likely to evolve, the council has used a SHLAA method to determine indicative site capacities – more details can be found in the Site Allocations Background Paper.</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the scale of development considered suitable for the site, taking into account the need to preserve the setting of the Livesey Memorial Hall, the need to retain the bowling green and tennis courts as open space and the need to deliver a revised land use mix more suited to the site's location. Based on these considerations, the capacity has been amended.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p> <p>Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham Tall Buildings Study which will inform amendments to the Local Plan.</p>	<p>Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended to increase residential capacity to 100 units (baseline scenario). Should the Bell Green area become an Opportunity Area, the residential capacity could increase u to 442 units. Employment floorspace has reduced to 465m² and main town centre uses have increased to 1,859m².</p>
LaSalle Investment	3	LSA 01	<p><i>Relates to Part 3, LSA SA 10</i></p> <p>Part Three: Lewisham's South Area</p>	<p>Support noted. Our response to site capacity is set out above.</p>	<p>No change.</p>

Management (Savills obo)			<p>LSA1 South Area place principles LSIM supports the principles for redevelopment of Lewisham’s South Area including the direction of new high quality housing and town centre uses to the A21 Corridor (Bromley Road).</p> <p>Whilst the Policy refers to the sensitive intensification of sites to deliver new high quality housing, LSIM would advocate that the Council captures greater potential the optimisation of such sites which will necessarily include encouraging an increase in heights and densities.</p>	Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham Tall Buildings Study which will inform amendments to the Local Plan.	
SGN (Quod obo)	3	LSA 01	<p><i>Relates to Part 3, LSA SA 01</i></p> <p>Lewisham South Area LSA1 (Chapter 17) 4.36 Paragraph 17.4 states that there are “two former gas holders, which are prominent landmarks”. The gas holders have now been demolished and this text should be updated. The reference to the site representing a local landmark is however welcomed and we concur that the site should continue to be used as a wayfinding marker through delivery of tall buildings on the site.</p> <p>4.37 Paragraph 17.8 outlines the expectation that by 2040, a new neighbourhood at Bell Green retail park will be led through the masterplan, which will change the character of the area and create a new place through delivery of a new town centre and mixed-use residential developments. In achieving this, development at higher density at an urban scale that optimises the use of available land will be supported.</p> <p>4.38 The Reg 18 Plan allocated a number of sites for development across Lewisham South Area which spans Bell Green, part of Lower Sydenham, Bellingham and Downham. The South Area (land around Grove Park station) is identified as a Strategic Area for Regeneration (LSA2), which will be the focus of public and private investment to deliver regeneration in collaboration with local community.</p> <p>4.39 Contained within the Strategic Area for Regeneration is Bell Green and Lower Sydenham to which the Reg 18 Local Plan outlines the overarching ambition for this area to be designated as an Opportunity Area (LSA3) within a future review of the London Plan. The supplementary text for LSA3 outlines that development proposals within the Bell Green and Lower Sydenham area shall be guided by a Supplementary Planning Document or Masterplan.</p> <p>4.40 The vision for the Bell Green retail park and allocation of Bell Green and Lower Sydenham as a future Opportunity Area is fully supported by SGN. However, the existing site allocation for the gas works site, in a prominent location to the entrance of the new neighbourhood does not sufficiently optimise the site potential, and its site allocation should be reviewed to support higher density development at an urban scale. The need to replace the landmarks of the gasholders to help wayfinding of the new settlement should also allow tall buildings to be delivered on the site.</p> <p>4.41 In view of the above, Policy LSA1 should be updated as follows: <i>A. Development proposals must make the best use of land in helping to facilitate Good Growth and focussed regeneration, particularly to tackle inequalities and</i></p>	Agree that the text on the gas holders needs updating and the point regarding urban scale. Support for Opportunity Area noted. Tall buildings	Local Plan updated to state that the gas holders have been demolished and using the wording proposed.

			<p><i>the environmental, economic and social barriers that contribute to deprivation locally. This will require that investment is appropriately coordinated within Lewisham's South Area and that:</i></p> <p><i>The out-of-centre Retail Park, former Gas Works and other sites at Bell Green and Lower Sydenham are comprehensively redeveloped at a higher urban density to create a new high quality residential, mixed-use quarter that is well-integrated with its surrounding area.</i></p>		
Tetra Tech Planning (John Lyon's Charity obo)	3	LSA 01	<p>Do you have any comments on the proposed approaches for the area?</p> <p>LSA1: South Area Principles</p> <p>The 14 principles provide a very detailed list, setting out specific economic, social and environmental principles, which are welcomed. The principles reflect the London Plan's (2021) 'Good Growth strategy' in seeking to make the best use of land and the Charity welcomes those specific principles which recognise the importance of delivering affordable housing and supporting inclusive and mixed communities.</p> <p>The comprehensive redevelopment of the out-of-centre Retail Park, former Gas Works and other sites at Bell Green and Lower Sydenham is strongly supported. The Charity notes Principle A(f), "Land is safeguarded to secure the delivery of strategic transport infrastructure, including the Bakerloo line extension south to Hayes". The Charity is supportive of the Council's positive planning; however it does advocate a cautious approach to safeguarding land which may not come forward within the Plan period.</p>	Support noted. Agree that a cautious approach is needed.	Local Plan amended to recognise that the Phase 2 of BLE may not come forward within the Plan period and that development potential of the area should not be solely predicated on it.
Phoenix Community Housing (BPTW obo)	3	LSA 02	<p>Lewisham's Neighbourhoods and Places</p> <p>It is pleasing that the various neighbourhood boundaries are viewed as having a degree of overlap with each other, reflecting that communities define themselves around different spatio-functionalities and contexts. We would interpret the indicative capacity figures for each area of the borough being equally fluid. The division of the borough into five areas is a good way of recognising their starkly contrasting contexts, ranging from Deptford riverside to the garden-principled southern estates. The context and character description of South Lewisham is informative and accurate, and we view this as a sufficient acknowledgement of its heritage and prevailing urban form within a Local Plan document, without the need for designating any parts of it as Areas of Special Local Character. As aforementioned, such a designation in Bellingham or Downham would detract from the potential for 'sensitive intensification' in these areas, lessening the effectiveness of the spatial strategy for South Lewisham.</p> <p>Along with North Lewisham (which benefits from an Opportunity Area designation in the New London Plan), the Indices of Multiple Deprivation map identifies South Lewisham in general as the most deprived area of the Borough; save for isolated wards in Catford and Ladywell. Our previous representations expressed strong concerns with the proposed removal of the Local Regeneration Area category in the current Core Strategy which focused on South Lewisham. Therefore we are delighted to see, and wholly support, the re-instatement of a Strategic Area for Regeneration covering all of South Lewisham under policy LSA2. This policy objective will support the regeneration of these areas where this is significant need and potential to deliver much needed affordable and</p>	Support and comments noted. Both LSA2 and LSA4 acknowledge the importance of walking and cycling, as well as the use of public transport. Agree that LSA2 Ca should also recognise the A21 Healthy Streets initiative.	Local Plan amended to acknowledge the A21 Healthy Streets initiative as being as being a significant infrastructure project over the Plan period, in addition to the BLE.

			sheltered housing stock. It will be vital to meeting strategic objectives, and its necessity has only been exacerbated by the higher housing targets set by the New London Plan and the delayed growth-concentration opportunities around the future Bakerloo line extension in the western end of South Lewisham. Sensitive intensification and regeneration will be of utmost importance to this plan period and South Lewisham is primed for it. To that end we would argue that item C(c) of the policy, which seeks incremental but transformational improvement in the quality of housing and living environments, will be the most important and most effective tool in South Lewisham. Further, it would be justified to replace item C(a) – which concerns the Bakerloo line extension – with one that highlights the A21 Bromley Road and Ringway Corridor Healthy Streets initiatives as being the most significant infrastructure projects over this plan period, and directing new development here. We will be commenting separately on the A21 Design Guidance SPD, but support the inclusion of policy LSA4 and its link with policy TR3 (healthy streets). The draft text should more explicitly require provision for walking, cycle, and bus routes as public/active transport along this corridor will be key to unlocking sustainable development in the central area of South Lewisham.		
L&Q Group	3	LSA 02	<i>Relates to Call for site</i> 4.9 South Character Area L&Q is supportive of the designation of the South Character Area as a ‘Strategic Area for Regeneration’ and the publication of further planning SPDs relating to the Bell Green and Lower Sydenham Area Masterplan and Small Sites Guidance.	Support noted.	No change.
Albacore Meeting Room Trust (Lichfields obo)	3	LSA 02	<i>Relates to Call for site</i> (Part 2) Related Policy Areas (a) Lewisham’s South Area: (LSA2) Strategic Area for Regeneration The Trust supports the designation of the ‘South Area’ of the borough, which includes the site at Beckenham Hill Road, as a strategic area for regeneration under Policy LSA2. It is noted that the policy includes ambition to tackle inequalities in the Borough via the contributing environmental, economic and social barriers. This includes though supporting development proposals that seek opportunities to plan positively for social infrastructure that meets meet local needs, particularly community facilities and services catered to children and young people as well as those that remove barrier to movement across the Borough. Removing the Brethren Meeting Hall site from the MOL and allocating it for redevelopment to provide a new flexible community use building would assist and align with this policy aim. For example, the Citygate Church application proposes to make the auditorium available for the adjacent school to use for large events that it cannot accommodate within their own premises. The positioning of the site between the school and school playing fields represents an opportunity for the redevelopment of this site for replacement Community Use development, to incorporate a better access through the site to benefit young people.	Support noted. The comments regarding the site’s development contributing to this policy are noted. The Council is undertaken a comprehensive review of all existing MOL and is not proposing to de-designate any.	No change.

			As set out above, allocating the land for redevelopment would create the opportunity to enhance the environmental value and accessibility of the site, which is currently predominantly hard standing and private.		
Stoken Properties Ltd (Boyer obo)	3	LSA 02	<p><i>Relates to Call for site</i></p> <p><i>Response to Draft Policy LSA2 (Strategic Area for Regeneration)</i></p> <p>It is encouraging to see the Council recognise the need for the regeneration of this part of the Borough. We are pleased to see that the Council intend to pursue a partnership approach in order to ensure that public and private sector investment is secured within this area so that investment can be coordinated to successfully deliver regeneration in collaboration with local communities.</p> <p>The Policy advises that regeneration should be facilitated through a variety of approaches including the comprehensive redevelopment of strategic sites and renewal of town centres and employment locations. We are supportive of this approach and emphasise the important role that employment locations and their successful redevelopment can have for an area. A successful redevelopment of an employment area with commercial and residential uses can bring substantial and important benefits to both the local area and Borough as a whole by bringing an underutilised or vacant site back into a viable use.</p> <p>Redevelopment of such sites can result in the creation of more jobs in the Borough by making a more appropriate and efficient use of employment floorspace and the residential element will help the Council meet housing targets as well as bringing more inward investment for the Borough. Given the changing nature of the workplace and more people now working from home, it is important to acknowledge that traditional employment space is changing. It is now not uncommon for resident “work hubs” to form part of the commercial/employment offering in mixed-use development. We would encourage the Council to recognise changing working practices and to take a pragmatic view on these when deciding policy and any subsequent planning applications.</p>	Support and comments noted. The changing nature of working practices resulting in the restructuring some employment sites that are more suited to mixed use developments (including some at Lower Sydenham/ Bell Green) have been identified in the Local Plan.	No change.
Tetra Tech Planning (John Lyon’s Charity obo)	3	LSA 02	<p>LSA2: Strategic Area for Regeneration</p> <p>The Charity firmly supports the designation of a “Strategic Area for Regeneration” for the Southern area of the Local Plan. Notwithstanding the importance of the BLE and its potential delivery from Lewisham southwards, the Charity welcomes the Council’s recognition of the need for development to enhance provision of and access to bus services and the network of walking and cycle routes, which will help connect communities.</p> <p>The Charity endorses the Council’s commitment to working in partnership with key stakeholders, the comprehensive redevelopment of strategic sites and the sensitive intensification of sites and residential neighbourhoods to improve the quality of housing and living environment.</p>	Support noted.	No change.
Next Plc (Q+A Planning Ltd obo)	3	LSA 03	<p><i>Relates to Part 3, LSA SA 02</i></p> <p>7. On this basis our client is concerned to note that the new Local Plan appears to propose the redevelopment of the site. Policy LSA3 C (b) refers to the Council’s aim to ‘deliver the comprehensive redevelopment of strategic sites in accordance with site allocation policies, including the ... Bell Green Retail Park ‘; while</p>	Objection to the redevelopment of the Bell Green Retail Park is noted.	No change.

			<p>Allocation 2 specifically identifies the Park as a redevelopment location for <i>'Comprehensive mixed-use redevelopment of the existing out-of-centre retail park with compatible residential, commercial, main town centre and community uses'</i>.</p> <p>8. We accept that, according to LSA3 B, there is still further work to undertake on this proposal, since it is the Council's intention to <i>'prepare a Supplementary Planning Document and/or Masterplan...'</i>, which will <i>'..complement the Local Plan in setting a long-term development and investment framework for the area.'</i> Nevertheless, the general intent to secure redevelopment of the Park is made very clear in the emerging Local Plan.</p>		
Stoken Properties Ltd (Boyer obo)	3	LSA 03	<p><i>Relates to Call for site</i></p> <p><i>Response to Draft Policy LSA3 (Bell Green and Lower Sydenham)</i></p> <p>We generally support the policy objectives of Policy LSA3, which seeks to promote the growth and regeneration of Bell Green and Lower Sydenham.</p> <p>Whilst we are in general agreement with criterion c. of Part C of the Policy which seeks to protect the employment function of the LSIS and are encouraged to see that "other compatible uses" are acceptable in these areas, we feel that this should be expanded to make specific reference to residential development.</p> <p>Mixed-use development comprising commercial at ground with residential above is a well established principle of planning and such developments have been successful, and are prominent, throughout London. The residential element of such schemes can complement and facilitate the commercial element and can bring significant planning benefits such as increasing the Borough's housing supply.</p> <p><i>Policy Wording</i></p> <p>We set out below our response to specific parts of the policy and how the policy should be worded. For consistency, throughout this letter, anything underlined is our proposed wording to the policy.</p> <p>Part D, criterion c. of the Policy states: <i>c. Protect the employment function of the Locally Significant Industrial Sites at Stanton Square and Worsley Bridge Road, whilst seeking to deliver new high quality workspace, taking into account opportunities for the co-location of employment and other compatible uses;</i></p> <p>We suggest that the criteria is expanded to make specific mention of residential use and reads <i>"...taking into account opportunities for the co-location of employment and other compatible uses <u>including residential where this is in agreement with other relevant Local Plan policies</u>;"</i>. This inclusion provides certainty that a residential element would be considered acceptable provided it meets with other policies in the Plan and would not result in an overall negative impact on the economic functioning of the LSIS.</p>	Agree that the Local Plan should be amended to include residential use.	Local Plan amended to reflect proposed wording.
Kier Property (Carter Jonas obo)	3	LSA 03	<p><i>Relates to Call for site</i></p> <p>Lewisham South Area 3 – Bell Green and Lower Sydenham</p>	The comments regarding the redevelopment of Bell Green contributing to this policy are noted.	No change.

			<p><i>Good Growth</i> is a key thread throughout the recently published London Plan and Lewisham is set to play an important role in achieving this key objective. There is no doubt that Lewisham South Area 3 (LSA3) can contribute towards achieving this.</p> <p>LSA3 comprises a number of site allocations to facilitate development in the Bell Green area. Our client's land should be incorporated as part of these site allocations as a result of its central location at the entrance of Bell Green Retail Park. The principle of development on the site should be supported by virtue of its brownfield nature. It can contribute towards the aims for LSA3 to be brought forward early in the plan process as indicated in the information table provided for the allocations, with the earliest timeframe for delivery in 2020/21-2024/25. The inclusion of our client's land will help facilitate cohesive development.</p>		
Tetra Tech Planning (John Lyon's Charity obo)	3	LSA 03	<p>LSA3: Bell Green and Lower Sydenham</p> <p>The Charity strongly supports the Council's commitment to enabling the designation of an Opportunity Area at Bell Green and Lower Sydenham in a future review of the London Plan.</p> <p>The Charity strongly supports the preparation of a Supplementary Planning Document and/or Masterplan for the Bell Green and Lower Sydenham area. Noting that this is document is listed within the evidence base in LSA1 South Area Principle N(c), and which states that "development proposals should have regard to and positively engage" with this document, it is imperative that the Council start the masterplanning process sooner rather than later and engage with key stakeholders, including landowners, business owners, developers and local communities to ensure a collaborative and joined-up process from the start.</p> <p>Part C(a) of Policy LSA3 states that development proposals will be required to "safeguard the land required to secure the delivery of the Bakerloo line extension south to Hayes". Three potential BLE Phase 2 stations have been highlighted in the Borough: "Ladywell, Catford and Lower Sydenham", however no formal consultation has been undertaken on these locations. Notwithstanding, clarification should be provided within the Local Plan as to the (provisional) extent of land required for BLE Phase 2; and it should be confirmed if this land should be safeguarded as set out in Policy TR2 (Part C), or whether the safeguarded land will extend further than the required 400m.</p> <p>The Charity understands the importance of comprehensive redevelopment of strategic sites. Those strategic sites could have a number of landowners and leaseholders therefore clear lines of communication should be developed now with all interested parties; and workshops set up to ensure that the comprehensive redevelopment of strategic sites is a realistic and achievable objective for the Council.</p> <p>The Charity supports the Council's consideration of the designation of a new town centre in the Bell Green and Lower Sydenham area. The area is subject to a significant level of proposed regeneration, with a broad mix of uses proposed, including housing, commercial, leisure and community facilities, which could provide a significant opportunity to create a vibrant and diverse new centre</p>	<p>Support noted, including for a new town centre at Lower Sydenham/Bell Green. The comment that the masterplan should engage with key stakeholders at the earliest opportunity is noted.</p> <p>Agree that the provisional extent of the land required for BLE Phase 2 and stations should be identified in the Local Plan.</p>	<p>Local Plan amended to identify provisional extent of land required for BLE Phase 2 and stations.</p>

			<p>which can respond in a more holistic manner to the changing and challenging conditions that existing town centres are experiencing.</p> <p>The Local Plan states that “The centre’s role and function (i.e. position within the Borough’s town centre hierarchy) will be established having regard to further detailed assessments and public consultation”. The Charity welcomes and supports public consultation at the earliest opportunity.</p>		
LaSalle Investment Management (Savills obo)	3	LSA 04	<p><i>Relates to Part 3, LSA SA 10</i></p> <p>LSA4 A21 Corridor / Bromley Road LSIM supports the proposals for the transformation of the A21 corridor by making best use of land to deliver high quality, mixed use residential developments.</p> <p>It is noted that the Policy states that development proposals will need to have regard to the A21 Design Guidance SPD which is still yet to be formally published. It is recommended that reference to such a specific document is removed from the wording of the Local Plan to account for the fact that this may not be delivered or replaced by materially different guidance during the plan period.</p>	Support is noted. Disagree as following Regulation 18 consultation, the A21 Development Framework has been endorsed by the council and forms a material consideration to be taken into account when planning for the redevelopment of sites in the A21 corridor.	Local Plan amended to update that the A21 Development Framework has been endorsed by the Council.
HHGL Ltd (G R Planning Consultancy Ltd obo)	3 3 3	LSA 04 LSA SA 10 Para 17.54-17.55	<p>In relation to the Draft Plan, we note that Policy LSA4 and Site Allocation 10 identifies Homebase as part of an opportunity site for a residential led mixed-use scheme with an indicative capacity for 141 residential units and 5,694 square metres of main town centre uses.</p> <p>The latter is not defined in detail, but the supporting text at paragraphs 17.54 – 17.55 suggests that a wider range of uses will be sought with a mixture of “compatible main town centre, commercial and community uses.” Other than the heading, there is no reference whatsoever to the existing Homebase or the important comparison role it performs in Catford or the large number of local jobs that the store supports, both directly and indirectly. There is also no reference to the implications of the proposed allocation for the future of the Homebase business. The clear inference of the proposed allocation is that Homebase would be forced to close.</p> <p>My clients consider that a planning policy/allocation which would precipitate the closure of its Catford Homebase would be contrary to national policy and specifically paragraph 80 of the National Planning Policy Framework (February 2019) (Framework). This states that planning policies should assist in creating the conditions in which businesses, such as Homebase, can invest, expand and adapt, as well as requiring significant weight to be placed on the need to support economic growth and local business needs.</p> <p>My client’s wish to remain on their Beckenham Hill Road site as this is a well-established retail destination and comprises a store that meets their business requirements. As currently worded, they would, therefore, strongly object to Policy LSA4 in so far as it applies to the opportunity sites and Site Allocation 10.</p> <p>We would, of course, be happy to discuss with the Council changes to the policy/allocation that provided the option for my clients to remain on site (the status quo), to be incorporated within any viable redevelopment scheme or to be relocated to a site that was allocated for this purpose in the Draft Plan. Both the</p>	Agree that current retail use should be retained, where possible. The site capacity allow for the re-provision of main town centre floorspace, although this is a matter for the landowner to consider, in consultation with leaseholders.	Homebase/Argos site allocation amended to reference re-provision of existing retail use providing other objectives for redeveloping the site (such as improved layout, walking, cycling, landscaping and alternative use of the surface car park) can be achieved.

			<p>latter two options would be on the proviso that the allocation confirms that any redevelopment or relocation must meet Homebase's business, operational and customer requirements, and involve a development that was commercially viable.</p> <p>In the absence of any such options, as I confirmed, my clients will be left with no other way forward than to formally object to the Proposed Submission version of the Draft Plan and to pursue those objections at the Examination stage. My clients are keen to avoid the latter and their preference is to engage with the Council over its draft proposals and to discuss with Planning Officers changes to the Proposed Submission version of the Plan that would address Homebase's significant concerns with the plan as drafted.</p>		
Southern Gas Networks (Carter Jonas obo)	3	LSA SA 01	<p>SGN strongly support the decision of the Council to allocate the Site for development but their preference is for it to be fully residential. We consider this Site provides a fantastic opportunity to deliver much-needed housing in the Borough on an otherwise vacant and disused site.</p>	<p>Comment noted. The site allocation provides for a mixed use development which is replicated across the whole of the Bell Green masterplan area in order to create a new, sustainable neighbourhood.</p>	No change.
Southern Gas Networks (Carter Jonas obo)	3	LSA SA 01	<p>SGN broadly support the indicative densities provided and, subject to detailed design considerations and viability work, we consider the Site has the potential to deliver affordable housing and a variety of tenures. However, we do advise this could be more simply communicated as an "up to" capacity.</p>	<p>Support noted. The Local Plan (para 13.9) already states that the site capacities are indicative only and should not be read prescriptively for the purpose of planning applications, where the optimal capacity of a site must be established on a case-by-case basis using the design-led approach, and having regard to relevant planning policies.</p>	No change.
Southern Gas Networks (Carter Jonas obo)	3	LSA SA 01	<p><i>LB Lewisham officer note: SGN's land ownership is included in the original representation. The map shows the extent of correct site boundary.</i></p> <p>We do note there are some discrepancies between this Site Location Plan and the indicative red line boundary for the allocation. We suggest that the Council can extend the red line boundary of the allocation to include this excess land owned by SGN, thus further increasing its overall capacity.</p> <p>As noted by the Council, we also recognise the potential for capacity to be even further increased, subject to the outcome of the proposals to extend the Bakerloo Line beyond Lewisham to Beckenham Junction.</p>	<p>Boundary discrepancies are noted.</p>	<p>Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended to show correct boundaries.</p>
Southern Gas Networks (Carter Jonas obo)	3	LSA SA 01	<p>We recognise the objective of the Council to transform the Bell Green and Lower Sydenham area into a potential Opportunity Area in a future review of the London Plan, as well as its intentions to deliver a Bell Green and Lower Sydenham Masterplan and/or SPD to ensure the comprehensive redevelopment of this area – including further allocations to the east and south. This longer-term plan would</p>	<p>Support noted. Agree that the timeframe for delivery be amended.</p>	<p>Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended to show timescales for</p>

			<p>include the designation of a new town centre and a potential new Bakerloo Line station in the Bell Green vicinity.</p> <p>Whilst SGN support the principle of long-term, comprehensive regeneration that maximises the delivery of housing and opportunities provided through the Bakerloo Line extension, we urge the Council to closely consider potential delivery timescales. We observe that the Site is the <u>only</u> allocation in the Bell Green and Lower Sydenham area with a timescale for delivery, not least a <i>deliverable</i> timescale within the first 5 years of the Plan Period. SGN can confirm that the Site is available for development now. We observe that other allocations are presently occupied and would therefore inevitably have a longer delivery period.</p>		<p>delivery being within years 1-5 and 6-10.</p>
Southern Gas Networks (Carter Jonas obo)	3	LSA SA 01 General	<p>To conclude, whilst SGN strongly support development on the Site, a solely residential scheme is preferred and there is potential to increase the capacity through corrections to the developable red line boundary. In addition, we seek further clarity on how the Site would come forward at the earliest opportunity – including whether this could come forward in advance of the wider Masterplan.</p>	<p>Comments noted. Our response is set out above.</p>	<p>No change.</p>
SGN (Quod obo)	3	LSA SA 01	<p>3 Challenges and Opportunities</p> <p>3.1 SGN welcome the Council’s allocation of the site for redevelopment, however, the Regulation 18 Local Plan does not yet fully recognise the significant constraints associated with redeveloping former utilities sites.</p> <p>3.2 Whilst the site allocation outlines the requirement for a ground survey to be undertaken to establish the nature of ground contamination and likely remediation, it is considered that the Reg 18 Plan does not yet recognise the significant limitations of cleaning up contaminated sites and specifically the cumulative constraints which arise from a re-development of gas works site will have an impact on deliverability, site capacity and viability.</p> <p>3.3 Gas works sites fall within the Sui Generis use class. The exceptional nature of Gas Works sites are the abnormal costs that exist in the ground as a result of years of gas production and storage. The investment risk profile of gas works sites is very different from traditional brownfields sites, with significantly higher up front abnormal costs experienced over a longer period of time, and larger levels of cost uncertainty.</p> <p>3.4 Finance holding costs are significant due to timeframe associated with these works, including regulatory approval, and the sequential order in which they have to be undertaken delaying the commencement of construction. For these reasons, national policy confirms that the Government gives substantial weight to the redevelopment and remediation of brownfield contaminated land, and the development of under-utilised land and buildings especially if this would help to meet housing needs.</p> <p>3.5 Initial investigations into the level of contamination at the Sydenham gas works was submitted to Lewisham as part of the prior approval application submitted for the removal of the gas holders (DC/18/1070607). The site investigation works undertaken on site by Atkins in 2016 on behalf of SGN identified significant contaminants within the made ground (aromatic hydrocarbons, polycyclic aromatic hydrocarbons, sodium hydroxide, sodium</p>	<p>The supplementary information about the site’s constraints including ground contamination and listed heritage features are noted.</p> <p>The site allocation already states ground surveys will need to identify the nature and extent of ground contamination, with remedial works and/or mitigation measures implemented, where necessary.</p> <p>Policies within the plan will be applied to this site in the same way as other sites. A viability appraisal will be needed to set out how the site constraints impact on the viability and deliverability of the site.</p> <p>The site allocation also mentions the Livesey Memorial Hall and provides references to other heritage assets on the site</p> <p>Following the Regulation 18 public consultation,</p>	<p>Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended to state that the site is constrained by former gas infrastructure, including a gas mains and gas ‘governor’ and a bentonite wall; and that the Council recognises the challenges of delivering this site given the de-contamination and remediation required.</p> <p>Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended to include the Livesey Memorial Hall and its grounds within the site’s boundary. Also amended to refer to the need to retain the heritage assets at the west of the site and incorporate them sensitively into the redevelopment of the remainder of the site, as well as acknowledging</p>

		<p>carbonate, sulphates, sulphides, carbonates, phosphates, cyanides, ammoniacal compounds, heavy metals and asbestos).</p> <p>3.6 Contaminated material may also have been buried in underground tar wells, liquor wells, pipes and purifier beds and will require removal. Any redevelopment of the site will also need to rationalise the existing gas ‘governor’, underground gas mains and remove any other underground structures and obstructions. All of which will have a significant associated cost.</p> <p>3.7 As demonstrated, in order to bring forward the Sydenham gas works site, substantial decontamination will be required to safely remove the soil and groundwater contaminated. The need for extensive de-contamination is even more critical in identification of emerging site allocation ambitions for residential uses and the delivery of an area of public realm.</p> <p>3.8 The approach that the London Plan has recently taken to Gas Works sites provides a relevant basis from which Lewisham Council should draw recent experience. Extensive discussions have taken place across a number of Gas Works sites and the policy direction by the Mayor of London has facilitated the successful redevelopment of challenging sites, delivering a significant number of new homes, jobs and community benefits.</p> <p>3.9 The implications of these complex site constraints are twofold: -</p> <ul style="list-style-type: none"> ▪ Financial viability: The exceptional costs associated with site remediation/ constraints, drives the need for density on a viability level. As part of any future planning application SGN or a future owner, will submit detailed evidence demonstrating the gas works site is subject of substantial contamination, and associated enabling and remediation costs in order to bring the site forward for development. ▪ Spatial / developable area: The Gas Works site represents an opportunity to deliver a notable quantum of housing in order to meet local needs. It is therefore imperative that available, brownfield sites, such as the gas works, should be suitably optimised to deliver the level of homes that Lewisham Council need to deliver. The specific and bespoke spatial constraints of the site drive the need for height in order to bring forward the requisite level of development. <p>3.10 The complexity of delivering former utilities sites such as the Sydenham gas works site has not yet been fully recognised within the Reg 18 Plan and this will need to be addressed. We set out our recommendations for this in Section 4 of these representations.</p> <p>3.11 Notwithstanding the limitation of the below ground conditions of the site, further challenges to the development of the site are presented by the adjacency of the Grade II listed Livesey Memorial Hall (Listing No. 1253110), war memorial (Listed No. 1253111) and boundary wall (Listing No. 1253121), which are clustered to the gas work’s western boundary.</p> <p>3.12 The Grade II listed Livesey Memorial Hall and boundary wall were first listed in 1995. The Livesey Memorial Hall and boundary wall were constructed by the South Suburban Gas Company to act as a workspace for the gas works, which employment 380 men in 1911. The Hall was named after Sir George Thomas</p>	<p>additional work has been undertaken on the Lewisham Tall Buildings Study which will inform amendments to the Local Plan.</p> <p>The site allocation recognises the need for the bulk and scale of development to transition through the site. Tall buildings will not be appropriate across the whole site due to the proximity to, and the setting of the Livesey Memorial Hall and it’s grounds.</p>	<p>that tall buildings will not be appropriate in the western part of the site where maintaining the setting of the heritage assets should be prioritised.</p>
--	--	--	---	--

			<p>Livesey, an engineer, industrialist and philanthropist who was the director of the South Suburban Gas Company and credited as a pioneer of the gas industry.</p> <p>3.13 The Grade II listed war memorial was unveiled in 1920 to commemorate the employees of the South Suburban Gas Company who lost their lives in the First and Second World Wars. The memorial was listed in 1995.</p> <p>3.14 The significance of the adjacent heritage assets is intrinsicality linked to the historic function and operation of the gas works. In view of the gas works now obsolete industrial function, an alternative use for the site is promoted within the Reg 18 Local Plan and SGN.</p> <p>3.15 The eventual redevelopment of the site must continue to respect the significant and setting of the listed assets, however, it should be acknowledged that the Livesey Memorial Hall, boundary wall and war memorial were original constructed with an industrial backdrop and were seen (until 2019) in the context of two gas holder structures rising to 25m and 35m in height respectively (equivalent of 7-10 residential storeys), which when fully inflated offered significant massing.</p> <p>3.16 In consideration of the industrial and historical context of the gas works site, the significant contamination limitations, and the National and London Plan policies for such sites, we consider that the Reg 18 Plan site allocation should recognises these challenges of delivery and the need for site optimisation, where tall buildings would be a suitable typology to achieve this subject to respecting and preserving the significance and setting of the adjacent listed heritage assets.</p>		
SGN (Quod obo)	3	LSA SA 01	<p>4 Site Allocation 1 and LSA1 South Area – Representations</p> <p>4.1 The following section considers the emerging Site Allocation 1 Former Bell Green Gas Holders and Chapter 17 Lewisham South Area.</p> <p>Site Allocation 1 - Former Bell Green Gas Holders Indicative Capacity</p> <p>4.2 The indicative capacity of the site is for 73-178 homes, and gross non-residential floorspace of up to 2,345sqm (including 782sqm of employment and 1,563sqm of town centre).</p> <p>4.3 The Council's site allocation background paper (2021) confirms that the site's indicative residential capacity has been derived from the London-wide SHLAA methodology rather than a needs assessment, pre-application discussions or through a masterplan.</p> <p>4.4 LSA3 outlines that development within Bell Green and Lower Sydenham shall be guided by a Supplementary Planning Document or Masterplan. Accordingly, we consider it inappropriate for the site capacities to be set through an arbitrary SHLAA methodology rather than through a site-specific analysis, particularly for a complex site such as the Sydenham gas works site.</p> <p>4.5 Appendix A Table A.2 identifies the site with the following land use capacity: 65% residential; 20% main town centre; 10% employment; and 5% other. This land use mix conflicts with the general assumptions of uses for mixed-use development sites in Bell Green/Lower Sydenham masterplan, which identifies a</p>	<p>The Local Plan (para 13.9) already states that the site capacities are indicative only and should not be read prescriptively for the purpose of planning applications. The plan should be read as a whole.</p> <p>Disagree that the site should be solely residential and disagree with the indicative capacities proposed.</p> <p>Where no advanced pre-application has taken place, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper.</p>	<p>Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended to increase residential capacity to 100-442 units, to decrease employment floorspace to 465m² and to increase main town centre uses to 1,859m².</p>

			<p>mix of 70% residential; 20% main town centre, and 10% employment. Whilst the site allocation background paper (2021) confirms that the indicative capacities should not be read prescriptively, they may unintentionally raise local communities' expectations around the appropriate capacity prior to any design analysis. The actual development capacity of a site will ultimately need to be determined through the detailed design and planning approval process and this should be made clearer in the Reg 18 Plan itself.</p> <p>4.6 The London Plan sets out a design-led approach to determining the optimum development capacity of sites. To accommodate the growth identified in this Plan in an inclusive and responsible way, every new development needs to make the most efficient use of land by optimising site capacity. Policy D1 B (3) 'London's form, character and capacity for growth' is clear that boroughs should follow the design-led approach (set out in Policy D3 'Optimising site capacity through the design-led approach') to establish optimised site capacities for site allocations. Paragraph 3.3.4 of Policy D3 acknowledges that this should be through a consultative design-led approach that allows for meaningful engagement and collaboration with local communities, organisations, and businesses.</p> <p>4.7 In consideration of the indicative land use mix, the site allocation capacity should be revised to better reflect the site's opportunities and London Plan policies.</p> <p>4.8 Prior to demolition, the gasholders on the site did not accommodate any employment floorspace and therefore this floorspace does not need to be re-provided as part of any new scheme. Accordingly, there is no obligation for the re-provision of employment floorspace as part of the site allocation and this capacity (782sqm) should be removed and re-allocated to the residential capacity to further optimise the gas works site as a strategic source of housing land.</p> <p>4.9 Further, the draft site allocation includes reference to community uses as being appropriate for the comprehensive mixed-use redevelopment of the site. An indicative community floorspace capacity would be challenging given the scale of the site and constrained nature.</p> <p>4.10 We therefore request the following amendments are made:</p> <table border="1"> <thead> <tr> <th>Indicative Development Capacity</th> <th>Regulation 18</th> <th>SGN Revisions</th> </tr> </thead> <tbody> <tr> <td>Net residential</td> <td>73-178 units</td> <td>230-300 units</td> </tr> <tr> <td>Employment</td> <td>782 sqm</td> <td>0 sqm</td> </tr> <tr> <td>Main Town Centre Uses</td> <td>1,563 sqm</td> <td>< 1,563 sqm</td> </tr> </tbody> </table> <p>4.12 SGN welcomes the opportunity to enter discussions to help inform this approach and better inform the indicative capacity of the site and better link this capacity to the objectively assessed needs; whilst taking account of the delivery challenges of gas works sites and other draft policies contained within the Reg 18 Plan such as affordable housing.</p>	Indicative Development Capacity	Regulation 18	SGN Revisions	Net residential	73-178 units	230-300 units	Employment	782 sqm	0 sqm	Main Town Centre Uses	1,563 sqm	< 1,563 sqm	<p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the need to provide mixed use development with a different land use mix, to create a new sustainable neighbourhood, to retain continued community uses in the Livesey Memorial Hall as well as protecting the it's setting. -Based on these considerations, the land use mix and residential units have been amended.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	
Indicative Development Capacity	Regulation 18	SGN Revisions															
Net residential	73-178 units	230-300 units															
Employment	782 sqm	0 sqm															
Main Town Centre Uses	1,563 sqm	< 1,563 sqm															
SGN (Quod obo)	3 3	LSA SA 01	<p>Site Allocation (Paragraph 17.16)</p> <p>4.11 SGN broadly support the principles of the site allocation, albeit to conform to London Plan policy we propose the following amendments.</p>	Disagree, commercial uses are needed as part of a mixed used development, to create a new,	No change.												

		Para 17.16	<p>“Comprehensive mixed-use redevelopment with residential, commercial, and main town centre and community uses. Public realm and environmental enhancements, including new walking and cycle routes, and public open space”.</p>	sustainable community. Community uses will continue to be provided in the Livesey Memorial Hall.	
SGN (Quod obo)	3 3	LSA SA 01 Para 17.17	<p>Opportunities (Paragraph 17.17) 4.13 SGN broadly support the opportunities section albeit propose removal of the following text: “The site comprises a former gas works which is now vacant, with the gasholders having been dismantled. Redevelopment and site intensification, along with the introduction of a wider-range of uses, will bring the land back into active use and support local area regeneration”</p> <p>4.14 We also consider that the following opportunities for the site should be included within the site allocation, a number of which are commonly found across other local plans which include gas works sites.</p> <ul style="list-style-type: none"> • It is noted that the former gasholder structure was a significant landmark in the area. • The site contained two former gas holders and significant infrastructure that supported its former use, including a gas mains and gas ‘governor’. The combination of these factors is likely to have an impact on deliverability, capacity and viability. • Given the industrial nature of the site, it is likely to be contaminated and/or have services running through it. Further consideration will need to be given to fully understand specific contamination and/or servicing issues. • Proposals should respond to constraints associated with existing utilities restrictions, easements or HSE guidance as appropriate. • Development should acknowledge the associated costs of decommissioning the gasworks and the relocation of any significant equipment and address any environmental pollution and on-site decontamination requirements caused by the gasworks. • For site allocations, the policies set out in this plan may be applied flexibly to ensure that the sites are viable and deliverable. 	Agree that the site’s previous use as a gas holder should be further acknowledged. The need for ground surveys and remedial works are already mentioned in the site allocation. Policies within the plan will be applied to this site in the same way as other sites. A viability appraisal will be needed to set out how the site constraints impact on the viability and deliverability of the site.	Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended by removing the word “wider”, and referring to the retained elements of the gasholder structures, existing utilities infrastructure and the challenges associated with remediation of the site.
SGN (Quod obo)	3 3	LSA SA 01 Para 17.18	<p>Development Requirements (Paragraph 17.18) 4.15 The site allocation outlines that any future development should be brought forward in accordance with Bell Green and Lower Sydenham masterplan. In absence of such masterplan or timeframe for this document to be published or made available, it is considered that this wording is contrary to the site’s delivery timeframe period of 2020-2025. In absence of an emerging masterplan, it is recommended that the obligation for a development to be brought forward in compliance with this masterplan is removed or greater clarity given on timeframes for publication of this document.</p> <p>4.16 We recommend that the Bell Green and Lower Sydenham masterplan should be published in tandem with the adoption of the Lewisham Local Plan to ensure there is no undue restriction placed on the delivery of sites across Bell Green and Lower Sydenham in the absence of the Masterplan. SGN would welcome the opportunity to work with Lewisham in preparation of a Masterplan.</p> <p>4.17 SGN request that the following changes are made to the supplementary text:</p>	Disagree A masterplan plays a critical role in clarifying design, capacity and phasing of the site, especially where there is a cluster of sites being transformed into a new, sustainable neighbourhood. Masterplans are already covered in Policy DM3 (Masterplans and comprehensive development) and there is merit in the site allocation referring to it.	No change. Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended to make reference to Policy DM3 (Masterplans and comprehensive development)

			<p>• “Development must be delivered in accordance with a master plan for the Bell Green and Lower Sydenham area.”</p>	Your interest in being involved in the masterplan is noted.	
SGN (Quod obo)	3 3	LSA SA 01 Para 17.18	<p>4.18 The site allocation includes a need to safeguard land to support the delivery of strategic infrastructure including the Bakerloo line extension. Whilst SGN are fully supportive of the Bakerloo extension and acknowledge that its delivery is a key driver to the regeneration of Bell Green and Lower Sydenham and its future designation as an Opportunity Area; the extension of the Bakerloo line beyond Lewisham to Lower Sydenham is currently the subject of consultation and there are no formal commitments from Transport for London in respect of its delivery or future funding. More pertinently, no site options have been identified and/or safeguarded as future location(s) for the new Lower Sydenham Bakerloo station. We note Lewisham Council have previously identified two potential locations for a new station, one of which is to/around Southend Lane.</p> <p>4.19 There is no safeguarding requirement in this location, and accordingly the following text should be removed from the site allocation’s development requirements: Safeguard land to support delivery of strategic transport infrastructure, including where required for the Bakerloo line extension.</p>	Disagree. A cluster of sites are proposed for development within the Bell Green masterplan area, in order to create a new, sustainable neighbourhood. Whilst a railway station will most likely be positioned in close proximity to the Hayes railway line, other strategic transport infrastructure may be needed and retaining this reference will provide flexibility.	No change.
SGN (Quod obo)	3 3	LSA SA 01 Para 17.19	<p>Development Guidelines (Paragraph 17.19)</p> <p>4.20 The site allocation sets the expectation that any development should deliver a cohesive and rational road network and street pattern in co-ordination with other adjacent site allocation. Any proposal will also be expected to investigate opportunities to reconfigure or remove the gyratory.</p> <p>4.21 Given the limited size of the site and the quantum of development that is necessary to be accommodated; the ability to provide a cohesive road network and street pattern would significantly curtail the developable area of the site and should therefore be removed. For the same reason, the site’s ability to reconfigure or remove the gyratory is unachievable, and accordingly, we request that these elements are removed from the site allocation.</p> <p>4.22 SGN are supportive of the ambition to improve walking and cycling links across the site and to deliver better connections to the surrounding area. It should however be noted that land to the north and west of the site is not within SGN’s control and is currently under private ownership. The ability to deliver improved walking and cycling routes through the site to the north and west are therefore likely to be undeliverable.</p> <p>4.23 Accordingly, we request that the development guideline text is updated as follows: Development should deliver a more cohesive and rational road network and street pattern, in coordination with other site allocations. There is an opportunity to open up new walking and cycle links to the east-west and north-south of the site, to create a legible and more permeable network of routes that connect to the surrounding neighbourhood areas. Proposals will be expected to investigate opportunities to reconfigure or remove the gyratory as part of an area-wide strategy.</p>	Agree.	Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended using proposed wording.

SGN (Quod obo)	3 3	LSA SA 01 Para 17.19	<p>4.24 The current wording of the site allocation outlines that any future development should seek to optimise the capacity of the site taking into account future planning transport accessibility levels as associated with the Bakerloo line extension.</p> <p>4.25 In order to fully optimise the site capacity, it is recommended that the gas works site should be defined as an appropriate location for tall buildings. The optimisation of brownfield sites in opportunities areas and the delivery of development at higher densities is supported by the London Plan (Policy H1, Footnote 59 and GG2).</p> <p>4.26 Further justification for the site's appropriateness for tall buildings is provided in identification of the height of the former gas holder structures (35m), the proximity of existing tall buildings in the vicinity of the site (namely, the eight storey Orchard Court development), and the allocation of the adjacent sites as suitable for tall buildings at Figure 5.1 of the Reg 18 Plan.</p> <p>4.27 We recommend the following amendments to bullet two: <i>To achieve the optimal capacity of the site and promote Bell Green and Lower Sydenham as a future opportunity area, tall buildings of up to 35m in height (10 residential storeys) to aid legibility, wayfinding and the delivery of the site given its constraints may be acceptable subject to a sympathetic design that respects the Area of Special Local Character. development proposals should take into account future public transport accessibility levels, as associated with the Bakerloo line extension.</i></p>	<p>Disagree. The site allocation recognises the need for the bulk and scale of development to transition through the site. Tall buildings will not be appropriate across the whole site due to the proximity to, and the setting of the Livesey Memorial Hall and it's grounds.</p> <p>Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham Tall Buildings Study which will inform amendments to the Local Plan.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach and tall buildings will be considered in line with Policy QD4 (Building heights).</p>	Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended by acknowledging that tall buildings will not be appropriate the western part of the site where maintaining the setting of the heritage assets should be prioritised.
SGN (Quod obo)	3 3	LSA SA 01 Para 17.19	<p>4.28 The fourth bullet point states that development should be designed to provide an appropriate transition in bulk, scale and massing from the site to its surrounds, which are predominantly suburban in character.</p> <p>4.29 The development guideline contradicts the site allocation and the strategic vision for Lewisham South Area (Paragraph 17.8), which identifies that the site is within an 'Urban' setting, and the future redevelopment of the area shall be brought forward comprehensively in an Urban character. The London Plan also requires sites such as this to be optimised as a strategic source of housing.</p> <p>4.30 The text should be updated as follows: <i>Development should be designed to provide an appropriate transition in bulk, scale and massing from the site to its surrounds. which are predominantly suburban in character. Tall buildings may be appropriate in this location to address the challenges of delivery and to achieve other policies of this plan. The site is predominantly suburban in character.</i></p>	<p>Disagree that the site should achieve an urban setting, given the presence of heritage assets on-site.</p> <p>Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham Tall Buildings Study which will inform amendments to the Local Plan. Our response to tall buildings is set out above.</p>	No change.
SGN (Quod obo)	3 3	LSA SA 01 Para 17.19	<p>4.31 Bullet point six outlines that a ground survey shall be undertaken to establish the extent of ground contamination and level of remediation required.</p> <p>4.32 As demonstrated, the site is known to have significant below ground contaminates that will require costly decontamination. The draft site allocation</p>	Disagree with the wording proposed. Policies within the plan will be applied to this site in the same way as other sites. A viability	Former Bell Green Gas Holders and Livesey Memorial Hall site allocation <i>amended to state:</i> That the Council

			<p>development guidelines do not sufficiently consider this constraint and accordingly, SGN request the following additional wording:</p> <p><i>Ground surveys will need to identify the nature and extent of ground contamination, with remedial works and/or mitigation measures implemented, where necessary. The Council recognises the need for significant remediation of the site, which will be taken into account as part of the development's viability assessment and will be considered when assessing the site requirements for affordable housing and other policies.</i></p>	<p>appraisal will be needed to set out how the site constraints impact on the viability and deliverability of the site.</p>	<p>recognises the challenges associated with significant decontamination and remediation of the site</p>
SGN (Quod obo)	3 3	LSA SA 01 Para 17.19	<p>4.33 SGN request that the challenge of delivering a site in an opportunity area be recognised and therefore aligned to GLA policy. The Mayor's Affordable Housing & Viability SPG states that "Opportunity Areas and Housing Zones are key sources of housing supply in London. They are, by their nature, complex to bring forward and often require significant investment in infrastructure. They are also of a scale that can create fundamentally new places and communities".</p> <p>4.34 The site allocation should provide an element of flexibility to affordable housing provision as set out in the Mayor's Affordable Housing & Viability SPG. The SPG states "when considering Opportunity Areas, Housing Zones and industrial land, LPAs may wish to apply a localised affordable housing threshold for the Fast-Track Route". SGN therefore proposes the inclusion of a new bullet point:</p> <p><i>(Bullet Eight) "The site is located within an Opportunity Area. Opportunity Areas are key sources of housing supply in London. They are, by their nature, complex to bring forward and often require significant investment in infrastructure. The Council will take into consideration the viability challenges of the site when assessing the requirements under affordable housing and other policies."</i></p>	<p>Disagree. Whilst Opportunity Area status is an aspiration for the Bell Green/Lower Sydenham area, it is not currently designated as such and it would be premature to refer to it as an Opportunity Area.</p>	<p>No change.</p>
SGN (Quod obo)	3 3	LSA SA 01 Para 17.19	<p>4.35 Finally, to reflect the significant limitations of the site, we request that the following text is included by the site allocation for the Sydenham gas works as a new bullet point:</p> <p><i>(Bullet Nine) The site contains existing utilities restrictions, easements; a Hazardous Substances Consent; a former gas holder and significant infrastructure that supported its former use, including a gas mains and gas 'governor'. This site, may be subject to substantial decontamination, enabling and remediation costs which may have an impact on deliverability and viability. If it is robustly demonstrated that extraordinary decontamination, enabling or remediation costs must be incurred to bring the site forward for residential led mixed-use development (in accordance with LPH1, LP Footnote 59 and the site allocation) then the Council may apply flexibility to the policies set out in the Reg 18 Plan.</i></p>	<p>Disagree. Recognition regarding site constraints, remediation, deliverability and viability have already been mentioned in the site allocation.</p>	<p>No change.</p>
Next Plc (Q+A Planning Ltd obo)	- 3	General LSA SA 02	<p>LB LEWISHAM LOCAL PLAN – 'MAIN ISSUES AND PREFERRED APPROACHES' REPRESENTATION ON BEHALF OF NEXT PLC</p> <p>1. Q+A Planning Ltd is instructed by Next plc to respond to the current consultation on the new 'Lewisham Local Plan – Main Issues and Preferred Options'. Having reviewed the consultation material, we wish to comment on the proposed allocation for redevelopment of the existing Bell Green Retail Park, as identified in South Area Policy LSA3 and Allocation 2.</p>	<p>The supplementary information is noted.</p>	<p>No change.</p>

			<p>2. Our client operates a Next store at Bell Green Retail Park. The Park is a relatively recent development, having been completed in 2013. It is successful and provides a valuable service to the community of south Lewisham and the surrounding area.</p> <p>3. The Park serves a densely populated area with significant levels of trade coming from within a radius of a few miles. It is accessible by a choice of means of transport, and also benefits from its proximity to the Bell Green Sainsbury's supermarket, which allows customers to visit both locations on a single trip.</p> <p>4. The recent pandemic has highlighted the importance of good local provision of retail facilities. Since March 2020, Next's outlets in retail parks have significantly outperformed those in city centres and regional shopping centres. Shopping habits changed during the pandemic as customers preferred the convenience and environment of retail park-style locations, while city centres suffered from the loss of office workers and general footfall.</p> <p>5. Moreover, although on-line sales have increased rapidly since March 2020, these too have an important relationship with the company's store portfolio. Before the pandemic, online customers collected nearly 50% of their orders and returned over 80% of returns through stores, and this important interaction between on-line ordering and physical outlets is expected to continue in the future.</p> <p>6. In short, the company has found that Bell Green is a successful trading location. Its store there provides a valuable service which is popular with local customers, and is expected to provide an important part of the company's representation in this area of London in the future.</p>		
Next Plc (Q+A Planning Ltd obo)	3	LSA SA 02	<p>9. There are a number of points to be made about the Council's intentions at Bell Green. In particular:</p> <ul style="list-style-type: none"> • The replacement of the Retail Park with other uses, with the consequent loss of the important retail and service function and the substantial level of existing employment it provides, does not appear to be justified anywhere in the Plan. We are not aware of any evidence to show that the Council has considered the current and future role of the Park, and found it in some respect to be unsatisfactory. We note the Council's view (page 244) that <i>'the future of out of centre retail parks needs to be considered'</i> but cannot see the sort of detailed evaluation of the current and future role of the park that would be expected to be undertaken, before a decision is taken that it is an appropriate location for redevelopment; • The loss of a significant retail location also seems surprising, since the Council already acknowledges (page 243) that it is likely to need to <i>'about 5,300 square metres of new retail floorspace ... by 2030'</i>; • Early redevelopment of a recently-built retail park would not appear to be a sustainable approach given the significant expenditure of energy and materials that would have been committed at the time of the scheme's construction; and • It is not clear that the redevelopment will be deliverable, particularly if existing occupiers including our client wish to remain trading at the Park in future. It has long been accepted that deliverability is a fundamental aspect of sound 	Objection to the redevelopment of the Bell Green Retail Park is noted. The site allocation does not preclude the re-provision of retail units within the redeveloped site but the concerns over site delivery and that one of the site allocations landowners wants to remain trading are noted.	No change.

			<p>allocations in a new Plan, and in this instance there would appear to be significant doubts about the likelihood of a successful and relatively recent retail park becoming available for redevelopment.</p> <p>10. We note also that the emerging Plan places emphasis on the importance of working together with stakeholders to deliver good quality developments. We support this approach but envisage that in this instance partnership working with occupiers could be aimed at securing the future of the Park, and maximising its benefits in terms of the valuable and popular local service that it provides to residents of the area.</p> <p>11. Accordingly, we object to the Council's proposed allocation of the Bell Green Retail Park as a location for comprehensive development, in that it would threaten the future of our client's successful and popular retail facility. Moreover, the proposed redevelopment does not appear to be justified either by a thorough and detailed examination of the current and future role of the Park, nor an assessment of the likelihood of securing redevelopment.</p>		
Tetra Tech Planning (John Lyon's Charity obo)	- 3	General LSA SA 02	<p>On behalf of our client, John Lyon's Charity, landowners of "Trade City", Bell Green, Sydenham, we respectfully submit the following representations to the "Local Plan Regulation 18: Main Issues and Preferred Approaches" consultation. John Lyon's Charity ("the Charity") can trace its roots back to the 16th century and exists to give grants to benefit children and young people up to the age of 25 across several boroughs in London. The Charity's mission is to promote the life-chances of children through education and they support a wide range of projects that provide opportunities for young people including youth clubs, arts projects, counselling initiatives, parental support schemes and academic bursaries. Since 1991, the Charity has distributed over £156million to a range of services for young people. The Charity generates much of its income through property investment such as Trade City.</p> <p>The Charity welcomes the opportunity to respond to the Regulation 18 consultation and looks forward to working with the Council in developing its vision and objectives for the Local Plan, the South area and specifically 'Site Allocation 2: Bell Green Retail Park', which includes its landholding, Trade City. Trade City consists of 15 industrial/warehouse/trade counter units with associated parking set within landscaped areas.</p> <p>In responding to the Regulation 18 consultation, the Charity sets out its responses to a number of key areas which it considers to be central to the delivery of Good Growth over the Plan period. In each key area, we respond to the questions specifically asked by the Council.</p>	The supplementary information is noted.	No change.
Tetra Tech Planning (John Lyon's Charity obo)	3	LSA SA 02	<p>Do you have any comments on the proposed site allocations?</p> <p>Site Allocation 2 – Bell Green Retail Park (which includes "Trade City")</p> <p>Bell Green Retail Park and Trade City are successful and very popular destinations both in the area and across south-east London.</p> <p>The Charity supports the inclusion of its holding ("Trade City") within the proposed site allocation known as "Bell Green Retail Park" (No.2), a site</p>	Support noted. Agree that a masterplan plays a critical role in clarifying design, capacity and phasing of the site.. Masterplans are already covered in Policy DM3 (Masterplans and comprehensive development) and there is	Bell Green Retail Park site allocation amended to make reference to Policy DM3 (Masterplans and comprehensive development) and public access to Waterlink Way and the SINC.

		<p>allocation which is brought forward within all three spatial strategy options and the preferred option.</p> <p>The Charity strongly supports the “Comprehensive mixed-use redevelopment of the existing out-of-centre retail park with compatible residential, commercial, main town centre and community uses”. The Charity supports the Council’s commitment to maintaining the strong retail offer in this location, particularly in light of the ongoing pandemic and its impact on the ‘High Street’. We would agree with the findings within the IIP that there “is a degree of risk associated with mixed used redevelopment of existing employment sites under higher growth scenarios, in that provision of space for existing or future light industrial uses could be compromised or prove challenging to deliver” . The Charity recognises the role that any forthcoming Supplementary Planning Document and/or Masterplan will play in clarifying design options, development capacity and phasing, and reiterates once again the importance of such a process coming forward as a matter of urgency.</p> <p>The Charity also supports its comprehensive redevelopment through reconfiguration of existing buildings and spaces to facilitate a new layout with improved routes, both into and through the site, which will assist vehicle users and pedestrians alike. The retail park’s location, adjacent Pool River offers significant opportunities to provide a high-quality environment; providing walking and cycling facilities for residents, visitors, shoppers and staff.</p> <p>An indicative development capacity for both residential units and non-residential floorspace is provided. We note that these indicative capacities have been based on “the density assumptions used in the London-wide SHLAA (2017) methodology... which informed the draft new London Plan (Intend to Publish version)”. We would note that the new London Plan (March 2021) no longer includes the density matrix and development capacity should be brought forward based on a design-led approach.</p> <p>The development guidelines state that the “Development must (our emphasis) be delivered in accordance with a master plan for the Bell Green and Lower Sydenham area. Considering the Council’s definition of “Masterplan” in the Glossary of the Local Plan and the extensive detail that is included, it would be remiss of the Council to delay the work necessary for such a significant Masterplan any longer. The Charity has not been approached by the Council to provide its views on a Masterplan for the area and therefore if this work has not commenced it is imperative that it does start now. If work has commenced, we can confirm that the Charity wishes to be involved.</p> <p>The development guidelines advise that “to achieve the optimal capacity of the site, development proposals should take into account future public transport accessibility levels, as associated with the Bakerloo line extension”. According to the TfL’s WebCAT PTAL site, the PTAL for the site does not change in the forecast year of 2031 and remains at PTAL 1b/2 across the site, therefore this is an unknown element.</p>	<p>merit in the site allocation referring to it.</p> <p>Your interest in being involved in the masterplan is noted.</p> <p>The site allocation already makes reference to the Pool River but there is merit in emphasising public access to it.</p> <p>Whilst the London Plan density matrix no longer exists, a SHLAA based approach has been used as a starting point in determining site capacities. In many instances sensitivity testing has been applied, to take into account the site’s characteristics and surroundings.</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the need to provide mixed use development by introducing residential units, as well as a revised land use mix. -Based on these considerations, the capacity has been amended. In particular, a range of residential capacities have been included in the site allocation, with the lower figure based on a baseline scenario and the higher figure based on a growth scenario which envisages the delivery of the BLE south of Lewisham and the</p>	<p>Bell Green Retail Park site allocation amended to increase residential capacities to 784-1,831 units. Employment floorspace has been reduced to 3,740.</p>
--	--	---	---	---

				<p>Bell Green area designated as an Opportunity Area.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	
Stoken Properties Ltd (Boyer obo)	3	LSA SA 04	<p><i>Relates to Call for site</i></p> <p><i>Stanton Square Locally Significant Industrial Site</i></p> <p>Stoken Properties Ltd. own the northern part of the site as identified on the accompanying Site Location Plan and known as 491-499 and 501-505 Southend Lane. We are pleased to see that the site has been included within the Local Plan as an area with potential for mixed-use development, and set out our thoughts and comments below.</p> <p>In terms of opportunities, we are extremely supportive that the redevelopment and site intensification potential of the site with the co-location of commercial and other uses has been acknowledged by the Council. As detailed within the accompanying Call for Sites application, it is considered that the site may come forward as phased development with the first phase facilitating future phases. It is therefore important to ensure that any phased development will not prejudice the future development of the rest of the site.</p> <p>With regards to development requirements, it is encouraging to see that a masterplan for the site is proposed and we would welcome future involvement in the preparation and discussions involving any such masterplan.</p> <p>Whilst we support that development must not compromise the functional integrity of the employment location, we again would seek clarification on the use of “capacity” and suggest that it relates to employees as opposed to floor area to take into account new and evolving working practices.</p> <p>We are in general agreement with the development guidelines including that in order to achieve optimal capacity of the site that development proposals take into account future public transport accessibility levels, as associated with the Bakerloo line extension. This ensures an efficient use of the site, maximising its planning potential and is supported.</p> <p>We are in agreement that non-employment uses, including residential uses, should be sensitively integrated into the development in order to ensure the protection of amenity for all site users. This would indicate that less industrial intensive uses such as workshops and studios, which have been proven to successfully exist with residential uses, would be appropriate at this location and would help deliver the Council’s aspirations for the site.</p> <p>We would suggest that the site allocation is kept in the Local Plan given the substantial planning opportunities it presents in terms of providing a more optimal use of land to deliver the Council’s ambitions for the Lewisham South</p>	<p>Support noted. Comments relating to stakeholder engagement in the masterplan are noted. Agree there is merit in referencing phasing of development across the site.</p> <p>Supplementary text to Policy EC2 Protecting employment land and delivering new workspace provides clarity on the net loss of industrial capacity. Table 8.3 also provides a formula for calculating financial contributions for the loss of industrial capacity. The Plan should be read as a whole.</p>	<p>Stanton Square LSIS site allocation amended to reference co-location and phasing of the development, working in partnership and Policy DM3.</p>

			Area. The mixed-use redevelopment of the site will make an important contribution to the overall economic and social objectives of the Plan and has the potential to deliver a significant quantum of residential development alongside high quality commercial floorspace, which will help meet housing targets.		
Tesco Stores Ltd (Lichfields obo)	- 3 3	General LCA SA 06 LCA SA 19	Representations to Main Issues and Preferred Approaches consultation for the Lewisham Local Plan (Reg 18) on behalf of Tesco Stores Ltd Tesco Stores at Conington Road, Lewisham (SE13 7PY) and Catford Shopping Centre and Milford Towers, Catford (SE6 4J) Lichfields has been instructed by our client, Tesco Stores Ltd (hereafter referred to as 'Tesco'), to review the draft Plan having regard to its two retail store and property interests above and to submit representations to the Main Issues and Preferred Approaches consultation for the Lewisham Local Plan (Reg 18) ('LLP'). Please see below: <ul style="list-style-type: none"> • our comments on the vision and spatial objectives for Lewisham's Central Area; • our comments on retail parking; • our site-specific representation in relation to the Tesco superstore, petrol filling station and car parking site at Conington Road and Lewisham Road which is covered by draft site allocation SA6; and • our site-specific representation in relation to the Tesco large supermarket and car parking at Catford Shopping Centre, which is included within draft site allocation SA19; 	Comments noted.	No change.
Tesco Stores Ltd (Lichfields obo)	- 3 3	General LCA SA 06 LCA SA 19	We trust that our representations will be taken into consideration in the progression of the emerging Lewisham Local Plan. We would be grateful for the opportunity to meet with you to discuss our suggested amends to the above policies and the Lewisham SA6 and Catford SA19 allocations.	Comments noted.	No change.
L&Q Group	3	LSA SA 08	We note that the 'Opportunities' section of Site Allocation 8 – Excalibur Estate, which is being developed by L&Q in partnership with Lewisham Homes, is incorrect. At the time of writing, Phase 1 is only partially complete (Sub-phases 1A and 1B are practically complete, with Sub-phase 1C aiming to start on site later this year) and Phase 2 has not yet been started. We would be grateful if the site allocation could therefore be updated accordingly.	Agree.	Excalibur Estate site allocation amended to reflect the current delivery of the site.
HHGL Ltd (G R Planning Consultancy Ltd obo)	- 3	General LSA SA 10	Please find attached representations to the above plan submitted on behalf of my clients, HHGL Ltd. As I have explained in the letter, my clients appreciate that these comments are submitted late, but in view of the flexibility that the local plan system offers and the importance of our representations in relation to the Catford area of Lewisham, we would be grateful if the Council could accept these late submissions and take them on board in preparing the Preferred Submission version of the plan. I would, of course, be happy to discuss any aspect of my clients representations further, if that would assist at this stage. I would be grateful if you could acknowledge safe receipt of these representations	Comments noted.	No change.

<p>HHGL Ltd (G R Planning Consultancy Ltd obo)</p>	<p>- 3</p>	<p>General LSA SA 10</p>	<p>EMERGING LEWISHAM LOCAL PLAN – HOMEBASE, BECKENHAM HILL ROAD, CATFORD</p> <p>I refer to the consultation on the Main Issues & Preferred Approaches to the emerging Lewisham Local Plan (Draft Plan) which took place between 15 January 2021 and 11 April 2021. I act on behalf of HHGL Ltd, which trades as Homebase within the UK & Ireland.</p> <p>My clients are aware that the consultation period on the Draft Plan has now ended and apologise that we were not in a position to respond to the Draft Plan. Nevertheless, they have asked me to write to you to confirm their position in relation to their Homebase store on Beckenham Hill Road in Catford and to establish a point of contact, which will hopefully assist in future discussions between my clients and Planning Policy.</p> <p>As you may be aware, Homebase was sold by Wesfarmers to Hilco Capital Ltd (Hilco) in May 2018. This followed Wesfarmers attempts to rebrand the business 'Bunnings', a DIY format that they operated in Australia and New Zealand. The 'Bunnings' brand did not gain traction in the UK, prompting Wesfarmers to sell the business Hilco. Hilco purchased the business with the specific aim of investing in the Homebase brand and returning the business to its traditional roots. As part of that strategy Homebase streamlined its portfolio, returning unprofitable stores to their owners and downsizing larger stores that no longer met the requirements of the business.</p> <p>That strategy was implemented by a new management team and together with the current owners (Hilco), they have successfully turned around the fortunes of the national Homebase business. In February 2020 Homebase issued an update of this progress, announcing a return to profit well ahead of expectations (Source: Homebase press release 27 February 2020). It was an extraordinary turnaround bearing in mind the difficulties that the UK retail sector continues to experience and placed the business in a very good position not only to grow and expand further, but also to preserve the existing jobs that its Catford store supports, as well as the thousands of jobs that the business supports throughout the UK.</p> <p>That success has been based on its strong brand, the fact it remains one of the most recognisable retailers in the UK, the introduction of new ranges and concessions, continuing investment in its staff qualifications, knowledge and expertise, and its future commitment to ongoing investment in refurbishing and extending existing stores.</p> <p>Whilst Homebase stores were closed during the initial months of the first Covid 19 lockdown, following their reopening and in May/June 2020, sales at all UK Homebase stores grew by over 25% compared to the same two months in 2019. This performance has been reflected during the second lockdown and combined with Homebase's role as an 'essential retailer', it has placed the business in an extremely strong position to assist with the UK's economic recovery post Covid 19.</p> <p>The full implications of the Covid 19 pandemic on the UK economy will not be known for some time. Even so, it is apparent that some businesses will not</p>	<p>Comments regarding the leaseholders who want to remain trading are noted.</p>	<p>No change.</p>
--	----------------	----------------------------------	--	--	-------------------

			<p>survive. Within the retail sector, operators who were struggling before Covid 19 continue to fall into administration. The emergence of Covid 19 has, in our view, significantly increased the importance of supporting and retaining businesses like Homebase. In this respect, my clients have confirmed that their current lease on the Catford store extends to September 2025. The store is successful and profitable, with a loyal customer base and experienced staff. Homebase are firmly committed to retaining its representation on the site and will be seeking to renew their lease at the appropriate time.</p>		
HHGL Ltd (G R Planning Consultancy Ltd obo)	- 3	General LSA SA 10	<p>I would be grateful if you could acknowledge receipt of this letter and include our details on the Local Plan data base.</p> <p>I would, of course, be happy to discuss any aspect of the above further or provide any additional information on my client's position or their business requirements.</p>	Comments noted.	No change,
LaSalle Investment Management (Savills obo)	- 3	General LSA SA 10	<p>LONDON BOROUGH OF LEWISHAM LOCAL PLAN REGULATION 18 STAGE CONSULTATION REPRESENTATIONS MADE ON BEHALF OF LASALLE INVESTMENT MANAGEMENT</p> <p>Introduction We write on behalf of our client, LaSalle Investment Management ('LSIM'), in respect of its land interests in land at 10 Beckenham Hill Road in Catford.</p> <p>This letter is submitted to provide representations to the consultation on the London Borough of Lewisham Local Plan Regulation stage "Main Issues and Preferred Approaches" document.</p> <p>These representations are also made in the context of pre-application discussions undertaken with the Local Planning Authority ('LPA') in respect of LSIMs land ownership at 10 Beckenham Hill Road in Catford (the 'Site').</p> <p>The Site is previously developed land and currently comprises a Homebase store and associated car park.</p> <p>The emerging Local Plan identifies the Site as an allocation for residential-led mixed use development within Lewisham's South Area, under 'Site Ref: 10'.</p> <p>LSIM recognises the importance of the planning policy framework to help it and its partners realise their respective ambitions and look forward to working with the Council to develop an appropriate framework to create the certainty of outcome required to enable this key site to be brought forward for development with confidence.</p> <p>In summary, LSIM supports the aspirations of investment and growth within Lewisham and the identification of appropriate redevelopment to help meet the requirements of the existing and new population over the plan period.</p>	Comments and support noted.	No change.
LaSalle Investment Management (Savills obo)	- 3	General LSA SA 10	<p>Site Details As set out above, LSIM's land ownership comprises the purpose built Homebase retail warehouse located off Beckenham Hill Road/Bromley Road in Catford.</p> <p>The Site extends to circa 1.7 hectares and comprises previously developed land in the form of an existing retail store and associated car park. The principle vehicle</p>	The supplementary information is noted.	No change.

			<p>access and egress to the Site is via Beckenham Hill Road with an additional exit only on to Bromley Road.</p> <p>The existing Homebase store was constructed pursuant to planning permission for development of a <i>'single storey retail unit for the sale of non-food items with ancillary tea room, children's play area and garden centre and the provision of a minimum of 100 car parking spaces and service road'</i> granted at appeal on 16 July 1982 (LPA Reference: LE/472/C/TP).</p> <p>On 17 April 2019, planning permission was granted for the variation of Condition 6 (restriction on sale of food) of Application LE/472/C/TP in order to allow the sale of all goods falling within Class A1 (retail) (Ref: DC/18/108884).</p> <p>Land uses surrounding the Site are predominantly residential and range from traditional two storey semi-detached properties to the south and north-west, three storey flats to the south and north east and taller modern flatted developments of five to nine storeys located to the north.</p> <p>To the east of the Site on the opposite side of Bromley Road is St Johns Church (Grade II listed), a two storey community building known as the Green Man and a Fiat garage. To the rear of the Site is Catford Wanderers Sports Club.</p> <p>The Site has a PTAL Rating of 3 and therefore benefits from 'good' accessibility by a range of modes of public and sustainable modes of transport.</p> <p>There are no statutory listed buildings on or adjacent to the Site nor does it fall within or adjacent to a Conservation Area.</p> <p>The Environment Agency's flood risk map shows the majority of the site to be in Flood Zone 2 meaning that there is a medium probability of potential flooding.</p>		
LaSalle Investment Management (Savills obo)	- 3	General LSA SA 10	<p>Representations to the Local Plan Regulation 18 Consultation</p> <p>Below we provide our principal comments and/or amendments to the relevant parts and policies of the Local Plan to ensure that the Plan is legally compliant and sound having regard to its deliverability and application. We trust will be afforded appropriate weight in the consultation process.</p> <p>These representations have considered the emerging Local Plan in the context of the requirements established by the National Planning Policy Framework (February 2019) and London Plan 2021 (March 2021).</p> <p>General Comments</p> <p>The National Planning Policy Framework ('NPPF') requires all Local Plans to be based upon and reflect the presumption in favour of sustainable development, with clear policies that will guide how the presumption should be applied locally.</p> <p>Local planning authorities should positively seek opportunities to meet the development needs of their area and Local Plans should meet objectively assessed needs with sufficient flexibility to adapt to rapid change.</p>	Comments noted.	No change.

			<p>They should be consistent with the principles and policies of the NPPF, and should be aspirational but realistic to address spatial implication of economic, social and environmental dimensions.</p> <p>As the Local Plan emerges, it is important that it adheres to the requirements of the NPPF in positively promoting new development across the Local Plan area.</p>		
LaSalle Investment Management (Savills obo)	- 3	General LSA SA 10	<p>We trust that these formal representations will be afforded the appropriate weight by the LPA and assist in the formulation of the emerging Local Plan. We would also be grateful if you could acknowledge receipt of these representations and keep us updated of any further stages of consultation, so that we can provide comments as may be required.</p> <p>Should you require any clarification or additional information, please do not hesitate to contact us.</p>	Comments noted.	No change.
LaSalle Investment Management (Savills obo)	3	LSA SA 10	<p>LSIM would also confirm its strong support for the allocation of the Homebase / Argos site on Bromley Road in the medium to long term subject to:</p> <ol style="list-style-type: none"> 1. The allocation not jeopardising its active asset management in the short to medium term; and 2. An increase in the residential quantum envisaged by the allocation which would be necessary to support the viable redevelopment of the retail floorspace given its high existing use value 	Support noted. Our response is set out below.	No change.
LaSalle Investment Management (Savills obo)	3	LSA SA 10	<p>Site Allocations</p> <p>The Site is proposed as an allocation within ‘Lewisham’s South Area’ for comprehensive residential-led mixed use redevelopment in the emerging Local Plan under ‘Site ID: 10’.</p> <p>It is stated that the allocation has an indicative development capacity of 141 net residential units and 5,694 sq. m of gross non-residential floorspace. The draft allocation sets out that the intensification of the Site, along with the introduction of a wider range of uses, will provide a more optimal use of land. Furthermore, any proposals for redevelopment of the Site would need to accord with a series of and requirements and guidelines linked to delivery of new and improved public realm, green infrastructure and positive frontages. LSIM supports the principle of the emerging allocation of the Site for comprehensive redevelopment which can help to meet strategic objectives in terms of residential land supply, economic growth and employment generation within Catford in the mid to long term. LSIM does however have a number of comments in relation to the specific requirements of the Site Allocation, which are detailed further below.</p> <p><u>Residential Yield</u></p> <p>The Site Allocation is identified to deliver an indicative development capacity of 141 net residential units. Whilst LSIM acknowledges the capacity quoted is for indicative purposes, this should be increased such that it more accurately reflects the potential of the Site. The initial design concepts presented as part of the pre-application process have demonstrated that the capacity of the Site significantly exceeds the emerging allocation.</p>	<p>Support noted. The pre-application is likely to evolve prior to the submission of a planning application, and so cannot be relied upon to provide a design led capacity for this site. In these instances, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper.</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the need to provide mixed use development by introducing residential units, retention of the pond and to reflect the surrounding character of</p>	No change.

			<p>The amount of non-residential floorspace should also be reduced. A residential led, mixed use scheme would not support such a substantial quantum of non-residential space. A lower quantum of non-residential floorspace can still contribute appropriately towards the wider aspirations for the A21 Corridor in terms of creating positive frontages along Bromley Road and Beckenham Hill. Critically, given the high existing use value of the existing retail uses, any revised development scheme will need to exceed the indicative residential capacity to realise the objective of comprehensive redevelopment of the Site.</p> <p>A lower density scheme in line with the indicative capacity would mean that the opportunities offered by the site cannot be realised during the Plan period. The effect of this would be to:</p> <ol style="list-style-type: none"> 1. Reduce the housing supply generated by Site Allocations by 141 units which increases the demand placed on other, less suitable sites; and 2. Lose wider benefits linked to comprehensive redevelopment including the delivery of more appropriate, in terms of configuration and mix, commercial space and improved layout and public realm. <p>On the basis that the Site has been specifically identified as suitable for residential uses, and the quantum of development required to facilitate a viable redevelopment would be significant, the indicative capacity should be increased to a minimum of 300 units.</p> <p>This would be more consistent with the Plan’s strategic focus of delivering housing land supply on previously developed and brownfield sites, the optimisation of housing delivery and a ‘design led’ approach as recently adopted by the London Plan2.</p> <p>The proposed intensification of the Site in this manner would help to meet the Borough’s need for additional residential units in a preferred and sustainable location.</p> <p>It would also ensure that the delivery of a residential led development at the Site can make a significant contribution towards public amenity and accessibility (re-establishing connections with existing green spaces) as is envisaged by the allocation.</p> <p>As drafted, the emerging allocation fails to recognise the opportunity and true capacity of the Site and in that regard is unsound.</p>	<p>Southend Village. -Based on these considerations, the land use mix and residential units remain the same.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	
LaSalle Investment Management (Savills obo)	3	LSA SA 10	<p><u>Proposed Land Uses</u></p> <p>Whilst LSIM supports the proposed allocation of the Site for residential development and compatible main town centre, commercial and community uses, we consider that the Policy should include flexibility to support the retention of the existing retail uses without reference to such a prescriptive capacity figure.</p> <p>As stated above, a residential led, mixed use scheme would not support such a substantial quantum of non-residential space as that identified (5,694 sq. m) and the proposed allocation should reflect this position. A lower quantum of non-residential floorspace can still contribute appropriately towards the aspirations for the A21 Corridor in terms of creating ground floor activity.</p>	<p>Disagree that the non-residential floorspace figure should be excluded from the Local Pan. The Local Plan provides indicative site capacities. Optimal capacity for the site will be established at planning application stage through a design led approach. Agree that the redevelopment should not</p>	<p>Homebase/Argos site allocation amended to acknowledge that redevelopment will take place in the medium to long term.</p>

			<p>LSIM would request that the allocation policy be revised to remove a figure for gross non-residential floorspace but state that the delivery of main town centre uses as part of a residential led development is supported.</p> <p>Specifically, the inclusion of retail uses such as a foodstore within the allocation policy would help to meet shopping requirements locally and contribute to creating a sustainable, mixed use development by meeting the needs of a new residential community at the Site. This would also reflect the existing and established land uses at the Site and enable sufficient flexibility for the delivery of an appropriate mix and quantum of land uses.</p> <p>We would also stress that LSIM would only support the emerging site allocation on the basis that it does not impact on the effective management of the current, established retail floorspace. As set out above, the redevelopment of the floorspace is only anticipated in the medium to longer term and the owner must retain the ability to asset manage the floorspace in advance of any longer term redevelopment.</p> <p>This would ensure that the Plan is positively prepared and will make the most effective use of previously developed land. Furthermore, it would enable any future development scheme to respond appropriately to market forces in terms of what is a viable and deliverable.</p> <p>The above matters will ensure that the emerging Local Plan is appropriately formulated to ensure the future development of the Site can be delivered in an appropriate manner, whilst allowing for reasonable flexibility.</p>	detrimentally impact on the operation of the current retail floorspace.	
LaSalle Investment Management (Savills obo)	3	LSA SA 10	<p>Summary and Conclusion LSIM intends to be a long term stakeholder in Lewisham and hopes to play an active role in its regeneration across the plan period.</p> <p>LSIM strongly supports the overall principles of redevelopment and regeneration that are emerging within the Local Plan. It also reiterates its strong support for the allocation of the Homebase / Argos site on Bromley Road within the emerging Local Plan, subject to the detailed considerations as set out above.</p> <p>LSIM would request that the Council acknowledges the commercial considerations that are integral to the realisation of policies. In respect of the Site on Bromley Road, LSIM is aligned with the Council’s aspiration to deliver comprehensive redevelopment of the site.</p> <p>However, for this objective to be realised, it will require a flexible approach in terms of densities and land uses. As set out above, such an approach is not discordant with local or national planning policy which both seek to optimise the potential of sustainable sites such as this.</p>	Support and comments noted. The Local Plan provides indicative site capacities. Optimal capacity for the site will be established at planning application stage through a design led approach.	No change.
Phoenix Community Housing (BPTW obo)	3	LSA SA 10	<p>We also wish to comment on specific site allocations as follows: ☐ 10 – Homebase, Bromley Road (South Lewisham)– PCH supports the allocation of this site for mixed-use development, including a significant quantum of genuinely affordable housing, though consider that the allocation as currently drafted does not sufficiently promote the heritage value of the site; particularly the grandiosity of its front façade and water feature.</p>	Support is noted. Disagree as the site allocation seeks to improve public realm and open space, including retention of the pond and	No change.

				enhance green infrastructure, including SINC, urban green space and public open space. The pond (designated SINC) in the eastern corner of the site, should form a key feature of the development and its biodiversity value should be enhanced. The front façade is not a designated heritage asset and the site may benefit from a full redevelopment of the site and reconfiguration of existing buildings.	
Tavern Propco (Savills obo)	- 3	General LSA SA 11	<p>Representations to the Lewisham Local Plan Regulation 18 (Main Issues and Preferred Approaches Document) Consultation</p> <p>Lewisham’s South Area Site Allocation 11: Downham Co-op These representations are submitted by Savills on behalf of our client, Tavern Propco, in response to the London Borough of Lewisham’s (LBL) Local Plan Main Issues and Preferred Approaches (Regulation 18) consultation.</p> <p>These representations supports the principle of the proposed Lewisham South Area Site Allocation 11: “Downham Co-op” (the Downham Co-op site allocation) for residential and town centre use of the site. Whilst supporting the principle of the allocation, this representation requests that the suggested use in the proposed allocation is maximised so that the development potential of the sustainably located site is utilised to deliver housing and viable town centre uses within Lewisham’s New Local Plan.</p> <p>Tavern Propco Tavern Propco is the owner of The Downham Tavern which is located within the boundary of the proposed Lewisham South Area Site Allocation 11: “Downham Co-op”.</p> <p>Executive Summary Tavern Propco is overall supportive of the Lewisham Local Plan Regulation 18 stage “Main Issues and Preferred Approaches” and its direction of travel, subject to modifications which Tavern Propco request to ensure the Local Plan and proposed Downham Co-op site allocation best maximises the development potential of the site.</p> <p>Structure of this Representation This representation provides a brief overview of the site and current and emerging policy designations. It request amendments are made to specified emerging policies.</p>	Support and comments noted.	No change.

Tavern Propco (Savills obo)	- 3	General LSA SA 11	<p>The Site The site is approximately 0.43 hectares in size. It is located west of Downham Way, north of Moorside Road and south of Capstone Road, in Bromley within south Lewisham. It currently comprises one single storey retail unit (Co-op Food) to the west of the site, one two-storey public house (Downham Tavern) to the north east of the site and a car park that occupies the central area of the site. Access is taken via Moorside Road along the southern boundary of the site.</p> <p>The site is very well located within the existing Downham Way local centre and surrounded by a mix of residential, retail and community uses. The surrounding properties are predominantly two storeys in height, with some three storey residential buildings interspersed. These include post-war terrace houses along Moorside Road (to the south) and Capstone Road (to the north) and a parade of retail units along Downham Way (to the east).</p> <p>Along Moorside Road there is also a medical practice and leisure centre and a primary school. The site is very sustainably located and is considered very suitable for mixed-use residential-led development. The majority of the site has a PTAL rating of 3 whilst the very southern boundary of the site along Moorside Road has a PTAL rating of 2. TfL's WebCAT mapping indicates that the majority of the site will have a PTAL rating of 4 in the 2021 and 2031 forecast baseline for. This demonstrates that the site has very good access levels to public transport supporting it as a location for increased density of development and a suitable location for new housing and intensification of town centre uses.</p>	The supplementary information is noted.	No change.
Tavern Propco (Savills obo)	- 3	General LSA SA 11	<p>Existing Planning Policy Designations The site currently has three policy designations; Core Strategy Policy 6: <i>Retail Hierarchy and Location of Retail Development</i> and Development Management Policy 14: <i>District Centres Shopping Frontages</i> and Development Management Policy 20: <i>Public Houses</i>.</p> <p>Core Strategy Policy 6 seeks to only allow redevelopment of local shopping facilities where there is no economic demand for such services. Development Management Policy 14 states that the Council will only consider a change of use involving the loss of ground floor level shops where the proposal would meet specified criteria.</p> <p>Development Management Policy 20 seeks retain public houses unless they are financially unviable, vacant and there is other local provision.</p> <p>Requested Amendment: It is requested that the current planning policy designations are removed and that the Downham Co-op site is allocated for mixed use residential-led development as set out in the site's proposes allocation, subject to modifications.</p>	Policies in the Local Plan, once adopted, will replace the policies in the Core Strategy and Development Management Local Plan. However, the site allocation will still require the retention or re-provision of the public house, alongside mixed-use redevelopment.	No change.
Tavern Propco (Savills obo)	3	LSA SA 11	<p>Emerging Planning Framework Lewisham Local Plan Regulation 18 (Main Issues and Preferred Approaches Document) Lewisham's South Area Site Allocation 11: Downham Co-op Tavern Propco supports in principle the Downham Co-op site to be allocated for mixed-use development in Lewisham's the new Local Plan.</p>	Support noted. Where no advanced pre-application discussions have taken place, the council has used a SHLAA based method to determine indicative site capacities – more details	No change.

			<p>The proposed site allocation is for a mixed-use redevelopment with compatible main town centre and residential uses. An indicative development capacity of 42 residential units and 1,440sqm of gross internal non-residential floorspace compatible with town centre uses.</p> <p>Residential Use at Lewisham’s South Area Site Allocation 11: Downham Co-op Tavern Propco strongly support the provision of residential development within the site allocation. However, it is considered that the proposed indicative development capacity of 42 units is conservative and does not best maximise the development potential of the site.</p> <p>In the context of making effective use of land, Paragraph 117 of the NPPF states that planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses. Paragraph 118 goes on to state that planning policies and decisions should encourage multiple benefits from both urban and rural land, including through mixed-use schemes, and should give substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs. Paragraph 118 goes on to set out that planning policies should promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained and available sites could be used more effectively.</p> <p>In keeping with the principles of the NPPF, Lewisham’s Local Plan should be seeking to make effective use of suitable land, such as the Downham Co-op site, to boost housing supply. Lewisham’s South Area Site Allocation 11 comprised land that is a previously developed brownfield site in a highly accessible and sustainable location close to a wide range of existing services, facilities and amenities. Therefore, it is considered that the site’s indicative development capacity of 42 residential units does not fully utilise the development potential of the site.</p> <p>It is considered that a development capacity of 42 dwellings should be set as a minimum target and should be exceeded if all other planning considerations have been met, in accordance with national, London-wide and local aspirations.</p> <p>Requested Amendment: It is requested that the Downham Co-op site allocation is amended to state that the net residential units that development at the site should provide is “a minimum of 42 units subject to satisfactory design”.</p>	<p>can be found in the Ste Allocations Background Paper</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the need to re-provide retail uses and the public house, whilst introducing residential units and to reflect the surrounding character of the site. Based on these considerations, the land use mix and residential units have remained the same.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	
Tavern Propco (Savills obo)	- 3	General LSA SA 11	<p>Summary and Conclusions</p> <p>Tavern Propco is supportive in principle of the Lewisham’s South Area “Site Allocation 11: Downham Co-op” to be allocated for mixed-use residential-led development in Lewisham’s New Local Plan.</p> <p>It is requested that LBL amend Lewisham’s South Area Site Allocation 11: <i>Downham Co-op</i> to maximise the potential development capacity of the site. It is requested that the indicative net capacity of 42 residential units is set as a minimum target.</p> <p>With regards to proposed policies, it is requested that LBL amend Emerging Policy HO1: <i>Meeting Lewisham’s Housing Needs</i> to include the Standard</p>	Support and comments noted. Our response is set out above.	No change.

			<p>Methodology Housing targets and that Emerging Policy EC19: <i>Public Houses</i> is amended to better represent prevailing market conditions and to ensure that planning policies allow the optimum use of land over the Plan's period.</p> <p>We would be grateful for confirmation of receipt of these representations. Please feel free to contact us in the first instance if you have any queries or would like to discuss.</p>		
McDonald's Restaurants Ltd (Planware ltd obo)	3	LSA SA 13	<p>McDonald's Restaurant, Old Bromley Road, Downham, Bromley, BR1 4JY</p> <p>Please take this letter as a formal objection to the proposed Local Plan Allocation 13, McDonald's Ashgrove Road which seeks to allocate the site for mixed use development.</p> <p>We currently have no desire to redevelop this site and would not want to prejudice the provision of our drive-thru lane in this location.</p> <p>Whilst we acknowledge your aspirations for the wider area we would welcome the opportunity to meet with you to discuss the retention of our store.</p> <p>I look forward to hearing from you.</p>	The objection to developing this site is noted.	McDonalds Ashgrove Road ste allocation has been removed from the Plan.
The Cherwell Group (DP9 obo)	- 3	General LSA SA 14	<p>REPRESENTATIONS TO THE LEWISHAM LOCAL PLAN</p> <p>We write on behalf of The Cherwell Group who are the owners of Catford Police Station and are shortly to begin pre-application engagement with the Council on plans for the site.</p>	Comments noted.	No change.
The Cherwell Group (DP9 obo)	3	LSA SA 14	The site is included as a site allocation in the draft Local Plan and we fully support this approach.	Support noted.	No change.
The Cherwell Group (DP9 obo)	3	LSA SA 14	<p>We note that indicative development capacities have been included for the site. We consider that the evidence base is the appropriate location for the indicative capacities, and that they have the potential to be misinterpreted or misapplied as design briefs or effective constraints on what can be achieved on the site.</p> <p>There is the possibility to further optimise the development capacity of the site and without appropriate text we are concerned that the indicative development capacities could be used to constrain development potential.</p>	<p>Support noted. Where no advanced pre-application discussions have taken place, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper.</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the need to protect the on-site designated heritage asset and to reflect the surrounding character. The indicative capacity has also been tested through the</p>	Catford Police Station site allocation amended by reducing residential capacity to 24 units and increasing employment/ main town centre floorspace to 1,072m ² .

				<p>A21 Development Framework that has been endorsed by the council.</p> <p>-Based on these considerations, the land use mix and residential units have been amended.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	
Phoenix Community Housing (BPTW obo)	3	LSA SA 14	<p>14 - Catford Police Station (South Lewisham) - PCH sees the potential for this site to make a significant contribution to genuinely affordable housing in Catford town centre, and so supports its allocation, however would strongly urge that the retention, adaptation and conversion of the front building be a requirement of the policy given its status as a locally important heritage asset and the most architecturally profound building in the vicinity. We would also point out that this site falls within the Central Area rather than South Lewisham.</p>	<p>The site allocation recognises the heritage value by stating that opportunities should be taken to investigate the viability for the adaptive re-use of the existing buildings which are non-designated heritage asset. There is also merit in referring to the adjacent locally listed Army Reserves.</p> <p>Disagree, as Catford Police Station site allocation is located in the South sub area.</p>	<p>Catford Police Station site allocation amended to reference nearby locally listed heritage asset.</p>
Notting Hill Genesis (Savills obo)	3	LWA 01	<p><i>Relates to Call for site</i></p> <p>Whilst NHG is generally supportive of the overall 'direction of travel' of the West Area place principles (LWA1), specifically Part A(e), which sets out that the Council will deliver new and improved workspace through colocation of employment and other compatible uses, the draft Local Plan is not consistent with national policy and the London Plan.</p>	<p>Comments noted.</p> <p>Disagree that the Local Plan is inconsistent with national and London Plan policy.</p>	<p>No change.</p>
Selkent Holdings (Daniel Watney LLP)	3	LWA 01	<p><i>Relates to Part 3, LWA SA 09</i></p> <p>Draft Policy LWA1 – West Area</p> <p>We welcome the recognition in Policy LWA1(D) that “the comprehensive redevelopment of sites within Willow Way LSIS will be supported to enhance local employment provision as well as to improve the environmental and visual quality of the neighbourhood area. Development proposals within the LSIS should positively address the site’s relationship with Upper Sydenham / Kirkdale local centre, particularly to ensure compatible land-uses as well as safe and legible connections. Development should deliver high quality designs that help to establish a more cohesive, employment-led mixed use quarter.”</p>	<p>Support noted.</p>	<p>No change.</p>

			<p>This recognition that Willow Way could be a vibrant, mixed-use quarter which will positively improve the Upper Sydenham / Kirkdale local centre is exciting and strongly supported.</p> <p>We agree that with appropriately designed schemes, there is an excellent opportunity to create a meaningful employment hub at Willow Way and also deliver significant amounts of residential accommodation, including affordable homes, and public realm.</p>		
(Simply planning obo)	- 3	General LWA SA 01	<p>London Borough of Lewisham – Regulation 18 Lewisham Local Plan Public Consultation MOT Centre, Shardeloes Road, Brockley, SE14 6RT Representations on behalf Mr Kadir Gencel and Mrs Kutlu Gencel</p> <p>These Representations are submitted on behalf of the owner of the MOT Centre, Shardeloes Road, Brockley ('the site') to the public consultation on the regulation 18 version of the draft Lewisham Local Plan. Our clients site forms part of site allocation reference SA30 'Site at 111 & 115 Endwell Road (Timber Yard and Community College), Brockley Cross' in the currently adopted Lewisham Site Allocations Local Plan (June 2013).</p> <p>The existing allocation in the currently adopted location plan states the allocation should be used for the following: <i>"Mixed use commercial/employment uses on the ground floor with housing above"</i></p> <p><i>LB Lewisham officer note: two maps are included in the original representation, both showing the boundary of the site in red and the clients land in green.</i></p>	Comments noted.	No change.
(Simply planning obo)	- 3	General LWA SA 01	<p>The above allocation is currently in multiple ownerships with the land to the south and west of our clients land being owned by the adjoining timber merchants. The land to the north of the site is occupied by a single storey church building, with a small area of the timber merchants beyond this.</p> <p>The allocation in the current Local Plan states that <i>"The Church itself is not proposed for redevelopment"</i> and so is clear that the allocation relates to our clients land and the timber merchants land only.</p> <p>On 19th March 2019 our client applied for planning permission on the site under application reference DC/19/110715 for the following development: <i>"Demolition of the existing single storey buildings on the site at R L Watson and Son, Shardeloes Rd, SE4 and construction of a part one/part two storey building to provide an MOT Centre facilities"</i></p> <p>Planning permission was granted for the above development on 15th May 2019 and development has commenced at the site. Following the granting of planning permission it is our client's intention to seek a further planning permission for additional storeys to be added to the MOT Centre to provide residential units above. We are in the process of preparing a pre-application enquiry to be submitted to the London Borough of Lewisham to seek your advice ahead of the submission of the planning application.</p>	Comments noted.	No change.

(Simply planning obo)	- 3	General LWA SA 01	We would welcome and opportunity to discuss the allocation and will be progressing a pre-application enquiry for residential development at the site imminently, which we hope will assist in demonstrating to the Planning Inspectorate that the retained allocation remains viable and deliverable during the next plan period.	Comments noted.	No change.
(Simply planning obo)	3	LWA SA 01	In the regulation 18 version of the draft Lewisham Local Plan, the existing 111 & 115 Endwell Road allocation is proposed to be retained as part of the new Local Plan, including our clients land. The wording for the allocation in the draft Local Plan has been amended slightly to the following: <i>“Employment led mixed-use redevelopment with compatible commercial, community and residential uses.”</i> We welcome the wording for this allocation, as it continues to fit with our aspirations for residential development on the upper floors above the MOT Centre. The exact yield for the number of units will be determined during pre-application engagement with the Local Planning Authority.	Support noted.	No change.
(Simply planning obo)	3	LWA SA 01	Having reviewed the detailed wording for the allocation on pages 754 to 755 of the Local Plan, we would suggest a couple of minor alterations to the allocation. The first relates to the development guidelines on page 755 and we would suggest a fifth bullet point is added to state the following: <i>“Given the multiple ownerships of the site, a phased development of the allocation would be acceptable. Any earlier phase of development must show compliance with Policy QD1 ‘Delivering high quality design in Lewisham’ and also demonstrate how it would not prejudice the delivery of the wider site allocation”</i> Paragraph 59 of the NPPF confirms the government’s objective of significantly boosting the supply of new homes. Our client site can provide a small increase to the housing land supply and this can be delivered immediately in a way which will not undermine the wider site allocation. Therefore, the allocation should provide clarity that a phased development of the allocation would be permitted, to allow the early delivery of housing on our clients land. In conclusion, our clients are very keen to redevelop their land to provide additional residential units above, which complies with the current and draft Site Allocation Plan. Therefore, we are keen to support the revised Local Plan but would request an addition to the wording of the allocation to allow the early delivery of housing at our clients site, on the basis that this will not prejudice the wider allocation of the land to the west and south.	Disagree with wording proposed but recognise that masterplanning, phasing and working in partnership should be acknowledged.	111-115 Endwell Road site allocation amended to reference masterplanning and partnership working.
(Simply planning obo)	3	LWA SA 01	A second suggested amendment is that the site allocation boundary should be amended. The wording of the current allocation makes clear that the church to the north of our site is not intended for development. Unless the church have advised that they wish for the site to be redeveloped, then the allocation should be amended to ensure the whole allocation is considered to be deliverable, meaning the church site is deleted from the allocation. <i>LB Lewisham officer note: a map is included in the original representation showing a suggested boundary revision marked by an orange line.</i> The above revised allocation would retain the land in the ownership of our client and the timber merchants, which must be considered the only deliverable	Agree that the church plot should be removed from the site allocation.	111-115 Endwell Road site allocation amended by removing the church plot from the site allocation boundary.

			<p>allocation if the Church have never advised the Council that they wish to redevelop their land.</p> <p>We would also suggest that the boundary of the site allocation be amended to ensure the land included within the allocation can be considered as deliverable, as required by paragraph 67 of the NPPF.</p>		
M&D Enterprises Ltd (March Design Associates obo)	- 3	General LWA SA 02	I was passed on your consultation document on site review, attached and instructed to respond on behalf of the owners M&D Enterprises Ltd for whom we have acted for over many years.	Comments noted.	No change.
M&D Enterprises Ltd (March Design Associates obo)	- 3	General LWA SA 02	<p>We therefore hope this will be taken into account in your final Local Plan draft and hopefully adopted version in due course. As is said in these parts, you know it makes sense.</p> <p>The owners are always happy to discuss and if a wholly residential scheme is acceptable, then the prospects of this site coming to fruition in the near future is highly probable.</p>	Comments noted.	No change.
M&D Enterprises Ltd (March Design Associates obo)	3	LWA SA 02	<p>This site was allocated as SA28 in previous Local Plan and owners wish for it to remain as a possible development opportunity.</p> <p>In the interim period efforts were made to secure planning permission, which was thwarted by your Design Panel at a time of transition from the previous voluntary panel to the new 'paid' panel and this site got up in the cross fire and in my opinion unreasonably so. The adjacent site to the north had been redeveloped, whilst the one to the south was about to commence, both of incredible mediocrity and yet the latter was cited as exemplar standard, when built it is very bland. Consequently the scheme was mothballed but may be reconsidered soon but could be enhance if a pragmatic designation is applied.</p>	Comments noted.	No change.
M&D Enterprises Ltd (March Design Associates obo)	3	LWA SA 02	The new London Plan emphasises 'Design Led Approach' and this site meets the small sites category where PTAL is no longer a consideration. Furthermore this has been a skip-yard for many years, and now only used for plant storage. There was a temporary permission for a housing office for local framework delivery, that has long since ceased and reverted to mainly skip storage. Given the demise of commercial ground floor space, particularly since Covid, where secondary retail space will in even less demand, then insistence for a non-residential use on ground floor should be removed and the site go forward as a wholly residential scheme. The retention of a ground floor non-residential use is a liability which prevents redevelopment and if retained is likely to remain as a voided shell like many others in the locality. The Policy consideration needs to waken up to this reality for secondary parades – in this case with low and incompatible commercial use with virtually zero employment status – to free up scope for better and more residential use in highly sustainable locations such as this right on the station with good bus routes nearby.	Disagree that commercial uses should be dropped from the site, given it's location within the local centre and proximity to the railway station Other developments on both sides of the station have operational ground floor non residential uses.	No change.
M&D Enterprises Ltd (March Design Associates obo)	3	LWA SA 02	Owners are happy to include level access to platform as a community / infrastructure benefit with good public realm landscaping. This inclusion should be considered as a requisite gesture to benefit all especially disabled people and therefore other commercial aspects to be dropped in favour of good cycle, refuse and ground floor circulation / entrances as way forward.	Agree that access to the platform will be of benefit. The site allocation already includes the need to improve legibility and safe access to the station entrance from the western	No change.

				side of the railway. Disagree that commercial uses should be dropped from the site.	
Dolphin Living Group (CMA Planning obo)	- 3	General LWA SA 04	LEWISHAM DRAFT LOCAL PLAN – REGULATION 18 STAGE, JANUARY 2021 REPRESENTATIONS ON BEHALF OF DOLPHIN LIVING GROUP IN RESPECT OF ‘MAIN ISSUES AND PREFERRED APPROACHES’ DOCUMENT We write on behalf of Dolphin Living Group in response to the local planning authority’s draft Local Plan, which was published on 15th January 2021 for consultation pursuant to Regulation 18 of the Town and Country Planning (Local Planning) (England) Regulations 2012.	Comments noted. Our response is set out below.	No change.
Dolphin Living Group (CMA Planning obo)	- 3	General LWA SA 04	Dolphin Living have land interests within the London Borough of Lewisham, in particular a site on Honor Oak Road in Forest Hill, which forms part of “West Area Site Allocation No.4” within the draft Local Plan. Dolphin support the principle of the site being allocated for housing; however, for the reasons set out below, we consider that the draft allocation fails to properly reflect the site’s development opportunities such that the indicative development capacity in the Plan should be significantly increased.	Comments noted. Our response is set out below.	No change.
Dolphin Living Group (CMA Planning obo)	- 3	General LWA SA 04	We hope that these representations will provide a useful contribution to policy formation and would welcome further dialogue with the Council on this matter as drafting of the new Local Plan progresses, so as to ensure that the Site Allocation promotes rather than restrains the delivery of new homes on this key site.	Comments noted. Our response is set out below.	No change.
Dolphin Living Group (CMA Planning obo)	- 3	General LWA SA 04	Dolphin Living Dolphin Living is an affordable housing charity formed in 2005 and initially funded through gifts from the Dolphin Square Trust from the sale of Dolphin Square in Pimlico. Dolphin Living’s primary charitable objective is to support London’s workers on modest incomes who cannot afford housing near to their place of work. This is fulfilled through the provision of homes to rent at below market levels. In 2021 79% of their 799 homes were available for intermediate rent at an average discount of 40% to the local market rent. Dolphin Living house those who make London work and with whom London is better place to live and work. The Site In 2016 Dolphin Living acquired the site known as Havelock House and The Hermitage, Honor Oak Road, Forest Hill, London, SE23 3SA. The site is made up of two distinct elements; the first element is Havelock House, which comprises 2 x 4 storey and 1 x 3 storey blocks of flats that sit within landscaped grounds; the second element is 5 x 2 storey, 2 bedroom houses on The Hermitage, which lie immediately to the rear (north-west) of Havelock House. The Havelock House buildings are set back from Honor Oak Road this element of the site is bounded by the side of the 2 storey semi-detached house at 46 Honor Oak Road and the rear of the 2 storey detached houses at 1 and 3 Horniman Drive to the north; by an area of open grassland and the 2 storey houses on The Hermitage to the west; by the 4 storey block of flats with rear car park at 60 Honor Oak Road to the south, and; by the public highway on Honor Oak Road to the east.	The supplementary information is noted. Our response is set out below.	No change.

			<p>The Hermitage element of the site is bounded by an area of grassland and shrubbery to the rear of the 3 storey block of flats known as Baxter House, Horniman Drive, and a telecommunications mast an ancillary building to the north and west; by the detached 2 storey house at 4 The Hermitage to the south, and; by the Havelock House buildings and grounds to the east. In terms of the local topography, the site sits on a slope, which rises from Honor Oak Road to Havelock House to The Hermitage.</p> <p><i>LB Lewisham officer note: Figure 1.1 Aerial Photograph of the Site is included in the original representation. The photograph shows the site boundary in red.</i></p> <p>The surrounding area is residential in character, comprising 2 to 3 storey semi-detached and terraced houses, 2 storey detached houses and 3 to 4 storey blocks of flats. The quality of the building stock in the area is varied, with many of the detached and semi-detached houses dating from the mid-twentieth century, although a number of attractive Victorian villas survive within the area, together with a handful of Georgian buildings. Whilst most of the purpose-built flatted blocks appear to date from the 1950-60s, there are some examples of more recent development, including small blocks of flats that appear to date from the 1990s and early 2000s.</p> <p>In terms of local amenities, the site lies approximately 400 metres to the north-west of the Forest Hill District Centre, which includes a range of local shops, cafes and restaurants and a large Sainsbury's supermarket. The site also lies 110m metres to the east of the Horniman Primary School.</p> <p>Whilst the site itself is not located within a Conservation Area, the boundary of the Forest Hill Conservation Area lies a short distance to both the east and south of the site. The detached 2 storey Regency villa with raised basement known as Asherby Cottage, 62 Honor Oak Road, and adjacent two storey Georgian house known as Hill House, 64 Honor Oak Road, which lie immediately to the south of the site, are both Grade II listed. Both buildings are treated as a group for the purpose of the listing and both lie within the Forest Hill Conservation Area. The Historic England listing descriptions for both buildings have been appended to this note.</p> <p>In terms of local access to public transport, the site lies 500 metres to the north-west of Forest Hill Station, which is served by both National Rail and London Overground services. In addition, London bus services operate along Honor Oak Road, with a bus stop located immediately adjacent to the south-east corner of the site that is served by the P4 bus route, which runs between Lewisham town centre and Brixton. As a result the site has a good Public Transport Accessibility Level (PTAL) of 3-4, on a scale from 0 to 6b where 0 is very poor and 6b is excellent.</p>		
Dolphin Living Group (CMA Planning obo)	3	LWA SA 04	<p>Lewisham Draft Local Plan</p> <p>The Lewisham Draft Local Plan 'Main Issues and Preferred Approaches' document was published for consultation in January 2021, pursuant to Regulation 18 of the Town and Country Planning (Local Planning) (England) Regulations 2012. Part Three of the draft Local Plan sets out emerging policies and Site Allocations for each of Lewisham's key 'Areas'.</p>	Comments are noted.	Havelock House, Telecom Site and Willow Tree House site allocation has been removed from the Plan.

		<p>The Havelock House and The Hermitage site lies within Lewisham’s West Area and forms part of draft Site Allocation No.4 ‘Havelock House, Telecom Site and Willow Tree House, near Horniman Drive’, which allocates the site for ‘redevelopment of backland site for residential use.’</p> <p>Draft Site Allocation No.4 provides an indicative development capacity of 30 net (i.e. additional) residential units. The Site Allocation area presently includes 23 residential units, all of which are within the Havelock House and The Hermitage site, and the total indicative site capacity (i.e. existing plus net additional) is therefore 53 homes. The Site Allocation covers an area of 1.48 hectares (ha) and the 53 home capacity equates to a density of approximately 36 units per hectare (u/ha).</p> <p>The previous version of the London Plan (2016) included a Sustainable Residential Quality (SRQ) Matrix that set out target density ranges for development with different settings and different Public Transport Accessibility Levels (PTALs). The SRQ Matrix was a relatively crude tool that was designed to support the delivery of new homes in order to meet the previous London Plan (2016) housing targets.</p> <p>As set out below, the new London Plan (2021) sets out higher housing targets, which reflect the pressing need to intensify and densify new housing developments in sustainable and accessible locations in order to meet London’s housing needs. To support the delivery of these new, higher housing targets, the SRQ Matrix has effectively been replaced by London Plan Policy D3, which seeks to optimise site capacity through a design-led approach.</p> <p>Whilst the SRQ Matrix no longer has any weight in policy terms, it remains a useful yardstick for density calculations. In this regard it is relevant to note that the SRQ Matrix provides an indicative density range of 45-170u/ha for sites with an ‘Urban’ setting with a PTAL of 2-3, such as Havelock House and The Hermitage.</p> <p>Whilst not determinative in and of itself, the SRQ Matrix nonetheless provides a clear indication that the indicative development capacity for Site Allocation No.4 (which equates to 36u/ha (gross)) would amount to under-development of a sustainable and accessible brownfield urban site.</p> <p>The Lewisham Local Plan Site Allocations Background Paper (January 2021), which forms part of the evidence base for the draft Local Plan, sets out how the indicative site capacities have been calculated at Section 6 of the document. Subsection 4 (‘all other sites’) states that for sites where there is no existing planning consent, current pre-application proposals, or masterplan study, the starting point for establishing the indicative capacity has been informed by the use of a standard methodology, based on the density assumptions used in the London-wide SHLAA (2017) methodology.</p> <p>Table 6.1 in the document sets out the London-wide SHLAA density assumptions, which for ‘Urban’ sites with a PTAL of 2-3 (such as Havelock House and The Hermitage) provides an indicative density of 170u/ha. This broadly tallies with the SRQ Matrix referred to above, which suggests a target density range of 45-</p>		
--	--	---	--	--

			<p>170u/ha for sites with these characteristics, which would equate to between 67 and 252 dwellings for the allocation as a whole.</p> <p>Subsections 5 to 7 of the document go on to explain that sites considered under (4) were then subject to a sense-check exercise to assess whether the baseline capacity figures were feasible and appropriate to the site context. It appears that this sense-check exercise has resulted in the indicative capacity of Site Allocation No.4 being reduced from 170u/ha to 36u/ha, which is a 79% reduction.</p> <p>As with almost all urban brownfield sites, the Havelock House and The Hermitage site is subject to a number of development constraints, including proximity to neighbouring residential properties, mature trees within the site, site topography, prevailing building heights, and two nearby listed buildings. However, such constraints are common both within London generally and within Lewisham and it is not considered that these constraints are prejudicial to the extent that they would result in a 79% reduction in the indicative site capacity from that provided by the SHLAA density assumptions.</p> <p>Accordingly, Dolphin Living have commissioned Corstorphine + Wright Architects to prepare a development feasibility study for the Havelock House and The Hermitage site.</p> <p><i>LB Lewisham officer note: A Site Analysis and Development Feasibility Study is included in the original representation.</i></p> <p>The study includes contextual analysis of the site and its surroundings and sets out the site-specific development opportunities and constraints at Sections 2.3 and 2.4.</p> <p>The study then provides an illustrative masterplan for the site, which directly responds to the site's local context, opportunities and constraints, and demonstrates that the Havelock House and The Hermitage site (i.e. part of the overall allocation) is capable of accommodating approximately 110 homes within a contextually appropriate development scheme.</p> <p>We would ask that the Council takes into account the findings of the study as the drafting of the Local Plan progresses and would welcome further dialogue with the Council on matters pertaining to the development capacity for Site Allocation No.4.</p>		
Dolphin Living Group (CMA Planning obo)	3	LWA SA 04	<p>Wider Policy Context</p> <p>The pressing requirement to deliver new homes in order to meet housing needs is enshrined in all levels of planning policy. At a national level, Paragraph 59 of the National Planning Policy Framework (NPPF) states:</p> <p><i>“To support the Government’s objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay.”</i></p> <p>At a regional level, London Plan Policy H1 (Increasing Housing Supply), Part A, advises that each local authority should plan in order to meet and exceed its ten</p>	The site allocations in the Local Plan when combined together seek to meet the London Plan housing annual target of 1,667 homes.	No change.

			<p>year housing completions targets. These targets are set out in Table 4.1, which for Lewisham is 16,670 new homes over a ten year period, which equates to an annual target of 1,667 homes. This represents a 20% increase on the borough's previous London Plan (2016) annual target of 1,385 new homes.</p> <p>The Borough's most recently published Annual Monitoring Report (2019/2020) shows a projected five year housing supply of 7,359 homes for years 1-5 (which equates to an average annual supply of 1,472 homes), with supply then falling in years 5-10 and 11-15. This presents a significant challenge for the Borough as projected housing supply is markedly below the Borough's new London Plan housing target.</p> <p>It is therefore imperative that the Borough, through the plan making process, facilitates an increase housing delivery through identifying and allocating suitable sites for new housing at appropriately optimised capacities/densities.</p> <p>London Plan Policy H1, Part B goes on to state that in order to ensure that the ten year housing targets are achieved, boroughs should, <i>inter alia</i>, optimise the potential for housing delivery on all suitable and available brownfield sites through their Development Plans and planning decisions, especially sites with existing or planned public transport access levels (PTALs) 3-6 or which are located within 800m distance of a station or town centre boundary.</p> <p>This is of particular relevance as Havelock House and The Hermitage has a PTAL of 3-4 and is located just 400m from Forest Hill District Centre and 500m from Forest Hill Station. As such, there is a strong policy presumption in favour of optimising housing delivery on this sustainable and accessible brownfield site.</p> <p>Taking into account the above NPPF and London Plan policy objectives and requirements, it is clear that there is an urgent need for the Council, through the preparation of its new Local Plan, to support and promote the optimisation of housing delivery on sustainable, accessible brownfield sites, such as Site Allocation No.4, in order to meet its housing targets.</p> <p>As currently drafted, the indicative site capacity would serve to constrain housing delivery and must be increased to reflect the development potential of the site and to align with national and regional policy.</p>		
Dolphin Living Group (CMA Planning obo)	3	LWA SA 04	<p>GLA Draft Good Quality Homes for All Londoners Guidance</p> <p>In October 2020 the Mayor of London published his Good Quality Homes for All Londoners Guidance for consultation. This Guidance document has been prepared by the GLA with input from a team of specialist consultancies, including CMA Planning. It is anticipated that the final Guidance will be formally published as Supplementary Planning Guidance (SPG) to the new London Plan in Summer 2021, to replace the current (i.e. 2016) Housing SPG. The draft guidance can be downloaded from the GLA's website at: https://consult.london.gov.uk/good-quality-homes-for-all-londoners</p> <p>The draft Guidance includes four 'Modules', the first of which is Module A, which provides guidance in relation to meeting the over-arching objectives and policy requirements of London Plan (2021) Policy D3 (Optimising Site Capacity through the Design-led Approach). Specifically, Module A advocates a design-led</p>	Comments relating to the Good Quality Homes SPD and the feasibility study are noted.	No change.

			<p>methodology for optimising site capacity at the plan-making stage. It is aimed at borough policy officers when calculating capacity on strategic and non-strategic site allocations. It sets out an approach to assessing sites' suitability for development and offers a tool for assessing site capacity, which is provided within Module A.</p> <p>The enclosed feasibility study has been prepared with reference to the guidance provided in Module A and the accompanying Site Analysis Using Capacity Factors document sets out the capacity factors that have informed the indicative masterplan scheme. We would ask that the Council takes the GLA draft Guidance into account when preparing the Regulation 19 version of the draft Local Plan.</p>		
Dolphin Living Group (CMA Planning obo)	3	LWA SA 04	<p>In conclusion, it is considered that the draft Local Plan as currently worded would unnecessarily limit the delivery of new homes within a Site Allocation for new housing.</p> <p>Accordingly, Dolphin Living object to the current drafting of Site Allocation No.4 'Havelock House, Telecom Site and Willow Tree House, near Horniman Drive' and would ask that the Council increases the indicative development capacity for this key site in order to more closely reflect the site's development potential, and to more closely align with national and regional policy, which seek to significantly increase housing delivery.</p>	Objection noted. Our response is set out above.	No change.
UD Urban Development	3	LWA SA 05	<p>We apologise for the delay in submitting our documentation. Events related to the current health crisis caused serious disruption at the last moment.</p> <p><i>LB Lewisham officer note: The following documents were also attached, alongside this representation:</i></p> <p><i>Site Location Plan</i> <i>Site Location Masterplan</i> <i>9-13 The Façade, Forest Hill Masterplan</i> <i>Correspondence relating to pre-app advice for 9-13 The Façade</i> <i>Proposed Floorplans, sections and elevations of 9-13 The Façade</i></p> <p>Our Proposed Site address is:</p> <ul style="list-style-type: none"> 9-13 The Facade (and associated masterplan properties) Forest Hill London SE23 3HA <p>We propose that the above site masterplan proposals, which encompass a large part of Lewisham's Reg. 18 (Forest Hill Station & Forecourt) be included within your local plan.</p> <p>The masterplan proposals illustrate how Lewisham's ambitions for a redeveloped Station area can be realised without the need for compulsory purchase.</p> <p>The plans demonstrate how each site can be developed independently without compromising the integrity of the overall scheme.</p> <p>Also included are proposals for 9-13 The Facade, which forms the western-most piece of the masterplan site. They are included to demonstrate the deliverability of a part of the overall scheme.</p>	<p>The masterplan proposals and supplementary information relating to 9-13 The Façade is noted.</p>	Land at Forest Hill Station West site allocations amended by making reference to masterplanning and landowners working in partnership.

Selkent Holdings (Daniel Watney LLP)	- 3	General LWA SA 09	<p>LB Lewisham Local Plan – Regulation 18 Version Written Representation, Selkent Holdings</p> <p>This letter of representation has been prepared on behalf of our client, Selkent Holdings, in response to the Regulation 18 draft version of the LB Lewisham Local Plan issued for consultation earlier this year.</p> <p>Our client is a private landowner within the Borough, owning the site known as 12-24 Willow Way, SE26.</p> <p>These representations set out our support for the general emerging policy position in respect of land use and the site allocation encompassing our client’s site, however does highlight some concerns with the Regulation 18 version of the Plan as currently drafted.</p>	Support and comments noted. Our response is set out below.	No change.
Selkent Holdings (Daniel Watney LLP)	- 3	General LWA SA 09	<p>We do however raise some concerns about the specifics of the site allocation and the impact this could have on our client’s land ownership and aspirations for redevelopment.</p> <p>We request that these elements are reviewed through the next draft of the Plan to retain sufficient flexibility within the allocation and allow the site capacity to be optimised.</p> <p>Site Description and Summary Our client owns the freehold of a two-storey commercial building at 12-24 Willow Way, SE26 which forms part of the wider commercial site known as Willow Way.</p> <p>The site is currently designated as a Local Employment Location within LBL’s adopted policy documents, with emerging policy seeking to re-designate this as a Locally Significant Industrial Site (LSIS).</p> <p><i>LB Lewisham officer note: the Allocation Map is included in the original representation. It is reproduced with outline in red, and the client’s site edged crudely in blue for context.</i></p> <p>The site lies to the immediate north / north-east of a cleared parcel of land owned by LB Lewisham and to the immediate south of privately owned land comprising a small industrial unit, an MOT garage and The Bricklayers Arms Public House.</p> <p>The eastern half of Willow Way is also characterised by small scale industrial units and open yard space whilst the former police station is currently being redeveloped at the north-eastern end of Willow Way.</p> <p>Willow Way joins on to Dartmouth Road to the north and Kirkdale to the south-west. Its built form is typical of the industrial nature of the immediately surrounding area however Kirkdale and Dartmouth Road provide retail accommodation at ground floor with residential above, typical of its position as a local centre.</p> <p>The site enjoys a Public Transport Accessibility Level (PTAL) rating of 4, on a scale of 0 to 6b where 6b is the highest. Flood risk mapping shows that the site lies</p>	The supplementary information is noted. Our response is set out below.	No change.

			<p>within Flood Zone 1 representing the lowest flood risk. Additional mapping shows it is at a very low risk of tidal, fluvial and surface water flooding – while Willow Way itself features some risk of surface water flooding.</p> <p>As mentioned above, the site falls adjacent to a currently cleared site which formerly housed a council depot and, more recently, a temporary school site. This is owned by the council and our client has recently engaged with LB Lewisham’s planning department in respect of the proposed mixed-use redevelopment of the two sites combined to re-provide high quality commercial floorspace alongside residential accommodation above. A meeting with Officers was held in January 2021, with formal written advice being received in February 2021.</p> <p>This meeting was broadly positive in respect of the principles of an employment-led, mixed use scheme on the combined site, recognising the position of the newly adopted London Plan and the direction of travel of the draft Local Plan. Officers raised caution over the wider Willow Way allocation and ensuring that our client as landowner sought to feed into the progression of the Local Plan.</p> <p>The following sections discuss those policies of relevance and our comments and observations at this stage of the plan evolution.</p>		
Selkent Holdings (Daniel Watney LLP)	- 3	General LWA SA 09	<p>We welcome the opportunity to engage on this exciting and evolving policy shift which supports the employment led, mixed use redevelopment of our client’s site, however we hope that the contents of this letter of representation sufficiently explain our reservations over part of the Plan as currently drafted.</p> <p>I trust that the contents of this letter sufficiently clear, however we would welcome further engagement to discuss these concerns. If you have any queries at all, please do contact me.</p>	Comments noted. Our response is set out below.	No change.
Selkent Holdings (Daniel Watney LLP)	3	LWA SA 09	<p>In summary, Selkent Holdings welcome the allocation of their site as part of a wider parcel of land within the Willow Way site allocation and support the position throughout the Plan for employment-led, mixed use redevelopment of the site in line with the principles of co-location.</p> <p>This echoes the pre-application process that our client has gone through recently alongside their neighbouring landowner, LB Lewisham, to assess the development potential of both sites combined to deliver substantial employment floorspace alongside residential accommodation and public realm.</p>	Support noted. Our response is set out below.	No change.
Selkent Holdings (Daniel Watney LLP)	3 3	LWA SA 09 Para 18.49 and para 18.50	<p>Site Allocation – West Area ‘9’</p> <p>In terms of Lewisham’s West Area Site Allocations, the Willow Way LSIS is allocated at ‘9’, as extracted below.</p> <p><i>LB Lewisham officer note: an extract of the site allocation boundary map and corresponding table for Willow Way site allocation is included in the original representation.</i></p> <p>The allocation is for the below, as identified through Paragraph 18.49: <i>“Comprehensive employment led mixed-use development. Co-location of compatible commercial, main town centre and residential uses. Reconfiguration of buildings and spaces to facilitate a new layout with new and improved routes,</i></p>	<p>The Local Plan provides indicative site capacities. Disagree that “minimal development capacity” should be used.</p> <p>Where no advanced pre-application discussions have taken place, the council has used a SHLAA based method to determine indicative site capacities – more details</p>	No change.

			<p><i>both into and through the site along with public realm and environmental enhancements.”</i></p> <p>Paragraph 18.50 of the draft Plan identifies the Willow Way opportunities as being: <i>“The site comprises the Willow Way Locally Significant Industrial Site, which is located adjacent to Upper Sydenham / Kirkdale local centre and spans both sides of Willow Way. The site includes vacant land and a mix of lower density employment uses. Redevelopment and site intensification, along with the co-location of commercial and other uses, will provide a more optimal use of land and enable the delivery of new and improved workspace to support the long-term viability of the LSIS. Development will also enable public realm enhancements to improve the quality of the townscape around the local centre, and help to make the area a safer and more attractive place for business and community activity”</i></p> <p>The approach of allocating the site as part of a wider parcel of land for redevelopment is strongly supported, as is the aspiration to create a new employment hub at this location alongside the delivery of much needed residential accommodation.</p> <p>The wider 1.29 hectare site is identified as having a development capacity of circa 6,700 sqm of employment space alongside 175 residential units. In terms of residential capacity per hectare, this would result in a density of 135.6 units per hectare. Whilst there is no longer a density matrix through the new London Plan, this is a conservative density for the site which would broadly be considered an urban location and benefits from a high PTAL rating of 4.</p> <p>We would contend that a greater density would be appropriate across this large, sustainable, brownfield site and that a density of 250-300 units per hectare would be more appropriate as a minimum and that even higher densities could be supported subject to demonstrating that there is a high quality of design.</p> <p>Whilst the table only recognises an indicative development capacity, we believe this should be altered to read ‘minimum development capacity’ to promote the optimisation of the site capacity in line with draft Policy QD6 and the approach taken within that policy.</p> <p>If the ‘minimum’ approach is not taken, then the ‘indicative’ approach should be increased to a higher density across the site. Applying 250-300 units per hectare would achieve an indicative development capacity of 322 – 387 units across the wider site.</p>	<p>can be found in the Ste Allocations Background Paper</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the need to provide employment uses whilst introducing residential units and to reflect the surrounding character of the site. Based on these considerations, the land use mix and residential units have remained the same.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	
Selkent Holdings (Daniel Watney LLP)	3 3	LWA SA 09 Para 18.51	<p>Paragraph 18.51 details the development requirements for the Willow Way allocation which we address in turn:</p> <ul style="list-style-type: none"> <i>“All proposals must be delivered in accordance with a masterplan to ensure the appropriate co-location of employment and other uses across the site. This must address the site’s relationship with the Upper Sydenham / Kirkdale local centre, to improve the functional relationship with neighbouring uses and the public realm, along with townscape character”.</i> 	<p>Support is noted. Agree that more clarity on “no net loss of industrial capacity” is needed. Supplementary text to Policy EC2 Protecting employment land and delivering new workspace</p>	<p>Willow Way LSIS site allocation amended in relation to masterplanning for sites with multiple ownerships and by providing clarity in relation to net loss of industrial capacity.</p>

			<p>We have outlined the general principles of masterplanning above within this letter and would reinforce our position also stands in respect of this development requirement for Willow Way.</p> <ul style="list-style-type: none"> • <i>“Development must not result in a net loss of industrial capacity, or compromise the functional integrity of the employment location, in line with Policy EC 5 (Locally Significant Industrial Sites)”</i>. <p>We accept this statement regarding the net loss of industrial capacity. There is no definition contained within the plan about what constitutes ‘capacity’ and whether this relates to net floorspace or allows for qualitative arguments to be made about the capacity.</p> <p>A no net loss position would not adhere to the new London Plan as this element was amended during the Examination process to remove any reference to ‘no net loss’ of floorspace. We request that capacity is defined through a future iteration of the plan to confirm this does not relate explicitly to existing floorspace.</p> <ul style="list-style-type: none"> • <i>“Positive frontages along Willow Way, Dartmouth Road and Sydenham Park, with active ground floor frontages. Positive frontages elsewhere throughout the site, where new routes are introduced”</i>. <p>This is welcomed and we believe positive and active frontages will be a significant public benefit to redevelopment on this wider allocation. This could be in the form of active residential frontages, active commercial / industrial frontages or retail uses and public realm provision.</p> <ul style="list-style-type: none"> • <i>“The site must be fully re-integrated with the surrounding street network to improve access and permeability in the local area. This includes a clear hierarchy of routes, with a legible and safe network of walking and cycle routes, through the site. Particular consideration must be given to the access and servicing arrangements for commercial uses”</i>. <p>This is welcomed and supported.</p> <ul style="list-style-type: none"> • <i>“Delivery of new and improved public realm and open space, in accordance with a site-wide public realm strategy”</i>. <p>This is welcomed and supported.</p>	<p>provides clarity on the net loss of industrial capacity. Table 8.3 also provides a formula for calculating financial contributions for the loss of industrial capacity. The Plan should be read as a whole.</p>	
Selkent Holdings (Daniel Watney LLP)	3 3	LWA SA 09 Para18.52	<p>Paragraph 18.52 of the draft Local Plan details the development guidelines which we address in turn:</p> <ul style="list-style-type: none"> • <i>“Non-employment uses, including residential uses, must be sensitively integrated into the development in order to ensure the protection of amenity for all site users, along with safe and convenient access. This will require careful consideration of the operational requirements of existing and potential future employment uses”</i>. <p>This is acknowledged and of course is a fundamental requirement of any co-location scheme to comply with the agent of change principles set through the</p>	<p>Support is noted. Disagree that reference to a new route should be removed from the Plan. The text states proposals will be expected to investigate, and where feasible, deliver a new route.</p> <p>Disagree that the reference to the former Sydenham</p>	No change.

			<p>new London Plan and ensure that the amenity of existing and future commercial and residential occupants is not compromised.</p> <ul style="list-style-type: none"> • <i>“Main town centre uses may be acceptable but these must be ancillary to the commercial uses and not detract from viability of the local centre”.</i> <p>This is noted and accepted.</p> <ul style="list-style-type: none"> • <i>“Enhanced permeability off Willow Way will be an essential element of the design. Proposals will be expected to investigate, and where feasible, deliver a new route(s) linking from Willow Way to Kirkdale and Dartmouth Roads”.</i> <p>This is accepted in principle but given the lack of any direct access to Kirkdale through the allocation, other than the existing Willow Way route, this element would be difficult to secure. Improvements to the existing road and pavement can no doubt be delivered through public realm improvements but additional routes are unlikely to be achievable.</p> <ul style="list-style-type: none"> • <i>“Additional planting and landscaping should be integrated to enhance the public realm and encourage movement by walking and cycling along Willow Way”.</i> <p>This is supported.</p> <ul style="list-style-type: none"> • <i>“Development should provide for a coherent building line along Willow Way, taking into account the redevelopment of the former Sydenham Police Station site”.</i> <p>This is noted and understood. The reference to the former police station should not be ambiguous in terms of heights however as a relatively modest 3-4 storey building. The Willow Way site has the potential to achieve greater height towards the centre where there are less sensitivities on neighbours.</p> <ul style="list-style-type: none"> • <i>“The design of development must respond positively to the local context, giving particular consideration to heritage assets, including the Sydenham Park Conservation Area, Halifax Street Conservation Area, Jews Walk Conservation Area, Area of Special Local Character, as well as listed building and locally listed buildings along Kirkdale”.</i> <p>This is noted and accepted.</p>	Police Station site should be removed.	
Manak Homes	3	LWA SA 10	<p>I am contacting you in relation to your consultation on the proposed site allocation located at ‘Land at Forest Hill Station east (Waldram Place and Perry Vale)’, this being Site Allocation 10 in the New Local Plan - an extract of the Site Allocation is attached.</p> <p>We are the freeholders of the now vacant MOT garage building (1a Waldram Place) and are in discussions with the adjacent taxi hire business (22-28 Perry Vale) to bring the entire site forward for development in the near future.</p> <p>There appears to be a slight misunderstanding of the current use class, the Nursery use class is in the 2 bed house that sits just outside of the site allocation</p>	<p>Agree that 1 Waldram Place is not used as a nursery and the text relating to retention or re-provision of the nursery should be removed.</p> <p>Where no advanced pre-application discussions have taken place, the council has used a SHLAA</p>	Land at Forest Hill Station East site allocation amended by including 1 Waldram Place within the site boundary and removing text related to the nursery.

			<p>(1 Waldram Place) and therefore the Nursery re-provision should not be included within the site allocation.</p> <p><i>LB Lewisham officer note: a title plan of the 2 bed corner house and a street view image showing this house circled in red are included in the original representation.</i></p> <p>Lastly, we would like to discuss if there is any opportunity to increase the residential units to above the current figure of 41.</p>	<p>based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the need for an appropriate a mix of employment and town centre uses at this district centre site, whilst introducing residential uses and creating a sense of arrival into the district centre. Based on these considerations, the land use mix and residential units have remained the same.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	
	3	LWA SA 12	<p>I am writing to formally object against the planning proposals for the site of 'Land at Sydenham Road and Loxley Close' in the Lewisham West area.</p> <p>Whilst I completely understand the need for housing and the local plan, I really do not believe that this site/my part of the site can help address this problem in this particular area.</p> <p>There are only two shops and three flats that front Sydenham Road in this plan and I own one of the shops and the flat above it. As the owner of these two units I would not be interested in developing or selling to a developer (I will explain in more detail later). I believe that my site is already developed to capacity (using building lines from existing neighbours) after we converted the upper part of the shop into a separate residential dwelling In 2010 (your ref: fp/09/08690).</p>	<p>Comments regarding the landowner not wanting to develop or sell the furniture shop are noted.</p>	<p>Land at Sydenham Road and Loxley Close site allocation boundary has been amended to exclude the furniture shop.</p>
	3	LWA SA 12	<p>Our neighbouring shop (Lidl), is the last large/largest commercial unit in Sydenham Road until you reach the Bell Green estate. It is also developed to capacity with two residential flats above the shop. This is the largest retail unit and supermarket in Sydenham serving the community in this area.</p>	<p>Redevelopment and site intensification, along with the introduction of a wider range of uses, will provide a more optimal</p>	<p>No change.</p>

			<p>The car park at the rear of the buildings (but currently not a through road, joined or belonging in any way to myself or Lidl) is the only car park in this area that serves the community before you go to the Bell Green estate. Until recently, the car park has always been free and served the local shops and residents by making sure that provision is made for people to visit this shopping area. The car park was well used and never to full capacity ensuring that parking was always available when needed. Recent parking (and quite frankly, stupid) policies in this car park have meant that it is being barely used causing parking problems for local residents and making it harder for local businesses with potential customers simply driving through because of the complexity of parking. This car park situation needs re-addressing than rather development.</p> <p>The area itself is very densely populated with existing high level estates on Mayow Road, Sydenham Road and Bell Green causing a strain on all the necessary infrastructure required to cope with the current levels of residents. To add significant numbers to this population after the lack of investment in recent years in the local infrastructure would be further strained.</p> <p>In the web meeting it was suggested than planning should complement with the Bell Green estate rather than compete with it. If that is also the case in reverse, then this end of Sydenham Road would need parking and a supermarket to help the diversity of this part of Sydenham for those wishing to walk to a local supermarket rather than always use, possibly, polluting transport to access the Bell Green estate.</p>	<p>use of land to support the vitality and viability of the town centre.</p> <p>Redevelopment of the site can also make a more optimal use of land by considering options for the car park, including rationalising the existing level of provision, taking into account needs of visitors and businesses along with public transport accessibility levels.</p>	
	- 3	General LWA SA 12	<p>I would also like to thank [name removed] for his time, emails and phone call addressing my complaints and concerns on this matter.</p> <p>I hope that this letter/ email / objection helps with any future decisions about this site in your local plan decisions.</p> <p>Thanks you for all your help and time in this matter.</p>	<p>Comments noted. Our response is set out above.</p>	<p>No change.</p>
	- 3	General LWA SA 12	<p><i>Just some history of this shop, my business, my reasons for being concerned...</i></p> <p><i>This shop is a family business and we sell and buy second hand furniture and antiques and we have been here since 2004. My father passed this business on to me and his grandfather before him.</i></p> <p><i>When we looked to relocate to this area in 2004 it was because we wanted to be closer to my father who has bad health and disabilities. Basically, the locality of this shop to my father (and his accessibility via his mobility scooter) has meant that he has always had a purpose in life and opportunity to come and participate in our day and we have always been local to our parents for any help that they may need. The shop has been a blessing and is the family hub of all activities and communication. It cannot be underestimated how important it is for all the mental wellbeing of a disabled person to be able to get out and go somewhere (something we can all appreciate after this year and the Covid situation).</i></p> <p><i>We started to relocate in 2001 and it took us three years, a lot of money and a lot of effort to find a shop that catered for all our needs. With no exaggeration, this was a really tedious and difficult search and we paid much more than market value to secure these premises.</i></p>	<p>The supplementary information is noted. Our response is set out above.</p>	<p>No change.</p>

			<p><i>In 2010 we converted the upper (storage) part of the shop into a flat so that we could also house a vulnerable sister. Search the council tax register and you will see her name residing there since 2010.</i></p> <p><i>The future plan is that my son, who is a chiropractor, will inherit the shop and use it as a practice, be near the family and in a position to help his disabled brother (my other son). All of this can be achieved with the locality of the shop to the family.</i></p> <p><i>I hope this helps to address my concerns and genuine fear of any plans that may harm this shops future and all of my family that depend on it in in ways far more important than income or finances.</i></p>		
The Cherwell Group (DP9 obo)	3 3	Part Three	<p><i>Relates to Part 3, LNA SA 14</i></p> <p>We note that the Site Allocations Background Paper (2021) states that, “<i>The indicative capacities should not be read prescriptively. The actual development capacity of a site will ultimately need to be determined through the detailed design and planning approval process.</i>”</p> <p>We therefore request that wording is introduced into the beginning of the Site Allocations chapter to identify how these indicative capacities should be interpreted and noting that they are included for reference purposes only.</p>	Agree.	Part 3 of the Local Plan amended by referencing that site capacities are indicative only and should not be read.
QUOD (Landsec obo - Lewisham Shopping Centre)	4 -	DM 01 Infrastructure Delivery Plan	<p>14 Part Four – Delivery and Monitoring</p> <p>14.1 Landsec supports Policy DM1 ‘Working with stakeholders to deliver the Local Plan’ which sets out the Council ‘proactive and positive approach’ for working with landowners, community groups and the local community, and other key stakeholders. Landsec will work collaboratively with the Council.</p> <p>14.2 Landsec supports the need for appropriate infrastructure to support development in the Borough and create the types of places that people want to live in, work in and visit. The Draft Infrastructure Delivery Plan, part of the Council’s evidence base sets out the potential infrastructure requirements for the Borough by type of infrastructure. For certain types of infrastructure, it identifies specific locations (eg. a specific Town Centre) but it doesn’t take a spatial overview of requirements, for example in growth locations.</p> <p>14.3 As the Council has already demonstrated in its regeneration work in the Town Centre to date taking an overview of infrastructure and investing in high quality facilities, infrastructure and public realm is crucial to achieving transformative change. Landsec would wish to engage with the Council to take such an approach to its emerging proposals and also to look at how CIL and Section 106 obligations can be re-invested in the Town Centre and leverage in other funding.</p>	The IDP sets out the Infrastructure requirements thematically and this will then inform discussions through the development management process.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	4	DM 02	<p>14.4 Landsec notes the contents of Policy DM2, which effectively re-states the current policy and legal position on Planning Obligations and Section 106. Landsec also notes that the changes made to Planning Practice Guidance in 2019 suggest that in setting policy requirements for such obligations plan makers should undertake “a proportionate assessment of viability that takes into account all relevant policies, and local and national standards, including the cost</p>	The IDP sets out the Infrastructure requirements thematically and this will then inform discussions through the	No change.

			<p>implications of the Community Infrastructure Levy (CIL) and section 106.” And that policies should give a level of certainty about what obligations will be required and that they are affordable.</p> <p>14.5 As presently drafted Policy DM2 gives an open-ended list of items for which obligations might be sought. As noted above in Section 8 the Local Plan Viability Assessment (2019) produced as part of the evidence base does not include for abnormal costs for Lewisham Shopping Centre sites and that viability is challenging.</p> <p>14.6 In this context Policy DM2 should confirm that usually the value of obligations will not exceed whatever forms the basis of the assumptions in the Viability Study (S106: £20/sqm for non residential development and £1,500 per residential unit, S278: £15/sqm for commercial and £1,000 per residential unit). This also re-enforces the need for the site-specific amendment to policy set out at Paragraph 8.22 above.</p>	development management process.	
Freeths LLP (K/S Lewisham obo)	3 4	LCA SA 02 DM 03	<p>Short-Medium Term Flexibility</p> <p>As the emphasis of the allocation is on comprehensive mixed-use development, this indicates an unwillingness to engage or support any schemes that come forward in the allocation area on individual sites. This was reflected in a pre-application meeting held with Officers on the site in June 2019.</p> <p>We note the requirements and explanation given in draft Policy DM3 and how development proposals must be accompanied by a site masterplan where they form all or part of a site allocation. This includes how to address neighbouring properties and the surrounding areas.</p> <p>This is a potentially greater degree of flexibility than was explained in the June 2019 pre-application. There is however a risk that until such time as the majority landowner/promoter in a particular allocation has identified and made clear their objectives and own masterplan content that any other development plots and opportunities will simply not progress or be allowed to progress in the interests of not prejudice future development potential and the preference for a comprehensive approach. This is the risk in the Lewisham Town Centre site allocation where development decisions are largely reliant on one majority landowner party. The applicant held discussions with Land Securities in 2020 as encouraged by the Council but there is no detail as yet from them on the content and timescales of any future scheme after an options consultation undertaken in Autumn 2020.</p> <p>To provide greater flexibility and responsiveness, Policy DM3 and any development allocation which requires a comprehensive approach should also explain how smaller short medium term proposals can be supported. We note this is covered to an extent in DM3 paragraph C, but there should also be greater support for smaller sites/plots in coming forward where there is no indication or commitment on the part of surrounding landowners to progress development. This will then avoid a scenario where no development / investment can proceed which will undermine the growth and place making objectives of the Plan. We would welcome the opportunity to discuss with the Council in the context of Site 2 particularly.</p>	The Local Plan already includes a policy on Meanwhile Uses which states Proposals for the meanwhile (temporary) use will only be supported where the site or unit falls within the boundary of a site allocation that is not expected to come forward for comprehensive redevelopment in the short term and where it does not preclude the permanent use of the site for appropriate commercial or main town centre uses, or prohibit delivery of the site allocation.	No change.

QUOD (Landsec obo - Lewisham Shopping Centre)	4	DM 03	<p>14.7 For the reasons set out above Landsec strongly supports the need for a comprehensive approach to the development of strategic sites and commitment to such an approach to Lewisham Centre. Landsec notes that the NPPF (para 44) suggests that information requirements for applications should be kept to the minimum required to make decisions and that: <i>"Local planning authorities should only request supporting information that is relevant, necessary and material to the application in question"</i>.</p> <p>14.8 It may therefore be useful, to avoid the risk of duplication and for clarity if Draft Policy DM3 referred to the fact that the site masterplan and delivery strategy may be incorporated into other submission documents such as the Design and Access Statement and Development Specification, rather than a stand-alone document.</p> <p>14.9 In relation to DM3c Landsec again supports the need for development to have regard to surrounding properties and the wider area. However, any requirement to Masterplan sites that are not part of an application must be limited and proportionate, and it may be that in many cases the necessary information would not take the form of a 'Masterplan' but of illustrative materials showing how a development site might relate to neighbouring areas.</p> <p>14.10 We would therefore suggest the following revision to Policy DM3 c): <i>Proposals must address how the development site relates to neighbouring properties and the surrounding area, particularly in contributing to the delivery of the spatial strategy for the Borough. Where appropriate, and necessary applications will be required to be supported by a masterplan or other illustrative design materials covering multiple other sites in order to demonstrate the acceptability of the scheme both in term of its immediate and wider context. This is may be additional to the site masterplan required by (A) and (B) above.</i></p>	We feel the wording is robust.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	4	DM 05	14.11 As set out in Section 12 of these Representations, Landsec supports the Council's approach to monitoring and review, particularly with regards to community and social infrastructure in the context of changing demographics. Landsec therefore supports Policy DM5 'Monitoring and review'.	Support noted.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	5	Appendix 2	<p>Glossary</p> <p>11.24 The Reg 18 Plan should refer to the need to apply the London Plan definition of Metropolitan status flexibly to reflect the changing nature of town centres. The role and function of town centres might not necessarily relate to traditional numeric definitions of floorspace quantum, but rather one based on vitality and viability. The outcomes that are secured through investment in a town centre such as jobs, homes, businesses, health and wellbeing, safety, permeability, building beautiful, carbon reduction, accessibility, culture, happiness and urban greening might become the new ingredients for success and ambition. More floorspace is not necessarily better as the Mayor of London reports in his High Streets and Town Centres Adaptive Strategies.</p> <p>11.25 Landsec request that the definition of Metropolitan Town Centre on (page 827) be amended as follows: <i>The London Plan defines these as serving serve wide catchments which can extend over several boroughs and into parts of the Wider South East. Typically,</i></p>	Disagree with the proposed wording. The approach taken in the Local Plan is in conformity with the London Plan, that identifies Lewisham as a having the potential to become a Metropolitan Centre in the future.	Local Plan Glossary amended to reference London Plan definition

			<p><i>they contain at least 100,000 sqm of retail, leisure and service floorspace with a significant proportion of high order comparison goods relative to convenience goods. These centres generally have very good accessibility and significant employment, service and leisure functions. Many have important clusters of civic, public and historic buildings. Due to the structural shift in London's Town Centres, Lewisham Council consider that flexibility should be applied to the floorspace metric in the London Plan. In seeking to achieve Metropolitan Town Centre status, Lewisham Council will apply weight to structural improvements in town centre vitality and viability and outcomes secured through investment in the town centre for jobs, homes, businesses, health and wellbeing, safety, permeability, exemplar design, carbon reduction, sustainability culture, and the green and blue environment. Lewisham Council considers that these factors are new ingredients for success and ambition of a Metropolitan Town Centre.</i></p>		
Phoenix Community Housing Association (Maddox Planning obo)	- -	General Policies map	<p>LEWISHAM LOCAL PLAN REGULATION 18 REPRESENTATIONS LAND TO THE REAR OF ARCUS ROAD/CHINGLEY CLOSE</p> <p>Please find enclosed a representation to the Regulation 18 Lewisham Local Plan, submitted on behalf of our client, Phoenix Community Housing Association. This representation relates to the proposed extension to the site designation of Bromley Hill Cemetery as a Site of Local Importance (SINC) and to the historic Public Open Space designation adjacent.</p> <p>Our client requests that two changes are made to the Local Plan draft proposals map. The first that the boundary of Public Open Space at the north east of the designation be corrected to follow the correct boundary of the genuine Public Open Space within the confines of the cemetery. The second is that the proposed extension to the SINC designation is not taken forward into the next stage of the Local Plan.</p>	Following Regulation 18 Consultation an Open Space Review has been prepared which has reviewed the boundaries of designated open space to ensure they accurately capture the extent of the open space.	Local Plan amended to show Bromley Hill Cemetery as designated Strategic Open Space, with its boundary amended to exclude private gardens and communal amenity space of the Swiftsden Way properties.
Phoenix Community Housing Association (Maddox Planning obo)	- -	General Policies map	<p>BACKGROUND</p> <p>Our client, Phoenix Community Housing Association, is currently undergoing pre-application discussions with Officers at Lewisham Council regarding the redevelopment of land to rear of Arcus Road/ Chingley Close to provide new homes with integrated landscaping (PRE/21/120195). The latest pre-application response was issued to our client on 24 February 2021. In 2015, a land swap was carried out between Lewisham Council and Phoenix Housing, resulting in Phoenix Housing acquiring the land shown outlined in blue below. Historic maps indicate some of this land at the north west of the plot might have formerly been used as private allotments in the 1970s but this is not confirmed, and certainly not the case now. The land has been left to become overgrown and has not been in use as allotments for at least 23 years.</p> <p>1 https://councilmeetings.lewisham.gov.uk/ieDecisionDetails.aspx?Id=2270</p> <p><i>LB Lewisham officer note: Image 1: Phoenix Community Housing Association site ownership plan is included in the original representation. The map shows the extent of the site's ownership</i></p>	The supplementary information is noted.	No change.
Phoenix Community Housing Association	- -	General Policies map	I trust the above is clear and the suggested amendments to the designations will be fully considered, however please don't hesitate to get in touch should you wish to discuss any of the above.	Comments noted.	No change.

Phoenix Community Housing Association (Maddox Planning obo)	- 2 2 5	<p>Policies map</p> <p>GR 02</p> <p>Figures 10.1 and 10.2</p> <p>Schedule 07 Table 21.2</p>	<p>PUBLIC OPEN SPACE: ADOPTED POLICY CONTEXT AND EVIDENCE BASE</p> <p>The below map is an extract from the adopted Proposals Map. It shows the area in light green designated as Public Open Space' and the dotted area overlaying it as a 'Site of Importance for Nature Conservation'.</p> <p><i>LB Lewisham officer note: Image 2: Lewisham's adopted proposals Map is included in the original representation. The map shows the extent of the Public Open Space and the Site of Importance for Nature Conservation'.</i></p> <p>The pre-application submission includes some built development on the Public Open Space at the north east area of the designation, which is land within Phoenix's ownership. This overlap has been noted by the Council in recent discussions and the pre-application response as mentioned above states that 'Development on the area identified as public open space will only be supported where this area is de-designated. It was discussed at the meeting that the land may have been designated in error. Both the Applicant and Officers agreed to explore this further. De-designation should occur through the Draft Lewisham Local Plan. The Applicant should submit detailed representations to the Regulation 18 consultation, which includes the partial allocation of the application site.' It is not understood as to why the area of Public Open Space at the north east outside the cemetery land was designated in the first instance given that the area is not accessible to members of the public and makes up the private rear gardens of the residential block adjacent along Swiftsden Way. As Officers have alluded, it was likely designated in error.</p> <p>The Lewisham Leisure and Open Space Study 2013 confirms the Public Open Space designation was indeed made in error as the area of land to the north east outside the cemetery boundary was originally thought to be part of the cemetery. The classification map from the 2013 Study, shown below in Image 3, clearly shows that the boundary of the cemetery was originally drawn incorrectly by including the rear private gardens and communal amenity space of the Swiftsden Way properties. Comparing this with Google Maps in Image 4 it is clear where the true boundary of the cemetery lies.</p> <p><i>LB Lewisham officer note: Image 3: Lewisham Leisure and Open Space Study 2013 (Site 39) and Image 4: Google Maps extracts are included in the original representation. They show the discrepancy where the boundary lies.</i></p>	<p>Following Regulation 18 Consultation an Open Space Review has been prepared which has reviewed the boundaries of designated open space to ensure they accurately capture the extent of the open space.</p>	<p>Local plan amended to show Bromley Hill Cemetery as designated Strategic Open Space, with its boundary amended to exclude private gardens and communal amenity space of the Swiftsden Way properties.</p>

			<p>PROPOSED CHANGE TO THE ADOPTED PUBLIC OPEN SPACE DESIGNATION</p> <p>The above evidence demonstrates that the area to the north east of the cemetery was originally thought to be part of the cemetery and designated accordingly as Public Open Space. It is requested this error be corrected to reflect the true cemetery boundary. The area that was incorrectly designated is for the residents of the block along Swiftsden Way to enjoy privately and is currently not publicly accessible. There is no circumstance in which this land could or should become public or connected to the cemetery, therefore it should not be designated as such.</p>		
Phoenix Community Housing Association (Maddox Planning obo)	- 2 5	<p>Policies Map Section 08 Page 52</p> <p>GR 03 Figure 10.7</p> <p>Schedule 08 Table 21.3</p>	<p>SITE OF LOCAL IMPORTANCE: EMERGING POLICY CONTEXT</p> <p>As part of the Regulation 18 Lewisham Local Plan it has been proposed to extend the boundary of the Bromley Hill Cemetery SINC designation northwards as shown in green on the below Image 5. If progressed to the next stage of the Local Plan preparation, this would therefore result in most of the phase 1 development site being stringently protected and unlikely to be suitable for built development. In effect, this proposed designation could prevent the delivery of much needed affordable housing.</p> <p><i>LB Lewisham officer note: Image 5: Regulation 18 proposed extension of the Bromley Hill Cemetery SINC is included in the original representation. The map shows the proposed addition.</i></p> <p>The presumed reason for the proposed extension is that the Re-survey of Sites of Importance for Nature Conservation (SINCs) in Lewisham Report 2016, which is part of evidence base for this new Local Plan, identified Bromley Hill Cemetery as a site with a decline in acid grassland with a SINC Enhancement Opportunity that would ‘benefit from a management plan to identify areas most suited for management for wildlife, in particular areas of acid or dry grassland’. The land to the north was identified as ‘scrub’.</p> <p>The Lewisham Open Spaces Assessment 2020 has classified this land to the north as ‘natural and semi-natural urban green space’, which is a new classification since the 2013 Open Space Study where it wasn’t acknowledged at all, despite the site conditions not changing.</p> <p>PROPOSED CHANGE TO THE EMERGING SINC DESIGNATION</p> <p>It is considered this proposed extension to the SINC was made in error without all the correct site details available to the Council. The land is completely inaccessible either through the rear gardens of the houses, through the cemetery, or via the garages to the west, and so would not be able to be managed or maintained if designated. The land is also privately owned by our client, so the Council would have no ability to control the management or maintenance even if they could access the site.</p> <p>Our client is not disputing the need for a management plan for the cemetery given this land has been found to be in decline. They are however disputing the idea that in order to rectify this decline the SINC needs to be extended up into</p>	Agree that due to access and ownership constraints the SINC should not be extended	Local Plan to retain the current boundary of the SINC without extending it.

			<p>private land. The 2016 Re-survey lacks clear justification for extending into this particular area with regards to specifying the features of the land that make it appropriate for a SINC, having not been able to access the land or consult the land owner. It indicates a thorough assessment of the land was not carried out and the decision was made without a full understanding the site. NPPF paragraph 35 requires Local Plans to be prepared in accordance with legal and procedural requirements. A Plan is 'sound' if it is justified, whereby it is appropriate and takes into account the reasonable alternatives based on proportional evidence, and effective, whereby it is deliverable over the plan period and based on effective joint working on cross-strategic matters. In this case the proposal to extend the SINC is not considered to be justified or effective and so not considered a 'sound' amendment to the Local Plan.</p> <p>Furthermore, Lewisham's Open Spaces Assessment 2020 has assessed the proposed new area of SINC land as being of 'poor quality', scoring just 13%, with 'no access', see below Image 6. This area of scrubland cannot make any valuable or meaningful contribution to the established SINC given it is constrained on all sides, is privately owned, and has few redeeming environmental qualities. It is considered this poor quality small parcel of land would be much better used to deliver affordable housing for the Borough, a strategy which is fully supported by the Council. Notwithstanding this, the proposed redevelopment of the site does offer the opportunity for biodiversity enhancements to take place and an ongoing management plan to be secured alongside sensitively designed new housing. This will enable the council to meet its broad objective to enhance opportunities for nature in this locality.</p> <p><i>LB Lewisham officer note: Image 6: Lewisham's Open Space Assessment 2020 is included in the original representation. The map shows the site categorised as fair and poor.</i></p> <p>Retaining the boundary of the SINC as it currently is would have minimal harmful impacts on local nature conservation given that the condition of the proposed new area is poor quality scrubland that has been in the same poor condition for approximately 40 years with no viable means of improving or managing it. Retaining the boundary of the SINC would also enable the required management plan to be drawn up whilst delivering significant public benefits by allowing our client to bring forward much needed affordable housing for the Borough.</p>		
Big Yellow Storage Company Limited (DWD obo)	-	Policies map	<p>Proposed Changes to the Adopted Policies Map</p> <p>Paragraph 5.8 of the 'Proposed Changes to the Adopted Policies Map' states that the new Local Plan proposes to change the terminology of LEL, as used in the adopted Local Plan, to 'Locally Significant Industrial Site' (LSIS), for consistency with the terminology used in the London Plan.</p> <p>Paragraphs 5.9-5.11 confirm the designation of an additional LSIS, alterations to the boundary of some of the existing LELs, and the LEL boundaries which will remain in their existing state (as the newly named LSIS).</p> <p>The existing Lewisham Way LEL is not referenced as an LSIS in the draft consultation document, nor is it referred to in the proposed changes to the policies map as being de-designated. Conversely, Figure 8.1 shows a map of the employment land hierarchy and illustrates the Site as forming part of an LSIS.</p>	Agree that there are inconsistencies in the designation of this site as an LSIS throughout the Local Plan and policies map.	Local Plan and Proposed Changes to Adopted Policies Map amended to list Lewisham Way as a designated LSIS.

			We request that clarity is provided as to whether the intention is for the Lewisham Way LEL to be retained in the LSIS or not in the new Local Plan.		
Blackheath Car Park (M&A) Ltd (Acorn obo)	- -	General Call for site	<p>You might recall you kindly sent me an application form in response for your call for sites which needs to be submitted before 11th April.</p> <p>I would like to propose to sites in a similar location as follows :</p> <ol style="list-style-type: none"> 1) Blackheath Station Car Park Hurren Close London SE3 9LE 2) Airspace Above Network Rail Tracks & Blackheath Station Car Park Hurren Close London SE3 9LE <p>It would be really helpful to know what is the broad programme and timescales for these sites to be considered. I would imagine they would be considered internally by the Council first at a cabinet meeting.</p> <p>Hopefully this is all the information you need for now but please do not hesitate to contact me should you require any clarification or additional information. Please let me know that you have received this email.</p> <p>Please could you keep me updated on the Local Plan.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Blackheath Car Park (M&A) Ltd (Acorn obo)	-	Call for Site	<p><i>LB Lewisham officer note: a Call for sites submission form and map showing the site boundary are included in the original representation.</i></p> <p>Site name and address: Blackheath Station Car Park Hurren Close London SE3 9LE</p> <p>Proposed use(s): Retention of Car Park & Market - Numerous Options within Class E including Retail Offices Medical Services etc. Class C & Class F.</p>	The call for site submission for Blackheath Station Car Park is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change.
Blackheath Car Park (M&A) Ltd (Acorn obo)	-	Call for site	<p><i>LB Lewisham officer note: a Call for sites submission form and map showing the site boundary are included in the original representation.</i></p> <p>Site name and address: Airspace above Network Rail Tracks and Blackheath Station Car Park Hurren Close London SE3 9LE</p> <p>Proposed use(s): Significant Opportunities to create a new Village Hub to potentially include significant Public Realm ,Improved Porosity across Rail Tracks ,Affordable Housing, Art House Cinema/Meeting Hall , Share Ownership Commercial Space, Small Food Store ,Permanent Covered Market ,Creche /Nursery, Car Charging Hub, significant Enhanced Green Corridor , plus - Numerous Options within Class E including Retail Offices Medical Services etc. Class C & Class F.</p>	The call for site submission for Airspace above Network Rail Tracks and Blackheath Station Car Park is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change.
W&R Buxton Holdings Ltd (BPTW obo)	-	General Call for site	<p>Site Context / Background</p> <p>The Site is 0.097ha in area. It is located entirely within the administrative boundary of the London Borough of Lewisham (LB Lewisham). The Site's current Use Class is Sui Generis. Scott House comprises 19no. live / work units, consented in 2001. The existing building is a 3-storey late Victorian building which currently provides 408sqm of B1 'work' space according to approved plans. The Applicant, W&R Buxton Holdings Ltd., is the landowner and landlord of the existing building on the Site.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

			<p><i>LB Lewisham officer note: Figure 1: Site location is included in the original representation. The aerial photograph shows the boundary of the site adjacent to the north eastern corner of the Timber Yard site (LNA SA 02).</i></p> <p>Core Strategy 2011 – Strategic Site Allocation 4 Oxstalls Road</p> <p>The Site is located within the Lewisham, Catford and New Cross Opportunity Area (London Plan 2016) and is approximately 500m from Deptford District Town Centre. The Site is currently allocated for mixed-use redevelopment within Lewisham’s Core Strategy (2011), within Strategic Site Allocation 4 – Oxestalls Road (SSA4) Mixed Employment Location (MEL). The subject Site occupies the north eastern corner of the wider Strategic Site Allocation, which is approx. 4.6 ha in area and spans the entire urban block bounded by Oxestalls Road, Grove Street, Evelyn Street and Dragoon Road.</p> <p><i>LB Lewisham officer note: Figure 2 Strategic Site Allocation 4 is included in the original representation. The map shows an extract from the Core Strategy 2011 showing the site’s boundary.</i></p> <p>The remainder of SSA4 is occupied by the Lendlease Timberyard Masterplan scheme with Hybrid planning permission (DC/15/092295) and Reserved Matters Planning Approval for certain phases with part of the site already under construction. Scott House did not form part of the Timberyard planning application.</p> <p>Draft Local Plan 2021</p> <p>The Timberyard Masterplan is now included in the Draft Local Plan 2021 as Timber Yard, Deptford Wharves at Oxstalls Road mixed Use Employment location. The allocation is for mixed use redevelopment with an indicative development capacity of 1,600 residential units and 5413 sqm of employment floorspace and 5,000 sqm of main town centre floorspace. The allocation does not include Scott House.</p>		
W&R Buxton Holdings Ltd (BPTW obo)	-	General Call for site	<p>Planning Application ref: DC/19/113332</p> <p>A planning application for the redevelopment of Scott House was submitted to LB Lewisham in July 2019. The application sought full planning permission for the following description of development: Redevelopment of Scott House including partial façade retention and construction of a new mixed-use building to provide 137 no. residential dwellings, together with the provision of B1 employment space and A3 café space, with associated landscaping, play space, refuse storage, cycle parking and additional public realm.</p> <p>Following extensive consultation with LB Lewisham officers and the local community the planning application proposed the following:</p> <ul style="list-style-type: none"> • Part-retention of Scott House façade; • 137no. residential flats (1-, 2-, and 3-bedroom at social rent, London Living Rent and market tenures); • 100% dual-aspect dwellings; 	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

			<ul style="list-style-type: none"> • 824sqm of employment floorspace at mezzanine and first floor (Use Class B1) providing 64-103 full time jobs under B1(a) use, 14-21 full time jobs under B1(b) use, and c.18 no. full time jobs under B1(c) use. • 120sqm of café space at ground floor (Use Class A3) providing employment for 6-8 FTEs; • 14no. wheelchair accessible / adaptable dwellings; • Cycle parking provision in line with draft London Plan (2017) requirement; • Improved communal and public amenity spaces; • Completion of the 'final piece' of the Timberyard Masterplan / SSA4 Allocation through a well-integrated scheme which responds to the emerging context; • Opportunity for public realm improvements; • Play space and amenity provision at ground floor level. <p><i>LB Lewisham officer note: Appendix 1 Committee Report (LPA ref: DC/19/113332) is included in the original representation.</i></p> <p>Planning officers recommended the application for approval. The application was presented to LB Lewisham strategic planning committee 30th January 2020 where members resolved to grant planning permission subject to completion of a satisfactory 106 agreement and no direction being received from the Mayor of London. The Mayor has confirmed in writing that he is content to allow the local planning authority to determine the case itself and the s106 agreement is in the process of being completed and signed.</p>		
W&R Buxton Holdings Ltd (BPTW obo)	-	Call for site	<p>Scott House, 185 Grove Street, SE8</p> <p>In response to The Lewisham Local Plan Consultation, we wish to promote Scott House, 185 Grove Street, SE8 on behalf of W&R Buxton Holdings Ltd to be included in the Local Plan as a mixed-use location to include B1 employment space and residential use.</p> <p>Summary and Conclusions</p> <p>Scott House has a resolution to grant planning permission and will shortly be granted full planning permission by LB Lewisham to provide 137 residential units, 824sqm of employment floorspace and 120 sqm café space. For this reason, we consider that the site should be included in the LB Lewisham Local Plan as an allocated site for mixed use redevelopment to include residential use and employment use in accordance with the development capacity agreed within planning application DC/19/113332.</p>	The call for site submission for Scott House is noted. Agree that there is merit in including the consented Scott House site within the Deptford Landings site allocation.	Deptford Landings site allocation amended to include Scott House.
The Arch Company Properties LP (Turley obo)	-	Call for Site	<p><i>LB Lewisham officer note: a Call for sites submission form and site plan showing the site boundary are included in the original representation.</i></p> <p>Site name and address: Land at Station Approach, Burnt Ash Hill, Lee, London, SE12 0AB.</p> <p>Proposed use(s): Residential-led redevelopment of site (exceeding the minimum threshold of 10 residential units).</p>	The call for site submission for land at Station Approach, Burnt Ash Hill is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change.

(Peter Pendleton & Associates Ltd obo)	-	Call for site	<p>I refer to the call for sites - We were supposed to submit this for consideration.</p> <p>Although this call has closed, i was wondering if this site could be added for consideration in the future.</p> <p>Please add our details on consultee lists on behalf of the land owner.</p> <p><i>LB Lewisham officer note: a site plan of Courtrai Road is included in the original representation. It shows a tree survey on the Courtrai Road site.</i></p>	<p>The call for sites submission for the Old Scout Hut and surrounding land at Courtrai Road is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.</p>	No change.
AA Homes and Housing (Wsp obo)	-	Call for site	<p>On behalf of the landowner, AA Homes and Housing, we wish to put forward the enclosed site at Courtrai Rod, Lewisham as a proposed housing site in response to Lewisham Council's 'Call for Sites' consultation as part of the wider Local Plan process.</p> <p>The site provides a good location for new housing which can be developed over the next 5 years, delivering not only benefits in terms of providing key housing for the community but also management and maintenance of a historically disused site.</p> <p>The site The site is located on Courtrai Road, Lewisham and is approximately 1.1ha in size. It is bound by a railway line to the west serving major train stations in central London, and the rear gardens of properties to the east which align Buckthorne Road. The surrounding area is predominantly low rise and residential in nature. The site is accessed from Courtrai Road to the south. At this end is a declining prefabricated building previously used as a church but has remained vacant for some time. The remaining part of the land is covered by trees and foliage which have been identified as having low to moderate ecological value. The building on site is not listed and the site is not within a conservation area. It has a PTAL rating of 3 and is approximately 400m from Honor Oak Park station indicating its sustainable nature.</p> <p>Development potential The NPPF is clear in section 2 that the purpose of the planning system is to achieve sustainable development and that the planning system has three overriding objectives (economic, social and environmental). The economic objective includes helping to build a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right place at the right time to support growth and innovation.</p> <p>The social objective includes supporting communities by fostering a well-designed and safe built environment with accessible services and open spaces that support communities' health, social and cultural well-being. The environmental objective includes making effective use of land, helping to improve biodiversity and moving to a low carbon economy. All of which this site can deliver.</p> <p>The site is situated in a suitable and sustainable location within the built settlement. Given its links with the existing adjacent built area, including access to key local services and facilities, the site lends itself to residential development.</p>	<p>Comments supplementary to the call for sites submission are noted. Our response is set out below.</p>	No change.

			<p>The development of the site would see a underused and unmanaged site deliver both a high quality development and allow for part of the site to become managed green space to link to the aspirations of both the Local Plan and emerging Crofton Park And Honor Oak Neighbourhood Plan in terms of conservation. The delivery of housing on this site would therefore assist in providing much needed housing to meet local needs and in particular will provide an appropriate contribution to the level of housing required in Lewisham. Importantly, redevelopment of the brownfield site could facilitate new public access to the remainder of the site, in conjunction with dedicated improvements to the biodiversity of the rest of the site.</p> <p>We set out below a brief justification to demonstrate how the site meets the required criteria of being suitable, available and achievable.</p> <p>Availability The site is in single ownership with no legal or ownership impediments to development and is available for development now. The site does not lie within an area of flood risk and is therefore, in principle, suitable for development. There are no known physical or legal constraints which would preclude development from coming forward at this stage.</p> <p>Achievability The NPPG advises that a site is considered achievable for development where there is a reasonable and realistic prospect that the particular type of development will be developed on the site at a particular point in time. Taking into account its context and characteristics, we are is satisfied that the site offers a realistic and viable prospect for development in line with the tests of NPPF.</p> <p>Deliverable The site is suitable, available and the proposed development is achievable and therefore the site is considered to be deliverable within 5 years.</p>		
AA Homes and Housing (Wsp obo)	- 2 2	Call for site HO 01 HO 02	<p>Summary The emerging Local Plan sets out a 10-year strategic housing target of 16,670 net housing completions (or 1,667 net completions per year). The site will make a modest but helpful contribution towards this target as well as contribution to policy HO2 Optimising the use of small housing sites which is based around the NPPF (2019) placing a strong emphasis on the role of small sites in supporting housing delivery.</p> <p>Given its sustainable location and connection to the existing residential and urban area, the site lends itself to residential development, providing a logical and sustainable infill development to the existing urban area of Lewisham. The site is single ownership and controlled by AA Homes and Housing, representing an available site in line with the tests of NPPF. There are no significant constraints which could not be overcome, and the site offers a realistic and viable opportunity for development.</p>	Comments supplementary to the call for sites submission are noted. Our response is set out below.	No change.
AA Homes and Housing (Wsp obo)	-	Call for site	In light of the above, we can confirm that the site is suitable, available and achievable for residential development. We would therefore respectfully request that this site is retained as a future development opportunity and considered under the call for sites exercise.	Comments supplementary to the call for sites submission are noted. Our response is set out below.	No change.
AA Homes and Housing (Wsp obo)	-	Call for site	<i>LB Lewisham officer note: a Call for sites submission form and site plan showing the site boundary are included in the original representation.</i>	The call for sites submission for the Old Scout Hut and surrounding	No change

			<p>Site name and address: Old Scout Hut and land surrounding at Courtrai Road</p> <p>Proposed use(s): Residential dwelling houses – use class C3</p>	land at Courtrai Road is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	
L&Q Group	- -	General Call for site	<p>LEWISHAM LOCAL PLAN – REGULATIONS 18 STAGE “MAIN ISSUES AND PREFERRED APPROACHES” DOCUMENT (JANUARY 2021) AND CALL FOR SITES</p> <p>Thank you for the opportunity to provide formal representations to the Council’s Lewisham Local Plan Regulation 18 stage “Main Issues and Preferred Approaches” document (January 2021).</p> <p>1. About L&Q L&Q is a regulated charitable housing association and one of the UK’s most successful independent social businesses. The L&Q Group houses around 250,000 people in more than 105,000 homes, primarily across London and the South East. As a not-for-profit organisation, L&Q reinvest all the money we make into new and existing homes, creating successful communities and providing excellent services. L&Q have also created a Strategic Partnership Team who work closely with smaller housing association partners and help them deliver new homes on typically smaller sites.</p> <p>2. L&Q in Lewisham L&Q is a major provider of homes in Lewisham, currently managing over 7,500 homes across the Borough. We see great potential in Lewisham and currently have new homes under construction at the Excalibur Estate and Timberyard.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
L&Q Group	- -	General Call for site	<p>6. Future Participation In summary, we are supportive of LB Lewisham updating its Local Plan to guide development between 2020 - 2040. These amendments to the Draft Local Plan will ensure that the document is more closely aligned with wider London Plan and will assist in the delivery of a wide range of material planning and community benefits across the borough.</p> <p>We look forward to confirmation of receipt of these representations and request the right to be heard by the appointed examiner at the Examination in Public if we choose to participate further.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
L&Q Group	-	Call for site	<p>5. Lewisham Local Plan - Call for Sites Alongside these representations on the draft Local Plan, we have also enclosed the requisite forms and associated OS maps for L&Q sites at One King’s Hall Mews, SE13 5JQ and Grace Close, SE9 for consideration as part of the Call for Sites exercise by LBL.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
L&Q Group	-	Call for site	<p><i>LB Lewisham officer note: a Call for sites submission form and map showing the site boundary are included in the original representation.</i></p> <p>Site name and address: One Kings Hall Mews, Lewisham, SE13 5JQ</p> <p>Proposed use(s): Residential dwellings</p>	The call for sites submission for One Kings Hall Mews is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change

L&Q Group	-	Call for site	<p><i>LB Lewisham officer note: a Call for sites submission form and map showing the site boundary are included in the original representation.</i></p> <p>Site name and address: Vacant land at Grace Close, SE9 (also identified as SA1 Lions Close in Grove Park Neighbourhood Plan).</p> <p>Proposed use(s): Residential dwellings</p>	<p>The call for sites submission for vacant land at Grace Court is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.</p>	No change.
Yorkshire & Clydesdale Bank Trustees Ltd c/o CBRE Global Investors (Montagu-Evans obo)	-	General Call for site	<p>LEWISHAM LOCAL PLAN – REGULATION 18 MAIN ISSUES AND PREFERRED APPROACHES CONSULTATION JANUARY 2021</p> <p>HUNTSMAN HOUSE AND 10-16 EVELYN STREET</p> <p>We write on behalf of our client, Yorkshire & Clydesdale Bank Trustees Ltd c/o CBRE Global Investors, to make representations in respect of the London Borough of Lewisham (LBL) Local Plan Regulation 18 Local Plan consultation. Our client owns Huntsman House and 10-16 Evelyn Street, Deptford (the Site). The representations are set out against the headings presented within the Draft Local Plan Regulation 18 consultation version dated January 2021.</p> <p>Background</p> <p>The Site is located on Evelyn Street, Deptford, within the administrative authority of LBL. It occupies an area of approximately 1.2 hectares and is currently occupied by a collection of buildings with areas of hardstanding (refer to Figure 1 below).</p> <p><i>LB Lewisham officer note: Figure 1: Aerial Image of the Site is included in the original representation. It shows the site boundaries in red.</i></p> <p>The Site can be broken down into two parts. Huntsman House comprises an L-shaped detached building that is situated along the western and southern part of the Site. Huntsman House comprises a self-contained warehouse with a two storey brick built ancillary office unit that is set back from Evelyn Street. It is occupied by Constantine. The remainder of the Site comprises a storage and distribution warehouse occupied by Wolseley. Both units have dedicated access points from Evelyn Street.</p> <p>The Site is designated as a Local Employment Location (LEL) by Policy CS3 and Policy DM10 of the Local Plan. The Site does not fall within a Conservation Area and is located in Flood Zone 1 (low risk of flooding). There are no listed buildings in close proximity. The southern corner of the Site is located within a Protected Vista: Wider Setting Consultation Area for the protected view from Blackheath Point to St Paul’s Cathedral.</p> <p>The Site is in a location undergoing significant regeneration, which includes several strategic scale developments in close proximity. Most notably this includes Deptford Wharves circa 280 metres to the south east, as well as Convoys Wharf which is circa 630 metres to the south east. Both schemes are under construction and will provide approximately 5,100 homes, as well as employment and town centre uses including retail. This includes tall buildings of up to 40 storeys.</p>	<p>Comments supplementary to the call for site submission are noted. Our response is set out below.</p>	No change.

Yorkshire & Clydesdale Bank Trustees Ltd c/o CBRE Global Investors (Montagu-Evans obo)	-	General Call for site	<p>Our client is now working proactively on proposals to transform the Site into a mixed use development. This work is at the early stages of scheme development and includes establishing a Planning Performance Agreement with the Council in advance of a planning application coming forward. At this stage, initial feasibility work completed identifies a capacity of approximately 250 homes with retained employment use. Detailed technical and environmental assessments will be undertaken in due course to ensure that sufficient evidence is provided to underpin the allocation of the Site in the emerging Plan. This will be fundamental in ensuring the allocation is sound and based on proportionate evidence as sought by the NPPF.</p> <p>The comments in these representations relate specifically to our client's Site and are set out against the relevant policies presented in the Plan.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Yorkshire & Clydesdale Bank Trustees Ltd c/o CBRE Global Investors (Montagu-Evans obo)	-	General Call for site	<p>Our client looks forward to continuing to engage positively with the Council in the preparation of the Local Plan. We request that we are kept informed of any updates going forward. We would also like to have the right to participate at any oral examination if necessary.</p> <p>If you have any queries regarding this submission, or would like to discuss the proposals further, please contact us.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Yorkshire & Clydesdale Bank Trustees Ltd c/o CBRE Global Investors (Montagu-Evans obo)	-	Call for site	<p>Closing</p> <p>Our client welcomes and supports the Council's ambitious strategy set out in its Regulation 18 consultation. In light of the substantial development challenges the Council faces, the acknowledgement that intensification of existing industrial sites will be required is supported. However, we would request that the Council reconsiders its approach to co-location on LSIS land. Specifically we would request that our client's Site is included as an appropriate site for co-location of employment and residential uses.</p> <p>Initial feasibility work indicates that the Site could achieve at least 250 units whilst ensuring no net loss of industrial capacity. Evelyn Street represents a realistic prospect for the delivery of a significant quantum of development that could make a meaningful contribution to the Council's significant housing targets whilst ensuring continued employment use on the Site. This could be achieved early in the Plan period. The development of a masterplan and further environmental assessment will be provided to the Council as the Local Plan develops, to demonstrate that a mixed-use development could be delivered and to underpin a site allocation in the Plan.</p>	The call for site submission for Evelyn Street is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change.
Albacore Meeting Room Trust (Lichfields obo)	-	General Call for site	<p>Lewisham Local Plan Regulation 18 Stage 'Main Issues and Preferred Approaches', January 2021 Consultation</p> <p>Introduction</p> <p>On behalf of the Albacore Meeting Room Trust ('the Trust'), please find enclosed representations to the above consultation, which has been published for comment until the 11th April 2020.</p> <p>Lichfields act as planning consultant for the Trust which owns the Brethren Meeting Hall site (also known as the Albacore Religious Meeting Rooms), off Beckenham Hill Road (see Figure 2.1, Appendix 1).</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

			<p>The 1.47 ha site is broadly rectangular and extends between Beckenham Hill Road (A2015, south) and Sedgehill Road (north). The site comprises a detached, single storey brick building that is centrally located within the site and surrounded by an expanse of asphalt car parking. It is predominantly 'brownfield land', fenced and entirely private. The building has been a place of worship for some 30 years but the building and the site are currently vacant.</p> <p>The site is subject to a live planning application as of November 2020 (DC/20/119014), by applicants Citygate Church, for demolition of the existing single storey religious building at the site and erection of a part two/part three storey building comprising a new church space, together with outdoor amenity space and car parking. It is anticipated that the application will be determined in late Spring 2021.</p>		
Albacore Meeting Room Trust (Lichfields obo)	-	General Call for site	<p>Concluding Remarks</p> <p>We trust that these representations are clear and that they will assist the Council with preparation of its draft Plan. The Trust would welcome the opportunity to discuss the contents of these representations with Council Officers, with the view to removing the site from the MOL and allocating it for flexible community use development in order to meet demonstrable local needs and align with LBL's aspirations for regeneration of the South Area of the Borough.</p> <p>Please can you confirm due receipt of these representations and keep us informed of the ongoing progress with the Local Plan Review. Please do not hesitate to contact us.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Albacore Meeting Room Trust (Lichfields obo)	-	Call for site	<p><i>LB Lewisham officer note: Annex 1: Brethren Meeting Hall Site, Beckenham Hill – Lichfields Metropolitan Open Land Review is included in the original representation. It provides an assessment of the contribution the site makes to MOL and the scope for the full release of the land, supported by Appendices 1-5.</i></p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Albacore Meeting Room Trust (Lichfields obo)	-	Call for site	<p>Exceptional Circumstances Conclusion and Proposed Allocation</p> <p>In conclusion, the exceptional circumstances to justify the release of the Brethren Hall site from the MOL are:</p> <ol style="list-style-type: none"> 1. The site makes a very limited contribution to the purpose of including land within the MOL, as it comprises land which is developed and urban in nature, is private and entirely fenced off and does not include any features of national or metropolitan value; and 2. Its release for replacement and enhancement community use(s) development would: <ul style="list-style-type: none"> i Help meet the identified need for community facilities in the Borough where there are limited alternative options; ii Do so on an established and sustainable location for a higher quality community facility, utilising the site's location adjacent to Sedgehill School to provide further benefits; and iii Enable the greater optimisation of an underutilised, private brownfield site and an opportunity to provide an area of enhanced landscaping. <p>The proposed allocation plan (Appendix 5 of attached Appendix 1), demonstrates how release of the Brethren Meeting Hall site could work to the benefit of the wider MOL swathe. In particular there is an opportunity for an allocation for Community Use, to enhance the existing site's (absent) contribution to the designated South East London Green Chain by replacing the existing (gated) built</p>	The call for site submission for the Brethren Meeting Hall site is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change.

			development and parking with better quality development, and enhanced landscaping. If this were to be publicly accessible; not private, as at present it could improve the permeability east to west and north to south. Accordingly, it is requested that the site should be removed from the MOL and allocated for redevelopment to provide a new 'flexible' community use development, for example, to provide a place of worship / religious use or other community uses such as, health clinics, schools, community centres and public leisure centres (consistent with draft LBL Plan para 9.1 /Glossary 'community facilities').		
Notting Hill Genesis (Savills obo)	- -	General Call for site	<p>LEWISHAM LOCAL PLAN REGULATION 18 STAGE MAIN ISSUES AND PREFERRED APPROACHES DOCUMENT FORMAL CONSULTATION REPRESENTATIONS SUBMITTED ON BEHALF OF NOTTING HILL GENESIS</p> <p>We are instructed by Notting Hill Genesis (NHG) to submit representations in response to the Lewisham Local Plan Regulation 18 'Main Issues and Preferred Approaches Document' January 2021 ("the draft Local Plan") in the context of their land ownership at 1-25 Malham Road Industrial Estate ("the site"), located within the London Borough of Lewisham (LBL).</p> <p><i>Notting Hill Genesis</i> NHG are a non-profit housing developer, member of the G15 group of major London housing associations and a registered provider of social housing. NHG own and manage more than 65,000 homes in London and the southeast. NHG work in the community, providing homes for around 170,000 people along with social programmes, economic regeneration initiatives and the services and support residents' needs. 627 of these homes are in Lewisham, which are a mixture of Care and Support, General Needs, intermediate tenures and Temporary Housing, NHG are keen to extend their reach within Lewisham and help the Council deliver their strategic goals and housing targets.</p> <p>NHG's primary purpose is to provide homes for lower-income households in and around London. NHG have a record of strategic regeneration across London to deliver high quality market and affordable housing. NHG excel in creating high quality new homes and provide a wide range of housing solutions, working closely with residents and partners to meet local needs.</p> <p><i>Site and Planning Policy Context</i> The site is circa. 0.57 hectares and is bound by Beadnell Road to the west, Dalmain Road to the north, industrial units to the east and Malham Road to the south. The site comprises of five, single storey industrial buildings accessed via a private entrance off Malham Road and accommodates 23 commercial units currently used for light industrial and storage (Use Classes B2 and B8) and office uses (Use Class E, formerly B1). The site forms part of the wider Malham Road Industrial Estate, which is circa 3.63 hectares and accommodates a mix of uses including a place of worship, hot food takeaways and residential uses.</p> <p>The wider area on Beadnell Road and Dalmain Road comprise of predominantly residential uses within two and three storey Victorian terraces. The site is situated in close proximity to Forest Hill District Town Centre, which lies approximately 800m (9 minute walk) south of the site and contains numerous shops, services and community facilities.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

			<p>The site has a Public Transport Accessibility Level (PTAL) rating of 2, indicating moderate accessibility to public transport out of a maximum score of 6b. The site is located approximately 800 metres (9 minute walk) from Forest Hill Station, providing access to Southern and London Overground services. There are also a number of bus stops located on A205 Stanstead Road, providing access to Lewisham Shopping Centre and Plumstead. The site is subject to the following adopted (current) planning policy designations:</p> <ul style="list-style-type: none"> • Forms part of site allocation ref.SA50 Malham Road Local Employment Location; • PTAL 2; • Flood Zone 1; and • The building is not locally or statutorily listed, nor are there any locally or statutorily listed buildings located in the immediate surrounding area. The site is not located within a Conservation Area. 		
Notting Hill Genesis (Savills obo)	-	Call for site	<p><i>LB Lewisham officer note: Appendix A Plan of the Site is included in the original representation. It shows the site boundary outlined in red.</i></p> <p>The site has significant redevelopment potential and we consider it could deliver a mixed use redevelopment comprising new residential uses, including affordable housing and continued use and re-provision of high quality employment floorspace. A 'Call for Sites' form and plan have been completed submitted separately.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Notting Hill Genesis (Savills obo)	-	Call for site	<p>The draft Local Plan should allow a mixed use redevelopment at this site (and potentially the wider Malham Road Industrial Estate) to include the delivery of employment and residential uses. This would incentivise a range of future redevelopment options and would provide a robust approach to withstand current and future challenges. Risks has been exacerbated due to the ongoing period of uncertainty as a result of the potential impacts of Brexit and the COVID-19 pandemic. Given the overall dated status of Malham Road Industrial Estate, a mixed use redevelopment would provide more certainty to support the long-term viability of the site as a successful and sustainable employment location, as well as providing the opportunity to deliver other public benefits e.g. affordable housing.</p> <p><i>LB Lewisham officer note: Appendix A Plan of the Site is included in the original representation. It shows the site boundary outlined in red.</i></p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Notting Hill Genesis (Savills obo)	-	General	<p>Public Examination</p> <p>On behalf of our client we consider it is necessary to participate in the Examination in Public (EiP) in due course, including attending the oral part of the EiP. We would be grateful if you could keep us updated.</p> <p>Conclusion and recommendations:</p> <p>Whilst NHG are generally supportive of the 'spirit' of the draft Local Plan which seeks to improve employment provision and provide new homes and new affordable homes, there are a number policies which require further consideration and updating as elaborated in this letter.</p> <p>The policies mentioned above – primarily the Council's approach to Locally Significant Industrial Sites and the Co-location of residential uses – in their current form the drafting would constrain potential redevelopment options at the site (and potentially to the wider Malham Road Industrial Estate). The draft</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
	-	Call for site			

			<p>Local Plan as currently drafted is not effective in its delivery, would not be consistent with national policy and would not be consistent with the London Plan. The draft Local Plan as currently drafted is therefore not sound. However, with further amendments (as noted above), we consider there is the potential that the draft Local Plan could be sound. It is considered that the suggested amendments will allow development to be optimised in the borough and for housing to be delivered ambitiously to meet housing need.</p> <p>To reiterate, the site has significant redevelopment potential and we believe it could provide a mixed use redevelopment comprising new residential uses, including affordable housing and continued use and re-provision of high quality employment floorspace. NHG are committed to working with the Council to help deliver their strategic goals, the regeneration of sites in the borough and benefits to local communities.</p> <p>We would be delighted to also meet with officers and other relevant parties to further discuss the site's opportunities. Please do not hesitate to contact us to arrange a meeting, and/or if you have any further queries. In the meantime we would be grateful if you could keep us updated on the progress of the draft Local Plan.</p>		
Notting Hill Genesis (Savills obo)	-	Call for site	<p><i>LB Lewisham officer note: a Call for sites submission form and map showing the site boundary are included in the original representation.</i></p> <p>Site name and address: 1-25 Malham Road Industrial estate, Lewisham SE23 1AH</p> <p>Proposed use(s): Mixed use redevelopment including industrial uses (Use Class E (formerly B1, B2, B8) and residential uses (Use Class C3).</p>	The call for site submission for 1-25 Malham Road Industrial Estate is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change.
Stoken Properties Ltd (Boyer obo)	-	General Call for site	<p>Re: Lewisham Call for Sites Application – 491-499 and 501-505 Southend Lane, SE26 5BL</p> <p>We write on behalf of our client, Stoken Properties Ltd, in response to the Council's Call for Sites exercise as part of the new Local Plan consultation and to support the Council in delivering their spatial strategy.</p> <p>We set out below a brief description of the existing site and its surroundings, the site's planning history and its future development potential. This Call for Sites submission is supported by the following documents:</p> <ul style="list-style-type: none"> • Site Location Plan; and • Feasibility Study (prepared by Falconer Chester Hall Architects). <p>This Call for Sites submission should be read in conjunction with the representations made in relation to Lewisham's Regulation 18 "Main Issues and Preferred Local Plan Document in respect of Policy EC5 (Locally Significant Industrial Sites) and Section 17 of the Plan – Lewisham's South Area.</p> <p>Site and Surroundings Stanton Square comprises an island of land in the Bell Green and Lower Sydenham area of Lewisham, sandwiched between Stanton Way to the south and Southend Lane to the north. Our client's site ("site") comprises a triangular</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

		<p>parcel of land of approximately 0.31ha at the northern part of the wider Stanton Square site, fronting onto Southend Lane (please refer to Site Location Plan).</p> <p>Currently the site comprises single storey, dated buildings that were historically in warehouse and industrial use (Use Class B8). The existing buildings are of no architectural merit and are in a dilapidated state, and would need to be brought up to modern standards. The topography of the site slopes upwards from west to east.</p> <p>The site enjoys its own access, separate from other developments within Stanton Square, and is accessed via three dropped kerbs fronting Southend Lane (A2218). Whilst the site has a current PTAL score of 3 it is considered to be in an accessible location due to the close proximity of a number of bus stops and the fact that Lower Sydenham Station is within easy walking distance, approximately 520m to the south east of the site. It is also worth taking into consideration that should the Bakerloo Line Extension be successful, the site will become even more accessible.</p> <p>Abutting the site to the south is the access self storage development which stands at approximately 4.5 storeys tall. Access to the access self storage site is via its own dedicated access fronting Stanton Way to the south.</p> <p>To the south east of the site is the Coventry Scaffolding site, which comprises a 2 storey office building which borders the site to east and behind this, a large yard used for the parking of vehicles and storage of scaffolding materials.</p> <p>On the western side of Stanton Square is The Bell public House, a 2 storey building in retail use by Architectural Salvage and to the west of that building, a modern 3 storey building in residential use.</p> <p>To the north of the site, on the opposite side of Southend Lane is a stepped circular residential development of up to 8 storeys. Also to the north is the large Sainsbury's Savacentre supermarket and associated car park. Haseltine primary school is located to the south of Stanton Square, on the opposite side of Stanton Way.</p> <p>The surrounding area is characterised by a mix of commercial and residential uses.</p> <p>The site is currently designated as a Local Employment Location (LEL) and the majority of the site falls within an Area of Archaeological Priority.</p> <p>The site falls within Flood Zone 1 meaning it has a low probability of flooding.</p> <p>Planning History An online search has been undertaken of the Council's planning application database and returned the following results for the site:</p> <p><u>491-505 Southend Lane</u></p>		
--	--	--	--	--

			<p>An application (Ref: DC/20/116853) for the change of use from B8 (warehouse storage) to a flexible use class between B8 (warehouse storage) and D1 (place of worship) was refused in September 2020.</p> <p>In February 2003 an application (Ref: DC/02/052725/FT) was refused for the display of 2 x 96 sheet partially illuminated advertisement hoarding. However, the subsequent appeal was allowed.</p> <p>An application (Ref: 95/004568) for the display of a 48 sheet free standing hoarding was allowed in May 1995.</p> <p>In March 1993 an application (Ref: 93/036209) for the change of use to a lithographic printing and print finishing unit was submitted. However, it is unknown if this application was approved.</p> <p><u>Other Sites</u> An application (Ref: DC/17/102967) for the construction of a four-storey building to provide a 8,279 sq.m Self-Storage unit (Use Class B8) and 962 sq.m office space (B1), together with the installation of a 3 metre high security boundary fence, two sliding gates to the front, provision of 16 car-parking bays (including 2 disabled spaces) and 24 secure cycle spaces, refuse and recycling stores and associated landscaping was approved in March 2018. This relates to the adjacent access self storage development to the rear of the site.</p> <p>Prior to the approval of the access self storage development, an application (Ref: DC/16/095614) was approved in June 2016 for the construction of a builders merchants warehouse (B8) (1,200 sq.m) with a mezzanine floor (428 sq.m) to provide ancillary office/staff facilities, a trade area, a covered loading bay at the rear of Stanton Square Industrial Estate, together with the creation of a new vehicular access onto Stanton Way, the provision of 17 parking (including 1 disabled) and 6 cycle spaces, installation of a 3m high security boundary fence, 2 sliding gates to the front, refuse and recycling stores and associated landscaping.</p> <p>A previous application to both the above (Ref: DC/08/070032/X) was granted in November 2008 for the demolition of two buildings and the construction of a four storey, L-shaped building, incorporating fascia translucent panel with illuminated blue LED lighting to the top floor around the building, to provide self-storage (Use Class B8), (floor area 8,897 sq.m) with office facilities (Use Class B1), (floor area 530 sq.m), together with the installation of four metre high boundary fencing and gate to the front, with lights on the perimeters facing downwards and the provision of landscaping, bicycle/bin stores and 16 car parking spaces, including 2 for use by the disabled.</p>		
Stoken Properties Ltd (Boyer obo)	- -	General Call for site	<p>This application has been submitted on behalf of our client, Stoken Properties Ltd. Going forward, I would be grateful if I could be kept updated on the progress of the Local Plan and our Call for Sites application. I would also appreciate being kept updated and informed on any preparation or discussion of a Masterplan for the Bell Green and Lower Sydenham area as this is a process both my client and myself would like to be involved in given my clients interest in the area.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Stoken Properties Ltd (Boyer obo)	- -	General	Re: Representations to Lewisham’s Regulation 18 “Main Issues and Preferred Approaches” Local Plan Document	Comments supplementary to the call for site	No change.

		Call for site	<p>We write on behalf of our client, Stoken Properties Ltd, in response to the recent publication of Lewisham’s Regulation 18 “Main Issues and Preferred Approaches” Local Plan Document. This letter makes representations to the Local Plan and focuses on Policy EC5 (Locally Significant Industrial Sites (LSIS)) and Section 17 – Lewisham’s South Area. The letter sets out our client’s response to a number of item in the draft Local Plan and provides comment on the relevant policies and allocations.</p> <p><i>Introduction</i> This letter outlines Stoken Properties Ltd. response to the recently published Regulation 18 “Main Issues and Preferred Approaches” Local Plan Document. Stoken Properties Ltd. have an interest in the Stanton Square Locally Significant Industrial Site (LSIS) and policies relating to it, namely Policy EC5.</p> <p>Stoken Properties Ltd are the freehold owners of the northern area of the site identified on the accompanying Site Location Plan, known as 491-499 and 501-505 Southend Lane. At the time of writing, our client is exploring future development opportunities for the site in order to maximise its efficiency and planning potential.</p> <p>It should be noted that the site has also been promoted via the Council’s Call for Sites exercise and both representations should be read in conjunction with each other.</p>	submission are noted. Our response is set out below.	
Stoken Properties Ltd (Boyer obo)	- -	General Call for site	<p><i>Summary and Conclusions</i> These representations have been made on behalf of Stoken Properties Ltd. in response to the recent publication of Lewisham’s Regulation 18 “Main Issues and Preferred Approaches” Local Plan Document. The document details draft policies, which are intended to guide future development within the London Borough of Lewisham.</p> <p>Whilst we are in general support of the proposed policies we feel clarification and flexibility is required in regards to what is meant by industrial “capacity” and also the requirement for 50 per cent affordable housing if it is unviable and would prevent a site being developed.</p> <p>I trust the above is sufficient in the first instance but should you require any further information or need clarification on any of the points raised, please do not hesitate to contact me.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Stoken Properties Ltd (Boyer obo)	-	Call for site	<p>Background Whilst we understand that a separate call for sites application has been made in respect of the adjacent Coventry Scaffolding site, our client wishes to submit a separate application for this site to ensure its planning potential is captured within the Call for Sites exercise and it is promoted for development going forward either as part of a wider application for the entire Stanton Square site or individually.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Stoken Properties Ltd (Boyer obo)	-	Call for site	<p>As advised, this representation is supported with a Call for Sites application for the element of Stanton Square that falls under the ownership of Stoken Properties Ltd., namely 491-499 and 501- 505 Southend Lane. Whilst we are supportive of the overall site’s allocation for mixed-use development within the Draft Local Plan, we feel it is important that, especially given the Council’s acknowledgement that some development sites will need to be phased, our</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

			client's site is considered independently as well as part of the overall Stanton Square site.		
Stoken Properties Ltd (Boyer obo)	-	Call for Site	<p>Development Potential</p> <p>Whilst it is encouraging to see the wider Stanton Square site included as an allocation within the Regulation 18 Local Plan, we feel it is important that the subject site is considered individually as well as part of the wider Stanton Square allocation. As the Council have acknowledged, development of the wider Stanton Square allocation may be phased development and so we wish to establish the quantum of development acceptable for the subject site.</p> <p>The site is considered to present an excellent opportunity for redevelopment for the co-location of commercial and residential uses (Use Classes E/B1, B8 and C3) as well as public realm enhancements. The site is deliverable and development could take place relatively soon depending on the site's allocation within the new Local Plan.</p> <p>As demonstrated within the accompanying Feasibility Study prepared by Falconer Chester Hall Architects (FCH), the site can successfully accommodate a high quality, mixed-use development. It is considered that a 6 storey development could be easily accommodated at this location, taking its lead from the heights of surrounding developments.</p> <p>In terms of the commercial floorspace, as depicted within the Feasibility Study, the ground floor can be divided into a number of commercial units to accommodate a number of commercial units and make a much more efficient and sustainable use of the site.</p> <p>As can be seen, any future development of the site could comfortably accommodate circa. 1,700 sq.m of commercial floorspace which would not result in a significant impact on overall capacity and would in fact, create more jobs than currently exist at the site.</p> <p>In terms of the residential element, the Feasibility Study shows that approximately 50 high quality units, which all exceed the national space standards, could be provided on site. These units would benefit from their own access as well as their own dedicated refuse and cycle stores.</p> <p>FCH have shown a scheme that comprises an acceptable unit mix of 40no. 2 bed units, 5no. 1 bed units and 5no. 3 bed units. Whilst it is acknowledged that this is a Call for Sites exercise and not a planning application, nevertheless, the fact that this unit mix, including 5no. family sized units, can be comfortably accommodated at the site should be seen as positive by the Council and the optimal capacity of the site being achieved.</p> <p>In terms of the quality of units, FCH have shown that all units can be designed so as to exceed the national space standards, thus ensuring a good quality of life for future occupiers. Further to this, all units benefit from their own policy compliant level of private amenity space in the form of balconies. As well as private amenity space, proposals can also provide shared amenity space that will have the added benefit of softening the impact of development and providing a better outlook for future occupiers.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

		<p>The Feasibility Study shows that the site can successfully accommodate a mixed-use development and that the mix of commercial and residential can work in harmony without detriment to the amenity of either use. The overall height and quantum of development detailed within the Feasibility Study is considered acceptable. At 6 storeys, any future development will fit in well with the surrounding area and would not be considered to be overly dominant or overbearing.</p> <p>Due to the site's good accessibility level, which could increase following the Bakerloo Line Extension, a car free development is considered acceptable at this location and should be supported by planning policy.</p> <p>A mixed-use development comprising commercial uses at ground floor level with residential above is considered appropriate and in line with the Council's wider ambitions for Stanton Square and the Bell Green and Lower Sydenham area. In terms of the quantum of commercial floorspace, whilst we acknowledge and support the Council's ambition that there should be no net loss of employment capacity, we would argue that a well-designed development with appropriate commercial/employment floorspace that, whilst perhaps maybe smaller in overall floor area, can accommodate a greater number of employees, is a more efficient use that does not result in an overall loss of capacity. A flexible and pragmatic approach is required and we provide further comment in our representations to the Regulation 18 Local Plan document. However, as shown in the Feasibility Study a significant amount of commercial floorspace at circa 1,700 sq.m can be provided as part of any future development which is considered acceptable and in line with draft Local Plan Policy EC5.</p> <p>As discussed above, the existing buildings on site are dated and would need to be brought up to modern standards making their refurbishment unviable and impractical. A more efficient and sustainable use of the site would be for its mixed-use redevelopment. Whilst the existing buildings have a large floorspace, they are not considered to be being used efficiently due to the low number of employees at site. With evolving working practices, it is considered that smaller, useable employment floorspace that can accommodate more employees is a much more efficient and sustainable use of space and maximises the development potential of a site. The Feasibility Study therefore shows that any future mixed-use development would not result in a net loss of employment capacity.</p> <p>The Feasibility Study demonstrates that the site at 491-499 and 501-505 Southend Lane can be successfully developed independently from the rest of the Stanton Square site, but in such a way that will not compromise existing operational requirements or future development of the wider Stanton Square site.</p> <p>The site presents an excellent opportunity to help the Council realise its ambitions for the Bell Green and Lower Sydenham area and its development could act as a catalyst for further development. The site should therefore be allocated for mixed-use development in the Council's new Local Plan.</p>		
--	--	---	--	--

			<p>Summary</p> <p>Whilst the Council's ambitions for the redevelopment of the entire Stanton Square site are supported, a separate Call for Sites submission for the site at 491-499 and 501-505 Southend Lane has been put forward as the site can be delivered within 5-10 years independently. Whilst the site can be delivered independently, any development of the site would be required to take into consideration how it would fit in with the wider Stanton Square redevelopment when that comes forward. It has been shown that development of the site will not compromise or prejudice either the existing operational requirements of other sites within Stanton Square or the future development of Stanton Square. It is felt that 491-499 and 501-505 Southend Lane can act as a catalyst and facilitator for the regeneration and redevelopment of the wider Stanton Square allocation and will encourage further development to come forward.</p> <p>Not only will the redevelopment and regeneration of this part of Stanton Square encourage the regeneration of the rest of the Square but it should also act as a catalyst for the regeneration of the wider Bell Green/Lower Sydenham area. Its redevelopment will bring significant social and economic benefits to the locality and Lewisham as a whole.</p> <p>The Council, in both draft Local Plan Policy EC5 and the Stanton Square allocation, support co-location of commercial and residential uses provided they would not result in a loss of overall employment capacity at the site. The Feasibility Study has shown that a sensitive mixed-use development that ensures there is no real loss of commercial floorspace whilst delivering high quality residential accommodation is achievable at the site and would make a much more efficient use of a site in an accessible and sustainable location.</p> <p>The site at 491-499 and 501-505 Southend Lane meets all the criteria the Council listed in its Call for Sites exercise. The site is over 0.25ha, could easily accommodate more than 10 residential units and more than 500 sq.m commercial floorspace and is in an accessible location as well as being located within an area that has been earmarked for regeneration, namely the Bell Green and Lower Sydenham Area. It is worth confirming that the site owner is very keen to work with the Council to bring the site forward and would welcome the opportunity to be involved in the preparation of a masterplan.</p> <p>I trust the above is sufficient in the first instance but should you require any further information or need clarification on any of the points raised, please do not hesitate to contact me.</p>		
Stoken Properties Ltd (Boyer obo)	-	Call for site	<p><i>LB Lewisham officer note: a Call for sites submission form, site feasibility study and site location plan showing the site boundary are included in the original representation.</i></p> <p>Site name and address: 491-499 and 501-505 Southend Lane, SE26 5BL</p> <p>Proposed use(s): Mixed use comprising commercial/office (Class E/B1), warehouse/storage (B8) and residential uses (C3).</p>	The call for sites submission for 491-499 and 501- 505 Southend Lane is noted. There is no need for an individual site allocation on this site as it is already included in the Stanton Square LSIS site allocation. It also recognises that	No change.

				development must be delivered in accordance with a site masterplan to ensure the appropriate colocation of employment and other uses across the site. Comments to additional representations are set out elsewhere in the Consultation Statement.	
Freeths LLP (K/S Lewisham obo)	-	Call for Site	<p><i>LB Lewisham officer note: a Call for sites submission form is included in the original representation.</i></p> <p>Site name and address: 150-154 Lewisham High Street, SE15 6JL</p> <p>Proposed use(s): replacement retail use and residential.</p> <p>We act on behalf of K/S Lewisham (“K/S”) and have been instructed to submit the following representation to the Local Plan consultation. This is in the context of a site known as 150-154 Lewisham High Street which is under their freehold control and management.</p> <p><i>LB Lewisham officer note: Appendix 1: the extent of the site is included in the original representation.</i></p>	The call for sites submission for 150-154 Lewisham High Street is noted. Kier Property (Carter Jonas obo)	-	General Call for site	<p>LAND SURROUNDING THE LIVESEY MEMORIAL HALL, BELL GREEN, SYDENHAM</p> <p>Carter Jonas on behalf of our client Kier Property, welcomes the opportunity to submit representations to the Lewisham Local Plan Regulation 18 stage “Main Issues and Preferred Approaches” document. Our client supports the preparation of the Local Plan and welcomes the proposed strategy for utilising land at Bell Green for alternative uses. In particular, the strategic and longer-term aspiration for Bell Green Retail Park’s contribution towards a residential-led mixed-use development.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Kier Property (Carter Jonas obo)	-	General Call for site	<p>Kier Property can confirm the availability of its redundant landholding known as Land to the rear of the Livesey Memorial Hall in its ability to contribute towards the Council’s growth strategy. The accompanying Site Location Plan identifies the extent of the land outlined in red comprising land to the north and east of the former Bell Green Gasholders, the Livesey Memorial Hall and its land to the north and south of this building. The land outlined in blue represents a long-term freehold for Kier Property. These representations relate specifically to the land outlined in red.</p> <p><i>LB Lewisham officer note: a site location plan showing the site boundary is included in the original representation.</i></p> <p>Our client requests that the land is formally identified for redevelopment as part of wider Bell Green redevelopment proposals where there is a clear and unequivocal relationship between the Site and the regeneration opportunity for a long term residential-led development.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

			<p>For the avoidance of doubt, our client's land ownership includes the Grade II Livesey Memorial Hall. Kier Property recognises the importance of this heritage asset to the character of the surrounding area and it is not the intention to propose the building for redevelopment. These representations promote the residual and dilapidating surrounding land of the Livesey Memorial Hall, which in the interests of proper planning should be included as part of the wider Bell Green strategic allocation area.</p> <p>In this regard, with the inclusion of our client's land in the wider site, we support the Council's vision in the context of a wider placemaking area around Bell Green.</p>		
Kier Property (Carter Jonas obo)	- -	General Call for site	<p>Site Background</p> <p>The Site is accessed via the existing Bell Green retail park located off Perry Hill, to the north of the former Bell Green Gas Works site. In the context of its surroundings, the residual land surrounding the Livesey Memorial Hall lies vacant, slowly falling into disrepair as a result. It is unsightly and overgrown but has potential to contribute to the Council's requirement for residential homes.</p> <p>The Bell Green Gasholders shown on the plans have recently been removed by Southern Gas Network and the site forms part of Site Allocation 1 The Former Bell Green Gasholders.</p> <p>The principle of development on the Site is supported both at national, regional and local level. The Site, by virtue of its previously developed nature would support the rhetoric to make the most efficient use of brownfield land.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Kier Property (Carter Jonas obo)	- -	General Call for site	<p>Strategic Matters</p> <p>In line with national policy, there are a number of strategic matters that are identified in the draft Local Plan which are relevant to the future determination of the most deliverable and sustainable options of the Borough. A key matter of which, is the extent of the housing needs arising in the Borough. In simple terms it is the responsibility of the Council to plan to meet it over the plan period.</p> <p>The NPPF also states the Government's commitment to ensuring the planning system does <i>everything it can</i> to support sustainable growth. We are pleased to see that progress has been made on the Council's evidence base that supports the identification of key growth opportunities on brownfield land, in parallel with key infrastructure delivery. An up-to-date evidence base should provide a sound basis for the plan and consultation on its content will help ensure local communities and other interested parties are aware of the issues considered by the Council in the preparation of a Local Plan. Ultimately the delivery of early and well-designed new homes for the Borough's growing population must, and can be achieved in this plan period.</p> <p>A 'new' London Plan was recently published by the Mayor of London and provides a number of strategic considerations for the Council to grapple with. The current Local Plan consultation document was produced prior to its publication and therefore any relevant matters drafted into the final London Plan should be accommodated and consulted upon in the next consultation opportunity.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	Local Plan amended to accord with the adopted version of the London Plan.

Kier Property (Carter Jonas obo)	- -	General Call for site	Thank you once again for the opportunity to respond to the Local Plan consultation. We would be grateful for confirmation that these representations have been received and confirm that we would like to be involved in future stages of the Local Plan process.	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Kier Property (Carter Jonas obo)	-	Call for site	<p>We consider that the site is well located to contribute towards the vision outlined by the wider Bell Green site allocations and therefore should be considered for inclusion within their boundary. Specifically, against the site allocation objectives and development guidelines, the site is:</p> <ul style="list-style-type: none"> • Capable of being available, constraint free and deliverable in the short term; • Capable of contributing towards delivering a high-quality development whilst offsetting any perceived harm to the Grade II Livesey Memorial Hall. • Provides the potential to increase the density on site to deliver a cohesive high quality residential and mixed-use development; • Contribute toward wider placemaking objectives and the Council's promotion of the wider Bell Green area as an Opportunity Area in the next review of the London Plan; • It is well located adjacent to an existing settlement with associated services and facilities – it is a key transition site from the entrance of the Bell Green Retail Park to the longer term development across the site. <p>Summary</p> <p>In summary, these representations confirm that the land to the rear of the Livesey Memorial Hall, Bell Green can be considered for inclusion within the wider Site Allocations at the Bell Green Retail Park.</p> <p>Kier Group would welcome the allocation of their landholdings as it relates to Bell Green, to allow for a comprehensive development and allow for a broader range of uses. The site allocation's location within the Bell Green area would allow for this site to act as a catalyst for regeneration of the wider area and the early delivery timeframe is supported.</p>	The call for site submission for Livesey Memorial Hall is noted. Agree that there is merit in including this site within the Former Bell Green Gas Holder site allocation. The site's capacity takes into account the need to protect the setting of the Grade II Livesey Memorial Hall and retain the openness of the bowling green and tennis courts.	The former Bell Green Gas Holder site allocation has been amended to include the site of the Livesey Memorial Hall.
Austringer Capital Ltd (Tetlow King Planning obo)	- -	General Call for site	<p>Introduction</p> <p>Section 1</p> <p>1.1 These representations are made by Austringer Capital Ltd in respect of the Regulation 18 Issues and Options consultation on the emerging Lewisham Local Plan. We welcome this opportunity to comment on the emerging strategy and policies.</p> <p>1.2 Austringer Capital Ltd has development interests at the former Willow Tree Riding Establishment, Ronver Road, Hither Green. The site comprises 5.6 hectares of land, historically owned by British Rail in connection with the Channel Tunnel rail link. A riding establishment operated from the 1950s to 2015 and a proposal for replacement riding facilities is presently subject to a planning appeal.</p> <p>1.3 At present, the site is disused, heavily overgrown, and subject to misuse including trespass, vandalism and fly-tipping. Through the Local Plan process, there is the opportunity to allocate the site for development, to ensure the site can be returned to beneficial use and to provide for the long term management</p>	Comments -supplementary to the call for site submission are noted. Our response is set out below.	No change.

			<p>and maintenance of the site. The site comes forward in a sensitive planning context, which has informed the development options for the site.</p> <p>1.4 These representations are structured as follows:</p> <ul style="list-style-type: none"> • Section 2 discusses the site and the key planning issues including site constraints and opportunities; • Section 3 discusses the potential uses of the site; • Section 4 provides comments on specific policies in the Plan. 		
Austringer Capital Ltd (Tetlow King Planning obo)	-	General Call for site	<p>The Site</p> <p>Section 2</p> <p>2.1 The site comprises 5.6 hectares of land forming a long narrow strip between extensive residential development to the east, and the South Eastern Main Line railway to the west.</p> <p><i>LB Lewisham officer note: Figure 2.1: Site Location Plan is included in the original representation.</i></p> <p>2.2 The site is largely undeveloped, save for an equestrian stable accessed from Ronver Road (disused since 2015) and other small structures found across the site. There are areas of hardstanding, paddock and scrubland throughout the site. Certain areas are heavily treed with some of the trees being subject to an area-wide Tree Preservation Order. There are areas of Japanese Knotweed, an invasive species, towards the north of the site.</p> <p>2.3 Historically, the site was owned by British Rail (“BR”) and featured in early plans for the Channel Tunnel Rail Link. These plans were abandoned by BR in the 1990s and the site then remained undeveloped (save for the riding establishment).</p> <p>2.4 Unfortunately, with the site being disused for several years, it has fallen into a state of degradation and is subject to vandalism, trespass and fly-tipping. Extant buildings and structures are in a poor condition. In order to secure the future maintenance and management of the site, it is Austringer Capital’s case that the site should be brought back into use. Doing nothing is not an option, since the site will continue to be misused and will continue to deteriorate.</p> <p>2.5 The site has historically been in equestrian use, with the former Willow Tree Riding Establishment operating from the 1950s until its closure in 2015. In recent years, permission has been sought for a new equestrian facility:</p> <ul style="list-style-type: none"> • An application for development of “erection of private stables, removal of trees and laying out of 3 no. paddocks” (DC/13/83518) was dismissed on appeal in 2014. Key concerns raised by the Inspector related to uncertain impacts in relation to biodiversity and trees at the site. The Inspector considered that the proposed built form was compatible with the Metropolitan Open Land designation at the site; that there would be no unacceptable adverse impact on residential amenity; and that the proposed development was acceptable in principle. Taking a precautionary approach the Inspector dismissed the appeal. 	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

		<ul style="list-style-type: none"> • A application for a revised scheme of “<i>Demolition of the existing stables and the construction of new equestrian facilities to include stalls, a barn shelter, tack building, reception/office, and a perimeter track for riding, at Willow Tree Riding Establishment Ronver Road SE12, together with use of the existing access onto Ronver Road and associated works</i>” (DC/19/111719) sought to respond to the issues raised through the previous appeal. The application was refused with four reasons for refusal, relating to an alleged urbanising impact upon the Metropolitan Open Land designation, loss of trees that detract from the Tree Preservation Order and the MOL designation, the internal highways and pedestrian layout, and amenity impacts upon adjacent dwellings. It is Austringer Capital Ltd’s case that the proposed development is acceptable in these respects. The scheme is currently the subject of a live planning appeal which is due to be heard in Summer 2021. <p>Site constraints</p> <p>2.6 The site is subject to several constraints, which include:</p> <ul style="list-style-type: none"> • Designation as Metropolitan Open Land (“MOL”); • Designation as a Site of Importance for Nature Conservation of boroughwide significance (reference LeB29); • Designated at its northernmost extent as an Urban Open Space subject to policy CS12 in the current Core Strategy; • An area Tree Preservation Order, made in 2012; • Noise arising from the adjacent operational railway. <p>2.7 These key site issues are discussed below.</p> <p>Metropolitan Open Land</p> <p>2.8 Adopted London Plan policy 7.17 ‘Metropolitan Open Land’ sets out the policy approach to Metropolitan Open Land. It continues the longstanding approach that MOL benefits from the same level of policy protection as Green Belt, albeit that the functions of MOL are different. Policy 7.17 explains that inappropriate development should be refused except in very special circumstances.</p> <p>2.9 Policy 7.17 lists the criteria for designation of MOL:</p> <ul style="list-style-type: none"> • it contributes to the physical structure of London by being clearly distinguishable from the built up area; • it includes open air facilities, especially for leisure, recreation, sport, the arts and cultural activities, which serve either the whole or significant parts of London; • it contains features or landscapes (historic, recreational, biodiversity) of either national or metropolitan value; • it forms part of a Green Chain or a link in the network of green infrastructure and meets one of the above criteria <p>2.10 The site’s status as Metropolitan Open Land was re-appraised in 2020 as part of a Metropolitan Open Land Review undertaken by Arup (the “MOL Review”). The site is identified as part of ‘MOL Area 6’; the Area Assessment</p>		
--	--	---	--	--

		<p>Summary shows the site either performs ‘weak-moderate’ or ‘moderate’ against the assessment criteria, however the land is recommended for retention as part of the MOL.</p> <p>2.11 The Annex Report to the MOL Review explains how these conclusions were reached, noting that the strongest contribution was found to be to the first criterion, as the site is heavily vegetated and contributes to the overall structure of built form. The site performed weakly in terms of the second and third criteria, due to the lack of public access; it is stated to be of “<i>no value to the local community</i>”. The site performed better in terms of the fourth criterion in light of other nearby green infrastructure connections.</p> <p>2.12 In light of the MOL Review’s recommendations, Austringer Capital recognises that any development of the site must come forward in accordance with the MOL policy designation. This has a significant bearing upon the proposals for the site, which seek to maintain the openness of the site, remain compatible with the MOL designation, with only limited built form.</p> <p>Ecology</p> <p>2.13 The site is designated a SINC of boroughwide importance. The site forms part of the Hither Green Sidings SINC, which includes other adjacent parcels of land including that within the ownership of Network Rail.</p> <p>2.14 The ‘Re-survey of Sites of Importance for Nature Conservation in Lewisham’ was undertaken by the Council in 2016 and includes a habitat map of the site. This shows there to be large areas of scrubland, roughland, with smaller pockets of native woodland, a pond, tall herbs, and semi-improved neutral grassland. There are also areas of soil, rock and artificial habitat centred around the former equestrian centre.</p> <p>2.15 The SINC designation was reviewed by the Council in late 2021. The report is informed by a site visit of the Network Rail land. It finds that whilst there has been an increase in the biodiversity value of the site since the previous survey in 2016, it remains the case that the site does not fulfil the necessary criteria to be upgraded to a Site of Metropolitan Importance.</p> <p>2.16 Austringer Capital is aware that there are objections to the current appeal scheme on ecology grounds. It is important to note that the SINC designation is not a blanket restriction on all development. Policy G6 of the London Plan 2021 requires that “<i>Sites of Importance for Nature Conservation (SINCs) should be protected</i>” and as such requires any development proposals to avoid harm to the biodiversity of SINCs (but where harm is unavoidable, to apply a hierarchy of mitigation). The current appeal is not subject to an ecology reason for refusal and the Council is satisfied that the matter can be addressed by way of condition.</p> <p>2.17 Overall, it is considered that ecological matters are an important constraint that must be factored into any scheme design, but that it is possible for development to come forward that preserves and enhances the main areas of ecological value in accordance with the SINC designation.</p> <p>Trees</p>		
--	--	---	--	--

		<p>2.18 The site is subject to an area TPO, made in 2012. Area TPOs are frequently used to protect a large number of trees quickly and the Council is legally obliged to undertake a full assessment of the trees and groups covered by the order. The Area TPO may include trees which do not merit protection, and new trees and growth may make it difficult to establish which trees are actually protected under the TPO. It is therefore considered that a scheme design can come forward which respects and enhances high quality trees at the site, and that the TPO designation must be considered in the context of the above caveats.</p> <p>Open space designations</p> <p>2.19 The site is subject to existing and proposed Open Space designations. Under the emerging Local Plan, the site is considered under policy GR2 'Open Space and Lewisham's Green Grid' however Green Infrastructure and open spaces also form part of the broader spatial strategy for the East Area of Lewisham.</p> <p>Opportunities for the site</p> <p>2.20 The opportunities for the site are heavily influenced by these constraints, which require a careful approach to be taken to any scheme design. Opportunities include:</p> <ul style="list-style-type: none"> • Restoring the site to beneficial use; • Protecting and enhancing the areas of acknowledged biodiversity importance; and • Provision of foot and cycle links throughout the site, achieving local objectives (set out in the emerging Grove Park Neighbourhood Plan) to provide a 'linear parkland' throughout the neighbourhood. <p>Restoring the site to beneficial use</p> <p>2.21 The primary aspiration is to bring the site back into beneficial use. In common with other London Boroughs, there are relatively few opportunities to bring development forward on sites of any significant scale. The National Planning Policy Framework emphasises the efficient use of land. With a limited supply of land in the Borough, it serves nobody's purpose to leave sites such as this undeveloped. Conversely, there is the opportunity to deliver development that positively meets needs of the Borough's growing population. The Local Plan is the key mechanism by which the Council can identify land for future use and an allocation of this site will ensure that the site can contribute to the overall success of the Borough.</p> <p>2.22 Development is also necessary to secure the site's ongoing management and maintenance. At present the site is blighted by vandalism, fly-tipping and general degradation despite the efforts of the landowner to prevent this. Whilst there is no public access to the land, there have been numerous issues of trespass and break-ins to the site. It is an unfortunate fact that any site of this nature in this location will be susceptible to misuse and whilst efforts are made to secure the site, a determined individual may try to circumvent these measures. It is considered that a regular staff presence at the site and a proper management and maintenance regime will substantially reduce instances of trespass and misuse of the site.</p> <p>Protecting and enhancing biodiversity</p>		
--	--	--	--	--

			<p>2.23 Development at the site offers the potential to achieve net gains in biodiversity. The Council's own evidence base shows that whilst there are areas of habitat value within the site, these do not extend to the entire site area. There are, for example, areas of hardstanding. Existing habitats on site including dense scrub, woodland and open mosaic habitat provide opportunities for enhanced biodiversity through carefully considered management.</p> <p>2.24 Bringing development forward at the site would allow for a proper landscape and ecological management plan to be secured, with clear measures and objectives to secure biodiversity improvements.</p>		
Austringer Capital Ltd (Tetlow King Planning obo)	-	General Call for site	<p>Development Options Section 3</p> <p>3.1 The site constraints and opportunities have informed Austringer Capital's aspirations and vision for the site. Any development must respond to the constraints on the site, chief amongst which are MOL, ecological and arboricultural considerations. This limits the potential for extensive built redevelopment of the site, but there is clear scope for a predominantly outdoor use to come forward where this preserves the open characteristics of this part of the MOL and responds to the other site constraints and opportunities as identified above.</p> <p>3.2 Three options are therefore proposed:</p> <ul style="list-style-type: none"> • Provision of a modern riding establishment; • An alternative leisure use; or • Delivery of a combined cemetery and community use. <p>Riding establishment</p> <p>3.3 The site has been historically used for equestrian purposes and the current appeal scheme proposes a significantly upgraded equestrian facility. The submitted scheme allows for the provision of parking, access and new buildings concentrated around the footprint of the existing hardstanding and buildings. A perimeter track is proposed to run in a loop through much of the site. Existing high quality trees are to be protected and incorporated into the scheme design.</p> <p>3.4 The proposed riding establishment is compatible with the MOL designation. Paragraph 145b of the Framework allows for the provision of appropriate facilities for outdoor sport and recreation and through the appeal the Council has not objected to the principle of the development.</p> <p>3.5 The proposed riding establishment offers opportunities for biodiversity net gains to be achieved. As discussed in section 2, although the site is subject to a SINC designation covering the wider Hither Green Sidings, certain parts of the site are of limited ecological value. Development of a riding establishment allows large areas of the site to be retained, enhanced and properly managed for ecological value and improved biodiversity, offering greater ecological connectivity across local SINCS.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

		<p>3.6 Through the appeal process Austringer Capital has set out the need for the proposed equestrian use. There are two riding establishments within 1.5km; New Lodge Farm which provides specialist riding facilities for adults and children with disabilities, physical, sensory and learning difficulties; and Mottingham Farm Riding Centre which serves the general public. At the time of writing, it advertised only two available livery spaces out of a total of 44.</p> <p>3.7 The extant structures at the site were built many years ago and are in a poor condition, unsuitable for retention or re-use. The expectations of customers have changed over time, with the proposed new facilities including modern stables and a barn shelter, formalised car parking, a reception and office building, a picnic area, and a trackway running throughout the site. Taken together, the proposed equestrian use would offer improved facilities from those extant at the site.</p> <p>3.8 Emerging policy CI2 'New and Enhanced Community Infrastructure' supports the provision of new and reconfigured community facilities, where they are suitably located, where the development proposals are flexible, functional, available to the public, and appropriately managed, with no other significant adverse effects on neighbouring uses. In this context, paragraph 9.8 of the emerging Local Plan's supporting text states that <i>"Community infrastructure is vital to securing inclusive communities and to meeting the needs of different groups within the Borough. We will therefore be broadly supportive of proposals involving new or enhanced provision"</i>.</p> <p>3.9 There is a demand for equestrian uses in the area and little spare capacity in existing facilities. The delivery of a modern riding establishment, designed to meet present-day needs and built to present-day standards, would be entirely consistent with the objectives of policy CI2. There is also the opportunity to secure proper long-term management at the site including in respect of ecology and general maintenance of the site.</p> <p>3.10 Paragraph 9.8 of the supporting text to emerging policy CI2 emphasises that the location of community facilities should be suitable for the community and groups that they serve. In this case, the site benefits from good access to road (with easy access to the South Circular Road) and public transport networks (including London Buses and National Rail) in the context of its suburban location away from the identified district centres.</p> <p>3.11 In terms of the spatial strategy, the proposed riding establishment is consistent with the vision for the East Area of Lewisham. Paragraph 16.6 of the emerging Local Plan emphasises the importance of quality parks, open spaces and green infrastructure in the East Area (discussed further at Section 4 of these representations). The proposed riding establishment allows for the site to remain open (in accordance with MOL policy) and can provide for proper management and maintenance of the site, to ensure that ecological interests can be protected and enhanced.</p> <p>3.12 Drawing the above together, there is a clear case that the Willow Tree Riding Establishment site is suitable for equestrian use and that emerging policy should support the provision of enhanced, modern facilities at the site. Whilst</p>		
--	--	--	--	--

		<p>the appeal is currently considering site-specific technical matters and the design approach, it is clear that, in principle, the site is suitable for equestrian use.</p> <p>Alternative leisure uses 3.13 Whilst the proposed equestrian use benefits from extensive design work and is currently being considered through the planning appeals process, there may be potential for an alternative outdoor-led leisure use. This may be explored further through the Local Plan process.</p> <p>Cemetery use 3.14 There is a need for additional burial space in the London Borough of Lewisham. The most recent evidence base document for burial space requirements is the Audit of London Burial Provision prepared in 2011 by the Greater London Authority. For Lewisham, it notes that there are four cemeteries in total in the Borough, one of which is owned and operated by the London Borough of Bromley. At the time of the audit, it was estimated that there were around 56 years' worth of burial capacity. However, some of the data in the audit such as burial rates date as far back as 1995. There are also limitations to the methodology in the audit, which notes at paragraph 2.31 that <i>"it becomes very difficult for a cemetery owner to make an accurate assessment of exactly how many grave spaces may be available in an existing cemetery. It is for this reason that the final assessment of the amount of space available in a given borough is very much an estimate, and depends on cemetery managers' largely qualitative reporting and their understanding of which grave creation measures may release further space, and which measures have been exhausted or are not viable"</i>.</p> <p>3.15 Since the evidence base for cemetery requirements is dated, we have sought up-to-date information through a Freedom of Information request ("Fol") provided at Appendix 2.</p> <p><i>LB Lewisham officer note: Appendix 2 FOI response is included in Appendix 2 in the original representation.</i></p> <p>3.16 Information was sought for the number of burials on an annualised basis between 2011/12 (the time of the GLA audit) and 2019/20 although data was only available for two of these years. In 2019/20 a total of 527 burials were recorded.</p> <p>3.17 Information was sought for 2020/21 to understand whether the COVID-19 pandemic has affected the rates of burials. All three cemeteries saw an increase in the year 2020/21 to date when compared with the previous year. In total 582 burials have been undertaken, a 10% increase against the previous year.</p> <p>3.18 Details of capacity in existing cemeteries were also sought:</p> <p>3.19 In total, there are around 2,050 remaining spaces, of which 1,250 are currently available and a further 800 require further investment to bring into use.</p> <p>3.20 With 527 burials recorded in 2019/20 across all three of Lewisham's cemeteries, there are currently only enough spaces to meet 3.9 years' worth of demand. The availability of burial space is therefore substantially less than was</p>		
--	--	--	--	--

			<p>estimated in the GLA Audit, and points to a significant need for new burial space in the Borough over the course of the emerging Local Plan period.</p> <p>3.21 It is therefore necessary to provide additional burial plots in the Borough. Emerging Local Plan policy CI5 makes provision for this and explains that the Council intends to update its evidence base in this respect. The Local Plan process is an opportunity for the Council to make proper long-term provision for burial spaces. The former Willow Tree Riding Establishment site offers the potential to provide a cemetery that is well-located in relation to the community it serves, being close to both the long-established Hither Green and Grove Park cemeteries. Such an approach remains consistent with emerging policy CI3.</p> <p>3.22 Cemetery uses are compatible with Metropolitan Open Land designation. There are several instances where cemetery proposals have been considered, including at appeal, within the Green Belt, and have been found to be acceptable.</p> <p>3.23 Site specific benefits of providing a cemetery at the former Willow Tree Riding Establishment site include:</p> <ul style="list-style-type: none"> • Proximity to existing cemeteries and associated facilities such as chapels of rest and the Crematorium at Hither Green; • The ability to secure biodiversity enhancements at the site, identifying those areas of greatest ecological value and securing their long term management and maintenance; • Provision of well-maintained open spaces for quiet contemplation; • Maintaining a predominantly open site with vegetation throughout as part of the wider network of Green Infrastructure identified in the emerging Lewisham Local Plan as well as the published London Plan; • Provision of footpath links as part of a 'linear park'. <p>3.24 Access for vehicles via the South Circular Road; positive pre-application advice has been received from Transport for London that confirms that in principle, this access is acceptable.</p> <p>3.25 Initial design work for the site has been undertaken which indicates a potential capacity of up to 6,700 burial plots whilst retaining the trees at the site of greatest arboricultural value and maintaining a planted buffer to the adjacent railway and dwelling houses. This is subject to refinement through the design process. A capacity of 6,700 plots would provide an additional 13 years' capacity assuming a burial rate of 527 per annum.</p>		
Austringer Capital Ltd (Tetlow King Planning obo)	-	General Call for site	<p>Summary and Conclusion Section 5</p> <p>5.1 These representations are made by Austringer Capital Ltd in respect of the Regulation 18 Issues and Options consultation on the emerging Lewisham Local</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

			<p>Plan. We welcome this opportunity to comment on the emerging strategy and policies. Austringer Capital Ltd has interests at the former Willow Tree Riding Establishment, Ronver Road, Lewisham.</p> <p>5.2 The site measures some 5.6 hectares and has suffered from degradation since the closure of the previous riding establishment in 2015. The Local Plan presents the opportunity to allocate the site, to restore it to beneficial use.</p> <p>5.3 It is necessary to carefully consider the constraints at the site, which include Metropolitan Open Land, Site of Interest for Nature Conservation designations, and arboricultural interests. These are not 'blanket' restrictions on any form of development; they can be addressed through an appropriate scheme design.</p> <p>5.4 Moreover, it is possible to achieve meaningful benefits through development at the site, including the long-term management and maintenance of the site (including in respect of ecology and trees); restoring the site to use; the ongoing contribution of the site towards Green Infrastructure, and the potential to provide foot and cycle links dependent upon the scheme design. Emerging policies LEA4 and LEA5 contemplate the ability of some development to support wider objectives in respect of open spaces and community provision.</p> <p>5.5 We have proposed three potential uses at the site; equestrian use, an alternative outdoor leisure use, and a cemetery use. The proposed uses would help to meet local needs and are consistent with the site constraints, opportunities and the broader spatial strategy for the East Area of Lewisham. We would welcome the opportunity to discuss these in further detail with the Council as the Local Plan progresses.</p>		
Austringer Capital Ltd (Tetlow King Planning obo)	-	General Call for site	We welcome the opportunity to discuss the content of these representations further with the London Borough of Lewisham and are keen to be involved in the forthcoming examination process. In the meantime, should you wish to discuss any of the above please do not hesitate to contact us.	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Austringer Capital Ltd (Tetlow King Planning obo)	-	Call for site	<p><i>LB Lewisham officer note: Call for Sites form is included in Appendix 1 in the original representation.</i></p> <p>Site name and address: Willow Tree Riding Establishment, Ronver Road, London, SE12 ONL</p> <p>Proposed use(s): Retention of riding establishment use; or alternative outdoor leisure use; or Cemetery use.</p>	The call for sites submission for Willow Tree Riding Establishment is noted. We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change.
Big Yellow Storage Company Limited (DWD obo)	-	General Call for sites	<p>LEWISHAM LOCAL PLAN: MAIN ISSUES AND PREFERRED APPROACHES (JANUARY 2021) - REGULATION 18 CONSULTATION REPRESENTATIONS ON BEHALF OF BIG YELLOW GROUP PLC</p> <p>These representations are submitted on behalf of our client, .Big Yellow Self Storage Company Limited ("Big Yellow") to Lewisham Council's consultation document 'Lewisham Local Plan: Main Issues and Preferred Approaches (January 2021)' ('draft consultation document').</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.

			<p>Big Yellow owns the freehold interest of the land at 155 Lewisham Way, New Cross, London SE14 6QP (“the Site”) as shown on the appended map (Appendix A).</p> <p><i>LB Lewisham officer note: Appendix A: Map of 155 Lewisham Way is included in the original representation. The plan shows the site boundary in red.</i></p> <p>These representations relate to the Site and the ‘employment land’ chapter of the consultation document, as well as the proposed changes to the adopted policies map.</p>		
Big Yellow Storage Company Limited (DWD obo)	-	General Call for Site	<p>I trust that the information provided clearly sets out Big Yellow’s position with regard to Lewisham’s new Local Plan. Please do not hesitate to contact me if any further clarification is required on the above.</p> <p>I would be grateful if you could please confirm receipt of these representations and keep me informed of any further consultations moving forward.</p>	Comments supplementary to the call for site submission are noted. Our response is set out below.	No change.
Big Yellow Storage Company Limited (DWD obo)	-	Call for site	<p>Site and Surrounding Area The Site is located within the boundary of Lewisham Council and extends to an area of approximately 0.46 hectares, located on the north-eastern side of Lewisham Way. The Site is occupied by a Big Yellow self-storage facility which fronts Lewisham Way, and a smaller building set back from the main road which is occupied by a number of industrial / commercial uses. Both buildings are accessed from Alexandra Cottages and have associated service yards and parking areas.</p> <p>Current Policy Position Within the adopted policies map the Site is located within the Lewisham Way Local Employment Location (LEL) which is one of 12 designated LELs within the Borough. In policy terms, LELs are protected for a range of uses within the B Use Class (B1, B8 and where appropriate B2 industry) and also appropriate sui generis uses, to support the functioning of the local economy. This policy protects the Site for continued industrial use, including for self-storage purposes (Class B8).</p> <p>Bakerloo Line Extension It is noted that the Bakerloo Line Extension safeguarding plans recently issued by Transport for London (TfL) safeguard the entire Site within an ‘area of surface interest’ for a new shaft. It is not known at this point whether all, some or none of the Site will be required for the BLE. Therefore any area that is not used or, indeed, once it has been used and is no longer required for the BLE, could come forward for employment development in the plan period.</p>	The call for sites submission for Big Yellow Storage Facility at 122 Lewisham Way is noted. This site is currently safeguarded for the BLE. This site may be considered through a plan review in due course, once there is certainty over the delivery timescales for the BLE and the exact land take for the BLE shaft is known.	No change.
Southern Gas Networks	-	General Call for sites	<p>After reviewing the Draft Local Plan and the section in the IDP specifically about SGN, I have no comments I wish to make at this time. That being said, I would like to offer our future support, especially after the Call for Sites has ended and a decision has been made on which sites are acceptable. If it benefits the council, I would be happy to analyse the impact of all potential Lewisham sites on the SGN gas network and provide a summary of my findings.</p> <p>I look forward to hearing from the council in the future.</p>	Comments noted.	No change.

Lewisham Local Plan

Regulation 18 consultation statement

Appendix 3 – Regulation 18 Draft Local Plan Commonplace Responses Part 1

September 2022

Part	Section, policy or paragraph	Respondent submission	No. of agreements	Council officer response	Action
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? I wish there was a more direct line through to the details of the plan for those who want to skip the preamble of how it's been formulated... quite time consuming.</p>	0	<p>The Commonplace website was organised around the main Parts and policy topic areas in the plan. It also separated the plan into separate downloadable sections.</p> <p>The full draft Local Plan has been desktop published with embedded hyperlinks that allow readers to navigate quickly to different sections of the documents. This feature will be retained in the Regulation 19 document.</p>	<p>Hyperlinks are included in the document for ease of navigation.</p> <p>The Local Plan has been reviewed and updated to make it shorter and more concise, where possible. A plain-text version of the plan has also been prepared.</p>
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? Since I cannot find another appropriate place to comment on the form of this consultation I will place it here:</p> <p>- At 870 pages how do you expect the general public to make informed contributions to the plan? The summary is so</p>	0	<p>The length of the draft plan reflects that it will update and consolidate 4 adopted plans into a single document.</p> <p>As part of the Regulation 18 consultation we prepared a high level summary. We are sorry</p>	<p>The Local Plan has been reviewed and updated to make it shorter and more concise, where possible. A plain-text version of the plan has also been prepared.</p>

		<p>high-level that it is not very helpful. The important bits are often in the details.</p> <ul style="list-style-type: none"> - The wording of the plan is unnecessarily verbose and repetitive: For those who compose tomes like this professionally it might make sense but it does not serve the local community. - Many parts of the plans are formulated as aspirations and not as absolute requirements, e.g. prevention of loss of green space, types of heating, etc. Every part has get-out clauses and exceptions which will be abused when it comes to the stage where a design proposal requires approval. - The plan often uses vague wording that are subjective in their interpretation: "sensitive", "sustainable", "high quality design", etc. These terms, of course, cannot be clearly defined. They mean whatever the person uttering them wants them to mean. A member of the development team of the Lewisham Gateway told me that the high-rise buildings there were of high quality design 		<p>that you didn't find this helpful but we have had many positive feedback on this approach.</p> <p>The Local Plan is a policy document which is used to assess planning applications and will be scrutinised legally in the case of any appeals in the future. It is therefore necessary that the language is professional and robust.</p> <p>The terms are all recognised terms used in planning policy documents, guidance and SPDs. These terms are outlined in the National Planning Policy Framework and have been tested through the legal processes.</p>	
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? Its clearly described as a statutory process that is required by law</p>	0	The Regulation 18 consultation was carried out in accordance with the Council's adopted Statement of Community Involvement. The consultation period was	No change.

				well in excess of the legal minimum 6-week period.	
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>The aspirations outlined in Part 1 of the plan sound all good. I'm much more worried about their realisation and how much of the aspirations (greener environment, better transport, tackling deprivation, diverse culture, sensitive development) will survive the contact with real life developers.</p> <p>The target of ~1600 housing units per year is an imposition from the London Plan. Why would we need to accept this and in consequence have a very high density of housing units with the required high rise buildings when other boroughs get away much more lightly (e.g. Richmond ~300 units / year) ? The identified opportunities for development could also be used to create more green spaces, communal areas, etc., instead of an intensified housing block, so that Lewisham could become an as pleasant borough as Richmond. Why should the distribution of green spaces and character of area remain fixed as it was defined over the last 200 years, i.e. Richmond: low density, lots of green spaces, low rise buildings vs Lewisham: high density, change from low rise to high rise over the last 15 years, decent amount of green spaces ? Or are</p>	0	<p>The Local Plan is legally required to be consistent with the National Planning Policy Framework and in general conformity with the London Plan.</p> <p>Lewisham like all London Boroughs is facing a Housing Crisis and needs to build many more homes. Particularly genuinely affordable homes. The London Plan set Lewisham a Housing Target of 1,667 new homes per year.</p> <p>If the Council does not positively plan to meet its identified need then the Council will be placed in the 'presumption of sustainable development'. This means that the council will be less likely to defend against inappropriate development through the planning appeal process. We have seen in other London Boroughs refusals</p>	No change.

		<p>there some more sinister motivations behind the distribution of "opportunities"?</p> <p>The statement that Lewisham Centre has the ambition to become a major metropolitan centre was news to me until recently. Who made this decision? We as a community? Or some planning strategist who saw "opportunities"?</p>		<p>for development on Metropolitan Open Land for example being overturned at appeal because the Council could not demonstrate an appropriate plan for growth or past housing delivery.</p> <p>The London Plan sets out the potential future re-classification for Lewisham as a Metropolitan Centre. This is reflected locally both in the adopted Lewisham Town Centre Plan and the draft Local Plan also takes this forward.</p>	
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>The use of Commonplace is a good one. However as there have been multiple consultations using this tool, useful comments which have crossover pertinence with the local plan are not being noted. From an engagement perspective this is also confusing and am sure gives the impression to some that their comments have either been ignored or that they have already commented and so don't need to again.</p>	0	<p>Support for Commonplace noted.</p> <p>Because of its effectiveness the Council does use the tool on multiple consultations. The Council's main consultation hub is Citizen Space, which is accessed directly from the Council's webpage.</p>	No change.

Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>I fully support and endorse Make Lee Green's proposal (I am not a me.bdr). For clarity, their response is found here:</p> <p>https://drive.google.com/file/d/1hZtCl3zгурAwznSfo_5qV7xukZzRg9m4/view?usp=drive_sdk</p>	1	Noted. The Council's response to Make Lee Green's representations are set out elsewhere in this Consultation Statement.	No change.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>I fully endorse and Support Make Lee Green's response they have submitted. To clarify, their response is available here:</p> <p>https://drive.google.com/file/d/1hZtCl3zгурAwznSfo_5qV7xukZzRg9m4/view?usp=drive_sdk</p>	1	Noted. The Council's response to Make Lee Green's representations are set out elsewhere in this Consultation Statement.	No change.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>Please don't ignore the A205 Stansted Road parade of shops (nos 294-341) which is a real trouble spot and totally NEGLECTED. There is high pollution due to bad traffic on A205. Please don't ignore us just before we sit on the border between two wards, we are always forgotten!</p>	1	Noted. The Local Plan sets out proposals to support the Healthy Streets Approach along the A205. It also includes specific policies dealing with neighbourhood parades.	No change.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>I support the Forest Hill Society submission.</p>	0	Noted. The Council's response the Forest Hill Society's representations are set out elsewhere in	No change.

				this Consultation Statement.	
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>Why were all the notices put near any site appearing in the local plan identical i.e gave the overall location of the Local Plan on the council website / commonplace but did not link to the specific page of the Plan which detailed the plans for that site.</p> <p>I am assuming the reason could be cost-cutting with continued government reduction of funding plus during the time of extra costs during pandemic but it did impede people locating the site online - your website since its overhaul some time ago has become much more difficult to navigate - nit sure who updated it and what their remit was and whether it is considered that they achieved it but I would say it was not to make the website more user-friendly and more accessible.</p>	0	<p>The site notices gave information to the Commonplace website which was constructed to make it easy for residents to comment on certain sections of the plan.</p> <p>The Local Plan is a large document so we appreciate that it may not have taken you through to the exact site. It has been desktop published with embedded hyperlinks to make it easier to navigate.</p>	No change.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>We note that the Local Plan is based on a listed number of Evidence based documents such as the Lewisham Characterisation Study (2019), the New Cross Area Framework and Catford Town Centre Masterplan.</p>	0	All the evidence base documents for the draft Local Plan can be found on the Council planning website.	No change.

		It is unclear if these are all of the evidence based documents as there appears to be no specific rationale or basis for designating the Sydenham Extension Area of Local Special Character - especially as there is no mention of the Kirkdale area on the above character study.			
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>I support the objectives of the plan but the proposals do not match the ambitions of the plan and there is a lack of specific commitments. I fully support the comments and proposals made in the Make Lee Green submission</p> <p>https://drive.google.com/file/d/1hZtCl3zгурAwznSfo_5qV7xukZzRg9m4/view</p>	1	<p>The draft Local Plan is a strategic policy document which is informed and has informed more detail pieces of work such as the Parks and Open Space strategy, Transport Strategy A22 Development Framework, Catford Framework etc.</p> <p>The Council’s response to Make Lee Green’s representations are set out elsewhere in this Consultation Statement.</p>	No change.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>There is so much material it feels entirely overwhelming and unclear what has changed. Feels like a deliberate ploy to avoid engagement and scrutiny</p>	0	<p>The length of the draft plan reflects that it will update and consolidate 4 adopted plans into a single document.</p> <p>We prepared a summary version of the Local Pan to accompany the document</p>	The Local Plan has been reviewed and updated to make it shorter and more concise, where possible. A plain-text version of the plan has also been prepared.

				<p>to make the process more accessible.</p> <p>We also structured the Commonplace site by topic and area – again to aid accessibility.</p>	
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>You have already absolutely ruined Hither Green with the devisive LTNs. You now want to close the roads again under the disgracefully misleading School Streets closures, which will throw the periphery roads back into gridlocked, polluted chaos. But apparently that’s not enough, now you want to throw a ridiculous amount of new housing into the mix when we don’t have the infrastructure for them! This is absolutely ridiculous</p>	0	<p>The Low Traffic Neighbourhoods project is not within the scope of the draft Local Plan consultation. The Council’s position on LTNs is set out on our website.</p>	No change.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>You have ruined Lewisham. It looks awful and you have packed as many people as possible into what is becoming the next Croydon. Where is the infrastructure around this new Lewisham? How man new Doctors, Schools, Green areas and out doors spaces have you created? You have failed the borough and packed as many people in as possible You have utterly destroyed the roads with idiotic plans in hither green and</p>	0	<p>We appreciate that tall buildings is a divisive issue for many residents. The London Plan makes it clear that tall buildings in appropriate locations are part of the solution to tackle the Capitals housing crisis.</p> <p>The London Plan directs the Council through the Local Plan to identify those</p>	No change.

		<p>that stupid bus lane outside the old ladywell baths....</p> <p><i>[some of this comment was removed due to derogatory language and unfounded allegations]</i></p>		<p>locations that are appropriate for tall buildings and set threshold heights.</p> <p>We believe that suitable locations for tall buildings should be in accessible areas with good access to public transport, local facilities and jobs. We believe that Lewisham Town Centre is a sensible and sustainable location for high-density development.</p> <p>Within Lewisham Town Centre alone new development has delivered the following: Extension to Prendergast Vale School, River Naturalisation and improvements to Cornmill Gardens, The Glass Mill Leisure Centre, and Confluence Park. Future development will also include a new cinema complex, a new public square, improved transport provision, more shops and local jobs.</p>	
--	--	--	--	---	--

				As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.	
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? The timescale of the local plan is twenty years and a lot could change during this time. Funding levels could be very different. There is no indication of what can be currently achieved and what needs additional funding to be achieved.</p> <p>The plans could be much better summarised and key milestones identified. Without measurable targets success cannot be judged. So much in the plan is an aspiration.</p>	2	<p>The NPPF requires that the Local Plan is reviewed every 5 years, and updated where appropriate.</p> <p>The plan has a monitoring section set out in Part 5 which will be monitored each year and the results published in our Authority Monitoring Report.</p>	No change.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? How can you make a successful plan without taking into account the changing traffic</p>	0	The draft Local Plan is underpinned by a Transport Assessment which factors in future	No change.

		patterns which will emerge from introduction of LTNS or not if they are removed/ amended , Low Traffic Emission Zones which will surely effect the traffic flows around the South Circular and not always as plotted in theory in advance.		transport projects. The study will be published as part of the evidence base.	
Part 1 – Planning for Lewisham		Do you have any comments on the introductory sections of the Local Plan? Why are some areas being re designated without questions as to why being swerved by council officers and in some cases being down graded eg Sydenham Hill Ridge. This wouldnt be to fit the aims of the Councillor Planning Committee?	0	The Local Plan proposes to re-designate Sydenham Hill Ridge from an Area of Special Character to an Area of Special Local Character. It is considered that this will continue to recognise the distinctive qualities of the ridge and ensure development responds positively to this.	Local Plan amended to clarify Sydenham Hill Ridge to be designated as an Area of Special Local Character.
Part 1 – Planning for Lewisham		Do you have any comments on the introductory sections of the Local Plan? No it's badly set out and there is no mention of Ladywell . There seems to be theme of neglecting Ladywell within these plans. Where are the details for the cinema in Ladywell? There is no focus on air traffic pollution despite Ladywell being the connecting area by car to central London. Ladywell Village has always been the jewel in the crown for the borough and it appears the that new plans have not considered the improvements or changes needed to improve/ update Ladywell. In	0	The Ladywell area comprises largely of an established residential neighbourhood where sensitive intensification will be supported to deliver new homes and other area improvements. Owing to its distinctive historic character there are limited major or large site redevelopment opportunities and therefore few site allocations in Ladywell.	No change.

		<p>addition the planned Bakerloo line is due to come to Ladywell and there needs to be more cup tempo resources available, the cinema for example, more shops, facilities available along Ladywell Road, also access to local services available to commuters. The plans completely neglect Ladywell and they are unacceptable.</p>			
<p>Part 1 – Planning for Lewisham</p>		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>I feel that the plan is far too dense and covers too much, maybe thats the intention as it makes for an incredibly confusing document.</p> <p>Pages of information about the reasons why all this needs to happen and then towards the end we finally get to the part which mentions what will actually be impacted - not sure how much housing the borough needs and also proposing to lose a number of supermarkets (Sainsburys & Lidl at Bell Green and Sainsburys at Lee Green) surely goes against the increased population who will need to shop somewhere. Not to mention the employment that these places provide.</p> <p>Also with Lewisham wanting to reduce car use, the supermarket that currently people can walk to will be removed and instead</p>	<p>1</p>	<p>The length of the draft plan reflects that it will update and consolidate 4 adopted plans into a single document.</p> <p>The level of detail included in the plan is in part a response to feedback from local community groups who requested that the new Local Plan provide more detailed policies and guidance on selected policy topic and neighbourhood areas. However it is acknowledged parts of the plan are repetitive and could be made more concise.</p> <p>The draft plan is not intending on losing</p>	<p>The Local Plan has been reviewed and updated to make it shorter and more concise, where possible. A plain-text version of the plan has also been prepared.</p>

		<p>they will be driving further away - makes no sense to me.</p> <p>The LTN hasn't worked, I live in Grove Park and for months now we have suffered the knock on impact of all these road changes and as a result have terrible traffic.</p>		<p>supermarkets but redeveloping these in more urban, mixed-use formats with supermarkets on the ground floor and other uses above. This is a standard model that has worked successfully throughout London and one which most of the big supermarkets have experience in delivering.</p> <p>The Low Traffic Neighbourhood project is not part of the draft Local Plan consultation. Further details on the Council's position on the LTN can be found on the Council's website.</p>	
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? 33 pages of pure waffle</p>	0	Disagree. The introductory section includes important background information.	The Local Plan has been reviewed and updated to make it shorter and more concise, where possible. A plain-text version of the plan has also been prepared.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? Too much housing proposed, which wouldnt go to locals who cant afford so called affordable housing. Too much zoning..not enough allowance for small areas of retail/</p>	2	Lewisham like all London Boroughs is facing a Housing Crisis and needs to build many more homes. Particularly genuinely affordable homes. The	No change.

		<p>industrial activity within a housing area. We don't all work from screens, want to be zoned to the remaining large scale retail park area or have the strength ability to cycle everywhere so depend on public transport/ cabs . cars so need accessible parking. Since the Bakerloo line extension has been kicked into the never never then surely the whole plan should be re evaluated and the numbers of housing required by the mayors plan/ central government be CHALLENGED. Some areas will be so over densely populated its creating future problems. Low Traffic Neighbourhoods divert the cars onto other routes so different places become more polluted ..they don't make pollution go away! Lewisham is a borough of villages which we all love in the round..please dont think that we want or need more and more high density housing, more and more people and all the costs that the borough will need to service in the future</p>		<p>London Plan set Lewisham a Housing Target of 1,667 new homes per year.</p> <p>Whilst the draft Local Plan is supportive of the BLE the plan is not predicated on its delivery.</p> <p>The Low Traffic Neighbourhood project is not part of the draft Local Plan consultation. Further details on the Councils position on the LTN can be found on the Council's website.</p>

Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? I don't know where to put this but this whole consultation is totally overwhelming. So much content to review. Over 20 sections with multiple documents each, many of</p>	3	The length of the draft plan reflects that it will update and consolidate 4 adopted plans into a single document.	The Local Plan has been reviewed and updated to make it shorter and more concise, where possible. A plain-text version of the plan has also been prepared.

		<p>them over 50 pages long. Who has the time and inclination to read all this?! I certainly have not. I managed to dip into a few of the areas that felt important, and read the summary documents, which by their nature are incredibly high-level and vague, so then I don't know what I am agreeing or disagreeing with.</p> <p>I realise this is an ambitious plan, for a whole borough and I get why you would present it all together, rather than consult on it in chunks where residents will struggle to connect the dots and see the bigger picture. But there must be a middle ground somewhere. I hope there will be more consultation on the specifics, and you will find other forms of getting input from residents somehow.</p>		<p>We prepared a summary version of the Local Plan to accompany the document to make the process more accessible.</p> <p>We also structured the Commonplace site by topic and area – again to aid accessibility.</p>	
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? Why are you pushing through these plans before sorting out the absolute mess you've made with the illegal road closures?</p>	3	<p>This comment appears to be referring the Low Traffic Neighbourhood project. The LTN is not part of the draft Local Plan consultation. Further details on the Council's position on the LTN can be found on the Council's website.</p>	No change.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? The plan is biased in language and proposed delivery. The mention of buildings that not in</p>	3	<p>Disagree. The Council is required by national planning policy to prepare a Local Plan that sets a</p>	No change.

		keeping with local area is opinion, unfounded, inappropriate and, therefore, biased and unprofessional. This is simply a profit making scheme. To see developments considered in areas (west sydenham) that are estate dense, with strained infrastructure and overpopulated is ridiculous.		positive framework in place managing growth and new development, whilst meeting identified local needs.	
Part 1 – Planning for Lewisham		Do you have any comments on the introductory sections of the Local Plan? I think it looks great. My questions are about how much time these improvements will take. Certainly where I live, (South of the borough) the improvements are desperately needed- *however* things like proposing a new town centre at Bell Green whilst taking away its local sports facilities seem counter intuitive and improvements should 'join the dots' I.e. plan for improved access between Home Park/ Bridge Leisure Centre/ 'new town centre' /Southend Park/ Waterlink Way. At the moment all these are fragmented and their potentials are limited due to this and the poorly designed roads at Bell Grn. When I saw the plans for this area I was really delighted. I just hope that there is the proper consultation and later the finance to see it all through	0	Support noted. The Local Plan must be demonstrably deliverable over the plan period, which is up to 2040. The council has engaged with landowners and stakeholders (including infrastructure providers) to understand their future aspirations for sites and projects and the deliverability of the proposals.	Site allocation policies amended to make clear the expected timescales of delivery on specific sites.
Part 1 – Planning for Lewisham		Do you have any comments on the introductory sections of the Local Plan? The documents haven't been properly proof-read. I found the numerous typos distracting.	0	Noted.	The document will be proof read again through the Regulation 19 process.

Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan? Far too verbose to be coherent.</p>	0	Noted.	The Local Plan has been reviewed and updated to make it shorter and more concise, where possible. A plain-text version of the plan has also been prepared.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?NO! Once again, Lewisham mention the North of the Borough but neglect it in reality. At the moment Lewisham are proud of the investment in the North of the borough but fail to mention that almost all, if not all, of that investment is in private housing that has been forcing locals out of the area as private rents have more than quadrupled in only a few short years. Additionally, Lewisham have intentionally neglected Deptford High Street by allowing the local police to ignore the groups of alcohol drinking anti-social behaviour people that gather at the junction of the High Street and Giffin Square, even during this lockdown. They crowd the paths, play loud music, swear a lot and force pedestrians to use the road as a footpath. It has got so bad in recent years that we have seen a thriving market, which was becoming one of the best in the whole of London. People travelled across the city to go to Deptford market but no longer. Most of the stallholders left because of dwindling services, drug dealing, smoking drugs publicly, with the police</p>	0	<p>The draft Local Plan is a strategic policy document that directs investment and growth in the borough.</p> <p>Significant investment has been directed to the north of the borough and will continue to do so. Previous investment in the area include the Deptford Station and DLR, Public realm improvements along the High Street and Deptford Station Square, Faircharm Creative Quarter, Deptford Lounge and public square, Tidemill Academy, Route 1 – A series of public spaces stretching from Deptford to New Cross Gate to name just a few.</p> <p>Please refer to Part 3 Section 15 Lewisham’s</p>	No change.

	<p>walking past and ignoring it. This month saw the last of the banks close so the traders, both shopkeepers and market traders have nowhere to bank. This is all for the profits of a corrupt few that are racketeering with land values. They are lowering the values for a cheap buy and then mass profing on the housing sales values. Finally, Lewisham have overconcentrated the local population and it's growing rapidly, whilst they have not improved local public transport. Lewisham Council is focused on the Bakerloo Line going to Central Lewisham via New Cross Gate when both New Cross Gate and Lewisham Centre are already adequately catered for,</p> <p><i>[Parts of this representation was removed due to derogatory language and unfounded allegations]</i></p> <p>and traders before this pandemic and it's not expected for many to survive. Lewisham have many properties (commercial) on the High Street but prefer to leave them empty rather than lease them at a reduced rent and it's the council tax payers that are footing the losses. Seriously, Lewisham can have a "local" plan but keep it local to Lewisham and let North Lewisham have it's own plan, developed by local residents and not corrupt local politicians Deptford needs to be out of Lewisham and habve it's own council, with it's own plans as Lewisham has</p>		<p>North Area for details on future proposals.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
--	---	--	---	--

		constantly failed Deptford and will continue to do so, just so those in the leafy parts of the borough can have their fresh air and peace.			
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>Lewisham is a series of distinctive neighbourhoods (villages) and this is recognised by the plan but the structure beyond Lewisham seems to rest on it being an "integral part of London". This may be true but there are more steps in the chain to the larger London area. It is important to recognise such emerging sub-regional structures as South East London CCG for the delivery of health and social care. Under that structure some important services for Lewisham residents will be delivered outside the Lewisham boundary and infrastructural changes need to recognise this if, for instance, people have to travel beyond Lewisham boundary for service/treatment. These additional structural co-dependencies need to be fully mapped and reinforced if pan-council delivery is to be facilitated.</p>	2	<p>We acknowledge that Lewisham is part of the south east region and work collaboratively with neighbouring local authorities and service providers at this level.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>Disagree. The rationale should reference the long delay, what action will be taken to mitigate the risk of further delay.</p>	2	The plan has a monitoring section set out in Part 5 which will be monitored each year and the results published in our Authority Monitoring Report.	No change.

		<p>Introductory sections should include a high-level, realistic milestones plan that sets out measurable success criteria.</p> <p>It should also set-out Lewisham's budget resource plan - people & money against key milestones & financial years</p>			
Part 1 – Planning for Lewisham		<p>Do you have any comments on the introductory sections of the Local Plan?</p> <p>No</p>	0	Noted	No change.
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>I would like to see plans that encourage the growth of more local, small businesses rather than more large chains and for even a more holistic view to what kinds of businesses it encourages to open, and more of an effort to help employ more local people at these places. New Cross Gate to New Cross, I am guessing, was once somewhere a person could come for all of their food and other shopping needs. I'm not sure that one could say the same today. I am also concerned that there is not enough consideration given to conservation areas to help preserve some of the historic views and lines of sight. I also think that there could/should be a great focus on culture in the bigger plan, taking into account the population of creative professionals and students in the area.</p>	0	<p>The draft Local Plan sets out strategic objectives around building a thriving and inclusive local economy. In addition, Part 2 Section 8 dealing with Economy and Culture sets out policies focused on Lewisham's town centres and employment areas. Further area-based policies are set out in Part 3 of the Local Plan.</p> <p>For policies on Heritage please refer to Part 2 Section 6 Heritage of the plan which sets out the approach to conserve and enhance Lewisham's heritage assets.</p>	No change.

		<p>2. Do you have any comments on the strategic objectives?</p> <p>N/A</p>			
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <ul style="list-style-type: none"> - Less intense development along the strategic corridor from Lewisham Center to Catford if it will look similar to what is currently being developed in Lewisham Center - More engagement of local people beyond some consultations which basically can be ignored. Engage people during the design phases of housing developments and the public realm. - The assumption of continued population growth might be wrong. <p>2. Do you have any comments on the strategic objectives?</p> <p>See my comment for the introductory part of the plan.</p>	0	<p>The Local Plan is legally required to be consistent with the National Planning Policy Framework and in general conformity with the London Plan.</p> <p>Lewisham like all London Boroughs is facing a Housing Crisis and needs to build many more homes. Particularly genuinely affordable homes. The London Plan set Lewisham a Housing Target of 1,667 new homes per year.</p> <p>Following the public consultation, the council liaised with the Greater London Authority for updated population projections. Whilst Brexit and Covid-19 have had short term impacts the forecast is for significant growth over the long term. The latest population projections will be</p>	Local Plan amended to refer to the latest position on population projections, which have also been used to inform ongoing work on the Infrastructure Delivery Plan.

				<p>reflected in the plan and used to inform the Infrastructure Delivery Plan.</p> <p>The consultation on the draft Local Plan was carried out in accordance with our Statement of community Involvement and goes beyond the statutory requirements.</p>	
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>N/A</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>Great to see a commitment to sustainable transport. Cars are still over-privileged in the borough, with a lack of safe pedestrian crossings, no apparent enforcement of speed limits and parking on pavements encouraged at the expense of walkers (e.g. Ennersdale Road). What about more pocket parks, car-free zones and street trees - not just in the wealthiest areas, but everywhere in Lewisham?</p>	4	Support noted	No change.
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p>	0	We appreciate that tall buildings is a divisive issue for many residents. The	Local Plan amended to include a target size mix for affordable housing, which will help to ensure

		<p>The vision for Lewisham should learn from the mistake made in the “regeneration” of the area around Lewisham station which has been rendered hideous by the over-building of architecturally dubious blocks of flats in close proximity to a railway line and without adequate infrastructure. Instead of building flats the council should focus on building affordable family homes.</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>The council needs to consult properly with residents on the objectives that they want for their area rather than only listening to the people who tell them what they want to hear.</p>	<p>London Plan makes it clear that tall buildings in appropriate locations are part of the solution to tackle the Capitals housing crisis.</p> <p>The London Plan directs the Council through the Local Plan to identify those locations that are appropriate for tall buildings and set threshold heights.</p> <p>We believe that suitable locations for tall buildings should be in accessible areas with good access to public transport, local facilities and jobs. We believe that Lewisham Town Centre is a sensible and sustainable location for high-density development.</p> <p>Within Lewisham Town Centre alone new development has delivered the following: Extension to Prendergast Vale School, River Naturalisation and</p>	<p>that affordable family homes are delivered as new housing development comes forward.</p>
--	--	---	--	---

				<p>improvements to Cornmill Gardens, The Glass Mill Leisure Centre, and Confluence Park. Future development will also include a new cinema complex, a new public square, improved transport provision, more shops and local jobs.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham? N/A</p> <p>2. Do you have any comments on the strategic objectives? The ways you intend to engage with the community is opaque. No specific</p>	0	<p>The consultation on the draft Local Plan was carried out in accordance with our Statement of community Involvement and goes beyond the statutory requirements.</p>	<p>Local Plan monitoring framework amended to include additional indicators and monitors.</p>

		<p>mechanisms are described. Whilst putting in comments to a form gives you feedback it doesn't offer a meaningful dialogue between the council and community groups. Ward councillors don't get a mention.</p> <p>What are the measures you will use to judge quality of life in Lewisham?</p> <p>A greener borough is not possible if all spare land is going to be used to meet housing targets. You do not explain how both objectives can both be met.</p>		<p>The draft Local Plan has been underpinned by a number of evidence base documents and Frameworks that have had extensive public consultation and engagement with community groups.</p> <p>We have also had a number of Local Plan sessions with Councillors throughout the process.</p> <p>Part 4 of the Local Plan includes a monitoring framework. It is acknowledged that this could be expanded upon.</p> <p>We also held 16 online meetings around policy topics and sub areas.</p>	
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>Yes maintain a strong retail presence, plus every retail building doesn't have, shouldn't have flats built above them. Why are we attempting in Lewisham and London in general to keep accommodating more and</p>	0	<p>The Local Plan sets out a positive strategy for managing future growth and development across the borough, consistent with the Good Growth policies set out in the London Plan, and the</p>	No change.

	<p>more people. Why isn't there a program to spread the load across the whole country. London is already full.</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>N/A</p>		<p>principles of sustainable development set out in national planning policy. The Local Plan is legally required to be consistent with the National Planning Policy Framework and in general conformity with the London Plan.</p> <p>Lewisham like all London Boroughs is facing a Housing Crisis and needs to build many more homes. Particularly genuinely affordable homes. The London Plan set Lewisham a Housing Target of 1,667 new homes per year.</p> <p>If the Council does not positively plan to meet its identified need then the Council will be placed in the 'presumption of sustainable development'. This means that the council will be less likely to defend against inappropriate development through the planning appeal process. We have seen in other London Boroughs refusals</p>	
--	--	--	---	--

				for development on Metropolitan Open Land for example being overturned at appeal because the Council could not demonstrate an appropriate plan for growth or past housing delivery.	
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>It is all in the detail and it can find lovely, but we know the horror of Lewisham Centre and the windy no-one friendly cavernous bank of tower blocks with local fly tipping at the bottoms. You have a photo included of a really unimaginative square in front of the Deptford Library where street drinker congregate and the historic building on Convoys Wharf which isn't looking at our interesting heritage and grasping the unique opportunity to make Deptford the heritage destination along with Greenwich. The new developer lead buildings, many of them shoddily put together aren't inclusive, the new bars and venues and bike shops have a quite specific clientele</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>They sound lovely. Dream the dream.</p>	0	Disagree with this assessment.	No change.

<p>An Open Lewisham</p>		<p>1. Is there anything you would like to see changed from the Vision for Lewisham? Inclusivity means valuing all voices, are you really doing that? Some communities I suspect feel overlooked or ignored I suspect.</p> <p>2. Do you have any comments on the strategic objectives? N/A</p>	<p>0</p>	<p>The consultation on the draft Local Plan was carried out in accordance with our Statement of community Involvement and goes beyond the statutory requirements.</p> <p>The draft Local Plan has been underpinned by a number of evidence base documents and Frameworks that have had extensive public consultation and engagement with community groups.</p> <p>We have also had a number of Local Plan sessions with Councillors throughout the process.</p> <p>Further to this the Council has also undertaken targeted consultation to reach out to 'seldom herd' groups and our BAME community.</p> <p>Further details can be found at the front end of</p>	<p>No change.</p>
-------------------------	--	---	----------	---	-------------------

				this Consultation Statement.	
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham? Please see comment on strategic objectives.</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>Policy OL1</p> <p>Criterion e. of policy outlines the identification of a new Opportunity Area at Bell Green. Paragraph 3.38 of the draft plan notes that the Bell Green and Lower Sydenham area exhibit some of the highest levels of deprivation, noting that it features a number of large sites offering significant development potential if brought forward in a strategically coordinated way.</p> <p>The designation of Opportunity Areas falls within the remit of the London Plan and cannot be designated as part of the local plan process</p>	0	The Local Plan has identified the area a Growth Node with the potential to be designated as an Opportunity Area through the London Plan review process.	Local Plan amended to clarify that new Opportunity Area will need to be designated through a future review / update of the London Plan.
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham? This is too vague and fails at the first hurdle. "Open to all" if you speak/read english and have a laptop. The high level intention is pretty, but without SMART or even just</p>	1	The vision is underpinned by a series of objectives, many of which directly relate to the corporate priorities of the Council. These objectives in turn	Local Plan monitoring framework amended to include additional indicators and monitors.

		<p>specific examples, it is hard to see if this is just hot air delivered with good intentions.</p> <p>2. Do you have any comments on the strategic objectives? All objectives need to be SMART else our expectations will not be met.</p>		<p>feed into specific policies and sub area text.</p> <p>The plan has a monitoring section set out in Part 5 which will be monitored each year and the results published in our Authority Monitoring Report. It is acknowledged that this could be expanded upon.</p>	
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham? If you remove the pretentious buzz-words, define your terms and nix focus-group-led, repetitious, meaningless sales-speak the average reader might have a chance of making sense of this throw-enough-mud-some-of-it will-stick "strategy". The net impression I get from this is that the language attempts to obfuscate the 'vision' rather than reveal it. I assume because the vision will not get support if clearly spelt out.</p> <p>2. Do you have any comments on the strategic objectives? You need to have concrete proposals if you want concrete responses. That's consultation 101. Right now, you're just wasting our time with arm waving.</p>	3	<p>Disagree. The consultation on the draft Local Plan was carried out in accordance with our adopted Statement of Community.</p>	No change.

		See LTNs as an example of "how to do it wrong, annoy half the population and discover our 'strategic goals' are not welcome"			
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>Engage in a meaningful way with residents on the boundaries of LTN's in your bid for reducing car use. as in E/11 Proper monitoring of the effects on the surrounding roads. Stop sticking to dogma and actually look seriously at the data.</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>No more blocking of roads with planters - we need better pavements/cycle lanes/ pedestrian crossings/enforced speed limits/school streets/some pedestrianised shopping areas/more cycle hangars/better street lighting/better transport/continuous pavements/copenhagen crossings/chicanes NOT planters!</p>	1	The Low Traffic Neighbourhoods project is not within the scope of the draft Local Plan consultation. The Councils position on LTNs is set out on our website.	No change.
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>Not really - it would be so cool for things to move faster though I realise that is unrealistic especially given the pandemic</p>	0	Support noted	No change.

		<p>and the current problems with meeting in real life</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>It seems very thorough in its objectives. As someone living near one of the potential areas for investment and regeneration it would be great to be included in the discussions</p>			
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>Keep things as they are and remove stop LTNs and school streets. It is causing undue stress and moving problems to other areas. You say it's successful but during a pandemic when we are all staying home gives such an unreal picture. Double cycle lane in Molesworth Street still empty</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>N/A</p>	0	The LTNs is not within the scope of the draft Local Plan consultation. The Councils position on LTNs is set out on our website.	No change.
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>Yes! I fail to see anything 'open' about Lewisham. This is because I also fail to see how building an inordinate amount of high</p>	0	The Local Plan sets out a positive strategy for managing future growth and development across the borough, consistent with the Good Growth	No change.

		<p>rise apartment buildings constitutes a way of creating a ‘community’. High rise living rarely offers residents the opportunity to know one and other. The only thing created so far, is a wind tunnel of a journey, around the station area. There is a construction site in front of the station, for twenty floors of residential accommodation, blocking the vista for those who recently purchased accommodation alongside the station and I see only this week, notice of yet another 536 residential ‘units’ being erected adjacent to the 33 storey student accommodation block and 23 floors of residential high rise already nearing completion next to Lewisham station on Loampit Vale. When will it stop? The promise of ‘genuinely affordable’ housing is unlikely to materialise. Buying a part share in something and paying rent on the remainder, is definitely not affordable. Especially if you happen to be single.</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>Yes. Please ensure you deliver the ‘timely infrastructure’ well before any more residents have to rely on it.</p>		<p>policies set out in the London Plan, and the principles of sustainable development set out in national planning policy.</p> <p>The Local Plan is legally required to be consistent with the National Planning Policy Framework and in general conformity with the London Plan. Lewisham like all London Boroughs is facing a Housing Crisis and needs to build many more homes. Particularly genuinely affordable homes. The London Plan set Lewisham a Housing Target of 1,667 new homes per year.</p> <p>The draft spatial strategy in the draft plan seeks to accommodate this growth in opportunity areas and within our town centres. We believe that locating new development in areas which have access to good public transport, local facilities and jobs is a sensible and sustainable</p>	
--	--	--	--	---	--

				<p>approach. This also helps conserve and enhance other areas of the borough that are lower density and/or our Conservation Areas.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>I'd like to see more about what the planning levers are that the council can use to support local communities. I live on a street with a strong sense pride and community, but there are a number of planning related issues that undermine or frustrate this. These include privately owned parking spaces and garages, which are poorly maintained and attract anti social behaviour; a poorly managed MOT garage on the street</p>	0	<p>For matters on anti-social behaviour please contact the relevant Council department through the Lewisham Council website.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road</p>	No change.

		<p>that creates lots of issues with traffic, speeding and anti-social behaviour; and the sale of tiny pockets of land to developers, eating up green space and light for existing residents.</p> <p>2. Do you have any comments on the strategic objectives? I'd like to see an explicit recognition of the potential role of the plan in supporting local communities and social infrastructure.</p>		<p>and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>Part 4 of the Local Plan sets out the approach to delivering the Local Plan, including by working with local communities and other stakeholders.</p>	
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham? The Covid-19 issues have raised the profile of home working. This is not going to go away and needs to be recognised in the vision as part of a way of life in the future. To support more home working we need better broadband capability; it is pathetic all across London and Lewisham should take a lead in facilitating faster development. This would require a greater emphasis on the economic aspects of the vision which, to me, seem to be less of a priority.</p> <p>2. Do you have any comments on the strategic objectives? Greater emphasis on economic development especially for small businesses.</p>	0	<p>The draft Local Plan recognises the importance of improving broadband capacity particularly to support economic development.</p> <p>The draft Local Plan part 2 policies on Economy and Culture set out approaches to supporting small and medium sized enterprises. However these will be reviewed and strengthened for clarity.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP</p>	Local Plan Economy and Culture section policies amended to clarify and strengthen support for small businesses, including start-ups and independents. This includes updates to policies on low cost and affordable workspace.

				sets out the necessary infrastructure including broadband infrastructure to accommodate the level of growth anticipated through the Local Plan.	
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham? I think you need to spell out what "An Open Lewisham" actually means. Bearing in mind that Lewisham has been closing roads for no good reason, does an Open Lewisham policy mean they will reopened? I presume not!</p> <p>2. Do you have any comments on the strategic objectives? This seems to be mainly waffle rather than concrete objectives.</p>	4	<p>The vision is underpinned by a series of objectives, many of which directly relate to the corporate priorities of the Council. These objectives in turn feed into specific policies and sub area text.</p> <p>The plan has a monitoring section set out in Part 4 which will be monitored each year and the results published in our Authority Monitoring Report.</p>	No change.
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham? I think it is over optimistic and places too much emphasis on the under privileged.</p> <p>2. Do you have any comments on the strategic objectives? Yes, it is biased against the middle classes.</p>	0	The Local Plan identifies the issues of deprivation within the borough and sets out approaches to address this. It is not clear from the comment how the Local Plan is perceived to be biased against the middle classes – no further explanation has been provided.	No change.

An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>No</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>Objectives are good - on the whole I agree with the aims and aspirations of this local plan</p> <p>Thank you for this clear and open consultation</p>	0	Support noted	No change.
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>They are all laudable objectives.</p> <p>2. Do you have any comments on the strategic objectives?</p> <p>Whether they are achievable, especially in education and housing. So many parents in my road have moved out of Lewisham when it comes to secondary education provision. Do these objectives take account of what was achieved in the previous plan?</p>	0	<p>The vision is underpinned by a series of objectives, many of which directly relate to the corporate priorities of the Council. These objectives in turn feed into specific policies and sub area text.</p> <p>The plan has a monitoring section set out in Part 4 which will be monitored each year and the results published in our Authority Monitoring Report.</p>	No change.
An Open Lewisham		<p>1. Is there anything you would like to see changed from the Vision for Lewisham?</p>	1	The detailed policy proposals are set out in the draft Local Plan. For some	No change.

		<p>Just a bit more flesh on the bones so that we can comment on actual proposals in due course.</p> <p>2. Do you have any comments on the strategic objectives? They sound promising!</p>		<p>specific areas and sites, details further details will be established through the development management process.</p>	
Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios and associated options? Select the scenario(s) and comment below Bakerloo line extension phase 1 only</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above. The plan to have reimagined growth on the New Cross Gate area is not in keeping with the conservation areas that are in close proximity.</p> <p>3. Do you feel that there are other options or matters that should be considered for the spatial strategy? Please explain. The development should be in character of the area, no high rises, with more provision for green spaces. The area lacks green spaces</p>	1	<p>The indicative capacities for the Former Hatcham Works site has been informed by the New Cross Gate Area Framework. This provides an indicative layout and massing for the site which is deemed appropriate by the Council.</p> <p>The former Hatcham Works site is a highly accessible site in a District Centre and is suitable for high-density development.</p> <p>The draft Local Plan Part 2 Heritage section includes policies dealing with heritage and conservation, including Conservation Areas, and any future development proposal will need to comply with these.</p>	No change.

Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios and associated options? Select the scenario(s) and comment below</p> <p>No Bakerloo line extension</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above.</p> <p>The Bakerloo line will add more connectivity to Lewisham which is already well connected with buses, DLR and trains. Better to invest in more local connectivity rather than connectivity to Central London.</p> <p>3. Do you feel that there are other options or matters that should be considered for the spatial strategy? Please explain.</p> <p>Build a new park alongside new houses</p>	0	<p>The Bakerloo Line Extension is a key strategic transport project set out in the London Plan. It will directly connect the borough with the tube network for the first time and provide greater accessibility. The Council strongly supports its delivery.</p> <p>The draft Local Plan Part 2 section on Green Infrastructure sets out policies to protect and enhance open and green spaces. The Part 3 site allocations include specific provisions for the creation of new open spaces at key sites, for example, at Surrey Canal Triangle and Convoys Wharf.</p>	No change.
Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios and associated options? Select the scenario(s) and comment below</p> <p>N/A</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above.</p>	1	<p>The draft Local Plan recognises the Climate Emergency and sets out clear objectives and policies around climate change adaptation and mitigation. It will help to support the Council's</p>	No change.

		<p>The language in the strategy needs to be more ambitious. The Climate Emergency needs to take the highest priority in the decision making processes.</p> <p>3. Do you feel that there are other options or matters that should be considered for the spatial strategy? Please explain.</p> <p>N/A</p>		Climate Emergency Action Plan.	
Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios and associated options? Select the scenario(s) and comment below</p> <p>Bakerloo line extension phases 1 & 2</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above.</p> <p>Other areas of the borough are well served by public transport I.e. frequent trains into Central London. The original proposed extension of the Bakerloo line will address this deficit going south into the borough</p> <p>3. Do you feel that there are other options or matters that should be considered for the spatial strategy? Please explain.</p> <p>N/A</p>	1	Support for the BLE noted.	No change.
Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios</p>	0	Support noted	No change.

		<p>and associated options? Select the scenario(s) and comment below Bakerloo line extension phases 1 & 2</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above. N/A</p> <p>3. Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios and associated options? Select the scenario(s) and comment below Bakerloo line extension phases 1 & 2 Preferred approach</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above. I think it's a good strategy. I can't believe the people would oppose the development of the Bakerloo line to Hayes. Travel times still very fast and much more frequent. It opens up development potential so much for the Borough and as I live near Bell Green I can tell you that the plans outlined for here would be so much of an improvement. Also</p>	1	Support noted	No change.

		<p>it seems that there is real will to involve the local community with the proposals.</p> <p>3. Do you feel that there are other options or matters that should be considered for the spatial strategy? Please explain.</p> <p>N/A</p>			
Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios and associated options? Select the scenario(s) and comment below Bakerloo line extension phases 1 & 2 Preferred approach</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above.</p> <p>I would support the Bakerloo line extension but would not place too much emphasis on it being delivered. There will be a big review of transport infrastructure post Covid and I would not place a bet on the extension being delivered in full or in part. Strategic developments which are based on the delivery of the extension would, I believe, be suspect.</p> <p>The green approach is appropriate and is to be applauded. It needs to go hand-in-hand with a greater emphasis on character-led growth which, by its nature, is organic and thereby sustainable. Artificial development</p>	2	<p>Support noted.</p> <p>The Local Plan is not contingent on the delivery of the BLE, however the policies will seek to secure its future delivery.</p> <p>The Council has undertaken the preparation of additional evidence base documents, including on retail demand, which takes account of the latest impacts arising as a result of Covid-19. This evidence suggests there will continue to be a need to plan for additional retail capacity in the borough, although to a lesser extent than previously forecast.</p> <p>The draft Local Plan includes policies to ensure</p>	<p>Local Plan amended to respond to changes to the Use Classes Order and flexibility for permitted changes of use for main town centre uses.</p> <p>Local Plan amended to respond to updated retail capacity study, which lower level of provision over long-term.</p>

		<p>driven simply by the need to "use" space will often only deliver short term results and redundancy.</p> <p>3. Do you feel that there are other options or matters that should be considered for the spatial strategy? Please explain.</p> <p>Greater emphasis needs to be given to re-purposing of High Street facilities which have become redundant by the move to remote retail function. The Covid position will only speed up the move from physical retail and leave more redundant shop space. On the other hand the desire to shop locally for foodstuffs in particular has driven a resurgence in the desire for open-air markets and the attractiveness of farmers markets will grow and needs to be recognised in a spacial context - the need for felxible space that can be used for different funtions every day of the week needs to be promoted.</p>		<p>that new commercial space is designed with flexible specifications so that it can be adapted to a wide variety of uses and end users over its lifetime.</p> <p>The Government have introduced a new use Class E which allows more flexibility within our town centres in terms of permitted development rights. The Local Plan will be amended to reflect this.</p>	
Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios and associated options? Select the scenario(s) and comment below</p> <p>Bakerloo line extension phases 1 & 2</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above.</p>	2	Noted.	<p>Local Plan amended with additional key spatial objectives and policies dealing with Hither Green, including area west of the station / railway.</p> <p>Local Plan amended to designate Hither Green Lane as a new Local Centre.</p>

		<p>Hither Green west of the railway overlooked yet again.</p> <p>3. Do you feel that there are other options or matters that should be considered for the spatial strategy? Please explain.</p> <p>Hither Green west of the railway has had no investment or maintenance for more than 20 years. Not even the pavements have been touched. It should be included for an upgrade.</p>			
Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios and associated options? Select the scenario(s) and comment below</p> <p>Bakerloo line extension Phases 1 & 2</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above.</p> <p>Lewisham is in desperate need of the Bakerloo line extension! I cannot believe in the year 2020, the south still has no adequate access to the underground. This will improve residents commutes and actually reduce car use and pollution. The council wants us to decrease our use of cars but without proper access to quick and reliable transportation into central /inner London why would people bother.</p>	3	Support for the BLE noted. The Local Plan is not contingent on the delivery of the BLE, however the policies will seek to secure its future delivery.	No change.

		<p>3. Do you feel that there are other options or matters that should be considered for the spatial strategy? Please explain.</p> <p>No</p>			
Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios and associated options? Select the scenario(s) and comment below</p> <p>No Bakerloo line extension</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above.</p> <p>Lewisham already has a train service from London Bridge - why do we need a Bakerloo extension?</p> <p>3. Do you feel that there are other options or matters that should be considered for the spatial strategy? Please explain.</p> <p>Something to avoid bottlenecks in Ladywell.</p>	1	<p>The Bakerloo Line Extension is a key strategic transport project set out in the London Plan. It will directly connect the borough with the tube network for the first time and provide greater accessibility. The Council strongly supports its delivery.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p>	No change.
Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios</p>	0	Support noted	No change.

		<p>and associated options? Select the scenario(s) and comment below</p> <p>Preferred approach Flexible planning underpinned by sound principles</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above.</p> <p>Glad to see some focus on Lewisham Town centre; much neglected in recent years but with huge potential given current, and future, transport links.</p> <p>3. Do you feel that there are other options or matters that should be considered for the spatial strategy? Please explain.</p> <p>N/A</p>			
Delivering an Open Lewisham		<p>1. Do you have any comments on the spatial (growth) strategy scenarios and associated options? Select the scenario(s) and comment below</p> <p>Bakerloo line extension Phases 1&2</p> <p>2. Please provide your comments on the spatial (growth) strategy scenarios selected above.</p> <p>This is a good plan.</p> <p>3. Do you feel that there are other options or matters that should be</p>		<p>Support noted.</p> <p>The Council has and will continue to lobby the Mayor of London and Transport for London for investment in new and improved public transport infrastructure, including bus services. We will pass your comments re Honor Oak on to our Transport team regarding bus services.</p>	<p>No change.</p>

		<p>considered for the spatial strategy? Please explain.</p> <p>Please can there be a bus service that doesn't require a change of bus for residents of the Honor Oak area to be able to travel easily to the Greenwich area? There are many lovely parks in Lewisham but the ones accessible with just one bus route from the Honor Oak area seem to be hilly. Lots of older and less able bodied people who live in this area would like to be able to visit Greenwich Park and the riverside areas there and in Deptford but this requires a change of buses, which lengthens the journey and makes it more cumbersome. The 185 used to go right through to Greenwich, (and even Woolwich during the rush hour), which enabled an easy journey. Also if the 63 bus route could be extended down to Honor</p> <p>Oak Park this would enable an easy trip for elderly and disabled people to Peckham Rye Park, which is nice and flat as well. Also Mayow Park is not hilly and suitable for wheelchairs and less able bodied people but dos not have a public transport route from Honor Oak Park.</p>

Lewisham Local Plan

Regulation 18 consultation statement

Appendix 3 – Regulation 18 Draft Local Plan Commonplace Responses Parts 2

September 2022

Part	Section, policy or paragraph	Respondent submission	No. of Agreements	Council officer response	Action
2	Managing Development	<p>1. Are there any other topic areas that you feel should be covered in Part 2? More emphasis on low carbon housing, e.g. passive house design, solar gain architecture, etc.</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2?</p>	2	Noted. The draft Local Plan policies on sustainable design and construction are broadly in line with the London Plan.	<p>Local Plan amended with new policy on sustainable retrofitting.</p> <p>Local Plan amended with additional details on non-regulated carbon emissions.</p>
2	Managing Development	<p>1. Are there any other topic areas that you feel should be covered in Part 2? Commercial Units which are left unused - community use for these spaces</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? N/A</p>	1	Noted. The draft Local Plan includes a policy on meanwhile uses.	Local Plan amended so that meanwhile uses policy refers not only to uses for housing but commercial uses where appropriate.
2	Managing Development	<p>1. Are there any other topic areas that you feel should be covered in Part 2? Building design should be innovative and aim to build new buildings of architectural merit.</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? The council should commit to transparency in its planning decisions. Enforcement of planning decisions should be active and be seen. There are no targets for enforcement timescales</p>	3	<p>Noted. The draft Local Plan does not preclude innovative building designs.</p> <p>Planning enforcement is outside the scope of the Local Plan.</p>	No change.
2	Managing Development	<p>1. Are there any other topic areas that you feel should be covered in Part 2? Redevelop Lee gate shopping centre - with shops and not residential homes. It's run down and attracting the wrong attention in the area</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? Redevelopment of Sainsbury's Lee green to 120 residential spaces. Not every supermarket needs to have a block of flats dumped on the top of it. Existing network infrastructure is poor where do you plan all these people will go and we are not equipped with the appropriate transport links to house all these extra residents and people. Just a way for the council to make more money from council tax.</p>	1	Noted. The draft Local Plan includes policies to enable the revitalisation of Lee Green district centre, including sites allocations for the shopping centre. The site allocation for the Sainsbury's provides for the retention of commercial uses at ground floor with residential above in order to make a more optimal use of land. The Local Plan is supported by an Infrastructure Delivery Plan which will help to ensure new development is appropriately supported by infrastructure.	No change.
	Managing Development	<p>1. Are there any other topic areas that you feel should be covered in Part 2? Yes. You cannot simply keep building, keep increasing over populated areas where the infrastructure is already too insufficient. I would really like to know what happens to the landowners that Lewisham are planning around? I am a landowner, my premises are included in the plans and yet I have been given no notice of this proposals before now so please let us know how you propose to acquire any land or work with stakeholders to avoid the obvious hostility that 'being kept in the dark' creates. Thank you</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? Yes. Please do not refer to buildings being 'not in keeping' with the landscape or area. Most of the buildings you have referred to are well maintained and are in any way detrimental to the</p>	3	<p>The public consultation was carried out in accordance with the Council's adopted Statement of Community Involvement.</p> <p>The Local Plan sets out the development strategy for the borough with land use principles for specific sites. It is not the intention that the Council acquires land. Whilst recognising it does have land holdings and will bring forward some</p>	No change.

		area. Please do not paint a picture that suits your proposals without facts and is only a biased opinion that helps no one! Stick to the facts only please		developments, the vast majority of sites will be delivered by the private sector and other public sector bodies.	
Managing Development		<p>1. Are there any other topic areas that you feel should be covered in Part 2? In the south of the borough, better bus connections to /through Bell Green /Southend Lane must be planned in. Also tasteful high-quality design</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? N/A</p>	0	Noted. The Local Plan is supported by an Infrastructure Delivery Plan which will help to ensure new development is appropriately supported by infrastructure, including for transport. The Council will continue to work with and lobby Transport for London for improvements to bus services.	No change.
Managing Development		<p>1. Are there any other topic areas that you feel should be covered in Part 2? I don't know</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? I'm just making random comments now as impossible to know which is relevant to what. How much more is there to comment on.</p>	0	Noted.	No change.
Managing Development		<p>1. Are there any other topic areas that you feel should be covered in Part 2? Ensuring new developments do not fundamentally undermine existing homes - for example by impinging right to light</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? N/A</p>	3	Noted. The draft Local Plan includes policies on amenity which address this matter.	No change.
Managing Development		<p>1. Are there any other topic areas that you feel should be covered in Part 2? Flexibility within design so that buildings and structure can be adapted easily rather than demolish and rebuild with is "ungreen" by being wasteful of energy and material resources.</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? N/A</p>	2	Noted. The draft Local Plan includes a policy on the Circular Economy which addresses these principles. However it is acknowledged that further detail could be provided on sustainable retrofitting.	Local Plan amended with new policy on sustainable retrofitting.
Managing Development		<p>1. Are there any other topic areas that you feel should be covered in Part 2? Yes - manage down any population growth in London / Lewisham - encourage people to move elsewhere in UK</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? Don't encourage development in this area -</p>	2	Noted. National planning policy requires that Lewisham has a local plan to plan positively for sustainable development and to meet identified needs, including for housing. The London Plan also sets a housing target which the Council must meet through the Local Plan. The suggestion is contrary to national policy.	No change.
Managing Development		<p>1. Are there any other topic areas that you feel should be covered in Part 2? Reduce population growth in the borough</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? Instead of more housing, restrict the demand</p>	2	Noted. National planning policy requires that Lewisham has a local plan to plan positively for sustainable development and to meet identified needs, including for housing. The London Plan also sets a housing target which the Council must meet through the Local Plan. The suggestion is contrary to national policy.	No change.
Managing Development		<p>1. Are there any other topic areas that you feel should be covered in Part 2? Further work should be done to allow residents to improve their homes and access to amenities. For example, first floor flat holders being able to install external staircases to their gardens, to replace original, old, steep and narrow internal stairs.</p>	0	Noted.	Local Plan amended with new policy on sustainable retrofitting.

		<p>2. Are there any topic areas that you feel should not be covered in Part 2? N/A</p>			
Managing Development	<p>1. Are there any other topic areas that you feel should be covered in Part 2? No</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? High quality design should be a principle that underpins all topic areas rather than a stand alone item.</p>	1	<p>Noted. The design-led approach is a principle that runs throughout the draft Local Plan. There is a specific policy on high quality design that sets this out. The plan must be read as a whole.</p>	No change.	
Managing Development	<p>1. Are there any other topic areas that you feel should be covered in Part 2? Ensuring public transport really is available for what residents actually want and can use.</p> <p>2. Are there any topic areas that you feel should not be covered in Part 2? NO</p>	2	<p>Noted. The draft Local Plan Part 2 section on Transport sets out priorities and objectives to deliver investment and improvement to public transport infrastructure and services. The Local Plan is supported by an Infrastructure Delivery Plan which will help to ensure new development is appropriately supported by infrastructure, including for transport. The Council will continue to work with and lobby Transport for London for improvements to public transport.</p>	No change.	
High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Delivering high quality Building heights Optimising site capacity</p> <p>3. Please provide your comments on the topic(s) selected above The new development in Lewisham Center is, in my opinion, a disaster: It is hostile to human well-being with its emphasis on "Optimising site capacity" and poor building design (it's in the eye of the beholder, but the two buildings closest to the railway station are just plain ugly). The area is still dominated by the busy road leading around it with pedestrians being exposed too much to it when either waiting for a bus or having to cross it to get from the shopping centre to the station. This new high-rise development was designed under similar "strict" conditions as the new plan lays out: "The building height of development must respond positively to the distinctive character of Lewisham's neighbourhoods. Building heights should be appropriate in scale, taking account of the character of a site's immediate and wider context" "Are sensitive to the site's context, ensuring that development does not excessively project above the streetscape and townscape or adversely impact on the visual amenity of it" How much can we trust these statements when whatever is proposed can be claimed to meet these requirements ? The high-rise buildings are too close reducing light and creating an oppressed feeling for pedestrians. How can they claim to be "appropriate in scale" ? I worry that something similar will happen to Catford. In my opinion the maximum height of any new building there should not exceed the current highest building. But it seems that you have</p>	0	<p>Noted. The Local Plan is required to be in general conformity with the London Plan and NPPF which requires policy to be flexible and not overly prescriptive. There is also a suit of SPDs and design guidance to support the Local Plan which provide more targeted detail.</p> <p>The Local Plan requires that new homes are of high quality but provides flexibility for the use of specific design principals (such as the type of balconies).</p> <p>The Local Plan Part 2 design section sets out requirements for tall building, in line with the London Plan.</p> <p>The London Plan directs that the Local Plan to identify locations appropriate for tall buildings and set parameters for building heights. Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.</p>	No change.	

		<p>designated Catford as another area that should be transformed from a medium height environment to a high-rise environment for reasons you state as urgent need for new housing, yet I believe more driven by the required commercial considerations.</p> <p>4. Do you think that there are other approaches that should be considered? Involve the community in the design of new developments. If the majority of the community declines a design and comes up with a more consensual one the council must consider it.</p> <p>Insist on passive house design. Required technology is now widely available. The addition cost is least significant if new builds are designed with this feature. Retrofitting is very expensive. Given that the council declared a climate emergency this should just be generally accepted.</p> <p>I wonder if the council has the strength to reject designs provided by developers if they do not meet the requirements laid out in the plan. Going by past experience of the planning of the Lewisham Gateway development (which in 2009 was a farce in my opinion and in 2017 with the "minor" amendment went almost all the developers way) the council and in particular the planning committee, that at that time also included the current mayor, does not seem to know how to get the best for Lewisham. It seems the planning officers often think that a proposed design meets the required standards with minor changes. Objectors were largely ignored. Catford seems to be in line to suffer the same fate, or expressed more eloquently in the plan "There may be locations where the prevailing heights of buildings adjoining a site and in its immediate and surrounding area may be expected to evolve over time. For instance, there are areas where the Local Plan, through the spatial strategy, provides support for the sensitive intensification of sites and areas"</p> <p>The plan states that</p> <p>"For example, some tower blocks built in the 1960s and 1970s detract from the historical townscape features within a neighbourhood, and are today considered not to make a positive contribution to local character"</p> <p>However, when these tower blocks were designed they were considered modern and progressive and any objections just displayed a backward attitude. I wonder what people in 50 years' time think about the current Gateway development or the soon to be developed Catford.</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? The recommendations of the Design Review Panel must be made public.</p>		<p>Local plan emphasise that higher density does not imply that tall buildings are necessary. Higher density can be delivered through a wide range of site layouts and building typologies, including mid-rise developments that are reminiscent of historic mansion blocks but with modern specifications.</p> <p>Design Review Panel reports can be requested through public access requests and are usually made public at committee stage.</p>
High Quality Design		<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Infill, backland, garden sites</p> <p>3. Please provide your comments on the topic(s) selected above Policy DQ11 fails to accord London Plan Policy H2 (Small Sites) and potentially provides tension with the Policy HO2 (Optimising the use of small housing sites) of the emerging Lewisham Local Plan.</p>	<p>0</p> <p>Disagree. The Local plan does take a positive approach to planning for small sites and identifies a number of site typologies suitable for this type of development</p> <p>Small Sites guidance has been prepared to support local plan</p> <p>However a balance must be struck on small site development and meeting housing need and other local plan objectives, including for green space</p>	<p>Local Plan amended to reflect that the character of areas can evolve over time.</p>

		<p>The London Plan notes that “increasing the rate of housing delivery from small sites is a strategic priority” and calls for “positive and proactive planning” by boroughs to realise this (para 4.2.1). In order to achieve this, Policy H2 of the London Plan requires boroughs to “recognise in their Development Plans that local character evolves over time and will need to change in appropriate locations to accommodate additional housing on small sites”.</p> <p>It, therefore, seems in conflict with the London Plan that the draft Local Plan specifically singles out gardens in perimeter blocks urban typologies as normally being unacceptable for development. This broad-brush approach neither acknowledges that “local character evolves” nor that areas “will need to change” to accommodate housing on small sites.</p> <p>If a perimeter block was considered to have heritage value, then it would be designated as part of a conservation area or area of special local character. There are appropriate policy tests in the emerging Lewisham Plan (and elsewhere) that protect heritage assets, and others that properly protect residential amenity. Elsewhere, there are other policies that promote good design and urban design. Thus, the special treatment of development proposals in perimeter block locations – which might be acceptable in all other respects – seems unnecessary, unreasonable and contrary to the London Plan.</p> <p>Furthermore, the description of garden land that is provided at paragraph 5.81 includes any private amenity space that was “originally designed” for that purpose. However, the character and, indeed, use of garden land could well have evolved materially over time since its original design and, as currently drafted, the Plan does not allow for such circumstances. Unless there is a heritage argument to the contrary (which would be covered elsewhere in the Plan), development proposals should be judged within a current, lawful context. Reference to the original design of a garden in the supporting text is, therefore, unreasonable and contrary the London Plan’s requirement that boroughs acknowledge that character evolves.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Overall, the policy tests set out in QD11 and supporting text provide an adequate basis to assess the acceptability or otherwise of development proposals in infill, backland, garden and amenity areas, without the need for singling out perimeter block locations. Moreover, the Characterisation Study provides an urban design baseline position to inform future development proposals.</p> <p>Therefore, the following sentence can be deleted without weakening the aims and objectives of Policy QD11: “This includes the development of back gardens for separate dwellings in perimeter forms of housing.” Similarly, those parts of paragraphs 5.91 and 5.92 that refer to perimeter block urban typologies / forms of housing should be removed.</p> <p>Additionally, for reasons given above we recommend that “as originally designed” be deleted from the description of garden land in paragraph 5.81</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan?</p> <p>N/A</p>		<p>and character and therefore not supportive of garden land development in perimeter blocks.</p> <p>The Local Plan will be amended to reflect that the character of areas can evolve over time, in line with the London Plan, although the principles in the policy in terms of gardens and perimeter blocks will remain. The Council considers there is sufficient evidence to support this approach.</p>	
	High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? Building to Human Scale</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Building heights Delivering high quality design Public realm</p>	0	Noted. The Local Plan Part 2 design section sets out requirements for high quality design to ensure all new development should put people at the centre of the design-led approach, ensuring buildings and spaces are welcoming, inclusive, safe and accessible to all and that proposals	Local Plan amended to include new additional point on design building to a human scale.

		<p>3. Please provide your comments on the topic(s) selected above I would like to see building to human scale integrated into Lewisham's design guidance</p> <p>Good examples of the wording that can be used are found in Bexley councils residential design guide:</p> <p>"The use within a development of elements which relate well in size to an individual human being and their assembly in a way which makes people feel comfortable rather than overwhelmed."</p> <p>"The impression given by a building when seen in relation to its surroundings, particularly as experienced in relation to the size of a person"</p> <p>'The visual scale and massing of development can be reduced through the use of a variety of materials and features on building facades, a change in storey height and the articulation of corners that have a relationship with the street and a 'human scale'.</p> <p>4. Do you think that there are other approaches that should be considered? Related to human scale is height</p> <p>Particularly for areas not deemed appropriate for tall buildings in Lewisham's Local Plan I would like to see the Local Plan use wording used in Hounslow's Great Western Corridor's Masterplan and Capacity Study:</p> <p>"Where the height differential between areas with different height approaches is more than two storeys, the abrupt change in height creates an imbalance and breaks the coherence of the urban fabric".</p> <p>"Higher development may feel domineering and undermine the integrity of buildings with lower height".</p> <p>"Generally heights should overcome strong height differentials through the stepping down of development at the interface with public realm".</p> <p>"Buildings may have one or two set-back storeys behind the main frontage. Due to their limited visibility from the street space set-back storeys have little impact on the perceived building height or enclosure of the street space".</p> <p>"The higher a building, the greater will be its propensity for harm, fuelled by developer ambition rather than any genuine pressing economic, regenerative or environmental driver".</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>		<p>should demonstrate an understanding of how people engage with and experience their surroundings, and respond positively to this by delivering healthy, liveable and walkable neighbourhoods.</p>
High Quality Design		<p>1. Are there other issues around design quality that the Local Plan should address? Standards in conservation areas and around listed buildings should be higher. The definition of quality is missing. Views of areas of special character (as well as from) should be considered valuable</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Delivering high quality design Building heights Optimising site capacity Amenity and agent of change</p>	<p>0</p> <p>Noted. The Local Plan is required to be in general conformity with the London Plan and NPPF which requires policy to be flexible and not overly prescriptive. There is also a suite of SPDs and design guidance to support the Local Plan which provide more targeted detail.</p> <p>The London Plan directs that the Local Plan to identify locations appropriate</p>	<p>No change.</p>

	<p>External lighting Infill, backland, garden sites Alterations and extensions</p> <p>3. Please provide your comments on the topic(s) selected above Quality of design is highly subjective. Often meeting the basic planning regulations is deemed quality, when there is nothing aspirational about the design of new buildings. Many opportunities have been missed due to a lack of ambition in the local plan, beyond building something and maximising density at all costs.</p> <p>The aspirational statements made in the plan are vague and not backed up by commitments to hold developers to account - enhancements must be delivered to the wider area when large developments are built. Which aspects of proposals will be under the spot light and how will the council collaborate with developers? Councils do have the power to influence if there is a will to do so, this will enhance Lewisham in the long run. Just ok should not be good enough.</p> <p>4. Do you think that there are other approaches that should be considered? The design review panel should be used more extensively and their comments should be more visible. This is would provide more egalitarian outcomes and better developments.</p> <p>The definition of what is quality housing, seems to fall back on what meets the basic housing regulation requirements. Opportunities to build something truly life-enhancing that becomes an asset to the wider community are therefore missed. The lack of ambition to incorporate resident's ideas and fully understand how buildings, amenities, access routes etc are used, means that design quality is only assessed through the lense of architects and planners with limited knowledge of a place. Residents have a valuable perspective and the 'extensive consultations' are not independently run and invariably seek to steer the result towards a pre-determined outcome.</p> <p>Other local authorities and housing associations have embraced a workshop and design-led approach to engage communities and foster a sense of ownership. There is extensive research on this showing that fantastic outcomes can be achieved, a sense of ownership results in a better place to live for everyone. The benefits include a better quality of life, better mental and physical health etc. These goals are not given enough (if any) weighting when assessing quality.</p> <p>The notion of negotiation is missing in the mindset of the council and the developers. Rather, residents views are deemed to be ill-informed at best, more often dismissed off-hand. This does not build strong communities and the resulting legacy will be rather grim to look at and live with in decades to come.</p> <p>The definition of tall buildings as over 30m means that other developments which are significantly higher than their surrounds but not 30m tall, will escape the necessary scrutiny. This is very concerning considering the drive for densification. There is a responsibility that comes with building very large developments, the proposals do not hold developers to a high enough standard for enhancing an area. This is a huge missed opportunity, when the developers stand to gain so much, very little is being asked of them in return.</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan?</p>	<p>for tall buildings and set parameters for building heights. Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.</p> <p>Local plan emphasise that higher density does not imply that tall buildings are necessary. Higher density can be delivered through a wide range of site layouts and building typologies, including mid-rise developments that are reminiscent of historic mansion blocks but with modern specifications.</p> <p>An Infrastructure Delivery Plan has been prepared alongside the Local Plan. This sets out infrastructure required to support the growth planned in the borough. Part 4 of the Local Plan sets out how new development must contribute to securing the delivery of infrastructure.</p>	
--	--	---	--

		What does the definition an effective consultation and how is this measured? Without independent facilitation, proper documentation, transparency, ballots etc it is not clear how this can be achieved.			
	High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Public realm</p> <p>3. Please provide your comments on the topic(s) selected above Public realm has to provide space for pedestrians keep them safe and protect them from pollution. The plan needs a strategy for pedestrians. Journeys on foot outnumber journeys made by other means but they never get the attention they deserve. The council should be asking what makes it nice to walk down a street and improve streets so they are all nice.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>	1	Noted. Local Plan part 2 Transport sections supported by The Manual for Streets following these principals. Part 2 Public Realm policy and Part 2 transport policies dealing with Healthy Streets Principles and this issue should be addressed in the Design and Access statement submitted by the applicant, and will need to address requirements of QD3 public realm.	No change.
	High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Delivering high quality design External lighting</p> <p>3. Please provide your comments on the topic(s) selected above Building Energy Policies need strengthening and targets for improvements over current developments need to be far higher to meet the Governments longer range targets NOW... so that we are not putting up building that will require retro-fitting in the not too distant future. Development designs need to take into account the whole-life energy costs of their materials. Street lighting MUST take into account 'on pavement parking (where permitted). Currently, some streets that have their lighting only on one side (because it was 'easier' for the installer) leave the opposite pavement in the shadow of continuous lines of parked cars. Also, allowing street lighting posts to be up to a metre from the pavement has allowed some pavement to become inaccessible for wheel chairs and buggy (etc. users) - especially on days where rubbish and recycling bins are out for collections.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>	0	The Regulation 18 Local Plan document includes policies on sustainable retrofitting of existing building stock. However it is accepted that the plan can provide more emphasis and support for this.	Local Plan amended with additional policy to emphasise the importance of sustainable retrofitting of existing building stock.
	High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p>	2	Noted. An Infrastructure Delivery Plan has been prepared alongside the Local Plan. This sets out infrastructure	No change.

		<p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Delivering high quality design Inclusive and safe design Building heights</p> <p>3. Please provide your comments on the topic(s) selected above The developments in Lewisham town centre are design wise abject failures, some of the most unattractive developments with no cohesive approach to design of the individual schemes as a whole. Little public amenity has been gained from these developments but there is and will continue to be massive pressure on public services and infrastructure</p> <p>4. Do you think that there are other approaches that should be considered? More houses rather than flats, families need houses and gardens not high rise buildings. High rises destroy local character and communities.</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>		<p>required to support the growth planned in the borough. Part 4 of the Local Plan sets out how new development must contribute to securing the delivery of infrastructure where appropriate by CIL and Planning Obligations.</p>	
High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? Some would appear to be mutually exclusive e.g density of build may require great height. This is not popular, results in poor design, dominates local communities excludes light, air and traps pollution.s,</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above See the above.</p> <p>Increasing numbers of people impact the areas in many ways, noise, lighting, public realm, local amenities - schools, health care, open spaces, the natural environment.</p> <p>Has the council, or anyone in authority noticed the comments by the OBR in the government's most recent budget concerning the decline in population, which may be verified by the Census 2021?</p> <p>Density of population was one of the factors involved in the spread of Covid 19 in certain areas.</p> <p>4. Do you think that there are other approaches that should be considered? The London Plan was so long in the making and acceptance that many of issues extant 5 years ago may no longer be relevant. Government of any kind is all too often behind the curve, yesterday's people.</p> <p>If standing on Blackheath is any guide, more and more tower blocks are visible and encroaching on the open space and sky, from every angle.</p> <p>Is such an issue, impact from a distance, ever considered?</p>	3	<p>Noted. Local plan emphasise that higher density does not imply that tall buildings are necessary. Higher density can be delivered through a wide range of site layouts and building typologies, including mid-rise developments that are reminiscent of historic mansion blocks but with modern specifications.</p> <p>An Infrastructure Delivery Plan has been prepared alongside the Local Plan. This sets out infrastructure required to support the growth planned in the borough. Part 4 of the Local Plan sets out how new development must contribute to securing the delivery of infrastructure.</p>	No change.	

		<p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? Agreed, high quality design is very much required, but where are the examples of it? They are certainly not in the tower blocks in central Lewisham or Catford</p>			
High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Building heights Public Realm Delivering high quality design</p> <p>3. Please provide your comments on the topic(s) selected above The towers in the Gateway development are too tall and very ugly. It was a missed opportunity to integrate cycling infrastructure. There are not enough green spaces around the blocks for people in the new developments to use</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>	2	Noted.	No change.	
High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above There seems to be a big disconnect between the plan aspirations and what is currently happening with development in Lewisham and Catford. Do we have to wait decades for any requirements for developers to consider the design and quality of buildings and their surroundings? As others have said, the tower blocks in central Lewisham and the big estate at Catford Bridge are unnecessarily ugly and don't seem to comply with any of the aspirations set out in the plan. Please can you start considering design issues NOW not wait for a new plan to be agreed at some point in the future?</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>	2	Noted.	No change.

Select the topic(s) and comment below</p>	2	<p>Noted.</p> <p>The Local Plan is required to be in general conformity with the London Plan and NPPF which requires policy</p>	No change.	

		<p>Building heights Public realm Delivering high quality design</p> <p>3. Please provide your comments on the topic(s) selected above</p> <p>Overall: The plan and its principles seem quite vague. "Contribute positively to local character" and "ensure density is right for location" - what does that even mean? It's very open to interpretation and will likely be twisted to suit developers whose main objective will be to make a profit. I would have liked to see more stringent guidelines (although I admit I haven't read the detailed 69 page (!!)) document - who has time for that?!</p> <p>Building heights: You've "considered" setting limits of heights of buildings, but haven't decided to do so (I guess? it's not clear from the summary document). The new set of buildings in central Lewisham have gone way beyond what feels suitable for the location, every new one that goes up is higher than the last. I don't have a problem with some high rise blocks, but what is being created now is not at all in proportion to the area. Why can't they all be around 20 stories, no more, rather than this weird looking set of Lego buildings where every single one is different and it's not at all cohesive. It looks like a bunch of kids had a 'who can build the largest tower' competition.</p> <p>Public realm: Rules should be much stricter to make sure the ground floor of new buildings is actually utilised. For example for cycle storage, communal spaces (benches, communal resident-run libraries, play areas) and things like click-and-collect lockers for all the online shopping that everyone will be doing. Not just retail, which always takes ages to arrive, or never does, leaving the ground floor unoccupied and drab.</p> <p>We also need more public usable, green spaces for residents who live in flats. A really bad example is the space in front of the Premier Inn hotel near Lewisham station. It has potential to be a bit of a public space for lingering, maybe sitting down to meet a friend for a coffee, waiting for someone to arrive at the station. Instead the planters are neglected, no benches, and the phone line cable boxes are right in the middle of the space, making it a pain to navigate. Attention to detail needs to be given to those kind of mini spaces to make them usable, keep them clean and tidy, and not let them immediately deteriorate which is what seems to be happening.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>		<p>to be flexible and not overly prescriptive. There is also a suit of SPDs and design guidance to support the Local Plan which provide more targeted detail.</p> <p>The London Plan directs that the Local Plan to identify locations appropriate for tall buildings and set parameters for building heights. Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.</p> <p>Local plan emphasise that higher density does not imply that tall buildings are necessary. Higher density can be delivered through a wide range of site layouts and building typologies, including mid-rise developments that are reminiscent of historic mansion blocks but with modern specifications.</p> <p>Comments supported by Local Plan part 2 Design – Public Realm and connecting places policy and Amenity and agent of change policy.</p>
	High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below</p> <p>Building heights View management Noise and vibration External lighting Alterations and extensions</p> <p>3. Please provide your comments on the topic(s) selected above</p>	3	<p>Noted. These matters are broadly dealt with by Local Plan part 2 Design policies dealing with amenity.</p> <p>Local Plan housing design policies amended to refer to new Building Research Establishment good practice guidance on daylight and sunlight.</p>

		<p>To limit noise and light pollution trees between developments and blocks should be kept/introduced and maintained to aid this & serve as a natural barrier. Building blocks should not be dramatically higher than the trees surrounding them.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>			
High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? The Local Plan would strongly benefit from the inclusion of Secured By Design</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Delivering high quality design Inclusive and safe design Public realm External lighting</p> <p>3. Please provide your comments on the topic(s) selected above I welcome the new plan and the vision it seeks to achieve. Social cohesion is much more likely to occur when residents feel safe within their own environments. To that end, I recommend that within the Local Plan, Secured By Design is adopted with regards to delivering high quality design, inclusive and safe design, public realm and external lighting.</p> <p>By the Local Authority ensuring that developers and architects work with Metropolitan police, Designing Out Crime Officers who will ensure that developments are safer, secure and that standards are adopted that are known to reduce the likely hood of crime. Independent studies have shown that adopting Secured By Design measures can lower crime by 87%. The use of third party tested and accredited, security doors and windows means that residents are less likely to be victims of burglary. Other methods, such as 'air lock lobbies' within residential flats, have a positive effect on reducing Anti-Social Behaviour which can have a serious impact on residents' quality of life. Designing Out Crime Officers using Secured By Design principles will look at all aspects of a proposal to make sure that residents, visitors or any other person within Lewisham feel safer within the built environment, both during the day or the hours of darkness.</p> <p>By reducing instances of crime and Anti-Social Behaviour the Local Authority and the local police save money which allows them to dedicate resources where they are needed, in turn it allows communities to thrive and grow.</p> <p>By reducing instances of criminal damage, arson and graffiti, the local authority saves money on replacing broken doors, repairing fire damage and cleansing services.</p> <p>There are many more benefits to adopting Secured By Design and I respectfully ask the Local Authority to note the experience gained by the UK police service over the past 30 years in this specific subject area. That experience has led to the provision of a physical security requirement considered to be more consistent than that set out within Approved Document Q of the Building Regulations (England); specifically the recognition of products that have been tested to the relevant security standards but crucially are also fully certificated by an independent third party, accredited by UKAS (Notified Body). This provides assurance that products have been produced under a controlled manufacturing environment in accordance</p>	1	Noted. Local Plan part 2 states that we will strongly encourage the use of 'Secured by Design' principles.	No change.	

		<p>with the specifiers aims and minimises misrepresentation of the products by unscrupulous manufacturers/suppliers and leads to the delivery, on site, of a more secure product. For a complete explanation of certified products please refer to the Secured by Design guidance documents which can be found on the website www.securedbydesign.com</p> <p>4. Do you think that there are other approaches that should be considered? Only Secured By Design, using highly trained Designing Out Crime Officers specifies the standards required to lower instances of crime.</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? High quality design is undermined if it allows criminal activity to flourish.</p>			
	High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above The tower blocks are making me so depressed. Did you learn nothing from the Ferrier Estate?</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>	1	<p>Noted. The London Plan directs that the Local Plan to identify locations appropriate for tall buildings and set parameters for building heights.</p> <p>Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.</p>	Local Plan building heights policy amended in line with Tall Buildings Study Addendum.
	High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Delivering high quality design Building heights</p> <p>3. Please provide your comments on the topic(s) selected above Lewisham's design track record over the last 20 years has been abysmal. In particular, the centre of Lewisham, which was always pretty unattractive, has been totally obliterated by recent developments, particularly the inappropriate and disfiguring high rise blocks. I have no problem with high-rise in general, but it needs to be appropriate in design, appropriately located, and assured of its fitness for purpose</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>	4	<p>Noted. The London Plan directs that the Local Plan to identify locations appropriate for tall buildings and set parameters for building heights.</p> <p>Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.</p>	Local Plan building heights policy amended in line with Tall Buildings Study Addendum.
	High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p>	4	<p>Noted. The London Plan directs that the Local Plan to identify locations</p>	No change.

		<p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below</p> <p>Public realm Delivering high quality design Building heights</p> <p>3. Please provide your comments on the topic(s) selected above</p> <p>Delivering higher density does not necessarily require tall buildings. Higher density housing should be designed for the human scale, encouraging a sense of community and ownership - tall buildings generally lack a sense of social cohesion and in most cases are ill-suited to suburban areas such as Lewisham.</p> <p>Similarly, new developments should be designed from the ground up, especially at strategic regeneration sites where the public realm is critical to the long-term success of a scheme. Generous open space which has equality of access for all occupants and visitors alike, should be at the heart of all major development schemes</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan?</p> <p>N/A</p>		<p>appropriate for tall buildings and set parameters for building heights. Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.</p> <p>Local plan emphasise that higher density does not imply that tall buildings are necessary. Higher density can be delivered through a wide range of site layouts and building typologies, including mid-rise developments that are reminiscent of historic mansion blocks but with modern specifications.</p>	
High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below</p> <p>Shopfronts Outdoor advertisements</p> <p>3. Please provide your comments on the topic(s) selected above</p> <p>Definitely the shopfront, signages, adverts must be improved across the borough, not just in conservation area. Cheap, brightly coloured, low quality design shopfronts and signage are an eye sore and make the area look cheap and run down. The council already have rules, though, regards what is expected from shop design, why isn't it already enforced?</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan?</p> <p>N/A</p>	3	<p>Noted. This matter is addressed by Local Plan Part 2 design policy on Shop fronts.</p>	No change.	
High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address?</p> <p>Improving the character of neglected streets</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below</p> <p>Public realm</p> <p>3. Please provide your comments on the topic(s) selected above</p>	2	<p>Noted. This matter is largely addressed by the Local Plan Part 2 design policy on Public Realm and connecting places.</p> <p>The Local Plan includes a policy on housing estate maintenance, renewal and regeneration.</p>	No change.	

		<p>Some of the housing estates built intra-war are looking tired; roads, pavements, and street furniture wasn't built to last as long as it now has. improvements to these estates would improve the quality of life and safety of residents who live in them and others who pass through them to green spaces</p> <p>4. Do you think that there are other approaches that should be considered? yes, not just focusing on parks and town centres</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>			
High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? Permitting use of existing land</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Alterations and extensions</p> <p>3. Please provide your comments on the topic(s) selected above Alterations to allow safe use of existing amenity should be supported. For example where original features include unsafe internal stairs to reach a garden, the council should support safe external versions being out in place.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>	0	Noted. This matter is addressed by Local Plan Part 2 design policy on Building alterations, extensions and basement development.	No change.	
High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? Scale of buildings.</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Building heights View management</p> <p>3. Please provide your comments on the topic(s) selected above New flats in Lewisham are too tall. They are impacting negatively on both view and a sense of well-being - they are threatening and creating a negative landscape/atmosphere. Lewisham is starting to look like a down market version of Croydon. Much more thought need to be given to the human scale of any development.</p> <p>4. Do you think that there are other approaches that should be considered? Scale is an issue that does not seem to play into the context of development in any meaningful manner and should be given greater consideration</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? Shop fronts and signage need to be more in keeping with the location.</p>	4	<p>Noted. The London Plan directs that the Local Plan to identify locations appropriate for tall buildings and set parameters for building heights.</p> <p>Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.</p> <p>Local plan emphasise that higher density does not imply that tall buildings are necessary. Higher density can be delivered through a wide range of site layouts and building typologies, including mid-rise developments that are reminiscent of historic mansion blocks but with modern specifications.</p>	Local Plan building heights policy amended in line with Tall Buildings Study Addendum.	

	High Quality Design	<p>1. Are there other issues around design quality that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to design quality? Select the topic(s) and comment below Delivering high quality design</p> <p>3. Please provide your comments on the topic(s) selected above The recent development around Catford Bridge Station/Doggett Road looks like a prison - VERY ugly, you could have insisted on better design - way too many plain brick walls, unrelieved by windows and/or 'living walls' and/or design features (texture/depth etc.)</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'High Quality Design' section of the Local Plan? N/A</p>	1	Noted.	No change.
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic Environment</p> <p>3. Please provide your comments on the topic(s) selected above I predict that this statement "Any harm should be clearly and convincingly justified, and will be weighed against the public benefit of the proposal." will be abused to justify any harm towards historic sites.</p> <p>4. Do you think that there are other approaches that should be considered? Ask the community if a historic site is in danger of being harmed if they have any objections, and if they do, reject the planned damage.</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>	2	<p>Noted. The approaches to managing heritage assets and historic environment are considered to be consistent with national planning policy.</p> <p>The Statement of Community Involvement sets out how the public will be consulted during the planning process, including on planning applications.</p>	No change.
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? The allocation and weight attributed to ASLC's should be further considered - as they risk becoming informal local conservation areas without appropriate consideration</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Non-designated heritage sites</p> <p>3. Please provide your comments on the topic(s) selected above Unlike designated Conservation Areas, that have been fully assessed, tested and formally adopted by the Council, the identification of the proposed list of Areas of Special Local Character does not appear to have gone through similar robust assessment and consideration. Whilst this might not apply to all LSLC allocations, I draw attention to the</p>	1	Noted	Explanatory text on ASLC's has been amended to provide further clarity.

		<p>Sydenham Extension ASLC - which takes in much of the run down Kirkdale High Street and extensive Willow Way employment area to the rear. This area does not appear to have been assessed and found appropriate for allocation as a non-designated heritage asset under the Lewisham Characteristic Study - requiring further reasoning for its identification as a potential ASLC.</p> <p>Given the desire to see the Willow Way employment area kick start and support the wider regeneration of the Kirkdale High Street area, it may be better to simply encourage high quality design and regeneration proposals through the relevant Site Allocation section of the draft LP.</p> <p>4. Do you think that there are other approaches that should be considered? The ASLC areas might best be referred to within the Local Plan, but subject to further formal identification and testing before future 'adoption' as supplementary guidance</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>			
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Enhanced powers to protect the heritage architecture, communities and conservation areas which are being rapidly overwhelmed and watered down and lost in the rush for new development which often does not enhance or at worst damages our heritage assets.</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Enabling development Designated heritage assets Lewisham's historic environment</p> <p>3. Please provide your comments on the topic(s) selected above The Council needs to be seen to pursue best practice by conserving and supporting the restoration of historical neighbourhoods and assets. Lewisham should STRENGTHEN protections and stand firmly AGAINST developers who damage the fabric of our historical streetscapes and neighbourhoods and conservation areas and should only allow sensitive development which is aesthetically in keeping with our Victorian heritage--which is why most Lewisham residents choose to live here .</p> <p>4. Do you think that there are other approaches that should be considered? Development should only be approved where it is aesthetically sympathetic to nearby communities and design is strongly influenced by the historic buildings and communities in the proximity. The Conservation Societies which help to maintain standards for the boroughs should be funded for their extensive work supporting the Council and our communities. Planning proposals which are clearly infringing development rules (e.g 40 metre telecommunications in Conservation Areas) should be rejected outright by Council and not be put out to consideration causing huge amounts of stress and work for locals who have to then mobilize to try to fight to have them. Enforcement action by Council should be massively ramped up, so that alterations etc (both with and without planning permission) which break codes and break down the heritage aesthetic in or near Conservation Areas are looked for, found, and dealt with strictly and original features etc RESTORED to protect what makes Lewisham a place we want to live.</p>	3	<p>Disagree. The approaches to managing heritage assets and historic environment are considered to be consistent with national planning policy. The policies have been prepared with input from Historic England and Greater London Authority Archaeological Advisory Service.</p> <p>The draft Local Plan recognises the importance of preserving and enhancing the significance of historic high streets. Further details are set out in Part 3 of the plan, for the area based policies.</p> <p>Planning enforcement is outside the scope of the Local Plan.</p> <p>Whilst acknowledging the important contribution local community groups make to support the Planning Service, funding for organisations and societies is outside the scope of the Local Plan.</p>	No change.

		<p>Historic high streets - especially in places like New Cross Gate should be retained and redevelopments only allowed which add to them in ways which celebrate them architecturally and enhance them in the same, hamonious style</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? Gives free reign to developers. Waters down the protections of the Conservation Areas. Does not commit the Council to even uphold the protections in place in conservation areas when in fact these protections should be strengthened and enhanced and their scope expanded.</p>			
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Enforcement</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above There should be better policing of development policies. There is too much evidence of infringements which are not enforced</p> <p>4. Do you think that there are other approaches that should be considered? There should be more people in the relevant teams so that the council can actually enforce their existing policies</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? The council itself should stick to their own rules in conservation areas.</p>	1	<p>Planning enforcement is outside the scope of the Local Plan.</p> <p>Planning Service resources are outside the scope of the Local Plan.</p>	No change.
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? I would like to see more specific language used so that the plan can less easily be circumvented</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic environment</p> <p>3. Please provide your comments on the topic(s) selected above I would like to see more specific language used around heritage to show that Lewisham holds a strong stance on this</p> <p>A good example is Hounslow's 2019 Great Western Corridor Masterplan and Capacity Study, here are some excerpts</p> <p>"The approach is to promote mid-rise buildings rather than very tall buildings, as they will be better able to avoid or limit harm to heritage assets".</p> <p>"There will be occasions where a tall or bulky development of a certain scale is simply unacceptable due to the potentially destructive effects on the setting of heritage assets".</p> <p>4. Do you think that there are other approaches that should be considered? Historic England's Note 4 on tall buildings wording would also be a good model to include in the Local Plan</p>	3	<p>Noted.</p> <p>Following the Regulation 18 consultation the council has undertaken additional work on the Tall Buildings Study. This has informed the revised local plan approach on building heights.</p>	<p>Local Plan amended with more authoritative language where appropriate (e.g. development proposals 'must' instead of 'should' or 'will be expected to').</p> <p>The building heights policy has been amended and is underpinned by further work in the Tall Buildings Study.</p>

		<p>"There will be some locations where the existing qualities of a place are so distinctive or sensitive that new tall buildings will cause harm regardless of the perceived quality of the design"</p> <p>"conservation area appraisals identify areas of increased sensitivity to tall buildings"</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>			
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Preservation of the Great North Wood and in particular the green area between the Telecom Mast in Horniman Drive and Havelock House.</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic environment Designated heritage assets</p> <p>3. Please provide your comments on the topic(s) selected above The proposal to build housing units on the green area between the Telecom Site in Horniman Drive and Havelock House in Horniman Drive is unacceptable. The 15 mature oak trees are a remnant of The Great North Wood,. These trees and the others are essential for a number of reasons .Building on this site would threaten them and the wildlife which is found here. We have learned from the pandemic that we should preserve and respect nature.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>	0	<p>Noted. The draft Local Plan Part 3 sub-area policies recognise the contribution the remnants of the Great North Wood make to local character and distinctiveness.</p>	<p>Havelock House site allocation removed from the Local Plan.</p>	
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Avoid building new unsightly towers!</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic environment Designated heritage assets</p> <p>3. Please provide your comments on the topic(s) selected above Look at the three red tower blocks on the A21 - at one time, those were considered the height of modern architecture and now, they are eyesores. Please do not continue to make the same mistakes - keep new builds low which will preserve the beauty of the area longer term!</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>	2	<p>Noted. The London Plan makes clear that tall buildings will play a part addressing housing needs across London. It directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study.</p> <p>Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>	
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? The local plan should be clearer that development of back gardens in conservation areas will not be permitted - at the moment this is ambiguous</p>	2	<p>Noted. The draft Local Plan policy includes a policy dealing specifically with back gardens. This must be considered together with the local</p>	<p>No change.</p>	

		<p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above N/A</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>		<p>plan policies on heritage, including those covering Conservation Areas.</p> <p>A blanket restriction on development in back gardens cannot be imposed as there are permitted development rights which enable some developments without the need for planning consent.</p>	
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Enforcement for heritage buildings and areas must protect before damage takes place.</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Non-designated heritage assets</p> <p>3. Please provide your comments on the topic(s) selected above New developments must reflect the heritage of the area and there should be no more glass and steel high rises that are completely out of character.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>	2	<p>Planning enforcement is outside the scope of the Local Plan.</p> <p>The draft Local Plan sets out that all development proposals must follow the design-led approach and demonstrate how they will respond positively to local and historic character.</p> <p>The suggestion to impose a blanket restriction on glass and steel buildings is overly prescriptive in terms of use of materials and not consistent with national planning policy. Modern buildings and materials can be sensitively integrated into existing areas. This will be considered on a case-by-case basis through the development approvals process.</p>	No change.	
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Some genuine protection for conservation areas and an appreciation for how buildings interact. Selective application of policy remains a risk.</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic environment Designated heritage assets Enabling development Non-designated heritage assets</p> <p>3. Please provide your comments on the topic(s) selected above The wording in the plan provides a loophole allowing the council to approve any damage to heritage assets that is 'justifiable' or provide 'public benefit'. This then overrides all of the protections outlined in the plan. No explanation of how the public benefit will be assessed or the transparency requirements for this decision making process.</p> <p>The protection of heritage assets needs to be consistent in order to be credible. Many of the conservation area descriptions are old and do not include all the valuable aspects.</p>	3	<p>The policies within the Local Plan provide a robust framework to preserve and enhance our heritage assets and are in line with national and regional policy and guidance.</p>	No change.	

		<p>There cohesive design of areas is not valued or mentioned, this results in incongruous designs being approved.</p> <p>4. Do you think that there are other approaches that should be considered? The protection of heritage assets needs to be consistent in order to be credible. Planning decisions need a very high level of transparency from both the council and the applicant. Otherwise, the reasoning behind decisions is unclear and subjective. Where the council stands to financially benefit from a scheme, additional transparent and independent scrutiny should be applied.</p> <p>Clarification is needed on how the assessment is made. The conservation areas are meant to offer additional protection to mature trees, there is no mention of how TPOs, tree applications and heritage assets are interlinked. This have proven to be an area of poor communication in the past and the policy needs to be revised and adhered to in a transparent way.</p> <p>The conservation area appraisals don't appear to be regularly updated and other buildings of historic importance are without protection.</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? Transparency in protection policy and decision making is vital for local democracy.</p>			
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Give weight to the quality of Sydenham Ridge Area of Special Character</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above The historic and topological qualities of Sydenham Ridge have been ignored in the Local Plan, and the intention to give it a lesser designation as an ASLC is to be deplored, seemingly purely for administrative purposes! It is not just a local landmark, it stands for the whole of London and some of Kent; it is the source of some rivers flowing through much of Lewisham; and it provides welcome relief to many Lewisham and London-wide walkers to the urban sprawl. The character study of the area completely ignores the quality Victorian houses which many of us consider at the heart of this landscape and community, as well as the mid-century modern housing just across the border which should have set the standard for Lewisham.</p> <p>4. Do you think that there are other approaches that should be considered? If you won't keep the ASC designation, it should become a conservation area</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? Officers acknowledge that insufficient work has been done on Heritage.</p>	0	<p>Noted. The draft Local Plan proposes to remove the Area of Special Character designation, which is in the adopted plan.</p> <p>However the Area of Special Local Character recognition as non-heritage asset will remain. It is acknowledged that Sydenham Hill Ridge merits inclusion as an ASLC. This in combination with the draft Local Plan building heights and view management policies are considered to provide sufficient protection for the distinctive qualities of the ridge.</p>	Local Plan amended to list Sydenham Hill Ridge as an Area of Special Local Character.
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? What about the borough's huge intangible cultural heritage.</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above The plan currently focuses exclusively on tangible cultural heritage, but an enormous amount of Lewisham's strength and uniqueness comes from its intangible cultural heritage. Some</p>	0	<p>Noted. The Local Plan must deal with the use and development of land, in accordance with planning law. Policies which deal with 'intangible cultural heritage' therefore pose problems in terms of the legal remit of the plan. However, the draft Local Plan recognises and seeks opportunities to protect the borough's cultural assets</p>	Local Plan amended to include reference to cultural assets, which should be considered in the design-led approach.

		<p>thought should be given to encouraging places where this can be explored and shared so everybody's voice can be heard on an equal footing. My work with Made in Lewisham through Story Matters CIC has highlighted and promoted some of this but much more could and should be done and not just within the context of "Migration". Many of our communities have been here for decades now and have had a profound impact on the shape of Lewisham but this is rarely explored or recognised.</p> <p>4. Do you think that there are other approaches that should be considered? See above</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>		and identity, where this can be achieved through the plan process.	
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Enabling development</p> <p>3. Please provide your comments on the topic(s) selected above I am much in favour of preserving the heritage of an area, and conservation areas can help do that. However I have personal experience of how flat and houses are treated differently in the area I live in. Houses are allowed to do works (e.g. replace windows) as long as they adhere to the area guidelines, WITHOUT asking for permission first (i.e. permitted development rights). Flats on the same street need to get permission for the exact same work first. This does not seem fair and puts an additional financial burden on flat owners, takes an enormous amount of time and effort and just puts people off doing maintenance and repair work altogether.</p> <p>Secondly, you need to update your guidance to make it fit for purpose and in line with carbon emission and environmental targets. We wanted to replace our windows with double glazed units and you were insistent they had to be made of timber, even though it is now possible to get heritage style double glazed windows made from UPVC which look IDENTICAL to timber windows, have a much longer lifespan, need less maintenance and are cheaper. Allowing those to be used would encourage more people to update their properties, make them more environmentally efficient and reduce energy use. Houses on our street have used them (as they didn't need to ask for permission, see 1st paragraph) and because visually it's impossible to tell there has been no penalty for those properties. Why can't flat owners use them too? It just seems ludicrous.</p> <p>No wonder people don't look after their properties if it's being made this hard!</p> <p>4. Do you think that there are other approaches that should be considered? None chosen</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>	1	<p>Noted. Permitted Development Rights and planning enforcement are outside the scope of the local plan.</p> <p>Whilst it is acknowledged that sustainable retrofitting measures have many benefits in terms of property management and responding to the climate emergency, a balance must be struck in terms of preserving and enhancing the significance of heritage assets and their settings. Where planning permission is required for householder works, such as replacement windows, this will be considered on a case-by-case basis.</p>	Local Plan amended with additional policy on sustainable retrofitting.	
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Enforcement of changes and council staffing</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic environment</p>	2	<p>Noted. Planning enforcement, Planning Service resources and the making of Article 4 Directions are outside the scope of the Local Plan.</p>	No change.	

		<p>Non-designated heritage assets</p> <p>3. Please provide your comments on the topic(s) selected above Constantly changes without permission are made but there is no enforcement in Lewisham. There is also not enough conservation officers. The council has messed up the future of ladywell baths by taking away the conservation officer on this absolutely key project.</p> <p>4. Do you think that there are other approaches that should be considered? Get more conservation officers, issue article 4 directions on locally listed buildings</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? It means nothing if not enforced. Need a new heritage champion on council who is passionate about the role and fights for heritage</p>			
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Non-chosen</p> <p>3. Please provide your comments on the topic(s) selected above The example of Ladywell Playtower & Curzon Cinema proposal may give some useful pointers on how heritage planning works in practice. Following the initial public consultation there appears to have been a halt in the development, and I'm not sure that there have been public updates. So - heritage planning may need to ensure subsequent regular updates on progress (or lack thereof).</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>	2	Noted.	No change.	
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Seems fine - but I notice the Local Listed buildings list on the Council website has not been updated since February 2014</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Non-designated heritage assets</p> <p>3. Please provide your comments on the topic(s) selected above Again, the list of non-designated assets on the Council website has not been updated since February 2014 - time for a refresh, if only to give the impression that it is still relevant</p> <p>4. Do you think that there are other approaches that should be considered? No</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? Good to see emphasis on development outside, but proximate to a conservation area, needing to not impact on the conservation area.</p>	0	The Local List is subject to periodic review and updating. This review is undertaken separately from the plan-making process.	No change.	
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address?</p>	0	Noted.	No change.	

		<p>N/A</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic environment Designated heritage assets</p> <p>3. Please provide your comments on the topic(s) selected above You seem to have this about right.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan?</p>			
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Manor House library</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic environment</p> <p>3. Please provide your comments on the topic(s) selected above Part of Lewisham's heritage is the Manor House Library and its accompanying family history. It is outrageous that nearly a year after Lewisham's Labour regime supinely succumbed (as usual) to the anti-democratic Black Lives Matter movement and covered over the maroon Baring family name on the side of the library, only after appallingly inefficient undocumented "discussions, that still nothing has been done about removing that defacement cover.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>	1	This is beyond the scope of the Local Plan consultation	No change	
Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Yes, the fact that Southwark borough is invading public spaces on the western borders of Lewisham by creating more graveyards in public spaces. (Honor Oak)</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic environment</p> <p>3. Please provide your comments on the topic(s) selected above It's too late to do anything about an historical environment in Lewisham - don't bother. Demolish old buildings.</p> <p>4. Do you think that there are other approaches that should be considered? It's too late - many open spaces were lost by developments in Victorian and mid-war times. If a meteor landed on some of the 1930s suburban sprawl there might be an opportunity for a better way forward.</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>	0	<p>Disagree. The Council considers that there are a wide range of heritage assets that merit conservation and protection through the planning process. The Local Plan sets out policies to support conservation in line with the National Planning Policy Framework.</p> <p>Development proposals and construction in Southwark and other neighbouring Boroughs is outside the scope of Lewisham's Local Plan.</p>	No change.	

	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Yes, the fact that Southwark borough is invading public spaces on the western borders of Lewisham by creating more graveyards in public spaces. (Honor Oak)</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic environment</p> <p>3. Please provide your comments on the topic(s) selected above It's too late to do anything about an historical environment in Lewisham - don't bother. Demolish old buildings.</p> <p>4. Do you think that there are other approaches that should be considered? It's too late - many open spaces were lost by developments in Victorian and mid-war times. If a meteor landed on some of the 1930s suburban sprawl there might be an opportunity for a better way forward.</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>		Noted. Development proposals and construction in Southwark and other neighbouring Boroughs is outside the scope of Lewisham's Local Plan.	No change.
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham's historic environment Non-designated heritage assets Enabling development</p> <p>3. Please provide your comments on the topic(s) selected above Heritage is important to neighbourhoods but this does not seem to be recognised by the administration. the way the Council has ignored the Ladywell Playtower for instance sends out a strong message that they do not care about heritage. The naming of Fir Tree Way next to a historic mulberry tree is another local example. There will be others of which I am not aware and words on paper are no substitute for purposeful action.</p> <p>4. Do you think that there are other approaches that should be considered? Have greater regard to the voice of the local coounty when anything impacting on heritage is concerned. The local people have to live with the consequences long after local councillors have gone.</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>	5	<p>Noted. The draft Local Plan sets out policies to conserve and enhance heritage assets and Lewisham's historic environment, which are considered to be consistent with the National Planning Policy Framework.</p> <p>The Council's adopted Statement of Community Involvement sets out how the public will be consulted on the preparation of planning documents and on planning applications.</p>	No change.
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Support for conservation areas</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Designated heritage assets</p> <p>3. Please provide your comments on the topic(s) selected above</p>	5	<p>Noted. Decisions on previous planning applications are outside the scope of the Local Plan.</p> <p>The Local Plan includes a refreshed suite of policies addressing Lewisham's historic environment, which are considered to be consistent with national planning policy. The</p>	No change.

		<p>You write “ F Development on sites adjacent to a Conservation Area must not have a negative impact on the setting or significance of the Conservation Area.” yet we have been encroaching on small conservation areas in central locations not taking into account how raising rooflines on nearby streets negatively impacts the character of an area</p> <p>4. Do you think that there are other approaches that should be considered? A commission should be established to liaise with residents of conservation areas to ensure their voices are heard as it seems the council is not interested in preserving these special areas</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? No</p>		<p>local plan will work together with Conservation Area Appraisals and Management Plans to set a positive framework for conservation, including for Conservation Areas.</p> <p>The Council’s adopted Statement of Community Involvement sets out how the public will be consulted on the preparation of planning documents and on planning applications.</p>	
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? I think there should be no mural painting on historic buildings.</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below Lewisham’s historic environment Designated heritage assets Non-designated heritage assets</p> <p>3. Please provide your comments on the topic(s) selected above I think it is really important that Lewisham's historic buildings are sensitively restored and the restorations should be an opportunity to declutter and refresh. The in-your-face painting on the front of the Ninth Life building is heavy and cluttered and means the architecture of this important building is lost. I hope that the mural will be removed and the facade brought back to its original beauty.</p> <p>4. Do you think that there are other approaches that should be considered? Sensitive restorations of historical buildings bringing them back to their original state. No murals.</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? As above</p>	4	<p>The policies within the Local Plan provide a robust framework to preserve and enhance our heritage assets and are in line with national and regional policy and guidance.</p>	No change.
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Cosmetic treatment of historic buildings</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above I do not know where this would fit into the plan but in my opinion the Nine Lives pub in Catford (opposite the Broadway Theatre) is an absolute eyesore, definitely NOT in keeping with the historic town centre, and it should never have been allowed.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan?</p>	3	<p>The policies within the Local Plan provide a robust framework to preserve and enhance our heritage assets and are in line with national and regional policy and guidance.</p>	No change.

		N/A			
	Heritage	<p>1. Are there other issues around heritage that the Local Plan should address? Local heritage is underpinned by the information available around it - better funding for the local history library and archives is vital so that these irreplaceable materials are preserved and made accessible for future generations. That means more staff and investment in the systems that they use to underpin their work.</p> <p>2. Do you have any comments on the proposed approaches to heritage? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above N/A</p> <p>4. Do you think that there are other approaches that should be considered? Proper funding of the local history library and archive, to support the work around exploring and promoting the heritage of the borough</p> <p>5. Do you have any additional comments on the 'Heritage' section of the Local Plan? N/A</p>	4	Noted. Whilst it is acknowledged that archival and library resources are an invaluable tool to support conservation, Planning Service resources are outside the scope of the Local Plan.	No change.
	Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Genuinely affordable housing</p> <p>3. Please provide your comments on the topic(s) selected above. Received an email from Knight Frank/ Peabody partnership - offering: Arden - Parkside properties From studio - 1, 2 beds and duplexes From £350 000 Well done Lewisham - pat yourselves on the back there! £350k for a studio.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	0	<p>The Council has prepared a Strategic Housing Market Assessment that considers the need for affordable housing and assesses the affordability of different tenure options. The findings of the study have influenced the policies in the Local Plan. The draft Local Plan includes policies to secure genuinely affordable housing, with affordability linked to local income levels.</p> <p>Development which has been consented and properties currently marketed for rent or sale, are outside the scope of the Local Plan.</p>	No change.

Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Meeting Lewisham's Housing needs</p> <p>3. Please provide your comments on the topic(s) selected above. The assumptions about population growth look like you are assuming linear increases. Over the last year London has lost around 700000 people, due to Brexit and covid. Have plans for a range of scenarios been considered? Working from home may also require further flexibility in the types of retail space available as people will be concentrated in local areas more than travelling into the centre. Will the proposed housing be genuinely affordable, and will the designs foster community interactions, eg. by not designing two-tier developments with features such as "poor doors" for some residents</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? No</p>	3	<p>The draft Local Plan seeks the maximum amount of genuinely affordable housing to be delivered on new housing developments with 10 units or more and includes a strategic target for 50% of housing to be genuinely affordable.</p> <p>It also seeks to ensure all residents within mixed tenure schemes have access to amenities, communal spaces, including play spaces, and that access (i.e. cores and lifts) to affordable housing and market units is indistinguishable.</p> <p>The Local Plan covers a 20-year period. The draft Local Plan was largely prepared before the peak of the Covid-19 pandemic. Additional evidence will be prepared following the Regulation 18 consultation taking account the latest information on the impact of Covid-19, Brexit and related issues. This includes the latest population projections prepared by the Greater London Authority which continue to project growth in London over the long-term.</p>	Additional evidence base documents have been prepared to inform the next stages of plan production, taking into account the latest baseline information. This includes a new Retail and Town Centres Study, Strategic Housing Market Assessment and updated GLA population projections.
Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Genuinely affordable housing Houses in Multiple Occupation</p> <p>3. Please provide your comments on the topic(s) selected above. Question: What will the council do if the developer says 50% genuinely affordable housing is commercially not viable and demands a reduction in this target? Change developer or agree to the reduction? Can the council not build more homes itself, keeping ownership and benefiting from a long term rental income at genuinely affordable rent? In my opinion HMOs are not really desirable except for student accommodation and temporary housing for homeless people. Ultimately, over the long term, people want to life in their own home. Leasehold should be banned in favour of shared freehold.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p>	1	<p>The Local Plan has been informed by a Viability Assessment which demonstrates that the policies are deliverable. Where applications propose that policy requirements for affordable housing cannot be met owing to financial viability, these will be refused by the Council unless it can be suitably demonstrated through the applicant's own Viability Assessment that the maximum viable amount of affordable housing will be delivered. This is consistent with regional and national planning policy.</p> <p>The Local Plan sets a strategic target for genuinely affordable housing is set at 50%, with affordability linked to local income levels.</p> <p>Private developments and registered housing providers will make a</p>	Local Plan HMO policy amended to provide further details on managing the harmful overconcentration of HMOs.

		<p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>		<p>significant contribution to delivering more affordable housing. In addition, the Council has embarked on an ambitious home building programme to build new genuinely affordable homes.</p> <p>The London Plan makes clear that HMOs make an important contribution to meeting London's housing needs, such as those requiring temporary accommodation. The Lewisham Strategic Housing Market Assessment also corroborates this. The draft Local Plan includes policies to manage the harmful overconcentration of HMOs, however it is acknowledged that further details could be included to aid policy implementation.</p> <p>The Council also has an HMO licensing scheme to ensure HMOs provide suitable occupation, however this is separate from the Local Plan.</p>	
	Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Genuinely affordable housing</p> <p>3. Please provide your comments on the topic(s) selected above. A question with regard to genuinely affordable housing: If in a new housing development there is a mix of genuinely affordable housing (rental or purchase ?) and "affordable" or market rate housing who has the right to apply for the genuinely affordable housing assuming it is of the same standard as the market rate housing ?</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	1	<p>The Council's Lewisham Housing Allocations Scheme seeks to fairly allocate social housing to eligible applicants on the housing register. Details can be found on the Council's website.</p>	No change.
	Housing	<p>1. Are there other issues around housing that the Local Plan should address? short term letting services like AirBnB; an increase in home working; the physical & mental health benefits of open space; the climate crisis; Lifetime Homes; the Council's failure on genuinely affordable homes</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Meeting Lewisham Housing needs</p>	2	<p>The Regulation 18 public consultation has been carried out in accordance with the Council's adopted Statement of Community Involvement. To support the consultation, the Council prepared a Local Plan Summary Document.</p>	No change.

		<p>Genuinely affordable housing Housing design Public involvement: AirBnB; Climate crisis;Home working</p> <p>3. Please provide your comments on the topic(s) selected above. If the Council genuinely wanted to encourage the involvement of residents (by definition, non-specialists) in the planning process it would make a real effort to publish material in plain English and eliminate repetition. It is disappointing that it has failed to do so.</p> <p>The Council needs to take action on holiday letting services such as AirBnB. These reduce the number of long term homes available as well as distort an already dysfunctional housing market and rents. Where is the plan to deal with this problem?</p> <p>4. Do you think that there are other approaches that should be considered? It is good to set a target that 50% of new homes should be “affordable” but that should be the minimum. In reality it’s the same as the current target which Lewisham does not meet it. Even in developments where the Council has a direct financial interest it fails to meet its own target. How will it actually meet the re-stated target?</p> <p>References to “genuinely affordable” homes are welcome but again, the Council has failed to meet the existing targets. The intermediate categories (London Living Rent / shared ownership) in reality do not meet Lewisham's needs. Allowing 30% of supposedly affordable homes to be from the intermediate category is an abject failure.</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? There is no denying the housing crisis in Lewisham. By its own figures 7.6% of Lewisham households are categorised as homeless. The average house price is way in excess of a reasonable multiple of the median income. The housing market does not function efficiently but the Council plans to continue relying on the goodwill of private developers. There will in effect be no change to current practices. It is time to recognise that doing the same thing over and over will provide the same end result – unaffordable housing and homelessness. Lewisham’s Local Plan is a huge missed opportunity</p>	<p>Holiday letting of residential properties is outside the scope of the Local Plan but the Local Plan recognises the importance of conventional housing not being compromised by the unlawful use of residential premises by visitors and specifies that serviced apartments will not be occupied for periods of 90 days or more, in line with legislation. Planning enforcement, however, it outside the scope of the Local Plan.</p> <p>The delivery of new affordable housing fluctuates on a yearly basis and is often dependent upon site viability and developer interest in bringing forward development. The Council will monitor delivery of housing through its Authority Monitoring Report.</p> <p>The Local Plan is in conformity with policy H6 of the London Plan which specifies a tenure split of 30% low-cost rent, 30% intermediate products and the remaining 40% to be determined by Councils. In recognition of the need for genuinely affordable housing in Lewisham, the Local Plan seeks that all of the remaining 40% is for low cost rent, thereby minimising intermediate provision as much as possible.</p> <p>The Local Plan does assume new house building will take place on private developments. But it also recognises the importance of housing estate renewal and regeneration and the Council has embarked on an ambitious home building programme to build new genuinely affordable homes.</p>	
	Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): None selected</p>	0 Noted. The threshold approach to viability set out in the draft Local Plan aligns with policy H5 in the London Plan. Where the required levels of affordable housing cannot be met, this must be demonstrated by a Viability Assessment.	No change.

		<p>3. Please provide your comments on the topic(s) selected above. Policy HO3 F positively recognises and supports the threshold approach to viability for major development proposals, in accordance with draft London Plan policy H6 , taking into account the different routes to affordable housing delivery (i.e. Fast Track Route and Viability Tested Route).</p> <p>In this regard we note that Lewisham have adopted the normal minimum threshold position of 35 per cent; or 50 percent for Strategic Industrial Locations and Locally Significant Industrial Sites where development would result in a net loss of industrial capacity.</p> <p>The wording of this final policy requirement/aspiration should be made less prescriptive, as it is not always possible to achieve the desired regeneration that provides, private/affordable /employment floorspace & amenity space and wider regeneration benefits without some reasonable flexibility - if one is to bring the site forward in a viable and deliverable form</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>			
Housing	<p>1. Are there other issues around housing that the Local Plan should address? Building more homes by encouraging and enabling development in all parts of the borough, not just in town centres and on brownfield sites</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): None selected</p> <p>3. Please provide your comments on the topic(s) selected above. I am in favour of more housing and of making the best use of scarce land by building to high densities. People need homes, and shops, services and public transport all need customers, particularly in a post-pandemic world.</p> <p>But it's vital that the council doesn't only allow development in deprived town centre areas while restricting it in existing residential neighbourhoods. Those neighbourhoods are perfect for creating new family-sized homes that would also, unlike the existing Victorian and Edwardian stock, be energy-efficient and accessible to people with mobility problems. These neighbourhoods are disproportionately white and affluent so "protecting" them from development in the name of "character" just accentuates existing inequalities of wealth and opportunity.</p> <p>4. Do you think that there are other approaches that should be considered? The local plan should therefore do more to encourage incremental development in existing residential areas, in line with London Plan policy which states that "local character evolves over time and will need to change in appropriate locations to accommodate additional housing on small sites"</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	0	<p>Agree. The Local Plan seeks to ensure the development proposals respond positively to the distinctive character of Lewisham's neighbourhoods and communities by following the design-led approach.</p> <p>The Local Plan also seeks to facilitate the sensitive intensification of established residential neighbourhoods and commercial areas through the development of small sites, particularly to help meet the London plan small sites housing target. The Council has also adopted a Small Sites SPD to help give effect to the London Plan and new Local Plan small sites policies.</p>	No change.	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p>	0	<p>Whilst the Council has a Lewisham Housing Allocations Scheme which seeks to fairly allocate social housing to eligible applicants on the housing</p>	No change.	

		<p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Genuinely affordable housing</p> <p>3. Please provide your comments on the topic(s) selected above. I support the targets for more genuinely affordable housing (& for it to be genuinely affordable rather than "affordable")</p> <p>This needs to extend to purchase as well as renting (so that people on average-ish incomes can afford to buy in Lewisham as they used to be able to)</p> <p>Challenge of providing for people with local connections & not just attracting people to move to to area</p> <p>More needs to be done to look at "planning gain" so that the scarcity value of a site goes primarily to the community/ tenant/ owner occupier (whilst there) rather than to owners of sites (though this would primarily need to be changes in national policy)</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	<p>register and can be found on the Council's website, the price of renting private properties or buying market sale properties, and who can move into these properties, is outside the scope of the Local Plan.</p> <p>The Local Plan requires viability assessments to be submitted to support proposals for affordable housing that do not meet the minimum threshold.</p> <p>The Council periodically reviews large schemes to check if improvements to the site's financial viability allow for additional affordable housing to be delivered. The requirements and procedures for these 'review mechanisms' are set out in the draft Local Plan and London Plan housing guidance.</p>	
Housing		<p>1. Are there other issues around housing that the Local Plan should address? Re-provision of retail or community facilities under housing developments</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Housing Design</p> <p>3. Please provide your comments on the topic(s) selected above. Housing above retail</p> <p>From the many retail sites in the South area identified as potential sites for housing development each site has a retention of retail for the entire ground floor with housing above.</p> <p>Can this be looked at again in the light of number of issues some of which may have changed or accelerated due to the pandemic</p> <ol style="list-style-type: none"> 1. Retail is in decline 2. Housing need is higher than need for retail 3. If regulations state that some retail (specific m2 or specific number of employment opportunities) must be re-provided can it be limited only to what is legally required so that the maximum units of housing are achieved) 4. Housing above shops has long been problematic and probably the least desirable for tenants or certainly homeowners. <p>disturbance of the running of any retail from early / late deliveries, any retail selling food or cooking food causes numerous issues for housing above in terms of health and safety secure refuse storage of food waste/ fire safety, noise from pubs/ gyms, community halls holding social events such as weddings, funerals, parties.</p>	<p>2</p> <p>Noted. The draft Local Plan supports appropriately located mixed-use development, particularly in town centres, in order to make a more efficient and optimal use of land. This normally involves commercial and/or other main town centre uses at the ground floor level with residential above. The approach is generally supported by the London Plan. This development typology has been successfully delivered in Lewisham and London. However it is acknowledged that some developments have not resulted in high take up of space. The draft Local Plan introduces a new suite of design policies to help ensure that mixed-use developments are of a high quality, for example, with flexible space with an appropriate level of fit out to encourage take up.</p> <p>The Local Plan has been informed by a town centre study, which sets out future retail floorspace requirements. This suggest there is a modest for still notable need for new floorspace to be created or repurposed over the long-term.</p>	No change.

		<p>Current housing with retail on ground floor</p> <p>If you take recent examples in Lewisham where it has been difficult to find businesses to take on retail units under housing you can see that this strategy might leave empty units which could have been housing people from the housing list</p> <p>Lewisham station tower blocks – it seemed to take a long time to fill the units under the 1st phase tower blocks and most are not typical retail that locals use.</p> <p>Flats at 262 to 274 Lewisham High St – retail space on ground floor (previously as Tesco) has been empty for several years now.</p> <p>Ladywell Pop-Up housing – the temporary, movable housing heralded the retail units for local small businesses etc but it appears that it has been difficult to attract tenants to these units with some seemingly empty with the retail / business or office use not adding anything to the area except the Hope cafe whilst it was operating which was hireable for events and the cafe providing a place for community to meet.</p> <p>Flats at 335-337 Bromley Rd – one unit occupied by Co-op whilst the corner retail unit with high visibility from Bromley Rd and Whitefoot Lane/Southend Lane remained empty and eventually was converted to a flat providing one more unit of housing</p> <p>22 and 24 Sydenham High Rd, SE26 5QW</p> <p>Retail Space under flats was taken on by a Yoga centre which has failed to be successful and I think it has now been agreed that the ground floor can become residential units</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>			
Housing		<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Gypsy and traveller accommodation, Student accommodation</p> <p>3. Please provide your comments on the topic(s) selected above. Gypsy and Traveller Site</p> <p>Applaud council providing one site for Travellers although as I commented at the time of consultation re Pool Court that it did not seem an ideal site being accessed by one road only and potentially being quite dangerous being so near to the river with possible health and safety risks if children were on site as well as large presence of rats being near water.</p> <p>Not sure if one site is sufficient for the area but would encourage the council to continue to find appropriate locations for further sites.</p> <p>Hope that the council will resist use of the new powers to arrest, fine and remove vehicles on public land in the new Police, Crime, Sentencing and Court Bill.</p> <p>Student Accommodation</p>	0	<p>Noted. The Council has undertaken feasibility work on the proposed gypsy and traveller site at Pool Court, and it is considered that this this type of housing development can feasibly be delivered there. The Local Plan therefore proposes to include a site allocation to address the housing needs for this group. The site can accommodate the borough's objectively assessed need for pitches, as set out in the latest Gypsy and Traveller Needs Assessment study.</p> <p>Provisions in the Police, Crime and Sentencing Bill are outside the scope of the Local Plan.</p> <p>Since the Regulation 18 consultation on the draft Local Plan, the Council has prepared an update to the Strategic Housing Market Assessment</p>	No change.

	<p>Student Accommodation</p> <p>Applaud council stating that they will only grant permission for further student accommodation where the need can be demonstrated and where the accommodation is for students from one or two specific universities or colleges locally. Giving the high number of student units being built in the high-rise tower blocks by Lewisham station it seems imperative to see how well these are occupied and if any issues arise from such a large number of students (who would not necessarily be resident during long holiday periods) living in a high-rise environment with the possible concerns re access to green spaces etc</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? To many to mention...</p>		(SHMA) that has considered the need for purpose built student accommodation. The results of the study have influenced the policies in the Local Plan, and confirms the need to take a carefully managed approach to additional purpose built student accommodation in the Borough.	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? I accept that Housing is a very important issue but not all development sites are suitable. The proposal to build housing units in the green area between Havelock House and the Telecom site is totally unacceptable and unsuitable. It also goes against the council's aims to consider nature and protect the green areas that already exist. n the</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Other: Protecting and preserving green areas</p> <p>3. Please provide your comments on the topic(s) selected above. Same as above</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	1	Noted.	Havelock House site allocation has been removed from the Local Plan.
Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Meeting Lewisham's Housing needs</p> <p>3. Please provide your comments on the topic(s) selected above. The proposal to increase the number of potential households on the New Cross Sainsbury's site from 200 to 900 is a terrible idea. This part of the borough already has very limited access to green space and leisure facilities. This proposal should be abandoned.</p> <p>4. Do you think that there are other approaches that should be considered? Yes, instead of 1/2 bedroom properties, build actual family housing, 3,4 and 5 bedrooms, in a genuine attempt to reduce the housing waiting list.</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	3	Noted. The Council has prepared a Strategic Housing Market Assessment (SHMA) that has considered the need for housing in the borough, including dwelling size mix. The draft Local Plan seeks to ensure that development proposals deliver a mix of housing tenures and types. It also includes policies to protect the stock of existing family homes, with policies that restrict conversions unless family sized (3+ bed) units are retained or re-provided. However it is acknowledged that further details on the need for family sized units could be provided.	Local Plan amended by making additional references to family housing and the needs of families and young children. Local Plan amended to include a target housing size mix for affordable housing.

	Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Meeting Lewisham's Housing needs</p> <p>3. Please provide your comments on the topic(s) selected above. Meeting the housing targets seem to be the overriding aim, against all other aspirations will be set aside. Population changes are dynamic and it is not yet clear whether projections will indeed be accurate, particularly given Covid 19 uncertainties. Over development that is inappropriate within the borough will diminish its attractiveness for people to want to live in the borough.</p> <p>4. Do you think that there are other approaches that should be considered? Lewisham should join with other inner London boroughs to resist targets that lead only to higher buildings and intensification of housing. the aim is have a borough that is open and liveable. that will not be achieved if tall blocks are crammed into all developments</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? Housing developments should be a mix for all ages</p>	4	<p>The London Plan sets a strategic housing requirement (i.e. housing target) for Lewisham, which the Local Plan must demonstrate how it will deliver. The Council recognises that the new London Plan housing targets are challenging. However the respondent's suggestion to resist housing targets cannot be taken forward, as this would not be consistent with national planning policy.</p> <p>The Council disagrees that meeting housing targets is the overriding aim of the Local Plan. Whilst there is an imperative to address the housing crisis and deliver more genuinely affordable homes in Lewisham, this is not the plan's sole focus. The Local Plan sets out objectives and policies across a wide range of policy topic areas. These include, for example, economy and culture, open spaces and green infrastructure, responding to the climate emergency and delivering new infrastructure to support growth including community and transport infrastructure.</p>	No change.
	Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Genuinely affordable housing, Houses in Multiple Occupation</p> <p>3. Please provide your comments on the topic(s) selected above. Lewisham needs to recognise and respond to the housing situation for what it is: a crisis. Too much focus in the plan is on bought homes, when most people rent privately, and both national and local strategies focus less on renters. There needs to be a concerted effort to track down and hold to account unscrupulous landlords, build more social housing, introduce rent controls, and put a stop to expensive developments which are bought as rental properties. The issue will not be solved just by building more homes, we need to meet the desperate need of renters now by cracking down on slumlords and rising rents which make the area unaffordable</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p>	2	<p>The Local Plan recognises that the private rented sector is growing and that this is an unaffordable option for many residents. In light of this the plan seeks that new developments make provision for maximum amount of genuinely affordable housing, with a strategic target of 50% of all new homes delivered to be genuinely affordable, with affordability linked to local income levels.</p> <p>The Council is also undertaking an ambitious home building programme to build new genuinely affordable homes on Council owned land.</p>	No change.

		<p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>			
	Housing	<p>1. Are there other issues around housing that the Local Plan should address? ACTION IS NEEDED!</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Optimising the use of small sites Genuinely affordable housing Housing design Self-build and custom-build</p> <p>3. Please provide your comments on the topic(s) selected above. All we hear about is - 'Genuinely affordable homes'. Lewisham median income is £30.000 (x5 - mortgage lending potential --> £150.000) If you're lucky enough to have 1 year gross salary in savings, which is impossible to save, because 70 - 80% of your salary goes on living costs (other people's mortgage); that takes your home buying budget to £180.000. ***Please let us know, where in Lewisham, we can buy a 1 bed place for £180.000*** You are also referring to to 'London living rent' & 'Social rent'. How do we find about about these rental properties? Where do they exist? Where are they listed? I have been staring at the 'Homes for Londoners' website for 2 years now, and yet to see anything in my area.. I email the council, no response for weeks/ months - eventually someone calls me; they are not even aware of the site, or the type of rents available there.. I ask again, months later - no response.. Where do we find out about any possible way out of this awful situation, where we live with zero disposable incomes, zero hope of improvement, medical needs, zero prospects for home ownership.. it is impossible to sustain living in privately rented properties, with deteriorating mental and physical health.. What can we do? Will we be able to see any properties available under the first homes scheme, approved by the government in 2020? The shared ownership is a complete CON! The help to buy mortgages for new builds require do little more than inflate house prices, and serve no purpose to low and middle income individuals. Please stop supporting this non-sense, trying to pass is as affordable. I am desperate to hear some concrete advise and answers</p> <p>4. Do you think that there are other approaches that should be considered?</p>	3	<p>The Local Plan recognises and seeks to respond to the housing crisis and particularly the issues of housing affordability.</p> <p>The draft Local Plan seeks that new developments make provision for maximum amount of genuinely affordable housing, with a strategic target of 50% of all new homes delivered to be genuinely affordable, with affordability linked to local income levels.</p> <p>The Council is also undertaking an ambitious home building programme to build new genuinely affordable homes on Council owned land.</p> <p>The Council's housing team should be contacted for information on accessing affordable housing.</p> <p>The draft Local Plan includes a raft of new and refreshed policies on design, including for housing. These take forward the London Plan standards of internal and outdoor amenity space and children's play space. In addition, Part 2 of the Local Plan on Green infrastructure sets out proposals to address deficiencies in open space, including provision for new developments to contribute to provision of new publicly accessible open space.</p>	No change.

	<p>Do not allow poorly and cheaply designed blocks, we cannot afford, and wouldn't want to live in.</p> <p>Build quality housing, with green spaces as a compulsory part of the design.</p> <p>Talk to people.</p> <p>Give them answers.</p> <p>Commit to deadlines and concrete goals.</p> <p>Do not speak in code.</p> <p>Give people an opportunity to build compact but liveable 1 bed places in otherwise 'wasted spaces'.</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? There are a lot of councils doing a lot better, it can't be impossible for us... surely!</p>			
Housing	<p>1. Are there other issues around housing that the Local Plan should address? Challenging Government targets where appropriate</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Genuinely affordable housing Accommodation for older people Optimising the use of small sites</p> <p>3. Please provide your comments on the topic(s) selected above. This is inappropriate and will break up neighbourhoods with householders selling off gardens cramming potentially flats to maximise profit and degrading the environment. Inevitably involves mature tree removal because the Planning Committee doesn't state they should be retained.</p> <p>Genuinely affordable is a myth. Social housing is affordable for the present population. Affordability depends on mortgage lenders and the amount of deposit as much as the house price. All it will mean is increased choice for the lucky few in a market they can already buy into.</p> <p>Care homes closing, sheltered housing sites being allowed to develop into flats (non specified_ not like for like. Disgraceful... if it was your parents or yourself having to move from sheltered/ retirement homes at the age of 70s and 80s. eg Castlebar/ Mais House. Sydenham Hill</p> <p>4. Do you think that there are other approaches that should be considered? look to the ethics of the 70s as far as planning space./ respecting retention of mature trees/ shrubbery in any planning consent. After all if your forefathers hadn't respected these trees in past decisions they wouldn't be here now.</p> <p>Stop Right to BUY</p> <p>Allow ex tenants who have bought their properties to sell back/ exchange their property for a secure rent and children on rent book which would increase council stock</p> <p>Increase by 10 fold at least council tax on empty properties and other punitive measures</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan?</p>	2	<p>The Local Plan recognises and seeks to respond to the housing crisis and particularly the issues of housing affordability.</p> <p>The draft Local Plan seeks that new developments make provision for maximum amount of genuinely affordable housing, with a strategic target of 50% of all new homes delivered to be genuinely affordable, with affordability linked to local income levels.</p> <p>The Council is also undertaking an ambitious home building programme to build new genuinely affordable homes on Council owned land.</p> <p>The Local Plan includes policies which seek to protect garden land, along with requirements for new development to protect open space, trees and deliver urban greening measures on site, including tree planting.</p> <p>Right to buy, Council purchase of properties and Council tax are outside the scope of the Local Plan.</p>	No change.

		Key workers deserve social housing. Stop Right to BUY in Lewisham. Fill the empty homes in Lewisham. Quicker turnaround on social housing/ build / buy back from residents in ex council properties in exchange			
Housing	<p>1. Are there other issues around housing that the Local Plan should address? So much of the new housing is completely genuinely unaffordable for most lewisham Residents. In your plan you propose 50% of new housing should be genuinely affordable, in that case why have so many of the Hugh rise block being built in central lewisham way out of of the price range of most people, part from property investors, investors from abroad and people who work in the city. I do not trust that you when you say that future builds will be affordable.</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): None selected</p> <p>3. Please provide your comments on the topic(s) selected above. Most of the new high rise housing in central lewisham is completely unaffordable for most lewisham residents. In your plan you propose 50% of new housing should be genuinely affordable, in that case why have so many of the High rise block being built in the past 5 years in central lewisham been way out of of the price range of most people, apart from property investors, investors from abroad and people who work in the city. I do not trust you when you say that future builds will genuinely affordable. I want you to exactly define what prices and rents that would mean, and the target lewisham resident population who would be housed in these new homes, and then after the buildings have been sold or rented , give details of the prices they were sold at and what rents</p> <p>4. Do you think that there are other approaches that should be considered? Provision of well built, sustainable, excellently insulated, low cost housing available to those of low income and lewisham residents to rent or buy. Not poorly built, for maximum profit for house builders who are making multi millions, and land banking. I think the housing association structure is good not for profit structure that could be used support social housing, thought that sector is not without its own corruption, hopefully it is less mercenary than the private building sector.</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? When I a standing by lewisham high street at ladywell, Lewisham does not feel green. It simply feels like a traffic intersection, you need to preserve all green spaces not just parks</p>	3	<p>The Local Plan recognises and seeks to respond to the housing crisis and particularly the issues of housing affordability.</p> <p>The draft Local Plan seeks that new developments make provision for maximum amount of genuinely affordable housing, with a strategic target of 50% of all new homes delivered to be genuinely affordable, with affordability linked to local income levels. In line with national and regional planning policy, the amount of affordable housing delivered on a case-by-case basis will be subject to financial viability.</p> <p>The Council is also undertaking an ambitious home building programme to build new genuinely affordable homes on Council owned land. It will also work proactively with registered social housing providers.</p> <p>The Council exerts no planning control over the sale or rent of private or market properties, and the backgrounds of those who purchase new properties.</p> <p>The Local Plan contains a chapter dedicated to green infrastructure, which includes provisions for protection of open space, urban greening and tree protection/planting.</p>	No change.	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? The effect on the existing community long term</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Housing Design</p> <p>3. Please provide your comments on the topic(s) selected above. The plans for high density high rise blocks is worrying. Not only are they never of "high-quality design"one of your commitments, but long term they cause social damage as seen in all but a very few high rise developments across the UK since the 60's. The experienced learnt from these developments should be listened to.</p>	5	<p>The London Plan acknowledges that tall buildings will make a contribution to meeting the Capital's housing needs. It directs Boroughs to identify locations suitable for tall buildings and set parameters around height and design, which is reflected in the Local Plan.</p> <p>Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has</p>	Local Plan amended with more detailed requirements on buildings heights, informed by the Tall Buildings Study update.	

		<p>4. Do you think that there are other approaches that should be considered? Yes I do. Low rise housing, family homes, safe green spaces for children to play, community centres on large developments, all the things that have proved over time to work.</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>		<p>been undertaken, which has informed the Regulation 19 document.</p> <p>The Local Plan makes clear that higher density development does not necessarily imply tall buildings.</p> <p>The Local Plan includes a raft of new and updated policies on design, including housing design. These take forward the London Plan standards, including for indoor and outdoor amenity space and children's play space.</p> <p>The Local Plan is supported by an Integrated Impact Assessment. This includes an appraisal of the plan policies on different social, environmental and economic objectives. It also incorporates consideration for Equalities Impact Assessment. The IIA has informed the plan's preparation.</p>	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? Emphasis on developing housing that is in harmony with the existing low-rise residential houses</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Housing Design</p> <p>3. Please provide your comments on the topic(s) selected above. There is a lack of emphasis on the impact that new development will have on the existing environment, culture and infrastructure within Lewisham. Many residents moved here seeking for "village" environment and new development activities should carefully consider whether the new buildings are in harmony with the existing surrounding.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	3	<p>The Local Plan sets out that development must be delivered through the design-led approach. Proposals must demonstrate how they will respond positively to local and historic character.</p> <p>The Local Plan must address identified needs for new housing, workspace, community facilities and other uses – to meet these needs it will be necessary to intensify land uses in some areas. The plan sets out the approach to ensure growth is carefully managed.</p> <p>With reference to development density, the plan states that the optimal capacity of a site must be considered having regard to the type and nature of uses, however it is recognised that this policy could be strengthened with reference to the delivery of the spatial strategy.</p>	Local Plan amended to make clear that the optimal capacity of a site is the most appropriate form of development that responds positively to the site's context and supports the delivery of the spatial strategy for the Borough.	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p>	1	<p>The Council has prepared a Strategic Housing Market Assessment that considers Lewisham's housing list,</p>	Local Plan amended to include a target housing size mix for affordable housing.	

		<p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Genuinely affordable housing Meeting Lewisham's housing needs Gypsy and traveller accommodation Housing estate renewal and regeneration</p> <p>3. Please provide your comments on the topic(s) selected above. The housing start target should take into account the size of the housing list, defining the target in terms of units is a mistake, it should be in terms of bedrooms to allow families to be adequately housed. The council should do its utmost to ensure that housing in Lewisham is genuinely affordable, i.e. take into account income, for both the public sector and private sector. The council must at least meet the legal requirement for the provision of traveller accommodation.</p> <p>4. Do you think that there are other approaches that should be considered? The council should licence landlords and see what rent control powers it has and introduce rent controls where it can. The council should look to see if it needs more powers and acquire them under the Localism Act.</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	<p>local incomes, the affordability of different housing tenures and the need for affordable housing. The SHMA also considered the need for family housing and the results of the study have influenced the policies in the Local Plan.</p> <p>The draft Local Plan seeks that new developments make provision for maximum amount of genuinely affordable housing, with a strategic target of 50% of all new homes delivered to be genuinely affordable, with affordability linked to local income levels. In line with national and regional planning policy, the amount of affordable housing delivered on a case-by-case basis will be subject to financial viability.</p> <p>Lewisham's Gypsy and Traveller Needs Assessment identified the need for 6 pitches up to 2031. The Local Plan provides that this need can be accommodated in full, by way of a site allocation policy (Land at Pool Court).</p> <p>Licensing is outside the scope of the Local Plan. However the Council is progressing with licencing schemes for certain types of residential uses, such as Houses in Multiple Occupation (HMOs).</p>	<p>Local Plan updated to include a policy with 10-year pitch target for gypsy and traveller accommodation, based on the Council's latest needs assessment, in line with the London Plan.</p>
Housing		<p>1. Are there other issues around housing that the Local Plan should address? High rise towers do not fit in with local surrounding environment or existing buildings. They are not wanted by residents. Smaller sites and designs that are sympathetic to the local surroundings and environment are required. The high rise towers in Lewisham should never have been allowed and we do not want these elsewhere in the borough.</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Meeting Lewisham's housing needs Optimising the use of small sites Genuinely affordable housing Housing estate renewal and regeneration Housing design Accommodation for older people Supported accommodation Student accommodation Houses in Multiple Occupation</p>	<p>3</p> <p>The London Plan acknowledges that tall buildings will make a contribution to meeting the Capital's housing needs. It directs Boroughs to identify locations suitable for tall buildings and set parameters around height and design, which is reflected in the Local Plan.</p> <p>Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.</p>	<p>Local Plan amended with more detailed requirements on buildings heights, informed by the Tall Buildings Study update.</p>

		<p>Self-build and custom-build Gypsy and traveller accommodation</p> <p>3. Please provide your comments on the topic(s) selected above. High rise towers do not fit in with local surrounding environment or existing buildings. They are not wanted by residents. Smaller sites and designs that are sympathetic to the local surroundings and environment are required. The high rise towers in Lewisham should never have been allowed and we do not want these elsewhere in the borough.</p> <p>4. Do you think that there are other approaches that should be considered? Same as above</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? Same as above</p>			
Housing	<p>1. Are there other issues around housing that the Local Plan should address? Keeping the nice areas nice and dumping the rest around the c</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Houses in Multiple Occupation</p> <p>3. Please provide your comments on the topic(s) selected above. Too many slum landlords dumping everything in the street when tenants turn over. Turn flats back to family homes. No more high rise! As for affordable housing there is no such thing in a central location. Need to build more houses outside of London and make better transport.</p> <p>4. Do you think that there are other approaches that should be considered? Yes</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? See above</p>	3	<p>Flytipping is outside the scope of the Local Plan, and is dealt with separately by the Council's waste service and where necessary, enforcement team. However, the Local Plan includes policies to ensure that all new developments make suitable for provision for waste management and recycling facilities.</p> <p>The draft Local Plan seeks that new developments make provision for maximum amount of genuinely affordable housing, with a strategic target of 50% of all new homes delivered to be genuinely affordable, with affordability linked to local income levels. In line with national and regional planning policy, the amount of affordable housing delivered on a case-by-case basis will be subject to financial viability.</p> <p>The Local Plan can only make provision for development within Lewisham. It is acknowledged that there is a significant need for housing elsewhere in London and England, and this is dealt with by the London Plan and local plans of other local authorities.</p>	No change.	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? Stop building!</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): None selected</p>	2	<p>The Council is required by national planning policy to prepare a local plan which sets a positive framework for managing growth and development within the borough, including to meet identified needs for housing, business</p>	No change.	

		<p>3. Please provide your comments on the topic(s) selected above. When will people realise that when you further condense the housing stock you encourage overcrowding - we are already at saturation point and many parts of the borough have turned into ghettos. The infrastructure cannot cope with more people; the roads are congested and the trains are overcrowded. There's not enough space to add cycle lanes and in any case my 89 year old mum can't ride a bike! We pay our taxes to maintain communities - not to destroy them</p> <p>4. Do you think that there are other approaches that should be considered? Demolish tower blocks and outlaw houses of multiple occupation</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>		<p>space, and community facilities along with supporting infrastructure.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>	
	Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Housing design</p> <p>3. Please provide your comments on the topic(s) selected above. High rise development seems to be the predominant model of delivering new housing. This is a road to poor quality communities that are not integrated. I would like to see more use of low rise high density housing. I also think the planning system should set higher standards on environmental measures in new build development. Lewisham has an opportunity to be a leader in building green.</p> <p>4. Do you think that there are other approaches that should be considered? Environmental measures should come to the fore such as high insulation levels, solar, green roofs etc. Large developments should have cycling and walking prioritised over vehicles.</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? The pandemic has shown that housing should prioritise outside space. Those in high rise blocks without gardens have suffered more than those with garden space</p>	4	<p>Addressing the climate emergency is a key strategic objective of the Local Plan. There are policies included throughout the plan to address this, including the chapter on sustainable design and infrastructure that seeks to minimise greenhouse gas emissions and promote sustainable design.</p> <p>The draft Local Plan includes policies on housing design. It specifies that new housing development must meet, and where possible exceed, the standards for indoor and outdoor amenity space in the London Plan. Furthermore the Local Plan set out policies covering the protection and enhancement open spaces, with a chapter dedicated to green infrastructure.</p>	No change.
	Housing	<p>1. Are there other issues around housing that the Local Plan should address? The ownership of the scheme is not discussed. People want council housing not housing association or private. We want cheap and publicly owned</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Meeting Lewisham's housing needs</p> <p>3. Please provide your comments on the topic(s) selected above. This will not solve the housing crisis because there are too many profiteers involved. Only solution to lower land price is to build cheap public housing (council)</p> <p>4. Do you think that there are other approaches that should be considered? Council housing and long tenancies not these newer short terms ones. And we dont need more private flats</p>	2	<p>The draft Local Plan seeks that new developments make provision for maximum amount of genuinely affordable housing, with a strategic target of 50% of all new homes delivered to be genuinely affordable, with affordability linked to local income levels. In line with national and regional planning policy, the amount of affordable housing delivered on a case-by-case basis will be subject to financial viability.</p> <p>The Council is also undertaking an ambitious home building programme</p>	No change.

		<p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>		<p>to build new genuinely affordable homes on Council owned land. Policies on estate regeneration and renewal and seeking provision of affordable housing on private sites are also set out in the Local Plan.</p> <p>The draft Local Plan policy on affordable housing seeks that tenancies are secured as long-term tenancies, with lifetime tenancies where possible.</p> <p>The council does not exert control over the length of tenancies for market housing, or the market value of land.</p>	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Housing Design</p> <p>3. Please provide your comments on the topic(s) selected above. I would like to see a height limit of 5 floors for any proposed new blocks at Bell Green</p> <p>4. Do you think that there are other approaches that should be considered? No</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? No</p>	1	<p>The London Plan acknowledges that tall buildings will make a contribution to meeting the Capital's housing needs. It directs Boroughs to identify locations suitable for tall buildings and set parameters around height and design, which is reflected in the Local Plan. Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.</p>	Local Plan amended with more detailed requirements on buildings heights, informed by the Tall Buildings Study update.	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Gypsy and traveller accommodation</p> <p>3. Please provide your comments on the topic(s) selected above. We do not need gypsy and traveller accommodation anywhere in this area as it causes problems for everyone who is a resident due to noise and unwanted violence</p> <p>4. Do you think that there are other approaches that should be considered [REDACTED] <i>(Lewisham Planning Officer note: comment removed as it includes discriminatory language and not considered acceptable)</i></p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? Need more appropriate shops for family's and elderly residents</p>	1	<p>The National Planning Policy Framework and London Plan require the Local Plan to address Lewisham's identified needs for gypsy and traveller accommodation.</p> <p>The Lewisham's Gypsy and Traveller Needs Assessment (2016 update) identified the need for 6 pitches up to 2031. The Local Plan provides that this need can be accommodated in full, by way of a site allocation policy (Land at Pool Court).</p> <p>The Local Plan includes a standalone policy on older person's accommodation.</p> <p>Noted. The Council has prepared a Strategic Housing Market Assessment</p>	Local Plan amended to include target dwelling size mix for affordable housing.	

				(SHMA) that has considered the need for housing in the borough, including dwelling size mix. The draft Local Plan seeks to ensure that development proposals deliver a mix of housing tenures and types. It also includes policies to protect the stock of existing family homes, with policies that restrict conversions unless family sized (3+ bed) units are retained or re-provided. However it is acknowledged that further details on the need for family sized units could be provided.	
	Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Meeting Lewisham's housing needs Genuinely affordable housing Housing estate renewal and regeneration</p> <p>3. Please provide your comments on the topic(s) selected above. Lewisham's approach to 'genuinely affordable housing', conflating social rents with GLA London affordable rents, is unacceptable. There is huge need for genuine SOCIAL rented housing, and all developments should reflect this. In regeneration, no net loss of social rented homes should be acceptable, and replacement of social rented housing that has already taken place should be undertaken to address the loss that has already taken place. I applaud the active resistance shown by the residents of Achilles Street, to the unnecessary redevelopment of their estate, when refurbishment should have been the preferred option</p> <p>4. Do you think that there are other approaches that should be considered? Yes. Explicit encouragement for new developments to include co-operative ownership, or - in the case of social rented housing - development as tenant management organisations from first letting.</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	1	<p>Disagree. The Local Plan takes forward recommendations from the Strategic Housing Market Assessment. It includes a local definition of genuinely affordable housing, with affordability linked to local income levels. This provides that genuinely affordable housing is social rent or London Affordable rent. The council considers this is acceptable, based on local evidence.</p> <p>The Local Plan contains a policy on housing estate regeneration which seeks to ensure no net loss of affordable housing, with an uplift in genuinely affordable housing to be delivered wherever possible.</p> <p>The local plan includes policies on self-build and custom build housing, which are the models most commonly associated with cooperative ownership.</p>	No change.
	Housing	<p>1. Are there other issues around housing that the Local Plan should address? Private rent levels</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Genuinely affordable housing</p> <p>3. Please provide your comments on the topic(s) selected above. Private rents need to be monitored as they are often astronomically high and above the amount for a mortgage. Landlords use rents to pay their own mortgage and the tenants are left with no disposable income and therefore cannot save for a deposit enabling them to buy their own home. The local authority has to pay housing benefit to many tenants including</p>	1	<p>Whilst the concerns are noted, the Council exerts no control over the setting of rents on private or market properties, and this is a matter that cannot be dealt with in the Local Plan.</p>	No change.

		<p>those in high paid job. Essentially the council are helping to pay private landlords mortgages for them.</p> <p>4. Do you think that there are other approaches that should be considered? Set a fair rent across all private tenancies</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>			
Housing	<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Self-build and custom-build</p> <p>3. Please provide your comments on the topic(s) selected above. keep ensuring opportunities for this to happen</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	0	<p>The Local Plan has a standalone policy on self-build or custom-build housing. It promotes this type of development and provides in principle support for such development proposals that help to meet identified needs and secure delivery of the spatial strategy.</p> <p>The Council maintains a self-build and custom-build homes register and has a dedicated webpage where people can register their interest. The Council has and will continue to support local communities with self-build projects within resources available to it.</p>	No change.	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? Ensuring intensification of residential areas doesn't adversely impact on existing residents</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Optimising the use of small sites</p> <p>3. Please provide your comments on the topic(s) selected above. I am very concerned about the proposal to allow developments on small sites in residential areas. Many people move to Lewisham to live in a less urban and polluted environment, yet these proposals seem to point to making Lewisham significantly more urban and, as a result, polluted. Last year a girl died from air pollution in London. The council should be protecting and encouraging small areas of wild greenery in residential areas to support the health and wellbeing of residents and tackle the climate crisis rather than earmarking such sites for development. In addition, there is no mention in the council's proposals of the need for developers of small sites to consider existing residents' homes and the impact any development will have on their light and enjoyment of their home and garden, with a plan to mitigate any negative impacts. This seems to me a crucial oversight. There are many ways developers can design homes and the landscaping around them to retain a feeling of greenery and open space for existing residents, and to avoid residents being overlooked, but they won't if the council doesn't specifically require them. Please address this as a matter of urgency. Housing development in Lewisham should not be done in such a way that it negatively impacts on existing residents' enjoyment of their homes.</p> <p>4. Do you think that there are other approaches that should be considered? Yes, housing should be located in areas where there is space and an opportunity to build local infrastructure and communities rather than 'intensifying' suburban areas. This intensification</p>	8	<p>The London Plan introduces a small sites housing target for all London boroughs, and its policy H2 compels boroughs to boost the delivery of housing on small sites, particularly to meet London's housing needs.</p> <p>Taking the direction of the London Plan, the Local Plan includes policies to support the development of small sites. It includes detailed requirements to ensure that such development responds positively to its local context, including local and historic character as well as amenity of occupiers and surrounding properties.</p> <p>The Council has adopted a Small Sites SPD with guidance to support this approach and ensure new development is sensitive to its local context.</p> <p>Addressing the climate emergency is a key strategic objective of the Local Plan. There are policies included</p>	Local Plan amended to make clear that the optimal capacity of a site is the most appropriate form of development that responds positively to the site's context and supports the delivery of the spatial strategy for the Borough.	

		<p>is in direct opposition to what is required to reduce climate change and will have negative impact on existing residents' wellbeing.</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>		<p>throughout the plan to address this, including the chapter on sustainable design and infrastructure, with a specific policy on improving air quality.</p>	
Housing		<p>1. Are there other issues around housing that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Meeting Lewisham's housing needs</p> <p>3. Please provide your comments on the topic(s) selected above. This is very difficult. The proposals are not wrong but that does not make them right. Housing is a "now" issue and seems to be used as a reason for overlooking other aspects of planning. It is like "saving the NHS" in the Covid crises. The unforeseen consequence will be the demise of the Care Sector. There are too many short term issues here, it is too fragmented, there needs to be a simpler, clearer strategy.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	0	<p>The Local Plan sets out a clear spatial strategy. Whilst housing is an important element of the plan, it is only one element and is balanced by a variety of strategic objectives that will help to deliver Good Growth within the borough.</p> <p>The Local Plan is supported by an Infrastructure Delivery Plan. This sets out the different types of infrastructure required to support the levels of growth planned over the long-term, and includes consideration of health and social care.</p>	No change.
Housing		<p>1. Are there other issues around housing that the Local Plan should address? Amenity Space (both in absolute terms and how it is communally used in blocks with a mixture of private and affordable), Build To Rent, Compulsory Purchase Orders & how you plan to tackle the very difficult issue of vacant houses, lifetime homes standards</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Optimising the use of small sites Meeting Lewisham's housing needs Accommodation for older people</p> <p>3. Please provide your comments on the topic(s) selected above. Broadly the principles are right.</p> <p>Older persons housing - more differentiation within the category of older person housing (extra-care, sheltered) & a greater focus on supporting lifetime flexible homes standards throughout all development to allow more resilient and purposeful stock throughout the borough (added benefits of reducing demand for your adult social care services).</p> <p>Small Sites - Really pro this & Lewisham has done a good job, not least with the work RCKa. In line with the GLAs approach small sites, including those on estate infill, will need to be maximised.</p> <p>Estate Regen - Looks bang on the money! Well linked to Mayors guidance and no-net loss is the right move. Perhaps a linkage to LB Lewisham's decanting strategy (possibly in allocations policy) in addition to link to mayors guidance as this can be the make or break for communities.</p>	0	<p>The draft Local Plan promotes residential accommodation that is designed in a way that allows for easy adaptation to the different needs of users over their lifetime, and takes forward the optional standards for wheelchair accessible and adaptable homes in the London Plan.</p> <p>The draft Local Plan refers to the London Plan for the differentiation between types of specialist accommodation.</p> <p>Vertical extensions are dealt with in the draft Local Plan, both in the High Quality Design section, and Economy and Culture section (air space above commercial units).</p> <p>Part 5 of the Local Plan addresses compulsory purchase.</p> <p>Policy HO1 sets out that the Council will seek to use powers available to it</p>	Local Plan amended to include new policy on Build to Rent.

		<p>4. Do you think that there are other approaches that should be considered? Expanding Build-to-Rent and proactive collaboration with the Housing Association sector could be mentioned. Top-hatting and vertical extension could be a focus.</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? No, looks broadly good.</p>		to bring empty homes and properties back into use.	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? No</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): None selected</p> <p>3. Please provide your comments on the topic(s) selected above. Definitely OPPOSING high rise tower blocks in the area</p> <p>4. Do you think that there are other approaches that should be considered? No</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? No</p>	4	The London Plan acknowledges that tall buildings will make a contribution to meeting the Capital's housing needs. It directs Boroughs to identify locations suitable for tall buildings and set parameters around height and design, which is reflected in the Local Plan. Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.	Local Plan amended with more detailed requirements on buildings heights, informed by the Tall Buildings Study update.	
Housing	<p>1. Are there other issues around housing that the Local Plan should address? There are too many people and too many cars already</p> <p>2. Do you have any comments on the proposed approaches to housing? Select the topic(s): Optimising the use of small sites Converting flats to houses</p> <p>3. Please provide your comments on the topic(s) selected above. I do NOT support the continued development of high-rise blocks in the centre of Catford - they are ugly, and fuel over-crowding (as does the conversion of more and more houses to flats).</p> <p>4. Do you think that there are other approaches that should be considered? How about renovating some of the derelict, empty buildings e.g. The Grove, 520 Lordship Lane - total eyesore, hug building, empty for years - why??</p> <p>5. Do you have any additional comments on the 'Housing' section of the Local Plan? N/A</p>	2	<p>Noted. The London Plan acknowledges that tall buildings will make a contribution to meeting the Capital's housing needs. It directs Boroughs to identify locations suitable for tall buildings and set parameters around height and design, which is reflected in the Local Plan. Since the consultation on the Regulation 18 Local Plan, additional work on a Tall Buildings study has been undertaken, which has informed the Regulation 19 document.</p> <p>The plan also includes policies which protect against the loss of family sized housing units and recognises that one of the routes to boosting housing supply is to bringing back vacant properties back into use.</p>	Local Plan amended with more detailed requirements on buildings heights, informed by the Tall Buildings Study update.	
Economy and Culture	<p>1. Are there other issues around economy and culture that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to employment land? Select topic(s) and comment below Local centres</p>		Noted. Part 3 of the Local Plan has been amended to incorporate the role Hither Green, west of the railway.	<p>Local Plan amended to provide further details for Hither Green, including area west of the railway.</p> <p>Local Plan amended to designate Hither Green Lane as a Local Centre.</p>	

		<p>3. Please provide your comments on the topic(s) selected above (concerning town centres). Staplehurst Road has had so much of our Council Tax invested in it but nothing has been invested on the other side of the railway in Hither Green. Staplehurst Road should not get any more money, it should be spent in other areas of Hither Green that have not been touched for over 20 years. On Springbank Road the pavements outside the shops are a disgrace. Where has all the Section 106 money been spent from the three housing developments (Court Mews, behind the community garden, and near Maythorne Cottages) as well as the shops you mistakenly allowed to be made into flat on on Springbank?</p> <p>4. Do you have any comments on the other proposed approaches to economy and culture? Select topic(s) and comment below A thriving and inclusive local economy</p> <p>5. Please provide your comments on the topic(s) selected above (concerning employment land).</p> <p>N/A</p> <p>4. Do you have any comments on the proposed approaches to town centres? Select topic(s) and comment below</p> <p>Local centres</p> <p>5. Please provide your comments on the topic(s) selected above (concerning town centres).</p> <p>As a resident of Hither Green for 40 years with experience of working in local economic development and specifically in developing town centres , while the overall draft plan has some excellent work, the proposed local centres contain an error that needs correcting. It seems to date back to a misunderstanding of the way the Hither Green has worked for the last 50 years and the future possibilities for the area. Specifically it is clear that Hither Green Lane is the Local Centre for Hither Green in a similar way to Burnt Ash being the local centre for Lee. The very small but perfectly formed Staplehurst road area with its cafes and bars and only 6 actual retail units out of 24 with 12.5% of units closed long term (not 4% as I have read in a council document) is a welcome addition to people in Lee and hither Green but ids not a patch on the Local Centres of Hither Green Lane and Burnt ash, both of which have far more facilities and potentiall . There is no room to expand the offer in Staplehurst road .</p> <p>Hither Green Lane has 57 shops in total with a core area of 28 and two wings of 14 each with 2 other significant units (a supermarket and a gym) on the walking route between the southerly 14 and the core 28. In total Hither Green Lane has 3 small supermarkets , one medium sized supermarket and planning permission for another to open which may have been delayed by the pandemic. In addition it has an environmentally friendly food store which sells unpackaged foodstuffs to local residents who bring their own kitchen containers to the shop. Staplehurst Road on the other hand has 2 small supermarkets , one of which is very small. Even just looking comparing H G Lane's core 28 to Staplehurst Road's 24 sites H G Lane has 4 barbers/ hairdressers vs 2 in Staplehurst, 2 dry cleaners vs 1, 3 Estate agents vs 1 , both have 1 micropub, H G Lane has 9 pure retailers vs 6 and Staplehurst has 10 cafes or restaurants or takeaways vs H G Lanes 7 - but as stated above H G Lane has approx 57 premises in total. If one lives in say Radford Road one thinks of H G Lane as having 44 easily walkable to shops and if one lives in say Woodland street again one thinks of H G Lane as having 44 easily walkable to shops, just a different 44 with the same core of 30 (including the 28, Tesco and the gym). Thus to most people in Hither Green , Hither Green Lane has far more to offer than Staplehurst Road.</p> <p>Turning to the 6 criteria used for selecting a local centre -</p>	82	<p>Noted. The indicators in the Local Centres Topic Paper (2020) have been set to provide a standardised approach for reviewing the centres. In response to this and other comments, the technical paper has been reviewed and updated to acknowledge that Hither Green warrants a Local Centre status.</p> <p>It is recognised however that new permitted Development rights limit the scope for the Council to prevent against the change or use or loss of certain types of commercial premises.</p> <p>Part 3 of the local plan has been amended to incorporate the role Hither Green, west of the railway.</p>	<p>Local Plan amended to provide further details for Hither Green, including area west of the railway.</p> <p>Local Plan amended to designate Hither Green Lane as a Local Centre.</p>	

	<p>1. Anchor present - Staplehurst Road possibly has the edge here although the criteria are a little arbitrary as it has the Station Hotel whereas Hither Green Lane has the very popular Good Hope Cafe, it also has the popular Anytime Fitness Gym</p> <p>2. Publicly accessible Garden or Park - Hither Green Lane has the large popular Mountsfield Park very close nearby which has been used for Peoples Day for over 20 years and is closer to the centre and bigger than the small Manor park. I can see no real connection between Manor House gardens and Staplehurst Road , it is more connected to Lee High Road. Lewisham Park is not far from one end of Hither Green lane but is similarly slightly tenuously connected.</p> <p>3. Sizable Community, health, educational and social infrastructure within 250m - here Hither Green Lane has huge advantages as it has a range - a doctors surgery and health centre actually in the centre, 2 pharmacies, a primary school within a few metres 2 churches both with church halls regularly used for a variety of activity including the ward assemblies at both and a very popular and well used gym. Hither Green Lane also has a studios complex with many artists and filmmakers etc based inside providing vibrancy and workers to support the shops.</p> <p>4. Train Station present. While Staplehurst Road benefits from the station on its doorstep in fact one of Hither green Lane's supermarkets is approx 220m from the side entrance to the station on Springbank road - this is used by thousands of people every day and used to be the main entrance to the station when it was built until the 1970s. Thus Hither Green Lane is very close to the station and i strongly suspect more people enter the station from the west side. Also Hither Green Lane shops have 2 bus routes passing through with 8 bus stops whereas Staplehurst Road only has one route with 2 stops.</p> <p>5. Small supermarket present. As mentioned above Hither Green lane has 4 supermarkets , one, the Co-op, is big enough for people to use trolleys and do a weekly shop, plus another was due to open on the corner of George Lane and there is another food store. Staplehurst road has 2 small supermarkets .</p> <p>6. Housing Growth Planned. This seems a particularly arbitrary and not very logical measure. Places that have seen a large increase in recent years would seem to be more likely to sustain a centre than places where a small increase in housing might be built in future years. Having said that - the justification for Staplehurst Road is that it is near Maythoigne Cottages which is not likely to be developed in the near term and is anyway small, and is furthermore not far from Hither Green Lane. The second mentioned is the Driving Test centre, described as on Nightingale Grove but actually on Ennersdale Road where it is nearer to Hither Green Lane than the Staplehurst Shops! . I am also aware of a proposed new development just off Hither Green Lane but this is confidential at the moment. Looking at development that has taken place over the last 20 years Hither Green Lane has many hundreds of flats and houses on the old Hospital site, and a number of other developments actually on Hither Green Lane itself such as the old Spotted Cow and many small developments in the backs of shops and 6 new residences being built currently on Hither Green Lane at the corner of George Lane. Staplehurst Road has the Biscuit Factory development and a small number of new family houses off Leahurst Road. These developments provide far more sustainability for Hither Green Lane from when it was built than for Staplehurst Road.</p> <p>This rather long comment has ended up comparing Hither Green Lane to Staplehurst Road. It is not my intention to denigrate Staplehurst Road. As a resident of Hither Green on the other side of the railway line I value its presence and use it , and it is a great space for the Christmas fair. However it seems to be providing more of an evening economy base with a few well placed retailers to benefit from footfall to the station. Springbank Road also has some</p>			
--	---	--	--	--

		<p>retailers benefitting in a similar way with a couple of small supermarkets, a gift shop similar to the 2 in Staplehurst Road and some cafes and takeaways though Springbank Road needs council intervention and support far more than Staplehurst Road which with a Youngs pub and a Sainsburys has some Corporate support. Hither Green Lane on the other hand is thought of by local residents as the local centre and as I think I have demonstrated far more of a local centre. Hither green Lane is surrounded by less affluent housing than in Lee and despite being an undesignated road suffers as a cut through for traffic from the A21 to the south Circular . Lewisham Council has proposed investment in Hither green lane to improve its appearance and environment many times in the last 20 years but for one reason and another this has not come to fruition. Thanks to some local independent entrepreneurs and the continued presence of the Co-op supermarket, a newish Tesco and a franchised gym it remains a good local centre but the people of Hither green deserve a better environment and it could be more pleasant and its economy thrive more (cycle facilities are woeful compared to for example Manor Lane). A first step to a better Hither Green Lane should be to declare it for what it is , a local centre , in this new Local Plan.</p> <p>6. Please provide your comments on the topic(s) selected above (concerning employment land). Retaining and providing local employment is really important. Otherwise everyone will be a commuter in or out of the borough. Many local businesses have already relocated out towards the M25.</p> <p>4. Do you have any comments on the proposed approaches to town centres? Select topic(s) and comment below None chosen</p> <p>5. Please provide your comments on the topic(s) selected above (concerning town centres). N/A</p>	1	The draft Local Plan recognises that Lewisham has a characteristically inward looking and small local economy when compared to many other London boroughs. It therefore sets a framework to help grow the local economy and ensure all residents have access to good quality education, training and job opportunities. The plan seeks to deliver new and modern workspace, with a clear strategy to achieve net gains in overall employment floorspace provision. The local plan also introduces new approaches to support the long-term vitality and viability of town centres.	No change.

Please provide your comments on the topic(s) selected above (concerning employment land).</p> <p>Policies EC14 and EC15 are too inflexible i.e. one size fits" for all designated centres. In relation to Lewisham town centre, the primary shopping area (PSA) has been drawn to widely, and does not reflect the likely post Covid World/reducing demand for brick and mortar retailing. The following areas should be excluded from the PSA: Lewis Grove (east and west side); Lewisham High Street (east side) from Santander to Barclays Bank; Lewisham High Street - west side north of Boots and south of Primark; and Lewisham High Street east side south of St Saviours Church. There is no need or reason to retain 50% retail uses in these areas, even if it was enforceable with the new UCO. Retail use should be retained in a tighter core focused within and around Lewisham Shopping Centre and market where all retail uses should be retained (not just 50%), given the increased flexibility elsewhere. Food/beverage, leisure and entertainment hubs should be actively promoted to address the existing deficiency in the town centre, particularly areas for outdoor dining. Two hubs should be encouraged i.e. at the south end of Lewisham High Street (south of Primark and St Saviours Church), including the redevelopment of Lewisham Model Market and numbers 192 to 212 Lewisham High Street). The units between Santander and Barclays east side of the High Street are suitable for food/beverage uses and outdoor dining. This balanced mix of uses will make the town centre more attractive to visit during the day-time and evenings and secure its long term vitality and viability. The current approach proposed in the plan is effectively status quo, which is unsound in a rapidly changing social and economic environment for all town centres. The site</p>	0	<p>Noted. The Local Plan has been amended to remove the threshold approach to retaining A1 and reflect changes to the Use Class Order, including the new Class E.</p> <p>However, it is still considered appropriate to set a threshold target for Lewisham major centre as it is the principal centre in the borough. Flexibility is provided within the policy to ensure that requirements are not overly prescriptive.</p> <p>The extent of the Primary Shopping Areas are considered appropriated. These were reviewed in line with the Schedule of Changes to the Policies Map.</p>	Local Plan amended to remove the threshold approach to retaining A1 and reflect changes to the Use Class Order, including the new Class E.	

		<p>specific allocations in Lewisham town centre should also be changed to reflect the approach outlined above (see further comments submitted).. .</p> <p>4. Please provide your comments on the topic(s) selected above (concerning town centres). Policies EC14 to EC18 are out of date and do not reflect the longer term implications of Covid-19 and recent changes to the NPPF and Use Classes Order. Prioritising retail (Class A1 - which no longer exists as a use class) is no longer appropriate or achievable e.g. retaining 50% in the primary shopping area is not appropriate or enforceable. The retail capacity study projections are out of date and need to be updated to reflect the post Covid World. The need for new comparison retail floorspace is likely to be negative. This study does not adequately assess the potential for non-retail uses. Policy must allow town centres to diversify in particular the evening economy in Lewisham town centre needs to be improved. Restricting takeaways</p>	0	<p>Noted. The local plan has been amended to remove the threshold approach to retaining A1 and reflect changes to the Use Class Order, including the new Class E.</p> <p>However, it is still considered appropriate to set a threshold target for Lewisham major centre as it is the principal centre in the borough. Flexibility is provided within the policy to ensure that requirements are not overly prescriptive.</p> <p>Following regulation 18 consultation, a Retail Impact Assessment and Town Centre Trends has been undertaken which updates the comparison floorspace requirement of the Lewisham Retail Capacity Study Update 2019 in line with changing consumer habits such as increased online shopping.</p> <p>The London Plan (2021) - which the local plan has to be in conformity with</p>	<p>Amend local plan to remove threshold approach to retaining A1 and reflect changes to the Use Class Order, including the new Class E.</p> <p>Amend local plan with updated floorspace requirements set out in Town Centre Trends Study (2021).</p> <p>Amend local plan policy on concentration of uses to reflect changes to the Use Class Order.</p>

		<p>within 400 metres of all schools is effectively an embargo as it will cover all designated centres and most of the borough. This restriction should only apply to secondary schools not primary as well.</p> <p>6. Do you have any comments on the other proposed approaches to economy and culture? Select topic(s) and comment below Local centres Town centre network and hierarchy Town centres at the heart of our communities</p> <p>5. Please provide your comments on the topic(s) selected above (concerning town centres).</p>	3	<p>The local plan acknowledges the challenges facing town centres and high streets, such as changing consumer behaviours and the rise of online shopping. The Plan seeks to ensure that town centres can adapt and evolve to respond to these challenges and direct future growth and investment within them. Furthermore, the Plan encourages new markets where they complement Lewisham's town centre network and hierarchy.</p> <p>Following the Regulation 18 consultation, the Council has undertaken work on additional evidence for town centres, taking into account the impact of Covid-19. This</p>	No change.	

		<p>One of the things Covid 19 has brought to our attention is the nature of shopping and the place of the high street. It is clear that town centres will take on a very different aspect in the coming years. Rather than wait for decline and decay, it is important to be proactive in restructuring the high street. For a rejuvenation and revitalising of this part of our community, we need to recognise that shopping centres will re-emerge much more like markets with less commercial outlets dependent on large landlords, and more pop-up facilities where local entrepreneurs can expand their businesses. The markets will best be organised around more open spaces that provide the flexibility and cultural opportunities that are so restricted in big shopping malls. They should also provide greater access to the sites of manufacture and creation.</p> <p>6. Do you have any comments on the other proposed approaches to economy and culture? Select topic(s) and comment below None chosen</p> <p>7. Please provide your comments on the topic(s) selected above (concerning economy and culture). N/A</p> <p>8. N/A</p>		<p>has informed the Regulation 19 Local Plan.</p>	
	<p>Economy and Culture</p>	<p>1. Are there other issues around economy and culture that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to employment land? Select topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above (concerning employment land). N/A</p> <p>4. Do you have any comments on the proposed approaches to town centres? Select topic(s) and comment below Local centres Shopping parades and corner shop</p> <p>5. Please provide your comments on the topic(s) selected above (concerning town centres). The shops west of the tracks in Hither Green have not been considered at all.</p> <p>6. Do you have any comments on the other proposed approaches to economy and culture? Select topic(s) and comment below None chosen</p>	<p>3</p>	<p>Noted. The indicators in the Local Centres Topic Paper (2020) have been set to provide a standardised approach for reviewing the centres. In response to this and other comments, the technical paper has been reviewed and updated to acknowledge that Hither Green warrants a Local Centre status.</p> <p>Part 3 of the local plan has been amended to incorporate the role Hither Green, west of the railway.</p>	<p>Local Plan amended to provide further details for Hither Green, including area west of the railway.</p> <p>Local Plan amended to designate Hither Green Lane as a Local Centre.</p>

		<p>7. Please provide your comments on the topic(s) selected above (concerning economy and culture). Include Hither Green west if the tracks. The forgotten ward.</p> <p>8. Do you think that there are other approaches that should be considered? Hither Green west of the tracks.</p> <p>9. Do you have any additional comments on the 'Economy and Culture' section in the Local Plan? No</p>			
	Economy and Culture	<p>1. Are there other issues around economy and culture that the Local Plan should address? Make things organic, let local people progress economic development and it then becomes sustainable.</p> <p>2. Do you have any comments on the proposed approaches to employment land? Select topic(s) and comment below Working from home</p> <p>3. Please provide your comments on the topic(s) selected above (concerning employment land). This is not going to go away and will become a larger way of working; better broadband internet connectivity is needed.</p> <p>4. Do you have any comments on the proposed approaches to town centres? Select topic(s) and comment below Optimising use of land and floorspace</p> <p>5. Please provide your comments on the topic(s) selected above (concerning town centres). Repurpose redundant space where possible rather than demolish. And if it is a new development put flexibility of use at the heart of proposals so that we do not waste resources.</p> <p>6. Do you have any comments on the other proposed approaches to economy and culture? Select topic(s) and comment below Markets</p> <p>7. Please provide your comments on the topic(s) selected above (concerning economy and culture). Markets are great social spaces as well as commercial and this needs to be recognised.</p> <p>8. Do you think that there are other approaches that should be considered? N/A</p> <p>9. Do you have any additional comments on the 'Economy and Culture' section in the Local Plan? N/A</p>	2	<p>With regard to enabling home working, the Local Plan is supported by an Infrastructure Delivery Plan, which sets out infrastructure required to support growth planned for, including digital and broadband infrastructure. The Local Plan also includes policies to ensure this is secured as new development comes forward.</p> <p>The Local Plan takes a positive approach to markets. The Plan seeks to enhance and protect existing markets and encourage new markets where they complement and support Lewisham's town centre hierarchy.</p> <p>The Local Plan includes policies to ensure that new developments deliver commercial space that is designed to enable flexibility and adaptation for a wide range of uses and users over its lifetime.</p> <p>It also includes policies dealing with meanwhile uses, to take up temporary space.</p>	No change.
Com muni		<p>1. Are there other issues around community infrastructure that the Local Plan should address?</p>	0	The Council has prepared an Infrastructure Delivery Plan (IDP)	No change.

<p>ty Infra struc ture</p>		<p>Poor playspace maintenance, insufficient playspace, loss of leisure facilities, commitment to community involvement and consultation prior to changes being made</p> <p>2. Do you have any comments on the proposed approaches to community infrastructure? Select the topic(s) and comment below</p> <p>Safeguarding and securing infrastructure New and enhanced community infrastructure Play and informal recreation</p> <p>3. Please provide your comments on the policy topic(s) selected above.</p> <p>The closure of the Bridge Leisure centre is at odds with the aspirations in the plan. The south end of the borough desperately needs leisure facilities. Children need to learn to swim and families need access to a local pool. Communication has been poor, with residents left to set up a facebook group to share scant information. A firm commitment not to sell the playing fields / pitches would be welcome. The idea that families must pay to travel to other facilities is unrealistic, adding additional cost together with poor transport connections.</p> <p>Wording about consolidation and making better use of land suggests the intention to continue to sell off community assets for housing. There is a contradiction here as dense populations will need nearby community facilities more than ever. Families in compact accommodation need safe and enriching play space.</p> <p>Genuine community consultation should be at the heart of the policy, as it is these people that will play a major role in running the centres. The plan is disappointing in this respect and does not reference research on best practice.</p> <p>Policy points allowing the loss of playspace based on subjective assessment of 'a shortfall of provision in the locality, having regard to existing and projected future need' are very concerning. This does not put children at the heart of planning, at a time when the borough is seeing population growth.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Maintenance of play spaces is poor and needs better commitments. The Horniman Play Park is shown in the plan, however it has 3 out of 4 swings missing. There are also broken climbing nets and a sand play area in desperate need of replacement and repair. The borough needs to do much better for children. Other parks are severely neglected and even a small investment and some community involvement would get them looking a lot better (eg Kirkdale Green).</p> <p>Some parks (eg Horniman) are also used by a large number of visitors to the borough, as well as local residents. Has this been included in the usage assessments?</p> <p>An investment programme for existing leisure facilities to keep them up to date and in good repair?</p> <p>5. Do you have any additional comments on the 'Community Infrastructure' section of the Local Plan?</p> <p>It looks like this section has been written as an afterthought and it is disappointing. Several existing infrastructure issues have not been documented. It seems that consultation is being avoided or is done grudgingly to go through the motions. If done correctly, it has been shown to deliver better outcomes.</p>	<p>alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure and community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p> <p>Further, Policy CI3 (E) provides mechanism to protect existing community facilities against losses. The policy states that development proposals that result in the net loss of existing play space will be strongly resisted unless specific conditions are met.</p> <p>The Lewisham Open Spaces Assessment (2019) and the review (2021) are robustly prepared. The methodology is aligned with good practice including PPG17 and Sports England methodology. The study carried out an audit of formal play provision in the Borough. This concluded that whilst there is satisfactory provision across the Borough there are deficiencies present in some areas, most notably to the south-east of Catford. To resolve this, the study suggest that all new development should seek to increase opportunities for play, including by enhancing existing provision, particularly in areas where there are deficiencies. This includes consideration for the types of provision required by different age groups.</p> <p>The Local Plan sets requirements to ensure that new development including play space is appropriately managed over the lifetime of the development. Otherwise the maintenance of play spaces is outside the scope of the Local Plan.</p>

		<p>3. Please provide your comments on the policy topic(s) selected above. We need more spaces for children to play - whether they be parks/parklets or dedicated playgrounds or both, there should be more public free provision for childhood recreation.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Community Infrastructure' section of the Local Plan? N/A</p>		<p>address areas of deficiency in play space.</p> <p>The Local Plan takes forward the London Plan housing standards, including the minimum standards for children's play space.</p>	
Community Infrastructure		<p>1. Are there other issues around community infrastructure that the Local Plan should address? Revival of our high street as the centre for the community will need to be considered. A revived high street can be a catalyst to bring community together support local businesses and employment.</p> <p>2. Do you have any comments on the proposed approaches to community infrastructure? Select the topic(s) and comment below Other: High Street Revival</p> <p>3. Please provide your comments on the policy topic(s) selected above. Please create a policy to address this issue</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Community Infrastructure' section of the Local Plan? N/A</p>	1	<p>The Local Plan sets a positive framework in place to support the long term vitality and viability of town and local centres. It includes policies and site allocations to enable the revitalisation and regeneration of selected centres. Further area-specific policies are set out in Part 3 of the Local Plan.</p>	Local Plan amended to better reflect that community uses are appropriate uses within town centres.
Community Infrastructure		<p>1. Are there other issues around community infrastructure that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to community infrastructure? Select the topic(s) and comment below New and enhanced community infrastructure</p> <p>3. Please provide your comments on the policy topic(s) selected above. I mentioned it before on another area in this (very overwhelming and confusing) consultation: Rules should be much stricter to make sure the ground floor of new buildings is actually utilised for communal infrastructure. For example for cycle storage, communal spaces (benches, communal resident-run libraries, play areas) and things like click-and-collect lockers for all the online shopping that everyone will be doing. Not just retail, which always takes ages to arrive, or never does, leaving the ground floor unoccupied and drab. These areas could be so useful and add value immediately, even if the building itself is still being finished or fitted out. Instead it's neglected and just takes up valuable space.</p> <p>4. Do you think that there are other approaches that should be considered? Where developers have secured land but have not yet started building or the site has been mothballed for some reason, this should be returned to the council and the public for use, even if it's just a few months. Just put a few benches and plants there, maybe some trees in</p>	2	<p>Noted. The Local Plan design policies include requirements and guidelines around community amenity space in buildings, including for cycle parking and storage.</p> <p>The Part 2 Transport section includes policies dealing with delivery, servicing and construction. These address the need for developments to design in space appropriate to the use, whether for housing or commercial uses.</p> <p>The Local Plan includes policies on meanwhile uses, which provide flexibility for different types of temporary uses within sites where buildings are vacant, awaiting occupation, or where redevelopment is proposed.</p>	No change.

		<p>containers so they can be moved to a different site later on. Turn it into a temporary park or maybe even allotments or shared veg patches. Anything (!) other than a hoarded mothballed building site, so residents can get some use out of it for some time (often years).</p> <p>5. Do you have any additional comments on the 'Community Infrastructure' section of the Local Plan?</p> <p>N/A</p>			
Community Infrastructure		<p>1. Are there other issues around community infrastructure that the Local Plan should address? The Fifteen Minute Neighbourhood is a good ideal to aim for</p> <p>2. Do you have any comments on the proposed approaches to community infrastructure? Select the topic(s) and comment below New and enhanced community infrastructure</p> <p>3. Please provide your comments on the policy topic(s) selected above. A) Community gardens and/or allotments are popular and reduce food miles. B) the stallholders at Deptford Market tell me that the fees are crippling; to encourage a circular economy we need more stalls not stalls going bust.</p> <p>4. Do you think that there are other approaches that should be considered? Along the Thames footpath, there are long stretches where there are no cafes or Pubs. This seems like a missed opportunity since where they do exist they are generally well patronized.</p> <p>5. Do you have any additional comments on the 'Community Infrastructure' section of the Local Plan?</p> <p>N/A</p>	4	<p>The spatial strategy for the borough sets out the approach to ensure different land-uses are integrated, and development located and designed in a way to support liveable neighbourhoods. It is acknowledged that a reference could be made to the 15-minute neighbourhood concept for clarity.</p> <p>Further, the local plan supports allotments and community gardens provision where is needed in our local communities. Part 2 Policy GR5 requires major development proposals for residential and community uses to incorporate provision for food growing.</p> <p>The Local Plan takes a positive approach to markets. The Plan seeks to enhance and protect existing markets and encourage new markets where they complement and support Lewisham's town centre hierarchy.</p> <p>The site allocations policies for Convoys Wharf make provision for improvements to the riverside area, including the Thames Path. They will enable appropriate commercial uses at the ground floor of buildings, to support the revitalisation of the riverside area.</p>	<p>Spatial strategy amended to make clear this supports the '15-minute' neighbourhood concept.</p>
Community Infrastructure		<p>1. Are there other issues around community infrastructure that the Local Plan should address? There is little or no mention of the role the commercial sector can/should play in the delivery of facilities</p> <p>2. Do you have any comments on the proposed approaches to community infrastructure? Select the topic(s) and comment below Play and informal recreation</p> <p>3. Please provide your comments on the policy topic(s) selected above.</p>	0	<p>Part2 Policy CI1 covers development proposals for major and other developments which includes commercial development.</p> <p>The draft Local Plan Part 2 Policy CI1 requires development proposals for major and other development to plan positively to meet local area needs for community infrastructure.</p>	<p>No change.</p>

		<p>The lack of childrens play space on equipment in some localities is very noticeable and would not cost much to address.</p> <p>4. Do you think that there are other approaches that should be considered? The role of the commercial (and to an extent the voluntary sector) has not been given sufficient consideration</p> <p>5. Do you have any additional comments on the 'Community Infrastructure' section of the Local Plan? N/A</p>		<p>The Local Plan includes a policy on play and informal recreation, and seeks to address areas of deficiency in play space.</p> <p>The Council's Parks and Open Spaces Strategy also sets priorities for investment in parks and open spaces.</p> <p>Part 5 of the Local Plan sets out arrangements for the delivery of the plan. This provides that a wide range of stakeholders will support its delivery.</p>	
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address? Protecting mature trees</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below Urban greening and trees</p> <p>3. Please provide your comments on the topic(s) selected above. The mature trees need more protection. I've noticed several removed after being heavily pollarded. This should be a last resort. If subsidence is the issue insurance companies should be exploring other options such as underpinning. Immediate locals need to be involved & informed why trees are removed. This will encourage engagement.</p> <p>4. Do you think that there are other approaches that should be considered? Downham ward feels very neglected. It's main shopping st Old Bromley Rd is the main traffic route between Lewisham & Bromley. It's large pavements could accommodate large trees which would absorb pollution not to mention give this street a much needed lift.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan? Locals need to be involved in decisions on their street. This will encourage interest.</p>	0	<p>The Lewisham local plan provides policy to protect important trees in the Borough. Part 2 Policy GR4 requires development proposals to retain existing trees and associated habitat and to maximise the opportunities for additional tree planting and green infrastructure within the urban settings.</p> <p>The Council's adopted Statement of Community Involvement sets out how the public will be involved in planning decisions. The Council has also established governance arrangements for Community Infrastructure Levy, where communities can set priorities for the spending of infrastructure funding locally.</p>	No change.
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address? I may have missed it but there are small things the Council can do when building or agreeing planning proposals which will make a big difference- like making swift boxes and hedgehog highways mandatory on buildings. Other things could be to plant wildflowers on grass verges and ensure that there are wild areas left in parks and common ground. Trees are very important and there should be more publicity given to the need to maintain and plant more trees.</p>	0	<p>Part 2 Policy GR4 requires development proposals to retain existing trees and associated habitat and to maximise the opportunities for additional tree planting and green infrastructure within the urban settings.</p> <p>Noted. The Local plan includes policies on nature conservation and</p>	Local Plan amended with addition policy on Biodiversity Net Gain.

		<p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below Biodiversity and access to nature Urban greening and trees Open space and Lewisham’s green grid</p> <p>3. Please provide your comments on the topic(s) selected above. Lewisham is very green - I like the Ravensbourne river walk but the Council must make sure - even with economic constraints that areas like this are kept free of rubbish and the river is kept pollution free and areas that become congested with rubbish and littered are regularly cleaned.</p> <p>Beckenham Place park is a great example of what can be done when the Council invests and implements green plans - more wildflower areas could be planted and nest and bat boxes put up for birds and bats.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan? N/A</p>		<p>biodiversity. However it is recognised that further details could be provided to align with provisions in the Environment Act 2021.</p> <p>The Local Plan includes policies for waste management. However, sanitation and rubbish maintenance is outside the scope of this plan.</p>
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address? Food security and horticulture - food growing spaces can provide fresh produce for all, reduce food miles and air pollution through reduced transportation and can also bring communities together.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below Food growing</p> <p>3. Please provide your comments on the topic(s) selected above. There isn't much mention of extending food growing within the borough despite the huge problem of food insecurity which is about to get worse. Good quality fresh food isn't really available to all and Lewisham should be doing more in this area. The borough could promote some of the excellent practice already happening in the area - social supermarkets, the allotment based Grow to Give schemes as well as thinking about sites purely for urban horticulture - which could provide jobs, training and incomes for local youth and others.</p> <p>4. Do you think that there are other approaches that should be considered? Yes - there should be a food growing space in all areas - and parks. A place where those without the means to buy fresh organic foods can help and pick their own. There are great examples of forest gardens, orchards and urban farms that should be promoted more widely (as a member of the recently formed Grow Lewisham this is what we are hoping to provide cross borough)</p> <p>Alternative ways of sequestering carbon and enhancing / cleaning soils, reducing pests with natural methods instead of insecticides and herbicide could be researched. It would make a huge difference to communities and less well off members of the community who tend not to use the 'pretty' parks so much.</p>	2	<p>The Lewisham Local Plan Part 2 Policy GR5 encourages spaces for community gardening and food growing. Further, it ensures that allotments and community gardens are protected in order to support sustainable food growing and promote the opportunities for leisure, social interaction and education.</p> <p>No change.</p>

		<p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>***We've removed personal information such as name, phone, email to protect user identity***</p>			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>I am concerned that the Sites of Interest for Nature Conservation are not offered strong enough protection. Policies on Grove Park Ward should pay closer attention the Neighbourhood Plan. Emphasis should be placed on the delivery of the district park and the renewal of Grove Park crossroads and environment. Metropolitan Open Land needs greater protection for its biodiversity and geodiversity. The community infrastructure levy should be used to pay for the new district park. Fig 3.3 purportedly shows green infrastructure, but only seems to include the formal parks. If it is just the parks, then it should be relabelled, otherwise it should include ALL green infrastructure, including Metropolitan Open Land, SINCs, nature reserves, green corridors, etc. Some green space maps miss a significant part of the MOL land in Grove Park.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure Open space and Lewisham's green grid Biodiversity and access to nature Urban greening and trees Food growing Geodiversity</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>There should be far greater protection to prevent any development plans along the Green corridor from the South Circular to St Augustine's Church at Grove Park. Priority should be changed from the provision of housing to the preservation of wildlife and Green sites. Dark sky site at Grove Park Community Group must be given top priority as this is the only Dark Sky Site in South London. Greater protection must be given to the wild variety of wildlife along the "Green corridor" running at the side of the Railway. Protection must be given to all of these sites against developers in particular speculators such as the one currently owning the wildlife space to the rear of Stratfield house!</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Total protection for Metropolitan Open Land against any form of Development</p> <p>Identify and build in protection for wildlife</p> <p>Total protection for Dark Sky site</p> <p>Total preservation for all allotment sites</p> <p>Forward planning of Street Trees so that younger ones are planted long before mature ones need to be removed. Ensure speculators are informed there is no possibility of any development of the land.</p> <p>Prioritise Green Space.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	1	<p>Part 2 Policy GR should be read alongside other policies in the local plan. There are specific policies in the local plan that relates to the protection of Nature Conservation sites. For example, Part 2 Policy GR3 sets out measures to protect Nature Conservation Sites in order to preserve or enhance priority habits and species, as well as to help ensure the public benefits from easy access to green spaces with wildlife value.</p> <p>Further, Metropolitan Open Land (MOL) SINCs and local green space designation are being progressed through the Council's current open space and MOL review. This will inform policy development concerning open space designations.</p> <p>The local plan has been prepared having regards to the Grove Park Neighbourhood Plan, and through consultation with the Grove Park Neighbourhood Forum.</p>	Local Plan policies on green infrastructure revised to reflect the outcomes of new Open Space and Metropolitan Open Land Reviews.

Green Infrastructure	<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>There should be far greater protection to prevent any development plans along the Green corridor from the South Circular to St Augustine's Church at Grove Park. Priority should be changed from the provision of housing to the preservation of wildlife and Green sites. Dark sky site at Grove Park Community Group must be given top priority as this is the only Dark Sky Site in South London. Greater protection must be given to the wild variety of wildlife along the "Green corridor" running at the side of the Railway. Protection must be given to all of these sites against developers in particular speculators such as the one currently owning the wildlife space to the rear of Stratfield House. This person has already destroyed trees and gone against the opinion of ecologists who have seen the site. As a multimillionaire, petty fines are no protection for the environment against such individuals. Allotments must be preserved and protection given to holders who may go through periods of ill health or are carers. Wildlife.</p> <p>2. Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>There should be far greater protection to prevent any development plans along the Green corridor from the South Circular to St Augustine's Church at Grove Park. Priority should be changed from the provision of housing to the preservation of wildlife and Green sites. Dark sky site at Grove Park Community Group must be given top priority as this is the only Dark Sky Site in South London. Greater protection must be given to the wild variety of wildlife along the "Green corridor" running at the side of the Railway. Protection must be given to all of these sites against developers in particular speculators such as the one currently owning the wildlife space to the rear of Stratfield House. This person has already destroyed trees and gone against the opinion of ecologists who have seen the site. As a multimillionaire, petty fines are no protection for the environment against such individuals. Allotments must be preserved and protection given to holders who may go through periods of ill health or are carers. Wildlife species need to be identified, recognised and given greater protection than they currently have.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure Biodiversity and access to nature Urban greening and trees Food growing</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>I am concerned that the Sites of Interest for Nature Conservation are not offered strong enough protection. Policies on Grove Park Ward should pay closer attention to the existing Neighbourhood Plan. Emphasis should be placed on the delivery of the district park and the renewal of Grove Park crossroads and environment.</p> <p>Metropolitan Open Land needs greater protection for its biodiversity and geodiversity. The community infrastructure levy should be used to pay for the new district park.</p> <p>Fig 3.3 purportedly shows green infrastructure, but only seems to include the formal parks. On open space typologies refer to figure 10.2.</p>	
Green Infrastructure	<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Feel there should be far greater protection to prevent any development plans along the Green corridor from the South Circular to St Augustine's Church at Grove Park. Priority should be changed from the provision of housing to the preservation of wildlife and Green sites. Dark sky site at Grove Park Community Group must be given top priority as this is the only Dark Sky Site in South London. Greater protection must be given to the wild variety of wildlife along the "Green corridor" running at the side of the Railway. Protection must be given to all of these sites against developers in particular speculators such as the one currently owning the wildlife space to the rear of the Ringway. This person has already removed trees in breach of the protection order. As a multimillionaire petty fines are no protection for th4e environment against such individuals. Allotments must be preserved and protection given to holders who may go through periods of ill health or are carers. Wildlife species need to be identified, recognised and given greater protection than they currently have.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure Biodiversity and access to nature Food growing Urban greening and trees Restore lost equestrian and golf provisions Geodiversity Open space and Lewisham's green grid</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Total protection for Metropolitan Open Land against any form of Development</p> <p>Identify and build in protection for wildlife</p>	0	<p>Polices contained in the Lewisham's local plan offers greater protection to green infrastructure network including Green Corridor from South Circular to St. Augustine's Church at Grove Park.</p> <p>The Council has commissioned an Open Space Review that has informed land-use designations to provide the appropriate protection for green and open spaces, including green corridors.</p> <p>The Dark Sky Site falls within boundary of designated MOL and is therefore afforded the same status and level of protection as Green Belt in line with the London Plan.</p> <p>Part 2 Policy GR1 ensures that green infrastructure are protected and enhanced across the Borough including creating new links between green infrastructure assets.</p>	Local Plan policies on green infrastructure revised to reflect the outcomes of new Open Space and Metropolitan Open Land Reviews.

		<p>Total protection for Dark Sky site</p> <p>Total preservation for all allotment sites</p> <p>Forward planning of Street Trees so that younger ones are planted long before mature ones need to be removed. Far greater soil are around base of tree not silly little area that is currently given.</p> <p>Closer links with Wildlife groups e.g R.S.P.B. Bee Groups, Butterfly groups, Hedgehog Groups etc</p> <p>4. Do you think that there are other approaches that should be considered? Ensure speculators are informed there is no possibility of any development on green or wildlife land</p> <p>Any building application should be refused by planning department, not as happened with site behind Ringway.</p> <p>Prioritise Green Space over Housing.</p> <p>Preserve Family Homes</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan? Made clear that Preservation and Conservation does Not equal Regeneration. More of the Former. The mistakes made at The Green Man site and Beckenham Place park illustrate this. There is now no public Golf course for the younger generation, and the loss of free on site parking has resulted in problems for surrounding residents and organisations, Churches etc.</p>			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address? Lack of commitment to positive action to improve green infrastructure is disappointing</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below Green infrastructure Open space and Lewisham's green grid Urban greening and trees Biodiversity and access to nature</p> <p>3. Please provide your comments on the topic(s) selected above. The borough is lacking in green space and there is little enthusiasm for protecting mature trees, leaving residents to spend time and money trying to be heard. Playspace needs to be more highly valued and protected. The planting in parks is often lacking biodiversity and not well cared for. Engaging community groups would engage volunteers in improving spaces for everyone. During lockdown, much better bin provision is required. The increases in park users is now predictable and more bins would reduce the litter problems. The decision on what is quality design seems to be subjective and should be referred to independent experts. Areas of special character are being ignored.</p> <p>4. Do you think that there are other approaches that should be considered?</p>	0	<p>Disagree. The Local Plan contains a wide range of measures that support the creation, protection and enhancement of green infrastructure network. Part 2 policies require development proposals to maximise opportunities for enhancing existing green infrastructure and creating new provision.</p> <p>Further, Lewisham's local plan offers adequate protection to highly valued open spaces and green infrastructure network. Part 2 Policy GR2 offers protection to open spaces and green infrastructure network from inappropriate development.</p> <p>The public consultation has been carried out in accordance with the Council's adopted Statement of Community Involvement.</p>	Local Plan amended to require that ecological surveys are carried out by a chartered ecologist.

		<p>Better scrutiny of biodiversity statements and tree planting & maintenance plans is needed, with engagement from independent environmental and community groups. The planning department have admitted they do not have the capacity to critically review all of these documents. Developers are allowed to submit unrealistic statements about tree planting, specifics such as the intended width and breadth of planned trees would quickly highlight where tree planting plans are unrealistic. Details of hours of direct daylight are also vital but missing.</p> <p>If Lewisham want to pursue densification, they must commit to do better on this. Otherwise it makes a mockery of the climate emergency declaration. There should be positive and productive conversations with residents - the outcome being an improved green environment for everyone. This could be achieved at relatively little cost, positive conversations are possible - why doesn't Lewisham advocate for this? There are many people doing good work on the ground who are not consulted, meaning that knowledge is not shared.</p> <p>Protection is needed for nature reserve and pockets of land that provide a nature corridor. Green spaces are so highly valued in lockdown and are really important for people's mental health.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>The approach to community consultation is restrictive and unimaginative. Expertise in the community is underestimated and ignored.</p>			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Stop replacing paving slabs with impermeable surfacing such as tarmac. Southwark use Porous surfaces around trees. Lewisham should adopt the same practice.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Biodiversity and access to nature Green infrastructure Urban greening and trees</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Plant more shrubs instead of having excessively wide pavements. Southwark have done a great job of this along the new Kent road. Allow more space around street trees to allow residents to under plant. This is done in Lambeth and looks great. Slope pavements towards trees/ flower beds to help alleviate flooding</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	0	<p>The draft Local Plan includes provisions around tree planting and increasing permeable surfaces cover, including through Sustainable Drainage Systems.</p> <p>Part 2 Policy GR4 requires development proposals to maximise the opportunities for tree planting and green infrastructure.</p> <p>There are Permitted Development Rights for which the Council exercises no planning control (such as paving over of front gardens).</p>	No change.
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p>	2	<p>Part 2 Policy GR should be read alongside other policies in the local plan. There are specific policies in the local plan that relates to the protection of Nature Conservation sites. For example, Part 2 Policy GR3</p>	Local Plan policies on green infrastructure revised to reflect the outcomes of new Open Space and Metropolitan Open Land Reviews.

		<p>Green infrastructure</p> <p>3. Please provide your comments on the topic(s) selected above. I am concerned that the Sites of Interest for Nature Conservation are not offered strong enough protection. Policies on Grove Park Ward should pay closer attention the Neighbourhood Plan. Emphasis should be placed on the delivery of the district park and the renewal of Grove Park crossroads and environment.</p> <p>4. Do you think that there are other approaches that should be considered? Metropolitan Open Land needs greater protection for its biodiversity and geodiversity. The community infrastructure levy should be used to pay for the new district park.</p> <p>Fig 3.3 purportedly shows green infrastructure, but only seems to include the formal parks. If it is just the parks, then it should be relabelled, otherwise it should include ALL green infrastructure, including Metropolitan Open Land, SINCs, nature reserves, green corridors, etc. Some green space maps miss a significant part of the MOL land in Grove Park.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan? The wild corridor that runs along the train sidings from the south circular to grove park is under serious threat from property developers. The green land where Willow Tree Riding School once stood and the area of wooded land next to Railway Children walk are both under threat from separate developers who have used dubious approaches to gain the land. These green spaces need to be saved for the community and future generations. Once they are lost they are gone forever. The areas in question include various habitats including a incredibly rare wet wood, grass and swamp lands that accommodate all sorts of wildlife including crested newts, bats, butterflies, toads, etc. They also contribute to the air quality.</p>

Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>The importance of enhancing biodiversity in the built environment has not been fully explored, eg, swifts and other building-dependent birds.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>None chosen</p> <p>3. Please provide your comments on the topic(s) selected above.</p>	5	<p>Local Plan Part 2 Policy GR3 seeks to deliver net gains in Biodiversity.</p> <p>Specific local biodiversity requirements has been captured in the Council's Biodiversity Action Plan. The Lewisham local plan requires developers to refer to the local Biodiversity Action Plan which sets out vision and opportunities on biodiversity for the Borough including information on detailed priority</p>	No change

	<p>GR3 Biodiversity and access to nature:</p> <p>A requirement should be included for all new developments to incorporate suitably located 'integrated swift bricks'. This biodiversity feature is a universal artificial bird nesting chamber which provides nesting habitat for swifts and other birds. Smaller building projects should similarly incorporate swift bricks, external swift boxes or swift soffit boxes. Existing swift nest sites should be identified, registered and pro-actively protected throughout the year from destruction, and not just protected in principle during the nesting season only.</p> <p>See:</p> <p>Swift Conservation: https://swift-conservation.org/</p> <p>Action for Swifts: https://actionforswifts.blogspot.com</p> <p>Justification:</p> <p>The UK's swift population declined by 53% between 1995 and 2016; consequently, swifts now qualify for 'endangered' status on the BTO's species list of conservation concern, indicating 'a need for urgent conservation action'. A major factor for the decline is believed by experts to be the loss of swifts' habitual natural nest sites in older buildings, through demolition and renovation works. Modern building practices lack the small spaces required by swifts for nesting.</p> <p>Increasing nesting and roosting habitat is highly effective in supporting bird species, especially building-dependent birds, thereby promoting biodiversity. Integrated swift bricks provide permanent nesting and roosting habitat for a range of bird species. They are maintenance-free, aesthetically inoffensive and provide a thermally stable nesting environment.</p> <p>Existing populations of bird species need to be protected, particularly building-dependent birds. Currently birds' nests are only protected by law during the breeding season. Swifts in particular are highly vulnerable to nest destruction, as they are nest-faithful and do not adapt readily to new nest sites. The benefits of artificially increasing nesting habitat is currently disregarded by DEFRA in their assessment of 'biodiversity net gain',</p> <p>Inclusion of swift bricks in construction work will comply with current policy:</p> <p>National Planning Policy Guidance:</p> <p>https://www.gov.uk/guidance/natural-environment:</p> <p>Paragraph: 023 Reference ID: 8-023-20190721:</p> <p>'Planning conditions or obligations can be used..... to achieve biodiversity net gain..... The work involved may.....involve creating new habitats, enhancing existing habitats,Relatively small features can often achieve important benefits for wildlife, such as incorporating 'swift bricks' and bat boxes in developments.....'</p> <p>The Government's Building Better Building Beautiful Commission report 'Living With Beauty' (30/01/20)</p> <p>Policy Proposition 33, page 110) recommends:</p> <p>'Bricks for bees and birds in new build homes'.</p> <p>https://www.gov.uk/government/publications/living-with-beauty-report-of-the-building-better-building-beautiful-commission</p>	<p>species and habitats threatened which needed protection.</p>

		<p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Biodiversity and access to nature Urban greening and trees Food growing Veganism</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Under GR3, teaching residents about the value of nature and animals intrinsic right to exist are net gains for biodiversity. Helping people to appreciate the value they see before them will help realise they can make changes in other areas of their life to help the wider environment. Lewisham Council should add a third provision here to help by “encouraging the education of the wider public about the benefits they gain from preserving the nature that they see.</p> <p>Under GR5, providing as much food growing provision as possible will help residents to understand just how much effort goes into nurturing the food that they buy so easily from the shops or restaurants and takeaways. It will also help develop an interest in growing and eating a wider range of vegetables and fruits, especially so if it was their hard work that got it for them to begin with. As such, Lewisham Council should ensure provision 10.29 and 10.30 are kept central to the design stage and tie this into the vegan cookery lessons under SD1</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Veganism is an almost certainty for the future of human existence. The sooner we get there, the less work there will need to be done in the future. It benefits the Council to speed this transition as the savings made in health provision and the costs of supplying foods will drop considerably. It will also help Lewisham reach its GHG Net-Zero targets faster than other boroughs who don't follow suit.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p>	0	Noted	No change

		That Green Infrastructure even appears in this plan indicates just how important the environment and the services it provides are for human survival. Doing our bit at every level ensure we have done all we could to stave off the worst of what is potentially to come.			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>By developing the area i. e. building 30 housing units between the Telecom site in Horniman Drive and Havelock House there will be a detrimental effect on the mature oak trees and other trees in the area. These trees are highly significant as a wildlife corridor and important for absorbing carbon dioxide.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>None chosen</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>N/A</p> <p>4. Green Infrastructure	<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>The use of current and new buildings to provide habitats for urban dwelling wildlife and building dependent bird species.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Biodiversity and access to nature</p> <p>3. Please provide your comments on the topic(s) selected above.</p>	5	<p>Noted. The Lewisham local plan Part 2 Policy GR3 supports net gains of biodiversity across the borough.</p> <p>Local biodiversity requirements has been addressed in the Council's Biodiversity Action Plan.</p> <p>Developers are required to refer to the local Biodiversity Action Plan, "A Natural Renaissance for Lewisham", which sets out the vision and opportunities to deliver biodiversity</p>	No change

	<p>To make more use of the current buildings, particularly when being renovated/extended etc to provide nesting and roosting opportunities for birds and bats.</p> <p>To ensure a minimum of 20% net gain in biodiversity for all new development.</p> <p>To provide nesting opportunities at a ratio of 1 per dwelling for building dependent bird species following the examples of:</p> <ul style="list-style-type: none"> - Exeter City Council Residential Design Guide SPD (2010). The RSPB South West Regional Office has been working with Exeter Planners over a period of 10 years on the implementation of the biodiversity requirements of this guide and there is acceptance that in many cases the most suitable box type for all cavity nesting birds is the swift brick. - The Duchy of Cornwall adopted the same principles in 2015, and a good example of the provision of a general type of integrated box for all cavity nesting birds is the Nansledan development by The Duchy of Cornwall in Newquay. (https://nansledan.com/nansledan-residents-asked-to-help-with-bird-box-survey/) - The Cornwall Council Biodiversity Guide (2018 gives prescriptive measures for the provision of bat and bird boxes, again at the rate of 1 nest place per new dwelling. This document also includes a case study on Nansledan mentioned above. - The Oxford City Council Technical Advice Note on Biodiversity gives an 'expected provision' of bird nest sites for building dependent birds (i.e. swifts) at a rate of 1 per house and 1 per 2 flats, with separate provision for bats at a rate of 1 per 5 houses. Provision of such nest boxes in schools, student accommodation and hotels is addressed by a ratio of 1 per 250 m2 floor space. - Brighton & Hove City Council have conditioned a minimum of three swift nest bricks or two per dwelling in all new developments that are five metres high or above and commercial developments will be required to have a minimum of three boxes, or one per 50sqm of floor spaces. <p>A similar standard was adopted by the Town and Country Planning Association and the Wildlife Trusts in 2012 Planning for a Healthy Environment - Good Practice for Green Infrastructure and Biodiversity and The Royal Institute of British Architects (RIBA) in 2013.</p> <p>There is photographic evidence that integrated swift bricks are used by a variety of small birds (the amber listed swift, the red listed house sparrow, house martins, blue tits, great tits and the red listed starling (dependent on the size of the entrance hole). Integrated bricks are discrete, maintenance free, less prone to predation and temperature variation than external boxes. Central government has recognised their importance in the following documents:</p> <ul style="list-style-type: none"> • NPPF, Natural Environment Guidance, paragraph 023, Reference ID: 8-023-20190721 How can biodiversity net gain be achieved? Provides further guidance stating "...relatively small features can often achieve important benefits for wildlife, such as incorporating 'swift bricks' and bat boxes in developments and providing safe routes for hedgehogs between different areas of habitat." • Government press release (21/07/19) James Brokenshire, the Communities Secretary at the time of the NPPG Natural Environment publication stated: "For the first time the government has set out its expectations on how developers can protect specific species, including using 'hedgehog highways' and hollow swift bricks – which are installed into the walls of new build homes, allowing the birds to nest safely. This follows public interest for protecting these 	<p>including priority species and habitats threatened which needs protection.</p>	
--	---	---	--

	<p>much-loved animals, with one petition receiving support from over half a million people.” Thus, the Government’s support for such measures was stated explicitly.</p> <ul style="list-style-type: none"> • Natural Environment and Rural Communities (NERC) Act 2006 Section 40 states: “Every public authority must, in exercising its functions, have regard, so far as is consistent with the proper exercise of those functions, to the purpose of conserving biodiversity.” • "Living With Beauty" (30/01/20) the Government's Building Better Building Beautiful Commission report recommends: "Bricks for bees and birds in new build homes" (Policy Proposition 33, page 110). <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>			
Green Infrastructure	<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Improve tree-planting/street trees in the Borough. Include requirement for Swift bricks/bat-boxes in new build/council buildings.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Biodiversity and access to nature</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>I see no mention of basic, low cost integrated measures for biodiversity such as swift bricks and integrated bat boxes - these are not included the DEFRA net gain for biodiversity calculation which does not protect existing populations of endangered urban birds such as swifts and sparrows for example, and also gives no value to the provision of nest spaces for them.</p> <p>Swift numbers have declined by over 50 percent over the last 25 years. A significant reason is the decimation of their habitats in old buildings and conversions. Swift bricks are very easily incorporated in new-builds.</p> <p>It is vital that the Local Plan includes policies for integrating these measures early, compelling their inclusion at the planning stage.</p> <p>This would also follow London Plan policy (G6B Biodiversity) and national policy (NPPG 2019 Natural Environment).</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p>	8	<p>Part2 Policy GR3 requires development proposals to identify and retain existing habitats and features of biodiversity value. They are also required to seek positive gains for biodiversity wherever possible, particularly in areas that are deficient in public access to nature conservation.</p> <p>Similarly, the council is working closely with key stakeholders including Lewisham Biodiversity Partnership to ensure that integrated and comprehensive approach is adopted to protect and enhance biodiversity across the borough.</p> <p>Specific local biodiversity requirements has been captured in the Council’s Biodiversity Action Plan.</p>	No change

		<p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Engagement with school children in the borough so they see the plan as theirs</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Biodiversity and access to nature</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>I have noticed swift boxes in other places. It would be great if Lewisham could routinely adopt this idea for all new builds. And look at older buildings where this idea could be adopted. Perhaps the council could adopt the udea of swift and bat boxes on all their public buildings.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>As above</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>Help school children be part of the plan</p>	4	<p>As part of the local plan process, the council engaged all stakeholders including young children. This is aligned with the council's adopted Statement of Community Involvement which sets out how the public, organisations and other interested parties will be involved and engaged in the preparation of the local plan.</p>	No change
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Cater for urban wildlife please</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>None chosen</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Swift boxes are an easy, low maintenance thing to do and they will help a wonderful bird species which is struggling in modernising cities across Europe.</p> <p>Bat boxes could also be a good idea.</p> <p>4. Do you think that there are other approaches that should be considered?</p>	11	<p>The Council is committed to ensuring that valued biodiversity are protected or/and enhanced. The Lewisham's local plan sets out policy framework to protect, enhance and provide new biodiversity including wildlife where they are much needed. Part 2 Policy GR3 seek to deliver net gains in biodiversity.</p> <p>On provision of new green spaces within new buildings, the council's open space assessment report (2019) and the London Plan(2021) set out standards to ensure that open spaces are delivered at the right quantity, quality and accessibility.</p>	No change

	<p>Dedicated, completely wild spaces with limited public access are important. We should be able to enjoy nature however I also feel that sometimes some refuge from people is all a lot of animals need.</p> <p>Planting wild flower verges and meadows is a low maintenance, cost effective way to maintain areas of open land and encourage biodiversity</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>Green space should represent a high proportion of any new building plans, including green roofs and walls.</p>			
Green Infrastructure	<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Deliver the reinstatement of the demolished bridge link from Doggett Road over the Hayes railway line to recently built 'Catford Green' SE6</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure Open space and Lewisham's green grid</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>The current 'Catford Framework Plan' cannot be rolled out without the reinstatement of the demolished 'green link' bridge that joined over the Hayes railway line from Doggett Road over to the former Catford Greyhound Stadium site [now called 'Catford Green'].</p> <p>The original bridge has stairwell access to all and the Catford Green development clearly and reasonably identified a better site by Dempsey Court for an improved location to suit this 1st phase of Catford's Regeneration - even better, it is designed to be an entirely new 'public highway' bridge for use by all pedestrians/cyclists/those with a disability, etc.</p> <p>In addition, the 'green bridge' would also ensure a reasonable proposal to link Catford Centre to the current Green Chain Walk to join by Honor Oak Park [Green Chain Walk No. 11] via a straight line link as follows - Duncombe Triangle, Blythe Hill Fields, Ravensbourne Park Gardens, Ladywell Fields - over the new 'green link' bridge to Holbeach Primary School/by Catford Centre and then on to Mountsfield Park, etc</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>With regret, the only reasonable alternative to the bridge reinstatement from Dempsey Court, Adenmore Rd, Catford Green to Doggett Rd SE6 is either to continue with pedestrian/cycle access to Catford Centre made from the West of Catford Centre by the South Circular Road by Catford Bridge railway station or to have a 'bolt on' cyclist/pedestrian carriageway installed right next to the South Circular Road on the current Halfords/Wickes site and on the opposite side to Catford Centre to render this option entirely useless.</p> <p>This option would also require the crossing of the Hayes railway line.</p>	3	This is not within the scope of the Local Plan consultation and is also addressed through the Council endorsed Catford Framework.	No change

		<p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>The ongoing and fatal flaw in Catford will continue to be the resolution to the 'green' crossing of the Hayes railway line. It is the inescapable fact and reality.</p>			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Yes</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>I think you should make sure you include swift and sparrow nesting boxes on buildings and areas for raptors on roofs, as so many new buildings have no areas for birds to nest and their populations are declining. Creating space for animals eg foxes v hedgehogs is necessary too</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	3	<p>Specific biodiversity requirement will be addressed at the planning application stage. This will be aligned with the Lewisham's Biodiversity Action Plan.</p> <p>Further, the council's local plan Part 2 Policy GR3 seeks to deliver net gains in biodiversity.</p> <p>Specific local biodiversity requirements are captured in the Lewisham's Biodiversity Action Plan.</p>	No change
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Integrated measures for biodiversity.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Biodiversity and access to nature</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>The policies to enhance green infrastructure are welcome but it's important to also provide integrated measures for biodiversity such as swift bricks, integrated bat boxes, and hedgehog highways - these fall outside the DEFRA net gain for biodiversity calculation which does not protect existing populations of endangered urban birds such as swifts and sparrows for example, and also gives no value to the provision of nest spaces for them which they cannot find in modern buildings.</p>	7	<p>Part2 Policies GR1/GR2/GR3 promotes an integrated approach for green infrastructure network and biodiversity. The local plan required developers to identify and retain existing habitats and features of biodiversity value and seek positive gains for biodiversity.</p> <p>Similarly, the council is working closely with key stakeholders including Lewisham Biodiversity Partnership to ensure that integrated and comprehensive approach is adopted to protect and enhance biodiversity across the borough.</p> <p>Specific local biodiversity requirements has been captured in the Council's Biodiversity Action Plan.</p>	No change

		<p>Standard bird boxes, bat boxes and insect hotels have a short lifetime in comparison and have maintenance requirements that are often neglected.</p> <p>Therefore it is crucial that the Local Plan includes policies for such integrated measures.</p> <p>This would also follow London Plan policy (G6B Biodiversity) and national policy (NPPG 2019 Natural Environment).</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Specifying independently appointed (and qualifications specified) to carry out ecological assessments</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure Food growing</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Requirements on developers need to be framed in much more robust language in the requirements, i.e. "MUST" / "SHALL" - not "should" or "we expect that". Permitting "wiggle room" needs to be avoided where the aim is clear.</p> <p>All development proposals MUST be in alignment with the Climate Action Plan - and the Climate Crisis MUST be taken seriously.</p> <p>To encourage food growing, there would ideally be an incentive of some kind, possibly a reduction in Council Tax (where this can be proved... This may also be an incentive that could be considered in other areas benefiting from behavioural changes.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	5	<p>Part 2 Policy GR3 requires that Ecological Assessment be carried out by certified Ecological assessor on all major development and other development proposals on sites with special biodiversity interest.</p> <p>The draft policy on green infrastructure is robust and aligned with the provision sets out in the National Planning Policy Framework (2021) and the London Plan.</p>	No change
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p>	3	The Council's local plan ensures that open space and green infrastructure network are integral part of	No change

structure	<p>Insufficient attention to detail on servicing of open space, e.g. litter collection, separation of pedestrian and cycle routes, careful management of vegetation and planting, and adequate management of nature reserves. All these factors require detailed input.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Open space and Lewisham's green grid</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Re GR2D: there is currently massive over-development of skyscrapers in town centre with no integral green space apart from the tiny Confluence Park. If further development is planned on Loampit Vale (e.g. area between Jerrard Street and Thurston Road), it must be for green space only otherwise the air quality will be dangerously toxic.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>		<p>development proposals when required.</p> <p>Part2 Policy GR1 requires developers to maximise the opportunities to enhance existing green infrastructure and create new provision.</p> <p>Similarly, Part2 Policy GR2 supports ancillary uses on open space (such as outdoor leisure facilities, outdoor play and fitness equipment, refreshment facilities, event space and public toilets) to improve the quality of the open space.</p>
Green Infrastructure	<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Include Noise enforcement in the conversation about pollution.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Noise pollution</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Air pollution is not just gas and particles, it is also sound and vibration.</p> <p>Far too little attention is given to noise pollution, especially in Lewisham where the service provided is exceptionally poor - even compared to other London Boroughs which are equally short of money.</p> <p>Green Issues are ultimately about quality of life for humans as well as the rest of nature.</p> <p>Noise issues are not addressed anywhere in the local plan.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Enforcement of existing law would help. How many cars and motor cycles are ever prosecuted for deficient mufflers? Probably zero.</p>	5	<p>The council's local plan has adequate provision to manage noise pollution.</p> <p>Part2 Policy QD8 ensure that noise is managed to acceptable levels. Development proposals are required to submit a Noise and/or Vibration Assessment where sites are located in high-noise areas or where a new development is likely to generate significant noise.</p> <p>The London Plan is part of the council's development plan. It sets out strategic direction for the Lewisham's local plan. Policy T8 of the London plan provides adequate policy framework on air transport and aviation issues.</p> <p>On enforcement of cars and motor cycles behaviours is outside the scope of this local plan.</p>

	<p>Why has Lewisham been so derelict in opposing flight paths over the residential areas of the Borough?</p> <p>Why is there no agency responsible for excessive railway noise? The Borough should be advocating speed limits through built up areas.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>			
Green Infrastructure	<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure Open space and Lewisham's green grid</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>There is no large park in the Deptford Area. Assembling one would be hard but it would be good if a public park of size was assembled and made available. The council needs to re-establish the riverside access to the Thames pathway. All planning consents should mandate this. The council should do what it can to establish view points or resting points or mini parks on its limited riverside estate.</p> <p>The nearest large parks are Hilly Fields and Southwark Park which are both distant and potentially difficult to reach by foot from parts of the borough north of the A2.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	1	<p>The Lewisham local plan allows for provision or/and enhancement of open space and green infrastructure network. Part2 Policy GR1/GR2 supports the creation and enhancement of open spaces and green infrastructure network.</p> <p>The Council has commissioned a consultant to carry out Open Space and Metropolitan Open Land (MOL) Review to informed land-use designations for the local plan. The outcome of this study will help to inform policy including designation of new open spaces.</p>	No change
Green Infrastructure	<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Open space and Lewisham's green space Biodiversity and access to nature Urban greening and trees</p>	2	<p>Noted. The main of the local plan is to promote sustainable and balanced growth across the borough. This ensures that employment, housing and the environment is managed sustainably.</p> <p>The Council has commissioned a consultant to carry out Open Space and Metropolitan Open Land (MOL) Review to informed land-use</p>	No change

		<p>3. Please provide your comments on the topic(s) selected above.</p> <p>I like what you say, but the north of the Boro needs a bigger park, the nearest large park is Hilly Fields which is a bit of a journey from Deptford as is Southwark park by foot.. Views as to distance has been concentrated by the lockdown. An alternative would be better access to the Thames, much of Lewisham's Thames banks are enclosed by private developments, planning constraints should be put on all developments on the Thames to restore the pathway and provide park space. Mandate trees in planning consents. It's obvious that there is competition for land use between housing and green infrastructure, this needs to be resolved in a balanced way.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>The Ravensbourne is not a public space. Can this be reclaimed?</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>		<p>designations for the local plan. The outcome of these studies will help to inform policy development including designation of new open spaces.</p>	
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Street Tree planting, Existing green space maintenance and Gardens with greater horticultural input.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Urban greening trees</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>many of the new buildings currently being built don't have roof terraces for the residents. These roof terraces with gardens/planting/allotments could have been easy wins. This could be a lesson for future planning applications in the boroughs</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Green space and public realm cannot be token gestures by the developers. They need to be led with incisive leadership and guidance by the Lewisham Council. Documents similar to City of London's public realm manual need to be issued. Strict overview during the planning process with input from the Lewisham Open Spaces team should be mandatory.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	7	<p>There is adequate provision in the local plan on tree planting particularly along streets. Part2 Policy GR4 of the Lewisham's local plan supports this. With regards to maintenance of existing green space and community gardens is outside the scope of this plan. However, at planning application stage, the developer will be required to address maintenance issues.</p> <p>Similarly, Policy GR4 promotes the use of living roofs and walls.</p> <p>Open space and green infrastructure issues are sufficiently addressed in the local plan. Refer to Part 2 Policy GR1 and GR2 of the Lewisham local plan.</p>	No change

Green Infrastructure	<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>There should be more opportunities for local people to become involved with increasing and improving green infrastructure. Tree planting in streets and parks should be better supported by the Council. The proposals seem to emphasise role of developers in sustaining green infrastructure but not people that live in the Borough.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure Open space and Lewisham’s green grid Biodiversity and access to nature Urban greening and trees Food growing</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>There should be more opportunities for local people to become involved with increasing and improving green infrastructure. Tree planting in streets and parks should be better supported by the Council. The proposals seem to emphasise role of developers in sustaining green infrastructure but not people that live in the Borough to improve green infrastructure, which is a missed opportunity. The Council's process for planting street trees in the Borough is very expensive for people that would like to plant street trees and is out of reach for most people due to the cost.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Support for projects to improve green infrastructure that people experience in parks, open spaces and on streets.</p> <p>Better protection for existing trees in parks open spaces and streets and an imaginative programme of tree planting to replace the hundreds if not thousands of small and large canopy trees that we have been felled in the Borough during recent decades.</p> <p>More space should be allocated for biodiversity.</p> <p>Turn grey streets into green spaces.</p> <p>Green infrastructure should be more joined up and connected.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	7	<p>Noted. The local plan policy on green infrastructure provides policy framework that supports the participation of all stakeholders including local people in the delivery of green infrastructure. Policy GR1/GR2 supports development proposals to enhance existing infrastructure and create new provision.</p> <p>Part 2 Policy GR3 seek to deliver net gains in biodiversity. Also, Policy GR4 requires development proposals to seek the retention of existing trees and associated habitat and maximise opportunities for additional tree planting and green infrastructure.</p>	Noted.
Green Infra	<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p>	1	Noted.	No change

structure		<p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure Urban greening and trees</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>The commercial arcade running along Queens Road in Peckham to New Cross and beyond could be vastly improved by the planting of more trees. It is a thoroughfare with loads of potential and trees are part of realising that potential</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>Improving cycling routes is also green infrastructure! Trading car parking spaces for spaces for trees and bikes will help Lewisham become a greener borough.</p>			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Urban greening and trees</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Turn Lawrence House car park into a green space.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>The plan is contradictory. On the one hand we are talking about protecting green spaces but on the other talking about building on green spaces.... cannot take the plan seriously due to this.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	1	<p>Officers believe that the local plan is robustly prepared. This is aligned with national and local policies and guidance including the National Planning Policy Framework (NPPF) (2021) and the London Plan.</p> <p>The main aim of the local plan is to promote sustainable and balanced growth across the borough. This ensures that employment, housing and the environment is managed sustainably.</p>	No change
Green Infra		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p>	6	<p>The local plan policies does not only support parks but also provide policy framework for the provision or/and</p>	No change

structure		<p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Urban greening and trees</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>It's not just about parks - we need more street trees, micro forests, even orchards.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>		<p>enhancement of open space and green infrastructure network. Part 2 Policy GR4 promotes urban greening including tree planting, green roofs and walls, hedges, climbers, landscaping and rain gardens.</p>
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>The allocation of sites for housing should not include sites with significant biodiversity value and mature trees</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Biodiversity and access to nature Urban greening and trees Green infrastructure</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>The council states that it is imperative that wildlife habitats are protected it has allocated a site, Havelock House, in the West Area for housing development which is a green site with significant biodiversity value containing mature trees and other vegetation forming part of an important wildlife corridor. Any development on this small site would cause significant harm to biodiversity interests. This is directly counter to the principles set out in the Plan in the Green Infrastructure section.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>The Site could instead be considered for ADDITIONAL Tree planting ADD to the Borough's urban forest and to support the objectives to increase biodiversity and to support the London Plan to be 50% green by 2050</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p>	5	<p>Site allocations in the local plan went through vigorous site assessment process including the use of Sustainability Appraisal. This ensures that Social, environmental and economic aspects are all taken into consideration in the process and policy development.</p> <p>Part2 Policy GR3 expects development proposals to identify and existing habitats features of biodiversity value. In addition, developers are required to seek positive gains in biodiversity wherever possible especially in areas that are deficient in supply.</p> <p>Part 2 Policy GR1 require development proposals to maximise the opportunities for enhancing existing green infrastructure and creating new provision.</p>

		The Green Infrastructure section of the plan should be a priority in the Site Allocation for Development in all the Borough's Areas			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure Open space and Lewisham's green grid Biodiversity and access to nature Urban greening and trees Food growing</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Lewisham's green spaces are one of the best things about the borough. They need to be protected and maintained so it's great to see a real focus on this in the plan. As you have outlined, some residents do not have good access to green spaces, especially in new developments where the proportion of flats vs communal green space is absolutely shocking. Please address this urgently! A tiny little park with two benches, for a development of hundreds of flats really is a joke.</p> <p>ALL new developments should be required to have public/green spaces, not just "larger ones" (whatever that means). You say "Creating new large open spaces will be challenging as land is needed for homes and jobs." which sounds like a cop out. Spaces don't need to be "large", if you create many of them. Focusing on homes and jobs to the detriment of the environment is exactly what got us to the climate crisis, so it can not be a strategy for the future. We won't have a healthy sustainable planet to live and work on if we think this way.</p> <p>Improving walking and cycle paths should be number one priority to help reduce carbon emissions and make it possible for people to be car free. Cycle storage and parking needs to be made possible for residents who live in flats.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Lewisham should consider creating urban mini forests (as other councils around the country are doing, e.g. Bristol) on suitable plots where even just 5 trees would make a difference. Areas in existing parks could also be set aside for tree planting, this could even be an activity that young people in the borough participate in. A mix of open space and areas with more tree cover in parks would do a lot for biodiversity and make a difference towards carbon reduction targets.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	7	<p>The Lewisham's local plan has policy provision that ensures that the right type of open spaces are provided at the right places within the right accessible distance.</p> <p>Part 2 Policy GR1/GR2 supports the delivery of new open spaces and the protection of existing one when needed in the local area. It also provides policy framework to ensure the delivery of green infrastructure network including walking and cycle paths.</p> <p>Similarly, the main aim of the local plan is to promote sustainable and balanced growth across the borough. This ensures that the right amount of employment, housing and open spaces, and green infrastructure are delivered sustainably.</p>	No change

Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Open space and Lewisham’s green grid Biodiversity and access to nature Urban greening and trees</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>There are real opportunities to green communities through micro gardens, pollution eating planting and more trees. Many green spaces are in poor condition. Prioritising walking and cycling on back streets that connect communities would carry a health and well-being premium and improve community cohesion</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	7	<p>Part 2 Policy GR1/GR2 supports the delivery of new open spaces and the protection of existing one when needed in the local area. It also provides policy framework to ensure the delivery of green infrastructure network including walking and cycle paths which supports connected communities and health and wellbeing of residents.</p> <p>The local plan ensures that green infrastructure assets including parks, residential gardens, and street trees are delivered in areas of deficiency.</p>	No change

Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	7	<p>The Lewisham local plan Part 2 Policy GR4 seeks to promote tree planting. The policy requires development proposals to maximise the opportunities for additional tree planting and green infrastructure especially trees in urban settings such as streets.</p> <p>The council is carrying out additional open space study and the Metropolitan Open Land review. This will be assessing additional sites for allocation and those that should be afforded protection. These studies will then be used to inform revisions to the green and open space policies and designations.</p>	In accordance with the Open Space Review and MOL Review Update, designations.
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Urban greening and trees Biodiversity and access to nature</p> <p>3. Please provide your comments on the topic(s) selected above.</p>	8	<p>The council's local plan policy on green infrastructure promotes urban greening approach. This encourages wide range of measures to incorporate into buildings and spaces green cover including biodiverse landscaping, tree planting along streets, green roofs, local parks and other natural features.</p>	No change

		<p>Surface level car parks broadly within residential areas such as Clarendon Rise and Slaithwaite Road should be transformed into parks. This has many benefits including providing significant areas of green space to residents of the borough, especially those living within the nature deficient Lewisham town centre, as well as discouraging car use both generally and through the residential streets surrounding these car parks. This would help to achieve the boroughs goals for providing green space as well as encouraging a modal shift to more sustainable forms of transport.</p> <p>While urban tree planting along streets should be encouraged it can often constrain the pavement width and make walking side by side more difficult and less pleasant, in many ways defeating the object. On quiet residential streets consideration should be given to tree planting on build outs into the roadway as opposed to the pavement where this is likely to be a problem. Done correctly this can have the added benefit of slowing vehicle traffic and making a more pleasant environment for active travel.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Doorstep green spaces</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Green infrastructure needs to include the doorstep green spaces too. Lewisham homes are not just private sector homes, but contain a large number of public and third sector housing. All homes can and do contain green spaces. Gardens around housing blocks, empty gaps at the end of streets, roof areas on public / Council properties, etc. all need to be considered for their impact as part of the Borough's green infrastructure and mission to make Lewisham Greener. In particular, where Lewisham owns or manages property, it should take the responsibility and initiative to make the most of its green spaces: for example, supporting tenants to build and maintain gardens; developing new green spaces among the bricks & mortar for its local community; and removing barren & unkempt spaces around the Borough.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Local communities would be willing to help and continue to maintain green spaces, if they were actively encouraged to do so by the Council.</p>	6	<p>The Lewisham local plan policies on open space and green infrastructure promotes the provision of amenity green space around residential areas.</p> <p>In addition, the council's local plan policy on green infrastructure promotes urban greening approach. This encourages wide range of measures to be incorporated into buildings and spaces green cover including biodiverse landscaping, tree planting along streets, green roofs, local parks and other natural feature.</p>	No change

		<p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>			
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Protection order on all green spaces including open grass spaces on estates as these could so easily be sold for housing at the expense of the children on the estate.</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Green infrastructure Open space and Lewisham's green grid Biodiversity and access to nature Urban greening and trees Food growing</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Lewisham has 20% green spaces. It would be great to find sites for additional green spaces and work with local people to make them accessible and user-friendly.</p> <p>Planting more trees: Tree-planting by and for the community seems to be popular but people need basic training in after-care of those trees so the trees can survive the first five years; training can be provided by volunteers. Encourage food-growing in community green spaces, things like salad leaves, herbs, fruit bushes - though a bit of basic training is important. Have areas that can be managed for wildlife within any new green space.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>More green spaces with food/ wildlife in school grounds and less of the astro-turf that does nothing for nature.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	8	<p>The council local plan has policy provision that promotes the creation or/and enhancement of green infrastructure network.</p> <p>Part 2 Policy GR4 seeks to promote tree planting. The policy requires development proposals to maximise the opportunities for additional tree planting and green infrastructure especially trees in urban settings such as streets. With regards to providing training on tree management is outside the scope of this plan.</p> <p>Further, allotments and community gardens are key part of the Borough's network of green infrastructure. This supports local food production and biodiversity creation. This provides opportunity for social interaction.</p> <p>Part 2 Policy GR5 supports allotments and community gardens in the borough.</p>	No change. .
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>Hither Green west of the tracks has been missed. Why is there no provision to Green links to Mountfield Park?</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p>	2	<p>The council is carrying out additional open space study and the Metropolitan Open Land review. This will be assessing additional sites for allocation and those that should be afforded protection. These studies will then be used to inform revisions to the green and open space</p>	No change

		<p>Open space and Lewisham's green grid Urban greening and trees Green infrastructure</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>. Green links to be introduced in Hither Green west of the tracks. There is no provision in the document at all for any improvements. Why has this area been overlooked again?</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Invest in the less affluent areas of Lewisham not just the middle class areas. Hither Green West of the tracks loses out again in your plan. Not even the community garden is identified.</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>		policies and designations	
Green Infrastructure		<p>1. Are there other issues around green infrastructure that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to green infrastructure? Select the topic(s) and comment below</p> <p>Driveways</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Too many people pave over their driveways and / or gardens, allowing nowhere for water to drain - why not insist on something more environmentally friendly like gravel??</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Green Infrastructure' section of the Local Plan?</p> <p>N/A</p>	12	<p>There are Permitted Development Rights over which the Council exercises no planning control, including the paving over of front gardens and driveways.</p> <p>Where planning permission is required, the draft Local Plan includes policies on Sustainable Drainage and urban greening.</p>	No change.
	Sustainable design	<p>1. Are there other issues around sustainable design and infrastructure that the Local Plan should address?</p> <p>Integrated measures for biodiversity</p> <p>2. Do you have any comments on the proposed approaches to sustainable design and infrastructure? Select the topic(s) and comment below</p> <p>Biodiversity</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Biodiversity should be an integral part of sustainable design, as measures such as green roofs & green walls, water features, swift bricks & bat boxes need to be designed in from the earliest possible design stage if their effectiveness for biodiversity is going to be maximised</p>	0	Noted.	Local Plan amended with new policy on Biodiversity Net Gain, in line with provisions of Environment Act 2021.

		<p>4. Do you think that there are other approaches that should be considered? Clear mandatory targets such as the RIBA (2013) standard for 1:1 nestbox per dwelling on average would give clarity and increase likelihood of such measures being designed in from an early stage.</p> <p>5. Do you have any additional comments on the 'Sustainable Design and Infrastructure' section of the Local Plan? N/A</p>			
Sustainable design	<p>1. Are there other issues around sustainable design and infrastructure that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to sustainable design and infrastructure? Select the topic(s) and comment below Sustainable design</p> <p>3. Please provide your comments on the topic(s) selected above. Insist on passive house design: The required technologies are now widely available, e.g. low u-value fabric, heat pumps, solar gain architecture, etc. Firm up the sustainability requirements for new housing: Do not allow exceptions! Have the low-carbon designs evaluated by an independent consultant not paid for by the developer! Do not include parking for new builds except for disability parking.</p> <p>4. Do you think that there are other approaches that should be considered? Remove parking spaces in the borough and replace the space with cycle lanes or wider sidewalks, add more trees in residential areas.</p> <p>5. Do you have any additional comments on the 'Sustainable Design and Infrastructure' section of the Local Plan? N/A</p>	0	<p>The draft Local Plan policies on sustainable design and construction, including zero carbon development, are considered to be in general conformity with the London Plan. The introduction of higher standards could have an impact on development viability and in turn limit the council's ability to secure other requirements, such as affordable housing. A balance must therefore be struck.</p> <p>However it is recognised that the plan could be amended to address 'non-regulated carbon emissions' and sustainable retrofitting of the existing building stock.</p> <p>Parking provision will need to be carefully managed, particularly the use of existing spaces. The Council's Transport service is responsible for parking management. The draft Local Plan will be amended to reflect the new London Plan parking standards.</p>	<p>Local Plan amended to make clear that building sustainability assessments must be carried out by suitably qualified and independent assessor.</p> <p>Local plan amended to with new policies on 'non-regulated carbon emissions' and sustainable retrofitting of the existing building stock.</p> <p>Local Plan amended to fully align with London Plan parking standards, including standards for car-free and car-lite development.</p>

Sustainable design	<p>1. Are there other issues around sustainable design and infrastructure that the Local Plan should address?</p>	0	<p>The Local Plan deals with the use and management of land. As a dietary and</p>	No change.	

		<p>Add another action point to SD1.B "To help ensure that the Borough develops in a way that is environmentally sustainable the Council will ensure that all Council run properties, event and functions will provide a substantial vegan option at every opportunity</p> <p>2. Do you have any comments on the proposed approaches to sustainable design and infrastructure? Select the topic(s) and comment below</p> <p>Responding to the climate emergency Minimising greenhouse gas emissions Veganism</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Veganism is the quickest way an individual can minimise their GHG emissions as their personal response to the climate emergency. Lewisham Council should help enable and promote this action as part of their striving to address global climate change</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Moving all of Council's food provision over to a plant-based, vegan one is the best way to ensure the Council does all it can to mitigate and reduce its impact on climate change. Anything short of that is a failure to make the maximum changes possible.</p> <p>5. Do you have any additional comments on the 'Sustainable Design and Infrastructure' section of the Local Plan?</p> <p>Providing vegan cookery lessons at The Lewisham Training Kitchen is something easy to do and could engage multiple communities and stakeholders</p>		<p>lifestyle matter, veganism is outside the scope of the Local Plan.</p> <p>However, it is noted the economy and culture policies provide flexibility for restaurants and other businesses supporting vegan options to locate within town centres.</p> <p>The Council's Climate Emergency Action Plan includes actions to raise awareness of and support veganism.</p>
Sustainable design		<p>1. Are there other issues around sustainable design and infrastructure that the Local Plan should address?</p> <p>The plan is unambitious compared to other local authorities on some aspects.</p> <p>2. Do you have any comments on the proposed approaches to sustainable design and infrastructure? Select the topic(s) and comment below</p> <p>Responding to the climate emergency Design to support the circular economy Managing the risk Improving air quality Minimising greenhouse gas emissions Reducing and managing waste Reducing flood risk Sustainable drainage Water management</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>The plan has big aspirations but is light on detail on how this will realistically be monitored and achieved.</p> <p>Many aspects such as energy efficient housing are already part of planning regulations. Additional commitments and policy changes are needed to make a substantial difference and back up the declaration of a climate emergency in the borough.</p> <p>Declaring a climate emergency is not an achievement in itself. Making substantial changes and setting higher environmental standards will result in genuine improvements.</p> <p>4. Do you think that there are other approaches that should be considered?</p>	<p>1</p> <p>Disagree that the plan is unambitious. The Local Plan provides for a significant step change in the local policy framework for climate change adaptation and mitigation, as well as urban greening and the management of green infrastructure.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The Council will continue to work with and lobby TfL for improved bus services throughout the Borough, including services to and between key transport nodes.</p> <p>Low Traffic Neighbourhoods are outside the scope of the Local Plan.</p>	<p>Local Plan parking policies amended to fully align with London Plan standards, including car-free and car-lite development.</p> <p>Local plan amended to with new policies on 'non-regulated carbon emissions' and sustainable retrofitting of the existing building stock.</p> <p>Local Plan amended to refer and clarify approach to delivering net waste self-sufficiency in line with the waste hierarchy.</p> <p>Local Plan amended to refer the council's latest Waste Strategy.</p>

	<p>The cycling infrastructure is poor in many parts of the borough and Lewisham lags behind other London boroughs in this respect. There is not a big enough commitment to create continuous quiet routes for cyclists to traverse the borough. Many junctions and road sections are particularly hazardous.</p> <p>Many policies in the plan will be at odds - for instance options to retrofit existing buildings will be competing with the drive for densification. New buildings have a very high carbon footprint, requiring extremely large amounts of concrete etc. Retrofit options should be considered more favourably.</p> <p>Transport policy is not always carefully thought out and more collaboration with TfL is needed. Parking is being reduced at a time when train stations are seeing a reduction in train routes (eg Southern services). Some train stations in the borough lack any bus link.</p> <p>Wood burning stoves, garden burners etc should be strongly discouraged - emissions from even 'clean' wood sources are toxic and unnecessary. Campaigns to educate residents would be useful - eg switching from coal to gas BBQs. Businesses should not be allowed to use diesel generators on an ongoing basis.</p> <p>The plan is very ambitious regarding assessment of new developments, at a time when resources in the council are stretched. Whether heat management in new buildings is realistically going to be scrutinised is unclear, particularly with the drive for densification - a single aspect, south facing flat, will be difficult to cool or ventilate in the height of summer.</p> <p>Mature trees are highly effective in heat management and they are typically undervalued. Statements about new trees being planted are akin to greenwashing, they are often not large species and a significant proportion will not thrive with poor aftercare etc. Existing trees are graded for quality as A/B/C but there is no quality standard or critical assessment of tree planting proposals or aftercare plans.</p> <p>The impact of LTNs on busier roads need to be honestly assessed. They often result in less affluent areas bearing the brunt of traffic pollution. Traffic solutions need to reduce the traffic for everyone, not the lucky few.</p> <p>Fly tipping is on the rise in the borough, waste management facilities are not accessible enough. Additional local recycling facilities are needed in other locations. The few points for items such as electrical goods are usually overflowing.</p> <p>The underground springs in hilly areas such as Wells Park and Crystal Palace are not being properly considered when assessing new developments - particularly where pile driving, underground car parks etc are planned. The consequences are that spring water is diverted elsewhere. The increased water flow at the Hillcrest Estate is evidence of this, but it is not taken seriously and is omitted from the plan. The long-term risks of subsidence can leave homes uninsurable.</p> <p>5. Do you have any additional comments on the 'Sustainable Design and Infrastructure' section of the Local Plan?</p> <p>N/A</p>	<p>The draft Local Plan policies on sustainable design and construction, including zero carbon development, are considered to be in general conformity with the London Plan. The introduction of higher standards could have an impact on development viability and in turn limit the council's ability to secure other requirements, such as affordable housing. A balance must therefore be struck.</p> <p>However it is recognised that the plan could be amended to address 'non-regulated carbon emissions' and sustainable retrofitting of the existing building stock.</p> <p>The Local Plan Part 2 section on Green infrastructure includes provision on tree protection and management, and tree planting. It clearly sets out that "Development proposals will be expected to retain and protect existing trees, ensuring they can be sustained over the long-term. This includes trees of quality which are Category A and B trees as defined by British Standard BS5837:2012 and also Category C & U trees within biodiverse habitat areas".</p> <p>The council recently adopted the Lewisham Waste Strategy 2021-2031. This sets out objectives and priorities for provision of recycling facilities.</p> <p>Where additional strategic provision is required over the plan period, for example recycling centres, this is set out in the Infrastructure Delivery Plan.</p> <p>The draft Local Plan includes policies to ensure that new developments make adequate arrangements for the provision of on-site facilities for waste disposal and recycling.</p> <p>The draft Local Plan policies on water management include provisions around flood risk management that</p>

Wood burning fires should be banned as an unacceptable source of PM2.5 pollution and airway irritants.</p> <p>5. Do you have any additional comments on the 'Sustainable Design and Infrastructure' section of the Local Plan? N/A</p>	1	Wood burning fires, such as for outdoor stoves, barbeques and fire pits, are outside the scope of the Local Plan.	No change.
	Sustainable design	<p>1. Are there other issues around sustainable design and infrastructure that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to sustainable design and infrastructure? Select the topic(s) and comment below Responding to the climate emergency Improving air quality Minimising greenhouse gas emissions Reducing and managing waste</p>	1	The draft Local Plan policies on sustainable design and construction, including zero carbon development, are considered to be in general conformity with the London Plan. The introduction of higher standards could have an impact on development viability and in turn limit the council's ability to secure other requirements,	<p>Local plan amended to with new policies on 'non-regulated carbon emissions' and sustainable retrofitting of the existing building stock.</p> <p>Local Plan amended to make clear that carbon offsets should be a last resort.</p> <p>Local Plan parking policies amended to fully align with London Plan parking standards,</p>

		<p>Sustainable drainage Water management Energy infrastructure</p> <p>3. Please provide your comments on the topic(s) selected above. Much much more needs to be done, much faster, to meet the ambitious 2030 carbon-neutrality targets. As far as I'm concerned, carbon offsetting is a bit of a cheat tactic - the emissions still take place!</p> <p>New developments need to be given much stricter rules to build in sustainable materials and reduce emissions and waste. Grey water systems should be mandatory in all new blocks of flats of a certain size (say > 10 units). Other green technologies (air and ground source heat pumps, solar panels, insulation and high performance glazing, also need to be encouraged and made non-optional. Developers will wince as it will eat into their profits but the council and national government need to be firm otherwise those targets are just lip service.</p> <p>The charging infrastructure for electric cars in an absolute joke. Many people on my street are considering replacing their car with an electric one but there are no charging points and houses don't have garages or drives, which means cables would need to be run across the pavement which is unsafe and not accessible. Almost ironically, a few parking meters were just uninstalled but instead of replacing them with charging points (presumably the power supply is already there!) the holes were just covered over. Who makes these decisions? Does no one have any foresight? We need a network of electric charging points in public spaces (car parks, supermarkets) and roads for residents to use - and fast, like this year in 2021!</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Sustainable Design and Infrastructure' section of the Local Plan? N/A</p>	<p>such as affordable housing. A balance must therefore be struck.</p> <p>However it is recognised that the plan could be amended to address 'non-regulated carbon emissions' and sustainable retrofitting of the existing building stock.</p> <p>The London Plan provides scope for the use of carbon offset payments. The Local Plan seeks to employ these in limited circumstances, recognising there could be feasibility issues which prevent or limit the requirements from being satisfied. However the plan will be amended to make clear offsets should be used as a last resort.</p> <p>The Local Plan will be amended to reflect the London Plan parking standards for Ultra-Low Emission / electric vehicles. However in light of the climate emergency the use Ultra-Low Emission vehicles will need to be carefully managed. Whilst electric vehicles reduce tailpipe emissions they are carbon-intensive to produce and still add to congestion, road danger and severance. They also generate Particulate Matter through tyre and brake wear and can therefore contribute to poor air quality.</p>	<p>including for electric or Ultra-Low Emission vehicles.</p>
Sustainable design		<p>1. Are there other issues around sustainable design and infrastructure that the Local Plan should address? none</p> <p>2. Do you have any comments on the proposed approaches to sustainable design and infrastructure? Select the topic(s) and comment below Design to support the circular economy</p> <p>3. Please provide your comments on the topic(s) selected above. Farmers' markets are very popular, but please, when designing spaces for these markets leave an element of the "Higgledy-Piggledy" as in Borough Market, at London Bridge. Too much evidence of Architecture or of Planning is a killer, paradoxically.</p> <p>4. Do you think that there are other approaches that should be considered? Yes, see above</p> <p>5. Do you have any additional comments on the 'Sustainable Design and Infrastructure' section of the Local Plan?</p>	0 Noted. Markets or market space will vary depending on location and the nature of use, for example, whether within a town centre or in a car park in an out of centre location, and if farmers' market or other type of market. Design aspects will be considered through the development management process and/or through licencing.	No change.

The Low Traffic Neighbourhoods project is outside the scope of the Local Plan.</p>	<p>No change.</p>

		<p>Healthy streets/healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. Love what is happening to the neighbourhood with the LTN, I've been cycling much more with my little boy in the back of my bike and feeling much safer doing so, thank you! No car needed in this family !</p> <p>4. Do you think that there are other approaches that should be considered? Keep it going, the reversal of measures wasn't needed</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? Thank you</p>			
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? There are inadequate south/north bus routes between Lee Green and Greenwich peninsula and Greenwich village</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above. Lee Forum carried out a consultation on the adequacy of local bus route, details of which can be found in the Lee Neighbourhood Plan transport section. Overwhelmingly respondents said there is no easy way to get to Greenwich (east and west). People either have to Blackheath or Lewisham then change. Greenwich is so close to Lee Green it really shouldn't be necessary to change buses, with the delays that that this brings, to get there. As a result many people drive when really it should be a quick bus ride.</p> <p>Two new bus routes would increase active travel. This is particularly important for Lee Green given the amount of housing that is planned for Lee Green and that most of that housing will not be given parking spaces</p> <p>4. Do you think that there are other approaches that should be considered? Please plan for bus routes from Lee Green Greenwich Village and Greenwich peninsula</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p>	4	Noted. The Council has and will continue to lobby the Mayor of London / Transport for London for public transport investments locally, including improved bus services within the Borough.	No change.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Parking Healthy streets/ healthy neighbourhoods Taxis and private hire vehicles</p> <p>3. Please provide your comments on the topic(s) selected above.</p>	8	The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.	No change.	

		<p>Bike parking needs to be designed in to transport hubs, shops, and developments so that it is perceived as safe and secure and also open to non-standard bikes (eg trailers, cargo bikes, specially adapted bikes). Everything that can be done to discourage residents from paving over front gardens for car parking - front garden parking effectively blocks their section of road to other people who might want to park; allows residents to avoid parking charges that their neighbours have to pay; has negative environmental consequences for surface runoff and loss of vegetation; and most importantly, causes a danger to pedestrians- who ought to feel safe walking along a pavement</p> <p>4. Do you think that there are other approaches that should be considered? Cargo bike / bike trailer hire services, work with taxi firms to encourage people to give up personal vehicles.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? Bike routes need to be carefully planned so that (eg) the strategic route from Lee to Lewisham doesn't go over an unnecessary hill!</p>		<p>The Local Plan has been informed by the Lewisham Cycle Strategy, including the Lewisham Links policies.</p> <p>There are Permitted Development Rights over which the Council exercises no planning control, including the paving over of front gardens.</p>	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Public transport is worsening and other infrastructure needs attention</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets/healthy neighbourhoods Parking Deliveries, servicing and construction Sustainable transport and movement</p> <p>3. Please provide your comments on the topic(s) selected above. The state of the pavements in many areas is very poor, this is hazardous. How are the council monitoring and addressing this? The cycle and transport provision is not thought through and planned at the same time when planning permission is being considered. This means there isn't a coordinated approach and people end up stranded. New developments are being built with hundreds of bicycle parking spaces, but most people will not feel safe or confident enough to cycle on the road.</p> <p>4. Do you think that there are other approaches that should be considered? LTNs are diverting traffic, the evidence that they will significantly reduce overall car ownership is tenuous. Those living near busy roads are now breathing even worse air, so that the lucky few can enjoy quiet roads. This is not an equitable solution. Dangerous driving seems to be a common theme in resident's concerns, yet the council seem powerless to do anything. Rogue drivers speed without impunity, statistics on accidents are poor quality and don't seem to be monitored or analysed by anyone. This would inform where the most dangerous roads are. The lack of joined up approach better the council, TfL and the policy is uninspiring. How has a Labour council not managed to team up with a Labour mayor and do something better than think up a few LTNs? Surely a missed opportunity. Fining those who leave the motor running or park outside schools? PCNs / traffic wardens outside schools?</p>	2	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including transport infrastructure, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p> <p>The Low Traffic Neighbourhoods project is outside the scope of the Local Plan.</p>	No change.

Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>low traffic neighbourhoods</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Healthy streets/ healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Creating low-traffic neighbourhoods that are protected from motorised through-traffic (as proposed by London Living Streets in response to the Council's consultation in November 2018).</p> <p>Increasing the use of non A & B roads for pedestrianised entertainment / retail areas / pocket parks. For example, the immediate vicinity of Brockley station has been temporarily pedestrianised to allow local cafes and restaurants to offer socially-distanced outdoor seating. This has been very successful and should be made permanent. Furthermore it should be considered as a role-model for other similar areas.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>We note that other London boroughs have made significant progress in these areas over the last 18 months, successfully rebalancing road use away from cars towards cycling, walking and public transport. Proven templates exist that can easily be applied throughout the Borough as well, in particular in Brockley and Ladywell wards, where the traditional residential road grids (in the conservation areas in particular) were designed to support local means of transport. These residential roads were never designed to support rat-running car traffic, which is always to the detriment of all residents along those routes.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p> <p>N/A</p>	9	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. This includes the application of the Healthy Streets Approach throughout the borough.</p> <p>The Low Traffic Neighbourhoods project is outside the scope of the Local Plan.</p>	No change.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>Segregated cycle lanes for main roads</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Sustainable transport and movement</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>I strongly agree with Make Lee Green's response. In particular, the vital importance of making 'main' roads such as the A20 and A2212 safe for cyclists and pedestrians. I support the rollout of LTNs across the borough, but cyclists and pedestrians should not have to take slower, less direct routes on side streets to be safe. Every main road should have segregated cycle lanes and be a safe, pleasant environment for pedestrians.</p> <p>4. Do you think that there are other approaches that should be considered?</p>	9	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. This includes the application of the Healthy Streets Approach throughout the borough, particularly on main roads.</p> <p>It may not always be feasible to deliver segregated cycle lanes. Interventions to enable and promote</p>	No change.

N/A		cycling will be considered on a case-by-case basis, having regard to the Council's Cycling Strategy and Local Implementation Plan. The Low Traffic Neighbourhoods project is outside the scope of the Local Plan.	
Transport and connectivity		1. Are there other issues around transport and connectivity that the Local Plan should address? N/A 2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Sustainable transport and movement Healthy streets / healthy neighbourhoods 3. Please provide your comments on the topic(s) selected above. On-street car parking must be reduced. Currently, all residential streets are blocked with parked cars. Often they are parked halfway up on the sidewalk restricting pedestrians. They also block bus services significantly. They increase the danger to cyclists by careless drivers opening the car door or the cyclist being squeezed in between parked car and moving traffic. The plan should contain - A ban on all on-street parking along bus routes - Restricted on-street parking in all residential areas, not just those with good public transport access. Most residential areas are within 10mins cycle distance from public transport access which, of course, requires plentiful bicycle parking spaces. - Disability parking must be provided in sufficient numbers everywhere and is exempt from above. - All remaining car traffic including vans must be electric or hydrogen driven with a sufficient provision of charging points throughout the borough. - Turn residential streets into one-way access to reduce rat-runs or with agreement of the residents, close some completely to traffic. 4. Do you think that there are other approaches that should be considered? N/A 5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A	3	The Local Plan will be amended to fully align with the London Plan parking standards, which provide more stringent requirements for car-free and car-light development to reduce car use and promote modal shift. The Local Plan will also be amended to reflect London Plan parking standards for Ultra-Low Emission / electric vehicles. However in light of the climate emergency the use Ultra-Low Emission vehicles will need to be carefully managed. Whilst electric vehicles reduce tailpipe emissions they are carbon-intensive to produce and still add to congestion, road danger and severance. They also generate Particulate Matter through tyre and brake wear and can therefore contribute to poor air quality. The Council's Electric Vehicle Charging Strategy provides further details and will support the implementation of the Local Plan.	Local Plan parking policies amended to fully align with London Plan parking standards, including for electric or Ultra-Low Emission vehicles.

Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. The LTN has transformed the Lee Green area but more needs to be done and faster so that benefits are felt more widely. I would like to see the council address air pollution on main roads and also provide more cycling infrastructure ie segregated lanes. As a mum, I don't feel comfortable on busy roads especially with kids but that could change quickly if safety concerns were addressed. I would like to see bolder commitments from the council in addressing the climate crisis. I believe Lewisham is currently ranked the worst of all inner London boroughs on the Healthy Streets scorecard. I also feel council comms could be so much better when we talk about discouraging car use. No one is talking about the many health benefits for example. More ltns across lewisham, safer, quieter and cleaner roads needed.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Select the topic(s) and comment below Sustainable transport and movement Bakerloo line extension Healthy streets / Healthy neighbourhoods Deliveries, servicing and construction</p> <p>3. Please provide your comments on the topic(s) selected above. Lewisham Cyclists (LC) are the local borough group of the London Cycling Campaign (LCC) with more than 2500 supporters of whom over 700 are fully paid-up members of LCC. We speak up on behalf of everyone who cycles or wants to cycle in the London Borough of Lewisham and its adjacent local parks; and we speak up for a greener, healthier, happier and better-connected capital. General comments on the plan: Lewisham Cyclists welcome the opportunity to comment on the Lewisham Local plan. The focus of our response is around the Transport and Connectivity section of the plan, along with some specific comments regarding certain sites throughout the borough. We would also highlight our current campaigning objectives which align with a number of the proposals in the plan and would urge the council to integrate these into the local plan.</p>	53	<p>CIL is a levy on all development over certain parameters and its rate is set out on the Councils website.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan</p> <p>We note your support to the various policies.</p>	No change.	

	<p>Our comments about the overall plan can be found below, along with specific detailed comments on a number of individual sites in the Appendix provided. We do have a number of comments and concerns as detailed below:</p> <p>Specific points about the overall plan</p> <p>We believe some of the wording in the plan should be revised to bring it in line with existing policies from City Hall, where walking and cycling should be “enabled” as opposed to “encouraged”. Lewisham council has been encouraging and promoting cycling for more than a decade, yet still has one of the lowest mode shares for cycling amongst all inner London boroughs, and the worst Healthy Streets Score of any Inner London borough. The key missing element to date has been dedicated infrastructure, creating a fully integrated cycle network which meets London Cycle Design Standards and enables all residents in the borough to choose cycling as a viable mode of transport.</p> <p>We fully support the Council’s visionary aims of becoming carbon neutral by 2030, and for 80% of all trips to be made by walking, cycling or public transport by 2041 (London Plan Policy T1). However, it should be noted that the Healthy Streets low scores attributed to the lack of safe cycle tracks, the amount of road space not managed under CPZ, and the low participation figures of cycling, the damage to health due to pollution hotspots, reveal that time to effect lasting and sustainable change is very limited.</p> <p>We also note the outline strategic cycle network (figure 12.4) doesn’t use current nomenclature for cycleways, instead mentioning the now defunct quietways and cycle superhighways. This figure also shows incorrect routing for the A21 Lewisham Spine which should follow the A21 and A20 as far as Jerrard Street before heading North up Brookmill road. This should be amended along with the terminology used to comply with the Transport for London Cycling Action Plan. Whilst we support the aims of the strategic cycle network mentioned, we would expect this network to now be built to a standard which follows London Cycle Design Standards. It should be noted that Lewisham council has yet to build any protected cycle track of considerable length within the last 5 years. The protected cycle track on Edward street in Deptford is to our knowledge, the only protected space (on a road) in the entire Borough that meets current design standards and was provided as part of Quietway 1 funded through TfL 5 years ago. It is approximately 250m. We would urge the planning department in the council to work more closely with highways in addressing a number of issues throughout the borough which have severed communities for decades and created pinch points, all of which should be addressed in any strategic planning documents for development on a number of adjacent sites. We provide some examples of this further below, although not an exhaustive list. Lewisham Cyclists would urge the council to update the existing borough cycle strategy and transport strategy to meet updated guidance and design principles as detailed in Transport for London’s Cycling Action Plan.</p> <p>We also support Policy TR3 and the aim of providing Health Neighbourhoods (HN). Again, there is a significant gap between what has been provided so far (1) and the need which we estimate to be over 100. Similarly, very few modal traffic filters have been installed in the Borough. Pre-pandemic it was one (Prince Street, Deptford) which represents the total number of filters (bollards/planters) installed in the last quarter century. During the first phase of the pandemic other emergency filters were installed but half have since been removed or in abeyance. We believe the council needs to show more political will and coherent commitment in delivering on its own strategy.</p> <p>Although the plan states (page 457) that developers will be expected to submit details of how their proposals will facilitate walking and cycling to and from their site(s), with a Healthy Streets approach, we consider this too discretionary to have a significant impact. In our</p>			
--	--	--	--	--

	<p>experience developers simply focus on cycle parking facilities, rather than investing in improved connectivity to and from the site to other destinations. Therefore the plan should stipulate that adopting the Healthy streets approach will be a condition of planning with all new developments required to demonstrate an improvement in the healthy streets score for adjacent streets to development sites. Our view is the Council should take the lead in stipulating strategic active travel corridors, which the site specific developer would be required to link up with. We are hopeful this will happen with the A21 Healthy Streets Corridor (Lewisham Spine) as envisioned. Unless a strategic cycle and active travel network is specifically pursued by the Council, as previously mentioned in the Council's own Transport Strategy, it is unlikely that developers will single handedly secure that crucial piece of sustainable travel infrastructure. In terms of investment, S106/CIL contributions should be ring fenced for enabling active travel to/from areas of development.</p> <p>On page 460 - last mile delivery we support this although we'd like to see the Council supporting e-cargo bike delivery companies as well as encouraging mutual storage and warehousing facilities at strategic points such as to provide delivery hubs for both Lewisham and Catford Town Centres. Sites such as Holbeach Road Car Park and Molesworth Street Car Park would provide ideal locations to facilitate this.</p> <p>Bakerloo Line Extension - we're supportive of the extension (as mentioned at consultation) but consider cycle hubs are needed at strategic interchanges, especially New Cross, Lewisham, and Catford. Secure cycle parking is essential to promote onward public transport access and avoid the current car park dominated areas outside stations. We believe this should be provided as part of S106 agreements for all development within 100 metres of a station entrance.</p> <p>Car parking, legal pavement parking should be banned for all new development, with controlled parking zones for existing residents implemented as conditions of any planning agreements.</p> <p>Lewisham's Cycling Strategy (2017) itself informs much of the Transport and Connectivity section, which is welcomed. However, it is important to note that the last known review of this (https://councilmeetings.lewisham.gov.uk/ieListDocuments.aspx?Cid=136&Mid=5566) reflected the significant challenge of targets already set , most of which were under-achieved at this review, and remain so eighteen months later. Ambitious targets of doubling the number of cycling journeys; increasing the proportion of people cycling to work to 10%; halving casualty rates of cyclists; and increasing the proportion of children cycling to school to 50% remain, and the gap towards closing in on those laudable metrics is as challenging as ever. Out of the 21 "quick win" cycle contra-flows identified, only 3 have been implemented in the period since the review.</p> <p>More positively Lewisham has made progress with school streets but there are many more significant and structural interventions required before Lewisham becomes an active travel exemplar. Securing these will require a more joined-up strategic approach where the Borough can apply an organisation wide culture of thinking beyond the car, amongst all its officers and members.</p> <p>Despite our obvious reservations on the scale of the challenge ahead, we remain committed to supporting Lewisham where there is commitment to real and lasting change. Anecdotally the number of people cycling, and crucially the number of people who would cycle if it was safe, have grown during the pandemic. Despite the hardships and tragedies of the past year, most of us have significantly changed our behaviour in our daily lives. We want a new normal which enables more people to walk and cycle in a safe and pleasant surrounding that is good</p>

Select the topic(s) and comment below Sustainable transport and movement Healthy streets / healthy neighbourhoods Parking</p> <p>3. Please provide your comments on the topic(s) selected above. MORE FOCUS ON CYCLING! - make it MUCH easier and more accessible, not just for leisure but for commuters as a serious alternative to driving. At present alot of cycle routes are just tagged onto pavements or mixed use pathways with pedestrians and these routes are not particularly cycle friendly (cycle barriers, dismount signs, pedestrian crossings and islands, narrow paths). To reach 80% sustainable transport, we need wide dedicated cycle routes that are safe and well maintained (and designed and planned by actual cyclists!). No cycling detours or hilly routes - people need real direct and easy routes to get to shops and places of work</p> <p>4. Do you think that there are other approaches that should be considered? Cycle only major roads and routes that are direct, uninterrupted and segregated from cars/vehicles. Ban/remove/reduce all vehicle parking (apart from loading/disabled parking) on all high streets and main roads and put in segregated cycle routes instead and more pedestrianized areas. More electric vehicle charging points - Ensure local delivery vehicles and business move to electric vehicles - particularly large supermarket chains and the council itself - too many diesel vans and trucks driving around the parks</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	16	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Lewisham Links policy provides the basis for a connected network of high quality walking and cycling routes. This will be supplemented with public realm enhancements throughout the borough as new developments come forward, in line with Policy QD3 on public realm and TR3 Healthy Streets as part of Healthy Neighbourhoods.</p> <p>It may not always be feasible to deliver segregated cycle lanes. Interventions to enable and promote cycling will be considered on a case-by-case basis, having regard to the Council's Cycling Strategy and Local Implementation Plan.</p> <p>The Local Plan will also be amended to reflect London Plan parking standards for Ultra-Low Emission / electric vehicles. However in light of the climate emergency the use Ultra-Low Emission vehicles will need to be carefully managed. Whilst electric vehicles reduce tailpipe emissions they are carbon-intensive to produce and still add to congestion, road danger and severance. They also generate Particulate Matter through tyre and brake wear and can therefore contribute to poor air quality.</p> <p>The Council's Electric Vehicle Charging Strategy provides further details and</p>	Local Plan parking policies amended to fully align with London Plan parking standards, including for commercial parking and Ultra Low Emissions vehicles.	

				will support the implementation of the Local Plan.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>Lewisham's commitment to encouraging pedestrian access and plan to "carefully manage the amount of car parking" is welcome. The most glaring and obvious issue in the borough is the designation of parking spaces on pavements/footpaths.</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Healthy streets / healthy neighbourhoods Parking</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Healthy Neighbourhoods and LTNs are encouraging developments and the Lee Green LTN also gave a welcome respite to Ennersdale Road (which had previously been a dangerous rat-run). Unfortunately the part-reversal of the scheme has led to a return of speeding traffic. However, the new plans for school streets in the area are, again, very welcome. The current council have received a massive mandate for radical pledges on green transport and the climate crisis. The council needs to push ahead with plans for LTNs, expand them across the borough. Healthy streets are the future.</p> <p>Across the Borough cars are encouraged to park with two wheels on the pavement (e.g. Ennersdale Road, Leahurst Road) and even to park completely on the pavement (Bellingham Estate). If the Council is really committed to encouraging pedestrian access this abomination must end. I live on Ennersdale Road, where parking spaces take up 50% of the pavement leaving pedestrians with no other option but to walk in single file. On bin collections days, sections of the pavement are often completely impassible to pedestrians. This has been a real problem during the pandemic, when pedestrians trying to social distance were forced to walk on the road (as a busy rat-run this was very dangerous). This system is clearly a legacy of car-centred planning of the 1960s and must be remedied by the 2021 plan. If a street does not have the capacity for two-way traffic and parking on both sides then it must either a) become one-way to traffic or b) have double-yellow lines on one side. Pedestrians and the 55% of Lewisham households without a private vehicle should not pay the price for the decisions of private vehicle owners.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Abolish all parking spaces which partly or fully occupy pavement/footpath space.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p> <p>If Lewisham really wishes to transfer space from private vehicles to pedestrians, abolishing all pavement parking in the Borough is the place to begin.</p>	19	<p>Support noted.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Local Plan will be amended to fully align with the London Plan parking standards, which provide more stringent requirements for car-free and car-light development to reduce car use and promote modal shift.</p> <p>A carefully managed approach to car parking provision, including the use of existing parking spaces, will need to be taken. This is recognising that some areas do not benefit from good levels of access to public transport. Further details on the strategic approach to parking are set out in Part 2 policies on Parking.</p> <p>The Low Traffic Neighbourhoods project is outside the scope of the Local Plan.</p>	Local Plan parking policies amended to fully align with London Plan parking standards, including car-free and car-lite development.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>Not everyone can travel by by cycle or walk. Car Access to streets is essential for the vunrable ,delivery's, taxis , disabled, emergency services .</p>	0	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are</p>	Local Plan parking policies amended to fully align with London Plan parking standards.	

		<p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. This makes streets and areas closed to through traffic a muggers paradise. Also causes more pollution because longer journeys are required to navigate around them. Plus the main roads for the diverted traffic will be full of idling cars creating more pollution</p> <p>4. Do you think that there are other approaches that should be considered? Yes why not encourage electric cars and vans .add more electric charging points. Maybe put width restrictions on side streets instead of closing then to traffic</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? The sad thing is all this money being spent on cycle lanes yet many still choose to ride on the pavement or through red lights. A danger to both road users abs pedestrians</p>		<p>central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>A carefully managed approach to car parking provision, including the use of existing parking spaces, will need to be taken. This is recognising that some areas do not benefit from good levels of access to public transport. Further details on the strategic approach to parking are set out in Part 2 policies on Parking.</p> <p>The Local Plan will also be amended to reflect London Plan parking standards for Ultra-Low Emission / electric vehicles. However in light of the climate emergency the use Ultra-Low Emission vehicles will need to be carefully managed. Whilst electric vehicles reduce tailpipe emissions they are carbon-intensive to produce and still add to congestion, road danger and severance. They also generate Particulate Matter through tyre and brake wear and can therefore contribute to poor air quality.</p> <p>The Council's Electric Vehicle Charging Strategy provides further details and will support the implementation of the Local Plan.</p>
Transport and connectivity	N/A	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. A holistic approach to connectivity is needed. most important though is to offer options that encourage people to undertake active travel.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	7	<p>The spatial strategy sets out the overall approach to integrated land-use planning within the borough. The plan seeks to direct growth and development to areas that are well connected by public transport and/or where new strategic transport infrastructure is planned to be delivered.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions</p> <p>No change.</p>

				and policies and are set out clearly in Part 2 Transport policies.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? you are cutting off vital access to Lewisham Hospital with the road closures and road narrowing</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above. How anyone thought it would be a good idea to funnel all traffic into a single lane on the approach to a main university hospital with a vital trauma and A&E unit is completely beyond me. All emergency vehicles are now caught in a long line of traffic which cannot move out of the way because of the bollards segregating the seldom used cycle lane. When will councils understand that making it difficult for cars to move around also affects emergency services? It doesn't remove the traffic from the roads it just causes standstill traffic jams which in turn cause a spike in pollution levels - the thing that you are apparently trying to reduce.</p> <p>4. Do you think that there are other approaches that should be considered? Stop ignoring the needs of the elderly and disabled. Forcing cycle use discriminates against all those for whom mobility is an issue. Cutting off access to roads also impacts these vulnerable groups because their carers, district nurses, paramedics etc all then have issues when doing visits etc</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? Better public transport would go some way to helping the situation but if TFL are abandoning the tube extension, and the local bus routes continue to be so separated what alternative do people with mobility issues have other than to use vehicles to get to hospital appointments, go shopping etc etc</p>	1	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes, and reducing car use, are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Council has and will continue to lobby the Mayor of London / Transport for London for improvements to public transport services.</p> <p>It is acknowledged that older people and those with mobility issues will have specific requirements. The Local Plan car parking standards ensure that an appropriate level of provision is made for disabled parking bays.</p> <p>Where highways or public realm works are proposed, the Council will consult with the relevant transport authorities, including Transport for London.</p>	No change.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above. To be honest, this is all quite small scale on a screen and really very difficult to understand what is going on. The idea of healthy neighbourhoods and streets sounds great, but if you have some parking and not enough for everyone, who gets the parking? Not sure you even share it as it is. All our streets with their ruined views now have to pay to park because of the knock on effect of the terrible towers.</p> <p>4. Do you think that there are other approaches that should be considered?</p>	3	<p>Comments on legibility and presentation of consultation materials noted. We will consider feedback to inform approaches on future consultations.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes, and reducing car use, are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p>	Local Plan amended to provide more support for cycle hire use.	

		<p>What are you planning for electric bikes and possible scooters? They are silent, race through parks (scooters not bikes to be fair). Apparently illegal.</p> <p>They seem a good alternative transport to cars, so planning should consider these. You don't want busy cycle routes to have to share with electric bikes and scooters. We know this is problematic in the Netherlands.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p> <p>I go back to try to read the information and think about your key approaches and I am again overwhelmed by the amount of text. Can't you get someone to re write this consultation simply. Just say what it is, not all the filler.</p>		<p>Car parking provision will need to be carefully managed to meet the London Plan objectives for modal shift. Where car parking is required the priority is for disabled parking bays. The Council may use Controlled Parking Zones to manage parking pressure within neighbourhoods however the making of CPZs is outside the scope of the local plan.</p> <p>The use of electric scooters (e-scooters) is covered separately by legislation, which is outside the scope of the Local Plan. Transport for London has issued guidance on the use of e-scooters which should be referred for further information. In general, rental e-scooters are the only way to legally ride an e-scooter on public roads or in other public places within London - and even this is limited to specific boroughs. It is still illegal to use privately-owned e-scooters or other powered transporters on public roads.</p> <p>The use of electric or hybrid bicycles is broadly supported to encourage modal shift – this is provided that a bike meets the Electrically Assisted Pedal Cycles (EPAC) requirements, in which case it is classed as a normal pedal bike. This means you can ride it on cycle paths and anywhere else pedal bikes are allowed.</p> <p>However it is acknowledged that the Local Plan can provide more support for cycle hire.</p>	
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Sustainable transport and movement Healthy streets / healthy neighbourhoods Deliveries, servicing and construction</p> <p>3. Please provide your comments on the topic(s) selected above.</p>	13	<p>Support noted.</p> <p>The spatial strategy sets out the overall approach to integrated land-use planning within the borough. The plan seeks to direct growth and development to areas that are well connected by public transport and/or where new strategic transport infrastructure is planned to be delivered.</p>	<p>Local plan amended to provide more authoritative language where appropriate (e.g. development proposals 'must' rather than 'will be expected to' or 'should').</p> <p>The Local Plan has been amended to acknowledge that issues around the use of Low Emission Vehicles (e.g. carbon in production, pollution from tyre wear, etc.) and that a carefully managed approach to their use is therefore required.</p>

		<p>Strongly support the target of 90% of all journeys to be by active travel or public transport by 2041. There needs to be more detail as to how residents will be supported in meeting this target.</p> <p>Needs to be more detail of the standards that developers MUST meet with regards to healthy streets assessments AND the consequences of these NOT being met.</p> <p>There needs to be stronger language and more concrete intentions in a holistic and strategic approach to borough-wide sustainable transport and reducing dependence on the car.</p> <p>A move to Electric Vehicles is only a very partial solution - and the health problems of PM2.5 particulates from ALL vehicles (whether EV or not) needs to be addressed (more monitoring sites of the extremely hazardous PM2.5 are required).</p> <p>Supporting "last mile" delivery hubs is a great idea.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>		<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods Bakerloo line extension Sustainable transport and movement Safe pavements</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Forcing all/most traffic on to main roads literally costs lives both in terms of pollution and traffic accidents, why is the health of people living traffic heavy roads less valuable than those on residential streets? Pedestrian footfall is greater along main roads than residential streets and many schools are located alongside them. Creating more LTNs simply will create gridlock on main roads and expose both residents, school age children and other road users to ever higher levels of pollution.</p> <p>4. Do you think that there are other approaches that should be considered? Charging drivers (and I am a driver) for road usage, extension of the Bakerloo line along the Hayes line as originally proposed. Schemes to support use/uptake of electric vehicles, including enabling home owners to be able to park close to their charging points, electrification of buses in LBL area. Tackling cycling on pavements, registration scheme for cyclists to prevent traffic infringements i.e. failing to stop at red lights, posing harm to pedestrians, removing motorised scooters etc. FROMm pavements</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	2	<p>The Low Traffic Neighbourhoods project is outside the scope of the Local Plan.</p> <p>The setting of levies or charges for road use is outside the scope of the Local Plan.</p> <p>The Local Plan will also be amended to reflect London Plan parking standards for Ultra-Low Emission / electric vehicles. However in light of the climate emergency the use Ultra-Low Emission vehicles will need to be carefully managed. Whilst electric vehicles reduce tailpipe emissions they are carbon-intensive to produce and still add to congestion, road danger and severance. They also generate Particulate Matter through tyre and brake wear and can therefore contribute to poor air quality.</p> <p>The Council's Electric Vehicle Charging Strategy provides further details and will support the implementation of the Local Plan.</p>	<p>The Local Plan has been amended to acknowledge that issues around the use of Low Emission Vehicles (e.g. carbon in production, pollution from tyre wear, etc.) and that a carefully managed approach to their use is therefore required.</p>	

	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Noise pollution from cars / motorbikes / ATVs</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. Living close to a relatively busy route from the South Circular towards Brockley / New Cross there is a large amount of traffic, while the ULEZ will seek to change the exhaust pollution nothing is being done to address the level of noise pollution. Significantly the engine volumes and behaviour of drivers moving off from pedestrian lights and others simply delighting in exceeding the speed limits and demonstrating the power of their engines with great noise. More needs to be done to consider residents and discourage drivers from behaving in such inconsiderate ways.</p> <p>4. Do you think that there are other approaches that should be considered? Noise pollution monitoring, fines for un-muffled engines, banning of ATVs on city roads, rumble strips to make it uncomfortable to travel at speed along key roads (not ramps as I believe they cause more stop / start acceleration than they prevent).</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	9	The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. This includes adoption of the Healthy Streets Approach particularly along major roads including the South Circular, which covers matters of amenity such as noise.	No change.
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Black Taxis are public transport and should be considered as such and included when making plans for future transport needs. Stop excluding them</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above. Black Taxis are public transport and should be considered as such and included when making plans for future transport needs. Stop excluding them</p> <p>4. Do you think that there are other approaches that should be considered? Black Taxis are public transport and should be considered as such and included when making plans for future transport needs. Stop excluding them</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? Black Taxis are public transport and should be considered as such and included when making plans for future transport needs. Stop excluding them</p>	2	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes, and reducing car use, are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The draft Local Plan policy TR6 recognises that taxis and private hire vehicles do play a role in meeting the transport needs of Londoners. It includes a policy on development proposals involving taxi hire businesses to ensure these uses are appropriately managed.</p>	No change.
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Noise and vibration impact of rail on environment and human habitat</p>	0	Noted. The timetabling and scheduling of trains is outside the scope of the Local Plan.	No change.

		<p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Sustainable transport and movement</p> <p>3. Please provide your comments on the topic(s) selected above. The move from private cars to public transport is understandable, but there is apparently no concern about the adverse impact that rail itself can have. For example, since the refurbishment of London Bridge station there has been a huge increase in non-stopping fast trains through Brockley, Forest Hill, Sydenham etc. For housing near the railway, this has made a distressing change to quality of life, affecting sleep and general health. There needs to be consideration of sound baffling, also speed limits through built-up areas. Where the track is set apart in a cutting, the impact is not a problem, but where the track is at normal ground/street level near housing, the impact is serious and needs consideration. Currently no agency or government department is taking responsibility, although the Environmental Health Officer is supposed to have an overall duty of care.</p> <p>4. Do you think that there are other approaches that should be considered? It is implementation rather than approach. The impact of rail needs attention.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? Many busy stations have not benefited from the weekend late-running of the London Overground. Trains should run the full route out to Crystal Palace and Croydon, not terminate at New Cross Gate.</p>			
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? No it is unfair to people that use taxis</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Taxis and private hire vehicles</p> <p>3. Please provide your comments on the topic(s) selected above. Licensed taxis should have access to all roads.</p> <p>4. Do you think that there are other approaches that should be considered? Licensed taxis should be able to travel in London anywhere without having to get special permission from any borough. They should be able to get their passengers anywhere they need to get to without fear of a fine Absolutely ridiculous to suggest they need special permission to travel on an individual borough</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? Leave it as it. Our roads are there for everyone not just cyclists</p>	1	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes, and reducing car use, are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The draft Local Plan policy TR6 recognises that taxis and private hire vehicles do play a role in meeting the transport needs of Londoners. It includes a policy on development proposals involving taxi hire businesses to ensure these uses are appropriately managed.</p>	No change.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Better bus services; transport issues for essential car users; problems caused for some residents of existing barriers, continuing through traffic pushed onto major roads.</p>	1	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of</p>	No change.	

		<p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Sustainable transport and movement Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. I strongly support reducing pollution and healthier neighbourhoods and communities. However, Lewisham's current policies and future proposals do not consider all of the borough's residents with equal fairness or thought, and are effectively biased in favour of a specific approach which works well for some residents in some areas but which is in practice damaging for other residents in other areas. So, the elderly (but not necessarily the disabled), people who have to use cars either for work or for a positive and healthy lifestyle, people who live or have businesses on the horribly congested and crowded through routes, and people whose movements are restricted by the ongoing changes are effectively ignored in that no real attempt is made to avoid the damage caused to their lives and livelihoods.</p> <p>4. Do you think that there are other approaches that should be considered? 1/ A proper consultation; that is, one that is not skewed towards support for or acceptance of the council's way of approaching this issue. This should be open and include a survey of existing residents about the effects of changes so far. It should also include the urgent publication of the complaints received so far. This could result in a referendum on key issues. It should definitely involve reviewing the existing and potential future impact on emergency service access 2/ A realistic attempt to improve existing public transport provision before further restrictions to car travel are applied; this should initially be targetted at urgent improvement of the local bus services. 3/ Revisiting and reconsidering less radical (and disruptive) measures such as one ways systems, traffic calming, better pavements and street lighting, improved cycle routes, more timed restrictions or heavy goods use restrictions etc..... In many instances these were not tried properly before road closures were imposed</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>		<p>sustainable transport modes, and reducing car use, are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>It is recognised that the delivery of modal shift may be more challenging in areas which currently do not benefit from good levels of public transport. The council has and will continue to lobby central Government and the Mayor of London / Transport for London for investment in public transport infrastructure and improvements, including bus services.</p> <p>The parking policies recognise and respond to the need for parking provision for disabled parking bays.</p> <p>The Local Plan is supported by an Integrated Impact Assessment, which includes an Equalities Impact Assessment. This has informed the preparation of the plan.</p> <p>The Local Plan consultation has been carried out in accordance with the Council's adopted Statement of Community Involvement.</p>
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Bakerloo line extension Sustainable transport and movement</p> <p>3. Please provide your comments on the topic(s) selected above. I am glad that the Bakerloo extension has been kicked into the long grass since the over inflated numbers of houses in a borough already very densely populated in parts to be built will have to be re evaluated . I think Lewisham should put pressure on TFL to increase the number of buses at peak hours are always full / would encourage the use of buses rather than cars.I refer to the 363 bus</p>	0	<p>The London Plan commits to the delivery of the Bakerloo line extension, however at this time the project has not yet been fully funded. The delivery of the Local Plan is not contingent on the BLE, however it does seek to secure its future delivery.</p> <p>The council has and will continue to lobby central Government and the Mayor of London / Transport for London for investment in public transport infrastructure and improvements, including bus services.</p>

		<p>route..the buses to and fro at peak times are always full of children..The service is infrequent not hitting the time table and should be increased. The 356 bus has 2 buses at peak hours ! yet covers a route with steep hills, unsuitable for the average person to consider cycling along especially with kids/ shopping.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>			
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? The policies outlined in the plan are generally designed to make transport and movement more efficient, agreeable and sustainable. This is certainly essential, but there is another approach - reducing the need and demand for transport - that I mention below.</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. This is a core requirement. The overwhelming priority given to the movement of traffic and the parking of vehicles means that our streets can hardly fulfill other vital functions as admirably and clearly shown by the healthy street wheel. They should be places for exercise and meeting with plenty of greenery and habitat to boost human health and mitigate biodiversity loss and climate change, but instead are lined by parked vehicles and largely reserved for lethal and polluting traffic, with only narrow pavements for people and plants.</p> <p>4. Do you think that there are other approaches that should be considered? The idea is that everyone living in a city should have everything they need, services, shopping, employment, entertainment, education, in easy reach without the need to go by car. Copenhagen and Utrecht have introduced what they call hyper-proximity, Melbourne has 20-minute neighbourhoods and now Paris is aiming for a 15-minute city where you have access to all you need within a quarter hour's walk or bike ride. Of course this should be London-wide, but it is an idea that Lewisham could take up and begin to implement.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	19	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes, and reducing car use, are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The implementation of these policies will be aided by Policy OL1, which is the spatial strategy. This seeks to promote growth and regeneration around well-connected locations, such as town centres, where there are a wide range of services, facilities and job opportunities; this supports the 15-minute neighbourhood concept, however it is acknowledged that this could be clarified in the supporting text.</p>	Policy OL1 spatial strategy supporting text amended to clarify support for 15-minute neighbourhood concept.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Pavement parking</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Parking</p> <p>3. Please provide your comments on the topic(s) selected above. If an aim is to 'Boost the number of journeys made by walking, cycling and public transport' then clearing parked vehicles from footways might be a start. There is hardly any attention given to this in Lewisham and certainly not in the West sub-area. Everyday I see parked cars</p>	14	<p>The draft Local Plan sets out the strategic approaches to car parking and managing parking stress. It is acknowledged that the policies will need to be amended to ensure conformity with the London Plan.</p> <p>Some areas of parking management are outside the scope of the Local Plan, for example illegal parking which would need to be dealt with through</p>	No change.	

		<p>which would prevent someone with shopping or a buggy from passing, and require walking in the road. Of course walking in the road is also required to achieve social distancing under current conditions.</p> <p>4. Do you think that there are other approaches that should be considered? Given there is no 'approach' to this, then any actual action would be a start. It might not even be that expensive to manage although clearly outsourcing hasn't worked. The 'deaf-ear' approach really does need to be changed in respect of this problem. Enforcement of the law might be good: 1974 Greater London Council (General Powers) Act.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>		enforcement action, rather than planning policy.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? The BIG problem is private vehicles. Associations of convenience, protection, necessity, freedom and social status are promoted massively in car advertising. This needs countering with the anti-social nature of private vehicles in large cities.</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets/ healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. It is clear that the use of private vehicles has become too intense in large cities (including other cities than London) both in terms of space - ie where to put all the cars - and in terms of carbon emissions. There is a further aspect which is the way in which motor vehicles are used: * speed and impatience of some drivers, * the 'look-at-me' strategies of very noisy motorbikes and loud sound systems in cars with the passenger window wound down The effect of this along rat-runs is to deter walking and cycling</p> <p>4. Do you think that there are other approaches that should be considered? The road signs pleading with motorists to stick to 20mph are pitiful. Perhaps an across London approach is needed for civilised motoring, which will include more enforcement (at a cost, but fines might be allocated to meeting those costs?) Second, a campaign which addresses the problem solving needed to 'give up your car'. Clearly saving a considerable amount of money is one point, but solving the problem of alternatives to the no-thought use of cars is another. A starter might be (a) how to get the kids to school (b) how to get your shopping (c) how to visit your friends. LTNs could be used to limit rat-runs</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	12	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes, and reducing car use, are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Healthy Streets approach is advocated by the Local Plan. This includes measures to reduce vehicular dominance through development design. The setting and enforcement of speed limits is however outside the scope of the Local Plan.</p> <p>These suggestions will be forwarded to colleagues in the Council's transport service.</p>	No change.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Pollution levels n main roads, poor implementation of Lee LTN and the continuing money being spent to fix mistakes you made while the rest is f the borough is crumbling.</p>	2	The Low Traffic Neighbourhoods project is outside the scope of the Local Plan.	No change.	

		<p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. The LTN have pushed traffic onto surrounding roads, how can you continue the injustice of allowing some residents to be more polluted in order for some to have no pollution</p> <p>4. Do you think that there are other approaches that should be considered? Yeah complete some assessments, some consultations listen to those commenting on the platforms you created as you are FAILING to engage with people's concerns in any other way.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? You need to scrap and start again from a perspective of equality and fairness</p>			
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? The disproportionate traffic now be forced through the Grove Park Ward as a result of the LTN</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets/ healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. The introduction of the LTN is to promote health streets, but as the vast majority of traffic using the roads within the LTN was commuting traffic exiting the A2 and A20, the LTN has simply condensed this traffic into a smaller area and has turned Roads such as Harland Rd SE12 into a rat run or car park depending on the time of day, with a quadrupling of both noise and air pollution.</p> <p>4. Do you think that there are other approaches that should be considered? Unless you make the Kent commuters car journey significantly more expense either financially (tolls) or time (movement restrictions) they will continue to use the local streets as rat runs to avoid the A205. The current LTN needs to be expanded across the whole Grove Park Ward</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? Totally unworkable without the support of residents, but this must be ALL residents and not those lucky enough to be with the LTN</p>	2	The Low Traffic Neighbourhoods project is outside the scope of the Local Plan.	No change.
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above.</p>	1	The Local Plan advocates for the Healthy Streets approach, which is to be applied throughout the Borough. As a strategic document, the plan signposts key major roads where particular attention is required and where significant amounts of development are planned to enable transformative investment in the	No change.

		<p>What are you doing to reduce traffic on Manwood Road which is entirely residential. Cars speed at all times. Money should be spent on speed cameras and speed bumps which save lives not on cameras which fine people just trying to do a job. It used to have a bus gate. Can this be re-instated? It also needs an extension of the CPZ to stop commuters from driving to Lewisham for work or to take the train. Do not spend any more money on Hither Green until you have addressed others areas.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>		<p>public realm. Further details for specific neighbourhoods or streets may be set out in the Local Implementation Plan (LIP), which is the council's transport strategy.</p> <p>The making of CPZ is outside the scope of the Local Plan. These are considered by the council's transport service.</p>	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Lack of connectivity in the area north of Grove Park, south of Hither Green on either side of the rail corridor. Opportunity to improve pedestrian/cycle links across the rail corridor in the proximity to Northbrook Park area with a potential station</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Sustainable transport and movement</p> <p>3. Please provide your comments on the topic(s) selected above. Should also promote more consistent services along rail corridors (Hayes line, Catford Loop line, Grove Park mainline and Grove Park to Bromley) to a minimum of 6tph (train every 10 minutes) at all times of the day and not just during the peaks.</p> <p>4. Do you think that there are other approaches that should be considered? Should consider an "inter-connected hub" approach that serves strategic nodes of transport south of the borough (sub-South Circular) and is located in central areas that can connect to the wider areas of each hub. Consider connecting Sydenham, Lower Sydenham, Beckenham Hill, Downham, Grove Park and onwards from each end, producing a strong east-west transport corridor, of some sort.</p> <p>Should also consider new 4tph 8-car London Overground services from Clapham Junction to Thamesmead (new station)/Plumstead via Brixton (new platforms), Peckham Rye & Lewisham. This can promote the need for Brockley Interchange (with services to both Victoria and Clapham Junction via Denmark Hill) and provide an alternative to the New Cross Overground spur extension, this can constrain capacity as it is only 5-car trains.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? The remodelling of the Lewisham Hub should be developed so that the DLR could be extended in future if required. Any further extension could be south along the Grove Park rail corridor and onwards to Bromley via the existing Bromley North rail corridor.</p>	1	<p>The council has and will continue to lobby central Government and the Mayor of London / Transport for London for investment in public transport infrastructure and improvements, including bus and rail services. However the scheduling of services and capacity on trains is outside the scope of the Local Plan.</p> <p>The Lewisham transport interchange upgrade is a key strategic transport project identified in the Local Plan. The Council will work in partnership with Network Rail and Transport for London on the design of the interchange, and seek to ensure that it maximises connections between the different modes of public transport.</p>	Local Plan amended to provide further details on public realm enhancements and connectivity in Hither Green area.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Inequality, speeding</p>	2	<p>The Low Traffic Neighbourhoods project, road use levies, and making of CPZs is outside the scope of the Local Plan.</p>	No change.	

		<p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Parking Healthy streets / Healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. Shutting off roads (which didn't even have traffic problems) and installing bollards is having huge negative effects on community health services. I have already lost one quarter of my staff team as a result of the increased travel time and stress travelling. There was no consultation on road closures and staff haven't been repaid fines unwittingly received when trying to find routes to get to patients.</p> <p>4. Do you think that there are other approaches that should be considered? CPZ throughout the borough to stop commuter parking. Road pricing. Treat everyone the same. If you introduce LTN this should only be if residents on these roads get rid of their cars and permits. Also councillors should be made to declare any personal interests particularly when they live on roads which benefit from changes at the expense of other roads.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? Consider the impact of road closures on other roads and monitor pollution. Increased pollution due to specific changes will surely result in court action.</p>		<p>However the Local Plan makes clear that CPZs may be a tool required to manage parking stress within neighbourhoods and local areas.</p> <p>There are formal processes in place for elected Members to register interests in the Borough.</p>	
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Sustainable transport and movement Healthy streets / healthy neighbourhoods Digital connectivity</p> <p>3. Please provide your comments on the topic(s) selected above. Wholeheartedly agree that more needs to be done to counter high pollution in the borough from through traffic. While much has been achieved in Hither green and Lee to prevent 'traffic rat runs' in Grove Park this is a major problem. I would like to see some streets here turned into safe walking/cycling streets, closed off at one end to stop rat run traffic. Also junctions of burnt ash hill and baring road with south circular are hostile areas for pedestrians and cyclists and should be improved. Are is crying out for more safe cycling lanes/quiet streets. These should prioritise children, so while school streets are a good start we need safe walking/cycling corridors that connect schools, parks etc</p> <p>4. Do you think that there are other approaches that should be considered? Consideration needs to be given to how people will work post pandemic. Many employers are actively considering allowing more working from home and having a smaller office footprint. Good digital infrastructure is important here to support the shift.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p>	10	<p>The Local Plan advocates for the Healthy Streets approach, which is to be applied throughout the Borough. As a strategic document, the plan signposts key major roads where particular attention is required and where significant amounts of development are planned to enable transformative investment in the public realm. Further details for specific neighbourhoods or streets may be set out in the Local Implementation Plan (LIP), which is the council's transport strategy.</p> <p>The draft Local Plan includes a policy on digital infrastructure, recognising that this will be essential to sustainable economic development.</p> <p>Additional evidence will be prepared following the Regulation 18 consultation taking account the latest information on the impact of Covid-19, Brexit and related issues</p>	Additional evidence base documents have been prepared to inform the next stages of plan production, taking into account the latest baseline information. This includes a new Retail and Town Centres Study, Strategic Housing Market Assessment and updated GLA population projections.

		Grove Park station needs to be shifted to Zone 2 like the rest of Lewisham stations.		Payment 'zones' for stations are established by Transport for London and not the Council.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above. Not sure if this is meant to be covered in this topic - but there needs to be some guidance soon on how residents with no off-street parking can charge their vehicles at home safely. Have started to see electric cables being placed by residents across pavements from house to parked car on street - what is council policy on this? Is it allowed? Is it allowed if cable is covered with a cable mat? If yes, what is the recommended mat design? If not allowed then what are alternatives for home charging if no off-street parking? Can residents apply for a charging post outside their house... or within a block of flats... at what cost... with any planning requirement etc. Does Skanska have facility to apend charging points to their street light posts - assuming that they have been placed at the kerbside (many have been placed by Skanska away from the kerb, or in the middle of the pavement!).</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	3	<p>The Local Plan will be amended to reflect London Plan parking standards for Ultra-Low Emission / electric vehicles. However in light of the climate emergency the use Ultra-Low Emission vehicles will need to be carefully managed. Whilst electric vehicles reduce tailpipe emissions they are carbon-intensive to produce and still add to congestion, road danger and severance. They also generate Particulate Matter through tyre and brake wear and can therefore contribute to poor air quality.</p> <p>The Council's Electric Vehicle Charging Strategy provides further details and will support the implementation of the Local Plan.</p>	<p>The Local Plan amended to reflect London Plan parking standards for Ultra Low Emissions Vehicles.</p> <p>Local Plan amended to acknowledge that issues around the use of Low Emission Vehicles (e.g. carbon in production, pollution from tyre wear, etc.) and that a carefully managed approach to their use is therefore required.</p>	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Sustainable transport and movement Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. It seems from the proposals that the much vaunted "Lewisham Spine" has now been curtailed from just south of Lewisham Centre down to Catford, as opposed to the original proposal that provided a safe link through Lewisham Centre and up through Deptford.</p> <p>The current road layout through Lewisham Centre is extremely car oriented and a thoroughly unpleasant and dangerous area to cycle through even as an experienced cyclist. There is plenty of road space here to provide high quality cycle links through the junction from both the A20 and A21, which can then be taken on cycle lanes up Brookmill Road and Deptford Church Street to connect to the planned Cycleway 4. With the rest of the Lewisham Spine this would provide a very high quality cycle route from Lewisham/Catford up the way to Greenwich and then using Cycleway 4 to travel onward to Tower/London Bridge.</p>	14	The a21 corridor is identified within the plan as a key public transport corridor and an opportunity for cycling provision to be improved. See Part 3 South Area Principles and LSA4 A21 Corridor / Bromley Rd	No change.	

		<p>It's very disappointing to find little to no discussion of this extremely important strategic cycle link in the transport proposals. Delivering quality cycling infrastructure through major junctions is undoubtedly a significant challenge. However it is often the thought of tackling these junctions that contributes the most to the putting-off of new cyclists, and without dealing with these issues no amount of nice, easy to deliver cycle lanes on broadly straight roads will result in the modal shift the borough claims to be pushing for.</p> <p>4. Do you think that there are other approaches that should be considered? There are some who might consider the Waterlink Way to provide this sort of link and that any additional cycle lane would simply be "doubling up". However the Waterlink Way is not sufficient for regular travel as it often travels on paths that are often not well lit and are therefore relatively useless during winter or at night.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? While I've discussed the Lewisham Centre road layout here broadly the same car oriented issues can be found at Catford and should be addressed to allow cyclists to connect to the "Lewisham Spine" from south of Catford centre.</p>			
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? More for protected cycleways throughout the borough, including on Old Kent Road/Lewisham Way</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above. N/A</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p>	13	<p>The Local Plan supports and seeks to promote cycling through the Healthy Streets Approach (see the Part 2 Transport policies for further details). The Lewisham Links policy also sets out a strategic network of cycleways that the council is seeking to protect and enhance. The specific nature of cycleways and cycle provision will be considered on a case-by-case basis.</p> <p>The Lewisham Cycle Strategy will set out further details to support implementation of the Local Plan.</p>	Local Plan site allocations amended to signpost key cycleways that development proposals must respond positively to.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Not enough is said or done around the elderly or disabled, we'd all like to run, walk and cycle but to encourage shoppers and improve local businesses you need a better transport plan.</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Taxis and private hire vehicles Sustainable transport and movement</p> <p>3. Please provide your comments on the topic(s) selected above. its all well and good having healthier streets but some schemes stop shoppers and visitors venturing into such areas and merely raise the pollution outside these zones. make things easier for the public transport including taxis to serve the area</p> <p>4. Do you think that there are other approaches that should be considered?</p>	4	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. 				consultation, online consultation/engagement was necessary.	
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Sustainable transport and movement Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. I hope that the council can take a stronger position on low traffic neighbourhoods in future and not bow to immediate pressure to reverse them. While some of the arguments against them are no doubt well meaning they are often misguided and fail to recognise the non-intuitive effects of LTNs. For example the difference in low vs high income households living on residential streets (i.e. not main roads) is in reality extremely small at 89% vs 92% in outer London and even closer in inner London rendering the social equality argument largely ineffective. Regardless of this the idea that traffic will simply displace to the main roads anyway is provably false as once people get used to the new system many of the car journeys simply vanish as people adapt and begin to take trips by other modes of transport or indeed change their transport patterns entirely (there are countless pieces of research on this "induced demand" phenomenon). Over the medium term traffic on the main roads therefore returns to the pre-LTN equilibrium, and this can be seen clearly in the practical experience of other LTNs across London and indeed further afield. The council must defend these LTNs more vigorously and support the majority who are in favour of these schemes against the vocal minority who are opposed.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	20	The Low Traffic Neighbourhoods project is outside the scope of the Local Plan.	No change.
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Parking</p> <p>3. Please provide your comments on the topic(s) selected above. My understanding is that currently people with a resident's parking permit are entitled to a certain amount of free visitor's parking. However residents without a permit (many of whom do not own a car at all) are not entitled to this free allowance. Why is it that this subsidy is provided to one group and not the other?</p>	4	The cost of parking is outside the scope of the Local Plan.	No change.

		<p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>			
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Sustainable transport and movement Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. Strongly support the proposals to create Healthy Streets, with a focus on the most congested and polluted streets. Making walking and cycling easier and more accessible will be crucial to realising these ambitions. Healthy Neighbourhoods are also a positive step but they will require adequate funding to ensure people have greater incentives to take up active travel - ample cycle parking in the right places, removal of on-street car parking in some dense residential areas and 'local centres', and wider public realm improvements (greenery, seating etc). The 'parklet' on Staplehurst Road is a great example of what can be achieved in a microcosm, this approach should be rolled out across the borough, with the support of local residents and businesses.</p> <p>4. Do you think that there are other approaches that should be considered? The proposals to 're-route' the A205 are positive but this must be managed sensitively, it cannot simply divert all existing traffic away from Catford to other streets. Improving east-west active travel infrastructure will be key to reducing unnecessary local car journeys - walking or cycling on the A205 at present is extremely unpleasant and dangerous. Enabling active travel for local journeys will reduce pressure on the overcrowded network and create space for better walking & cycling infrastructure - an upward spiral.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	12	<p>Support noted. The proposals for re-routing the South Circular pertain to a small section of the road at Catford Town Centre, which is necessary to deliver the comprehensive regeneration of the centre.</p> <p>Arrangements for delivery of the Local Plan, including infrastructure funding (for example to support the Healthy Streets Approach) are set out in Part 4 of the Local Plan.</p>	No change.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Access to electric charging points</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below None chosen</p> <p>3. Please provide your comments on the topic(s) selected above. Pavements in Hither Green are not maintained. They do not promote walking. Maintain the pavements.</p> <p>4. Do you think that there are other approaches that should be considered?</p>	4	<p>The Local Plan will be amended to reflect London Plan parking standards for Ultra-Low Emission / electric vehicles. However in light of the climate emergency the use Ultra-Low Emission vehicles will need to be carefully managed. They also generate Particulate Matter through</p>	<p>The Local Plan amended to reflect London Plan parking standards for Ultra Low Emissions Vehicles.</p> <p>Local Plan amended to acknowledge that issues around the use of Low Emission Vehicles (e.g. carbon in production, pollution from tyre wear, etc.) and that a carefully managed approach to their use is therefore required.</p>	

		<p>Install more car charging points to enable electric cars. There are only 3 in Hither Green west and 11 in Lee Green - why?</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p> <p>No</p>		<p>tyre and brake wear and can therefore contribute to poor air quality.</p> <p>The Council's Electric Vehicle Charging Strategy provides further details and will support the implementation of the Local Plan.</p>	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Bakerloo Line extension Electric car charging points</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Bakerloo line - most important</p> <p>But we also need to think ahead - electric cars are coming. We need to plan for it and install chargers, not many people have off road parking where they can recharge their vehicles</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Electric vehicle charging stations in residential roads</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p> <p>N/A</p>	3	<p>The delivery of the Local Plan is not contingent on the Bakerloo line extension, however the plan seeks to secure its future delivery.</p> <p>The Local Plan will be amended to reflect London Plan parking standards for Ultra-Low Emission / electric vehicles. However in light of the climate emergency the use Ultra-Low Emission vehicles will need to be carefully managed. Whilst electric vehicles reduce tailpipe emissions they are carbon-intensive to produce and still add to congestion, road danger and severance. They also generate Particulate Matter through tyre and brake wear and can therefore contribute to poor air quality.</p> <p>The Council's Electric Vehicle Charging Strategy provides further details and will support the implementation of the Local Plan.</p>	<p>The Local Plan amended to reflect London Plan parking standards for Ultra Low Emissions Vehicles.</p> <p>Local Plan amended to acknowledge that issues around the use of Low Emission Vehicles (e.g. carbon in production, pollution from tyre wear, etc.) and that a carefully managed approach to their use is therefore required.</p>	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>Southern and the Overground not providing the scheduled service.</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Sustainable transport and movement</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Southern and The Overground need to be held accountable to providing the scheduled service.</p> <p>The London Bridge Victoria Line is East West and was just removed from the timetable, with Southern trying to pretend it did not exist!</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Ensure Southern and the overground continue to provide the scheduled service and improve it.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p>	4	<p>The council has and will continue to lobby central Government and the Mayor of London / Transport for London for investment in public transport infrastructure and improvements, including bus and rail services. However the scheduling of services and capacity on trains is outside the scope of the Local Plan, and is dealt with separately by Network Rail and Transport for London.</p>	<p>No change.</p>	

		N/A			
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Sustainable transport and movement</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Contributors suggest extending tfl overground from new cross to blackheath. Big infrastructure changes would be needed at new cross and such services would add to "conflicts" at lewisham junctions slowing services. Old bay platform at blackheath overgrown and now has equipment embedded in it. However it is true that blackheath users do not have easy access to overground except via denmark hill. Narrow pavements in blackheath village indeed a worry in covid times and i have largely stopped going there.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>Not much help that blackheath village is split between lewisham and greenwich</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p> <p>N/A</p>	2	<p>Draft Local Plan Table 12.1 on strategic transport priority projects included an aspiration for the New Cross to Lewisham overground extension, reflecting the council's Vision for Rail document. However this will be removed at the request of Transport for London.</p> <p>The Council has a statutory Duty to Cooperate with neighbouring authorities on strategic planning matters, and has done so with Greenwich on the preparation of the Local Plan, including on the town centre policies. As well, for the preparation of the Lee Green Neighbourhood Plan, which also deals with this town centre.</p>	Table 12.1 on strategic transport priority projects amended to remove New Cross to Lewisham overground extension at request of Mayor of London / Transport for London.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Healthy streets / healthy neighbourhoods Parking Sustainable transport and movement Deliveries, servicing and construction Taxis and private hire vehicles</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>I am very much in favour of the Low Traffic Neighbourhoods however they should be for everyone or for no one. So far the LTNs have only diverted the traffic to already busy and polluted areas and seem amazing for the streets which are part of the scheme and quite a nightmare for everyone else.</p> <p>The Healthy Street scheme seems like a good idea, our street is in line to become an Healthy Street, fingers crossed it will actually bring some change.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>I think overall the council isn't ambitious enough in terms of clamping down car usage. In my view, the amount of cars in London is shocking and the majority of car users are just lazy. The minority who need their car for work or for limited mobility should receive some sort of relief for electric cars but everyone else should be heavily taxed. The levels of pollution are</p>	11	<p>The Low Traffic Neighbourhoods project is outside the scope of the Local Plan.</p> <p>Support for Healthy Streets Approach noted.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Healthy Streets Approach forms part of the strategic approach to address poor air quality in Lewisham and London. The Local Plan also includes a specific policy on air quality.</p>	No change.	

		<p>unsustainable and impact everyone. The electric cars aren't a solution as they still contribute to particule pollution.</p> <p>The council should develop electric public transports (buses, taxis), facilitate car sharing (free parking in the borough), make pavement actually walkable, build cycling lanes on every street by removing most parking spaces and not facilitate car usage in any way.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p> <p>A resident in Lewisham lost a daughter to respiratory failure linked to pollution therefor I believe Lewisham should be at the forefront of the fight against pollution, a model for the rest of London.</p>			
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Healthy streets / healthy neighbourhoods Parking Electric car charging Sustainable transport and movement</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Encouraging and facilitating Walking and Cycling is fabulous. BUT, any schemes must be intelligently designed - not quickly chucked in place. 'Modal filters' displace traffic onto already heavily polluted roads - residential roads. There is a basic social injustice in the 'low traffic neighbourhood schemes' that a Labour council should be ashamed of. They re-arrange the traffic but do nothing to make walking and cycling further than ones immediate neighbourhood more unpleasant and dangerous.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>More carrot less stick.</p> <p>New developments MUST have electric car charging facilities for the number of parking spaces they are going to provide. Not 'encouraged' to do so - but MADE to do so.</p> <p>Reduce and enforce speed limits - particularly in residential areas - near schools etc. More school streets. To prioritise walking and cycling does not have to mean planters and road blocks. These cause gridlock and pollution. Give people visible viable alternatives.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p> <p>N/A</p>	4	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>'Modal filters' were part of the Low Traffic Neighbourhood Scheme, which is outside the scope of the Local Plan.</p> <p>The Local Plan will be amended to reflect London Plan parking standards for Ultra-Low Emission / electric vehicles. However in light of the climate emergency the use Ultra-Low Emission vehicles will need to be carefully managed. Whilst electric vehicles reduce tailpipe emissions they are carbon-intensive to produce and still add to congestion, road danger and severance. They also generate Particulate Matter through tyre and brake wear and can therefore contribute to poor air quality.</p> <p>The Council's Electric Vehicle Charging Strategy provides further details and will support the implementation of the Local Plan.</p> <p>The enforcement of speed limits is outside the scope of the Local Plan.</p>	<p>Local Plan amended to refer to the London Cycle Design standards and to ensure these are applied.</p> <p>The Local Plan amended to reflect London Plan parking standards for Ultra Low Emissions Vehicles.</p> <p>Local Plan amended to acknowledge that issues around the use of Low Emission Vehicles (e.g. carbon in production, pollution from tyre wear, etc.) and that a carefully managed approach to their use is therefore required.</p>	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>Thge need to fit in with neighbouring boroughs as people need cross boundary services.</p>		<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of</p>	No change.	

		<p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Parking</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Dont penalise cars, they are here to stay in one form or another, just make the alternatives more attractive.</p> <p>4. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Reducing demand for and use of cars is central to the London Plan and therefore Local Plan.</p>	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>Improving the road network and cutting traffic congestion</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Healthy streets /healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>Healthy streets/neighbourhoods have been very damaging concepts in terms of increased traffic congestion and worse air pollution. There is no simple solution to reducing traffic and most of these policies are promoted by people who don't face the practical difficulties of moving around.</p> <p>4. Do you think that there are other approaches that should be considered?</p> <p>N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan?</p> <p>N/A</p>	6	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Reducing demand for and use of cars is central to the London Plan and therefore Local Plan.</p>	No change.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>Sustainable transport and movement</p> <p>3. Please provide your comments on the topic(s) selected above.</p> <p>We have good bus provision but it appears to be misused by too many who "bilk" and too few ticket inspectors.</p> <p>TFL to be congratulated on move to e-buses.</p> <p>Over dependence on cars a national matter - higher motoring taxes a priority.</p> <p>4. Do you think that there are other approaches that should be considered?</p>	7	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Reducing demand for and use of cars is central to the London Plan and therefore Local Plan. However, levies on vehicle or road use are outside the scope of the Local Plan.</p>	No change.	

		N/A 5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A		Enforcement on the public transport network (e.g. fare dodging) is outside the scope of the Local Plan.	
Transport and connectivity		1. Are there other issues around transport and connectivity that the Local Plan should address? Traffic 2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods Sustainable transport and movement 3. Please provide your comments on the topic(s) selected above. Again no investment in Hither Green west of the tracks is shown. The whole area is ignored in your proposals, no investment in cycling and walking. 4. Do you think that there are other approaches that should be considered? Investment is not balanced across Lewisham. 5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A	4	Noted.	Local Plan amended to provide further strategic objective and policies for Hither Green including area west of the station.
Transport and connectivity		1. Are there other issues around transport and connectivity that the Local Plan should address? The council needs to sort out the current traffic issues before planning future projects. 2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods Sustainable transport and movement 3. Please provide your comments on the topic(s) selected above. The current LTN not only increases overall pollution in the borough but impacts negatively on local businesses and residents alike. The council seem to have no idea how to manage traffic flow, the newly designed junction at Lewisham High Rd and Ladywell High Rd is a perfect example of this. How many electric vehicles do the council have? Sat and watched three 70 plate Diesel mini buses pull out of the depot at Ladywell. Why are these not electric? 4. Do you think that there are other approaches that should be considered? Need to get a proper charging network in the borough including chargers in current street lighting and furniture. 5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A	3	The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. Reducing demand for and use of cars is central to the London Plan and therefore Local Plan. However, levies on vehicle or road use are outside the scope of the Local Plan. Low Traffic Neighbourhoods project is outside the scope of the Local Plan. The Council's Climate Emergency Action Plan notes the potential for expanding its fleet of service vehicles to Ultra Low Emission or electric, however this will be contingent on resources / funding available.	No change.

	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? The closure of random streets to traffic</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below</p> <p>None chosen</p> <p>3. Please provide your comments on the topic(s) selected above. I understand that fewer cars means a healthier environment, but the closure of random residential streets to through traffic has not reduced car use, but merely directed it elsewhere. The closure of Bishopsthorpe Road and Silverdale are a case in point. The reason given was to give more space to pedestrians, particularly during COVID. The real reason might be more to do with accessing government grants. There are very few pedestrians at any one moment on Bishopsthorpe, so that reason does not hold water. With the previous closure of Queensthorpe Road, all traffic getting on to Sydenham Road is coming down Mayow Road. This has resulted in jams, with cars idling and polluting at the traffic lights, and more traffic (& more speeding) on Mayow Road, which has two park entrances, one large school and is a thoroughfare for three other schools in the roads adjoining. It must be rethought.</p> <p>4. Do you think that there are other approaches that should be considered? Yes</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? No</p>	6	This comment appears to be referring the Low Traffic Neighbourhoods project, which is outside the scope of the Local Plan.	No change.
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Greening or reduction of car parks</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods Sustainable transport and movement Parking</p> <p>3. Please provide your comments on the topic(s) selected above. There are a number of smaller car parks (e.g. Clarendon rise, slaitewaite road) that encourage car traffic through residential areas. This contradicts the healthy street proposals. Could all town centre car parking be centralised (e.g. Lewisham town centre multi-storey) and these small car parks turned into green space close to town centres?</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>		<p>Noted. The Local Plan includes a number of proposals which support the rationalisation of existing car parking provision within town centres. The Local Plan also includes updated policies on car parking, which will provide greater support for car-free and car-lite development.</p> <p>It is acknowledged that some commercial uses require car parking, and some centres benefit from a certain provision of spaces being made available, and therefore parking will need to be carefully managed.</p>	No change.
	Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Speeding</p>	10	Enforcement of speeding is outside the scope of the Local Plan.	No change.

		<p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. I am sick and tired of people speeding, including buses. I have reported it to the Police and the Council and NOTHING gets done. Every day on Woolstone Road I see cars travelling WAY above the limit (20mph), doing more like 50-60mph. Buses also speed. Recently someone drove at me deliberately, same thing happened to my neighbour, I reported the car reg to the police, who did nothing even though they admitted they had other complaints against the same car - why are there not SPEED CAMERAS? Someone is going to DIE. It is only a matter of time.</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>		The draft Local Plan advocates for the Healthy Streets Approach, which aims to reduce vehicular dominance and improve road safety.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? Remove the LTNs and useless Bike lane from Molesworth street</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods Parking</p> <p>3. Please provide your comments on the topic(s) selected above. - Remove the useless LTNs and if you wish to adopt them, please run a consultation, and not use this abomination of a website called 'Commonplace' - Remove the bike lane from Molesworth street, or have the decency to patrol cyclists using both road and pavement as they please, and cross red lights like pedestrians did not exist - Lower price of parking permit for electric cars. Lewisham has some of the highest charges for parking permit across all London boroughs</p> <p>4. Do you think that there are other approaches that should be considered? N/A</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	3	The Low Traffic Neighbourhoods project, car parking pricing and highways enforcement are outside the scope of the Local Plan.	No change.	
Transport and connectivity	<p>1. Are there other issues around transport and connectivity that the Local Plan should address? There is no discussion of provision of public transport to Blackheath which needs improving. It would be helpful if the briefly mentioned Overground extension from New Cross went to Blackheath where the currently disused bay platform could be brought back into use. The</p>	2	Draft Local Plan Table 12.1 on strategic transport priority projects included an aspiration for the New Cross to Lewisham Overground extension, reflecting the council's	Table 12.1 on strategic transport priority projects amended to remove New Cross to Lewisham overground extension at request of Mayor of London / Transport for London.	

		<p>question of traffic in Blackheath Village needs to be addressed with a widening of pavements and a change in priorities to give pedestrians priority and slow down the traffic e.g. more pedestrian crossings and replacing the pelicans with zebras. The level of traffic in Blackheath Village is also an issue for air quality.</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. More needs to be done in Blackheath Village to restrict access to traffic and give pedestrian priority. The pavements should be widened and the road narrowed. Blackheath needs better public transport. Lewisham as a whole suffers from not having the tube and with the exception of the DLR only the substandard services of Southeastern. Why are our trains so slow, much slower than in the 1950s with a marked deterioration in journey times since the 1980s whereas train services have got much faster in most parts of the country?</p> <p>4. Do you think that there are other approaches that should be considered? Full information needs to be provided on the proposed Overground extension. Where LTNs are implemented they need to be fair and take into account the needs of local residents. The South Row LTN was a disaster and marooned us in our homes turning simple 10 minute journeys into 30-40 minute trips and putting unnecessary additional traffic pressure on Blackheath Village. This proposal should be scrapped permanently.</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>		
Transport and connectivity		<p>1. Are there other issues around transport and connectivity that the Local Plan should address? YES not everyone wants car free traffic, not everyone can walk or cycle</p> <p>2. Do you have any comments on the proposed approaches to transport and connectivity? Select the topic(s) and comment below Healthy streets / healthy neighbourhoods</p> <p>3. Please provide your comments on the topic(s) selected above. The current LTN in Lee Green is not working for all, it's been an absolutely disgrace and I will not support any attempt to roll them out further. They have made many people's lives an absolute misery. Not everyone can walk or cycle and those people have been completely overlooked. For people living on roads outside the boundary it's been a living hell with constant traffic jams all day long. This is now slightly eased by the rollback of the LTNs and lockdown but if they are rolled out further you will playing with peoples health and mental wellbeing</p> <p>4. Do you think that there are other approaches that should be considered? Enforce speeding. Put in ANPR cameras so locals can still drive around Lewisham as needed</p> <p>5. Do you have any additional comments on the 'Transport and Connectivity' section of the Local Plan? N/A</p>	4	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Reducing demand for and use of cars is central to the London Plan and therefore Local Plan. However, levies on vehicle or road use are outside the scope of the Local Plan.</p> <p>Highways enforcement (including speeding) is outside the scope of the Local Plan.</p>

Lewisham Local Plan

Regulation 18 consultation statement

Appendix 3 – Regulation 18 Draft Local Plan Commonplace Responses Part 3

September 2022

Part	Section, policy or paragraph	Comment	Agree	Council officer response	Action
3	-	<p>1. Do you have any comments on the 'character area' boundaries? The Telegraph Hill Ward is not in the Telegraph Hill East section. If there is difference it will cause confusion in terms of councillors and the conversation area's planning rules.</p> <p>Include the whole of Telegraph Hill Ward in the area.</p> <p>2. For each 'character area' the Local Plan sets out a vision, key objectives and area-based policies (including site allocations). Do you think that there are other matters that should be addressed in this part of the plan?</p> <p>N/A</p>	0	<p>The Local Plan character areas (and neighbourhoods within them) were informed by the Lewisham Characterisation Study, which was prepared in collaboration with community groups and subject to public consultation.</p> <p>Whilst it is acknowledged that people may not agree with the geographical extent of the areas, the character areas provide a useful way of establishing planning priorities and policies at a more localised neighbourhood (rather than borough-wide) level. The Local Plan must be read as a whole for planning decisions.</p>	No change.
3	-	<p>1. Do you have any comments on the 'character area' boundaries? Please don't ignore the A205 Stansted Road parade of shops (nos 294-341) which is a real trouble spot and totally NEGLECTED. There is high pollution due to bad traffic on A205. Traffic flow must be improved. Please don't ignore us just before we sit on the border between two wards, we are always forgotten!</p> <p>2. For each 'character area' the Local Plan sets out a vision, key objectives and area-based policies (including site allocations). Do you think that there are other matters that should be addressed in this part of the plan?</p> <p>Please don't ignore the A205 Stansted Road parade of shops (nos 294-341) which is a real trouble spot and totally NEGLECTED. There is high pollution due to bad traffic on A205. Traffic flow must be improved. Please don't ignore us just before we sit on the border between two wards, we are always forgotten!</p>	0	<p>The Local Plan acknowledges the issues of air quality and congestion along the South Circular. It seeks to facilitate the transformation of A205 using the Healthy Streets Approach, including the stretch covering the Stansted Road parade. However, as a TfL road that is a major route, the Council will need to work with the GLA/TfL to deliver improvements, the specific nature of which will be considered on a case-by-case basis.</p> <p>In addition, the draft Local Plan proposes to designate 118 Stansted Road as part of a new Cultural Quarter. It is hoped that this will help to support the vitality and viability of the parade, which is in close proximity.</p>	No change.
3	-	<p>1. Do you have any comments on the 'character area' boundaries? The boundaries do not seem quite right in the sense that the Telegraph Hill and Hatcham Conservation Areas are linked (historically and in that they currently form one community) along with the traditional high street on New Cross Rd, which provides the centre/ focus to both. Anything that happens in any of these 3 designated areas is connected and affects the other 2. So protections and plans the affect all 3 should be joined up.</p> <p>Calling the shopping area in heart of this joined up area, 'Hatcham Works', does not make it an industrial site or somehow NOT connected to residential and retail community around it. The opposite is true. It clearly should be developed to be an extension of the streets around it, perhaps with the Hatcham and Telegraph Hill street extended through the site and sympathetically developed with homes and shops and parkland that is in the style of the surrounding and enhances community facilities for those already living there. Where parts of the historic high street scene has been lost, it should be restored in its former style to properly connect the whole area again as one community with the same boundary.</p>	1	<p>The Local Plan character areas (and neighbourhoods within them) were informed by the Lewisham Characterisation Study, which was prepared in collaboration with community groups and subject to public consultation.</p> <p>Whilst it is acknowledged that people may not agree with the geographical extent of the areas, the character areas provide a useful way of establishing planning priorities and policies at a more localised neighbourhood (rather than borough-wide) level. The Local Plan must be read as a whole for planning decisions.</p> <p>Part 2 of the Local Plan on Heritage sets out approaches for preserving and enhancing heritage assets, including Conservation Areas. The Council has and is continuing to prepare Conservation Area Appraisals to support the Local Plan.</p>	No change.

		<p>2. For each 'character area' the Local Plan sets out a vision, key objectives and area-based policies (including site allocations). Do you think that there are other matters that should be addressed in this part of the plan?</p> <p>How to strengthen protection of the Conservation Areas and to stimulate their restoration to their former glory.</p>			
3	-	<p>1. Do you have any comments on the 'character area' boundaries?</p> <p>Some of the areas seem to have little connection with local communities. Blackheath really has zero connection with Grove Park. Telegraph Hill is next door to New Cross and miles from Sydenham. I have lived in Sydenham, Brockley and Honor Oak Park and they are on the same railway line. Ladywell and Crofton Park are on different lines. There is no bus connection to Telegraph Hill from the other areas associated with it. I can't see the benefit apart from a bureaucratic neatness to this 'Area'. The notion of an 'area' having a 'character' is superficial and I doubt much empirical connection of any description could be found to link these areas.</p> <p>2. For each 'character area' the Local Plan sets out a vision, key objectives and area-based policies (including site allocations). Do you think that there are other matters that should be addressed in this part of the plan?</p> <p>N/A</p>	2	<p>The Local Plan character areas (and neighbourhoods within them) were informed by the Lewisham Characterisation Study, which was prepared in collaboration with community groups and subject to public consultation.</p> <p>Whilst it is acknowledged that people may not agree with the geographical extent of the areas, the character areas provide a useful way of establishing planning priorities and policies at a more localised neighbourhood (rather than borough-wide) level. 3	-	<p>1. Do you have any comments on the 'character area' boundaries?</p> <p>Yes</p> <p>2. For each 'character area' the Local Plan sets out a vision, key objectives and area-based policies (including site allocations). Do you think that there are other matters that should be addressed in this part of the plan?</p> <p>Might be useful to start thinking about distinctive names for these areas that define part of their character. For example: the West area includes lots of places with 'Hill' in their name - reflecting the area topography. So perhaps could be called 'The Hills'? Initiating local consultation on character area names might galvanise participation in the Lewisham Local Plan.</p>	0	<p>Noted. It is agreed that distinctive names for the areas could assist with making Part 3 of the Local Plan a more engaging and colourful. However, for clarity it proposed to retain the existing names.</p> <p>It is noted that bespoke graphics and iconography were created for each character area and incorporated into consultation materials during the Regulation 18 stage, such as leaflets and social media posts.</p>	No change.
3	-	<p>1. Do you have any comments on the 'character area' boundaries?</p> <p>It seems to make sense from a planning point of view but loses the neighbour context in the process. I doubt if you will get anything like agreement to propositions around this sort of issue; think back to the local government boundary commission review..... Is this really necessary or will it be an administrative redundancy?</p> <p>2. For each 'character area' the Local Plan sets out a vision, key objectives and area-based policies (including site allocations). Do you think that there are other matters that should be addressed in this part of the plan?</p> <p>N/A</p>	0	<p>The Local Plan character areas (and neighbourhoods within them) were informed by the Lewisham Characterisation Study, which was prepared in collaboration with community groups and subject to public consultation.</p> <p>Whilst it is acknowledged that people may not agree with the geographical extent of the areas, the character areas provide a useful way of establishing planning priorities and policies at a more localised neighbourhood (rather than borough-wide) level. The Local Plan must be read as a whole for planning decisions.</p>	No change.
3	LCA	<p>1. Do you have any comments on the proposed vision?</p> <p>Overdevelopment throughout the borough with no given upgrade to transport links past phase 1 of the Bakerloo Extension. The proposed is unviable without firm commitments. the Local Plan undermines all previous approaches into sensitivities to existing historic buildings, neighbourhoods and areas as has been mentioned throughout the Catford Framework Plan. Lewisham Council has created a rod for its back that is only achievable by developing the rest of the borough in a similar was to that seen at Lewisham Gateway. The plan is going to lead to missed opportunities</p>	3	<p>Noted. The Catford Town Centre Framework provides a strategic framework for the regeneration of Catford town centre and is an evidence base document that is being used to inform the preparation of the Local Plan. The Framework was informed by public consultation.</p> <p>The Local Plan consultation is being carried out in accordance with the Council's adopted Statement of</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.

	<p>and mistakes that will be with the borough population for generations and encourages demolition rather than creative reuse which would be more aligned with the declared Climate Emergency which I do not believe the council takes seriously through the proposed documents out for consultation. From the Catford Framework response the message is clear that high rise is not wanted and is not considered by those who live in the borough suitable who will be living next to 15+ storey towers; overshadowing them and their private amenity spaces of the numerous Victorian Terraces that make up the area. Reconsider your approach and how sensitivity needs to be considered as previous Plans, studies and policies encouraged.</p> <p>2. Do you have any comments on the proposed key objectives? The basis of the objectives is sound, but the scale is inappropriate. Often masquerading under the remit that you asked people what they wanted, have put everything in and now say that we must accept high rise development. No mention of this was made when asking what people wanted - you have used consultation in a way that has meant you can justify inappropriate development in areas which your own documents say is not appropriate and therefore go against the current London Plan. This is shameful of the council and something that is being noted with the upcoming elections.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA3: Catford major centre and surrounds LCA1: Central Area place principles LCA2: Lewisham major centre and surrounds LCA4: A21 corridor LCA5: Central Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above. Overdeveloped, too high, no sensitivity to existing historic neighbourhoods such as Rushey Green, listed and locally listed buildings and conservations areas. Miss use of consultation to sell a vision to a community with no mention of what this truly means. Re-written studies such as the Tall Buildings Study to suddenly claim large areas are suitable for high rise despite these areas always previously being noted as highly sensitive (such as Holbeach School and the two storey Victorian terraces of Rushey Green). Complete disregard for overlooking of existing private amenity space, microclimate and rights of light. A balance needs to be realised and the council needs to understand that high rise is not the answer. With no additional transport infrastructure guaranteed the area can not support what is proposed. No explanation is given to why Catford if not given a high and low target that is dependant on the Bakerloo Line Extension being confirmed and completed in the way that areas south of Catford have been. Further, with increase in populations to the south, this strengthens the need for increased and better rail and transport connections that the Council are not committing to. The Council need to be realistic, undertake proper surveys and not just make assumptions. These comments are applicable to the majority of areas in the plan.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Catford Shopping Centre /Milford Towers Plassy Rd Island</p>		<p>Community Involvement. The Local Plan is distinguished from the Catford Town Centre Framework in that it is a Development Plan Document and therefore subject to different statutory requirements and consultation procedures, the Council's compliance with which will be considered at the plan's examination in public.</p> <p>The London Plan makes clear that tall buildings will play a part addressing housing needs across London. It directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>Whilst acknowledging the challenge of delivering on Lewisham's housing target and meeting local needs for new workspace, town centre floorspace and infrastructure, the draft Local Plan seeks to promote a character-led approach to managing growth and development. It has been informed by the Lewisham Characterisation Study, which has provided a steer for the spatial strategy set out in Part 1 of the plan, along with the sub-area strategies set out in Part 3.</p> <p>Both the London Plan and draft Local Plan set out detailed design requirements for development proposals involving tall buildings (including consideration of visual, functional, environmental and cumulative impacts), along with specific policies dealing with amenity impacts for all development proposals. It is considered that these policies will provide a robust basis for considering the impacts of tall buildings.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social transport infrastructure required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>	
--	---	--	---	--

		<p>6. Please provide your comments on the site allocation(s) selected above. Too much development, not enough promise of increased infrastructure and too much is pinned on items outside of the Councils control. The Council need to get these elements under control prior to proposing development of this size and nature. Lewisham Gateway has already won a Carbuncle Cup for Lewisham Gateway which is already looking dated with buildings like the gym in bad need for some additional building work prior to the pandemic. Why does Lewisham seek to win more Carbuncle awards by proposing development of this nature? Please stop committing to residential increases without doing proper studies on what the issues with the current infrastructure is - this needs to be past desktop studies undertaken by people who do not need the area as is evident through your documents and responses to the Catford Framework. Sites need to be respectful to historic neighbourhoods and existing building heights as outlined in Historic England guidance. When previously queried this is obviously not of priority to the Council. Overshadowing these elements and being overbearing on them will destroy the communities and culture that exists and makes parts of Lewisham special. Local Plan proposes overdevelopment and will be used negatively by contractors and those looking for quick and easy profit rather than the true investment the borough needs.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Listen to your communities and stop masquerading community consultation in the manner being used - it is untruthful and back handed</p>			
3	LCA	<p>1. Do you have any comments on the proposed vision? I would like to express my concerns about the redevelopment of Lewisham Retail Park, Loampit Vale into a mixed use residential and commercial area. In addition to two major retailers, Sports Direct and Matalan currently onsite, Lewisham Retail Park, Loampit Vale is also the home of SET Lewisham, a community artist-led studio and project space, and Lewisham Wing Chun, a full time self defence school for adults and children led by Sifu Paul Thompson, part of the WCUK organisation.</p> <p>Both spaces – SET Lewisham and Lewisham Wing Chun – have significantly benefited the community and cultural values of Lewisham and its residents since they started at this former Mothercare retail space in January 2019. I feel passionately that we must secure this space and work our hardest as a community to ensure it is not destroyed and lost forever.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA2: Lewisham major centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above. Reconsider the development of Lewisham Retail Park, Loampit Vale which is a vital community space and creative hub for artists.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Lewisham Retail Park, Loampit Vale</p>	1	<p>Lewisham Retail Park has an existing approved planning application.</p> <p>The Local Plan does however seek to protect cultural, community and employment uses within the borough and we will work with the developer to understand how this space can be relocated.</p> <p>The Councils Economic Development department also play a role in looking for suitable alternative space and we will pass on your comments.</p>	No change.

		<p>6. Please provide your comments on the site allocation(s) selected above. To "re-develop" Lewisham Retail Park, Loampit Vale, would mean the absolute destruction of two community spaces - SET Lewisham and Lewisham Wing Chun - which have actually helped Lewisham thrive and grow as a community and bring its residents together, especially in a time of global uncertainty. I fear that Lewisham Retail Park, Loampit Vale is vulnerable to being "re-developed" and the destruction of these places would completely compromise the vision and values that the Local Plan is proposing: a vibrant hub of cultural, commercial and community activity (which both SET and Wing Chun represent!).</p> <p>Since opening in 2019, SET Lewisham has become a safe space to think, make, create, and exchange ideas. SET Lewisham has always been welcoming and inclusive of all individuals and backgrounds, especially from the LGBTQ+ community, people of colour, and low income households, and consistently provides a high quality and affordable studio space to ensure its inclusivity. The ability to have an affordable studio space is especially important for younger individuals who are struggling with money and being able to afford an artist studio and somewhere to live.</p> <p>As part of the building, there is a project space which has also been fruitful for artists to make new and ambitious work, as well as present free exhibitions of contemporary art, injecting new energy and vitality into the community of Lewisham and individuals from the art community, who can easily access the space within 15 minutes of public transport. This project space has also become increasingly collaborative and interdisciplinary, hosting performance art, dance, music, screenings, poetry readings, creative and educational workshops, a guest curated residency programme and other free, live events for the community of Lewisham and aligned with Lewisham's greater vision as it prepares to host the London Borough of Culture 2022.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Provide affordable artist studios and community spaces if the re-development goes ahead!</p>			
3	LCA	<p>1. Do you have any comments on the proposed vision? Provide affordable spaces for artists.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. 3	LCA	<p>1. Do you have any comments on the proposed vision? In general yes land needs to be used in the best way possible. However the ongoing dogs dinner (like Croydon on acid) at Lewisham Gateway makes me very worried about the design and density of some of these sites.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA4: A21 corridor</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Land at Rushy Green / Bradgate Road Ladywell Play Tower</p> <p>6. Please provide your comments on the site allocation(s) selected above. This sentence from the plan - Rosenthal House, opposite on the eastern side of Rushey Green, establishes a wayfinding precedent at this end of the town centre, which this site may work in conjunction with to enhance townscape and legibility. This is the most ridiculous way of saying we want to build another high rise tower that I have ever seen. Just because there is one badly designed tower with appalling street frontages and a mecca for rubbish, does not mean bang another one up next to it! The shadow of any tower will block sunlight into people's south facing aspects on Bradgate Street, and block afternoon and evening sun on Rosenthal Road. Plus cause unbelievable disruption and noise for residents for the several years it will take to build. No thanks! Low rise developments only in these areas. The complete cock up of the Ladywell Playtower is an example of getting a good idea, and then making it unfeasible. I highly doubt whether any cinema could invest in this in post COVID world, this incredible building is falling into ruin whilst the council argued and amended agreed upon proposals. What a disgrace.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	0	<p>Noted. The proposed site allocation for Land and Rushey Green and Bradgate Road is located within a London Plan Opportunity Area and major district centre. The London Plan directs that higher density developments should be considered in these locations.</p> <p>The indicative site development capacity has been established using a standard methodology, as set out in the Site Allocations Background Paper. Should any future development proposal come forward, buildings heights and density will be considered through the planning approvals process, and informed by the design-led approach. Applications will need to demonstrate the design will respond positively to local character and not result in adverse impacts on amenity of neighbouring properties.</p> <p>It is acknowledged that the reference to Rosenthal House as a wayfinding precedent should be removed.</p> <p>The Ladywell Playtower has been submitted for planning. Members of the public can respond through the Development Management Porcess.</p>	Local Plan site allocation for Land at Rushey Green and Bradgate Road (Aldi) amended to remove development guideline concerning Rosenthal House.

--	---	--	--	--

	<p>fear that Lewisham Retail Park, Loampit Vale is vulnerable to being "re-developed" and completely compromising this vision and values that the Local Plan is proposing.</p> <p>SET Lewisham, in particular, where I am an artist and share a studio space, has completely transformed in the two years I have been there. As artists and a community in South East London, we are resourceful, creative and have been able to meaningfully use this space to create independent artist studios, where was nothing.</p> <p>Part of the wider SET network of studios across London with a membership of over 500 individuals, SET Lewisham has been a cultural hub for young and emerging artists, especially individuals finishing degrees in fine art, design and film at some of the most prestigious universities in the U.K. and internationally including Central Saint Martins, the Royal Academy of Arts, the Royal College of Art, and Goldsmiths, University of London. It has become a safe space to think, make, create, and exchange ideas.</p> <p>SET Lewisham has always been welcoming and inclusive of all individuals and backgrounds, especially from the LGBTQ+ community, people of colour, and low income households, and consistently provides a high quality and affordable studio space to ensure its inclusivity. The ability to have an affordable studio space is especially important for younger individuals who are struggling with money and being able to afford an artist studio and somewhere to live.</p> <p>I am fortunate to have been able to afford and use a studio for the past two years and I can see with such clarity how invaluable the SET Lewisham space has been for myself and the fellow artists who have a studio here, not just to make work, but a place to safely keep their work overnight, grow and develop ideas and their professional practice. The building is ideal for various artistic practices because it has lots of natural light, hardwood floors, and high ceilings, primarily based on ground level for easy access and transport; these features are truly incredible and impossible to find in London. There is also a regular team of cleaners who ensure it is looked after and maintained. It is also very useful and convenient that SET Lewisham is within 20-30 minutes of walking or bicycling from home for most artists and has subsequently connected the artists and studio more closely to the local businesses and community of Lewisham.</p> <p>As part of the building, there is a project space which has also been fruitful for artists to make new and ambitious work, as well as present free exhibitions of contemporary art, injecting new energy and vitality into the community of Lewisham and individuals from the art community, who can easily access the space within 15 minutes of public transport. This project space has also become increasingly collaborative and interdisciplinary, hosting performance art, dance, music, screenings, poetry readings, creative and educational workshops, a guest curated residency programme and other free, live events for the community of Lewisham and aligned with Lewisham's greater vision as it prepares to host the London Borough of Culture 2022.</p> <p>There is a constant fear among artists in metropolitan cities such as London that their studio building will close down only after a few years or even months after opening and made into residential housing or mixed use. This fear not only inhibits the creative spirit but diminishes the capacity for an individual to authentically pursue a creative practice and professional career. The reality is this fear is true and the proposed Local Plan is a stark reminder and call to action that spaces like SET</p>			
--	--	--	--	--

		<p>Lewisham, despite how obviously valuable they are to the community of Lewisham and the greater art community, are vulnerable and can not be taken for granted; we must secure this space and work our hardest as a community to ensure it is not destroyed and lost forever.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LCA	<p>1. Do you have any comments on the proposed vision? The council need to be MUCH more ambitious and focused on transforming the borough to meet its own sustainability targets and climate emergency declaration. 80% sustainable transport will not be met unless the focus is heavily on cycle routes and walking and truly transforming the borough to make cycling and walking more viable than driving. Lead with cycle routes in mind as a priority and plan from there.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above.</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below.</p> <p>None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>	1	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Local Plan supports and seeks to promote cycling through the Healthy Streets Approach (see the Part 2 Transport policies for further details). It also includes detailed policies around the Lewisham Links, which involve proposals around a connected network of strategic walking and cycle routes.</p> <p>The identification of new and improved public realm / cycle infrastructure is set out in the Infrastructure Delivery Plan, which is a companion document to the Local Plan.</p>	No change.
3	LCA	<p>1. Do you have any comments on the proposed vision? Overall I support the general vision and direction of the proposals</p> <p>2. Do you have any comments on the proposed key objectives? I support them</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA3: Catford major centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above.</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. 23 Land and Rushey Green and Bradgate Road (aldi)</p>	0	<p>Support for vision noted.</p> <p>In terms of amenity, the draft Local Plan Part 2 sets out specific policies addressing the protection of local amenity. These 'development management' policies must be read alongside site allocation policies. Any future development proposal for the site will be required to assess and demonstrate that impacts on amenity have been avoided and/or appropriately mitigated.</p> <p>Draft Local Plan policy QD1 strongly encourages developers to engage with residents and others likely to be affected by development proposals. This may provide an opportunity to feed into the detailed designs for any future development. Otherwise, there will be opportunities for the public to comment on proposals</p>	No change.

		<p>6. Please provide your comments on the site allocation(s) selected above. 23 Land at Rushey Green and Bradgate Road (Aldi) - I am very concerned that there isn't a stronger statement and underlying commitment to enforce proposed policy QD11 Infill and backland sites, back gardens and amenity areas specifically "Do not result in harmful overshadowing or overlooking, or otherwise adversely impact on the amenity of neighbouring properties, including their rear gardens, or the occupiers of the development, having regard to other Local Plan policies"</p> <p>There is a poor precedent from 17 Scrooby street in allowing this to occur and more needs to be done to balance the clear opportunity to improve and better utilise the Aldi site, with protecting the amenity and privacy of the exiting homes and gardens.</p> <p>This is a really good opportunity to get something right, but could go horribly wrong if mis-handled.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? I think this is good opportunity for deep community engagement and participative design workshops because it is a specific site with very local impacts that people can understand in real terms, rather than strategic planning which is harder to grasp.</p>		through the planning approval process. Further information is set out in the Council's adopted Statement of Community Involvement.	
3	LCA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA2: Lewisham major centre and surrounds LCA3: Catford major centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above. - Do not destroy Catford in the same way as Lewisham Centre has been destroyed. - Lewisham Centre is awful: Surrounded by a busy road without any cycle lanes, pedestrians still have to cross the busy road to get from the shopping area to the station, the height of the buildings will make it a drafty, dark and oppressive area.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	0	<p>Noted. The draft Local Plan acknowledges the issues of vehicular dominance in Lewisham town centre, along with the need to improve the public realm to encourage and enable movement by walking and cycling in the town centre area. It sets out specific details to address these through the Part 3 area-based policies and site allocations.</p> <p>The draft Local Plan, Part 2 sets out policies for managing building heights. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.

3	LCA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above.</p>	0	<p>The site is in a highly accessible location and suitable for high-density redevelopment.</p> <p>However we recognise that there are sensitivities regarding adjacent residential properties and any proposals that come forward will have to demonstrate a suitable relationship and transition in scale.</p>	Site allocation amended to reduce indicative capacities and to reflect the A21 development Framework.

		<p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Land at Rushey Green/ Bradgate Road</p> <p>6. Please provide your comments on the site allocation(s) selected above. I am unhappy with the proposal to allocate Land at Rushey Green/Bradgate Road for potential development of 119 residential units, as this is massively disproportionate to the size of the land available, would be a very high building surrounded by small Victorian terraced houses so out of scale to the surrounds, greatly increase traffic along Bradgate Road and put massive strain on local services which are already oversubscribed. It would have a huge adverse affect on our local area. Already having Aldi car park entrance on Bradgate road and the recent closure of surrounding roads to incoming traffic has already had a terrible affect on levels of traffic on Bradgate Road which is used by many many children and families attending Holbeach School</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Any future residential development should be 2-storey in line with the surrounding buildings and residential location. The car entrance to Aldi should be relocated on the main Rushey Green Road, and/or the first section of Bradgate Road should be closed to traffic beyond the car park entrance.</p>			
3	LCA	<p>1. Do you have any comments on the proposed vision? Please don't ignore the A205 Stansted Road parade of shops (nos 294-341) which is a real trouble spot and totally NEGLECTED. There is high pollution due to bad traffic on A205. Traffic flow must be improved. Please don't ignore us just before we sit on the border between two wards, we are always forgotten!</p> <p>2. Do you have any comments on the proposed key objectives? Aim 3: Secure the re-routing of the South Circular (A205) to enable the comprehensive regeneration of Catford major centre, and reinforce its role as the Borough's main civic and cultural hub. Please don't ignore the A205 Stansted Road parade of shops (nos 294-341) which is a real trouble spot and totally NEGLECTED. There is high pollution due to bad traffic on A205. 3	LCA	<p>1. Do you have any comments on the proposed vision? Dire</p> <p>2. Do you have any comments on the proposed key objectives? How will you ensure development at such a huge scale will have services and facilities to cope with the influx of population - a population mix which will be unknown in age, gender, family structure, ethnicity etc</p> <p>What will be required from the point of view of transport, schools, health facilities, GP services, local open space overwhelmed, impact on sewage, water supply, delivery systems - it goes on. Where have these requirements been addressed?</p> <p>Has any attention been given to the fall in population over the London area? Well-documented by the ONS, and may be supported by the 2021 Census. What about the impacts, as yet unknown, in a post Covid 19 world?</p> <p>Lewisham has been a dormitory borough for years. It does not have the employment available to sustain this new population. Where will new residents work, how will they get there, will they only work from home?</p> <p>What are Lewisham council's plans and policies on any of this?</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA4: A21 corridor LCA3: Catford major centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above. LCA3, plans for the south circular re-routing are mad. The chaos and congestion resulting will make daily life for local residents unworkable, a living hell.</p> <p>Lewisham council has spent the last 30/40 years destroying the Catford Centre. When I was a girl it was a decent, pleasant place to be and shop. What is planned will not restore that sense of decency and pleasantness. But then Lewisham council has destroyed central Lewisham - what was a decent, pleasant place to be. why would anyone go there?</p> <p>Only Labour has been in control of the council for the last 30/40 years, look around you at your lack of achievement and destruction.</p>	0	<p>Noted. The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p> <p>The Local Plan covers a 20-year period. The draft Local Plan was largely prepared before the peak of the Covid-19 pandemic. Additional evidence will be prepared following the Regulation 18 consultation taking account the latest information on the impact of Covid-19, Brexit and related issues</p> <p>The draft Local Plan recognises that Lewisham has one of the lowest employment densities in London. It therefore sets out a strategy to increase the Borough's employment base and create a more inclusive local economy. Further details and policies are set out in Part 2 section on Economy and Culture.</p> <p>The re-routing of the South Circular is critical to delivering the comprehensive regeneration of Catford town centre. The Council has prepared the Catford Town Centre Framework and demonstrates that this scheme is feasible. The Council will continue to work with the London Mayor and TfL to support the scheme's delivery.</p> <p>The site allocations are necessary to demonstrate how the Local Plan will meet identified needs over the plan-period, including for new homes, workspace and jobs, community facilities and supporting infrastructure.</p> <p>Planning applications on site allocations within the plan will be considered through the planning approvals</p>	<p>Additional evidence base documents have been prepared to inform the next stages of plan production, taking into account the latest baseline information. This includes a new Retail and Town Centres Study, Strategic Housing Market Assessment and updated GLA population projections.</p>

		<p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. What is the point?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? What about Leegate? And the other site allocations in the Lee Green area, which will also impact hugely on the residents of another borough. How is it that consultants for Galliards, officers and councillors pretend that 450 units are planned for Leegate, and then say, hang on, we would really like 630 units? The impact would be enormous and not sustainalbe. How dare the council try to trick residents</p>		process, having regard to the Development Plan policies.	
3	LCA	<p>1. Do you have any comments on the proposed vision? It would be in the best interest of the local residents that this does not go forward</p> <p>2. Do you have any comments on the proposed key objectives? I don't feel as though the plan should go ahead - there is already enough activity in the area</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. House on the Hill, Slaithwaite Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. I don't feel as though the plan should go ahead - there is already enough activity in the area</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? I don't feel as though the plan should go ahead - there is already enough activity in the area Aswell as problems with parking etc</p>	0	<p>Noted. It is imperative that the Council has an up-to-date local plan in place. The Local Plan must set out a positive strategy for delivering sustainable development in line with National Planning Policy Framework and the London Plan 'Good Growth' principles. The plan proposals set out an approach to sensitively managing growth and change, recognising that Lewisham is an inner-London borough and the central sub-area is predominantly within a London Plan 'opportunity area' where there is a strategic direction to focus new development and regeneration.</p> <p>We note your objection regarding the Site allocation on Slaithwaite Rd however this is a highly accessible site that is suitable for high-density development and could contribute to providing affordable homes for the borough.</p>	No change.
3	LCA	<p>1. Do you have any comments on the proposed vision? Very disappointed to see that there's no mention of how the local infrastructure, especially schools, would cope with the huge increase in residential properties.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p>	4	<p>Noted. The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>	<p>Local Plan amended with additional details on the strategic priorities for the area west of Hither Green station.</p> <p>Local Plan amended to designate Hither Green Lane as a local centre, with amendments to the boundary of the centre.</p>

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA£: Catford major centre and surrounds Staplehurst Road</p> <p>4. Please provide your comments on the topic(s) selected above. The cycle/footbridge over the railway is essential to the development of Catford. Without it, the safety of cyclists, pedestrians and families accessing schools from opposite sides of the tracks is compromised. To overlook this is negligent.</p> <p>Staplehurst Road being designated a local area is ridiculous and will further exacerbate community division triggered by the West side of Hither Green station bearing the brunt of negative effects of the LTN that protects the East, Lee, area. Hither Green Lane is the second longest road in the borough, provides access to a large primary school, Mountsfield Park, Woodlands surgery, multiple childcare settings, multiple parades of local shops, the train station and bus routes. Designating Hither Green Lane as a local area will improve equality of opportunity to those who live, work and are educated on the West side of the station as well as increasing its appeal to more independent businesses. Currently, the proposals to further improve Staplehurst Road give the impression of deliberately enhancing the health and well-being of one population group to the detriment of another which is unethical.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Ladywell Play Tower</p> <p>6. Please provide your comments on the site allocation(s) selected above. Please don't convert this to residential use. There is a lot of community support for it to be used as an arts and community venue.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? The area between Rushey Green/Lewisham High Street and Hither Green Lane is poorly represented by its councillors and is overlooked by these proposals. Where will children in this area be able to get primary school places if high rise developments are constructed locally?</p>		<p>At its meeting on 16th September 2020 Mayor & Cabinet agreed the transfer of S106 funding originally proposed for the delivery of a footbridge between Doggett Road and the Barratt's development on the former Catford Greyhound Stadium site to be used to deliver a programme of public realm and accessibility improvements to Catford Station areas. This includes looking at options to provide step free access at Catford Station. See M&C report for further details.</p> <p>The site allocation proposals for Ladywell Play Tower provide for main town centre, community and residential uses. The allocation is considered necessary to enable the restoration and the building and bring it back into viable use.</p> <p>The draft Local Plan includes policy proposals for the area to the West of Hither Green station, including site allocations. In response to Regulation 18 stage public consultation feedback, it is acknowledged that additional information on the strategic priorities for this area should be included in the plan.</p> <p>In response to Regulation 18 stage consultation feedback, officers have reviewed findings of the Local Centres Topic Paper (2020) with reference to Hither Green Lane. It is considered appropriate to extend the boundary of the parade north past Lanier Rd / St Swithuns Road, so that it includes St Swithun's Church to the east (and some additional retail units to the west). This will appropriately reflect the presence of a community anchor and provide for local centre status.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision? Many of these proposals are exciting and welcome, particularly the Borough's commitment to promoting pedestrian access cycling and public transport over private vehicles. However, as a resident of the area around Hither Green Lane, it's clear that this plan simply enshrines the areas current role as a corridor for traffic rather than the healthy neighbourhood its residents want.</p> <p>2. Do you have any comments on the proposed key objectives? Proposals for 'East Lewisham' give much attention to the Staplehurst Road and the Lee Green preservation areas. These neighbourhoods have already seen far more investment than Hither Green West. Hither Green Lane now has a fantastic range of pioneering local shops (plastic-free shop, Good Hope Cafe, Drink at Bobs). It is a 15-minute neighbourhood in the making and at least as deserving of attention and investment as leafy Lee. Please give attention to this area. Hither Green Lane is not</p>	9	<p>Noted. The draft Local Plan includes policy proposals for the area to the West of Hither Green station, including site allocations. In response to Regulation 18 stage public consultation feedback, it is acknowledged that additional information on the strategic priorities for this area should be included in the plan.</p> <p>The Council will work with the Mayor of London and TfL by exploring feasibility of design options for the re-routing the South Circular. It will also work with TfL to secure funding and facilitate delivery of the project, working also with other stakeholders.</p> <p>The Local Plan supports and seeks to promote walking and cycling through the Healthy Streets Approach (see</p>	<p>Local Plan amended with additional details on the strategic priorities for the area west of Hither Green station.</p> <p>Local Plan amended to designate Hither Green Lane as a local centre, with amendments to the boundary of the centre.</p>

		<p>an A road and should not be serving this role. It needs far more care and investment than the hyper-gentrified streets to the East of Hither Green Station.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. I love the idea of making Lee High Road and the South Circular healthy streets. But we need plans and targets for such an ambitious proposal. How will the council work with TFL on this? Otherwise, this seems like a vague gesture.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. The absence of anywhere close to Hither Green from the list of options is very telling!</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Expansion of LTNs across the Borough please.</p>		<p>the Part 2 Transport policies for further details). The specific nature of interventions will be considered on a case-by-case basis.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. However the designation of Low Traffic Neighbourhoods are outside the scope of the Local Plan.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision? Great plan. Wholeheartedly agree.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. 3	LCA	<p>1. Do you have any comments on the proposed vision? I think that the development of green spaces in catford is really positive but I'd like to see ideas about how to reduce congestion and increase safe cycling and walking on the main roads such as the south circular (which is also a residential road) as the new road layout would have the opportunity to have wide cycle lanes but seems to have been squeezed out. I'm confused by the inclusion of staplehurst road as a local hub as it is a handful of shops in one of the most affluent parts of lewisham which already benefit from other initiatives such as healthy streets and school streets whilst other larger local hubs with more difficulties with road safety and accessibility by foot and bike (hither green lane, Sangley Road, muirkirk road, Torridon road) . It seems strange to be looking at increasing accessibility only on the affluent entrance to the station, as if accessibility is not an issue on the (more socially diverse/economically deprived) west side of the tracks, with basics like a pedestrian crossing at the dangerous (and far busier) Torridon/brown hill road still not addressed</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below Hither Green Local Hub</p> <p>4. Please provide your comments on the topic(s) selected above. I'm confused by the inclusion of staplehurst road as a local hub as it is a handful of shops in one of the most affluent parts of lewisham which already benefit from other initiatives such as healthy streets and school streets whilst other larger local hubs with more difficulties with road safety and accessibility by foot and bike (hither green lane, Sangley Road, muirkirk road, Torridon road) have not been included in such initiatives and so are being left behind (which increases social divisions and inequalities). Are there any other issues and/or approaches for the area that you feel should be considered? Make changes to south circular to increase the safety of alternatives to car travel , e.g wider cycle lanes, pedestrian crossing at brownhill/Torridon junction. Have in mind that the south circular is also a residential road in catford south (e.g brownhill road is fully residential) so any changes that divert traffic from elsewhere (eg hither green and lee) has the impact of worsening air quality for residents on brownhill and surrounding areas</p>		<p>Church to the east (and some additional retail units to the west). This will appropriately reflect the presence of a community anchor and provide for local centre status.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision? Central Lewisham proposals including proposal for Connington Road and Tesco car park. WAY TOO MUCH HOUSING.</p> <p>This area has already become overdeveloped in completely the wrong way. When I first came to live in Lewisham centre there was one High rise block - City Bank. Over the last 10+ years it has become completely unrecognisable with huge tower blocks dwarfing life at street level. Who are these apartments for? They are completely unsuitable for families or for anyone who wishes to live on a human scale, in a connected, healthy environment.</p> <p>As we have been made aware of over the past years, these huge scale tower blocks can pose sever safety risks (Grenfell) and only add to isolation and lack of community in times of difficulty (Covid).</p> <p>We are all aware that London needs more housing but this is not the way to address the problem.</p> <p>The redevelopment of the Leithbridge estate off Lewisham Road is a prime example of poor planning with a lack of focus on the needs of residents. The number of homes rebuilt on the site has more than doubled, with four large tower blocks being</p>	4	<p>Noted. The London Plan makes clear that tall buildings will play a part addressing housing needs across London. It directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study, which has identified Lewisham as a location that is suitable for tall buildings.</p> <p>Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The London Plan sets out detailed requirements for tall buildings that development proposals must demonstrate compliance with. This includes visual, functional, environmental and cumulative impacts, and covers such considerations such as microclimate.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>

		<p>built, plus many more lower rise unit. Where are the new facilities to meet the needs of all these new residents? The schools, GP's surgeries, local shops and green spaces? Current advertisements on the new phase of this development offers apartments starting from 350K!</p> <p>The new proposal for Connington Road/Tesco car park now adds to the density and exclusivity being created in this area where over 300 new dwellings are being proposed</p> <p>Where are the open spaces for existing residents? Apparently open spaces are good for mental health! Are the planning team aware of this? Public spaces need to allow people (including children) freedom to relax and play. Sanitise strips of grass (the 'riverside walkway' by the Fizzy Living tower block next to Lewisham station) do not offer this freedom.</p> <p>Lewisham council PLEASE come and visit these areas, talk to the people who already live in these places. Have you recently walked through Lompit Vale or Thurston Road? Ask yourself if you would like to live in a wind-trap, surrounded by high rise towers. These developments are only storing up problems for the future.</p> <p>Look for better examples within the borough, such as the low rise flats with large open spaces next to Glass Mill leisure centre.</p> <p>Be Brave enough to make good choices for the people of Lewisham.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None Selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Conington Rd and Lewisham Rd (Tesco)</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>The draft Local Plan sets out that all new housing developments must meet the London Plan standards for indoor and outdoor amenity space and children's play space.</p> <p>Whilst recognising the need for new green and open spaces to support the population, a balance must be struck given the limited amount of land available for re-development. The draft Local Plan proposals broadly seek to enhance the value of existing parks, open/green spaces by securing their protection, improving their quality and public access to them. The plan also makes provision for new open/green space. For instance, on larger site allocations in the central area, the draft Local Plan includes requirements for the provision of new publicly accessible open space and for river restoration.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision? The 'Hither Green West' campaign group are disappointed at the failure to recognise the essential role Hither Green Lane plays in providing a range of shops and services that meet the day to day needs of Hither Green residents, including places to meet and socialise nearby. It easily meets all the criteria for 'local centre' designation. Given this, and the higher social deprivation in Hither Green West compared to neighbouring areas (including the East side of the railway line), a 'local centre' designation for Hither Green Lane would help create a thriving local economy here that tackles inequalities and helps secure its long term viability. In addition, whilst all</p>	173	<p>The draft Local Plan includes policy proposals for the area to the West of Hither Green station, including site allocations. In response to Regulation 18 stage public consultation feedback, it is acknowledged that additional information on the strategic priorities for this area should be included in the plan.</p> <p>In response to Regulation 18 stage consultation feedback, officers have reviewed findings of the Local</p>	<p>Local Plan amended with additional details on the strategic priorities for the area west of Hither Green station.</p> <p>Local Plan amended to designate Hither Green Lane as a local centre, with amendments to the boundary of the centre.</p>

	<p>the retail units are currently occupied, designation would help to strengthen the Lane's vibrancy and assist diversification of the retail offer. The support and investment that comes with the 'local centre' designation would also help support nearby roads with significant commercial offers, such as Springbank Road.</p> <p>There are four parades of shops along Hither Green Lane's length - but specifically the section nearest the Coop supermarket consists of circa 27 ground floor retail units, including the Coop supermarket, several convenience stores, take-away food outlets, several barbers/hairdressers, a florists, a launderette, a dry cleaners, and two pharmacies (i.e more than Staplehurst Road, which has been proposed as a 'local centre').</p> <p>There are significant health, education, leisure facilities and park within 250m of the Lane, including Woodlands Health Centre and the two pharmacies; Brindishie Green School, Park and Bright Horizons nurseries; and it is very close to Mountsfield Park (a park four times the size of Manor House Gardens and the focus of Lewisham People's Day)</p> <p>It has several community facilities which act as an anchor including Drink At Bob's bar, St Swithun's Church and its church hall, and the Woodlands Health Centre, Brindishe Green school and the park. A couple of large new cafes/restaurants will be opening soon. Its accessible location near Hither Green Train Station, all of which help preserve footfall and bring in visitors.</p> <p>It is also closer to, and on the same side of the railway line (unlike Staplehurst Road local centre) to the proposed new housing developments on Nightingale Grove and the Driving Test Centre. - All this clearly demonstrated Hither Green Lane should be a 'local centre'</p> <p>Given the limited scope for new housing development in Hither Green West (and its location between two major centres), the Plan does not explain how Hither Green West will not be left behind. The Plan should be explicit in how Hither Green West will secure significant public realm in improvements after decades of under investment - for example, new or enhanced footpaths or cycleways; road improvements; new street crossings and other safety measures; cycle parking; heritage-sympathetic street lighting and street furniture; new landscaping, tree planting and other green infrastructure such as pocket parks and squares, play areas; and new way-finding signage etc.</p> <p>The Plan should also focus attention on Mountsfield Park - at 32 acres it is one of the largest parks in Lewisham but has few facilities This needs significant investment and new infrastructure to be provided (such as cafes, public toilets, benches, picnic tables, outdoor gyms, tennis courts and other sports facilities, landscaping etc) if it is to meet the needs of the planned growth in population. The plan should state clearly how new leisure, green spaces and play areas will be created in Hither Green West.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>The Plan notes the primarily residential nature of Hither Green, but is silent on how its residential and historic character can be reinforced, preserved, promoted and elevated into a truly "Healthy Neighbourhood". Hither Green West is the very definition of a "15 minute neighbourhood" but needs significant investment in public realm enhancements and infrastructure to realise this.</p>	<p>Centres Topic Paper (2020) with reference to Hither Green Lane. It is considered appropriate to extend the boundary of the parade north past Lanier Rd / St Swithuns Road, so that it includes St Swithun's Church to the east (and some additional retail units to the west). This will appropriately reflect the presence of a community anchor and provide for local centre status. The Council's Parks and Open Spaces Strategy 2020-2025 sets out further details on the priorities for investing and improving these spaces. This should be referred for further information.</p>	
--	--	--	--

		<p>The 'Hither Green West' campaign group would also like to see concrete proposals to transform Hither Green Lane into a truly 'healthy street' with public realm improvements that make walking, cycling and use of public transport safer and more convenient, and make it a more pleasant place to shop and socialise.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA1: Central Area place principles</p> <p>4. Please provide your comments on the topic(s) selected above. Maximise the potential of the railway station to the West of the railway, improve the arrival point to Hither Green West around the station, creating a new public plaza and enhancements to the public realm. Improve crossings to the Springbank Road station entrance.</p> <p>There are significant opportunities for more tree planting on roads and public spaces and to improve the public realm in Hither Green West,</p> <p>The car dominated South Circular bounds Hither Green West, detracting from the highly residential, characterful nature of the neighbourhood. There is an absence of sense of arrival into a residential area, especially at the entrances to Hither Green West from the South Circular, at Hither Green Lane, Torridon Road, Stainton Road and Laleham Road.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LCA	<p>1. Do you have any comments on the proposed vision? All of these new high rise properties around Lewisham make the area feel unwelcome and claustrophobic. These types of properties did not work in the 1960's and will not work now. It reeks of money making. No new schools or public service / health care facilities are being built - of course as they do not make money.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p>	1	<p>Noted. The London Plan makes clear that tall buildings will play a part addressing housing needs across London. It directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study, which has identified Lewisham as a location that is suitable for tall buildings.</p> <p>Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.

		<p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		policies include requirements for the provision of specific types of infrastructure.	
3	LCA	<p>1. Do you have any comments on the proposed vision? Hopefully, Davenport Road will become a place again and not a South Circular relief road, a rat-run and a public race track. Hopefully, Davenport Road will become a quiet residential road safe for children to walk home from school. Hopefully, pensioners will be able to get in and out of their cars without the ever-present danger of some wide-boy racer ripping the car door off. Whilst its nice to see that the little wiggly bit of George Lane as it runs past the top of Mountsfield Park is now off limits to HGVs, I suspect that these HGVs now use Springbank and Theodore Roads. Ad hoc solutions like this one just shunt traffic about. Please could the whole of Rushy Green Ward north of the South Circular and east of the A21, be designated as a residents only area, preventing through traffic. Local roads in this scheme would all become cul de sacs.</p> <p>2. Do you have any comments on the proposed key objectives? Place-based policies have to deal with through traffic, caused by Rat Running, and speeding. I've not seen a single speed camera on this road in 8 years. The current Speed Bumps are useless since drivers merely straddle them.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. See above</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Rat-Running in Davenport Road, and reckless speeding.</p>	4	Noted. The comments and suggestions set out in the representation concern specific traffic management measures, which are generally outside the scope of the Local Plan. The comments will be passed on to colleagues in the Council's Transport service for their consideration.	No change.
3	LCA	<p>1. Do you have any comments on the proposed vision? Services to support residents, both existing and future, need to be the priority. For example, where will key workers live? Will new schools and surgeries be built? Will there be increased social housing?</p> <p>2. Do you have any comments on the proposed key objectives? Will planning be open and transparent? For example, a major building proposal at The House on the Hill was given one notice on a lamp post and a three month time</p>	0	The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.	

		<p>limit for comments during Lockdown. Is this typical? No doubt planners and developers are rubbing their hands with glee.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LCA1: Central Area place principles LCA2: Lewisham major centre and surrounds LCA3: Catford major centre and surrounds LCA5: Central Lewisham Links LCA4: A21 Corridor</p> <p>4. Please provide your comments on the topic(s) selected above. Local services have suffered a lot recently. Why is consultation so rushed and minimal? Is there an assessment of local environmental impact? Any provision for social housing?</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. House on the Hill, Slathewaite Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. I oppose this development. 36 proposed residential blocks will strain local sewage and water services. Additionally, it's already hard to park in Limes Grove and Slaithwaite Road. With the new hotel opening soon, where will the new residents park? Increased traffic will also have a detrimental effect on the local environment. The existing property was supposed to be kept in public ownership and community use. Local services have suffered a lot recently. Why is consultation so rushed and minimal? Is there an assessment of local environmental impact? Any provision for social housing?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Community development and services must be priority.</p>		<p>The Local Plan consultation has been carried out in accordance with the Council's adopted Statement of Community Involvement (SCI). The procedures for commenting on planning applications is also set out in the SCI.</p> <p>An Integrated Impact Assessment has been carried out alongside the Local Plan, and used to inform it. The IIA includes considerations for Strategic Environmental Assessment and Sustainability Appraisal, in line with national planning legislation and policy.</p> <p>The draft Local Plan sets a strategic target for 50% of all new homes to be genuinely affordable housing, with affordability considered on the basis of local income levels. Further details are set out in the Local Plan Part 2 policies on Housing.</p> <p>We note your objection regarding the Site allocation on Slaithwaite Rd however this is a highly accessible site that is suitable for high-density development and could contribute to providing affordable homes for the borough.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision? I do not believe that the new high development will be more genuinely affordable to locals, built to higher environmental and conservation standards, and not be detrimental to existing greenery. The developments so far i central Lewisham have just been for the benefit of wealthy non residents from elsewhere including investors from abroad, why is it now that the new developments are proposed to be 50% genuinely affordable when this should have been the case all along and for years previously. Why has housing been allowed to be built with such poor standards of fire safety, insulation and energy saving in general when this should have been the case all along. You will need to prove to sceptical residents that this is not just another wheeze to increase building contractors profits while building smaller and smaller apartments that locals cannot afford to rent or buy.</p> <p>2. Do you have any comments on the proposed key objectives? A lot of lewisham does not feel green, the changes to roads have merely increased congestion and not reduced it. Further development will only increase congestion and decrease air quality.</p>	0	<p>Noted. The draft Local Plan sets a strategic target for 50% of all new homes to be genuinely affordable, with affordability measured on the basis of local income levels. This is a new policy approach which both recognises and responds to the situation where some types of housing products (i.e. intermediate products) may not be affordable to local residents.</p> <p>Whist the adopted and draft Local Plan set out targets and requirements for new affordable housing, national planning policy provides that proposals that do not meet these targets/requirements may be acceptable where the developer submits a viability assessment to justify the amount provided.</p> <p>The Local Plan includes a raft of new policies focussed on protecting and enhancing the network of open</p>	No change.

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA1: Central Area place principles</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. House on the Hill, Slaithwaite Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. I am concerned about a possible proposed development at the site 47 Slaithwaite Road, Lewisham, to build a 36 unit multi storey building. We already have a 6 storey hotel being built at the end of Morley/Slaithwaite Road, and this new development further risks destroying the character of the area. I am especially concerned about the loss of greenery that exists currently and the fact that a single storey building will be replaced by a multi storey one. There seems to be no consideration given to locals views when building these multi storey buildings in the Lewisham, though they are all unwelcomed by the locals. I would be grateful if you could desist from your proposed development.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>spaces and green infrastructure in the Borough. Further details are set out in Part 2 section on Green Infrastructure, as well as the area-based policies in Part 3.</p> <p>In terms of traffic congestion and air quality, the Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies. These policies will work in conjunction with the draft Local Plan policy on Air Quality.</p> <p>We note your objection regarding the Site allocation on Slaithwaite Rd however this is a highly accessible site that is suitable for high-density development and could contribute to providing affordable homes for the borough.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision? hi, i am not happy regarding the proposed 119 flats on bradgate road/aldi. it is far to many</p> <p>2. Do you have any comments on the proposed key objectives? to much housing and not enough input on existing infrastructure</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Land at Rushey Green / Bradgate Road</p> <p>6. Please provide your comments on the site allocation(s) selected above. this is a shocking suggestion 119 flat on this site. the road and area is busy as it is with just as aldi. the amount of drug users in the area to. WOW. I understand the need for housing but there is other sites that can be used. i strongly object to this!</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	0	<p>The site is in a highly accessible location and suitable for high-density redevelopment.</p> <p>However we recognise that there are sensitivities regarding adjacent residential properties and any proposals that come forward will have to demonstrate a suitable relationship and transition in scale. The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>	<p>Site allocation amended to reduce indicative capacities and to reflect the A21 development Framework.</p>

		N/A			
3	LCA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA1 Central Area place principles</p> <p>4. Please provide your comments on the topic(s) selected above. We feel the height of buildings in this area is too high in some instances - nuance needs to be considered in line with Local Plan principles e.g. where heritage/aesthetic should be safeguarded.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Church Grove Self-Build</p> <p>6. Please provide your comments on the site allocation(s) selected above. This is not a self build development, listing it as such is a misrepresentation and misleading. The development is misaligned with the local plan and its proposals; namely to sensitively intensify housing density whilst enhancing local character. The development does not respect nor enrich the heritage of the conservation area it immediately borders. The build has altered dramatically from what was originally proposed, reducing its positive environmental credentials and aesthetic impact. It is taller than that alluded to being permissible in QD4 of the Local Plan as the development is not of exceptional design and architecture, nor is it sensitive to the site's context, and it does not preserve or enhance the heritage setting. Effective consultation has not taken place with residents. Some objections have gone unanswered, others have not received adequate response to provide resolution. There are also outstanding concerns regarding safety of current and new residents.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	0	<p>Noted. The London Plan makes clear that tall buildings will play a part addressing housing needs across London. It directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study, which has identified parts of the Lewisham central area as locations that are suitable for tall buildings.</p> <p>Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The draft Local Plan site allocation for Church Grove reflects the principles established by the unimplemented planning consent reference DC/17/104264. The development was consented prior to the publication of the Local Plan: Main Issues and Preferred Approaches document. The Council considers that the proposal qualifies as a self-build/custom-build product in accordance with the definition set out in planning legislation.</p> <p>The procedures for public consultation on planning applications are set out in the Council's adopted Statement of Community Involvement. The SCI also provides details for contacting the Planning Service in situations where the public believe that procedures have not been followed.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
3	LCA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA2: Lewisham major centre and surrounds</p>	0	<p>Noted. The Council has consulted landowners during the preparation of the draft Local Plan. The landowners of the Lewisham Shopping Centre, which comprises the majority of land within the corresponding site allocation, have indicated that redevelopment of the site deliverable within the plan-period, and has undertaken early stage public consultation on the future of the centre. Whilst recognising there are other landholdings within the allocation area, it is not</p>	No change.

		<p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Lewisham shopping centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. The allocation for Lewisham Shopping Centre is too vague. It lacks vision and is ineffective and unsound. The red line includes a very extensive area, presumably in multiple ownerships. It is highly unlikely this area will be comprehensively redeveloped during the plan period as envisaged. There have been very few major redevelopments of this kind anywhere in the UK during the last 5 years and the proposed plan approach is harking back to the retail boom in the 1980/90s. Whilst the shopping centre is unattractive 1970 development it is still relatively successful and well occupied with good tenants. There is no commercial or customer benefit in redevelopment e.g. increasing space or value. Comprehensive redevelopment is clearly unviable. This site allocation should be sub-divided to focus on the areas that have a reasonable prospect of being redeveloped during the plan period. Three areas should be allocated rather than the entire areas as follows: 1. Lewisham House - which should be actively promoted for refurbishment and conversion to residential use. 2. block south of Primark/Lewisham Model Market/No 192-212 Lewisham - this block should be redeveloped for food/beverage/leisure/entertainment uses at ground floor with residential/and possibly office above. 3 Land north of Boots including the under-utilised/unattractive open space around Salsbury Yard adjacent to Lewisham Shopping Centre, which should be identified for mixed use redevelopment and public realm improvements, again with residential on upper floors</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>considered that these will preclude the delivery of the site allocation. A masterplan will be required to be accompanied with any future planning application, and this must appropriately address the situation of multiple land ownerships.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision? Vision clear and relevant</p> <p>2. Do you have any comments on the proposed key objectives? Key objectives only answering partially to the vision. Great initiatives around transportation and environment but concrete cultural initiatives lacking. Lewisham is more than a traffic hub. Why are there no initiative around culture? More needs to be done to promote, highlight and retain Lewisham cultural richness but also to keep the community active and encourage exchanges. Let's make Lewisham the best place to live in London. Also local heritage needs to be preserved and should feature in the key objectives.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA1: Central Area place principles LCA2: Lewisham major centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above.</p>	2	<p>Noted. The Local Plan is concerned principally with the development and use of land, and there is therefore limited scope for details on cultural initiatives. However the Local Plan does include provisions to ensure that new development and investment supports Lewisham's cultural heritage and related activities.</p> <p>The Local Plan broadly seeks to respond to and build on Lewisham's cultural diversity and local distinctiveness. This is set out in the objectives for the draft Local Plan, set out in Part 1 and reflected elsewhere in the plan. The vision for the Central Area makes reference to Lewisham centre being a focus of cultural activity. However it is acknowledged that this could also be emphasised in the key spatial objectives.</p> <p>The site allocation for the Lewisham shopping centre site provide for the retention and enhancement of the</p>	<p>Local Plan central area key spatial objectives amended to more strongly reflect importance of cultural activity in Lewisham town centre.</p>

		<p>Create a walking area in central Lewisham and make it more convivial with outdoors terraces, flowers, trees</p> <p>Food market needs to be refurbished or relocated for more space making sure it remains Lewisham market (Afro, Caribbean, Turkish,... food stalls) and as a consequence differentiate itself from other London markets</p> <p>London 1st international food centre could be created</p> <p>A new cultural centre could be opened with public speaking events, live gigs, art fairs, spaces for music/craft/dancing/cooking classes etc... to bring people together and make the most of the existing diversity</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below.</p> <p>Ladywell Play Tower</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>Such a beautiful building that definitely needs to be kept. Please no residential. It could become Lewisham cultural hub with public speaking events, live gigs, art fairs, spaces for music/craft/dancing/cooking classes etc... to bring people together and make the most of the existing diversity</p> <p>Could be a great space for outdoor local festivals celebrating Lewisham council community as well.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Brandram road almhouses park would be great for outdoor local festivals celebrating Lewisham council community.</p>		<p>existing market as a central feature of the area. It also provides flexibility for a wide range of community and cultural uses to be incorporated into any future redevelopment.</p> <p>The site allocation proposals for Ladywell Play Tower provide for main town centre, community and residential uses. The allocation is considered necessary to enable the restoration of the building and to bring it back into viable use.</p> <p>Outdoor festivals are covered separately by licencing arrangements. The suggestions for future event sites will be passed along to colleagues within the Council's Housing, Regeneration & Public Realm Directorate.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision?</p> <p>You need to consider safety for women at night</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>You need to do more to enable women to feel safe at night particularly near the stations of Catford and Catford Bridge</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LCA3: Catford major centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above.</p> <p>More needs to be done to improve the experience of people walking to and from the Catford stations</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below.</p> <p>Railway Bridge Catford</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>I do not feel safe walking home from Catford Bridge station along to A205 to Forest Hill at night. The lighting under the Bridge is poor.</p>	3	<p>Noted. At its meeting on 16th September 2020 Mayor & Cabinet agreed the transfer of S106 funding originally proposed for the delivery of a footbridge between Doggett Road and the Barratt's development on the former Catford Greyhound Stadium site to be used to deliver a programme of public realm and accessibility improvements to Catford Station areas. This includes looking at options to provide step free access at Catford Station. See M&C report for further details.</p> <p>The draft Local Plan broadly seeks to enable the delivery of transformational public realm enhancements within and around Catford Town Centre, including improvements between the centre and the station.</p>	Local Plan Part 2 policy on inclusive and safe design amended to include additional information on safety for women.

		<p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LCA	<p>1. Do you have any comments on the proposed vision? The proposed vision is laudible, however given the scale and the current budget and resource constraints within the council if half of what is envisioned is delivered I would be surprised.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below Hither Green LCA2: Lewisham major centre and surrounds LCA3: Catford major centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above. Apart from re-hashing the same plans for Hither Green station approach area and the Driving Test Centre that have been around for a very long time already (c2006). There is nothing related to investment and regeneration of Hither Green Lane, Springbank or other local streets. We have had little to no investment in Hither Green. Our pavements are completely shocking, we suffer from significant pollution due to through traffic going to and coming from the South Circular. For the pedestrian crossings that we do have, they are dangerous. Speeding continues to be an issue. Crime is at unacceptable levels... Hither Green has been overlooked for any meaningful interventions by the council time and again and this "Local Plan" is no different and re-enforces this narrative that the council continually neglect us.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Driving Test Centre, Nightingale Grove Nightingale Grove and Maythorne Cottages</p> <p>6. Please provide your comments on the site allocation(s) selected above. These plans have been around since 2006 at least but yet very little has been done... What steps will the council take to move this ahead in a reasonable timeframe going forward rather than waiting another 15 years....</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? This is far from a "local plan" for Hither Green and delivers very little in the way of improvements for this area. I would urge the council to think again and actually do something for Hither Green rather than words.</p>	3	<p>The Local Plan is required to meet the Tests of Soundness set out in the National Planning Policy Framework, including that it is effective (deliverable over the plan period). The Council has been engaging with landowners and developers to ensure the site allocations and other key proposals are deliverable. The Local Plan will not be delivered solely by the Council, but through a multi-stakeholder approach, including government bodies, landowners, developers, businesses and local communities. Part 4 of the Local Plan sets out further details on delivery.</p> <p>The draft Local Plan includes policy proposals for the area to the West of Hither Green station, including site allocations. In response to Regulation 18 stage public consultation feedback, it is acknowledged that additional information on the strategic priorities for this area should be included in the plan.</p> <p>In response to Regulation 18 stage consultation feedback, officers have reviewed findings of the Local Centres Topic Paper (2020) with reference to Hither Green Lane. It is considered appropriate to extend the boundary of the parade north past Lanier Rd / St Swithuns Road, so that it includes St Swithun's Church to the east (and some additional retail units to the west). This will appropriately reflect the presence of a community anchor and provide for local centre status.</p> <p>There are site allocations for the Driving Test Centre and Nightingale Grove in the adopted Site Allocations Local Plan. These are being absorbed into the new Local Plan, as they are considered to be sites suitable for redevelopment and which can support the spatial strategy. Ultimately, it is up to landowners to bring forward development on sites.</p>	<p>Local Plan amended with additional details on the strategic priorities for the area west of Hither Green station.</p> <p>Local Plan amended to designate Hither Green Lane as a local centre, with amendments to the boundary of the centre.</p>
3	LCA	<p>1. Do you have any comments on the proposed vision? 1. The whole 'Plan' appears predicated on a 19.7% increase in population, without considering the infrastructure implications ie a 19.7% increase in demand for schools, hospitals, open spaces etc. Thus it has no value.</p>	0	<p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the</p>	<p>No change.</p>

		<p>2, "Re-routing the South Circular, A205."The question is what part of the South Circular and to where?" Until this question resolved, nothing else can be determined. At best, all the remainder of the objectives are pious thoughts. The A205 is the one road around the South of London and which passes directly through the heart of Lewisham Central which is outside the immediately coming ULEZ. Thus this road is going to become even more crowded within 1 year.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p> <p>The re-routing of the South Circular is necessary to enable the comprehensive regeneration of Catford Town Centre. The re-routing would involve a small section of the A205, around Catford Bridge and Rushey Green, to be set back to enable significant public realm improvements. The Catford Town Centre Framework should be referred for further information.</p> <p>The Council has and will continue to lobby the London Mayor and Transport for London to extend the ULEZ beyond the South Circular. However the current extent of the ULEZ is not considered to preclude the implementation of the Local Plan policies concerning the A205 and its transformation using the Healthy Streets Approach.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision? Just noticed the size of the car park at Lawrence House! How embarrassing for the council... or likely they do not see it this way given the fact that Lewisham council seem totally unconcerned about how far behind other boroughs they fall regarding provisions for pedestrians, cyclists and those relying solely on public transport in outer areas of the borough. I hope car parking spaces are not given free or discounted to people working in Lawrence house (other than the disabled etc). The area around Lawrence House is so well served by public transport - buses, trains, DLR, and so I cannot possibly see what the need is for this car park. Set an example and close the council office car park. Other people do not have the luxury of a car park, a car, or the good public transport as you've got in that part of the borough. Why not build some social housing on that land, kill two birds with one stone?</p> <p>2. Do you have any comments on the proposed key objectives? Is the car park near Lawrence House marked for redevelopment - it should be</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below.</p>	3	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Laurence House and the car park are included as a site allocation in the draft Local Plan. The site allocation is for mixed-use redevelopment, including residential uses. Any future development proposal will need to comply with the London Plan parking standards, and also taking into account the high levels of public transport access in the area. Rationalisation of the existing car park will need to be considered through the design-led approach.</p>	No change.

		<p>None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LCA	<p>1. Do you have any comments on the proposed vision? I hope the council does not dismiss concerns regarding the proposed high density housing. Yes, we need to include provisions for many people in need of housing, but I do not believe the proposed high rises is the right way. There would be plenty of 1/2 bed flats. Too few houses, spaces with gardens. Don't we want to encourage families, not just young professionals? Shouldn't families in need be offered appropriate accommodation for their needs? In addition, there are simply too many floors in the proposed high rises. There was great opposition to the 21 floor block of flats in the new development by Catford bridge. Is this 'Friendly' marketing aimed at glossing over residents genuine and rightful concerns?</p> <p>2. Do you have any comments on the proposed key objectives? You are overestimating what can be achieved with high density housing and underestimating it's detrimental effects on the community. There needs to be more houses planned and lower rise blocks of flats.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	1	<p>Noted.</p> <p>The Local Plan has been informed by a Strategic Housing Market Assessment (SHMA) which indicates a need for additional family sized homes in Lewisham. In response to this, the draft Local Plan includes provisions to secure a wide range of housing types. This includes, for example, policies on housing size mix and residential conversions (to protect family units). However, it is acknowledged that the plan could benefit from additional provisions around family housing.</p> <p>The draft Local Plan provides that all new housing development must meet the London Plan standards for internal and outdoor amenity space, as well as play space.</p> <p>In order to meet identified local needs for new housing, workspace and jobs, commercial floorspace, community facilities and supporting infrastructure the draft Local Plan aims to facilitate a carefully managed sensitive intensification of the Borough. This includes building to higher densities in appropriate locations, including major town centres and areas that benefit from good access to public transport, such as Catford and Lewisham.</p> <p>The London Plan makes clear that tall buildings will play a part addressing housing needs across London. It directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study, which has identified areas in the Borough that may be suitable for tall buildings, and this includes parts of the 'central area'.</p> <p>Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	<p>Local Plan amended to include a target housing size mix for affordable housing.</p> <p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>
3	LCA	<p>1. Do you have any comments on the proposed vision?</p>	3	<p>Noted. The draft Local Plan acknowledges the issue of poor air quality in the Borough and particularly around the South Circular. To help address this, the plan</p>	<p>No change.</p>

		<p>The south circular traffic and pollution problem needs sorting and improving. Concern about losing the character of the area and becoming Elephant Castle type of very high unaffordable residential blocks</p> <p>2. Do you have any comments on the proposed key objectives? Preserving and improving Green spaces should be a priority. Keeping housing affordable for the BAME community so that we can keep the rich diversity and artist culture that make our Borough so vibrant</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>proposals seek to facilitate the transformation of the South Circular using the Healthy Street Approach, set out in the London Plan. This includes policies which will allow for the re-routing of the South Circular at Catford to deliver transformational public realm improvements and enable the comprehensive regeneration of the town centre.</p> <p>The draft Local Plan broadly sets out protect and enhance the Borough’s network of open and green spaces, whilst delivering biodiversity net gain. Further details are set out in Part 2 on Green Infrastructure and in the Part 3 sub-area section. Specific requirements for the provision of new publicly accessible open space are included in the site allocation policies.</p> <p>The draft Local Plan also acknowledges and responds to the issue of housing affordability. It sets a strategic target of 50% of all new homes to be genuinely affordable, and for affordability to be a measure linked to local income levels.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision? I think it would be great to see Catford get some love. But you've got to act quickly! There seems to be so much talking, and very little doing. You're never going to please everyone. Obviously dont ***** people who already live here, no one wants that.</p> <p>But I want to see some decent pubs and restaurants! Get the Catford Constitutional up and running again! Get that bar by the theatre going again! Tell the Ninth Life they should sort out their disgusting interior choices.</p> <p>I want to see more support for the artists studios in the area. The digital creative industries in London are about the only growing industries at the moment. People that work in them have the money to support the new businesses in the area. Why not support them more? Less red tape around the use of the old town hall. Just look at how The Bussey Building etc has transformed Peckham.</p> <p>The top floor of the Old Town Hall is fully decked out and hasnt been used in about a year and a half. Whats the hold up? It's also effecting the internet use on the floor below where I do my business, making me reluctant to return from working from home.</p> <p>2. Do you have any comments on the proposed key objectives? Get moving</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p>	1	<p>Noted. The draft Local Plan broadly seeks to promote and enable the regeneration and revitalisation of Catford major centre to support its long-term vitality and viability. This is reflected in the spatial strategy for the Central area, the place policies and site allocations.</p> <p>The Council has prepared the Catford Town Centre Framework which has both informed the preparation of the Local Plan and help to support its delivery. The Framework reflects the Council’s objectives to deliver new and improved workspace within the centre, including to support the creative, digital and cultural industries.</p> <p>The Council has secured £1.65m from the London Mayor’s Good Growth Fund to sensitively restore the former Catford Constitutional Club.</p>	No change.

		<p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. 3	LCA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA3: Catford major centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above. My only real concern is the height of many of the proposed residential blocks. I feel in order to maintain the character of the area that high rise blocks should be limited to the height of current surrounding buildings. Excessively high buildings do nothing to create positive community spaces. The developments around Lewisham DLR are soulless and I'd hate to see Catford centre and surrounding area become the same.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	6	<p>Noted. The London Plan makes clear that tall buildings will play a part addressing housing needs across London. It directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study, which has identified Catford as a location that is suitable for tall buildings.</p> <p>Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
3	LCA	<p>1. Do you have any comments on the proposed vision? It's important for the area to develop and improve, but a balance must be struck to acknowledge and be sensitive to residents properties already in these areas.</p> <p>2. Do you have any comments on the proposed key objectives? No</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p>	1	<p>Noted. The draft site allocation for the Driving Test Centre includes a development requirement specifying that proposals must protect and seek to enhance green infrastructure, including existing mature trees. The development guidelines also set out the proposals must respond positively to residential properties surrounding the site. However, provisions for tree maintenance are outside the scope of the Local Plan.</p>	No change.

		<p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Driving test centre, Nightingale Grove</p> <p>6. Please provide your comments on the site allocation(s) selected above. Our development backs directly onto the driving test centre, the trees which separate the land here ensure privacy but also allow a great range of wildlife. Guarantees for the continued maintaining of these trees would need to be made as this would also effect sightlines into people's homes who are already resident here. As a homeowner this would also have a negative effect on values.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? There would need to be greater understanding of noise impact and the proximity to current homes which all back onto the driving test centre.</p>		Both the adopted and draft Local Plan include policies dealing with amenity. Any future development proposal would need to demonstrate that amenity impacts, including noise, have been appropriately considered and avoided/mitigated.	
3	LCA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		government bodies, landowners, developers, businesses and local communities. Part 4 of the Local Plan sets out further details on delivery.	
3	LCA	<p>1. Do you have any comments on the proposed vision? The plan is illegible. The key on the plan does not align with the description. At least I hope it doesn't otherwise Lewisham Council is routing new A21 major traffic routes through Hither Green.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Driving Test Centre, Nightingale Grove</p> <p>6. Please provide your comments on the site allocation(s) selected above. There should not be a driving test centre here. It promotes driving and they drive round Hither Green West of the tracks, practicing, idling and creating pollution.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	5	The site allocation proposals for the Driving Test Centre would allow for alternative uses to be delivered through the site's redevelopment.	No change.
3	LCA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p>	3	Support noted. The draft Local Plan includes policies addressing amenity which will need to be considered together with those on the evening and night-time economy. The night-time economy policy includes a cross-reference to the amenity policy.	No change.

		<p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Lewisham Shopping Centre Lewisham Gateway Molesworth Street Car Park</p> <p>6. Please provide your comments on the site allocation(s) selected above. Broadly supportive of all proposals but have concerns on the implications of a nighttime economy on the residential streets surrounding Clarendon Rise car park. The fruit and veg markets should absolutely remain as long as it is self contained and uses purpose built spaces and facilities. The practice of using storage facilities, and the related delivery via commercial vehicles/forklifts, in residential areas (some quite a distance from the actual market) should be halted.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Believe this area lacks green spaces and what green spaces do existing are very fragmented. This should be considered in the building of any new developments.</p>		<p>The draft Local Plan and site allocations make clear that any future development proposals in Lewisham town centre must protect and seek to enhance the market. The Local Plan proposals seek to ensure that appropriate provision for the function of the market is made through the development design and masterplan process. This should help to alleviate the need for space on neighbouring residential streets.</p> <p>The need for new and improved green/open spaces, including links between them, is reflected in the area spatial objectives and policies. The draft Local Plan site allocations sets out specific requirements in this regard, including the new Lewisham Links policy. One of the key objectives set out is to secure enhancements to the River Corridors, particularly the Ravensbourne.</p>	
3	LCA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LCA2: Lewisham major centre and surrounds LCA1: Central Area place principles LCA5: Central Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above. Couldn't agree more with improving the permeability of Lewisham high street and environs to pedestrians and cyclists. Same goes for the route between Lewisham town centre and train station. Lewisham high street should be pedestrianised with road space give over to improved street scaling/tree planting etc</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. Molesworth Street Car Park</p> <p>6. Please provide your comments on the site allocation(s) selected above. Concerned that potential development of multi story car park could push more vehicles to small car parks located in predominantly residential areas (e.g.</p>	6	<p>Noted. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Lewisham shopping centre is located within a highly accessible area with excellent access to public transport. The amount of parking provision in any future redevelopment will need to reflect this, having regard to the London Plan parking standards. A Transport Assessment and parking strategy will need to be submitted alongside a planning application. Overall, a reduction in the amount of existing car parking is expected.</p> <p>The Council may in the future consider the need for parking controls in surrounding residential areas.</p>	No change.

		<p>slaithwaite road and Clarendon rise) detracting on these areas. Car parking should be located next to main arterial routes not in amongst residential housing.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LCA	<p>1. Do you have any comments on the proposed vision? I see little mention in the proposal for the redevelopment of Hither Green, other than ' There is a poor sense of arrival to the immediate west of the train station with limited links across the railway. Opportunities exist for sensitive infill and high quality small sites development to 'reinforce' the existing local character'.</p> <p>2. Do you have any comments on the proposed key objectives? The proposed objectives make no mention of the urgent requirement for redevelopment of Hither Green as designated for Catford, Lewisham and surrounding areas, and reads as if Hither Green is non-existent</p> <p>There is no mention of redevelopment of Hither Green train station, which bears an uncanny resemblance to one in a third world country, with leaky roofs and stairs (God help you if you are disabled or have a suitcase!) leading to platforms that would test the stamina of Usain Bolt.</p> <p>It is 2021, we are 15-20 minutes by train to London Bridge - notice the difference between both stations!</p> <p>Transportation is woeful - we have the luxury of two buses going through Lewisham (181 and 225) which are usually packed by the time they get to Hither Green Lane, and the only other bus that serves the area is the 202 to Blackheath/Crystal Palace - the only destinations where taking two buses is not required.</p> <p>We do not have a post office, bank, department store (not even a Charity shop!). We have one large supermarket (Co-op), and a variety of other small stores.</p> <p>We deserve to be treated far better with regards to the infrastructure/facilities necessary to ensure a thriving community's prosperity. We should not have to travel to Catford or Lewisham for what we need or want, it should be right on our own doorstep.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. What's on offer for Hither Green</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	9	<p>The draft Local Plan includes policy proposals for the area to the West of Hither Green station, including site allocations. In response to Regulation 18 stage public consultation feedback, it is acknowledged that additional information on the strategic priorities for this area should be included in the plan.</p> <p>In response to Regulation 18 stage consultation feedback, officers have reviewed findings of the Local Centres Topic Paper (2020) with reference to Hither Green Lane. It is considered appropriate to extend the boundary of the parade north past Lanier Rd / St Swithuns Road, so that it includes St Swithun's Church to the east (and some additional retail units to the west). This will appropriately reflect the presence of a community anchor and provide for local centre status.</p> <p>The Council will continue to lobby and work with the Mayor of London / Transport for London, Network Rail and other stakeholders to deliver improvements in public transport infrastructure (such as station refurbishments) and bus services.</p>	<p>Local Plan amended with additional details on the strategic priorities for the area west of Hither Green station.</p> <p>Local Plan amended to designate Hither Green Lane as a local centre, with amendments to the boundary of the centre.</p>

		REGENERATION OF HITHER GREEN			
3	LCA	<p>1. Do you have any comments on the proposed vision? I don't understand what re-routing of the south circular entails.</p> <p>I do NOT support any plan that would ban dogs from rivers - Lewisham seems to be very anti-dog, and already the lake at Beckenham has an ugly fence all around to prevent dogs swimming - it is an OUTDOOR lake! Why is it OK to swim with ducks/water rats etc but not family dogs?? What if I want to take my kid AND my dog swimming?? Believe it not many families do want to do that. why not fence off a small amount of the far end and make that dog-friendly??</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below. None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	0	<p>The re-routing of the South Circular is necessary to enable the comprehensive regeneration of Catford Town Centre. The re-routing would involve a small section of the A205, around Catford Bridge and Rushey Green, to be set back to enable significant public realm improvements. The Catford Town Centre Framework should be referred for further information.</p> <p>The Local Plan does not propose policies concerning dog walking. Any such restrictions are dealt by separate legislation, which is outside the scope of the Local Plan.</p>	No change.
3	LCA	<p>1. Do you have any comments on the proposed vision? Lacks ambition. To be honest you have done a terrible job in recent years. For pedestrians walking down from the railway station to the shopping centre it's simply vile. There are too many cars and everything is done to make life as difficult as possible for pedestrians, especially the lack of crossings at places convenient for pedestrians. It's all on its head. Pedestrians should be the priority not cars. It's all so grey and horrible. It lacks trees and greenery. Lewisham Gateway is vile too. Monolithic, oppressive tower blocks all crammed together. To be honest I avoid Lewisham centre as much as possible.</p> <p>2. Do you have any comments on the proposed key objectives? You really need to focus on pedestrians and limit traffic through Lewisham. You really need to green up. Plant lots more trees and hedges. Put in a central reservation down Lewisham High Street and fill it with greenery. Put in more pedestrian crossings at sites convenient for pedestrians to give them more priority and slow down and discourage the traffic.</p> <p>I really don't see how you will achieve your objectives of making Lewisham a place to go to unless you improve the environment for pedestrians.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p>	13	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Local Plan supports and seeks to promote walking and cycling through the Healthy Streets Approach (see the Part 2 Transport policies for further details). The Part 3 policies for the Central Area support these borough-wide policies. They includes site allocation policies with specific development requirements and guidelines for public realm enhancements.</p>	No change.

3	LNA	<p>1. Do you have any comments on the proposed vision?</p> <p>Canal Approach</p> <p>I request that Lewisham Council prioritise reopening Canal Approach towpath, part of Deptford Parks Liveable Neighbourhood as a key strategic route for North Deptford.</p> <p>Play & School Routes</p> <p>Play does not feature as a priority North Deptford. Covid-19 has meant children in this high-density area have had little access to high quality play. Existing playgrounds are of low quality. The playground promised in 2014 alongside the £300k+ skatepark has not materialised. This should be delivered and other playgrounds across the area updates alongside safer streets and school routes. Prioritise a huge investment in playgrounds and safer streets for children.</p> <p>Polluting Industry</p> <p>Reduce the number of trucks coming to the area by changing the use class of industrial and waste processing sites like scrapyards and private waste processing. Support low pollution industries that create jobs for local people in healthy environments.</p> <p>SELCHP</p> <p>SELCHP is proposed as an integral part of the Local Plan. Waste incinerators are usually located in the most deprived neighbourhoods this is socially unjust. Furthermore, by 2035, incineration will be a more carbon-intensive process than even landfill. Remove SELCHP as a priority and shut it down so the borough can meet its climate emergency targets.</p> <p>New Riverside Park</p> <p>The population will grow dramatically due to 10k homes in the Evelyn Ward plus another 7k homes at Millwall and Canada Water. There is no plan to increase green space despite council documents stating the need to do so. Make delivering a new riverside park for Deptford on the protected wharf at Convoys Wharf a priority.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>Canal Approach</p>	2	<p>Canal Approach – The Local Plan identifies this as a key strategic route for North Deptford highlighted in fig 15.2 and underpinned by the North Lewisham Links policy. The Council have been working with local groups as part of the Liveable Neighbourhoods Project to progress the scheme. Due to the financial challenges that TFL find themselves as a result of COVID-19 the project is having to be scaled back in terms of the scope. The details of which are currently being discussed.</p> <p>Play & School Routes - The Local Plan is underpinned by the Council’s Parks and Open Spaces Strategy 2020-2025 which outlines the key priorities for improvements including many within the Deptford area. Lewisham Council has announced the revamp the play equipment in four popular Deptford parks. Evelyn Green, Sayes Court, Deptford Park and Folkestone Gardens will all benefit from refurbishments which are due to take place in the coming months.</p> <p>Polluting Industry – There are a number of areas in the north that are designated Strategic Industrial Land which are protected by the London Plan. It is therefore difficult for planning to limit the industrial uses on these sites however wherever possible we will try and ensure that these industries move away from heavy industrial uses such as scrapyards etc to more low pollution industries.</p> <p>SELCHP - The London Plan sets out the strategic approach to achieve net waste self-sufficiency (i.e. the equivalent of 100 per cent of London’s waste should be managed within London by 2026). It requires that the Council, through the Local Plan, identifies and safeguards waste sites/facilities in order to meet the</p>	No change.

		<p>I request that Lewisham Council prioritise reopening Canal Approach towpath, part of Deptford Parks Liveable Neighbourhood as a key strategic route for North Deptford.</p> <p>Play & School Routes</p> <p>Play does not feature as a priority North Deptford. Please provide your comments on the site allocation(s) selected above. I feel positive about the prospect of the Bakerloo line extension to New Cross Gate, but as a resident of Hatcham Park, I live in fear of you building residential properties on the site in a similar high-rise proposal to that of Sainsbury's recently. The station is a positive change, but increasing population-density in the area without facilities to support it would be unwise & have a negative impact on the current local neighbourhood</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? I feel positive about the prospect of the Bakerloo line extension to New Cross Gate, but as a resident of Hatcham Park, I live in fear of you building residential properties on the site in a similar high-rise proposal to that of Sainsbury's recently. The station is a positive change, but increasing population-density in the area without facilities to support it would be unwise & have a negative impact on the current local neighbourhood.</p>	<p>greater degree of clarity. Please refer to the Council website – planning policy for more details on Frameworks such as Catford Town Centre, New Cross Gate area Framework etc and SPDs such as the Small Sites SPD.</p> <p>The growth outlined within the Local Plan is not reliant on the delivery of the BLE but the Council strongly supports its delivery. There are other infrastructure improvements which shall be implemented to support growth and these are captured in the accompanying document the Infrastructure Delivery Plan.</p> <p>The indicative capacity for the Hatcham Works site is based on the New Cross Gate Area Framework. The Framework recognises that the site is in a highly accessible location within the district centre and is suitable for high-density redevelopment. We do however recognise that New Cross Gate has many heritage assets and any future proposals will have to respond positively to these.</p>		
3	LNA	<p>1. Do you have any comments on the proposed vision? I'm not sure I agree that the high street of New Cross is at the heart of community activity. It doesn't have a centre like Deptford and it would be good for the plan to recognise that and try to give it one!</p> <p>2. Do you have any comments on the proposed key objectives? Some of the objectives are too vague, for example what does turn the A2 into a healthy street mean in the context of a road which is a main artery into central London</p>	2	<p>The Local Plan is a strategic policy document and whilst it does not deal with concrete proposals is underpinned by a number of Frameworks and SPDs that provide a greater degree of clarity. Please refer to the New Cross Gate Area Framework for detail.</p> <p>We acknowledge that the A2 is a key arterial route and will continue to accommodate large volumes of traffic. However we still believe that improvements can be made to improve walking, cycling and public transport in line with TfL's healthy street guidance. This will not</p>	No change.

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LNA2: New Cross Road/ A2 corridor LNA3: Creative Enterprise Zones</p> <p>4. Please provide your comments on the topic(s) selected above. How about including a plan for a creative zone in new cross to give it a central area for the community to come together. Something like the new catford mews or Deptford yard within the kender triangle or Sainsbury's redevelopment would positively impact the area and make people feel differently about the A2.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Besson Street (Kender Triangle) New Cross Sainsburys redevelopment Former Hatcham Works, New Cross Rd Goodwood Rd and New Cross Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. Can we please do something other than try to shoehorn in as many tiny flats as possible into an already heavily built up area. And have some consideration for the neighbours. Building 12 storey blocks next to low rise housing is not acceptable. And why is the redevelopment at Sainsbury's new cross not mentioned when there are leaflets at the site talking about new plans in 2021 for 900 units?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Joined up cycle ways particularly around the new convoys wharf with a design/route that makes sense for the cyclist rather than the preference of the developer. For the Sainsbury's site how about some houses with gardens as affordable family homes and entertainment areas to bring in the adjoining neighbours. A cultural courtyard screened from the A2 and cafes with outdoor seating to create a nice vibe would be so beneficial; there are lots of good examples around London such as the redevelopment around kings cross or Deptford Foundry</p>		<p>impact on adjacent residential streets and any proposals will be tested thoroughly.</p> <p>Lewisham like all London boroughs is dealing with a housing crises and is required by the London Plan to accommodate 1,667 homes per annum across the plan period. We believe that locating these homes in our opportunity areas and town centres that have access to good public transport connections, local facilities and jobs is a sensible and sustainable approach. This approach also means that large areas of our suburban neighbourhoods and conservation areas can be conserved and enhanced.</p> <p>The Sites within New Cross and New Cross Gate are highly accessible and suitable for high-density housing.</p> <p>Cycleways – the Local Plan identifies key cycle routes throughout the borough underpinned by the Councils Cycle Strategy.</p>

This represents one of the most successful Local Plan consultations in London.</p>	<p>The Local Plan Site allocation has been amended to reflect the 450 gross figure.</p>

		<p>6. Please provide your comments on the site allocation(s) selected above. Residents were not told about this consultation- why is a consultation that is so important taking place during a lockdown? The ballot that took place in 2019 excluded many residents. The small independent businesses who are part of the Achilles demolition proposals were also denied a vote. The Landlord offer that residents voted on included misinformation around the amount of social rent homes- Lewisham claiming that the housing charity Shelter classed LAR as social rent - Lewisham were asked to make a correction and remove this claim from documents in the public domain by Shelter- to date Lewisham have not done this. At the time of the ballot in 2019 the landlord offer claimed there would 450 new homes- the breakdown of tenure was 11% Social rent (these exist already) 24% LAR, 50% Private and the rest a mix of shared ownership and other unaffordable tenures- meaning Lewisham Council are not building new homes for social rent the majority of new homes will be private. The Local plan shows 651 new homes an increase of 201 added since the ballot with no indication on tenure. When plans to demolish the Achilles street area were first revealed in 2016 it was 300 homes.</p> <p>The homes and small businesses Lewisham council want to demolish are all structurally sound but have undergone a deliberate managed decline by Lewisham. No other option other than demolition was presented to residents. Residents repeatedly asked Lewisham council to explore and present options of retrofit/refurbishment as a genuine choice for residents but these requests were repeatedly ignored. Retrofit/refurbishment has much less negative impacts for communities including social and environmental impacts and displacement. The plan as indicated in the local plan shows a massive densification of the area- at present in the Achilles St area there are approx.91 homes as the plans to demolish the Achilles St area include private freehold property on New Cross Rd plus the demolition of Dean House halls of residence (only built about 20 years ago with Deptford city challenge money) and the small businesses on New Cross Road</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision? This must be the 4th or 5th commonplace we have completed for North Deptford over as many years. None of the hundreds of comments residents have left on the previous commonplaces has been included in this proposal. Residents feel not listened to and that's why you won't have many comments on it. The consultation is closing today and you only have an handful of comments on here. Residents are being treated with contempt. What's the point of asking residents over and over if you're not listening to their answers?</p> <p>2. Do you have any comments on the proposed key objectives? What residents have been asking for over and over is a better area for walking and cycling with efficient infrastructures put in place to enable people to choose more active travel choices rather than driving. You keep talking about the 'industrial' heritage of the area and are failing to recognise that things have changed. This area is home to a lot of families and, as such, should have the infrastructure and money put in to make it a nice place to live. We need more parks and greenery. We need safe crossings and LTNs and we need for the area not to be treated as an afterthought and just someone to put more and more housing in.</p>	5	<p>The consultation was carried out in accordance with our Statement of Community Involvement. We had unprecedented levels of engagement with over 1,400 respondents and thousands of comments. This represents one of the most successful Local Plan consultations in London.</p> <p>Cycleways – the Local Plan identifies key cycle routes throughout the borough underpinned y the Councils Cycle Strategy.</p> <p>North area – The Local Plan contains specific policies for the area to the north including areas of change and investment. This includes improvements to open spaces, public transport and social infrastructure. The infrastructure to support growth is outlined in the supporting Infrastructure Delivery Plan.</p>	No change.

		<p>We are already providing the majority of the housing target for the whole of Lewisham and we're not seeing any improvements for it. Spend the money that developers have given you over the years on this area to make it more liveable. Go through the comments of the previous commonplaces and put a proper plan to serve the community.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. Not enough emphasis has been given in improving the north of the area. Evelyn is seeing the majority of the developments being built on it and none of the money spent to improve residents' lives. We need more parks, playgrounds, safe cycling and walking routes. We need you to stop looking at this area as the 'industrial' hub of Lewisham. That's in the past. We shouldn't have scrapyards and incinerators here. No other council would have such low regard to an area so close to central London. To invest in this area properly could be such a game changer for Lewisham but the plan lacks ambition on all levels.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. Why are parks not mentioned at all in the above? This should be number one priority together with safer walking and cycling routes. Slow down/ reduce the traffic and give people back their freedom to make healthier and more active travel choices. You're completely missing the point of this in your plan.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? More green links, more greenery, parks and playgrounds for our kids. Safer roads for walking and cycling. This plan lacks ambition on all levels.</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision? Way too much development in the New Cross area. Scant/ no detail on practically what is being done to improve cycling provision. No detail on supporting infrastructure - ie schooling, transport, dr surgeries all of which are currently over crowded</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LNA2: New Cross / A2 corridor</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p>	3	<p>Cycleways – the Local Plan identifies key cycle routes throughout the borough underpinned y the Councils Cycle Strategy.</p> <p>The Local Plan contains specific policies for the area to the north including areas of change and investment. This includes improvements to open spaces, public transport and social infrastructure. The infrastructure to support growth is outlined in the supporting Infrastructure Delivery Plan.</p> <p>Lewisham like all London boroughs is dealing with a housing crises and is required by the London Plan to accommodate 1,667 homes per annum across the plan period. We believe that locating these homes in our opportunity areas and town centres that have access to good public transport connections, local facilities and jobs is a sensible and sustainable approach. This</p>	No change.

		<p>Besson Street (Kender Triangle) Goodwood Rd and New Cross Rd Former Hatcham Works, New Cross Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. It is outrageous that you are proposing an additional 1300 units within the space of 1km in New cross thru development of kender, goodwood and hatcham goodsyard sites. There is no appreciation of the cumulative impact such dense development will have in a deprived area where there is a shortage of school places, nursery places, dr surgeries and over crowded public transport. Further- no specifics on improvement in cycling provision in the area or how this links to cycling networks to get anywhere. Assuming only 25% of these units will own one car that amounts to 250 additional vehicles- where will they go given no parking provision for any of these developments?</p> <p>The height and scale of these developments are utterly out of keeping with hatcham and telegraph hill conservation areas. There are already issues with traffic in the area which will only get worse with further over development.</p> <p>Further- previous applications for these sites have been unclear how bakerloo redevelopment will be managed with hatcham goods yard site redevelopment. It would be a disaster is we end in with high rise</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Details and specifics on how improvement on schooling, nursery provision and health care - why is there no detail on this? You say it is a climate emergency yet on cycling- no specifics on how you will address this on A2 / queens road. This is j. Your gift to do today and fact nothing has been done suggests again this is hot air from the council but no concrete action. Current parks int the area have become crowded- yet no specifics / admission that further large scale development will put further pressure on these limited resources.</p>		<p>approach also means that large areas of our suburban neighbourhoods and conservation areas can be conserved and enhanced.</p> <p>The Sites within New Cross and New Cross Gate are highly accessible and suitable for high-density housing.</p> <p>All of these sites will be car-free in accordance with the London Plan parking requirements.</p>	
3	LNA	<p>1. Do you have any comments on the proposed vision? Too much housing for investment no green space left</p> <p>2. Do you have any comments on the proposed key objectives? yes ..too greedy</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Albany Theatre</p> <p>6. Please provide your comments on the site allocation(s) selected above. The only really working class rooted cultural established centre and you want to redevelop t and half the garden.</p>	2	<p>Lewisham like all London boroughs is dealing with a housing crises and is required by the London Plan to accommodate 1,667 homes per annum across the plan period. We believe that locating these homes in our opportunity areas and town centres that have access to good public transport connections, local facilities and jobs is a sensible and sustainable approach. This approach also means that large areas of our suburban neighbourhoods and conservation areas can be conserved and enhanced.</p> <p>The site allocation makes clear that the theatre has to be reprovided as part of any proposal coming forward. These plans are necessary to secure the long term future of the theatre.</p>	No change.

		<p>you have no sense of community in suggesting this .</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision? Proposed development of sainsburys site and good wood site in new cross bring way too many units into a deprived area where the infrastructure is already stretched.</p> <p>2. Do you have any comments on the proposed key objectives? This is way too much density in an already congested and deprived area. It would tower over lower density housing in hatcham conservation area and telegraph hill</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LNA1: North Area place principles LNA2: New Cross Road/ A2 corridor</p> <p>4. Please provide your comments on the topic(s) selected above. Where are the gp surgery places? What about schooling and nurseries? No capacity on trains or overground at peak times. Cumulative impact of these plus other developments is too much</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Former Hatcham Works, New Cross Rd Goodwood Rd and New Cross Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. This is way too much density in an already congested and deprived area. It would tower over lower density housing in hatcham conservation area and telegraph hill</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Where are the gp surgery places? What about schooling and nurseries? No capacity on trains or overground at peak times. Cumulative impact of these plus other developments is too much</p>	2	<p>Lewisham like all London boroughs is dealing with a housing crises and is required by the London Plan to accommodate 1,667 homes per annum across the plan period. 3	LNA	<p>1. Do you have any comments on the proposed vision? You have destroyed a lot of the heritage and history of the area with the displacement of local communities, so I am not sure what it is you hope to retain.</p> <p>2. Do you have any comments on the proposed key objectives? The Albany should remain as a theatre, centre for local amenity and services. I am tired of seeing plans for high rise, mass density blocks. Tearing down Georgian and Victorian housing was the starting pint for many of Deptford's current problems. It is hard to believe when you see it now that it was like Greenwich at one point! Houses are needed not high rises.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p>	2	<p>Lewisham has many heritage assets including 29 conservations areas and hundreds of statutory listed and locally listed buildings and structures. The Local Plan contains strong policies on conserving and enhancing these heritage assets.</p> <p>The site allocation for the Albany Theatre makes clear that the theatre has to be reprovided as part of any proposal coming forward. These plans are necessary to secure the long term future of the theatre.</p>	

		<p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision? New Cross Gate Station crossing really dangerous..traffic always overlapping onto the crossing, and interrupting bus lanes, cyclists ignoring redlights etc.. Too much building packed into Deptford area. New York on sea..if you can afford it. Hope all the units will be occupied and not left empty. Heavy taxes might help.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LNA2: New Cross Road/ A2</p> <p>4. Please provide your comments on the topic(s) selected above. I left New Cross Station yesterday wanting t go towards News Cross Gate. Crossing the main road is impossible and their should be traffic lights with a pedestrian crossing. Otherwise you have to walk up past New Cross Inn and cross opposite Goldsmiths . This isn't possible for everybody and especially with luggage shopping etc..</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Improving the junction and removing the one way system will really slow down the traffic and there are a lot of heavy lorries using that route down to wards Deptford.especially on a Thursday for some reason</p>	1	<p>Lewisham like all London boroughs is dealing with a housing crises and is required by the London Plan to accommodate 1,667 homes per annum across the plan period. We believe that locating these homes in our opportunity areas and town centres that have access to good public transport connections, local facilities and jobs is a sensible and sustainable approach. This approach also means that large areas of our suburban neighbourhoods and conservation areas can be conserved and enhanced.</p> <p>The Sites within New Cross and New Cross Gate are highly accessible and suitable for high-density housing.</p> <p>Lewisham does not have an issue with empty homes and the houses that have been or are being built in Lewisham house existing and new residents.</p> <p>The Local Plan recognises that improvements to the A2 are required. This road is a 'red route' and in the ownership and control of TFL. Nevertheless we will continue to work proactively to bring about change and improve walking, cycling and public transport along the route.</p>	No change.
3	LNA	<p>1. Do you have any comments on the proposed vision? Yes. I have elaborate on them below.</p> <p>2. Do you have any comments on the proposed key objectives? There needs to be more in terms of green spaces and public realm strategy.</p>	5	<p>The Local Plan is underpinned by the Parks and Open Space Strategy. This is available on the Council website.</p> <p>We recognise the need to improve and maintain existing open spaces and the Local Plan sets out clear policy to achieve this.</p>	Site allocation LNA 12 – Albany Theatre amended to make reference to the community gardens, Neighbourhood Open Space and the need to protect public realm.

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LNA1: North Area place principles Green Spaces</p> <p>4. Please provide your comments on the topic(s) selected above. Further direction ambition to be set out for the public realm improvement is needed. Green spaces and their maintenance are very important. These spaces are the future of our cities in the 'new post covid world. Gardens, Parks and spaces for relaxation for the adults are needed. New play areas now exist across the area and more needs to done for the children.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Albany Theatre</p> <p>6. Please provide your comments on the site allocation(s) selected above. Much is spoken about the cultural values in the Deptford. The reality is, The Albany is the only space that 'the average joe' could visit as a member of general public for arts. Laban Centre and Goldsmith are educational spaces performing teaching activities. The Albany needs to be handled with care and dignity rather than the heavy handed greedy approach currently taken by proposing to covert the space into a 120 flats with some semblance of a theatre. This approach is a travesty to the institution of arts, and an approach that wouldn't be taken anywhere else in the world. The theatre is boon for the area and should be developed into a cultural spot that becomes the pride of Deptford and indeed Lewisham. The open space that currently exists behind The Albany should be cherished and protected, its a local secret and a much-needed green area. By developing The Albany as a cultural hub, the market nearby is assured to be protected as a footfall from across London would be encouraged to visit the area.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Public Realm is rightly identified as an important part of the development. But a wholistic approach needs to be taken for the entire of New Cross, Deptford and North Deptford. The area currently reads disconnected and haphazard. Public Realm cannot be little tokens donated by the developers of the land, rather areas that inspire pride to the area. This can only be achieved with more incisive direction from the council. This is the approach taken at RBKC, Islington, Hackney and City of London, these London boroughs have shown that with greater direction from the council, better a public realm and green space can be achieved with developers held to account to deliver spaces of high standard. Maintenance of these spaces are equally as important.</p>		<p>The site allocation makes clear that the theatre has to be reprovided as part of any proposal coming forward. These plans are necessary to secure the long term future of the theatre.</p>	
3	LNA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p>	4	<p>The Local Plan is a strategic policy document and does not present specific proposals for individual sites. Any future proposal site allocations will be assessed against these policies and will be subject to public consultation as part of the development management process.</p>	<p>Site allocation LNA 12 – Albany Theatre amended to make reference to the community gardens, Neighbourhood Open Space and the need to protect public realm.</p>

		<p>LNA5: North lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Albany Theatre</p> <p>6. Please provide your comments on the site allocation(s) selected above. With specific reference to the redevelopment of the Albany Theatre - where is the vision? Where is the consultation? Who honestly thinks building flats on top of the theatre and taking up half the garden to build yet more flats is really what the community has asked for, wants or needs? Have any of the current tenants/local people been consulted? Is there no imagination to consider the effect of the pandemic and how this might free up office and retail sites that will no longer serve their original purpose and could be converted into housing? Where is the environmental advice to remove one of very few green spaces left in Deptford?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision? Lacks any detail around residential streets. Would like to see more emphasis on greening residential streets/areas. Would also like to see the replacement of the existing ugly street lights with more appropriate Victorian period style lights as they have done in Greenwich and in the richer parts of the borough.</p> <p>2. Do you have any comments on the proposed key objectives? Most are too vague and unmeasurable. Objectives need timescales and measurable milestones which are independently assessed to ensure delivery.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LNA1: North Area place principles</p> <p>4. Please provide your comments on the topic(s) selected above. Needs to be greater emphasis on improving the state of Victorian housing. Maybe schemes to encourage home owners/landlords to improve the frontages of their properties. How about a scheme to link Lewisham college apprentices to local street by street housing improvements. Residents could get their homes painted/renovated; apprentices could gain experience and the whole area could be improved, boosting local pride. May also reduce crime.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Convoys Wharf MEL Timber Yard / Deptford Wharves MEL Neptune Wharf MEL</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	2	<p>The Local Plan is a strategic policy document which sets out future growth and investment within the borough.</p> <p>Timberyard – Development stopped during COVID but will recommence shortly</p> <p>Convoys Wharf – the first sites have approved reserved matters and are being constructed now.</p> <p>Neptune Wharf – Construction has started.</p>	Greater detailed introduced on retrofitting existing homes.

		<p>What is the timescale for completing these schemes? Timber yard seems to have stopped, Neptune wharf and Convoys wharf have not even started. Council needs to intervene and either force completion of take away the planning consents.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>Hatcham Works Site</p> <p>4. Please provide your comments on the topic(s) selected above.</p> <p>This area is a peaceful haven and I would like it to stay as it is. The Sainsburys carpark will be the only one for miles to a large popular supermarket with convenient bus depot .The locals have an area with mature trees and some open space to breathe . Everywhere else is being lined with high rise dense concrete.This makes this space increasingly valuable.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>	0	<p>The London Plan directs Local Authorities to allocate surface carparks and single storey retail sheds for redevelopment and to make best use of this land.</p> <p>The indicative capacity for the former Hatcham Works site was informed by the endorsed New Cross Gate Area Framework.</p> <p>The site is a highly accessible site and suitable for high-density development.</p>	No change.
3	LNA	<p>1. Do you have any comments on the proposed vision?</p> <p>Overdevelopment in New Cross area/ Besson street triangle and in the borough as a whole. Much based on the assumption that people will continue to find dense London living attractive/ affordable especially with green spaces being squeezed out. The second assumption is that the Bakerloo line extension will .go ahead.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>Lewisham is a great place to live with much historic structure and buildings having attracted people. Change this too much and the nature and spirit of the borough will change.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LNA2: New Cross Road/ A2 corridor</p> <p>4. Please provide your comments on the topic(s) selected above.</p> <p>Removing the gyratory a good idea..it worked well at Besson Street.</p>	2	<p>Lewisham like all London boroughs is dealing with a housing crises and is required by the London Plan to accommodate 1,667 homes per annum across the plan period. We believe that locating these homes in our opportunity areas and town centres that have access to good public transport connections, local facilities and jobs is a sensible and sustainable approach. This approach also means that large areas of our suburban neighbourhoods and conservation areas can be conserved and enhanced.</p> <p>The Sites within New Cross and New Cross Gate are highly accessible and suitable for high-density housing.</p>	No change.

		<p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Besson Street (Kender Triangle)</p> <p>6. Please provide your comments on the site allocation(s) selected above. Density too high.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Lower Creekside LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. Why has the DLR been left off so many of your plans? Are you aware there is a Council Tax paying Community Interest group of residential boaters who form part of the Deptford Creek Conservation Area.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	1	Noted	Site allocation amended to include protection for Lewisham's boating community.
3	LNA	<p>1. Do you have any comments on the proposed vision? The guidance in the main plan, page 624 for the southern end of Creekside nos,1-4 does not take into account the (council tax paying), vibrant multi-generational , long established houseboat community and its needs, or what it can contribute culturally. Any public access should be controllable and limited. This community was referred to as an important part of the character of the Creekside Conservation Area which is referred to in this plan. There seems to have been a lack of consultation with this community prior to the present draft. When Covid allows I'm happy to offer a trip on the creek to give planners an alternative perspective.</p> <p>2. Do you have any comments on the proposed key objectives? Regarding these sites the pre-decimal expression that leaps to mind is "quart in a pint pot". They are already intensively used, so to cram a net figure of 160 residential units as recommended in the draft seems a detrimental move and an overarching developer's charter.</p>	2	<p>Noted</p> <p>The Local Plan has a strong policy GR4 on Urban Greening and Trees which seeks to protect existing trees. It recognises that there may be occasions that trees have to felled however measures but be made to retain where possible and mitigate any unavoidable loss.</p> <p>Lewisham like all London boroughs is dealing with a housing crises and is required by the London Plan to accommodate 1,667 homes per annum across the plan period. We believe that locating these homes in our opportunity areas and town centres that have access to</p>	Site allocation amended to include protection for Lewisham's boating community.

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. The council's declaration of a climate emergency seems at odds with the increased incidence of felling of mature trees.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>good public transport connections, local facilities and jobs is a sensible and sustainable approach.</p>	
3	LNA	<p>1. Do you have any comments on the proposed vision? Lewisham seems to be building upwards but failing to maintain its current housing stock: where is the detail in the plans about the current stock and investment in its maintenance. Many Lewisham homes residents are living in homes containing dangerous materials (cladding, asbestos) not to mention damp and leaking windows.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LNA1: North Area place principles LNA2: New Cross Road / A2 corridor</p> <p>4. Please provide your comments on the topic(s) selected above. There seems to be a lack of focus on green space in the New Cross development with a very large number of flats being built in a small area. Also concerns re accessibility for cycles and pedestrians and concerns regarding parking. Will these new flats be barred from having cars? How will this be achieved when the nearby conservation area does not have parking permits? Keeping the conservation area closed through traffic has to remain as part of the solution to this problem. Similarly, concerned regarding the heights of these apartment blocks which will dwarf the conservation area, which will drastically impact on the skyline and disturb the light of those living on the edge of the conservation area</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p>	4	<p>The maintenance of Lewisham Homes properties is not within the remit of the Local Plan. However we will pass your comments on to Lewisham Homes.</p> <p>Lewisham like all London boroughs is dealing with a housing crisis and is required by the London Plan to accommodate 1,667 homes per annum across the plan period. We believe that locating these homes in our opportunity areas and town centres that have access to good public transport connections, local facilities and jobs is a sensible and sustainable approach. This approach also means that large areas of our suburban neighbourhoods and conservation areas can be conserved and enhanced.</p> <p>The indicative capacity for the former Hatcham Works site was informed by the endorsed New Cross Gate Area Framework.</p> <p>The Sites within New Cross and New Cross Gate are highly accessible and suitable for high-density housing.</p> <p>All of these sites will be car-free in accordance with the London Plan parking requirements.</p>	No change.

		<p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision? It's just more of what we've seen in the last decade or 2: huge blocks of posh flats for offshore crime billionaires to hide their money. Rented out to young trendies from richer places, some of whom run trendy boutiques in the commercial units. Any community space like a nature garden is fenced off, patrolled by security guards & bulldozed. The 'development' is then built cheaply by economic migrants from Eastern Europe, who get priority for the jobs & remaining council housing, thus displacing locals, of whom there are virtually none left</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. Albany Theatre has a beautiful nature garden with a polytunnel veg growing club & a patio adjoining the cafe. Why should it become a monster block of flats ?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	2	We do not recognise or agree with this assessment.	Site allocation LNA 12 – Albany Theatre amended to make reference to the community gardens, Neighbourhood Open Space and the need to protect public realm.
3	LNA	<p>1. Do you have any comments on the proposed vision? No</p> <p>2. Do you have any comments on the proposed key objectives? No</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. No</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Former Hatcham Works, New Cross Rd</p>	4	<p>The Local Plan safeguards the Former Hatcham Works site for the delivery of the BLE.</p> <p>The indicative capacities for the site have been informed by the New Cross Gate area Framework that was endorsed by the Council. This sets out an indicative layout and massing that the Council feel is broadly acceptable. This will obviously be tested against the Local Plan policies when any proposal is brought forward.</p>	No change.

		<p>6. Please provide your comments on the site allocation(s) selected above. It is imperative that any planning permission for this site be conditional upon the delivery of a Bakerloo line station. The height of the buildings will need to take into account that the site is bordered to the south and the east by conservation areas. It is not enough to say that the 'tall buildings' will be in the centre of the site - views from both the Hatcham and Telegraph Hill conservation areas cannot be compromised.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision? It seems quite ambitious which is good as good ideas always get whittled down.</p> <p>2. Do you have any comments on the proposed key objectives? What does the term "Genuinely affordable housing" mean ?</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LNA4: Thames Policy Area / Deptford Creekside</p> <p>4. Please provide your comments on the topic(s) selected above. The waterlink way could be suspended under both sides of the deck of the DLR. One side for pedestrian traffic and a separate one for cyclists. This would give users fabulous views of the Ravensbourne, the Creek and its environs whilst preserving space for the creative community and creek residents below. This could run, with intermediate access and egress all the way from Brookmill Park to Greenwich. The South facing sections could carry photovoltaic panels to power lighting and feed the grid providing a revenue to cover maintenance.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Convoys Wharf MEL</p> <p>6. Please provide your comments on the site allocation(s) selected above. Convoys Wharf is a development that seems separate from Deptford rather than integrated into Deptford. You only have to look at areas such as Nine Elms to see the woeful effects of "poor doors" and exclusion of the local established community. Developers should nurture and work with community initiatives.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? The declared climate emergency by LB Lewisham needs a massive increase in local employment allowing people to walk or cycle to work. Accommodation design needs to radically change to accommodate increased work from home rather than developers being allowed to build "units" at a minimum legal size.</p>	1	<p>Genuinely affordable is defined in the Local Plan as Social rent and London Affordable rent.</p> <p>Waterlink way – too detailed for the Local Plan but we will pass on your comments to our transport team.</p> <p>Convoys wharf – This site has a live, approved planning permission. The application was approved by the then Mayor of London, Boris Johnston against the wishes of the Council. The council will continue to work with the developer within the scope of the approval to engage with the local community.</p> <p>The Local Plan outlines policies to increase local jobs and includes an additional 40,000 m2 net employment floorspace over the plan period.</p>	No change.
3	LNA	<p>1. Do you have any comments on the proposed vision? This reads like Deptford is some sort of industrial heartland. It's not - it's densely built urban Zone 2 and the people living here now and future occupants of the new developments need quality green outdoor space, pedestrian-friendly high streets, and transport planning that's integrated with the immediate north</p>	3	Disagree	No change.

		<p>(Rotherhithe/Southwark) and south (Greenwich). Only 7/8/9 on the plan speak to the quality of life of people living here. An unfunded 30+ year away Bakerloo line is not our priority, nor is a private football stadium largely visited by residents of Kent. This is not an industrial estate, it's our home.</p> <p>2. Do you have any comments on the proposed key objectives? Insufficient priority given to green space</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LNA1: North Area place principles LNA5 North Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision? Generally very good, particularly the bakerloo extension and the cycling routes. However, it's important to retain the identity of the area - allowing a loved pub (the White Hart) which was used by 1000s to be developed for use by 10s doesn't inspire confidence, for example. The creative hub and the green space sound great.</p> <p>2. Do you have any comments on the proposed key objectives? Important not to lose the view from Telegraph Hill. It's so rare to have that in London, and there should not be extensive high rises eg on the Sainsbury's site.</p> <p>Extending the Bakerloo line is much needed. During normal non-COVID times, the overground is massively overcrowded.</p> <p>I've lived all over London and the cycling route from Lewisham into central is the worst I've used. It's extremely dangerous to cycle down the Old Kent Road or New Cross Road - no paths, potholes everywhere. Surprised people haven't been killed. Lots of students live around here and cycling is very important for them (and the rest of us who want to cycle into central for work).</p> <p>Keep it green please, and wild. South London is so leafy and natural, which is rare for London. Would be such a shame to lose that to over-development and/or manicured green space.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p>	3	<p>Support noted.</p> <p>The view from Telegraph Hill is recognised in the Local Plan as a key local view.</p> <p>Cycleways – the Local Plan identifies key cycle routes throughout the borough underpinned by the Councils Cycle Strategy.</p>	No change.

		<p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LNA	<p>1. Do you have any comments on the proposed vision? Again the dependency on the Bakerloo extension is too much of a dependency; what would be the alternative?</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above. N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. Too much to consider</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	1	The delivery of the Local Plan and the growth and investment is not predicated on the delivery of the BLE.	Further clarity is provided throughout Part 1.
3	LEA	<p>1. Do you have any comments on the proposed vision? The vision represents a much needed regeneration of the area but the proposals by Galliard are for tower blocks that are far too high to be sympathetic to the landscape of the surrounding areas and risk becoming another blot in the landscape in 10 years' time</p> <p>2. Do you have any comments on the proposed key objectives? See above</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p>	4	This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change.

		<p>LEA2:Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>The vision represents a much needed regeneration of the area but the proposals by Galliard are for tower blocks that are far too high to be sympathetic to the landscape of the surrounding areas and risk becoming another blot in the landscape in 10 years' time</p> <p>5. Having see Galliards plans, I have additional comments:</p>	3	This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change.

		<p>1) they plan for small supermarkets to support 630 new homes. That means people will just packed Sainsburys Lee Green.</p> <p>2) no additional parking for 630 new homes. Their only response to that is that people will be informed that they will get no allocated parking when they buy the flats. Well then they will park in our residential area.</p> <p>3) They claim to be adding a north south walkway when in fact the current layout is more open and so you can easily access north south and they are removing existing east west link. They should show before and after plan in their brochure. Who cares about 2018 plan that is not going ahead.</p> <p>4) What is going to happen to the small local store and charities?</p> <p>5) The density of the building is an incredible change. We are just switching from one type of eyesore to another</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>1) Bigger supermarket to support 630 new homes</p> <p>2) parking and traffic and public transportation need to be addressed</p> <p>3) reduce the density of the buildings to reduce immense pressure on public service, eg trains, schools</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? It is confused. Takes no account of past consultations from local residents</p> <p>2. Do you have any comments on the proposed key objectives? Height proposals of 15 storeys inappropriate. AFFIRDABLEFamily homes not flats required</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. N/A</p>	4	This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision? We live on Dallinger Road and are very concerned about the lack of transparency regarding the latest proposals for the Leegate Centre. Instead we have had to rely</p>	1	The Local Plan consultation was carried out in accordance with our Statement of community Involvement.	Lewisham has updated it tall building evidence and the Tall Building policy has been amended accordingly.

	<p>on emails from community groups to keep us informed as the council has sought to prevent the proposals being made fully public while the Local Plan consultation remains open.</p> <p>We understand that the current proposals - which have had no formal public consultation, merely informal consultation with a few selected groups - will now include almost 650 new homes with building heights reaching 15 storeys. This is completely inappropriate for the area and the council is setting a dangerous precedent for other proposed allocated sites in the Lee area. Lee Manor is an important Conservation Area and these proposals are not in keeping with the existing buildings.</p> <p>We appreciate something need to be done with this site - but it has to be done in a sympathetic way to the existing historic buildings. it is a strategic site and one that will have long term implications for those of us who live here. It also should not be used as precedent for other smaller sites which are in residential areas, in our case the Travis Perkins site which sits within a residential area on a residential road.</p> <p>Lewisham has looked at it's evidence and explicitly excluded Lee Green from it's Tall Building opportunity areas in its draft Local Plan. Yet Galliard Homes are proposing building up to 15 storeys high, exceeding maximum existing local height by 37%. This is against the wishes of the community as expressed in the Lee Neighbourhood Plan which has been widely consulted on. We would want to see the height of the new development reflect better the character of the historic buildings in Lee Green.</p> <p>Also there are no public proposals about how this development will affect the already highly congested crossroads at Lee Green. Thanks to bungled policies like LTN (with more to come when Greenwich close Weigell Road) - this crossroads is not only congested but highly dangerous - adding an additional 650 homes with the added car movements will exacerbate the problem and we note the Lee Forum says no funding has been allocated for Lee Green for infrastructure improvements, which seems highly short sighted give this is supposed to be a strategic site. Clearly no council officers or Councillors ever use this junction.</p> <p>We are also opposed to the redevelopment of the Sainsburys site as this will only make issues at Lee Green in terms of car movements, congestion and pollution worse. We would also oppose the council using the redevelopment of the Leegate to set a precedent for further 15 storey+ buildings on this site.</p> <p>We would be supportive of a sympathetic redevelopment of the Travis Perkins site and Citroen garage site - one which completed the street scene of Holme Lacey Rd in the same style of Victorian housing that currently exists and at the garage site, helps to complete the shop frontage around the station. However we fear that the council will simply allow a developer to build a huge block of flats, totally out of keeping with the area.</p> <p>2. Do you have any comments on the proposed key objectives? No we don't support the objectives - for reasons stated above - what's the point in consulting if the council is going to ignore it's own policy?</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds LEA1: East Area place principles</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The tall building evidence accompanying the Reg 18 consultation does suggest that Lee Green could be suitable for tall buildings albeit it recognises that there are sensitivities. Further work has been carried out to ensure our approach to tall buildings aligns with the now adopted London Plan.</p> <p>We note you objection to the redevelopment of Sainsburys – The London Plan directs Local Authorities to allocate surface carparks and single storey retail for redevelopment in order to make best use of available land within the capital.</p> <p>All development within Lee Green will be car-free or car-lite in accordance with the London Plan parking requirements.</p>	
--	--	---	--

		<p>LEA4: Linear network of green infrastructure LEA5: East Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre Sainsbury's Lee Green Travis Perkins and Citroen Garage</p> <p>6. Please provide your comments on the site allocation(s) selected above. Not opposed to the redevelopment of Leegate centre in principle but it must be done with reduced heights - we fear the council is simply using the Galliard application as a way of creating a precedent for taller and inappropriate buildings on other sites in Lee.</p> <p>Opposed to Sainsburys site - together with the Leegate redevelopment it would cause total chaos to the Lee Green area - and given what the council has already done with LTN we would have no confidence in the council's competence to manage this.</p> <p>Not opposed to redevelopment of Travis Perkins and car showroom site, however this should be done sympathetically and it would be much better to complete Holme Lacey Road in the same style of housing as already exists rather than blocks of flats which would be totally out of keeping with the low height Victorian housing that currently exists. The car showroom site should be used to complete the shop frontage - not blocks of flats - and we agree that this would complement the existing commercial area around the station.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA5: East Lewisham links</p> <p>4. Please provide your comments on the topic(s) selected above? I strongly support this, and the proposal to de-culvert the Quaggy near Lee High Rd. Development of the East Lewisham Links proposal must minimise conflicts between pedestrians, cycles and motor traffic, with pedestrians and cycles prioritised at junctions to make the routes genuinely useful. Very careful thought needs to be given to the route in the centre of Blackheath village, which is currently too narrow and polluted for the number of people and the amount of traffic, and is horrific for cyclists. Closing Blackheath to through motor traffic except buses, would make more</p>	1	Support noted. We will pass your detail comments onto our Transport team.	No change.

		<p>space for pedestrians, a safe route for cyclists, and transform the polluted, cramped centre.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. 3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? Safe, direct cycling routes to and from Lee Green are desperately needed. The A20 east and west of Lee Green and the A2212 north and south of Lee Green need segregated cycle lanes.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre Sainsbury's Lee Green Land at Lee High Rd and Lee Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. I support the development and improvement of Lee Green, but it is important that (a) transport is improved (more buses and segregated cycle lanes), (b) safe, pleasant public space is created set back from the polluted junction, (c) shopping and facilities are retained and improved, and (d) building heights are limited to the height of existing local buildings.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	3	<p>We acknowledge that improving streets throughout the borough including within Lee Gate and Blackheath is important. We will continue to work with our transport colleagues and TFL to deliver this.</p> <p>The Local Plan is underpinned by a Transport Assessment and other key documents such as the Councils Transport Strategy and Local Implementation Plan.</p>	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision? How can you hope to improve on the 'vision' of Blackheath, when it has a tailback up Lee Road from Tigers Head junction for a few hours each day, including the weekends? And this is only going to get worse if you build densely packed in tower blocks on the Leegate, BMW and Sainsbury sites? Blackheath an area with conservation areas and listed buildings looking down the hill on a dense ghetto being built to meet Lewisham's house building targets without any consideration to</p>	4	<p>We acknowledge that improving streets throughout the borough including within Lee Gate and Blackheath is important. We will continue to work with our transport colleagues and TFL to deliver this.</p> <p>The Local Plan is underpinned by a Transport Assessment and other key documents such as the</p>	No change.

	<p>those who have lived for many years in the area surrounding this development? You want to build communities in the area that bring joy not despair.</p> <p>2. Do you have any comments on the proposed key objectives? Re-establish Lee Green district centre as a welcoming and thriving hub of commercial and community activity.</p> <p>- How can it be welcoming when the buildings are packed in with hardly any green spaces and dark alleyways between the proposed towers?</p> <p>Deliver public realm improvements and high quality, mixed-use developments through the renewal of Leegate</p> <p>- High quality and densely packed housing are at distinct opposite ends of the spectrum in a housing development plan. No idea what you mean by public realm?</p> <p>Shopping Centre and other town centre sites.</p> <p>There is already a Sainsbury which we would like to keep with the car park. Shops and places such as art studios, yoga and keep fit centres are coming to the area directly due to the lower rents charged, which will force them out when Galliard starts charging high rents and the chain stores such as Starbucks arrive.</p> <p>Address the dominance of vehicular traffic at the centre's main junction.</p> <p>- Not sure how you will achieve this when Lee Green is consistently underfunded from the infrastructure budget, when trains and buses are already packed in preCOVID times. And if you bring in more than 450 new households and don't provide them with car parking they will still buy cars which will then cause more stress to local streets for traffic and parking. Maybe you need to invest in infrastructure not road blocks.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? The proposal for 15 storeys is ridiculous. There is a severe risk of daylight and sunlight being blocked at the junction and buildings at Tiger's Head junction. The site will be totally out of keeping for the area, an area many of which are in conservation areas with listed buildings inhabited by families who stay for many years. It will cause a significant change to the skyline of the area which will be severely detrimental and not an enhancement in any way.</p> <p>This is not an area that can be compared with developments at Lewisham roundabout or Kidbrooke and therefore a similar plan of dense tall buildings is distinctly inappropriate for the area.</p>		<p>Councils Transport Strategy and Local Implementation Plan.</p> <p>Much of this response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
--	---	--	---	--

	<p>The Lee green area cannot cope with the proposed increase in the number of housing units for a number of reasons:</p> <ul style="list-style-type: none"> -Traffic already queues for lengthy periods at the junction, with queues half way up Lee Road at several times of the day including weekends causing increased pollution, and along Lee High Road to Sutcliffe Park. -Public transport is already at breaking limits with the trains pre-COVID resembling cattle trucks at the peak hours of the day. -Schools already have waiting lists. Until the plans include a primary school you cannot expect young families to be adequately served. <p>In essence:</p> <p>Please make sure the height does not exceed those of the buildings currently in Leegate</p> <p>Include homes for elderly as well as young families</p> <p>Make sure the lead building is not at the north side blocking out light on the junction.</p> <p>The Sainsbury and BMW garage sites must be lower than that of the current low level buildings at Leegate.</p> <p>Improve the infrastructure available with more trains running through Blackheath and Lee.</p> <p>Include plans for an expansion of existing primary and secondary schools to accommodate more children without taking up more land.</p> <p>It is extremely upsetting to face the prospect of Lee Green looking like Lewisham roundabout. I cannot believe that Lewisham Council has not set out strict criteria already to stop wasting more time on this project, when so much should have been learnt from the St Modwen applications.</p> <p>Finally Galliard is well known for selling flats in Hong Kong and Asia to buyers at discount bulk prices who 'mothball' the flats. This in no way contributes to solving the lack of housing in Lewisham nor achieving the Mayor of London's housing targets. So I would also like an undertaking that all flats that are for sale should be sold in the UK via local agents to British residents.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>Leegate Shopping Centre Sainsbury's Lee Green Land at Lee High Rd and Lee Rd</p> <p>6. 		<p>cause a significant change to the skyline of the area which will be severely detrimental and not an enhancement in any way.</p> <p>This is not an area that can be compared with developments at Lewisham roundabout or Kidbrooke and therefore a similar plan of dense tall buildings is distinctly inappropriate for the area.</p> <p>The Lee green area cannot cope with the proposed increase in the number of housing units for a number of reasons:</p> <ul style="list-style-type: none"> -Traffic already queues for lengthy periods at the junction, with queues half way up Lee Road at several times of the day including weekends causing increased pollution, and along Lee High Road to Sutcliffe Park. -Public transport is already at breaking limits with the trains pre-COVID resembling cattle trucks at the peak hours of the day. -Schools already have waiting lists. Until the plans include a primary school you cannot expect young families to be adequately served. <p>In essence:</p> <p>Please make sure the height does not exceed those of the buildings currently in Leegate</p> <p>Include homes for elderly as well as young families</p> <p>Make sure the lead building is not at the north side blocking out light on the junction.</p> <p>The Sainsbury and BMW garage sites must be lower than that of the current low level buildings at Leegate.</p> <p>Improve the infrastructure available with more trains running through Blackheath and Lee.</p> <p>Include plans for an expansion of existing primary and secondary schools to accommodate more children without taking up more land.</p> <p>It is extremely upsetting to face the prospect of Lee Green looking like Lewisham roundabout. I cannot believe that Lewisham Council has not set out strict criteria already to stop wasting more time on this project, when so much should have been learnt from the St Modwen applications.</p> <p>Finally Galliard is well known for selling flats in Hong Kong and Asia to buyers at discount bulk prices who 'mothball' the flats. This in no way contributes to solving the lack of housing in Lewisham nor achieving the Mayor of London's housing targets. So I would also like an undertaking that all flats that are for sale should be sold in the UK via local agents to British residents.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Listen to the people who live there. Ask them if you are not sure (unlikely). Approach us in a way that is not pushing these absurd plans on intelligent people who care about their community.</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision?</p>	5	Improving the quality and access to our existing green spaces is a key objective in the Local Plan. We have also	No change.

		<p>Where are the plans to create more green spaces in the vision? It would be better if the development sites were allocated for open green space rather than more housing, more people, more pressure on the already over crowded infrastructure and transport.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Land at Lee High Rd and Lee Rd Sainsbury's Lee Green Leegate Shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. Low rise buildings and more green space in the site rather than more housing.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>sought where practical the development of new open spaces as part of the redevelopment of large sites.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>Lewisham like all London boroughs is dealing with a housing crises and is required by the London Plan to accommodate 1,667 homes per annum across the plan period. We believe that locating these homes in our opportunity areas and town centres that have access to good public transport connections, local facilities and jobs is a sensible and sustainable approach. This approach also means that large areas of our suburban neighbourhoods and conservation areas can be conserved and enhanced.</p>	
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? With regard to the Leegate centre, please avoid buildings with the same height as around Lewisham Station. These would be too high and out of keeping with the area. I'd suggest of medium height structures of no more than 5 floors); For retail, building a replica of the types of shops found in Lewisham would probably not be sustainable, and the Sainsbury's remains the main focus in the area. An alternative may be to develop a hub of independent shops. This is challenging, but even in it's current run-down state, it still manages to house some innovate and individual shops. This may also help make the area a "destination" site. Please include some green space amenities integrating paths and cycle routes and children's play areas. (this works well around the new Kidbrooke station development, and has transformed the areas).</p>	4	<p>In response to the consultation the Council has prepared additional evidence on Tall Buildings.</p>	<p>Tall building policy amended in response to additional evidence base.</p>

		<p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate shopping centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. See above</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? No</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? The area has become dated so does need some new ideas to regenerate it and make it prosper for the community as a whole.</p> <p>2. Do you have any comments on the proposed key objectives? No</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? The plans proposed by Galliards are too big for what is a local area. If this were along the river in a derelict location then they would be considered reasonable. If you consider the height of the proposed tallest tower at 15 stories, that dwarfs the buildings on the other side of the road, namely Eltham Road, Lee Road and Lee High Road. How are these plans cohesive in the slightest? Also, where would all the retailers go during a 4 year development. The new sight would be a generic block of flats with a small convenience store and maybe a costa underneath. This would not preserve the status of a district centre. The primary schools are already full in the local area. How will they manage if the developer gets 600 flats in total.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. The plans proposed by Galliards are too big for what is a local area. If this were along the river in a derelict location then they would be considered reasonable. If you consider the height of the proposed tallest tower at 15 stories, that dwarfs the buildings on the other side of the road, namely Eltham Road, Lee Road and Lee High Road. How are these plans cohesive in the slightest? Also, where would all the retailers go during a 4 year development. The new sight would be a generic block of flats with a small convenience store and maybe a costa underneath. This would not preserve the status of a district centre. The primary schools are already full in the local area. How will they manage if the developer gets 600 flats in total. The parking is insufficient as well. Leyland Road, Cambridge and Dorville will be full of cars.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	4	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p>	No change.

		Less density of housing achieved by reducing the height or having more space between blocks. Phased developments so the local economy doesn't just cease to exist during a transition period			
3	LEA	<p>1. Do you have any comments on the proposed vision? Its great to identify sites for increased capacity but these should be considered with the local environment in mind and how locals will use. Landscaping is really important. It hardly ever works to squeeze as much development on a site without proper consideration for the use ongoing. Though the area does have a lot of open space most is closed off as is private playing fields. So developments need to have communities in mind and to include decent open space</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? Need to be careful on density of developments with out the necessary contributions to schools, community use, GPs/medical centres etc Also the architecture /urban design is key for future generations that should enjoy the areas. People flock to blackheath village because of its charm and this needs to be replicated but not necessarily in any traditional sense but in design and usability. Better pedestrian flow. better use of zebra crossings for example better /improved street furniture. I'd suggest including locals in discussions - a working group - all in to together would be better. The recent side street closures due to covid-19 i feel have worked and removed rat runs. Much better for pedestrians. Hope they stay too.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. It's a shame Leegate is still in the state it is. After 12 years of living in Burnt Ash Road such potential wasted. As Lee Green is designated district shopping area (though with times a changing with how high streets are in decline with regular shopping) it would be great to see any redevelopment put the local community at its heart. To have a destination like those of Blackheath village or Greenwich town centre. To have public space and interesting architecture and public and landscaping such as trees and shrubbery. It should be safe guarded for community space for local community groups and for local independent retailers. For example providing workshop studios with a little retail space too. It would be good for any redevelopment to think about how locals will and can use it with daytime and nighttime uses. Leegate should provide housing which currently is forecasted as being needed however, this shouldnt be at the cost of decent architect and design with decent public open space and landscaping.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	5	<p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.

		Developments should not necessarily just be about tall buildings as the answer to development. Balances between density, size, and local environment must be maintained.			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate shopping centre Sainsbury's Lee Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. There is no provision to increase capacity of trains at Lee and Hither Green stations to cope with the increased population with the high density residential building. There is no provision to increase provision of primary and secondary schools in the area. The high density building will increase traffic and air pollution in the area. There is insufficient consultation with the local community on replacing Leegate with 15-storey buildings and up to 450 new homes. That is too dense. We can only have max 6-storey buildings and 200 new homes, no more!</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? We need more green spaces, more schools, fewer cars in the area.</p>	6	<p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The Local Plan does not propose a 15-storey building – this relates to the proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. 		<p>6. Please provide your comments on the site allocation(s) selected above. We are writing to voice our opposition to the new development proposed by Galliard Homes at Leegate. As residents of SE12, we would like a solution to the Leegate area. However, the plans that were put forward by Galliard are at a significant cost to the area. 450 homes and tower blocks at 15 stories (or higher!!!) is not an appropriate development for the area. Leegate should not be turned into another Lewisham central with tall block towers and overcrowded streets. The buildings should be 5 - 10 stories in height. No higher than that. 10 stories MAX in height.</p> <p>The proposed structures would dwarf the surrounding areas and not to mention, there is a distinct lack of greenery in their proposal. All we see is a few scattered trees and lots of pavement. 50% of the buildings in Lee are listed buildings and the proposal does not fit with the architecture of the area. This sets a precedent that other developers would build tall towers and blight our community. Now, what about the infrastructure? Where will the children of the development go to school? Our neighbouring schools are at capacity and we would need a new school built to accommodate those children. Leybridge Estate was built and Brindishe Lee was built to educate those children. There is nothing in the plans as to where the children would go to school. Will there be more bus services to and from Lewisham to accommodate the new residents? What about a new secondary school? There is no discussion on how or what kind of infrastructure will be built.</p> <p>What would we like to see in the Leegate area? An area that looks similar to what was done to the Leybridge Estate. You have 1 - 2 towers of 10 stories and lots of greenery around the area. Or perhaps 4 - 5 towers of 6 stories in height? Greenery and spaces for residents and locals to enjoy. Have a look at the Conington Road area and you will see a small development that doesn't feel like it is intrusive. Housing should be adequately spaced with lots of light and greenery. Space of walking, cycling, and limit the use of cars since our area can't cope with any more cars. More local shops, not another Sainsbury's. We need a space to encourage local shops with discounted rents and revive the area with a bustling high street. We have a few great shops on Lee Road and we don't see why we can't encourage more locals to open their own businesses.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.	
Lewisham East Area		<p>1. Do you have any comments on the proposed vision? Lack of joined up approach to all the councils priorities and failure to set vision in the context of an interconnected se london makes this rather limited in scope and vision. Planners talking about Leegate without much mention of how these massive developments will impact on the residential areas is so disapointing. Proposing to have 15 story high tower block in the sensitive area around the Tigers Head whilst pushing all efforts to show Blackheath is protected is likely to lead to widening inequalities (geographically) and making Blackheath and immediate surrounds ever more unafforable whilst Lee contines to be spoilt - especially given the proposal to develop in the conservation area. NO mention of Manor House gardens which local community has done much to support (volunteer gardeners etc)</p> <p>2. Do you have any comments on the proposed key objectives?</p>	0	This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process. <p>Employment and skills – please refer to Part 2 Section 8 of the plan Economy and Culture and in particular Policy – EC9 training and job opportunities.</p> <p>Public health – we liaise on an ongoing basis through our duty to corporate and Infrastructure planning with</p>	The Local Plan and Infrastructure Plan have been amended to make specific reference to Urban National Park, forming part of an integrated District Park.

	<p>IN general best to let form/structure follow function and these objectives dont seem to be backed up by clear outline of how the areas functioning will be improved - there are some feel good elements but dont really get a feel of how these fit with the "living and breathing area". Certainly not much sense of how population through the lifecycle of ages fit into this structural plan. In particular complete absence of the fact this area abuts greenwich and well know poor relationship with greenwich council shows up in this plan. Lewisham doesnt exist in isolation and more should be made of how these proposals will work with greenwich and compliment those develoments.</p> <p>Lack a sense of how these developments work to improve employment and skills for local residents - what are the gaps and what employment will be attracted here - need to link to thinking on how the structures need to take account of the oppourtunities and challenges for work in this area.</p> <p>Lack much consideration of public health and like impact on pandemic and future pandemics (more dense areas worse rates of infection)- suggests there is a lack of discussion and linkage between the public health dept of the council and planners - see good work done in Catford by Rushey Green Timebank/Lewisham Local and lack of action on allotments (see papers below which show lewisham in a poor light)</p> <p>Notable lack of consideration of how people can be encouraged to grow their own - and poor running of allotments by Lewisham which has been highlighted as doing particularly poorly in this area. especially good for those who are older and isolated as well as new arrivals (including asylum seekers).</p> <p>https://www.imperial.ac.uk/news/204133/thousands-chasing-london-allotments-supply-dwindles/</p> <p>https://www.sciencedirect.com/science/article/abs/pii/S1618866720306403?via%3Dihub</p> <p>https://www.imperial.ac.uk/news/215713/imperial-researchers-develop-unique-roadside-barrier/?utm_source=linkedin&utm_medium=social&utm_content=e28ed342-d10e-403d-93a9-0a5daca8ccfc&utm_campaign=news</p> <p>Given the high profile death of Debra AK daughter would have thought more consideration would be given to this - making Lee High road better for cycling when there is so much pollution shows a lack of joined up thinking - and silo approach to planning.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds LEA3: Strategic Area for Regen, Grove Park LEA5: East Lewisham links</p> <p>4. Please provide your comments on the topic(s) selected above? Dont support massive high towers - should not go above 10 note what happened in Greenfel - and note this isn't the best way to build a community. Very little evidence of community engagement over these developments - just official inaccessible consultation - very dissapointing approach.</p>	<p>our public health colleagues who have provided comments on the plan.</p> <p>Allotments – Please see policy on allotments and the Parks and Open space strategy which underpins the plan.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p>	
--	---	---	--

		<p>Grove park urban park could help to prevent the aggressive planning applications that have been coming forward in that area. There is an important nature reserve and opening up this area from Hither green is important if done with much better community engagement. The allotments are an important site which have been neglected but should be opened up for more to access - and to help those struggling with isolation and mental health issues - see whats been done in Catford and try and bring some of this to that area.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre Sainsbury's Lee Green Land at Lee High Rd and Lee Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. for Leegate Ten stories is still massively high around the Tigers Head - should not allow higher than this - as usual Lewisham councillors wont listen.</p> <p>Sainsburys should be enabled to stay.</p> <p>Lee Road is ripe for redevelopment but seeing the poor quality of product down near Lewisham station I fear for further developments.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? No mention of learning lessons from the massive development in Lewisham centre and poor quality housing with limited green spaces. What about the impact of increased work from home for white collar workers and impact on the affordability of these properties.</p> <p>Very limited context about likely needs for schooling and for healthcare capacity. Have you discussed with local NHS - i guess not as Lewisham councils attitude to local NHS comes across as very old style and confrontational (we should be in charge) and not collaborative.</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? The lack of human scale or public realm in the proposed Galliard Homes development at the Leegate Shopping Centre is a huge concern. It appears that hitting Lewisham targets for the growth of residential units is taking precedence over the genuine needs of the local population of Lee Green.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre</p>	3	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	<p>No change.</p>

		<p>6. Please provide your comments on the site allocation(s) selected above. The proposed height and mass of the buildings increase the destructive environmental impact of the proposed development on the construction process. The proposed development will change the nature of the current neighbourhood and appears to take account of developer ambition rather than local regeneration needs.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Please ensure that you listen to residents and deal with this eyesore that we have been suffering for years without action by the council or the site's previous owners, but do not make it worse by insensitive and intensive development.</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA1: East Area place principles LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? The proposed height, density and massive scale of the proposed building development at Leegate Centre are out of keeping with your LEA1 East Area place Principle F – “The sensitive intensification of established residential neighbourhoods will be supported where new development responds positively to their distinctive local character, including the landscape setting”.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. There is no attempt at matching any of the local neighbourhood's characteristics in the development proposal from Galliard Homes and no green space to match that of the Leybridge Court estate which is just across a minor road from the site.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Most local people agree that the Leegate Shopping Centre has been mismanaged and left to deteriorate, but a sensitive and viable development, taking account of the limited local infrastructure, need for shops, community facilities and job opportunities is what we need</p>	2	This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p>	1	We do not believe that the intensification of sites within the Lee Green district centre contradicts making the best use of land and facilitating Good Growth.	No change.

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA1: East Area place principles</p> <p>4. Please provide your comments on the topic(s) selected above? While the redevelopment of the Leegate Centre as an intensive residential site complies with your blanket Principle E (“The intensification of sites within the Lee Green district centre”), it clearly contradicts your LEA1 East Area place Principle A – “Development proposals must make the best use of land in helping to facilitate Good Growth”.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. The principle outlined in LEA1 East Area place Principle A – “Development proposals must make the best use of land in helping to facilitate Good Growth” - is already made ineffective by plans to intensify residential development at the Leegate Shopping Centre. ‘Good growth’ (there is no definition in your draft Local Plan glossary) is not facilitated by intensive residential development at the expense of commercial and community infrastructure.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Council site allocations and planning decisions should follow the principles outlined in the draft Plan. The Leegate Shopping Centre desperately needs to be tackled in an effective way to meet local requirements for good quality housing, employment and community facilities.</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? The smileys are an easy way for a developer to claim community response which totally negates any local nuance.</p> <p>2. Do you have any comments on the proposed key objectives? New developments should be planned in relation to each other and in keeping with the low rise buildings here. Leybridge at 10 stories is an anomaly and should NOT be considered a baseline. Current leegate height should not be exceeded.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? No buildings taller than existing leegate. Plans ensuring no additional pollution. Developer to pay for social costs (new schools, GP etc).</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p>	2	In response to the consultation the Council has prepared additional evidence on Tall Buildings.	Tall building policy amended in response to additional evidence base.

		<p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Don't let developers try and nice us up with fancy promotional materials.</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? Lee Green The proposed housing units make this a very high density development. The proposed height of the development is way out of scale with surrounding buildings. The pollution from work traffic, CO2, dust and noise for existing residential roads would be intolerable. The existing infrastructure of schools, doctors and social support is insufficient to support the proposed development. Parks, open spaces, cycle tracks and the preservation of quiet residential roads do not feature highly in the plans.</p> <p>2. Do you have any comments on the proposed key objectives? Providing affordable homes is fine as long as developers take into consideration the existing residential roads</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? The proposed development is out of scale with the local area, offers no attractive features and could result in a concrete wind tunnel attracting no one but loiterers.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. The sight needs development but the current proposals do not enhance and improve the site</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Dorville Road will be used as a main access road to the site. Currently the increased traffic from road closures is intolerable. On development the traffic from work lorries etc will be horrendous.</p>	1	This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision? I am responding to the Local Plan regarding the future development of the Leegate Shopping Centre.</p>	3	All development proosals will be assessed against draft policy QD1 Delivering high quality design in Lewisham which states: <i>All new development must follow a</i>	No change.

	<p>It is very important that the Centre is redeveloped into a good community area for local businesses to have affordable rent and new housing. As a neighbouring resident, I'm raising concerns about the current proposals suggested by Galliard Homes.</p> <p>Lewisham Council is planning to develop three sites:-</p> <p>The Leegate Shopping Centre, The BMW garage, and Sainsbury's.</p> <p>Guidance in the Local Plan doesn't ensure that all these sites are developed in ways that link up with each other and enhance Leegate. The Plan should state clearly that new developments in the area must fit in with existing older buildings at the Lee Green Cross Roads. These buildings average two storeys and have a maximum height of four storeys. They include a Grade II listed fire station and a locally listed Old Tigers Head pub.</p> <p>The River Quaggy alongside the BMW site and the back of Weigall Road playing Fields is opened up with access for all as nature is very important for people's health. The work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee.</p> <p>My main concern is the planning of up to 630 new homes, their height and the infrastructure regarding them in Lee. The proposed height of the new buildings in the Leegate development by Galliard Homes, is proportional to existing buildings and the current structure. Their proposed block heights will reach 15 storeys high, which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - they are 10 storeys high. Any new Local Plans should set a 3-storey maximum height limit for any single building planned for the Lee Green area. It should also state an expectation that most new housing developments should be in keeping with existing buildings of 3-storeys. This will ensure public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings, over crowding and helps to ensure safety. Tall buildings reduce natural light in surrounding areas - may I see a light study test please? Very tall buildings will make the area unwelcoming, unattractive and deter people from using the shops and facilities being planned for the site. With up to 630 new homes, this increases crime and shall place a big burden in already over-subscribed services such as schools, GPs and hospitals. Most trains do not run very frequently and most mornings (prior to lock down) it was impossible to fit into an overly crowded train carriage. The amount of new people into Lee will place a burden on services.</p> <p>How is the building work, particularly large lorries, gas and electrical digging, going to affect local residents? With Local roads closed off and traffic congestion, particularly school runs, this is going to exasperate traffic standing still and poor air quality.</p> <p>There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. Developments need to respect the proportions and community feel of the</p>	<p><i>design-led approach to contribute to delivering high quality, inclusive, safe, healthy, liveable and sustainable neighbourhoods in Lewisham. This requires the consideration of design options at the early stage of the development process informed by an understanding of the local context, including through effective engagement with the local community. These design options should then be used to determine the most appropriate form of development that responds to the local context, along with the optimal use of land to support the delivery of the spatial strategy for the Borough.</i></p> <p>The rest of the response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
--	---	--	--

	<p>local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by older people.</p> <p>The plan should state the importance of developing new green spaces and also improving existing ones for leisure use as more families come into the area. For example, the Edith Nesbit Gardens on Leyland Rd. provide a small but well landscaped area for people to walk and exercise dogs but the play area is in great need of refurbishment. As more young families move into the area they will need more play areas and safe green spaces for their children. The infrastructure improvements needed for Lee Green's development should be explicitly outlined in Lewisham's Local Plan.</p> <p>2. Do you have any comments on the proposed key objectives? Buildings shouldn't be taller than 3 storeys</p> <p>Concern about up to 630 new homes, increases burden on local infrastructures, increases crime. Tall buildings removes light and community feel.</p>			
--	---	--	--	--

		<p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>The roads blocked off and traffic congestion, schools, local parks should be developed.</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision?</p> <p>This is a positive vision for the area although it's not always clear how this can be achieved. The desire to intensify Blackheath's night-time economy needs to be considered in the light of residents' concerns about noise, etc.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>Many of these are good, but there are no practical solutions to reducing vehicular traffic and turning some major arterial roads into healthy streets. Moreover, the need for people using the re-developed Leegate centre and Sainsbury's site to be able to take home their shopping is not addressed in a practical manner. Simply wishing away cars by reducing the amount of parking available could ultimately lead to these shopping areas being unviable. Please remember that many elderly, frail and other people who cannot carry heavy shopping do not necessarily own blue badges and after the Covid epidemic is over I doubt as many younger people will have the time to walk and cycle to the shops. Public transport must be improved.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>The stated approach to the Lee Green district centre, that new development should be in keeping with the character of the area, is laudable, but there is no evidence that this is being taken into account when looking at new proposals for the Leegate centre or the Mayfield's hostel. Optimising the use of land is fine but there should be strict requirements as to the proportion of affordable housing which is to be provided in any development and the consequences for local services, including schools, doctors, dentists, etc. must be taken into account. How is the rebuilding work at Leegate and the Sainsbury's site going to be coordinated so that there will be one large supermarket in the area at any given time?</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>Leegate Shopping Centre Sainsbury's Lee Green Mayfields Hostel, Burnt Ash Hill</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>In all three cases there is an issue about the height of proposed buildings and the extent to which they will be out of character with the rest of their surroundings. As the scoping letter for the Leegate centre states, views from different directions will also need to be taken into account. If the Leegate shopping centre is going to have 630 rather than 450 residential units then support services will need to be increased substantially in the area. As outlined under key objectives, there is a problem about creating a large shopping centre without providing adequate parking or some method for transporting shopping home.</p>	1	<p>We acknowledge that improving streets throughout the borough including within Lee Gate and Blackheath is important. We will continue to work with our transport colleagues and TFL to deliver this.</p> <p>The Local Plan is underpinned by a Transport Assessment and other key documents such as the Councils Transport Strategy and Local Implementation Plan.</p> <p>The Local Plan outlines our policy HO3 on genuinely affordable housing – this seeks to achieve a strategic target of 50% and maximise the number of genuinely affordable housing delivered in the borough.</p> <p>All proposals are subject to viability as set out in the National Planning Policy Framework.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The Councils approach to LTNs is outlined in more detail on the Council's website.</p>	No change.

		<p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>I do not feel that the traffic question has been taken seriously enough. There is talk of turning key roads into healthy streets, yet those very same roads now receive a lot more traffic as a result of the Lee Green LTN. The congestion around the Lee Green crossroads will be made even worse by construction vehicles. Some imaginative scheme needs to be found to cope with traffic coming from central London out to Kent and vice versa which necessarily comes via Lewisham. It is not acceptable simply to hope that this traffic will disappear (evaporate) if you make life difficult enough for drivers. Many local businesses could also be affected by these plans, especially if parking is not provided. This is not to say that cycling and walking should not be supported too, and plans for the Quaggy and green spaces are laudable.</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA1: East Area place principles</p> <p>4. Please provide your comments on the topic(s) selected above? The decision to significantly intensify the residential use of the Leegate Centre is in direct contradiction to your stated LEA1 East Area place principle A (a) to “secure the centre’s long-term vitality and viability and to enhance its role as key focal point for community activity, in line with Policy LEA2 (Lee Green district centre and surrounds)”.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. The over-development of the Leegate Centre site as an intensive residential area with buildings out of scale with the immediate surrounding neighbourhood does not contribute to the “vitality and viability” of the centre or its role as a “key focal point for community activity” (LEA1 East Area place principle A). There are few community focused opportunities for local activities within the proposed site and the over-development of housing will lead to an imbalance in facilities in the local area.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? LEA1 East Area place principle A is a good one and your site allocations and planning decisions should follow this. The Leegate Centre desperately needs to be tackled in an effective way to meet local requirements for good quality housing, employment and community facilities.</p>	2	We do not see a contradiction in providing high-density, mixed use development and securing the long-term vitality and viability of the town centre.	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision?</p>	1	This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate	No change.

		<p>Yes, in the case of the Galliard Homes proposal for Lee Green, please explain how the current planning proposal meets the vision? I am concerned that the vision has been made to sound positive, but that the reality will be very different.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA4: Linear network of green infrastructure</p> <p>4. Please provide your comments on the topic(s) selected above? LEA4 - fantastic proposal, yes please, it is important for climate change and the future of our planet, and for the health and well-being of the people of Lewisham</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p>	
3	LEA	<p>1. Do you have any comments on the proposed vision? Worried it will become over developed on an already very busy junction.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? I don't think anything should be built any higher than the the existing surrounding building currently are.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Sainsbury's Lee Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. I am very keen for this sainsburys to remain. It is so important to the local community.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	2	<p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>In response to the consultation the Council has prepared additional evidence on Tall Buildings.</p>	Tall building policy amended in response to additional evidence base.

3	LEA	<p>1. Do you have any comments on the proposed vision? Better Streets for Grove Park, a group of 60 residents living in Grove Park, support the objectives of the proposed vision, but believe they should be prioritised in order to make the south eastern part of the borough more equitable.</p> <p>2. Do you have any comments on the proposed key objectives? Page 635 Key Spatial Objective 6 in the main document refers to “transform the South Circular (A205, Baring Road) and Lee High Road (A20) into a Healthy Street”. We would suggest the wording of this is altered to “adopt the healthy streets approach along the A205, Baring road and A20 corridor” and encourage the planning team to follow TfL guidance on this which is clear and unequivocal. This should also form part of the strategic planning document for the whole corridor, and form conditions of planning along the corridor, including CIL contributions to part fund improvements.</p> <p>LEA1 East Area place principles; In order for the council to meet Policy TR3 in the East area, LEA1 sections D, G and K need to state the requirement for public realm to be provided with the Healthy Street approach adopted throughout the corridor from Blackheath Village, via Lee Road, through Lee Green junction, along Burnt Ash Road and Baring Road upto and including Grove Park town centre.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA3: Strategic Area for Regen, Grove Park LEA5: East Lewisham Links LEA4: Linear network of green infrastructure</p> <p>4. Please provide your comments on the topic(s) selected above? LEA3, Regeneration in Grove Park should adhere to the Grove Park Neighbourhood plan. For LEA4, development should provide CIL contributions to remedy severance by the railway line and include S106 provision for a new disabled accessible bridge from Grove Park nature reserve connecting Railway Children walk. LEA5: East Lewisham links and any upgrade of green chain walk to cater for walking and cycling should meet London Cycle Design Standards to cater for future walking and cycling demand.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Sainsbury’s / Land west of Grove Park Station</p> <p>6. Please provide your comments on the site allocation(s) selected above. In order for the council to meet policy TR3 in the East area, Development requirements (16.51) should take into account plans for strategic cycle routes identified in the Council Transport Strategy running north-south along Baring Road as integral to providing access to high quality public realm and adopting the Healthy Streets approach.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	4	<p>Noted</p> <p>The Grove Park Neighbourhood Plan is now adopted policy and will be used in conjunction with Local Plan and London Plan policies to assess planning applications.</p> <p>CIL – the spending of strategic CIL will be agreed by cabinet members.</p> <p>NCIL – spending on NCIL was agreed by Mayor and Cabinet.</p> <p>Cycleways – the Local Plan identifies key cycle routes throughout the borough underpinned by the Councils Cycle Strategy.</p>	<p>Wording changed to “adopt the healthy streets approach along the A205, Baring road and A20 corridor”</p>
---	-----	--	---	--	---

		Action be travel should be prioritised along with mitigation measures to protect residents against any displacement effects from the introduction of ULEZ. This should include infrastructure for active travel, bus priority and healthy neighbourhoods			
3	LEA	<p>1. Do you have any comments on the proposed vision? I am not a member of Make Lee Green, but I support their statement which may be found here. https://makeleegreen.wordpress.com/2021/04/09/our-response-to-the-lewisham-local-plan-consultation/</p> <p>We need the full Lee Green LTN reinstated ASAP and we need additional LTNs rolled out across the borough urgently - especially in light of the council's own declaration of a climate emergency. This needs to happen this year.</p> <p>2. Do you have any comments on the proposed key objectives? I endorse the statement made by Make Lee Green, even though I am not a member. https://makeleegreen.wordpress.com/2021/04/09/our-response-to-the-lewisham-local-plan-consultation/</p> <p>Action on Main Roads</p> <p>The Plan recognises that the “strategic corridors”, the A20, A21 and South Circular are major barriers to progress and are the cause of significant health, social and environmental problems in the Borough. I support the stated aim of transforming them in to “well functioning and healthy streets”. But no solutions are proposed in the Plan. These roads should not be A-roads. They are not fit for purpose. The plan needs to recognise them for what they are – in large part residential roads with excessive traffic on them. Diverting this traffic on to B and unclassified streets is not a solution. A radical re-think is required. Either they need to be reclassified and traffic managed down to normal levels, or they need to radically upgraded to cope with the volumes of cars on them. All three of these roads are planning errors from the 1960s that need to be corrected, and a failure to acknowledge this will seriously hamper the ability of the Council to deliver on the objectives of the Plan.</p> <p>Action on Parking</p> <p>Part of the solution to uncontrolled car use should be to gradually restrict parking. London has two parking spaces for every car and not enough homes for every person. Our priorities need to change.</p> <ul style="list-style-type: none"> ● Car-free residential developments should be the norm rather than the exception. ● Residents’ car-parking charges should reflect the full cost of the pollution and environmental damage caused by specific vehicle types. ● Residents should be able to install secure bicycle and mobility scooter parking anywhere that privately owned cars can be parked <p>Action for Pedestrians</p> <p>In Lee Green, I would like to see the following principles applied to all new developments so that walking is enabled and encouraged.</p>	4	<p>Further detail on the Councils approach to LTNs can be found on the Councils website.</p> <p>The Local Plan is a strategic policy document. Details of individual road improvements will come forward separately. The Local Plan is underpinned</p> <p>The Local Plan is underpinned by a Transport Assessment and other key documents such as the Councils Transport Strategy and Local Implementation Plan.</p> <p>The Local Plan sets out a clear policy on Parking which is aligned with the London plan. All proposals will be car-free or car-lite.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital. In response to the consultation the Council has prepared additional evidence on Tall Buildings.</p>	No change.

	<ul style="list-style-type: none"> ● Gear Change and LTN 1/20 include bicycles as vehicles and that cyclists and pedestrians should not share the same spaces – this new guidance should apply to all shared public and private realm. ● Maintain at least 60mm kerbs to separate pedestrians from vehicles (including bicycles) with white painted tops. This not only re-enforces safe separation but also helps children, people with vision impairment and dogs to identify the kerb edge. ● Developments should be permeable for people walking – this means increased permeability so that residents are facilitated in walking in any direction from development. ● Minimise the amount of hard surface and maximise natural, planted areas in order to reduce rainwater runoff into the wastewater system. ● Place all residential parking to the edges so that if private vehicle ownership declines then that space can be re-purposed as green space. ● "Easy to live in and difficult to drive in" should be adopted by the designers - or "better for people and better for the planet". ● Residential and commercial waste should not be stored on the footway at any time. ● Designers should read and understand the Create Streetsdocument "The bin-lorry effect" and reduce the amount of space given over to service functions. Lighting columns should be placed so the footway maintains comfortable widths for people walking. ● Service boxes should not be located on the footway. ● Footways on new developments should be wide enough to allow two people to walk alongside each other, wheelchair users and buggies to pass and for people to comfortably pause and linger without feeling as though they are obstructing others. ● Each off-street motor vehicle parking space must have electric- vehicle charging functionality (the current plan is for a rather poor 20%). <p>Action on Cycling</p> <p>Lewisham’s record on safe cycling is particularly poor and this needs to change urgently.</p> <ul style="list-style-type: none"> ● Segregated cycle lanes should be installed on all main roads under both TfL and Council control. All new developments along corridors such as the A21, A20, A205 and A2212 should have strategic planning conditions required by S106 or CIL contributions from developers to provide funding for the necessary infrastructure to meet Council Transport and Cycle Strategies. ● Cycling infrastructure should be fully integrated with the public transport network. There should be safe cycling routes to and from all train and tube stations. This should be designed in line with TfL Cycling Action Plan requirements, meeting or exceeding London Cycle Design Standards. ● Adequate, secure bike racks should be installed at every station, high street, residential development and school exceeding current London Plan requirements. 			
--	---	--	--	--

	<ul style="list-style-type: none"> ● The Plan should incorporate the recommendation of the London Cycling Campaign’s Climate Safe Streets report. <p>Action on Green Space</p> <p>The Plan identifies the importance of green space for health and wellbeing. I agree that access to nature and shared open space should be a priority for this Plan.</p> <ul style="list-style-type: none"> ● New green space should be a mandatory requirement for any new development. The redevelopment of the Kidbrooke estate is a good example of how green space can significantly enhance new residential areas. ● The Council should consider re-wilding of existing green space and rivers to enhance biodiversity. ● Community applications for street tree planting should be prioritised over car parking. <p>Action on Housing and the Built Environment.</p> <p>Buildings contribute half of all carbon emissions in Lewisham, the vast majority it from the existing building stock, yet the Plan is largely silent on this issue.</p> <ul style="list-style-type: none"> ● The Plan should set mandatory targets for social and affordable housing (as well as identify the current baseline levels). ● There should be a much greater focus on upgrading the existing building stock to improve energy efficiency and more to low- carbon heating and electricity. ● Planning policies should encourage on-site renewable heat and energy generation, such as rooftop solar and ground and air-sourced heat pumps. ● The same requirements for zero- carbon buildings should apply to extensions as to new buildings. ● Commercial developments should have mandatory space for community-focused and not for profit organisations. Priority should be given to cooperatives and environmentally-focused organisations. <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>Large increases in housing need corresponding increases in infrastructure. This does not look forthcoming in the Plan. Lee Green is not currently allocated any money from Lewisham council’s major infrastructure spending pot. Other wards are. Lee Green also receives the lowest amount of all Lewisham’s wards from the much smaller ‘community’ infrastructure pot. Galliard Homes proposals for Leegate have over 450 housing units; more units than the Leybridge Estate behind Leegate has. When the Leybridge Estate was built Brindishe Lee was built to educate its children. If the Sainsburys and BMW garage sites are developed to similar density as Galliards proposed Leegate plans, demand for local infrastructure will be tripled. We need drastic improvements in our roads and pavements to support this large increase in population, segregated cycle lanes to allow for active travel and wider pavements</p>			
--	--	--	--	--

		<p>with on-pavement parking banned. We need a better train service and more buses or trams connecting Lee Green with Lewisham, Greenwich and Eltham.</p> <p>The London Plan states that tall buildings should only be built in places with transport links and other infrastructure that can support them. Lewisham has looked at it's evidence and it appears you have explicitly excluded Lee Green from your Tall Building opportunity areas in the Plan. This must be addressed. Galliard Homes are proposing building up to 15 storeys high, exceeding maximum existing local height by 37%. This is against the wishes of the community as expressed in the Lee Neighbourhood Plan which has been widely consulted on. This may set a precedent for developers wanting to redevelop the Sainsburys and BMW sites, who would think they could also exceed existing local height by 37%. Cumulatively, this will increase height in Lee Green considerably. The height of the buildings should be in line with the agreed height in the existing Lee Neighbourhood plan. Additionally, the infrastructure needs to be vastly upgraded to manage such a huge increase in population.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>Leegate Shopping Centre Sainsbury's Lee Green Land at Lee High Rd and Lee Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>The London Plan states that tall buildings should only be built in places with transport links and other infrastructure that can support them. Galliard Homes are proposing building up to 15 storeys high, exceeding maximum existing local height by 37%. This is against the wishes of the community as expressed in the Lee Neighbourhood Plan which has been widely consulted on. This may set a precedent for developers wanting to redevelop the Sainsburys and BMW sites, who would think they could also exceed existing local height by 37%. Cumulatively, this will increase height in Lee Green considerably. The height of the buildings should be in line with the agreed height in the existing Lee Neighbourhood plan. Additionally, the infrastructure needs to be vastly upgraded to manage such a huge increase in population.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Lower rise buildings AND a speedy improvement in infrastructure (cycling and walking in particular)</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision?</p> <p>Vision leads us into the hands of developers.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>Lets make Lewisham a genuinely cultural and creative hub not an overbuilt centre like Croydon and all the troubles that, that has brought.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LEA2: Lee Green district centre and surrounds</p>	3	<p>The Local Plan has clear policies on protecting and enhancing the boroughs cultural institutions and creative industries.</p> <p>The Local Plan also has a strong policy on affordable workspace.</p> <p>Much of the remaining comments relates to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation.</p>	No change.

		<p>4. Please provide your comments on the topic(s) selected above? "The network of green infrastructure within the East Area and its surrounds, including outside of the Borough, contributes to the area's distinctive character and environmental qualities. Development proposals should contribute to protecting and enhancing this network of green infrastructure, including</p> <p>by integrating greening measures that establish new linkages and greater continuity between green and other open spaces, in line with Policy LEA4 (Linear network of green infrastructure)." How does the proposed Sainsbury's and Leegate support this ?</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre Sainsbury's Lee Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. Building excessive flats in an area designed for family housing will ruin the attractive, family and community based culture of Lee Green and Hither Green. There is no justification for a 44% increase in accommodation at Leegate and a 15 story building that will change the historical and cultural importance of the area. In addition they will place an unacceptable burden on already oversubscribed resources, schools health services and amenities. Lewisham should not be influenced by the the false rewards of the Neighbourhood Community Infrastructure Levy (NCIL) grant as this is trivial compared to the amounts that developers such as Galliard make.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Leegate and the surrounding area of Hither Green are beginning to develop a rich and varied independent based shopping, alternative services and creative resources that attract and reflect the existing residents. Any new development should support these offering affordable studios and workshops. These areas are what attract people to build and sustain living locally mass high density accommodation was tried before in Leegate please learn from that disaster and not replicate it.</p>		Residents will have the opportunity to express their views on the scheme through the Development Management process.	
3	LEA	<p>1. Do you have any comments on the proposed vision? I do not feel comfortable with any thing more than a 4 story development on these sites. The density of living and lack of infrastructure (schools, hospitals etc) is deeply concerning.</p> <p>2. Do you have any comments on the proposed key objectives? They should be significantly downsized with investment alternatively in more schools and social services for the current Lewisham residents and a small increase of new residents at these sites</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above?</p>	3	With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.	No change.

		<p>The proposals do not reflect the community or consider the infrastructure demands of an increased population in Lewisham.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? Yes I like the vision</p> <p>2. Do you have any comments on the proposed key objectives? Yes I like these</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? I really like this approach, all the principles seem to me to be very sound. I am especially disturbed by the decline of the Leegate in the hand of the previous Landlord, and the opportunity for the new redevelopment under a new owner is great.</p> <p>I really like the opportunity for a new vibrant Leegate commercial, service and creative centre, and the obvious support and enthusiasm this i think could get from the local community. I have lived in the area for 30 years, when we first moved the Leegate was a brilliant place to go. That it has been allowed to decay in such a way is a terrible indictment of the previous landlord. Putting this right will be a major achievement.</p> <p>That said I am now very concerned about what may be allowed under the 'intensification of sites' without reference to the surrounding character of the area. Specifically with reference to the Leegate, to put between 450 and 630 new residential units on that space with vibrant commercial, arts, creative, services with enhanced public realm seems very ambitious. The 'accepted' working solution appears to be to go up. A 15 storey residential block is surely much too tall for the area, and seems to go against national government guidance which reigns back tall developments . It also appears that this 'intensification' builds on tacit uncritical acceptance of previous terrible redevelopments - Leegate and Sainsburys, and does not take into account the scale and character of the surrounding area.</p> <p>Furthermore I am extremely concerned by levels of traffic and pollution at the Tiger's Head junction. This seems to me to be a major challenge to be overcome before significant residential blocks are put anywhere near Burnt Ash Road and Eltham Road. It's simply unfair to the new residents, in whichever economic</p>	0	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. 		<p>community. Developers riding roughshod and stripping such valuable community assets for the benefit of their own interests is so wrong.</p> <p>I have commented here about the Leigate. However, these principles apply for future developments of Sainsburys and the BMW garage site.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Yes. It is incredibly important that this is done with a good transparent and fair process. We are in difficult times, where many people are off balance, now more than ever lets have a good process that enables good consultation and as much as possible win - win options.</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? judging by the horrible assing of plans on Blackheath Hill the Planning Committe has already decided what they want.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA4: Linear network of green infrastructure</p> <p>4. Please provide your comments on the topic(s) selected above? A new Lewisham Park ..no building</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Blackheath Hill LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. The Chair of planning has already voted for mmature tree removal and another tower block on the industrial land off Black Heath Hill. So diabled tenents next door get a brick wall replacing alive. mature nourishing trees and wildlife, the bee business is snookered and there is yet more removal of units for the development of small business units for what...tower blocks, concrete, loss of light, higher CO dioxide... NO SOUL</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	0	This response seems to relate to a planning application for Blackheath Hill. Please refer to the committee decision on the reasons for its approval.	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p>	1	As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.	No change.

		<p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. There does not seem to be anything that acknowledges the need for infrastructure to support such a large number of new homes on the Leegate site: this number of new homes impacts upon transport capacity for buses, train and road, and is there enough capacity at local schools for this? Furthermore, I am unhappy about the proposed height of the buildings at Leegate - I am not happy for this introduction of high rise properties to set any kind of precedent for this to be the norm. The high rise nature of Lewisham town centre is awful, and has not turned out as was originally proposed .</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? Full of nice words, light on detail. And where there is detail it seems to belie the stated aims.</p> <p>2. Do you have any comments on the proposed key objectives? There already seems to be a disconnect between the nice words and the proposals for the area in the current plans for the Leegate Centre.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? The existing proposals are completely out of scale with the current area. The Leegate proposals now seem to include plans for 600+ dwellings rather than the, already out of scale, 450 that are in the published Local Plan. Where is the infrastructure to support this many households going to be situated, schools and GPs just to start with ?</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre Sainsbury's Lee Green Land at Lee High Rd and Lee Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. The Leybridge blocks are part of an earlier town planners' enthusiasm. But are well spaced out and set back from the road. The Leegate proposals are a huge clump of closely spaced tower blocks that will totally dominate the surrounding area. They have taken the Leybridge 'marker' of 11 floors and added nearly 50% (15 floors). Will the development of Sainsburys and the Land at Lee High Road also take the local</p>	2	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p>	No change.

		<p>'marker' and add 50%. So will the Land at Lee High Road be able to justify 22 floors (15 + 7), and then the Sainsbury site go to 33 floors (22 +11) ?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Where are the improvements to the public realm and green spaces going to come from if you build on any space bigger than a postage stamp ?</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? The vision is fine, but the level of growth at Lee Green should be very carefully considered. A local centre is not a district centre and over development of Leegate will be detrimental to the neighbourhood.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? The Council should establish maximum building heights and housing density and commercial provision for the three redevelopment sites, especially Leegate, and agree what associated communit infrastructure is required. These principles should be incorporated into a Lee Green SPD asap. I fear it is already too late given the existing consents for Leegate.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre Sainsbury's Lee Green Land at Lee High Rd and Lee Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. The East Area draft Plan suggests the development capacity of Leegate is c450 homes, already a high numbers. It now seems that Galliard Homes are seeking permission for up to 630 homes, 33% more. Lewisham need to establish proper parameters for an appropriate scale of development for all sites to ensure the quality and size of the new homes is in accordance with the high quality design it seeks on these new developments.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? All three sites should be required to included retail and commercial space at the ground floor in order to encourage active frontages on this busy pedestrian intersection. Despite the impact of COVD on retail, it is important that Lee Green remains, and is encouraged to be an improved local retail centre. The addition of residential units on the three sites will mean that shops will be more viable and local residents, as now, will walk from Blackheath and Manor House to use them. Loss of shops and any food retail would mean increased driving to supermarkets causing</p>	2	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	<p>No change.</p>

		more congestion. Lewisham should ensure appropriate local retail and commercial provision at Lee Green is retained in the Plan.			
3	LEA	<p>1. Do you have any comments on the proposed vision? Forgive me, but the vision for Leegate Shopping Centre cannot be described as merely 'redevelopment'. The 'vision' actually consists of high-rise, high-density housing on a massive scale - that's what I see in the actual plans. If building 'up to 630' new homes is part of the vision - or even, frankly, say 200 new homes, it is more of a nightmare than a vision. Just go to downtown Lewisham to see the hideousness that would result.</p> <p>2. Do you have any comments on the proposed key objectives? This is just waffle. All this material contains huge quantities of waffle, presumably there to camouflage bad proposals.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? The latest proposals for replacing the Leegate Centre seem to be far worse than earlier ones. It seems to be all concrete and no space, totally out of character with the surrounding area. Has it occurred to anyone to actually reinstate a green at Lee Green?</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. The latest proposals from Galliard Homes are appalling. It looks like a mini Canary Wharf. The cynicism is breathtaking.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Earlier proposals for the Leegate redevelopment were much more acceptable.</p>	4	This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change
3	LEA	<p>1. Do you have any comments on the proposed vision? The proposal to regenerate the LeeGate centre is fantastic as its an eyesore.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? The Galliard homes development has too many houses! You can't fit another 630 homes in to the area when the infrastructure is already broken. There will have to be new dr surgeries along with schools created. Lee / Hither Green stations can't cope with the current amount of commuters (pre Covid) so there's no way another 630 homes will help that.</p>	0	This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change.

		<p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate shopping centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. I am so pleased you are finally going to grant planning permission to fix this eyesore. Please don't back down because of minority local groups thinking they know best. The area has been run in to the ground in the time people have been arguing about it.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? I object to the height of the development. I believe it should be low rise i.e 8-10 stories to stay in keeping with the local area. Please consider adding an area for cafe culture and restaurants</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? Agree with vision in principle and particularly support improved permeability for pedestrians/ cyclists. Too many current sites (eg Sainsbury's, chiltonian) are only accessible from one or two directions and with a bit more thought and planning could be much easier to access.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds LEA4: Linear network of green infrastructure</p> <p>4. Please provide your comments on the topic(s) selected above? Strongly support green corridor idea and better access to the Quaggy.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Sainsbury's Lee Green Leegate Shopping Centre Land at Lee High Rd and Lee Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. Agree with permeability proposals. I would like to see height restrictions to about 5 storeys on the Sainsbury's Leegate and Lee high road sites. More in keeping with existing historic buildings.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	4	<p>Support noted regarding vision.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p>	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision? limit the height of the developments - it is a bit ironic that there are so many constraints for houses with a large part of this territory being conservation areas</p>	3	Tall building policy amended in response to additional evidence base.	The Local Plan is underpinned by a Transport Assessment and other key documents such as the Councils

		<p>when those developments can pretty much do what they want. Allow at the same time garages in conservation areas to be transformed into granny houses as there is a real demand and not enough care homes.</p> <p>2. Do you have any comments on the proposed key objectives? they are very good - This part of London is a jewel and should not be ruined by developments that will destroy its appearance, greenness and the local community spirit that goes beyond the Lee/Blackheath separation or Greenwich/Lewisham boroughs separation, which is a big success.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Sainsbury's Lee Green Leegate Shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. Height should be limited to 6 floors. Buildings should have a bike garage each and bike roads and trees promoted to try to get families without cars or limit their use, with also a nursery and small primary school within the building. A look and feel like the Riverstone School on Eltham Road would be even better.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Traffic jams - Without adding a tunnel under the crossing I cannot see how this would work. Or there must be something to force the Lee High road users & vans to take the A205. Lack of bike pathways in the whole area and lack of child-safe crossings on Lee High Road between Lee Green and Blackheath Improve the security and the look and feel of the Hither Green station (adding an environmentally-friendly glass bridge for example to exit the station directly from the station platform to the Fernbrook road)</p>		<p>The Local Plan supports the London Plan target of ensuring that 90% of all trips in London are made by sustainable modes of transport.</p> <p>All development within Lee Green will be car-free or car-lite in accordance with the London Plan parking standards.</p>	<p>Transport Strategy and Local Implementation Plan.</p>
3	LEA	<p>1. Do you have any comments on the proposed vision? Any developments must fit with the character of the area and avoid the excessive over-building of architecturally dubious blocks of flats that have rendered The area around Lewisham station hideous.</p> <p>2. Do you have any comments on the proposed key objectives? The character of local areas should be maintained and nothing should happen with out proper consultation with residents living in those areas.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p>	3	<p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>In response to the consultation the Council has prepared additional evidence on Tall Buildings.</p>	<p>Tall building policy amended in response to additional evidence base.</p>

		<p>4. Please provide your comments on the topic(s) selected above? The council must resist building excessive residential provision without strengthening the infrastructure that supports those extra residences. Rather than building blocks of flats the council should focus on building family homes.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre Sainsbury's Lee Green Land at Lee High Rd and Lee Rd Mayfields Hostel, Burnt Ash Hill</p> <p>6. Please provide your comments on the site allocation(s) selected above. Care should be taken with any planning applications for these sites so that they are not over-built with more residences than the local area can sustain. Consideration should only be given to projects that add architecturally worthy buildings that add to the streetscape rather than buildings which emulate those that have been built round Lewisham station. Family homes should be prioritised over and above blocks of flats or high density housing.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Electric vehicle infrastructure should be strengthened and residents encouraged to make the change to battery powered vehicles.</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? I understand that new properties have to be constantly be built to meet the demand for new homes however I am deeply concerned about the additional density in an already built up area with no plans/conditions for additional infrastructure, schools, med facilities, traffic management, parking, road infrastructure etc. To be implemented alongside. The sites highlighted as suitable for additional homes could add considerable demands on an already overstretched community. We do not have sufficient space in existing schools to cater for more children. Already it is difficult to get into a school in your immediate vicinity. Equally doctors are overstretched. Our roads are congested and there is little parking. If we are to add to the housing stock all of this needs to be addressed within the local plan and within any planning applications.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre</p>	3	<p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>In response to the consultation the Council has prepared additional evidence on Tall Buildings.</p>	Tall building policy amended in response to additional evidence base.

		<p>Sainsbury's Lee Green Land at Lee High Rd and Lee Rd Southbrook Mews Travis Perkins and Citroen garage</p> <p>6. Please provide your comments on the site allocation(s) selected above. As above plus - Leegate should remain as mixed use (housing/retail/community) to ensure it can fulfill it's original purpose as a town centre destination. It should not be turned just into with additional housing as this will mean the area loses a focus and town centre - and then just becomes residential with a supermarket totally changing the character of the area. To this end I strongly object to anything being built over the height of the current tallest buildings ie Leybridge estate directly behind Leegate. Nothing should be taller than current buildings. This height should be the maximum to maintain the current town centre feel and not turn the area into a new high rise centre which will overshadow the current surroundings. Leegate development should be a mix of heights with the height of Leybridge being the maximum. If the other areas are developed I believe that the heights should actually be lower - maybe max 5 stories to fit in with the surrounding and neighbouring houses and not overshadow them.5 stories will already do this so I believe the height for these areas should be included and restricted in the local plan. I also believe that if those areas are developed then they should have a mix use - residential above retail - to increase the interest and potential of the area for small businesses. With regard to the Sainsbury's site I think it should be stipulated that this area must include a supermarket regardless of what other development takes place at the site .</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? I am worried that Leegate does not have a maximum height included in its site allocation. I would all the site allocations to include an actual number of maximum stories.</p> <p>I am also worried that there is no mention of building to human scale, with generous public realm, set backs and articulations to reduce any sense of scale. I would like all these details spelled out in policies and site allocations</p> <p>Here is the kind of text I would like to see included (taken from Houslow's Great Western Corridor Masterplan and Capacity Study 2019)</p> <p>' 'Where the height differential between areas with different height approaches is more than two storeys, the abrupt change in height creates an imbalance and breaks the coherence of the urban fabric''. "Higher development may feel domineering and undermine the integrity of buildings with lower height".</p> <p>"Generally heights should overcome strong height differentials through the stepping down of development at the interface with public realm". "Buildings may have one or two set-back storeys behind the main frontage. Due to their limited visibility from the street space set-back storeys have little impact on the perceived building height or enclosure of the street space". "The approach is to promote mid-rise buildings rather than very tall buildings, as they will be better able to avoid or limit harm to heritage assets". "There will be occasions where a tall or bulky development of a certain scale is simply unacceptable due to the potentially destructive effects on the</p>	4	<p>In response to the consultation the Council has prepared additional evidence on Tall Buildings.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	Tall building policy amended in response to additional evidence base.

		<p>setting of heritage assets". "The higher a building, the greater will be its propensity for harm, fuelled by developer ambition rather than any genuine pressing economic, regenerative or environmental driver".</p> <p>I would also like to see this kind of wording from Historic England's Tall Building guidance included in Lewisham's Local Plan "There will be some locations where the existing qualities of a place are so distinctive or sensitive that new tall buildings will cause harm regardless of the perceived quality of the design" and that "conservation area appraisals identify areas of increased sensitivity to tall buildings"</p> <p>2. Do you have any comments on the proposed key objectives? I am worried that Lewisham has no infrastructure levy planned spending in Lee Green yet has site allocations that will bring around 2,000 new homes to the area. I would the plan to clearly spell out where and how increased infrastructure will be brought about</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Developers are required by planning policy to design height, mass, scale, detailed design (including materials) and public realm appropriately in response to local context. Lee Green has significant heritage assets and average transport links. Lewisham has excluded Lee Green from its Tall Building opportunity areas in its draft Local Plan. No buildings in Lee Green should therefore be taller than the 11 storey Leybridge. Moreover, the Leybridge Estate is set back from public realm with plenty of space between the towers. So too should any proposed taller buildings be. Building must be on a Human Scale with generous and contextual public realm, setbacks, articulation and materials that reduce the impression of scale Green.</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p>	5	<p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>All development within Lee Green will be car-free or car-lite in accordance with the London Plan parking standards.</p>	No change.

		<p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Agree in principal with regenerating the area and creating new homes but this needs to be strategically planned and big questions considered. How will we be living 20 years from now? Currently demand for green space, houses with gardens and local amenities are high as people are working from home more.</p> <p>The climate emergency is much bigger than the Covid-19 pandemic and carrying on as we are is not sustainable. Any changes to Leegate need to take these factors on board. Any new dwellings need to be eco friendly and use renewable energy. They need to be places where people want to live - probably houses or low rise flats with gardens.</p> <p>Sainsbury's is a good sized store, not too big nor too small. The small, friendly businesses sprouting up are also good. The New Tiger's Head grocery store is superb. These serve the community well and attract people from further afield. What is missing is more green space and (CO2 emission mitigating) trees for people to enjoy. This could easily be factored in when designing new homes on Leegate.</p> <p>Please don't build high density, high rise units and open a superstore. This is unsustainable and, logistically, could not be supported by Lee Green. Ask yourself, who would want to live in a high rise block on the Lee Green junction where air and noise pollution is pretty appauling? This is not kind to people desperate to find somewhere nice to live.</p> <p>Finally, consider the traffic problems. Any amendments to Lee Green will have traffic implications. The area already struggles with high traffic and this needs to be carefully considered. How do we optimise our limited space? Do we want new homes for people or car parks?</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? The proposed development is disproportionate for the area. Obviously Leegate needs improvement but this development is too big, too high and will negatively impact the area in terms of traffic which is already bad and not being addressed by</p>	2	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>All development within Lee Green will be car-free or car-lite in accordance with the London Plan parking standards.</p>	No change.

		<p>LBC. The plans for Leegate appear to be depressingly similar to the high rise development of central Lewisham which I think have been a wasted opportunity. Are flats even the right solution for the community?a smaller development of houses with great spaces for small business to thrive would be more appropriate. Lee Sainsbury's is a vital supermarket for the area which allows people to shop locally without driving.....any threat to this would be appalling and again in sharp contradiction to LBC aims to drive down car use. Any plans need to also factor in the negative impact on these areas of the LTNs which has concentrated traffic and pollution in these roads.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre Sainsbury's Lee Green Land at Lee High Road and Lee Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. This is an over development of an already busy area. These roads are already clogged with traffic and recent LTNs have made this much worse. The addition of a large number of homes will ruin the area. Given LBC are anti car will these new homes be built without car parking space? If built with car parking space then this is completely out of line with your environmental goals.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Too many residential units. Buildings are too high and not aligned with the character of the area. What provision is being made to increase public transport, schools, doctors etc etc in line with this large population increase?</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? Leegate redevelopment should not be too large. There isn't sufficient infrastructure to support it</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	2	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	<p>No change.</p>

		<p>I have seen a plan with 450 new residences at Leegate. Far too high, far too large. The area simply won't be able to accommodate that many new people, not enough supporting infrastructure</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Redevelop Leegate but in a controlled and sensible manne</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate Shopping Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. Leegate will be a test of the ambitions to preserve heritage, good design reflecting the local character, greening, improving air quality, taller buildings meaning only 1-2 storeys higher than surrounding buildings. I hope these ambitions are honoured.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	2	Any proposals submitted for planning will be assessed against relevant planning policies.	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision? I am neutral about this as we have had this "vision" discussed for so long and still nothing has happened to improve Leegate, so why should I think it is going to happen this time? If you want these areas - Grove Park, Lee, Blackheath Village to be welcoming and for the local shops to thrive, there must be provision for the parking of cars. No everyone can cycle walk or use public transport. LTNs are hindering this "vision".</p> <p>2. Do you have any comments on the proposed key objectives? The green spaces definitely need to be preserved with better access for everyone. The opening up of the River Quaggy will need support from neighbouring Greenwich. The South Circular and Lee High Road will never be "healthy streets" as they are the main way in and out of Catford & Lewisham.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below Lea2: Lee Green district centre and surrounds LEA4: Linear network of green infrastructure</p>	1	<p>The Local Plan has to be in broad conformity with the London Plan which sets a target for 90% of trips in the Capital to be by sustainable modes. The draft Local Plan policies support the aspiration of reducing car use where ever possible including supporting Healthy Streets and reducing carparking.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>In response to the consultation the Council has prepared additional evidence on Tall Buildings.</p>	Tall building policy amended in response to additional evidence base.

		<p>4. Please provide your comments on the topic(s) selected above? All the sites are at a cross roads junction and any development should not be higher than 5 storeys to keep the height of the new buildings in line with the old buildings ie Old & New Tiger Head pubs, the police station which is now flats and the fire station on Eltham Road.</p> <p>This should be accessible to everyone with good signage cafe & public toilets.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Leegate shopping centre Sainsbury's Lee Green Land at Lee High Road and Lee Rd Mayfields Hostel, Burnt Ash Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. This needs to be developed so new business' want to come. There needs to be public space preferably in the locations that have sunshine; the 3 London Plane trees must NOT be destroyed. There needs to be parking for shoppers and 450 new flats/houses are too many for this site as another high rise should NOT be built and any residents will need parking allocated. The Community Centre should be part of this development and be on the ground floor.</p> <p>Why is this being redeveloped for more housing, when Sainsbury's is the only supermarket in the area now that Iceland has gone from Leegate Shopping Centre. Don't waste money developing a site that serves the community well.</p> <p>Any development should include access to the River Quaggy, and any new buildings should be kept to the height and design of the existing terrace, including the kept which should be retained.</p> <p>What happened to the plan for this site that were discussed at the Lee Green Assembly back in 2018? The new buildings should not be more than 5 storeys high so they do not overshadow the church.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? There should be a direct bus route to Greenwich.</p>		<p>With regard to the Sainsburys site the London Plan directs Local Authorities to allocate surface car parks and single storey retail for redevelopment in order to make best use of land. The indicative capacities for the site make provision for the Sainsburys to be reprovided on site.</p>	
3	LEA	<p>1. Do you have any comments on the proposed vision? I am very pleased to see that you want to improve cycle networks, but these must be permanent fully connected and segregated cycle lanes. Painted lines will not keep cyclists safe and will not result in beginner or family cycle uptake. Areas need to be connect by SAFE cycle routes in order to encourage cyclist who do not fall in the advanced category. We need to move away from vehicle travel for the able, so this needs to be more than a gesture. Funding needs to go in to providing something of substance for cyclists.</p> <p>2. Do you have any comments on the proposed key objectives? All of the mention of cycle routes is fantastic, but they need to provide safety away from cars. There is no mention of the route designs or structure.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p>	2	<p>The Local Plan is a strategic policy document. Proposals for cycle routes are beyond its remit. We will pass your comments onto our Transport team.</p>	No change.

		<p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. For every 1 mature street tree you have cut down in the last 5 years, you need to plant 5 to replace them.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Sainsbury's Lee Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. The Sainsbury's Lee Green allocation should be amended to require the re-provision of a large food store of at least 2,000 sq.m gross suitable for main and bulk food shopping. The existing store provides an invaluable facility that must be replaced with an appropriate alternative. The loss of this vital facility will result in more/longer car borne shopping trips from the Lee Green area to food stores further afield. This will increase traffic congestion and air pollution.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	2	The indicative site capacities makes provision for Sainsburys to be reprovided on the site.	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p>	5	The indicative site capacities makes provision for Sainsburys to be reprovided on the site.	No change.

		<p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Sainsbury's Lee Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. Reading between the lines, it seems there's consideration to getting rid of the Sainsbury's in Lee Green for mixed use development. This is the only supermarket in the local area, and a considerably long way from any other in terms of travel time. Has there been any consultation with local residents on this? I would be surprised if even 1 person said this supermarket isn't needed.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? It lacks of detail and just talks about same old, safe claims....</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA3: Strategic Area for Regen, Grove Park</p> <p>4. Please provide your comments on the topic(s) selected above? I'd like you to commit to ensuring Grove Park supports local community and also helps to tackle poverty in the area. I am most certain that one of the main things to look at which would help achieve the above goals is to consider what role in community and how it supports the residents businesses such as Coral betting shop and way too many unhealthy fast food shops in such a small area of Grove Park station junction. Also, very important to keep the grade listed Baring Hall Hotel as a pub or similar social venue.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Sainsbury's / Land west of Grove Park Station</p> <p>6. Please provide your comments on the site allocation(s) selected above. It would be interesting to consider if Grove Park really needs two local stores of the main supermarkets as well as numerous off-licence shops. Also, care should be taken of dormant businesses such as a Polish shop on Downham Way side of the junction. The shop has been closed for several years now with shatters down. It adds to the grim look of the Grove Park station area and doesn't serve any purpose to the community.</p>	2	<p>The Local Plan is a strategic Policy document and has to be proportionate in terms of detail.</p> <p>The Local Plan has policies to control the proportion of fast food takeaways and betting shops within any centre. Please see policy EC17 Concentration of Uses</p>	No change.

		<p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? In the summary document items, 2 and 10 are exactly the same!</p> <p>I would also suggest planting more trees or plants, especially in built-up areas.</p> <p>Blackheath Village can benefit from attracting more visitors with arts and literary festivals or routine markets around the All Saints Church for example.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LEA1: East Area place principles LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? It would be a great shame to replace Leegate Shopping Centre with copycat highrise development stuck on top of a supermarket. What we need is somewhere that will provide housing but also give the opportunity for the independent local businesses to thrive.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>	4	With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision? Disappointing lack of detail on Blackheath Village and options for pedestrianisation, including removing the unsafe and unnecessary one way system, which puts cars first with little space for pedestrians and cyclists.</p> <p>2. Do you have any comments on the proposed key objectives? Absence of detail on Blackheath village, one of the Boroughs most popular tourist destination. I hope this is an oversight and not because Blackheath village sits on the boundary of the borough.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p>	3	The Local Plan is a strategic policy document. The plan has introduced a more granular approach with policies and spatial strategy for each sub area. It is not possible to have detailed strategies for each neighbourhood within the borough. This could be pursued through the Neighbourhood Planning process.	No change.

		<p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
Lewisham East Area		<p>1. Do you have any comments on the proposed vision? Following the implementation of the LTN the Grove Park Ward has suffered disproportionately through the displaced traffic, turning a significant number of roads into new rat runs. Therefore, any improvement plans will be set against the problems residents face in getting around their immediate area and will not use the proposed improvements, such as Lee Green as you simply can't get there !!</p> <p>2. Do you have any comments on the proposed key objectives? The objectives are supported, but Lewisham's ability to implement these is questionable, given how the LTN has been handled with what appears to be a total lack of understanding if the plans/proposals don't work. If they adopt the same attitude it will simply be a nightmare if they don't listen and react residents concerns either during or once implemented</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA3: Strategic Area for Regen, Grove Park</p> <p>4. Please provide your comments on the topic(s) selected above? The Grove Park Ward suffers from a high level of commuter traffic and unless that is addressed and at the heart of any proposal, everything implemented will not serve the residents as they simply can't take advantage of it or move around the ward freely in a safe and pleasant way</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N//A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	1	<p>The Councils latest position on LTNs can be found on the Councils website.</p> <p>The Local Plan sets out a number of policies to reduce traffic within the borough and take a healthy street approach to routes within the borough.</p>	No change.

		Measures to address commuter traffic existing the A2 and A20 across the Grove Park Ward would bring immediate benefits open up the green spaces and increase use of local amenities			
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LEA3: Strategic Area for Regen, Grove Park LEA4: Linear network of green infrastructure LEA5: East Lewisham Links LEA2: Lee Green district centre and surrounds</p> <p>4. Please provide your comments on the topic(s) selected above? Good, but does not go far enough. No mention of the value of the Quaggy river that runs through this area and is an important green corridor. I'd like to see improvements to the green chain walk which is really uninviting - particularly where it crosses the railway into Downham. Traffic calming on Baring Road and Burnt Ash Hill has not worked and more is needed to slow traffic and separate cyclists from traffic. A dedicated cycle way on this route would have benefit of narrowing the road and slowing traffic. More should be done to open up the green corridor alongside the railway line between Grove Park station and the South Circular for walking, cycling. Are by bus station and garage in Gove Park needs wholesale greening. I would also like to see footpath in front of the shops opposite Grove Park station closed and diverted along the shop fronts. This would be safer as traffic pulling into and out of the parking has seen lots of near misses and the old path could be planted to improve air quality. The large open space on corner of Chinbrook road and Baring road should also have raised bedding added to improve the environment and improve pedestrian safety and isolation from road traffic.</p> <p>Regarding Lee Green regeneration. The main traffic junction here is dangerous for all users and needs major redesigning. A solution must be found for Lee Gate which produces a genuine community hub but also provides extensive greening to reduce impacts of pollution.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	3	<p>Noted</p> <p>The Local Plan is underpinned by the Parks and Open Space strategy that outlines a series of improvements to the borough's green infrastructure. We will pass your comments on to our Parks team.</p>	Reference to Quaggy river included throughout the plan.
3	LEA	<p>1. Do you have any comments on the proposed vision? Who would want to come here if you can't drive and park. Not everybody can cycle or walk</p>	1	Lewisham has declared a climate emergency and is committed to reducing private vehicular traffic to reduce carbon emissions and improve air quality.	No change.

		<p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LEA	<p>1. Do you have any comments on the proposed vision? Healthy Neighbourhoods in all areas should be a priority, to ensure safe and healthy passage to school for all children, less polluted residential areas, more options for exercising with safe cycling and walking routes for all ages. Smaller residential roads not built for the volumes of cut-through traffic, and larger main roads still requiring traffic reduction measures.</p> <p>2. Do you have any comments on the proposed key objectives? The Leegate centre is in desperate need of development to make it a more desirable and usable shopping destination and area for community facilities.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	7	The Local Plan sets out strong policies on Health Streets in accordance with TFL guidance.	No change.
3	LEA	<p>1. Do you have any comments on the proposed vision? N/A</p>	4	The Local Plan is a strategic policy document underpinned by evidence such as the Transport	No change.

		<p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Concerning improving the road network. Please can you put more effort into enforcing the existing 20mph limit, how many fines have been issued? As far as I can tell more drivers ignore the limit than observe it. Please can you put in more table style speed humps like there are on Burnt Ash Hill on Lee Road. Also to make life easier for pedestrians remove the on pavement parking on Lee Rd and replace it with on street parking. In Blackheath Village take steps to limit through traffic. At well know bottlenecks , where traffic queues, ensure that regualtions are in place to prohibit standing with idling engines and then enforce strongly.</p>		Strategy and Local Implementation Plan. We will pass your comments onto our Transport team.	
3	LEA	<p>1. Do you have any comments on the proposed vision? Just that 2 and 10 are the same</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	1	<p>The Local Plan was underpinned by the Characterisation study 2019. This was prepared in collaboration with our Neighbourhood Forums, Amenity and Heritage societies and other neighbourhood groups. It was then subject to public consultation where anyone could have their say. If there are specific errors in the document then please let us know.</p>	No change.
3	LSA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LS!4: A21 corridor / Bromley Rd</p> <p>4. Please provide your comments on the topic(s) selected above? Concern re claim to create green streets on Bromley Rd - MUF recommended no new housing on Bromley Rd unless back from the road and units had alternative windows to open away from main road</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Downham co-op Beadles Garage</p> <p>6. Please provide your comments on the site allocation(s) selected above. Downham Way Co-op with Downham Tavern The proposal which seems to require demolition of the existing Co-op and Downham Tavern as well as use of the car park for housing for re-provision of the co-op on ground floor with it not being clear what if anything would replace the pub</p>	0	<p>Downham Way Co-op with Downham Tavern – The site allocation has a development requirement - Retention or appropriate re-provision of the public house, in line with Policy EC19 (Public houses).</p> <p>The indicative site capacities make provision for the coop to be reprovided.</p> <p>Beadles Garage – the indicative capacity indicates a small proportion of ground floor town centre uses.</p> <p>Known Sites not included in South Area – There is little in the way of substantial sites (those over 0.25ha) in the South of the borough other than around Lower Sydenham / Bell Green.</p> <p>Other sites can come forward through the development management.</p> <p>We have also prepared a small sites SPD to encourage sensitive intensification of our more suburban areas in the borough including in the south.</p> <p>With other sites we are not including additional site allocations at this stage in the plan process. However</p>	No change.

	<p>has caused the largest response locally and seems to go against the council's own policy to protect and retain pubs.</p> <p>Loss of the co-op for a considerable time would seriously impact on older people, anyone with mobility issues.</p> <p>Beadles Garage</p> <p>In relation to retail on the ground floor. It seems reasonable to have some retail on Bromley Hill that would be useful for locals I,e newsagent/ corner shop/ launderette/ community run unit with launderette/ cafe / advice services ?</p> <p>It seems unnecessary to extend that to Avondale Rd which is exclusively residential. Housing units on the ground floor on Avondale seem preferable.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Known Sites not included in South Area</p> <p>Concerned about absence of a number of housing sites from this Local Plan which are likely to proceed, some on council-owned land whilst a predominance of sites in South area seem to be privately owned sites which may never see any housing development on.</p> <p>Chingley Close, BR1 – Phoenix have told locals that they are in process of putting in planning application (April 2021) yet this development is missing from South Area. If the rumours that LB Bromley are negotiating with LB Lewisham to extend Bromley Hill Cemetery into the dis-used allotments behind Chingley Close are false and the development is continuing can it please be included in the finalised Local Plan.</p> <p>I applaud the development for its high energy-efficiency but have major concerns about Phoenix adopting the 'shared ownership' model for a significant number of units on this site – as Cllr Paul Bell recently commented that they can be a 'license to print money' if unless they can be regulated more tightly. Concern re parking in adjacent roads as not sufficient parking on development and it is not a car-free development.</p> <p>Hildenborough Gardens, BR1 - Phoenix have only recently announced purchasing this site which might explain its absence from Local Plan. Can it be included in the finalised Local Plan. Concerns that with increase in units in Chingley Close and Hildenborough will result in a large increase in vehicles parking in adjacent streets as well as concerns about the increase in road traffic in the very narrow Swiftsden Way which has parking on both sides and the access into Hildenborough gardens being pretty narrow. Hoping that green spaces in the area are not encroached upon.</p> <p>Downham Community Centre (Wesley Halls), Shroffold Rd. plus adjacent empty site (Bankfoot Rd) BR1</p> <p>Cannot understand why these two distinct sites that border each other have been left out of the Local Plan. The Bankfoot site has been empty and ready for development for a number of years now yet has been left undeveloped from what I can understand because it was deemed more viable to develop only in combination with the entire Wesley Hall site. I have heard at previous online meetings for the Local Plan that 'land-banking' was not happening much currently – but this appears</p>		<p>these could be reviewed as part of a Local Plan review in the future.</p>	
--	--	--	--	--

		<p>to be exactly an example of this – leaving a site empty until it becomes more viable (profitable) to develop. It could be housing people from the housing list by now.</p> <p>Leaving the two sites off the Local Plan might lead local people to think that the Wesley Hall site was now safe from demolition – when I first moved to Downham in 2013 I recall the large public outcry and petition to save the halls as the only community facility in the entire Downham ward. The increase in housing with a decrease in community facilities seems very short-sighted and provision of community facilities under housing would dramatically impact the kind of activities that can take place and the days and times that they could take place and therefore are not like for like replacement of a facility. A council officer at one of the recent online meetings for the Local Plan stated that where community facilities were removed for housing that the replacement would be as good as or enhanced.</p> <p>Can Wesley Halls and Bankfoot Rd site please be included in the finalised Local Plan.</p> <p>Baring Hall Hotel</p> <p>As a privately owned site that has put in repeated planning applications it seems that it should feature somewhere in the Local Plan in order to see what the council could or wouldn't consider on this site in future.</p> <p>Can the Baring Hall site please be included in the final Local Plan.</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision? Thank you for providing residents with the opportunity to contribute to the Local Plan. I agree entirely with the Plan's intention to ensure that planning decisions are made in the best interests of neighbourhoods and communities.</p> <p>2. Do you have any comments on the proposed key objectives? See below</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA4: A21 corridor/ Bromley Rd</p> <p>4. Please provide your comments on the topic(s) selected above? See below</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Beadles Garage</p> <p>6. Please provide your comments on the site allocation(s) selected above. Whilst acknowledging that the Beadles Garage Re-development presents a number of opportunities for Lewisham, not least new residential units, based on the existing 'Site Allocation' I have a number of concerns which primarily centre on: A) The likely greater danger at the junction (A21/Avondale Road) itself, where there have been a number of accidents over the years (most recently on the 28 February); B) The likely increase in on-street parking , especially towards the western end of Avondale Road (and which is already used by Beadle's as an effective 'overspill car park');</p>	0	<p>Support for vision noted.</p> <p>It is considered that there is scope for the sensitive intensification of the Beadles Garage site, which the Local Plan supports in order to help meet local needs for housing and commercial floorspace. The indicative development capacity of the site has been established using a standard methodology, as set out in the Site Allocations Background Paper. The actual capacity of the site will be derived through the development management process, where applicants must demonstrate how they will achieve the optimal capacity of the site using the design-led approach, and ensure no significant adverse impact on local amenity, in line with other draft Local Plan policies.</p> <p>The site allocation provides for mixed use development residential, commercial and main town centre uses. The detailed nature of uses within these categories will be established at the planning application stage. Commercial uses in Class E light industrial may be supported subject to amenity/transport considerations, main town centre uses are defined by the NPPF (and broadly include retail, leisure, community and cultural uses). b</p> <p>The Council has consulted statutory consultees on the Local Plan proposals, including Greater London Authority / Transport for London, Metropolitan Police</p>	No change.

		<p>C) The likely increase in traffic on Avondale Road, possibly resulting in more cars exceeding the speed limit and creating additional danger (our road is already a recognised – by the Authorities -speeding 'hotspot')</p> <p>The current Council Notice states that its 'Site Allocation' expectations are that the Beadles Re-development will be for mixed use. It would be helpful if local residents (of both Lewisham and Bromley) could be notified as soon as possible as to the intended actual use of the Site.</p> <p>Whatever the Site's eventual use, parking and traffic considerations must be addressed and improve on the existing situation.</p> <p>It would be helpful to know if the Metropolitan Police and highway authority for the A21 (as a red route and an A road , TfL is the authority) have been approached for their input and, if so, what their feedback has been.</p> <p>I look forward to receiving the Council's response to my and other contributor's feedback into the Consultation/Planning invitation for comments</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>		<p>Service and Bromley Council. Their feedback will be used to inform the Regulation 19 stage document.</p> <p>Speed limits are outside the scope of the Local Plan. However, the plan does advocate for Healthy Streets principles in support of sustainable travel, to reduce vehicular dominance and improve safety. The Plan also recognises that transport assessments must be submitted with applications for major developments.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? I really support the regeneration of the south.</p> <p>Great to see the Council looking at the whole borough.</p> <p>I would just like to see regeneration happen sooner down here.</p> <p>2. Do you have any comments on the proposed key objectives? I support them but would like to see more mention of how Perry Hill fits into it.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below Perry Hill LSA5: South Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above? More focus on Perry Hill as a place. It used be a cute little high street in the 90's/naughties with an independent toy shop and two pubs. But sadly alot of it shops have been lost to ground floor flats and estate agents.</p> <p>Encourage a strong link between Bellingham and Perry Hill.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Perry Hill Tesco</p> <p>6. Please provide your comments on the site allocation(s) selected above. There could be some flats on top of this one storey supermarket. It's only short bus ride/cycle into Catford or Beckenham.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	0	<p>Support for south area vision and key spatial objectives noted.</p> <p>The Perry Hill Tesco site has been considered for an additional site allocation – further details are set out in the Site Allocations Background Paper.</p> <p>The Local Plan is broadly supportive of the sensitive intensification of established residential areas. It is agreed that these areas should not function singularly as dormitories. The Part 1 spatial strategy and Part 2 Economy and Culture policies support the 15-minute neighbourhood concept, and seek to enable a wider range of uses to locate within the town and local centres that support residential areas. At a strategic level, there are key locations that the Local Plan is seeking to promote night-time economic activities.</p>	Local Plan amended to include additional key spatial objective for Perry Hill.

		<p>I know it's a more suburban area but why can't the suburbs have more night life and stuff for young people to do.</p> <p>The assumption that suburbs should be geared towards the nuclear family is dated and heteronormative.</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision? I think the proposed vision looks great, my concern would be that there's a heavy assumption on the Bakerloo line extension but this has been ongoing for a long time and given the current crisis, seems likely to be shelved, and there's no where near enough focus on cycling infrastructure and focus on sustainable transport.</p> <p>I think its hugely important to focus on cycling and walking and this can only happen if roads and routes are massively overhauled. For people to take up cycling in any serious way, it needs to be a realistic alternative to driving, this means no cycle barriers or having to dismount at key points, uninterrupted and direct cycle routes, wide cycle only paths and roads. Whole roads (as appropriate) need to be made cycle and pedestrian only. It's not going to be enough just to make pavements mixed use - cycle pedestrian - this just makes pedestrians resent cyclists and vice versa. It's so important to make cycling as easy and accessible as possible but this isn't the case even in areas such as Waterlink Way where mixed use and busy footfall often causes issues and resentment. No one is going to stop driving unless there is an easier and safer way to get around. Roads need to be cycling and pedestrian focused - more pedestrianized streets etc.</p> <p>Lewisham Council must not let a small vocal minority (Alliance of British Drivers etc) override serious positive change. Lewisham has declared a climate emergence and must not let plans be watered down or abandoned (such as the LTNs).</p> <p>2. Do you have any comments on the proposed key objectives? MUCH more focus is needed on sustainable transport - CYCLING and WALKING - not just lots of buses.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham LSA4: A21 corridor / Bromley Road LSA5: South Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above? Much more cycling safe routes - this means uninterrupted direct cycle routes and cycle filter traffic lights, segregated cycle lanes and so forth. Cycling should not be considered just for leisure and gentle rides - it needs to cater for commuters and people needing to get places quickly - this means direct, safe and dedicated routes for cyclists - not using back residential roads or long hilly detours. People are resistant to behavior change so the way to do this is to make it an easy choice for them rather than still allowing motor vehicles to be the priority.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	0	<p>Support for vision noted.</p> <p>The Regulation 18 Local Plan document set out several spatial strategy options, recognising that some or all phases of the BLE may not be delivered in the plan period (including for reasons of funding). The preferred approach for the spatial strategy is therefore not dependent on the BLE. However the spatial strategy and the Local Plan policies aim to facilitate the delivery of the BLE, and provide flexibility to respond to it. This includes provision for an uplift in site development capacities enabled by the BLE through higher public transport access levels, particularly in the Bell Green and Lower Sydenham area. The Council is committed to supporting and enabling the delivery of the BLE through the Local Plan, but a pragmatic approach is necessary to ensure the spatial strategy is sound.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies, including policy TR3 Healthy streets as part of healthy neighbourhoods.</p> <p>The draft Local Plan includes a new Lewisham Links policy, which seeks to promote and secure new and improved links to and between green/open spaces. Waterlink Way features prominently in the plan, including the South Area section.</p>	No change.

		<p>N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>More green corridors such as Waterlink way to link parks such as Beckenham Place Park - at the moment you have to cross a busy, dangerous and polluting main Southend road. theres no crossing and its too car focused. There needs to be prime focus on cycling and green routes but also make direct fast cycling routes.</p> <p>Lowering pollution should also be a huge key priority.</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA2: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? Bell Green is already overly congested: dangerous, speeding, noisy traffic is a blight on the local area. There is very little provision for pedestrians and cyclists. Perry Rise and Perry Hill are both already severely congested by traffic: I am very concerned that redevelopment could make this problem even worse. It is welcome that the Local Plan aims to repurpose the site into a mixed residential site, but if this is to be achieved, the issues around road layout, traffic, congestion, and pedestrian access must be resolved first. As a first small step, speed limit signs and enforcements should be improved. There should be a way in which traffic can be diverted so as to make the area more pleasant for local residents and for pedestrians.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Former Bell Green Gas holders Bell Green Retail Park Sainsbury's Bell Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. The Bell Green retail site, whilst providing important and well-used shops, is a very unattractive and neglected tract of land. This is partly because it is not designed for pedestrian-use: there is only one pedestrian crossing, situated in an unhelpful position, and the level of traffic is extremely prohibitive to pedestrians, cyclists, and families. The bus stops are in an appalling state of misuse. One small but significant issue is the fact that so many refuse bins in Lewisham do not have lids! They are left to overflowing, especially over the weekends, and rubbish is blown by the wind across Bell Green, as well as being disrupted by birds and animals. Access to/from the Waterlink Way to Sainsburys and Bell Green is also unpleasant: the bus turning circle blocks off access to this important and much-loved green space.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	0	<p>The Local Plan acknowledges the issues of traffic and pollution, connectivity and poor quality public realm within parts of the Bell Green and Lower Sydenham area. To help address this, the South Area vision, objectives and policies (including strategic site allocations) provide the basis for the comprehensive regeneration of the out-of-centre retail park and other sites to create a new high quality and mixed-use neighbourhood. The Council will continue to liaise with key stakeholders, including the Mayor of London / Transport for London to address issues around the road network and public transport improvements required to support the levels of planned growth.</p> <p>Speed limits are outside the scope of the Local Plan. However the Local Plan policy TR3 Healthy streets as part of healthy neighbourhoods seeks measures to reduce vehicular dominance and both encourage and enable movement by walking and cycling.</p> <p>The draft Local Plan broadly seeks to protect and enhance Lewisham network of green infrastructure, including parks, open spaces and waterways. It includes a new Lewisham Links policy, which seeks to promote and secure new and improved links to and between green/open spaces. Waterlink Way features prominently in the plan, including the South Area section.</p>	Local Plan amended to include additional key spatial objective on Perry Rise / Perry Hill.

		Traffic/speeding/congestion/noise and air pollution are my principal concerns. South Area feels like it is a mass cut-through for large numbers of traffic. Local residents, especially families, and pedestrians are disadvantaged. The noise and air pollution is a serious concern. It is important to address this problem to ensure that the volume of traffic can be absorbed in a way which ensures the safety and comfort of local residents. The green areas (Beckenham Place, Waterlink Way and River Pool) are wonderful local assets which must be protected and enhanced by creating more local green spaces, planting more trees, and more habitats for local wildlife. These green spaces also need to be connected up. Pedestrian and cyclist access to these green spaces must be improved: at the moment residents of Sydenham and Catford are discouraged from walking/cycling to Beckenham Place because of the busy roads so they often drive, thus adding to the congestion problems. Improving walking and cycling routes will connect the borough, deal with congestion, and make the local area far more pleasant.			
3	LSA	<p>1. Do you have any comments on the proposed vision? LTN on Gleneagles road means traffic increasing on Rangefield Road Valeswood and Alexandra Crescent, Avondale. It doesn't seem popular and many locals couldn't afford fines. Grove Park Corridor /Nature Reserve should be valued.</p> <p>2. Do you have any comments on the proposed key objectives? Locals throughout Lewisham are wary of too much intensification.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? This area will always have a lot of motorized traffic. New road layout, crossing points welcome. Half of Sainsburys car park should be turned into a Park to offset the fumes not built on for more housing.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? All Lewisham and other London plans are based on population increases. BUT people are having less children, life expectancies are static or lowering, COVID deaths and deaths associated with Covid, like untreated cancers etc., long Covid etc. SO THIS MIGHT NOT HAPPEN. There is a human need for a healthy environment..not brick and concrete, more greening and open spaces (even car parks count). However much it's pushed, cycling is for the few not the many. Older people, cars being status symbols, disabled, those with work tools, the rain, snow convenience, time, shopping, young children etc, etc,,</p>	0	<p>Noted. Low Traffic Neighbourhoods are outside the scope of the Local Plan.</p> <p>The draft Local Plan broadly seeks to protect and enhance Lewisham network of green infrastructure, including parks, open spaces and waterways. The Council has commissioned evidence base studies to inform the designation of open spaces and nature sites, including in the Grove Park area.</p> <p>Support for proposals concerning transport improvements noted.</p> <p>The site allocation for the Sainsbury's site in Bell Green sets out requirements for the delivery of new public open space and river restoration. The amount of open space will be considered through the preparation of a masterplan and the planning approval process.</p> <p>The Local Plan covers a 20-year period. The draft Local Plan was largely prepared before the peak of the Covid-19 pandemic. Additional evidence will be prepared following the Regulation 18 consultation taking account the latest information on the impact of Covid-19, Brexit and related issues</p> <p>The Council is required to review its adopted Local Plan every 5 years and consider the scope for changes informed by monitoring and new evidence. The review process will allow for consideration of the longer term impacts of Covid-19 and Brexit.</p>	Additional evidence base documents will be prepared and inform the next stages of plan production, taking into account the latest baseline information. This includes a new Retail and Town Centres Study, Strategic Housing Market Assessment and updated GLA population projections.

3	LSA	<p>1. Do you have any comments on the proposed vision? How will the vision be realised? It was made clear in the briefings that these were just guidelines and not firm plans. Where will the money come from to execute the vision?</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA2: Strategic Area for Regeneration LSA1; South Area place principles LSA3: Bell Green and Lower Sydenham LSA4: A21 corridor / Bromely Road LSA5: South Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above? Please can you ensure that you maintain the excellent local retail shops including those at Bell Green.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Bell Green Retail Park Sainsbury's Bell Green Lidl, Southend Lane Worsley Bridge Rd LSIS Homebase / Argos, Bromley Rd Downham Co-op</p> <p>6. Please provide your comments on the site allocation(s) selected above. Please ensure that these excellent facilities are maintained.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Yes please ensure that there is sufficient water pressure for the planned house/flat developments. There is insufficient pressure now in the South Catford area and adding more homes without fixing the infrastructure will only make things worse. I don't remember seeing provision of water included in the vision nor increase in doctors, schools, hospital beds etc</p>	0	<p>Noted. Part 4 of the Local Plan sets out details on plan delivery. In short, the Local Plan will be delivered by a wide range of partners including the Council, developers/landowners, government bodies and other key stakeholders.</p> <p>The Infrastructure Delivery Plan (IDP) provides further information on the key infrastructure projects (including for social infrastructure) and funding required to support the levels of growth planned.</p> <p>The draft Local Plan Part 2 policies on Sustainable Design and Infrastructure include provisions around wastewater and water supply, and will ensure that new development proposals consider and are appropriately supported by this type of infrastructure.</p> <p>The Local Plan proposals for the Bell Green and Lower Sydenham area provide for the comprehensive regeneration of existing out-of-centre retail units and park. The policies enable an element of retail and commercial floorspace will be retained/re-provided through new mixed-use developments.</p>	No change.
3	LSA	<p>1. Do you have any comments on the proposed vision? Adequate lighting, green bus stops with sedum roofs which absorb pollution and more trees planted along all main roads. Protected cycle ways, along main routes.</p> <p>2. Do you have any comments on the proposed key objectives? Adequate lighting, green bus stops with sedum roofs which absorb pollution and more trees planted along all main roads. Protected cycle ways, along main routes.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham LSA4: A21 corridor / Broomley Rd</p>	0	<p>Noted. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies, including policy TR3 Healthy streets as part of healthy neighbourhoods.</p> <p>The draft Local Plan Part 2 design policies seeks to ensure that developments make appropriate provision for adequate lighting, particularly in the public realm.</p>	No change.

		<p>LSA5: South Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above? Adequate lighting, green bus stops with sedum roofs which absorb pollution and more trees planted along all main roads. Protected cycle ways, along main routes.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. Adequate lighting, green bus stops with sedum roofs which absorb pollution and more trees planted along all main roads. Protected cycle ways, along main routes.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Adequate lighting, green bus stops with sedum roofs which absorb pollution and more trees planted along all main roads. Protected cycle ways, along main routes.</p>		<p>Provision of bus stops is normally made by Transport for London. The Local Plan is broadly supportive of greening measures, including on these structures where feasible.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? I welcome the idea that the redevelopment of Bell Green area will be "informed by the local community, ensuring the area is well integrated with existing neighbourhoods and communities." At the moment, it's clear to see that development in this area was not thought through, resulting in huge car parks, poor pedestrian access and busy, polluted roads. But while it's good to see proposed improvements to this area, I am concerned about whether the local area can support the "significant amount of new housing" proposed, especially if public transport is not prioritised.</p> <p>2. Do you have any comments on the proposed key objectives? I was pleased to see that protecting and enhancing green spaces are a priority I worry that the designation of Bell Green as an "opportunity area" will lead to over development - as seen all over London where small flats are crammed in to ensure maximum profits for the developers. This would create even more traffic, pollution and rubbish problems in an already congested area. I would welcome a consideration for longer-term, more considered development which takes into account people's quality of life, access to green space and amenities, etc.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Former Bell Green Gas Holders Bell Green Retail Park Sainsbury's Bell Green</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	1	<p>Noted.</p> <p>The Local Plan acknowledges the issues of traffic and pollution, connectivity and poor quality public realm within parts of the Bell Green and Lower Sydenham area. To help address this, the South Area vision, objectives and policies (including strategic site allocations) provide the basis for the comprehensive regeneration of the out-of-centre retail park and other sites to create a new high quality and mixed-use neighbourhood. The Council will continue to liaise with key stakeholders, including the Mayor of London / Transport for London to address issues around the road network and public transport improvements required to support the levels of planned growth.</p> <p>The Local Plan proposals for the Bell Green and Lower Sydenham area provide for the comprehensive regeneration of existing out-of-centre retail units and park. The policies enable an element of retail and commercial floorspace will be retained/re-provided through new mixed-use developments.</p> <p>In general, the Council is seeking to make a more optimal use of the existing retail parks in Bell Green and considers there is scope for the sensitive intensification of this area, with key opportunities linked to the delivery of the Bakerloo line extension. The Local Plan has set out indicative development capacities for site allocations in Bell Green and Lower Sydenham using a standard methodology – further details are in the Site Allocations Background Paper. The optimal capacity of these sites, and appropriate building heights, will be</p>	<p>Local Plan amended to include additional key spatial objective on Perry Rise / Perry Hill.</p>

		<p>While it is useful to have these large supermarkets nearby - there are not many larger stores within a walking distance - the retail park and gas holder sites do need improvements. It's poorly designed, ugly, pedestrian access is very poor (or non-existent), and more needs to be done to improve access to the Waterlink Way. For this reason, I would support the removal of the Bell Green gyratory, in favour of a less high-density solution.</p> <p>I welcome the use of brownfield sites for redevelopment, rather than greenfield, but I worry about the large numbers of housing proposed on the gas holders. I am concerned they would not be integrated into the local area without significant re-design of the roads - they could be unconnected at the end of the cul-de-sac, creating yet another cut off estate. High-rise developments like we have seen in Catford and Ladywell would not go well with the 'suburban' residential character of the area.</p> <p>I also worry that large amounts of housing/retail would disrupt the quiet nature of the Waterlink Way. The area is already littered with rubbish from the retail park and this affects wildlife and river life.</p> <p>I am also concerned about the comment that parking for these new developments will reflect future public transport provision. Parking and over-reliance on cars is a huge issue in the borough, but the solution is not to provide parking for residents. This will not stop people from having a car; they will simply push the problems into nearby residential roads. I would urge you to join up improvements in public transport and infrastructure with large developments, rather than relying on them to happen in a few years' time.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Perry Hill and Perry Rise are already extremely busy roads, where no one obeys the 20mph limit. This is particularly worrying due to the Brent Knoll special school. I am concerned about the increase in traffic and the pressure on these routes from new developments at Bell Green, both in terms of the residents, and the construction vehicles.</p>		<p>established through the design-led process at the planning application stage.</p> <p>The draft Local Plan broadly seeks to protect and enhance Lewisham network of green infrastructure, including parks, open spaces and waterways. It includes a new Lewisham Links policy, which seeks to promote and secure new and improved links to and between green/open spaces. Waterlink Way features prominently in the plan, including the South Area section. It is an asset that the Local Plan is seeking to support and enhance and not compromise.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies, including policy TR3 Healthy streets as part of healthy neighbourhoods and TR4 Parking.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? Such a shame to lose Sainsbury's. It's always busy.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Downham Co-op Homebase / Argos, Bromley Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	0	<p>Noted. The Local Plan proposals for the Downham Coop and Bromley Road Retail Park will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments.</p> <p>For the Bromley Road Retail Park, the site allocation would not preclude the re-provision of a similar, large format retail store or retail warehouse, however it is likely that this would require a re-configuration of the existing building and site layout. The proposals are considered to be in line with the London Plan, which provides a steer for Local Plans to deliver new housing through the mixed-use redevelopment of car parks and low-density retail parks and supermarkets.</p>	No change.

		<p>Homebase will be much missed. It's very popular. Maybe it could still have a smaller Homebase or similar store on site.</p> <p>As for the Co-op. Absolutely ridiculous idea to get rid of it. Where else are we meant to go? Remember the elderly who can't get to Burnt Ash Lane or Grove Park on their own. This is the most stupid redevelopment plan I've ever heard of. My motto is why change something if it's not broken. We've got plenty of housing in this area. I've lived here for 37 years. I remember the old Co-op. Don't be so silly as to take away an essential part of our community.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision?</p> <p>The proposal looks like a positive proposal for improving a large area of land that could create a more positive place to live and improve the wellbeing of people that live there. Bell Green lacks a centre / heart and this leads to anti social behaviour. This would create more of a community ethos. I fully support the regeneration of this area.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>I agree with the objectives. Improved transport links will support the improvement of this area of opportunity. The proposed bakerloo line extension is a life line to this area that has do much potential. This area feels as though it is a significant distance from central London but it actually isn't. The investment would create a new residential and commercial hub tht would be incredibly exciting to live in. I fully support the proposal for the regeneration of this area.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LSA1: South Area place principles LSA2: Strategic Area for Regeneration LSA3: Bell Green and Lower Sydenham LSA5: South Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>I agree with the approaches for the area. It is a sensible plan to connect this area to the surrounding areas and make this area an attractive place to live. The concept of the garden city provides a fitting and exciting proposal for the area and will connect with the history of the area. The transport links are poor and the bakerloo line extension would provide a life line for this area. Improved pedestrian access and pathways will make the area a much better area for people to live in</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>Former Bell Green Gas Holders Bell Green Retail Park Sainsbury's Bell Green Worsley Bridge Rd LSIS Homebase / Argos, Bromley Rd</p>	0	<p>Support for South area vision and key spatial objectives and area-based policies noted.</p> <p>The Local Plan proposals for Bell Green retail park and other surrounding site allocations will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments. It is recognised that the existing businesses provide important amenities and job opportunities for local residents, and the Council is seeking to ensure that the comprehensive regeneration of sites in Bell Green and Lower Sydenham continue to make such provision through the creation of a new town or local centre, albeit in a different format from the existing out of centre retail park.</p> <p>The proposals are considered to be in line with the London Plan, which provides a steer for Local Plans to deliver new housing through the mixed-use redevelopment of car parks and low-density retail parks and supermarkets.</p> <p>Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.</p>	<p>Following the Regulation 18 stage consultation, a new Retail Impact Assessment and Town Centre Trends Study has been commissioned. This has assessed the potential scope for a new town centre at Bell Green and impact this would have on neighbouring centres. The Local Plan has been amended to reflect the objective for a new local centre at Bell Green.</p>

		<p>6. Please provide your comments on the site allocation(s) selected above. These areas have been well thought out and utilise the spaces well to include the essential amenities including b and q and Aldi and some of these should be kept in the area to support jobs and investment. The shops on the bell green estate are an important hub for the area that cannot be found nearby. These should be considered as part of the regeneration plan and could form part of commercial/retail area in the plans. The range of supermarkets enable this area to be affordable for key workers and those on lower incomes.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? The bridge leisure centre. A sports / fitness facility is vital for the well-being of this area. To close or not replace it with an affordable alternative would be detrimental to the community's wellbeing. The newest swimming pool is at the north of the borough and this would be a shame to lose this one.</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision? I see no mention of a sports centre, particularly for sports such as badminton that cannot be played outdoors.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? Again no mention on The Bridge sports centre, can this be re-built to a modern spec?</p> <p>5. Do you have any comments on the proposed site allocations? Are there any other issues and/or approaches for the area that you feel should be considered? Just an indoor sports facility for badminton and exercise classes</p>	1	Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.	No change.
3	LSA	<p>1. Do you have any comments on the proposed vision? While it is exciting that the Borough have plans to spruce up Bell Green & Lower Sydenham, it is frightening to read that you intend to redevelop the existing commercial infrastructure (such as the supermarket & retail park) without any details of their prospective replacement.</p> <p>2. Do you have any comments on the proposed key objectives? The proposals are very ambitious but I fear there is a possibility that whatever replaces the current infrastructure will be less convenient for local residents. Perhaps our little corner of the Borough isn't as aesthetically pleasing as other areas but it serves us well.</p>	2	Noted. The Local Plan proposals for Bell Green retail park and other surrounding site allocations will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments. It is recognised that the existing businesses provide important amenities and job opportunities for local residents, and the Council is seeking to ensure that the comprehensive regeneration of sites in Bell Green and Lower Sydenham continue to make such provision through the creation of a new	Following the Regulation 18 stage consultation, a new Retail Impact Assessment and Town Centre Trends Study has been commissioned. This has assessed the potential scope for a new town centre at Bell Green and impact this would have on neighbouring centres. The Local Plan has been amended to reflect the objective for a new local centre at Bell Green.

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? Could you please clarify if you will be allowing the existing retailers to remain in the retail park (Sainsbury's, Next, B&Q etc.)? They employ a great many local residents and are very conveniently located. Removing the supermarket and B&Q in particular would not be convenient for many local residents. The layout of the car parks and roadways can and should be modified into something more elegant & intuitive to navigate, however.</p> <p>The opportunity is there to integrate whatever residential or commercial structures you develop in the Gas Holders & modify the existing retail park.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Sainsburys Bell Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? The Bridge Leisure Centre requires investment from the council. Before the pandemic it was in desperate need of repair but it was still essential for residents' health and well-being. If it is to be closed permanently then I might suggest a replacement swimming pool and leisure centre be built nearer the proposed 'town centre', perhaps at one of the gas holder sites. My young children need swimming lessons & other services (such as gymnastics) that the Bridge provided, and as it stands we will need to drive to other parts of the Borough, clogging up roads and polluting our way there.</p>	<p>town or local centre, albeit in a different format from the existing out of centre retail park.</p> <p>The proposals are considered to be in line with the London Plan, which provides a steer for Local Plans to deliver new housing through the mixed-use redevelopment of car parks and low-density retail parks and supermarkets.</p> <p>The detailed design of the redeveloped sites will be considered through the masterplan and planning application process. The site allocations set out development requirements and guidelines concerning road layout and public realm, which will help to delivery significant improvements to access and connectivity within the area.</p> <p>Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy C11 Safeguarding and securing community infrastructure.</p>		
3	LSA	<p>1. Do you have any comments on the proposed vision? The existing shops in the Bell Green retail park should remain - if it wasn't for Sainsbury's, Aldi, Next, Currys and B&Q lockdown would've been a lot harder.</p> <p>2. Do you have any comments on the proposed key objectives? What about leisure facilities. The Bridge leisure has suffered from a lack of investment over the last 10 years and is now facing permanent closure. Why haven't leisure facilities been included in your vision or objectives? How do you expect residents to keep fit and healthy?</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? One glaring omission is any mention of The Bridge leisure centre which is facing permanent closure. The centre has suffered from a lack of investment for the past 10 years. The area needs somewhere where residents can keep mentally and physically fit.</p>	1	<p>Noted. The Local Plan proposals for Bell Green retail park and other surrounding site allocations will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments. It is recognised that the existing businesses provide important amenities and job opportunities for local residents, and the Council is seeking to ensure that the comprehensive regeneration of sites in Bell Green and Lower Sydenham continue to make such provision through the creation of a new town or local centre, albeit in a different format from the existing out of centre retail park.</p> <p>The proposals are considered to be in line with the London Plan, which provides a steer for Local Plans to deliver new housing through the mixed-use redevelopment of car parks and low-density retail parks and supermarkets.</p>	No change.

		<p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Bell Green Retail Park Sainsbury's Bell Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. All these stores must remain as they have been a lifeline for many residents.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? You must revise your vision and plans to include leisure facilities for residents in the Lower Sydenham area.</p>		Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.	
3	LSA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA4: A21 Corridor / Bromley Rd</p> <p>4. Please provide your comments on the topic(s) selected above? I really don't see how you could turn the busy A21 into a 'healthy street'.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Bell Green Retail Park Sainsbury's Bell Green Lidl, Southend Lane Excalibur estate Homebase/ argos, Bronley Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. I can see there is some wasted space in these retail sites, but planning applications must include some provision for car parking, as it would be impossible to manage a family shop or purchase of heavy DIY materials on a bus. The current situation regarding the Excalibur estate is worrying, as a number of units remain unsold after several years. Part of the delay is due to building faults, but the sale price is probably too high for local families to afford.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? I hope the Council will insist on a good percentage of genuinely affordable properties in all applications, as that is the only way we will start to tackle the housing crisis.</p>	0	<p>Noted. The Local Plan seeks to enhance the place qualities of the A21/Bromley Road Corridor, including through delivery of significant public realm improvements to support walking, cycling and use of public transport (and reducing vehicular dominance). Whilst recognising this is a major road in London's strategic network, it is considered that there are opportunities to apply the 'Healthy Streets' principles in accordance with the London Plan. The Council is preparing the A21 Development Framework to support the Local Plan, and will provide further details on the delivery healthy streets along the corridor.</p> <p>Where existing retail sites come forward for mixed-use redevelopment, the amount of car parking provision will be established in line with the London Plan parking standards.</p> <p>The sale of properties on Excalibur estate is outside the scope of the Local Plan.</p> <p>Through the new Local Plan, the Council is proposing to set a strategic target for 50% of all new housing to be genuinely affordable homes, with affordability linked to local income levels. Further details are set out in draft Local Plan Policy HO3 genuinely affordable housing.</p>	No change.
3	LSA	<p>1. Do you have any comments on the proposed vision? I fully support the development of new housing, particularly that which is affordable. But removing so many local amenities raises questions about driving people into cars rather than being able to walk to get what they need from garden centres and food</p>	1	<p>Support noted.</p> <p>The Local Plan proposals for Bell Green retail park and other surrounding site allocations will enable an</p>	No change.

		<p>shops. Ensuring that existing residents have access to greater numbers of amenities rather than fewer is crucial.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? A mixed-use approach is really important. It will be vital to ensure that there are options for small retail and hospitality businesses because currently the area around Bellingham Green really lacks both facilities and a neighbourhood, village feel.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Lidl, Southend Lane Sainsbury's Bell Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. Removing both Southend Lane's supermarket and those at Bell Green are going to leave Bellingham residents with very few shopping options and drive them from being able to visit the supermarket on foot to having to travel via car, which goes against the intentions of the scheme to make the area greener and more environmentally friendly. Doing this for 23 houses doesn't seem to make a lot of sense to me.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Ensuring there are sufficient leisure facilities to cope with the influx of people this will bring. The proposed closure of the Bridge Leisure Centre is a huge blow to the community, with the pool in particular something which can't be made up for by other centres.</p>	<p>element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments. It is recognised that the existing businesses provide important amenities and job opportunities for local residents, and the Council is seeking to ensure that the comprehensive regeneration of sites in Bell Green and Lower Sydenham continue to make such provision through the creation of a new town or local centre, albeit in a different format from the existing out of centre retail park.</p> <p>The Part 2 policies on Economy and Culture seek to ensure that a wide range of business units and unit sizes are delivered in employment locations and town centres.</p> <p>Similarly, the proposals for the Lidl, Southend Lane site will allow for mixed-use development, and would enable the provision of retail uses at the ground floor level with residential above.</p> <p>Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p>	4 Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.	No change.

		<p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? With all the proposals for properties where will the residents have to keep healthy in body and mind if you close The Bridge Leisure Centre. This must be kept open. Why can't some funding be used to upgrade the facility to attract more people. Kangley Bridge Road and the surrounding area is very residential and with the proposed rail link to east london will be even more popular. You must keep it open</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision? I think it is really exciting</p> <p>2. Do you have any comments on the proposed key objectives? Very excited about the improvements to. bell green - it's an awful experience using Bell Green by foot.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? This area needs a lot of investment and it can only be a good thing. I like the ambition of the plans - even if they cannot be fully realised it's great to see that the council recognised that improvement and investment are desperately needed.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Former Bell Green Gas Holders Bell Green Retail Park Sainsbury's Bell Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. Yes to the proposed redevelopment of this site - it is awful. However I do understand the concerns about the alternatives for the retail provision currently provided and the associated employment</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	1	<p>Support for South area vision and objectives noted.</p> <p>The Local Plan proposals for Bell Green retail park and other surrounding site allocations will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments. It is recognised that the existing businesses provide important amenities and job opportunities for local residents, and the Council is seeking to ensure that the comprehensive regeneration of sites in Bell Green and Lower Sydenham continue to make such provision through the creation of a new town or local centre, albeit in a different format from the existing out of centre retail park.</p>	No change.
3	LSA	<p>1. Do you have any comments on the proposed vision? I welcome the improvement of The south of the borough. We live in an area which is poorly served by buses and is stuck with a huge and ugly retail park. We have beautiful green spaces which are poorly connected. It would be great to have the opportunity to have things rethought and redesigned. I'm really shocked by the negative reaction I have seen.</p> <p>2. Do you have any comments on the proposed key objectives? Very excited that Bellingham and Bell Green are both selected for regeneration and redesign. Excellent for the area. Also excited about the redesign of the road away from Haseltine Primary and the raised profile of the Waterlink Way</p>	0	<p>Support for South area vision and objectives noted.</p> <p>The Local Plan proposals for Bell Green retail park and other surrounding site allocations will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments. 		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? Very exciting. Concerned about the proposed heights of some blocks- would like them kept to 6 stories, or to keep the higher blocks towards the existing high blocks around Perry Hill side rather than putting towers in the area where everything is low.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Former Bell Green Holders Sainsbury's Bell Green Bell Green Retail Park</p> <p>6. Please provide your comments on the site allocation(s) selected above. Where will people do their home improvement shopping if B&Q and Homebase are both redeveloped? I understand this concern. But I still think creating a new mixed-use town centre is a great idea. Bell Green retail park is not pleasant - it is positively unpleasant if you are a pedestrian user.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Keep the Bridge Leisure - do not take away this important amenity.</p>		<p>make such provision through the creation of a new town or local centre, albeit in a different format from the existing out of centre retail park.</p> <p>In general, the Council is seeking to make a more optimal use of the existing retail parks in Bell Green and considers there is scope for the sensitive intensification of this area, with key opportunities linked to the delivery of the Bakerloo line extension. The Local Plan has set out indicative development capacities for site allocations in Bell Green and Lower Sydenham using a standard methodology – further details are in the Site Allocations Background Paper. The optimal capacity of these sites, and appropriate building heights, will be established through the design-led process at the planning application stage, having regard to the Part 2 design policies of the Local Plan.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? I find the retail park at Bell Green convenient but as a pedestrian user I hate it. Everything is run down and litter-strewn, and the car parks are rarely full. I feel that better use could be made of the spaces there without losing all the retailers currently in situ. Any way of increasing Bell Green's connectivity via public transport would be welcomed- it should be served by more bus routes.</p> <p>2. Do you have any comments on the proposed key objectives? The plan to make Bell Grn into a new 'town centre' is exciting- many are concerned though that it will create a large employment loss. Where would the next nearest B&Q be? What opportunities would a Bell Grn town centre bring for local people to find employment?</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham LSA5: South Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above? The plan to make Bell Grn into a new 'town centre' is exciting- many are concerned though that it will create a large employment loss. Where would the next nearest B&Q be? What opportunities would a Bell Grn town centre bring for local people to find employment? Personally, I'm happy to shop largely online and as a resident without a car, I detest both the supermarket and walking along the gyratory and would LOVE to see the ambitious changes described in the plan. But I'm see many</p>	1	<p>Noted. The Local Plan proposals for Bell Green retail park and other surrounding site allocations will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments. It is recognised that the existing businesses provide important amenities and job opportunities for local residents, and the Council is seeking to ensure that the comprehensive regeneration of sites in Bell Green and Lower Sydenham continue to make such provision through the creation of a new town or local centre, albeit in a different format from the existing out of centre retail park.</p> <p>The proposals for Bell Green would also provide for the introduction of transformational public realm improvements, including the provision of new publicly accessible open space.</p> <p>The draft Local Plan provides that any future development proposals for the Bell Green area and site allocations must be delivered through an area-wide masterplan approved by the Council, and comply with the relevant site allocation policies. However, it is acknowledged that the Local Plan could make clear that</p>	Local Plan Policy LSA3 amended to make clear that the masterplan for Bell Green area must be informed by a public consultation process.

		<p>people disagree and how will the proposed changes satisfy the fears outlined above (well-used centre /Bell Grn being untenable for development)?</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Former Bell Green Gas Holders Bell Green Retail Park Sainsbury's Bell Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. I would love to see this horrible retail park (Bell Grn) transformed into a pleasant public space with more public transport. I like the ambitious vision for the site but echo the concerns of others about whether it's practical. If redevelopment meets with strong opposition, what other improvements could be implemented which allay people's fears? E.g. if the plans are dropped, can the site's pedestrian access be made better, can the gyratory be changed, can we open up the green corridor behind Aldi etc and connect it to Perry Vale and the river walk? Can we at least secure the promise that it will be less horrible?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Don't close The Bridge Leisure Centre, it's a HUGE loss. If you're trying to bring life to/ improve Bell Grn, please don't remove important community infrastructure without a plan to replace it</p>		<p>the masterplan must be informed by public consultation.</p> <p>Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? Please see below in respect of Policy LSA3 and Site Allocations 2</p> <p>2. Do you have any comments on the proposed key objectives? The objective of redeveloping the Bell Green Retail Park is unrealistic and undeliverable.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? This draft policy in so far as it relates to the Bell Green Retail Park is considered unrealistic and undeliverable. The Bell Green Retail Park contains a large number of established retailers such as Aldi, Pets at Home, Next, B&Q, Halfords, Currys/PC World & McDonalds. These retailers have in most cases a significant number of years left to run on their leases. It is a highly successful retail park providing an accessible and quality shopping environment which is well established.</p> <p>There is no realistic prospect of this site becoming available for redevelopment for the wide range of uses as promulgated within Policy LSA3. The policy suggests that this is a long-term development which will be guided by a Supplementary Planning Document and/or Masterplan including a reconfiguration of existing out-of-centre provision.</p> <p>There is no information on how this can be delivered over the plan period nor whether there has been any engagement with the landowner as the key stakeholder. It fails to accord with paragraph 16b) of the NPPF which states that</p>	1	<p>The Local Plan sets out a strategy and policies for growth and investment over a 20 year period. There is nothing that we have heard through the preparation of the plan and through this Regulation 18 consultation that suggests Bell Green Retail Park is not deliverable within this timeframe.</p> <p>We have had engagement with landowners in the area.</p>	Timeframe for delivery amended for each site allocation.

		<p>plans should be prepared positively in a way that is aspirational but also deliverable. It also fails to accord with paragraph 16c) of the NPPF in that there has been no early or effective engagement with businesses.</p> <p>There is no reference in the plan to stakeholder engagement in respect of these matters nor more significantly, whether the retail park will become available for redevelopment as envisaged, over any part of the plan period.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Bell Green Retail Park</p> <p>6. Please provide your comments on the site allocation(s) selected above. The Site Allocations 2 outlines a timeframe for delivery of a mixed-use redevelopment with between 695-1,710 residential units delivered between 2020 and 2030. There is no realistic prospect of this being achieved given the existing tenants and their unexpired leases coupled with the need to prepare a masterplan or SPG. The development requirements are also challenging in seeking to deliver as part of any redevelopment, new and improved public realm, provide full integration with the surrounding area and protect and enhance green infrastructure including Metropolitan Open Land and the Pool River.</p> <p>The draft site allocation should be deleted from the plan.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision? I cannot see how a greener area will come about. Lewisham have already decided not to build the footbridge over Catford station which would stop everyone squeezing onto the south circular bridge to get into Catford. Instead there are to be paving stones outside the station. If this essential green item is not necessary, will Lewisham decide others aren't either?</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Land at Pool court Sainsbury's Bell Green Lidl, South end</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	0	<p>Noted. At its meeting on 16th September 2020 Mayor & Cabinet agreed the transfer of S106 funding originally proposed for the delivery of a footbridge between Doggett Road and the Barratt's development on the former Catford Greyhound Stadium site to be used to deliver a programme of public realm and accessibility improvements to Catford Station areas. This includes looking at options to provide step free access at Catford Station. See M&C report for further details.</p> <p>The National Planning Policy Framework requires the Council to identify and plan positively for the housing needs of the gypsy and traveller community through the Local Plan process. The site allocation will help to ensure these requirements are satisfied. The Council has considered site options through previous work on a standalone Gypsy and Traveller site Local Plan, which is now being absorbed into the consolidated Local Plan.</p> <p>Noted. The Local Plan proposals for Bell Green retail park and other surrounding site allocations, along with Lidl Southend Land will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments.</p>	No change.

		<p>Land for travellers? The area is already extremely with lorries waiting to make deliveries to the cash and carry opposite.</p> <p>Where will we be able to do our shopping if you take both supermarkets away.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>I think if you are truly a green borough, you will reinstate the footbridge to connect the station up with the town centre.</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision? No vision for developing downham... the area is in serious need of better access to green spaces, local centre around co-op to be improved, et</p> <p>2. Do you have any comments on the proposed key objectives? Doesn't go far enough to improve local smaller playgrounds/green spaces/nature reserves around grove park/downham. Many is a state of disrepair or under threat of developers. All the attention going on Beckenham Place park.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? Downham has been forgotten in these proposals but is area most in need of investment/development.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Revive and enhance downham shopping area around co-op. The area is lacking quality basic shops (bakers, butchers, grocers, etc) and is very run down. Improve and invest in the smaller playgrounds in the area. Do more to protect green spaces from developers.</p>	0	<p>Noted. The Local Plan vision for the South area includes references to Downham, particularly around reinforcing its cottage estate character and supporting the long-term viability of Downham district centre. The key spatial objectives and area-based policies support this vision. For example, Downham forms part of the proposed Strategic Area for Regeneration, where there are clear policies in place to facilitate and direct investment within the area.</p> <p>Despite a comprehensive survey of land available for potential redevelopment across the Borough, as set out in the Site Allocations Background Paper, there are a lack of potential development sites / site allocations for the Downham area. However the Council considers that there is not a lack of focus for Downham, as set out above.</p> <p>The Part 2 policies on Green Infrastructure address the protection of green and open spaces, and set out how identified deficiencies in children's play provision will be addressed.</p>	No change.
3	LSA	<p>1. Do you have any comments on the proposed vision? We are residents of Avondale road, and we are looking to create a collective protest letter for the proposed development plan on the land owned by Beadles Bromley who is looking at proposed development with Lewisham council for multiple (about 22) residential dwellings and more commercial dwellings.</p> <p>2. Do you have any comments on the proposed key objectives? The proposed plan for the Avondale road area seems to have been planed with no resonance with the resident's requirements and a worsening of the emissions on this street, in addition to more traffic, parking and potential accidents that the street is already prone to.</p>	0	<p>Residents have had the opportunity to engage with the Local Plan process through the Regulation 18 consultation. The consultation has been carried out in accordance with our Statement of Community Involvement.</p> <p>We believe the site presents a good opportunity for redevelopment to improve the urban fabric of the area and deliver much needed housing.</p>	No change.

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA4: A21 corridor / Bromley Rd</p> <p>4. Please provide your comments on the topic(s) selected above? Avondale Road and Bromley hill junction area as a location is a very residential space. It has had more of its fair share of accidents, (a couple of them being more recent), and huge problems associated with attracting car thieves on the street, followed by VW hogging the road space for parking their commercial cards, in some cases blocking homes. With these additional developments, there will be more pressure on parking from new residents and their guest, and from the commercial outfits thereof, in addition to the Beadles own overflows on the street.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Beadles Garage</p> <p>6. Please provide your comments on the site allocation(s) selected above. The proposed plan for the Avondale road area seems to have been planed with no resonance with the resident's requirements and a worsening of the emissions on this street, in addition to more traffic, parking and potential accidents that the street is already prone to. The proposed plan for the Avondale road area seems to have been planed with no resonance with the resident's requirements and a worsening of the emissions on this street, in addition to more traffic, parking and potential accidents that the street is already prone to.</p> <p>Avondale Road and Bromley hill junction area as a location is a very residential space. 3	LSA	<p>1. Do you have any comments on the proposed vision? I get the feeling that your plan starts from the premise that what we have today is bad and everything has to change. Clearly you feel that retail parks are bad and I would like to understand why you feel that way. Will your plan include alternative shopping locations to replace the supermarket that you are removing?</p> <p>2. Do you have any comments on the proposed key objectives?</p>	0	<p>Noted. The Local Plan identifies and seeks to reinforce and enhance the different elements of the borough that make a positive contribution to Lewisham's distinctiveness, including the built and natural environments, as well as community diversity and cultural character.</p> <p>The proposals for Bell Green retail park and other surrounding site allocations will enable an element of</p>	No change.

		<p>The objectives are certainly lofty and I am sure well intentioned. BUT this manic push for cars to be banned and everybody to walk/cycle etc is flawed. Already we see that mixing cyclists and walkers on the same track is a dangerous proposition.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA4: A21 corridor /Bromley Rd</p> <p>4. Please provide your comments on the topic(s) selected above? As you seem to be driving more and more housing in Lewisham where are the proposals for extra hospitals, doctors surgeries, schools, social services etc etc</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Bell Green Retail Park</p> <p>6. Please provide your comments on the site allocation(s) selected above. This site provides a very useful facility for all in the borough which also provides many many jobs. What will replace the jobs lost?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Yes a true mix of housing and services including retail. New have seen that with Lewisham's LTNs that without proper consultation things are being driven through. In this case you are consulting but will you listen? As an example my particular road, Crantock Road, was consulted on whether we wanted speed humps. We said NO and you ignored us. I worry about your ideological approach to all development. You ask for feedback on something that you have created but then very little change when objections come in.</p>	<p>retail and commercial floorspace to be retained/re-provided through new mixed-use developments. It is recognised that the existing businesses provide important amenities and job opportunities for local residents, and the Council is seeking to ensure that the comprehensive regeneration of sites in Bell Green and Lower Sydenham continue to make such provision through the creation of a new town or local centre, albeit in a different format from the existing out of centre retail park.</p> <p>The proposals are considered to be in line with the London Plan, which provides a steer for Local Plans to deliver new housing through the mixed-use redevelopment of car parks and low-density retail parks and supermarkets.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Low Traffic Neighbourhoods are outside the scope of the Local Plan.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? All very noble, but I am very sad that every bit of open space around existing facilities will disappear under a blanket of concrete, yet there are comments about people paving their gardens in order to park their cars.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA4: A21 Corridor / Bromley Rd</p> <p>4. Please provide your comments on the topic(s) selected above? Please do not fence us in with more overnight road closures. Respect the many people who still need to use cars, all of whom will anyway have to 'go electric' by</p>	1 <p>The draft Local Plan sets out policies to help ensure a balanced approach to managing growth in line with the Good Growth policies of the London Plan. The Part 2 policies on Green Infrastructure set out the approach to protecting and enhancing the Borough's network of green and open spaces.</p> <p>The reference to 'road closures' is assumed to refer to the Low Traffic Neighbourhoods scheme, which is outside the scope of the Local Plan.</p> <p>The proposals for Bell Green retail park and other surrounding site allocations will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments. It is</p>	No change.

		<p>the time your proposals come to fruition. At the moment, cars idling in traffic jams caused by LTNs cause more pollution than those moving swiftly through.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Bell Green Retail Park Sainsbury's Bell Green Homebase / Argos, Bromley Rd Lidl, Southend Lane</p> <p>6. Please provide your comments on the site allocation(s) selected above. Can we assume that businesses in these areas with the services they provide will be wiped out? Is your mission to put them out of business? Tens of thousands of people use them regularly, Where do you propose they relocate that will be accessible to us all? They need parking space as most of them sell large heavy items, not to mention the weekly shop. Will you raise the middle of Catford to make room for them there? I think not. I know, put more home delivery vans on the road!!</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Your comments show residents concern that more leisure facilities are required yet I hear that Lewisham is closing down the Bridge Leisure Centre. Yet another blanket of concrete?</p>		<p>recognised that the existing businesses provide important amenities and job opportunities for local residents, and the Council is seeking to ensure that the comprehensive regeneration of sites in Bell Green and Lower Sydenham continue to make such provision through the creation of a new town or local centre, albeit in a different format from the existing out of centre retail park.</p> <p>The proposals are considered to be in line with the London Plan, which provides a steer for Local Plans to deliver new housing through the mixed-use redevelopment of car parks and low-density retail parks and supermarkets.</p> <p>Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? Seems unfair to close a leisure centre in what already seems a relatively run down area. Won't all these extra houses mean more demand for sport facilities? And what's the impact on people's health longer term? I suspect bridge was picked as the easier option, not the right option, because it's likely people in Bell Green "shout less" than those in e.g Forest Hill.</p> <p>2. Do you have any comments on the proposed key objectives? Don't close facilities and services that promote health.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Lidl, Southend Lane Sainsbury's Bell Green</p> <p>6. Please provide your comments on the site allocation(s) selected above. Don't close supermarkets.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	2	<p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p> <p>In addition, the draft Local Plan Part 2 policies set out approaches to safeguarding community/social infrastructure.</p> <p>The proposals for Bell Green Retail Park and Lidl, South End lane will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments.</p> <p>The proposals are considered to be in line with the London Plan, which provides a steer for Local Plans to deliver new housing through the mixed-use redevelopment of car parks and low-density retail parks and supermarkets.</p> <p>Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.</p>	No change.

3	LSA	<p>1. Do you have any comments on the proposed vision? We are very concerned that the project proposed in Bromley Hill, corner with Avondale rd t is most probably too ambitious for this specific spot, given the significant raise in the population this would bring.</p> <p>Residents of Swiftsden Way have been made aware that along the Beadles project there are other 2 developments planned by Phoenix Housing Association within very close vicinity, in Chingley Close (of 31 homes) as well as Hildenborough Gardens(numbers have not yet been specified). Should the two developments of Phoenix Housing go ahead as planned, we already anticipate at least a 50 % increase in the local population in Swiftsden way and surrounding closes.</p> <p>We feel that the supporting infrastructure is fragile at present as it is and therefore, we are highly concerned about any addition of new developments in this area. The project you are proposing is bordering a highly dense council estate, with narrow streets and an infrastructure as this was 50 + years ago: water supply, sewage issues and equally of electricity supply has not been modernised to allow extra buildings to be added to this. A very evident measure of the overcrowding we are experiencing are the total number of cars parked along in Swiftsden Way, congesting the road to the point that a fire engine cannot get though if needed. Primary and secondary school places are insufficient already for our children and GP practices have too many clients for people to feel valued as individual. Downham has a very high index of deprivation and by raising population density this can be easily pushed further and further. Furthermore, adding social houses into an already deprived area the index of deprivation would be pushed further down than it is. Noise and gas pollution would inevitably increase and so the available space for parking your car. For many of us, access to car is indispensable to travel to work and swapping it for a cycle as desirable as it is it is incompatible with the demands of the jobs we are doing. Bromley Hill has been historically an area with very poor public transport facilities, local busses are hugely overcrowded at peak hours, it is making commuting to work, school a rather unpleasant experience.</p> <p>We would like to ask you to consider this project cautiously for the sake of existing and new residents, to avoid to standardise overcrowding as a norm for urban living.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? further more specific information would be important to understand the proposals made</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Beadles Garage</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	0	<p>We believe the site presents a good opportunity for redevelopment to improve the urban fabric of the area and deliver much needed housing.</p> <p>The council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>All development will be car-free or car-lite in accordance with the London Plan parking standards.</p>	No change.

Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>public transport is limited to buses , all train stations are only 30 min + walking distance</p> <p>street parking is a significant problem, most households have more than 1-2 cars / house</p> <p>access to schools</p> <p>if retail spaces are also added to Beadles Project, underground parking would be essential to address the lack of parking in this area.</p> <p>at present most customers and staff at Beadles Car dealership are taking up at least 300-400 yards of street parking.</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision?</p> <p>More focus should be given to improving the area around Bell Green. There is lots of under-utilised space that is perfect for new big housing developments. Roads in the area should be adjusted to help encourage walking and cycling linking with the local parks.</p>	0	Noted. The Council has undertaken a comprehensive survey of land available for potential redevelopment across the Borough, as set out in the Site Allocations Background Paper, and this has been informed by several 'call for sites' exercises. This has focussed on	No change.

		<p>2. Do you have any comments on the proposed key objectives? More focus on housing and improving walking.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LSA3: Bell Green and Lower Sydenham</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Bell Green Retail Park Sainsbury's Bell Green Worsley Bridge Rd LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. There are brownfield sites In Worsley bridge road which are perfect for housing due to good transport. Walking should be encouraged by improving and updating pavements. The Bell Green and Sainsbury's area should be improved by more high quality housing being built with improved roads and the one way system removed</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? One way system should be improved and new housing provided.</p>		<p>sites that are 0.25 ha or larger in size. The Local Plan includes several key strategic development sites which are brownfield sites around Worsley Bridge Road.</p> <p>It is acknowledged that there may be brownfield sites smaller than 0.25 ha which have not been included as site allocations, but which may be appropriate for redevelopment. These are known as 'windfall' sites. The Local Plan policies seek to ensure that development proposals on such windfall sites make the optimal use of land to support the spatial strategy for the Borough.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies. The Part 3 South Area policies provide further details to support this, including a masterplan approach for Bell Green and Lower Sydenham to significantly improve movement and circulation within the area, with priority given to walking, cycling and the use of public transport.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? The vision to build more housing is welcome, but I don't think that local people or first time buyers are shown any priority in the plans. Most new developments in Lewisham, particularly in Lewisham town centre, are not affordable for a working couple with good incomes, not to mention an individual who wants to buy their first property or a local family</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Downham co-op Sainsbury's Bell Green Bell Green Retail Park</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	1	<p>Noted. The Local Plan identifies that housing affordability is a significant issue in Lewisham. The draft Local Plan therefore sets a strategic target for 50% of all new homes to be genuinely affordable, with affordability linked to local income levels. Further details are set out in Policy HO4 genuinely affordable housing.</p> <p>The proposals for Bell Green retail park and other surrounding site allocations, along with Downham Coop, will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments. It is recognised that the existing businesses provide important amenities and job opportunities for local residents, and the Council is seeking to ensure that the comprehensive regeneration of sites in Bell Green and Lower Sydenham continue to make such provision through the creation of a new town or local centre, albeit in a different format from the existing out of centre retail park.</p> <p>The proposals are considered to be in line with the London Plan, which provides a steer for Local Plans to deliver new housing through the mixed-use</p>	No change.

		<p>The proposals reduce the amount of retail available significantly (as building work will take over a year for each site), therefore reducing the shopping opportunities for local residents. Whilst reducing the parking at the Co-Op site might not be detrimental to the area, there will be an issue with the overflow of parking from the new residents onto adjoining roads (particularly Moorside and Capstone). For the Bell Green development, particularly the Sainsbury's, it is the largest shop that many residents from numerous wards can access and parking is crucial as most people use it for large shops that cannot be carried on public transport. Shops like B&Q would also suffer from a reduction in parking as their goods are difficult or even impossible to carry on public transport and the links to many areas are not great.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Existing developments should be considered- there is a large storage place next to Bell Green that is definitely less useful to local residents than the shops, that occupies a large space and that is not in keeping with what is around it (either the housing or the shops). Reducing retail space would be a major loss to many residents.</p>		<p>redevelopment of car parks and low-density retail parks and supermarkets.</p> <p>Car parking provision will on strategic development sites in the South Area will need to be carefully managed, in line with the London Plan parking standards. Overall, the Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? I do not know enough about this area to comment.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. 3	LSA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p>	2	<p>Noted. The Local Plan broadly seeks to ensure that the Borough is inclusive to people of all backgrounds, ages and abilities.</p> <p>The Council's Parks and Open Spaces Strategy sets out priorities for managing and improving these spaces for the benefit of the whole population, whilst ensuring their character and environmental qualities are maintained and enhanced.</p>	No change.

		<p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Please do NOT ruin Beckenham Place Park by adding child friendly stuff like skate parks/playgrounds etc. There are plenty of other places to take children who are incapable of just enjoying nature. The beauty of Beckenham is that it is UNSPOILT, so let's keep it that way.</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision? Whilst I recognise the need for more affordable housing, the vision doesn't seem to adequately reflect the infrastructure required - schools, GP surgeries, shops etc. The density of housing suggested would put a lot of strain on local schools and surgeries, as well as increasing the local traffic on already over-stretched roads. Would there be support (and funding) for widening the railway bridge at Southend Lane?</p> <p>2. Do you have any comments on the proposed key objectives? Bell Green's large Sainsbury's is the only large supermarket in the area which is easily accessible for many in Perry Vale, Bellingham and Southend, as well as Sydenham, by foot and by bus. There is no other large supermarket easily accessible without a car. Smaller "local" style supermarkets usually have higher prices and a reduced range. Replacing this supermarket would be detrimental to many who live in the local area. The loss of the rest of the Bell Green retail park, would make many of those who can currently walk to it reliant on home deliveries or on cars to get to further away similar sites - which is not in line with reducing traffic. It's recognised that there are areas of high deprivation, yet these suggestions propose replacing a budget supermarket as well as Sainsbury's, this will contribute to wider food poverty and should be reconsidered.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Sainsbury's Bell Green Bell Green Retail Park</p> <p>6. Please provide your comments on the site allocation(s) selected above. Please see my comments above on the need for decent sized supermarkets.</p>	2	<p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p> <p>The proposals for Bell Green retail park and other surrounding site allocations will enable an element of retail and commercial floorspace to be retained/re-provided through new mixed-use developments. They will not preclude the retention/re-provision of medium to larger scale supermarkets. It is recognised that the existing businesses provide important amenities and job opportunities for local residents, and the Council is seeking to ensure that the comprehensive regeneration of sites in Bell Green and Lower Sydenham continue to make such provision through the creation of a new town or local centre, albeit in a different format from the existing out of centre retail park.</p> <p>The proposals are considered to be in line with the London Plan, which provides a steer for Local Plans to deliver new housing through the mixed-use redevelopment of car parks and low-density retail parks and supermarkets.</p> <p>Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy C11 Safeguarding and securing community infrastructure.</p>	No change.

		<p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>The proposed closure of the Bridge Leisure Centre should be reconsidered, and the centre and sports field should be both better maintained and promoted. To make the area more welcoming better lighting and signage should be provided for Kangley Bridge Road.</p>		<p>The council recognises the potential need for the widening and increase in height at Southend Lane bridge. Whilst high level feasibility studies have been prepared in the past no detailed design work has been undertaken. The Council will work with Network Rail to explore options. This is likely to come forward as part of the BLE and/or the comprehensive redevelopment of Lower Sydenham and Bell Green.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? Re. Dartmouth Road and Upper Kirkdale. The area on Kirkdale up from Willow Way has been an eyesore for several years. It needs bringing up to the standard of the rest of Kirkdale.</p> <p>There is a high rise building already - the old Section House - and another nearing completion - the old Police Station. Why do we need more? Limit any building to 3 or 4 storeys. Let the garage remain. They have been part of the community for decades. And what about the infrastructure? We can't get doctor's appointments now, so it will get worse. Schools? Added issues with the Mais House project. Parking??</p> <p>2. Do you have any comments on the proposed key objectives? Building communities - excellent, but don't destroy what's there now</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	0	<p>Noted. The key spatial objectives and policies for the West Area address the area around Upper Kirkdale and Dartmouth Road, particularly focussing on the local centres.</p> <p>The Council is preparing the Local Plan to set a positive strategy to deliver sustainable development and meet identified needs for homes, workspace/jobs, town centre floorspace and supporting infrastructure, in line with the National Planning Policy Framework. The London Plan also sets a housing target which the Council must seek to meet through the Local Plan.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>	No change.
3	LSA	<p>1. Do you have any comments on the proposed vision? Whilst accepting that there is an urgent need for more housing, I strongly oppose this proposal. Local businesses will be affected, particularly The Dartmouth Service Station, a well-established and valued local garage.</p> <p>The infrastructure in the area cannot support more development. There are insufficient school places, local transport links are overcrowded, particularly at peak travel times, it is virtually impossible to get doctors' appointments.</p> <p>This would appear to have been planned with a complete lack of local involvement. I understand that the businesses affected weren't even informed. This is not the way</p>	1	<p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>	The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.

		<p>to build trust with the local community. I totally oppose the development in this form.</p> <p>2. Do you have any comments on the proposed key objectives? See above.</p> <p>3. 3	LSA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. I am the manager of the Bricklayers Arms Public House. The proposals to redevelop Willow Way and to build up to the perimeter of Bricklayers Arms pub will have an adverse effect on us. Firstly we will lose our car park. We need car parking for our deliveries. Our suppliers need to be able to deliver to our door and not have to find parking elsewhere down the road. Also our staff use the car park. Our staff don't leave until gone midnight every night and having the car park gives them extra security as opposed the having to walk a distance late at night in the dark.</p>	1	<p>Noted. Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>The Council recognises the important role that public houses play in the local economy and its Lewisham's distinctiveness. Therefore, the draft Local Plan Policy EC7 (Public houses) sets out a new 'presumption in the favour of the retention of public houses'. This will help to ensure that any future proposals for redevelopment of land within the Willow Way LSIS site fully consider the pub and its amenity through the masterplan and design-led process. However it is acknowledged that the site allocation policy could be amended to provide more clarity on the need to protect the public house and its amenity.</p> <p>The Part 2 polies on High Quality Design set out requirement for all new development to respond positively to local character.</p> <p>Car parking provision at the Willow Way LSIS and its surrounds will need to be carefully managed, in line with the London Plan parking standards. Overall, the Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be</p>	<p>The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>

		<p>Our customers use the car park. Some customers are designated drivers and rely on the car park and some like to leave their cars there securely over night.</p> <p>Building blocks of flats up to the Pub will dramatically change the aesthetics and character of the pub for the worse. A lot of the pub will no longer be visible. There will also be no privacy for our garden customers, as the flats will be directly overlooking the garden and also some of the private upstairs accommodation of the pub will lose privacy.</p> <p>The old Sydenham Police Station, opposite us on Willow Way, which has just been redeveloped and is now a large block of flats is very imposing and now dwarfs the Bricklayers Arms. We have no privacy now upstairs in the private accommodation. The blinds in the living room and bedroom now have to be permanently drawn for privacy.</p> <p>Your plans for the redevelopment of this site, to surround us with more of these overlooking flats will adversely affect us and that is why I oppose them.</p> <p>The Bricklayers like most pubs is just surviving in a tough industry and environment. These issues mentioned will seriously compromise the continued existence of the Bricklayers as a going concern and those employed.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>		<p>made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision?</p> <p>The Council must consider more effective measures to reduce the environmental and health impact of car use in Lewisham, such as:</p> <ul style="list-style-type: none"> • Creating low-traffic neighbourhoods that are protected from motorised through-traffic (as proposed by London Living Streets in response to the Council's consultation in November 2018). • Increasing the use of non A & B roads for pedestrianised entertainment / retail areas / pocket parks. For example, the immediate vicinity of Brockley station has been temporarily pedestrianised to allow local cafes and restaurants to offer socially-distanced outdoor seating. This has been very successful and should be made permanent. Furthermore it should be considered as a role-model for other similar areas <p>2. Do you have any comments on the proposed key objectives?</p> <ul style="list-style-type: none"> • Increase safety for everybody inside and around the Brockley and Ladywell Conservation Areas • Prioritise cyclists, pedestrians and public transport • Reduce pollution • Emphasize the tranquil & residential nature of Brockley • Make the access points to Hilly Fields park safer for pedestrians, cyclists and public transport • Co-ordinate work across the Borough, and across London Boroughs, to reduce the through commuter traffic on residential roads from outer London to inner London. This traffic peaks during the morning and evening rush hours. 	1	<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Councils approach to LTNs can be found on the Councils website.</p>	No change.

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA2: Connected network of Town centres</p> <p>4. Please provide your comments on the topic(s) selected above? We note that other London boroughs have made significant progress in these areas over the last 18 months, successfully rebalancing road use away from cars towards cycling, walking and public transport. Proven templates exist that can easily be applied throughout the Borough as well, in particular in Brockley and Ladywell wards, where the traditional residential road grids (in the conservation areas in particular) were designed to support local means of transport. These residential roads were never designed to support rat-running car traffic, which is always to the detriment of all residents along those routes.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. N/A</p>		<p>The Local Plan Part 2 policies on Green Infrastructure set out the framework for protecting and managing the Borough's network of green infrastructure, and include requirements for new development around urban greening, nature conservation and enhancement, tree protection and tree planting.</p>	
3	LSA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. Given the relatively small extent of employment floorspace that exists on site (with most demolished or vacant), the site has real potential for short term regeneration within this part of Sydenham and lead to future investment in the adjoining Kirkdale High Street area.</p> <p>The site allocation and proposed employment floorspace/residential numbers appear achievable - if not capable of increased residential -as the wider site area is some distance from the nearest heritage assets and not subject to any local or strategic views.</p> <p>We have commented on the potential identification of the Sydenham Extension ASLC - and fail to see that the quality of Kirkdale High Street warrants such a conservation' policy - presenting a further constraint on the future regeneration of the Willow Way Locally Significant Industrial Site (LSIS). There does not appear to be</p>	0	<p>Support noted for the site allocation.</p> <p>All sites will be car-free or car-lite in accordance with the London Plan parking standards.</p>	

		<p>any specific commentary or character assessment of this area in the Lewisham Character Study - so would argue that the proposed inclusion is unwarranted. If the site boundary for the ASCC does take in the Kirkdale High Street area and neighbours the Willow Way site - we would seek its removal as a potential ASLC.</p> <p>We note that the Site allocation requires a masterplan to ensure the appropriate co-location of employment and other uses across the site. This allocation requirement appears at odds with the Policy EC5 E - which only appears to require compliance with EC5 F and G?</p> <p>The relevant policy at EC5 requires clarification and needs to tie into the relevant site allocation document - to avoid confusion.</p> <p>In the event that the Council do eventually require a formal masterplan, it is assumed that they will allow the development of early phases that do not conflict with the wider goals and principles of the Site Allocation and Masterplan.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>The Council should actively support an essential user/car free approach towards the regeneration of these PTAL site(s) encouraging developers and users to switch from car use to car clubs and bikes.</p>			
3	LSA	<p>1. Do you have any comments on the proposed vision? Broadly support</p> <p>2. Do you have any comments on the proposed key objectives? Broadly support</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below LWA1: West Area place principles</p> <p>6. Please provide your comments on the site allocation(s) selected above. I broadly support the principles, particularly that requiring proposals to respond to and reconnect remnants of the Great North Wood.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? I object to the designation of this remnant of the Great North Wood for development, reducing the green corridor between One Tree Hill and (through the Horniman) Sydenham Woods and damaging an important wildlife habitat. Building on green sites in general, let alone ancient woodland, should be avoided and appear contrary to objectives D8 & D9 of the draft Plan. This green wooded site is adjacent to the most historic buildings in Forest Hill, and contains an Edwardian building which is one of the gate houses of the former Tewkesbury Lodge, all of which contribute to the character of the area.</p>	3	<p>Support for vision and objectives noted.</p> <p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	<p>The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>

3	LSA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? The proposed development of the Havelock House site appears to be at odds with objective 9 to protect and enhance the distinctive woodland character of the area.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. We are very concerned about the proposal to develop the site behind Havelock House given the impact this would have on the trees and wildlife in that space. There is of course very little information at this stage about the nature of such a proposed development or what the exact affected area would be given the visual outline in the Lewisham plan document appears to encompass a significant number of pre-existing residential buildings and gardens (up to approximately half of the outlined area). However, 30 residential units seems a very high number to be contemplating if there is any intention to protect and preserve the woodland character of this area of land and its existing low rise residential properties. Our concerns include:</p> <p>1. Landscape - the extensive green space is an important element in the wildlife habitat of the area, partial or complete removal of the tree cover and associated vegetation would constitute significant environmental harm. Are there/should there be any tree preservation orders in place to protect any of the trees?</p> <p>2. Character - the green canopy is also an important element of the character of the area and a significant visual feature at the top of the area's topography. The loss of this mature feature would constitute significant harm to the character of the area.</p> <p>3. Access - there is no obvious direct access to the site, both frontages are occupied by active uses, both would require removal of trees to allow construction and occupation - in conflict with the strategic objective to retain green cover</p> <p>4. Servicing - as an undeveloped site the anticipated provision of new utility services would further impact the substantial tree cover and wildlife habitat.</p> <p>5. Parameters - in the absence of a more specific proposal for the site, the physical parameters constitute an unknown risk, consequently matters of configuration, building height, density and plot coverage will impact access, landscape and character - in the absence of site specific guidance for this sensitive site, allocation should be considered premature.</p> <p>6. Any development of the site would have significant local impact and should not be determined without fuller community engagement - eg through local residents</p>	4	<p>Noted. Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	<p>Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.</p>

		<p>associations such as the Tewkesbury Lodge Estate Residents' Association - prior to allocation. Should allocation be granted, we would want to see a community design exercise undertaken to ensure the above and any other community concerns are appropriately recognised and taken into account for any specific design proposals.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>I believe the proposed vision sounds ok but I'm wary about the allocation of public funds for revitalising local businesses and green spaces when there are larger problems in the area that are necessary but not necessarily revenue driving. After many years of dedicated collaboration with councillors on the traffic and safety issues of Drakefell and Gellatly Roads, we fully expected to see some mention of these roads in the detailed plan for the "West Area". However, Section 8 talks about transforming the South Circular, Brockley Rise and Brockley Road into "healthy streets" but there is not so much as a mention of Drakefell and Gellatly Roads. Perhaps we have misunderstood but it seems pretty clear from this document that our roads have been de-prioritised by Lewisham Council and no-one has taken it upon themselves to let us know.</p> <p>Again and again, Drakefell Road and Gellatly Road are ignored or overlooked by this Council. Many of us have worked hard repeatedly to provide evidence of local support for change and have even proposed ways of achieving this. And yet each time, just as we think we have finally managed to secure the funding required, things go very quiet and we learn, not from our ward councillors but through social media, that we have been pushed aside in favour of somewhere else, despite constant and indeed recent assurances from councillors that Drakefell and Gellatly are a priority for them. Last fall our car was totalled by a drunk driver speeding down Drakefell road who nearly drove into our house. We no longer feel safe living on a road that is a main thoroughfare for the council and never supported for traffic measures to be put in place.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>There is no mention of improvements to existing traffic flow in neighbourhoods.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>Nothing to do with my neighbourhood</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>Nothing to do with my neighbourhood</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	0	Noted	Local Plan amended to make reference to Drakefell Road/Gellatly Road.

		Action on and around the “Drakefell Gellatly Corridor” where problems around traffic speed, safety, congestion and pollution have been more than evident for some time and reported by members of the community countless times.			
3	LWA	<p>1. Do you have any comments on the proposed vision? Vision is good but must be inclusive of all areas. The Ravensbourne Road / A205 area and parade of shops is completely ignored, that is not right. Please don't ignore Ravensbourne Road / A205 area and parade of shops which is a real trouble spot and totally NEGLECTED.</p> <p>2. Do you have any comments on the proposed key objectives? Yes! Aim 8: Transform the South Circular (A205) and Brockley Rise / Brockley Road (B218) into 'healthy streets' with public realm improvements that make walking, cycling and use of public transport safer and more convenient. Your ambition here MUST extend to the deprived parade of shops of Stansted Road numbers 295-341, not just the corner with Brockley Rise. This parade is shabby, unloved and in serious need to support. There are 3 (THREE!) chicken shops within 300m, how unhealthy is that. Shops are empty and the fronts shabby. We need serious regeneration here with greater choice. The area is ALWAYS FORGOTTEN as it falls close to the border between wards. This is unfair and you are failing a diverse community with older and disabled people living here.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below Regeneration</p> <p>4. Please provide your comments on the topic(s) selected above? Please include Ravensbourne Road / A205 area and parade of shops</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. Please don't ignore Ravensbourne Road / A205 area and parade of shops which is a real trouble spot and totally NEGLECTED.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Please don't ignore Ravensbourne Road / A205 area and parade of shops which is a real trouble spot and totally NEGLECTED.</p>	0	<p>A comprehensive review of the borough's town centres and Local Parades has been carried out and used to inform the Local Plan.</p> <p>The Local Plan has a policy on restricting over concentrations of betting shops and fast food takeaways.</p>	No change.
3	LWA	<p>1. Do you have any comments on the proposed vision? Good vision - improving public transport links, revitalising local centres, and above all recognising the importance of maintaining green spaces.</p> <p>2. Do you have any comments on the proposed key objectives? On the face of it the objectives appear sound. However, not all proposals appear to meet the objectives.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p>	5	<p>Support for vision and objectives noted.</p> <p>Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.

		<p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. The proposal for the development of the land surrounding Havelock House seem to be at odds with the objective (point 9) to "Protect and enhance open and green spaces along with the distinctive woodland character of the area". Furthermore, it will do nothing to assist the council reaching its target to deliver net gains in biodiversity (Green Infrastructure (section 10)) because it will be reducing the area of green space within the Borough. . The Development Plan for the West Area makes important reference to the remnants of the Great North Wood that can still be seen in Forest Hill. The proposed area for development is in the best part of the Great North Wood that we have. The oak trees and natural woodland that are found here must be preserved.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Although a relatively small area, the wild life found is diverse and special as has been mentioned by others in their comments on this site. We have, during this pandemic, especially come to realise how important these green spaces are. It's not just about retaining the space and all that lives there for the sake of the wild life, it is also about our own wellbeing, physically, mentally and spiritually. Filling in every green space is counter productive, it may help to reach a target set today but it will do nothing for the future of our area. These precious spaces can easily be destroyed and once gone, they are gone forever. Their loss will not enhance the neighbourhood, it will instead distract from its very character, something the 'Vision' appears to want to protect and it will add to the burden of traffic and demands on infrastructure. On first reading the 'Vision', I thought that was recognised.</p>

Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	1	Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.	The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.

		<p>I've been customer of Dartmouth Service Garage for many years. Closing this place will have negative impact on local society as there isn't many garages in the area, especially ones that provide solid and reliable service.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? Many of the proposed sites need revitalisation and are ideal for building affordable homes and workspaces apart from a few sites in the West Area, where green and wooded spaces would be reduced.</p> <p>2. Do you have any comments on the proposed key objectives? The main objectives in the West Area Summary are realistic and take account of how the main centres within the Area could complement each other. I particularly applaud Objective 9: "Protect and enhance open and green spaces, along with the distinctive woodland character of the area. Deliver a connected network of high quality walking and cycle routes that link these spaces." and would expect any developments to be consistent with this.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA1: West Area place principles LWA2: Connected network of town centres LWA4: West Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above? LWA1: West Area place principles</p> <p>There is scope for intensification in terms of employment and dwelling opportunities for some of the sites identified, but this should not be at the cost of over-development in terms of the density of building and the erosion of green or wooded spaces.</p> <p>LWA2: Connected network of town centres</p> <p>Historical character is important in preserving much needed local distinctive qualities within a large metropolis. In the case of Forest Hill and its surrounds, the green spaces and wooded areas are distinctive features that would need to be preserved. In terms of public realm, social, cultural, spatial and physical characteristics are highly intertwined and the above amenities are an important contribution to how Forest Hill is experienced.</p> <p>LWA4: West Lewisham Links</p> <p>More cycle tracks would be a welcome feature and needed to complement the cycle parking mentioned.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Featherstone Lodge, Eliot Bank Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	4	<p>Support for objectives noted.</p> <p>Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p> <p>The Featherstone Lodge site allocation has a previous planning consent (reference DC/14/086666) although this has lapsed. The site allocation reflects the land use principles and site capacity established through the lapsed consent, also recognising that site specific matters have been addressed through the design-led approach and planning approval process. It is therefore considered appropriate to allocate this site to help address the Borough's identified housing need.</p>	Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.

		<p>Proposals for the majority the sites identified are welcome and would greatly improve the functionality and attractiveness of some areas that have become run down and not used to their potential. However, there are particular concerns regarding the proposals for two sites: Havelock House and Featherstone Lodge, Eliot Bank.</p> <p>In the case of Havelock House (which includes the Telecom site and Willow Tree House near Horniman Drive), development of 30 housing units within the backland portion would significantly erode what is currently a green and wooded area which, as a remnant of the Great North Wood, is also of historic significance. The proposal for this site is inconsistent with the principles stated in the proposed vision: the above remnants need be retained - not destroyed. There is also the need to maintain biodiversity and wildlife and the reduction of habitat and the wildlife corridor implicated in the proposal for this site would compromise this.</p> <p>Similar issues would arise from the provision of new buildings and the proposed development of 33 housing units for the Featherstone Lodge site.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? Revitalisation in terms of affordable homes and workspaces is welcome provided it is sensitive to the environment and does not at cost to the amenities that encourage local living – in particular green and wooded spaces.</p> <p>2. Do you have any comments on the proposed key objectives? The main objectives in the West Area Summary are realistic and take account of how the main centres within the Area could complement each other. 3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. We have carefully considered the proposal and we think that it is contrary to many of the principles that are set out in the Council's Development Plan.</p> <p>1. Within the Green Infrastructure (Section 10) section of the plan is the statement that "The Council will seek to deliver net gains in biodiversity (and support the London Plan to be 50% green by 2050". The proposed development of The Telecom Site will reduce the area of green space within the Borough by more than any other development plan being considered for Lewisham West and possibly by more than any other area of Lewisham as well.</p> <p>2. Similar points are made in GR3 (page 355) "development proposals need to maximise opportunities to retain these trees and avoid compromising and encroaching on available space for trees,"</p> <p>3. More specifically for the West Area, Point 9 of the objectives is to "Protect and enhance open and green spaces along with the distinctive woodland character of the area" This of course is reflected in place names - most notably Forest Hill. The proposed development is slap bang in the middle of the Forest on our Hill!</p> <p>4. The Development Plan for the West Area makes welcome reference to the remnants of the Great North Wood that can still be seen in Forest Hill (see paras 18.2, 18.8, 18.9, 18.13). These remnants form a wildlife corridor between Sydenham Woods and One Tree Hill, both of which are recognised as Nature Reserves in the London Borough of Southwark. The proposed development site is in the best part of the Great North Wood that we have in Forest Hill and for that matter in Lewisham. The Council should make sure that it retains not only all the Oak trees on the skyline but also the other areas of natural woodland that lie between The Telecom Mast, Willow Tree House and Havelock House.</p>	5	<p>Noted. Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	<p>Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.</p>

		<p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>6. The Oak trees on the development site are part of a wildlife corridor which traces the course of the Great North Wood from Sydenham Woods to Horniman Triangle, to Horniman Gardens, to the development site, to One Tree hill. Woodland birds migrate along this corridor. In Spring there are Chiffchaff, Willow Warblers and Blackcap (regularly), Buzzard (occasionally) and Firecrest (rarely). In late Summer there are Chiffchaff, Willow Warblers and Garden Warblers (regularly) and Pied Flycatchers (rarely), and in Winter there are Redwing (regularly) and Brambling, Siskin and Redpoll (rarely)</p> <p>7. Downland grasses, plants and invertebrates have been found on the nearby Honor Oak Road Reservoir Site, and a similar survey of the grassy slopes of the proposed development site would be prudent.</p> <p>8. We recommend that additional native trees be planted on the proposed development site. Street Trees for Living is already fundraising for Oak trees on the Horniman Triangle. We as a Residents' Association have worked with Street Trees for Living to fund raise for 50 trees on the streets around the proposed development site. We would be happy to volunteer to raise funds for Oak trees on the development site. Such planting would support the Council in its Plan. "The Council will seek to deliver net gains in biodiversity (and support the London Plan to be 50% green by 2050)".</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? The vision refers to the woodland character yet one of these proposals would directly and significantly affect the remaining woodland and green area between the Telecom site at Horniman Drive and Havelock House in Honor Oak Road.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. The area referred to as Havelock House in the document is a cause for concern for several reasons. The proposal to build up to 30 housing units in this place is deeply disturbing.</p> <p>The green area between Havelock House and the Telecom site in Horniman Drive contains 15 mature oaks which are a remnant of the Great North Wood. The Great North Wood has been reduced over the years and this remnant must be retained not just for historical reasons but also because we need the trees . They provide an</p>	6	<p>Noted. Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>	Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.

		<p>important function. They absorb carbon dioxide. They are good for our mental health too.</p> <p>There are also other trees in this place which also play an important part in creating the identity of this green area.</p> <p>The area is very significant because it supports wildlife. Any development here would threaten the trees and wildlife even if the trees are preserved. The council favours biodiversity and this proposed development would result in a significant loss of biodiversity.</p> <p>The area attracts people who visit the area and others who would like to live here. The area has magnificent views. These views should be protected rather than spoiled. This green space must be protected and preserved and this proposal would certainly result in the loss of important green space and the loss of health benefits such as the air quality.</p> <p>Fairlawn Primary school and Horniman school are both very popular and oversubscribed. The increased population would lead to more pressure on the schools and other services.</p> <p>The roads within this area have experienced problems with the number of cars racing through. The council has been informed of these problems but very little attention has been given to it to address it. We cannot afford to have even more road traffic as a result of this development.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? A good vision, but developing the site behind Havelock House would ruin it.</p> <p>2. Do you have any comments on the proposed key objectives? See below</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? See above</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. We have lived in this area for 40 years, and over that time have seen the degradation of the natural habitat: we used to have Hedgehogs at the bottom of our garden in Forest Hill, and a Tawny Owl would hoot from an old tree stump: these have disappeared. The area is ancient Downland, as witness Downland plants like Bird's Foot Trefoil and Yarrow that grow on the triangle at Rocombe Crescent.</p>	9	<p>Support for vision noted.</p> <p>Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.

		<p>Woodland flowers such as Dog Violet, Wood Avens and Lesser Celandine grow on the development site and adjacent gardens.</p> <p>Ancient Oaks form a Wildlife Corridor running from Sydenham Woods to Horniman Triangle, to Horniman Gardens, through the Telecom Mast site behind Havelock House, through back gardens, which contain many Oaks, to One Tree Hill, which is in Southwark. And enthusiastic local groups are planting even more Oaks on the Horniman Triangle, with ambitions to plant Hornbeam as well, to diversify and add to the existing trees and so replace some of the woodland that has been lost over time.</p> <p>The Telecom Mast site contains many Oaks and other trees that are an essential link in this this chain. Peregrine Falcons have been spotted on the Mast, from where they were clearly hunting the small birds which allowed them to rear a family last year. They, and many invertebrates and small mammals have thrived not just because of the mature Oak trees, but because of a whole ecosystem of scrub and other trees and bushes that make up this ecosystem. In addition, Red Kite, the occasional Buzzard, and even Hobby have been spotted from the hill. And many woodland birds, such as Nuthatch, Long Tailed, Coal and Blue Tits, Greater Spotted Woodpecker, Green Woodpecker, Greenfinch, Goldfinches, Goldcrest and even Firecrest can be seen in back gardens.</p> <p>Developing the site behind Havelock House would damage this ecosystem If we are to preserve this irreplaceable chain of wildlife we should be thinking, not of building on the site, but actually adding to the trees on it, in order to preserve it for posterity. This would contribute to an important goal in Lewisham's Development Plan which is "to deliver net gains in biodiversity (and support the London Plan to be 50% green by 2050)"</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>

Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Local issues regarding congestion and 'rat runs' will be passed along to colleagues in the Transport service.</p>	Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.

		<p>corridor between One Tree Hill and Horniman Gardens. The green space on the site is valuable as wildlife habitat. Also further development might well impede current striking views.</p> <p>In addition, traffic in the surrounding streets already gets heavily congested. During peak times local residential streets are used as a "rat run" and become very clogged. This creates pollution and is sometimes also dangerous. I think the current roads could struggle to cope with more traffic.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>N/A</p> <p>3. Select the site(s) and comment below</p> <p>Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>30 units could be too dense for the area available, particularly if the older trees are to be saved. A compromise would be to find a balance between green and housing</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>	7	<p>Noted. Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	<p>Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.</p>
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>None selected</p>	0	<p>Noted. The Low Traffic Neighbourhood scheme is outside the scope of the Local Plan. However the plan does include new policies which aim to improve support liveable neighbourhoods and placemaking through public realm enhancements, particularly in terms of supporting and encouraging walking and cycling and reducing car dominance. This includes Part 2 policies on Public Realm and Healthy Streets.</p>	<p>No change.</p>

		<p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Placeshaping - I've recently moved to the area (SE23/SE4 border) and one of the most successful bits of placeshaping that I've had the pleasure to come across are the LTN and assorted seating area by Eddystone Road bridge - it's truly fantastic! It's used all the time, even in the depths of winter and really is a hidden gem of a spot that seems really loved by the community. I've also seen the free bike-fixing service there a few times which is a great spot given it's such a well used route from Peckham into west Lewisham Borough. I know there are a lot of other bridges that intersect the Overground mainline, I think similar Public Realm interventions could be enacted at most of the other spots. It would also very much support the "Places to Dwell" ambition of the plan.</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? We welcome the proposed vision, in particular improving public transport links, revitalising the local centres and most of all focusing on improving environmental concerns and maintaining green spaces.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? Very supportive of improving walking and cycling access and safety around the intersection by Forest Hill Station, as well as anything that can be done to address pollution - this is presently an unpleasant area that feels dangerous as a pedestrian or cyclist</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. We would have strong reservations over any development of this site.</p> <ul style="list-style-type: none"> - This area - including, but not limited to the mature oak trees - is an important part of a local wildlife corridor, and building over this site is likely to have a significant detrimental effect to local wildlife habitat. - The proposal appears contrary to the stated objective to "Protect and enhance open and green spaces, along with the distinctive woodland character of the area". - I am particularly concerned over any additional pressure on traffic on Honor Oak Road - it is already extremely dangerous walking along this road during the school run to Fairlawn School - as I go into detail below. 	8	<p>Support for vision and improving walking and cycling is noted.</p> <p>With regard to the suggested road improvements we will pass your comments on to the Transport team.</p> <p>All development within Forest Hill will be car-free or car-lite in accordance with the London Plan parking standards.</p>	No change.

		<p>- vehicular access to site - it is unclear what the proposal is but I am concerned this would also push more vehicle traffic onto the residential roads around the site.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>As mentioned above, I find the approach to Fairlawn School along Honor Oak road to the west of the school extremely dangerous for pedestrians, especially children, and would like to see some improvements to this incorporated into the local plan. This appears in scope for the vision and objectives of the plan.</p> <p>The pavement between the Canonbie road junction with Honor Oak Road, and the school, is extremely narrow, and at least once a week significantly narrowed even further by bins being put out; I regularly find myself forced onto the road walking to and from school, even before we were required to follow pandemic related social distancing.</p> <p>Furthermore there have been more than one occasion where inconsiderate roadworks contractors have further narrowed the pavement by placing roadworks signs on the pavement, typically reducing the pavement width to less than a half.</p> <p>Northbound motor traffic also regularly turns from Honor Oak Road into Canonbie Road without due care and often cutting across the corner of the pavement - again this is extremely dangerous during the school run when families are trying to cross the road.</p> <p>I would love to see some proposals for remedying this and making the pedestrian access to Fairlawn a safer and less stressful daily experience</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. The proposed redevelopment of Willow Way LSIS is wholly unacceptable. This area is currently sympathetic to the area with a mix of industrial units. In particular, Dartmouth Service Station is an essential and integral part of the Sydenham/Forest Hill community. This established local business is irreplaceable as a part of, and indeed at the heart of, the local area - providing unsurpassed service, value and integrity in dealing with their customers. This area does not need any additional new retail units and the proposed residential development in the Willow Way LSIS is a monstrous eyesore that will destroy the ambience of this historic part of Sydenham.</p>	0	<p>Noted. The draft Local Plan proposals for Willow Way LSIS aim to provide for a comprehensive and employment-led mixed-use redevelopment. It is considered that a more optimal use of land could be made on vacant land and some underused parts of the site. The policy sets out a clear no net loss of industrial floorspace principle, with the expectation an intensification of business uses can be delivered. It is also considered that the revitalisation of the LSIS can support the vitality and viability of the Upper Kirkdale centre, including through new public realm and townscape improvements.</p> <p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>	<p>The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house</p>

		<p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Yes - find an alternative location and leave well alone.</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? I think that the vision for Lewisham West is exactly right, but you are not following it in some cases - see below.</p> <p>2. Do you have any comments on the proposed key objectives? I agree with the spatial objectives for Lewisham West.</p> <p>However, I think that the objective of creating a "healthy street" along the South Circular Road is unrealistic. The council has no responsibility for the South Circular, and TfL, which is responsible, can do little. A team from TfL looked at tree planting opportunities along the South Circular Road in Forest Hill and found hardly any sites where trees could be planted. There were too many "subsidence hot spots" and too many underground services. As long as traffic pollution continues to increase, the South Circular Road is likely to remain an unhealthy environment.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA1: West Area Place principles</p> <p>4. Please provide your comments on the topic(s) selected above? The principle that green spaces should be protected, integrated and connected is correct, but the development proposals for the Havelock House site, if accepted, would have the opposite effect (see below).</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. This is the greenest site that is mentioned in the Development Plan for Lewisham West, and possibly in the whole of Lewisham.</p> <p>1) It includes at least 10 mature Oak trees, as well as many other native trees, a hedge and areas of grass.</p> <p>2) It supports a large population of small birds which fed the 2 Peregrine Falcons which hunted from the Telecom mast last year and early this year.</p> <p>3) It is part of the wildlife corridor of Oak trees in fragments of the Great North Wood from Norwood, to Crystal Palace, to Dulwich Woods, to Sydenham Woods, to Horniman Gardens, to the Telecom mast, through back gardens in Liphook Crescent and Ringmore Rise to One Tree Hill.</p> <p>4) This is the longest wildlife corridor that runs through Lewisham, and is the only one that is threatened by the Development Plan.</p> <p>5) The corridor is deteriorating as the result of recent development, and the Tawny Owls and Hedgehogs which were seen in the Forest Hill part of this corridor 30 years ago have now retreated to Sydenham Woods.</p>	9	<p>Support for vision noted.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Whilst recognising that the South Circular is a TfL road, the Council considers there are opportunities to enhance the qualities of it by applying the Healthy Streets approach. The Council will continue to work with the London Mayor, TfL and other stakeholders to improve the quality of the environment along the road especially for travel by walking, cycling and public transport.</p> <p>Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	<p>Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.</p>

		<p>6) Despite this deterioration, the Forest Hill part of this corridor has this year seen 50 Redwing from Scandinavia, one Chiffchaff and one Blackcap from Africa, and one Red Kite on local migration.</p> <p>It is not sufficient to protect the Oak trees alone. In order to regenerate itself, the wood needs woodland clearings and areas of scrub where saplings can grow and birds can nest.</p> <p>No one doubts that Lewisham needs more housing, but on this site - surely the greenest in the Development Plan - the case for conservation is stronger than the case for development.</p> <p>As local residents we have funded the planting of 25 street trees that support this corridor, and connect the Telecom mast site both to One Tree Hill and also to Horniman Gardens. We have also planted another 25 trees in surrounding streets. As far as this site is concerned, local residents are following the Development Plan by connecting up fragments of the former Great North Wood. By asking for development proposals on the Telecom Mast site the Council appears to be going against the Development Plan and weakening a link in the wildlife corridor.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>No</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? I wholly agree with making Sydenham more 'healthy' and attractive centre to live in.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. I don't agree with closing down businesses i.e the garage, which has been a trustworthy business serving this community for many years to build apartment blocks. I understand it is a compulsory purchase which is very rude and unfair. Where are they supposed to go? What about all us residents who use them? At least with the garage there, is is open air and you're not walking past an oppressive high rise (and exactly how 'high rise' is proposed - they should be banned! What about all the apartments next to Sainsburys at the roundabout, have they all been filled, there are so many going up, does the garage really need to be closed down? They're a busy business and should remain part of the community.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	0	<p>Support for vision noted.</p> <p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>The draft Local Plan does not include any details or proposals around the compulsory purchase of specific land or sites.</p>	<p>The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>

		Lots of bike lanes, more greenery			
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. It is outrageous that Lewisham Council is considering expropriating the Dartmouth Service Station. They provide an essential service, local jobs and great service to the community. How can killing honest and useful businesses "benefit" the local community? And what about the Bricklayers? This historic pub will be dwarfed by high rise buildings! Who could, in their right mind, think that it is a good idea?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Do not kill businesses and destroy local jobs!</p>	0	<p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>Noted. The Council recognises the important role that public houses play in the local economy and its Lewisham's distinctiveness. Therefore, the draft Local Plan Policy EC7 (Public houses) sets out a new 'presumption in the favour of the retention of public houses'. This will help to ensure that any future proposals for redevelopment of land within the Willow Way LSIS site fully consider the pub and its amenity through the masterplan and design-led process. However it is acknowledged that the site allocation policy could be amended to provide more clarity on the need to protect the public house and its amenity.</p>	<p>The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>Willow Way LSIS site allocation amended to include new development guidelines around protecting the character and amenity of the pub.</p>
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? As stated in no. 9, 'It is important to protect and enhance green spaces along with the distinctive woodland character.' This is why I disagree with the proposed 30 new units. The proposed development contradicts the objective.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p>	9	<p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>it is acknowledged that site constraints limit the potential developable area. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>

		<p>This site retains remnants of the Great North Wood. This is part of the distinctive woodland character of the area. It is a wonderful natural space and it is vital to protect the mature oaks, trees, shrubs and diverse animal life which lives there. (There have even been peregrine falcons nesting.) These plans seem to have been drawn up without really taking into account how special the area is. I appreciate that building additional homes is important but I really do believe that retaining this small area of biodiversity is essential. We need to protect it for future generations</p> <p>If the units are built, there will be more traffic. Honor Oak Road is already often at a standstill and the pupils at Horniman and Fairlawn Schools, as well as local residents, will be affected by pollution, noise etc.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>If Honor Oak Road is even more congested, people will start to drive on the residential roads, looking for an alternative route. Local amenities will also be further stretched.</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. Please, please don't make the Dartmouth rd. garage have to leave! It is a wonderful local business that is so used by so many people in the community. They provide a much needed service and always help out local people when they are in need. I am sure rejuvenating the area will be great but please not at the expense of this much used business.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	0	Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.	The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.
3	LWA	<p>1. Do you have any comments on the proposed vision? The vision to reinforce the historic fabric, landscape and woodland character of Forest Hill is good on paper but why then select for development from the outset Havelock House, a green site with ecological and historic significance (it contains Lewisham's most important remnants of the Great North Wood)?</p> <p>2. Do you have any comments on the proposed key objectives?</p>	9	Noted. Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment	Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.

		<p>The key objective 9 to protect and enhance our green spaces, along with the distinctive woodland character of the area, is vital and particularly important for Forest Hill which retains remnants of the Great North Wood and is included in a line of trees form an important wildlife corridor from Sydenham Woods to One Tree Hill. Developments must not be allowed to destroy this key ecological feature which is so important for wildlife, air quality and well-being. The proposed development at the green, wooded Havelock House site undermines this objective completely and should be withdrawn.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. The Havelock House Site should be removed from the Development Plan. The proposal to construct 30 units on this green site contradicts the Council's vision and objectives to protect and reinforce our distinctive green spaces. This site contains mature oaks and other trees, shrubs and grassland and is an important habitat for many birds and other wildlife which must be protected. Any development on this site will destroy the natural habitat and, even if some mature trees are retained, the loss of green space will be significant. The Plan states that developments should not compromise and encroach upon available space for trees, and that the Council will protect wildlife habitats aiming to maintain and improve special biodiversity so net gains are made. Development on this site will do the complete opposite.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Forest Hill can be an important contributor to supporting the Council in achieving the London Plan's objective to be 50% green by 2050 but only if the development and planning policies truly protect and enhance our existing green sites and trees.</p>		<p>on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	
3	LWA	<p>1. Do you have any comments on the proposed vision? The vision is flawed due to the policy of promoting urban growth and development with increasing emission of pollution and greenhouse gases over the more important one of maintaining open space to reduce pressure on the environment and economic resources. On the reservoir site on Forest Hill commercial development should be kept to the minimum possible density and on the radio aerial site priority should be given to retention of the mature trees and other natural growth to the benefit of the environment and wildlife.</p> <p>2. Do you have any comments on the proposed key objectives? As above</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p>	6	<p>Noted. The Local Plan sets out a positive strategy for managing future growth and development across the borough, having regard to the Good Growth policies set out in the London Plan and the principles of sustainable development set out in Government's National Planning Policy Framework.</p> <p>Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment</p>	<p>Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.</p>

		<p>LWA3: Forest Hill district centre</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/a</p>		<p>on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	
3	LWA	<p>1. Do you have any comments on the proposed vision? The vision to reinforce the historic fabric, landscape and woodland character of Forest Hill while retaining the village qualities (low rise residential areas with green spaces) and views is welcomed. There is not much about Clean Air and improving air quality for the Area - Honor Oak Road is stand still during rush hour and with Fairlawn School, pollution levels should be taken into consideration with more residential buildings .</p> <p>Site allocation of the Havelock House plot for development of 30 units which, as it will take away green space, create more pollution with cars - extra deliveries - already congested with huge increase in vans - has any one done a study in the increase?</p> <p>2. Do you have any comments on the proposed key objectives? Objective 4 to establish a Cultural Quarter for Forest Hill is an excellent idea.</p> <p>Objective 8 to establish Healthy Streets is essential and should be a priority for safe walking and cycling routes - be clean with reduced pollution which is a real problem for our Area and must be tackled by the Council for the future health of residents, particularly children.</p> <p>Obejctive 9 to protect and enhance our green spaces with the distinctive woodland character of the area is so important for so many reasons; well-being; air quality; biodiversity; wildlife corridors etc. As this is a key objective, it seems totally wrong to have then allocated the Havelock House site (a small remnant of the Great North Wood with significant old oaks and an important wildlife corridor) for development. The plan contradicts the objectives of the plan - people living and children should take priority in terms of safety and health.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p>	9	<p>Support for vision and objectives noted.</p> <p>Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p> <p>A site screening process has been carried out as part of the land availability assessment which has informed the Local Plan, and the site allocations. Further information is set out in the Site Allocations Background Paper, which forms part of the local plan evidence base.</p> <p>The draft Local Plan has been subject to an Integrated Impact Assessment which includes consideration of Sustainability Appraisal and Strategic Environmental Assessment.</p>	<p>Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.</p>

		<p>Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>The proposed development of 30 residential units is on a green site which is important for biodiversity and forms part of a significant wildlife corridor (with Peregrine Falcon nesting) - there are mature oaks, other trees and shrubs and grassland all of which would either be destroyed by the development or severely compromised. This is one of the last remaining areas of the Great North Wood in Lewisham which should be preserved and enhanced rather than damaged and reduced.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>National Park City objective which the Council supports but this is contrary to some of the objectives within the planning. The National Park City objective must be followed through in local site selection and planning decisions - and a full impact assessment published.</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>The vision to reinforce the historic fabric, landscape and woodland character of Forest Hill while retaining the village qualities (low rise residential areas with green spaces) and views is welcomed. There should be much more in the vision about Clean Air and improving air quality for the Area.</p> <p>Recognition of the West Area's character of green spaces and the remnants of the Great North Wood is also fantastic. However, this does not seem to be followed through with the site allocation of the Havelock House plot for development of 30 units which, as it will take away green space, runs contrary to this vision.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>Objective 2 to secure the viability of the the network of town and local centres is fantastic.</p> <p>Objective 4 to establish a Cultural Quarter for Forest Hill is an excellent idea.</p> <p>Objective 8 to establish Healthy Streets is essential and should be a real priority to deliver safe walking and cycling routes which should not only be safer and more convenient but also clean with reduced pollution which is a real problem for our Area and must be tackled by the Council for the future health of residents, particularly children.</p> <p>Obejctive 9 to protect and enhance our green spaces with the distinctive woodland character of the area is so important for so many reasons; well-being; air quality; biodiversity; wildlife corridors etc. As this is a key objective, it seems totally wrong to have then allocated the Havelock House site (a small remnant of the Great North Wood with significant old oaks and an important wildlife corridor) for development. How can we have any faith in these objectives when this is the case?</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LWA3: Forest Hill district centre LWA4: West Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above?</p>	7	<p>Support for vision and objectives noted.</p> <p>Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p> <p>The Local Plan Part 2 policies on Green Infrastructure set out approaches and priorities for urban greening, including tree planting. The Council will continue to work with stakeholders to investigate opportunities for tree planting around schools, however the specific details of which are not included in this strategic document.</p> <p>A site screening process has been carried out as part of the land availability assessment which has informed the Local Plan, and the site allocations. Further information is set out in the Site Allocations Background Paper, which forms part of the local plan evidence base.</p> <p>The draft Local Plan has been subject to an Integrated Impact Assessment which includes consideration of Sustainability Appraisal and Strategic Environmental Assessment.</p>	<p>Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.</p>

		<p>Forest Hill Centre - the vision to establish the centre as a key hub with employment opportunities and with enhanced place quality is essential and long over due. Pedestrians and cyclists need to be a priority in designing the enhancements. New cycle ways and footpaths are welcomed</p> <p>Tree planting schemes and other green infrastructure schemes should be a priority, particularly for those areas where there is traffic pollution - more green screens to protect children at school and play.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. As set out above the allocation of Havelock House site for the development of 30 residential units is CONTRARY to the vision to reinforce the woodland character of the area and the objective to protect and enhance green spaces. The proposed development is on a green site which is important for biodiversity and forms part of a significant wildlife corridor - there are mature oaks, other trees and shrubs and grassland all of which would either be destroyed by the development or severely compromised. This is one of the last remaining areas of the Great North Wood in Lewisham which should be preserved and enhanced rather than damaged and reduced</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Green spaces and biodiversity are going to be key for the future health of our city and should not be sacrificed for short term goals. Green spaces should only be developed as a last resort and efforts should be made to increase green space. This is part of the National Park City objective which the Council supports but this must be followed through in local site selection and planning decisions.</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? Gross overestimation of the permanent jobs all the proposals will produce, whilst removing existing and much needed industrial / retail sites which provide potential for small business regeneration , local employment opportunities. whilst increasing over densification of housing where will these people work? not all will be screen people or be able to work locally due to lack of retail/ light industrial zones remaining so travelling will increase local traffic pollution etc..</p> <p>2. Do you have any comments on the proposed key objectives? Challenge central Government on targets , and if they are all local... its too much. Too many people.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA3: Forest Hill district centre</p> <p>4. Please provide your comments on the topic(s) selected above? Too much crammed in around the railway. Sites by the tracks needed for electric car points. Very few residents will have a place to recharge an electric car on their street and making it difficult wont stop people wanting a car or bike and needing somewhere for them to be mended</p>	0	<p>The Local Plan sets out a positive strategy for managing future growth and development across the borough, having regard to the Good Growth policies set out in the London Plan and the principles of sustainable development set out in Government's National Planning Policy Framework.</p> <p>Like all London Boroughs Lewisham is trying to tackle a housing crises and are directed by the London Plan to plan positively to meet its housing targets of 1,667 homes per annum.</p> <p>The Local Plan also sets out indicative capacities for site allocations which achieve 40,000m2 of net employment floor space and 40,000 m2 of net Town Centre uses.</p>	No change.

		<p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Featherstone Lodge, Eliot Bank 113-157 Sydenham Rd 154-160 Sydenham Rd 74-78 Sydenham Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. The garden should be left as such. more degrading of the Ridge .along with Wells Park Road, Maids House proposals, Castlebar future, the plans for several large remaining houses along Sydenham Hill.</p> <p>Not enough mixed use..just monotonous flats with retail units beneath destroying historic fabric, car parking, mixed use landuse</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Local businesses can include workshops, garages , electric charging areas, local food hubs for things like Just Eat, not zoned away in another area.</p> <p>Destroying local fabric in all areas of Lewisham is not what locals want ..all these new homes are for potential incomers to the borough.</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. 		<p>N/a</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>We are desperate for more council homes and not 'genuinely affordable homes'. Moreover I have no faith in the wording as time and again developers cite unviable business case to reduce the number of affordable homes to circumvent your 'Vision'. So please understand it is reasonable to think this is not going to happen as original set out in the vision. We have enough private developers who are in it for the profit and seldom with the community in mind. Its nice to build affordable homes, but much better for the community to build council homes that addresses the acute shortage of council homes caused by decades of selling council houses and mismanagement of UK housing by the current and previous governments.</p> <p>What will happen to MOT garage? The neighbourhood has lost the MOT centre on Clyde Terrace by the railway line.</p> <p>Cars will still need an MOT even after electrification of cars and this is a local and much more convenient MOT centre than the one along the busy south circular road in Forest Hill.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>In the vision there is no mention of building more council homes, improving air quality and more green spaces.</p> <p>I saw one proposal with a high rise flat dwarfing the Brick Layers pub. This striking mismatch of architecture strikes me as unsympathetic to the local low rise neighbourhood.</p> <p>The vision mentions cycle routes. Will these be separated cycle lanes. Studies have shown that more people would cycle if cycle lanes were separated from other road users, especially women and families who would welcome this safer option.</p>		<p>provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>The draft Local Plan policy HO3 (Genuinely affordable housing) sets out proposals for any new affordable housing be affordable to be linked to local income levels. Accordingly, for Lewisham, genuinely affordable housing means housing at social rent levels or GLA's London Affordable Rent level and below, aiming for target rents. This would include Council housing.</p> <p>The Local Plan strategic objectives and policies address genuinely affordable housing, improving air quality and protecting/enhancing green and open spaces. The borough-wide vision and objectives set out in Parts 1 and 2 of the Local Plan will need to be considered alongside the area-based policies included in Part 3.</p> <p>The Local Plan supports and seeks to promote cycling through the Healthy Streets Approach (see the Part 2 Transport policies for further details). The specific nature of cycleways and cycle provision will be considered on a case-by-case basis, however this may include segregated lanes.</p>	<p>process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>Long-term viability and vitality of these community centres depends on good cycling and walking infrastructure, and as a cyclist, runner and regular walker I am supportive of this approach, and of protecting and enhancing green spaces.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p>	0	<p>Support for vision noted.</p> <p>The indicative site development capacity for the site allocation at 111-115 Endwell Road has been set using a standard methodology, as set out in the Site Allocations Background Paper. The optimal capacity of the site will be established at through the planning application process, and informed by the designed-led approach.</p>	No change.

		<p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above? Brockley Rise becoming pedestrianised is a good idea</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below 111-115 Endwell Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. A building of 65 residential units is out of scale with the local architecture and presents a challenge for local resources e.g. schools, transport. Proper consideration needs to be given to the public realm to support a place-based community.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>

		<p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. I fail to understand how compulsory purchase of the land around the council depot to built flats will benefit locals. We have great facilities with both a nursery and a garage providing necessary services which are in constant demand. The closure of the garage with no other local alternative will mean the permanent closure of the business and loss of jobs. I have no problem with new housing but cannot see why people have to be put out of business. Your document states: "Development must not result in a net loss of industrial capacity" but takes no account of the type of businesses and their involvement in the local community. From the look of the visuals the main thrust of the development is to provide housing but your document seems to stress improvements to the public realm, which seems rather disingenuous.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>The site allocation is not considered to preclude the retention or re-provision of space or units to accommodate existing businesses within the site boundary.</p> <p>The draft Local Plan does not include any details or proposals around the compulsory purchase of specific land or sites.</p>	
3	LWA	<p>1. Do you have any comments on the proposed vision? There is no need for more flats especially if it is taking away the livelihood of families ie dartmouth garage. I have been using this garage for 30 years, it is a family run business and needs to stay and support the local community rather than have to go to places like Halfords</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. This should perhaps be tidied up but the garage must stay. There is not enough family run places anymore and this site has been used for this for 30 years or more. This supports the local community and must be kept.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	2	<p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. The site allocation for Land at Forest Hill Station West includes development guidelines around design, including buildings heights, which will assist with the implementation of the Part 2 policies on High Quality Design, and refer to the site's relationship with buildings on the opposite side of the railway line.</p>	No change.
3	LWA	<p>1. Do you have any comments on the proposed vision?</p>	2	<p>Noted. The Local Plan is required by National Planning Policy Framework to set a positive strategy for</p>	The site allocation for the Willow Way employment site has been

		<p>Willow way and Clyde vale developments are not viable. It is cramming more housing into already small overcrowded street. Clyde cake is a quiet road with a community spirit. This will be lost with overdevelopment.</p> <p>The Willow way development will mean losing vital businesses to the local area. The garage is vital to the local community and shouldn't be lost for yet more housing.</p> <p>2. Do you have any comments on the proposed key objectives? The objectives will lead to overcrowding and the loss of the community feel of Forest Hill. It is already a busy area, which does not have the space or amenities for more people.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Clyde Vale LSIS Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. See comments above: Clyde Vale is a quiet community road which simply cannot cope with more development. I strongly object as it's already over populated with no where to park. Willow way: loss of popular local garage which is vital to local community.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Stop overpopulating an area</p>		<p>delivering sustainable development, and within this context, meeting identified needs for new homes, workspace and jobs, and town centre uses along with supporting infrastructure. The London Plan sets a housing target for Lewisham which the Council must seek to address through the preparation of the local plan. It also directs Borough's to make the optimal use of land and sites, particularly in highly accessible locations such as town centres and their surrounds.</p> <p>The Council has undertaken a comprehensive assessment of land available for potential redevelopment to inform the preparation of the Local Plan. The amount of growth and development planned for the West Area is limited when compared to some other parts of the Borough (particularly Central and North areas).</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies. A carefully managed and more restrictive approach to car parking will be taken, in line with the London Plan parking standards.</p> <p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>	<p>amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>
3	LWA	<p>1. Do you have any comments on the proposed vision? Development of brownfield sites (if which there seem to be several) is a good way to proceed Unstructured green spaces are the lungs of the city; they are few and far between and should be protected at all costs - especially as destroying them will damage the biodiversity of the area</p> <p>2. Do you have any comments on the proposed key objectives? I understand the need to more houses but, as mentioned, development of brownfield sites is far preferable then destroying green spaces. We need to protect all the remaining green spaces for future generations</p>	8	<p>Noted. A site screening process has been carried out as part of the land availability assessment which has informed the Local Plan, and the site allocations. Further information is set out in the Site Allocations Background Paper, which forms part of the local plan evidence base. The process has informed the identification of a number of brownfield sites within and around Forest Hill district centre for which site allocations have been prepared.</p> <p>Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be</p>	<p>Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.</p>

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA3: Forest Hill district centre</p> <p>4. Please provide your comments on the topic(s) selected above? Dilapidated areas and brownfield sites close to Forest Hill station would benefit from investment and redevelopment - but please do not destroy the few remaining green spaces</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. The impact of building 30 residential units would be very negative on the area - adding too many additional vehicles on a busy school road (danger to children) and having a negative impact on local services which already appear to be quite stretched</p> <p>The area near the radio mast is a small area containing some of the last remaining trees of the Great North Wood - which are home to various species of insects, birds and animals. These small green sites should be protected for the generations to come</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Please concentrate on reviving the various areas of dilapidated, run-down buildings and brownfield sites around Forest Hill station rather destroying any of the few remaining green areas that are vital to the health, welfare and happiness of the local community</p>		<p>removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Jenner Health Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p>	0	Noted.	No change.

		<p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? The vision needs to be clearer with more specific detail.</p> <p>2. Do you have any comments on the proposed key objectives? Objective 1 needs to be unambiguous in terms of what an 'interchange' is - it is NOT moving bus stops, it is reopening the platforms of the Dartford to Victoria railway line, interchanging with current Southern/Overground services.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA2: Connected network of town centres</p> <p>4. Please provide your comments on the topic(s) selected above? We need to be absolutely clear that a Brockley interchange is not simply moving bus stops. It's to reopen the high level line platforms to enable rail to rail interchange between the Overground/Southern services to the South Eastern services to Victoria which do not stop here. This gives local community rail connections east/west to complement the existing north/south facility. Additionally the waste land (hidden behind advertising hoarding) at the corner of Mantle road and Endwell Road can provide a secondary station entrance.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below 111-115 Endwell</p> <p>6. Please provide your comments on the site allocation(s) selected above. Bringing the 111-115 Endwell road site to a more 'in keeping' architecture style is needed. However, the height concern should be extended to the southern side - this is also residential. The impact of 65 new homes will be substantial on the local transport network. The trains through Brockley are already at capacity (outside of COVID) and it's unlikely more capacity could be added to existing lines. Reopening the high level line platforms between Dartford and Victoria will introduce large amounts of new capacity to central London and east to Lewisham centre - which currently doesn't exist</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? The site on the corner of Mantle road and Endwell road (eastern side of mantle road) is currently unused and hidden by advertising hoarding. This needs to be allocated to an interchange, along (potentially) with the disused yard at 28 Brockley Cross.</p>	1	<p>The Local Plan is a strategic policy document. Detailed plans for improving Brockley Station and services that serve the station will be discussed in collaboration with TFL and Network Rail. The Local Plan has been underpinned by the Transport Strategy, Local Implementation Plan and Rail Strategy.</p> <p>The Local Plan sets out an indicative capacity for the site allocation, which is based on a standard methodology taking into account site setting, public transport access and other considerations. Further details are set out in the Site Allocations Background Paper, which forms part of the local plan evidence base. The optimal capacity of the site will be established through design-led approach and the formal planning approvals process.</p>	No change.
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p>	4	<p>Land ownership information noted.</p> <p>Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is</p>	Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA3: forest Hill district Centre</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS Havelock House Teleco Site</p> <p>6. Please provide your comments on the site allocation(s) selected above. Proposed residential site using backland to Haverlock House, Willow Tree House and Telecom Site: the proposed red line boundary includes privately owned land owned by Clarence Court Management Company as shown on HM Land Registry title SGL 430489. Local plan to be updated to not include this stretch of land.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.	
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. The Dartmouth service station has been servicing cars and doing MOT's for at least 20 years providing a good and valuable service for the local community and should not be closed. Good and reliable car mechanics are hard to find and I am sure all those who use this garage will be concerned at having to find another garage</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	1	Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.	The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.
3	LWA	<p>1. Do you have any comments on the proposed vision?</p>	9	Noted. Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be	Local Plan amended to remove the site allocation for the Havelock House,

		<p>I am in favour of the principles of protecting and enhancing green spaces and biodiversity as well as reducing the congestion and air pollution on the South Circular/Brockley Rise.</p> <p>There is an assumption that further house building is required, but how carefully has this assumption been tested? Following the Covid pandemic it will be important to assess how many retail units are needed in the area, and whether repurposing them may provide sufficient additional housing.</p> <p>2. Do you have any comments on the proposed key objectives? I support objectives 8 and 9 in particular</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. This is a small handkerchief of green space with old trees, almost entirely surrounded by residential dwellings. To plan to build on this land flies in the face of the stated objectives in the plan to protect biodiversity and enhance green spaces. Peregrine falcons as well as other birds visit it and nest nearby.</p> <p>The reservoir land on the other side of Horniman drive is in the process of being dug up and destroyed, to the detriment of surrounding houses, not to mention the wildlife there. To allow building to take place on the Havelock House site would be to add insult to injury.</p> <p>There has already been a large increase in traffic and air pollution around Horniman Drive and surrounding streets as a result of the increase in visitors to Horniman Museum and Gardens in recent years and the change of use of what was a care home at the other end of Horniman Drive. This is to the detriment of the health of residents as well as children at Horniman Primary School</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Any changes in traffic management should be assessed for unintended consequences such as rat runs through previously peaceful areas.</p>		<p>removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>However specific traffic management interventions, such as Low Traffic Neighbourhoods, are generally outside the scope of the Local Plan.</p>	<p>Telecom site and Willow Tree House site.</p>
3	LWA	<p>1. Do you have any comments on the proposed vision? Yes don't do anything and save the Jennifer Health centre</p> <p>2. Do you have any comments on the proposed key objectives? No</p>	0	<p>Noted. The site allocation for Health Centre will enable the facility to be re-provided at the current site as part of a new mixed-use development. Any proposal for off-site re-provision would only be considered where other Local Plan policies on community infrastructure are satisfied.</p>	<p>No change.</p>

		<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Jenner Health Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. Do not do anything as this health centre is local, friendly and we need this for the public and pharmacy</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? In general I support the vision. It is sympathetic and thought through, if a little unambitious.. I especially like the proposals to protect and enhance the open and green spaces of the area and to preserve the woodland character of its historic landscape. However, I do not agree with the proposal for housing development at the Havlock House Telecom Site. This would not be in keeping with the protection and enhancement of green spaces and would be harmful to the character of the surrounding area.</p> <p>2. Do you have any comments on the proposed key objectives? They are adequate as far as they go but could do more on curbing air and noise pollution, particularly around schools; creating more routes for walking and cycling and introducing measures to increase biodiversity.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. The proposal to build 30 homes on the Havlock House Telecom Site is misconceived. Not every Piece of land has to be built on! People need space. This site is another fragment of the Great North Wood which the plan says it wants to protect and enhance. The steeply sloping site is not suitable for housing: it would destroy a long established habitat for wildlife; lessen the quality of life for nearby residents, particularly those in Havelock House who would be completely overlooked from above and it would put a strain on local resources. Even if it was a suitable site for</p>	7	<p>Support for vision noted.</p> <p>The objectives for the West Area are generally spatial objectives. Part 1 of the Local Plan sets out wider strategic objectives which address matters such as air quality, sustainable transport and movement and green infrastructure. These borough-wide objectives should be taken together with the area-specific ones.</p> <p>Noted. Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.

		<p>housing development, a density of 30 homes is far too high and nothing above 10 homes should be contemplated.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>No</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below 113-157 Sydenham Rd 74-78 Sydenham Rd 154 -160 Sydenham Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. Too much density housing. Why should local people have to go to Bell Green or Lewisham to go to Lidl Aldi. when there is a popular Lidl with parking already there. The nature and character of that part of Sydenham Road would be demolished.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Why arent there more areas designated for uses other than housing. Where do you think people will work and how far will they have to travel which negates the idea of localism. Not everyone works from a screen ..</p>	0	<p>Noted. The site allocations signposted are for the mixed-use redevelopment within a town centre location, and will enable the provision of commercial or retail units at the ground floor level with residential above. They will continue to allow for employment opportunities in the local area. The site allocations would not preclude existing supermarket from continuing to operate at the location.</p> <p>The policy proposals are considered to be in accordance with the London Plan, which directs the Local Plan to promote managed growth and development within and around town centres and other accessible locations. Development requirements and design guidelines have been included to ensure that any future planning applications take account of and respond positively to local character through the design-led approach.</p>	No change.
3	LWA	<p>1. Do you have any comments on the proposed vision? Dartmouth garage is in the area</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. I am a resident on Horniman drive and saw the notice on the telegraph pole by the gates into the telecoms site that development was being proposed. At the same time the reservoir site across the road from me has been devastated. I looked into the havelock house site, and there were four foxes in daylight obviously evicted from the reservoir site opposite. We cannot just ignore nature. There are a variety of nests and trees fauna and flora that has been undisturbed on this site and we should try to preserve and not destroy these precious natural spaces. Building always disturbs the terrain up on this hill. There is great risk of subsidence The traffic has become so busy on Honor oak road going down to the Tesco garage it is invariably at a standstill. Adding more houses in this area would create more pollution, something we collectively should be responsible for</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? We are hoping that more trees will be planted in our areas. It makes little sense to be knocking down established trees whilst planting saplings.</p>	8	Noted. Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.	Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.

		<p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. The site is presently occupied by an amazing garage called Dartmouth Motors. This garage provides an essential and much needed service to the community. It is an outstanding garage , family run which provides a wealth of experience for every car owner who trusts this garage with their vehicle. They never rip off their customers and keep us all safely on the road.If this garage is forced to close because of the proposed development, it'll be a tragedy for the community. Please don't allow this to happen.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? It's vague and doesn't explain the true impact of new building. It doesn't acknowledge that existing buildings could be redeveloped for housing and workspace. It doesn't admit that 'genuinely affordable' is unlikely to be true for those who are displaced by new developments. whilst the idea of allowing for cycling and green spaces is positive, it has to be democratic - not just for those who can pay a premium for living in a renewed, regenerated 'cultural quarter'.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA1: West Area place principles</p> <p>4. Please provide your comments on the topic(s) selected above? The principles are vague and some contradict others. How will the development of the areas around the station impact in terms of increased traffic?</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	2	<p>Noted.</p> <p>The Council acknowledges the issues around housing affordability. The Local Plan therefore proposes a strategic target for 50% of all new homes to be genuinely affordable, which is now proposed to be measured on the basis of local income levels.</p> <p>The place principles are considered to provide an appropriate and proportionate level of detail for a strategic document. Part 2 of the Local Plan includes detailed development management policies covering a range of policy areas, which should be read in conjunction with the Part 3 policies.</p> <p>In terms of transport and traffic, the Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies. For major developments, the Local Plan makes clear that Transport Assessments will be required with planning applications, and that these will need to manage and appropriately mitigate adverse impacts on the highway network.</p>	No change.
3	LWA	<p>1. Do you have any comments on the proposed vision?</p>	2	<p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by</p>	The site allocation for the Willow Way employment site has been

		<p>This is not ok. The Dartmouth garage is the best garage around and the only one walkable for when my car needs a service or anything. The buildings would dwarf and overshadow other buildings in the area and I think it would be awful. Please do not destroy my ONLY garage.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the site allocation(s) selected above. N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>Part 2 of the draft Local Plan includes a refreshed suite of policies which address amenity and will ensure development proposals demonstrate how they will avoid and/or appropriately mitigate such impacts (such as overshadowing).</p>	<p>amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>
3	LWA	<p>1. Do you have any comments on the proposed vision? I like the proposal to connect green spaces and foster the wooded nature of the area. I think there's lots of potential here eg Lewisham Link, Hilly Fields, Ladywell & Brockley cemetery (please open the Ladywell gate it would make it much easier to connect to Hilly Fields!), Blyth Hill, One Tree Hill, Camberwell New Cemetery (although the latter two are I think in Southwark).</p> <p>2. Do you have any comments on the proposed key objectives? See above</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. I am concerned that the use of land for housing would lessen the wooded, green character of the area. Losing this area would also reduce the remnants of the historic Great North Wood, which local green action groups are working to retain and</p>	12	<p>Noted. Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	<p>Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.</p>

		<p>enhance rather than destroy. Finally development would lead to a loss and reduction of important fauna and flora habitat and wildlife corridor.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? Less high rise developments please</p> <p>2. Do you have any comments on the proposed key objectives? Low rise 2-3 stories should be the maximum and not to the detriment of local businesses.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. The Dartmouth Road Garage, where the Willow Way proposal is located, provides an essential service for the local community, it would be very detrimental if this was removed. There are very few such reputable and trustworthy motor mechanic garages in the area. The proposed development at Willow Way would remove this essential service and the vast knowledge the garage owners and workers have of their local community. The development proposed is high rise - ie above 3 storey - this would impact the local area negatively and create too dense inhabitation.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Allow Dartmouth Road Garage to stay. Dont put developers before local businesses.</p>	3	<p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>The London Plan provides a clear direction that tall buildings have a role to play in meeting London's housing needs. The draft Local Plan Part 2 includes a policy on building heights. Following the Regulation 18 consultation, additional work has been undertaken on the Council's Tall Building Study, and this will be used to inform the setting of more detailed standards around building heights in different parts of the Borough.</p>	<p>The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p>	3	<p>Noted. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The site allocation for the land and Sydenham Road and Loxley close builds on the London Plan and draft Local Plan transport policies, while seeking to make a more optimal use of land in a town centre location. The draft policy includes development guidelines which provide that options for the car park, including rationalising the existing level of provision, must take into account the</p>	<p>No change.</p>

		<p>Land at Sydenham Rd and Loxley Close</p> <p>6. Please provide your comments on the site allocation(s) selected above. I am deeply concerned about the proposal to redevelop the public car park on the land between Sydenham Road and Loxley Close. This is the only public car park in this part of Sydenham and the local shops and businesses need this car park to continue in order to sustain their businesses. The proposal to turn the car park into 131 homes is an overdevelopment of the site. Some form of public car park of an adequate size needs to remain for the benefit of the local community otherwise local residents will face even more challenges with visitors parking outside their homes and shops will suffer with fewer visitors. Also, the proposal to build over 300 new homes in the same small area of Sydenham between 74-78 Sydenham Rd, 113-157 Sydenham Rd and Sydenham Road and Loxley Close means local services such as GP surgeries, which are already struggling with capacity, will be completely overwhelmed.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? There should be fewer houses on this site (Sydenham Road and Loxley Close) and more land retained for a public car park.</p>		<p>needs of visitors and businesses along with public transport accessibility levels. Should any development proposal come forward, the level of car parking provision will need to be investigated and sufficiently justified.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>	
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Havelock House</p> <p>6. Please provide your comments on the site allocation(s) selected above. I am very concerned about the environmental impact of the proposed development of this site. The area contains mature oak trees and woodland which is habitat for numerous species, including a nesting site for peregrine falcons which we enjoy seeing regularly. There is no way that such species would remain if the area were developed. The Tewkesbury Lodge residents have been planting additional trees in the local area to improve the environment, so it seems absurd that Lewisham Council would then be planning a development which inevitably would result in a loss of trees in the area.</p> <p>I am also concerned about the additional traffic and strain on local facilities such as schools. Getting off the estate can already be difficult at times due to the congestion on roads such as Honor Oak Road, so additional residents and their cars will only compound that problem. The two nearest primary schools (Fairlawn and Horniman)</p>	12	<p>Noted. Informed by feedback from the Regulation 18 consultation, the Havelock House site allocation will be removed from the Local Plan. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.</p>	<p>Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.</p>

		<p>are popular and already at capacity so what provision has been planned for additional school capacity?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>N/A</p> <p>2. Whilst the site area is roughly 1.5 ha and therefore warrants consideration as a strategic site, it is acknowledged that site constraints limit the potential developable area. Should any future planning application come forward for redevelopment on this predominantly backland site, the proposal will be considered against other Local Plan policies.	Local Plan amended to remove the site allocation for the Havelock House, Telecom site and Willow Tree House site.

		<p>I have read the brief proposal for the redevelopment of backland for residential use and am wholeheartedly opposed to it.</p> <p>Any development would damage the wooded green character of the area, which contains remnants of the historic Great North Wood which need be retained rather than destroyed. Development of this green backland would result in a loss of important fauna and flora habitat and would threaten wildlife. Any loss of green space in an urban area such as ours has knock on effects on air quality and therefore on health. Additional housing in an area which is already heavily populated inevitably leads to additional vehicles, which cause access and congestion issues, as well as vcreating additional pressure on local services such as schools, medical services, rubbish collection and utilities.</p> <p>I appreciate that the Council is under pressure to meet targets for new homes but destroying rare green backland space in the process is a thoroughly negative approach to the challenge.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>I'm worried about the wording for 're-provision' of the Jenner health centre. 3	LWA	<p>1. Do you have any comments on the proposed vision? REF: Jenner Health Centre</p> <p>I really think this is a awful idea. The Health centre has been there for in excess of 30 years with more than 15,000 registered patients nearby. It is a hub for our healthcare system with a surgery, dentist, chiropractor and Pharmacy all under one roof. Removing the health centre will deprive the whole community in and around Lewisham. It is probably the biggest surgery in Lewisham and is VITAL it remains. The site is very well located with enough space for a few cars for elderly patients who have no other means of transport</p> <p>2. Do you have any comments on the proposed key objectives? Developing the area is good but removing our healthcare infrastructure is a bad idea and will affect the whole local area. I'm sure thousands of people will agree with me.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA4: West Lewisham Links</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Jenner Health Centre</p> <p>6. Please provide your comments on the site allocation(s) selected above. The Jenner Health Centre is vital for our community where all healthcare professionals work and is known for the one place to go for any issues. It is the largest health centre In Lewisham and is used by over 15,000 registered patients. Closing down the health centre or re-locating would be awful. The Pharmacy is right next door and is ideal for elderly patients so they don't have to travel much. There is space for a few cars and is good as some elderly patients do not like using the public transport.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Yes, Please DO NOT touch the Jenner Health Centre. It is most needed where it is and should remain untouched.</p>	1	<p>Note. The site allocation for Health Centre will enable the facility to be re-provided at the current site as part of a new mixed-use development. Any proposal for off-site re-provision would only be considered where other Local Plan policies on community infrastructure are satisfied. The draft policy is considered to be consistent with the relevant London Plan policies regarding social infrastructure.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>	No change.
3	LWA	<p>1. Do you have any comments on the proposed vision? While I support the idea of improving areas for cycling and walking, developments should not be made that destroy any areas that we have of thriving wildlife and older trees that provide the historic link to the Great North wood. we know now that roads and housing which take away this type of area destroy vital biodiversity.</p>	4	<p>Noted. Part 2 of the Local Plan on Green Infrastructure sets out detailed policies concerning the protection and enhancement of green/open spaces and biodiversity. Part 3 of the Local Plan provide further details to support these borough-wide policies. The spatial objectives and policies for the West Area refer to the</p>	No change.

Please provide your comments on the site allocation(s) selected above. Living at Moore House, Willow Way, residents have already lost a lot of light from the development at the former Sydenham Police Station, and now we are set to lose a lot more with this continued development on the street. And where is all the extra parking going to be? Willow Way already is used as a cut-through by people not wanting to deal with the roundabout at the end of Dartmouth Road or the traffic lights on Kirkdale, and such a huge development will futher build noise and traffic.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>proposals will need to demonstrate that they have identified and suitably addressed amenity impacts.</p> <p>Parking provision will need to be carefully managed and considered in line with the London Plan parking standards. In general, the Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set our clearly in Part 2 Transport policies.</p>	
3	LWA	<p>1. Do you have any comments on the proposed vision? We've already had to put up with the noisy, disruptive redevelopment of Sydenham school, the new flats on the site of the old Sydenham Police station and now this. I'd agree that the derelict land on Willow Way is an eyesore could do with some development but not at the expense of established businesses like Dartmouth Service Station. It's a very important service provider to us as local residents and we are told they were not consulted before this plan was made public</p> <p>2. Do you have any comments on the proposed key objectives? Why not propose more green spaces, parkland, children's play areas or places where we can have outdoor markets like Brockley Market?? You could have more recycling points or use the space for parking for neighbouring businesses in the Kirkdale/Dartmouth Rd area.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS Former Sydenham Police Station</p> <p>6. Please provide your comments on the site allocation(s) selected above. We've already had to put up with the noisy, disruptive redevelopment of Sydenham school, the new flats on the site of the Former Sydenham Police station and now this</p>	3	<p>The West Area key objectives and policies provide a direction for protecting and enhancing open/green spaces and improving walking and cycle routes between these via the Lewisham Links proposals.</p> <p>The Willow Way site allocation sets out requirements for the delivery of new and improved public realm. Any residential element will need to make provision for children's play space, as set out in draft Local Plan, Part 2 Policy CI3 on play and informal recreation.</p> <p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>Parking provision will be need to be carefully managed and considered in line with the London Plan parking standards. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>

		<p>LSIS. I'd agree that the derelict land on Willow Way is an eyesore could do with some development but not at the expense of established businesses like Dartmouth Service Station. It's a very important service provider to us as local residents and we are told they were not consulted before this plan was made public.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>The 33 new flats that are almost completed on the site of the Former Sydenham Police Station have caused extensive eyesore, noise pollution to the surrounding residents and put increased pressure on the lack of local parking. These parking issues will become more apparent once the flats are inhabited as the residents have only been allocated 4 parking spaces on the development and will spill out onto the local streets that struggle with parking as it is. Terrible idea to remove already established businesses that support the surrounding residents greatly. The proposed flats will make the area incredibly claustrophobic, reduce light levels for current residents and oversaturate residential capacity very negatively.</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? This proposal will close a business that me and a lot of other people I know use very often. We need this business. Also the parking in the area is terrible as it is and more flats would make this so much worse</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. This proposal will close a business that me and a lot of other people I know use very often. We need this business. Also the parking in the area is terrible as it is and more flats would make this so much worse</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	1	<p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>Parking provision will need to be carefully managed and considered in line with the London Plan parking standards. This includes protections for the MOT centre and the amenity of the neighbouring public house.
3	LWA	<p>1. Do you have any comments on the proposed vision? There are already new large housing developments underway in Mayow Rd, with little parking offered and no sign of new schools/doctors etc being provided to help those already oversubscribed to cope with the influx of new residents, now you want to demolish valuable parts of the high street (which you describe as ugly and needing improvement) and add more ugly housing. You should be working with existing businesses to improve them and enable to SE26 community to thrive. More housing and less businesses on our high street will mean less footfall and more car</p>	3	<p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.

		<p>use. Lockdown has shown that people want to shop local. If you want to improve Sydenham Rd, put more effort into the shops that open so that they are useful to the community, limit the number of nail bars, chicken shops, phone shops etc, and support those that are successful to have more visual appeal and benefit the high street, instead we have empty and rundown shops, or shops that only last 2 minutes. Thousands we spent improving the high street but now it's a mess as vehicles park on the pavement etc.</p> <p>2. Do you have any comments on the proposed key objectives? Stop trying to make money by over development in an area that is already highly populate & gridlocked with traffic, becoming impossible to park. You should focus on improving the businesses already here (The Bridge for example!) these plans are poorly thought out and are all money focussed. I see from other comments that you haven't even engaged with some of the businesses that you plan to demolish, this is outrageous. We should consider making them community assets to protect them: the Golden Lion, Bishops Furniture Stores, the undertakers etc. Sydenham has a lovely community, if you demolish these places you will lose that community, plus the Audi garage and Enterprise bring non-locals to our thriving high street to spend money.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Land at Sydenham Rd and Loxley Close 113-157 Sydenham Rd 154-160 Sydenham Rd 74-78 Sydenham Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above. Over development over development over development! No thoughts for parking, adding traffic to an already congested neighbourhood, no increase in school places for over subscribed schools, and removal of successful businesses on those sites. Suit this money grabbing plan.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Improve Sydenham Rd from Knighton Park towards Bell Green, Home Park and the library, this needs some serious investment (the shops and business here seem totally over looked) and will make all of Sydenham Rd join up into 1 successful area, not a road of many sections.</p>		<p>The Council does not make money from development. Most of the site allocations within the Local Plan are owned by third parties. The Local Plan must plan proactively for future growth and has to demonstrate that it can accommodate the London Plan target of 1,667 new homes per year.</p> <p>The indicative site development capacities have been set using a standard methodology, as set out in the Site Allocations Background Paper. The optimal capacity of the site will be established at through the planning application process, and informed by the designed-led approach.</p>	
3	LWA	<p>1. Do you have any comments on the proposed vision? Improving the quality of life of local residents whilst keeping employment and local businesses alive should be a priority for the developed areas.</p> <p>2. Do you have any comments on the proposed key objectives?</p>	1	<p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan</p>	<p>The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This</p>

		<p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. My comment is solely related to Dartmouth Garage on Dartmouth road. I think this garage should be kept and its settings and premises improved as part of the local plan. There isn't many garages around here and this one as a very good reputation with the neighbourhood. I also would like to include into my comment the car body shop garage (Anerley Car Crash Repairs) which is adjoining of Dartmouth garage but under a different business ownership. They (both) are very professional and are doing top quality work, and these types of professionals are hard to find nowadays, They are also affordable, honest and reliable and this is partly why they are so popular and successful.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>The draft Local Plan includes a refreshed suite of policies on employment land management, as set out in Part 2 on Economy and Culture. The Council considers that the proposals amount to a strengthening of protection for both designated and non-designated employment sites for commercial and industrial uses. Continued protection of Willow Way will be made through its designation of a Locally Significant Industrial Site, where the co-location of employment and other complementary uses will be supported.</p>	<p>includes protections for the MOT centre and the amenity of the neighbouring public house.</p>
3	LWA	<p>1. Do you have any comments on the proposed vision? It should be much more environmentally focussed, with an ambitious, radical and inspiring aim to make Lewisham completely sustainable.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. Although I understand that customers of the garage at Willow Way feel strongly that they don't want to have to go further away to get their car serviced, they are a tiny minority of residents. The majority of households in Lewisham do not own a car.</p>	2	<p>The draft Local Plan has been prepared in line with the National Planning Policy Framework and its principles for sustainable development, as well the London Plan policies around 'Good Growth', which is defined as growth that is socially and economically inclusive and environmentally sustainable.</p> <p>The draft Local Plan acknowledges the issue of the global climate emergency. Informed by the Council's Climate Emergency Action Plan it includes a suite of policies to support the transition to low and zero carbon development, including for requirements for new buildings, support for the retrofitting of existing stock, and enabling modal shift away from private car use to more sustainable modes, and urban greening. Further details are set out in the Part 2 policies on Sustainable Design and Infrastructure, Transport and Connectivity, and Green Infrastructure respectively.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and</p>	<p>No change.</p>

		<p>We need to move away from a car-dominated urban landscape, which at the moment allows a minority of car owners to damage the health of everyone.</p> <p>As polluting cars and vehicles are phased out and people either switch to electric vehicles or swap to more environmentally friendly and safer forms of transport like walking, cycling and public transport, there will be much less need for garages servicing petrol and diesel cars (electric cars need far less servicing).</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>A long-term mindset needs to be embedded in every aspect of the council's plans. Every decision now should work towards a sustainable, equitable and pollution-free future. No housing should be built unless it is able to run completely on minimal, clean energy. Private car ownership should eventually be phased out completely from the whole of Lewisham. Walking, cycling, car-share, public transport and other positive, sociable, healthy and planet-friendly modes of transport should be encouraged. Streets should be reclaimed from traffic, polluting businesses should be taxed, and rebates should be given to those businesses working for clean air, water and biodiversity. Every residential street should be made into a home zone where children can play safely. Every road should prioritise pedestrians over motorised and polluting traffic. There needs to be a massive tree-planting and biodiversity campaign. Every street should become an avenue of trees. Walking through Lewisham - which for many of us has made lockdown bearable - should be a pleasure, not a gauntlet of polluted air and dangerous driving.</p>		<p>policies and are set out clearly in Part 2 Transport policies. However, speed limits are outside the scope of the local plan.</p> <p>The Local Plan will be subject to independent examination and the plan must be demonstrably 'sound', including that it is in line with higher level policies and deliverable. Whilst acknowledging some of the proposals suggested and need for radical action, a balance will need to be struck in order to ensure the plan can be found sound.</p>	
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA3: Forest Hill district centre</p> <p>4. 		<p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. too much stress on schools and doctors with increase of housing loosing the garage and pub</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>to ensure that any future proposals for redevelopment of land within the Willow Way LSIS site fully consider the pub and its amenity through the masterplan and design-led process. However it is acknowledged that the site allocation policy could be amended to provide more clarity on the need to protect the public house and its amenity.</p>	
3	LWA	<p>1. Do you have any comments on the proposed vision? It feels like all Lewisham Council are interested in is more housing, and they care more about future residents than current ones! Firstly, do we know the impact of Brexit and covid on the population of London yet? There may not be a need for more housing if the population decreases. Secondly, I agree everyone needs a home, but said home does not need to be in Lewisham. Homes should be built in places that that have the space and means to accommodate them as members of a community, not just physically in a building. So why then wouldn't Lewisham be pushing back at other London boroughs who haven't built any social housing for decades (Wandsworth for example). Or areas of East London with lower levels of population density.</p> <p>2. Do you have any comments on the proposed key objectives? Don't just build more and more cheap flats. Won't these soulless monoliths with no outdoor space create awful living environments for people? Think beyond your own doorstep because Greater London needs to tackle the housing crisis as a county. There are less populated areas where new builds could go, complete with more indoor and outdoor space.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? If you have to shut down businesses to build houses then perhaps it's a sign that said houses need to be built elsewhere.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. Don't build more housing until existing problems are sorted. Example fly tipping, speeding, people begging outside Tesco who are intimidating, Thames Water, lack of provisions for pedestrians and cyclists, lack of trains.</p>	2	<p>The Local Plan sets out a positive strategy for managing future growth and development across the borough, having regard to the Good Growth policies set out in the London Plan and the principles of sustainable development set out in Government's National Planning Policy Framework.</p> <p>Like all London Boroughs Lewisham is trying to tackle a housing crises and are directed by the London Plan to plan positively to meet its housing targets of 1,667 homes per annum.</p>	No change.

		<p>It's good to have a vision, but basic, boring things that really matter to residents aren't being provided.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Sadiq Khan, Labour Mayor, Wandsworth born, bred and resident, needs to start building social housing there! To relive other boroughs like Lewisham who are struggling to cope and provide basic services as it is.</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>These proposals are very unclear. While I appreciate the desire to regenerate areas of Lewisham, fluffy visions with no clear plans like this are confusing. It appears that you want to tear down large areas of our local community and even if that's with a desire to put new buildings in, it appears very poorly thought out.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>I like the idea of regenerating and modernising Lewisham and introducing more green space. This is a good thing to aim for.</p> <p>Affordable housing though... really? I would love to believe you but you're not going to be able to deliver that unless the entire housing market in the UK crashes in spectacular fashion. The borough, and London as a whole is already over-populated so what good is more housing going to do?</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>This area needs development and some love, but the proposal looks like you want to tear down a huge area, including many local and longstanding businesses which are a credit to the community, like Cuddly Bear nursery and Dartmouth Road Service Station.</p> <p>Instead of ripping up Willow Way, why don't you just tidy it up? Get rid of the derelict cars that litter the pavement and develop the land that is vacant.</p> <p>Leave the existing businesses, maybe even give them some funds to liven up their buildings?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Tidy up the road, stop it being a rat run by blocking it off halfway along, widen the pavements, fix the pavements, plant trees, restrict parking.</p>	3	<p>The Local Plan is a strategic policy document that sets out the vision, objectives and policies for future growth and investment in the borough.</p> <p>The plan has been informed by and informs a number of more detailed studies including the Characterisation Study, New Cross Area Framework, Catford Framework and other evidence base documents and SPDs.</p> <p>The Local Plan identifies those site allocations that are required to meet its London Plan housing targets of 1,667 homes per year.</p>	No change.
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>N/A</p> <p>2. Dartmouth Motors is a well-liked and trusted business that has worked hard over many, many years to give excellent service to its loyal customer base. You should be doing your best to encourage trustworthy family enterprises like this, not threatening to kick them out! More and more bland, cramped flats and fewer and fewer useful businesses is really not going to improve this area.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	2	Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.	The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.
3	LWA	<p>1. Do you have any comments on the proposed vision? I am referring specifically to the plans for 6 Mantle Road. I support regeneration but would want to see full proposals before commenting further on it's acceptability. I live at 4 mantle road and am concerned that a large-scale block of flats will look directly into my flat, block light and also be extremely noisy during delivery. When will the full plans be made available please?</p> <p>2. Do you have any comments on the proposed key objectives? Regeneration on this plot around Brockley station is to be welcomed, as long as it is sensitively and appropriately done</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below 6 Mantle Rd</p>	0	<p>Noted. The draft Local Plan Site Allocation policy for 6 Mantle Road sets out land use principles along with development requirements and guidelines for the site. Detailed proposals for site redevelopment would be set out in a planning application, should one come forward, and which the Council will assess against the site allocation and other Local Plan policies.</p> <p>Both the current and draft Local Plan include policies dealing with protection of amenity, including for properties surrounding proposed development sites. This includes consideration of outlook, privacy, light, noise and other disturbances.</p> <p>The draft Local Plan broadly seeks to improve the quality of the public realm around town and local centres, as well as stations and key transport nodes. The West Area policies include proposals for enhancing the area around Brockley station.</p>	No change.

		<p>6. Please provide your comments on the site allocation(s) selected above. As above</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? More green space and cafe areas. The space on the east of Brockley station has been a triumph in creating a community space that is green, encouraging SMEs, and making a desirable place to visit at all times of day. It would be good to see plans on the west of Brockley station achieve the same feel - rather than just being a bit box of flats (which is what I fear will be proposed!)</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? N/A</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. 		<p>6. Please provide your comments on the site allocation(s) selected above. Would mean the permanent closure of local businesses including the garage we have used for years. Great people providing an amazing service to local people. The council should be supporting businesses not forcing them to close down.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>		<p>protections for the MOT centre and the amenity of the neighbouring public house.</p>	
3	LWA	<p>1. Do you have any comments on the proposed vision? Great to have a vision...when it doesn't have a bias.</p> <p>2. Do you have any comments on the proposed key objectives? No</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. It's one thing to relocate, by force, a business that relies on satellite clients but quite another when you destroy a business that the community relies on. The loss of the Dartmouth Road garage (to name but one business) will be an irreplaceable loss to those with vehicles within a mile of its location. This industry is built on trust. One which you propose to eradicate. It is built on faith and reliability. One which you propose to eradicate. There are few enough businesses that can be trusted with your wallet and this garage is one of them. In the desire for residential buildings, you are forgetting that a community needs businesses too. Or do you intend on increasing the, already substantial, work, business and industry flight out of the Borough?</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? Knock down the huge bail hostel in the former Sydenham police station and fill your boots there. And then, why not build in the council offices car park behind your building along with the Truck park? Better still, one day there will be no space left; put in place a solid relocation process that might help other communities and relieve your apparent burden.</p>	3	<p>Noted. The draft site allocation for Willow Way LSIS provides for employment-led, mixed-use redevelopment of the site. The policy will help to enable vacant and underused land on parts of the site to be brought back into beneficial use, including the provision of new workspace, homes and public realm improvements. The policy proposals do not preclude the retention or re-provision of floorspace or units for existing businesses.</p> <p>Following the Regulation 18 consultation the Council has held landowner meetings. 3	LWA	<p>1. Do you have any comments on the proposed vision? yes. It is biased and flawed and is written with promises for the future whilst the borough has not sufficiently funded the present (or the recent past). Communities are not extra blocks of housing- communities are the integration and wellbeing of those that have made an area their home and participate in the attempt of making theirs and others homes and areas a better place to live. The report is written</p>	4	<p>We do not agree with your assessment of the plan.</p> <p>The Local Plan sets out a positive strategy for managing future growth and development across the borough, having regard to the Good Growth policies set out in the London Plan and the principles of sustainable</p>	<p>Loxley Close and Sydenham Road site allocation boundary amended to exclude building containing Bishop's Furniture Store.</p>

	<p>without soul or feeling and is simply an exercise in generating money through development in one of London's most overcrowded boroughs.</p> <p>2. Do you have any comments on the proposed key objectives? Yes. we live in an overcrowded City and borough, generating more housing adds to the demand and strain on the infrastructure. Anyone who lives local (se26) to my shop will know of the overcrowded schools, train platforms, traffic congestion and the daily strain our brilliant nhs (local gps) have every day. If there has been insufficient funding by this borough for years then why would it change with the promise of new housing, extra residents and extra pressure? The key objectives are flawed because the Local Authority promises for the future without anything being done for the present.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below None selected</p> <p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Land at Sydenham Rd and Loxley Close</p> <p>6. Please provide your comments on the site allocation(s) selected above. I happen to own a business that would be affected/possibly demolished to cater for this plan. I find it incredibly offensive and unprofessional that the proposals state that Landowners were consulted and that our (mine and lidl's) buildings 'do not make a positive contribution to the character of the landscape'. As the owner of this building I was (and neither were my neighbouring properties) contacted before these draft plans made. It is a simple courtesy to talk to stakeholders before throwing their businesses future into the public domain and to then make unfounded crass comments about 'character of the landscape' is nothing but shameful and indicative of an agenda to push plans through.</p> <p>I will tell you what community is...it is when you own a business and say hello to the same people every morning as they pass even if you do not know their name and yet you are happy to see each other. It is when many customers become friends and pop in because you know you value them for more than just their custom. It is when your disabled father can visit you on his mobility scooter because you made the effort 20 years ago to buy a building near to him so that you can support your elderly parents. Communities are when every person do their best for themselves and other to better the places that they live in.</p> <p>If I lose my shop to these soul-less plans then I don't lose a building...I lose my friends, my daily contact with my parents, the opportunity for my dad to still have purpose in life, the opportunity to keep Sydenham thriving by selling something that is different and diverse.</p> <p>Sydenham would also lose one of its last key retail units - see below.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p>	<p>development set out in Government's National Planning Policy Framework.</p> <p>Like all London Boroughs Lewisham is trying to tackle a housing crises and are directed by the London Plan to plan positively to meet its housing targets of 1,667 homes per annum.</p> <p>With regard to site allocation – Land at Sydenham Rd and Loxley Close the London Plan directs Local Authorities to allocate surface car parks and single storey retail for redevelopment to make best use of available land.</p>	
--	---	---	--

		<p>Yes. Please also consider that the Lidl retail unit is the biggest on the high street before you have to visit the Bell green industrial estate. People and communities need affordable and local food/shopping and not everyone can drive or manage large amounts of shopping on a bus. Whilst the 'local' Tesco and sainsbury's serve a purpose, they are limited by space and charge more for the convenience. The Lidl building retail, therefore, is very important and it is one of the last large retail units that can provide a proper supermarket at this end of Sydenham.</p> <p>The car park at the rear of this building was, for years, free and served to help all the local area for footfall and parking for staff that travelled to the area. Now that it requires payment and to register the car (for free two hours before payment) the car park is often empty and barely used which has caused terrible parking problems for residents in the surrounding areas. Whilst this may serve as an area suitable for development, it would surely better suit and serve the community, shops and surrounding residential areas by changing the parking strategy that has obviously failed since it was introduced.</p>

Dartmouth Car Garage has been part of the local area for many many years...bringing customers from all over Kent/London and I have been one of their loyal customers for a very long time. I go to this garage as they are trustworthy, thorough and unlike a lot of garages do not rip you off!! My daughter has Cerebral Palsy so going somewhere I can entrust to do a good/thorough job is paramount!! I need to ensure my car is safe/reliable to get my daughter to her many appointments, school etc. and the people who own/run/work at Dartmouth Garage are the only ones I trust my car with.</p> <p>Not only do a fantastic job at a reasonable price, when they give me a timeframe they stick to it...even if it means going out of their way.</p> <p>The service, trustworthiness and thoroughness is priceless.</p> <p>The very valid reasons above are why this local institution (also bringing additional revenue to the area), Dartmouth Garage, should not be closed and should be excluded from the proposals</p>	3	<p>Following the Regulation 18 consultation the Council has held landowner meetings. 		<p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>The vision for West area is encouraging but the amount of new housing must not just all be flats, and must be sympathetically designed to fit into the victorian feel of the high street and surrounding streets. Endless amounts of small flats does not encourage families to move to the area, as there is no space for them, and so you end up with an imbalance of residents. If flats are inhabited by families then the parks will need to be upgraded to support them in their need for outdoor space. Better facilities in the green space is a knock on effect of lots of flats with no gardens.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>transforming parts of the South Circular into healthy streets will be interesting to see. I do not see how you can improve any elements of that road unless you remove the lorries during school hours. The pollution alone is significant and I would stop all lorries using the road between 7am and 10am and 3pm to 6pm so that you encourage families to cycle or walk to school, which is not safe at this time.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>I am encouraged to see the principles around keeping the village feel as much as you can for each area, and that is something quite unique to the south london 'town's that you don't see in other parts of London as much. Connecting the HUBs where existing transport isn't there, is important so that we move seamlessly across Lewisham to various other hubs that will encourage more independent businesses to flourish.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>74-78 Sydenham Rd 113 -157 Sydenham Rd 154-160 Sydenham Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>As mentioned before, the planning must not just be about maximum flats in space provided with some disconnected shops options at the bottom that eventually get turned into a flat as no one takes up the shop. Traffic in the area, parking and increased pollution must be factored into the design and plans of any building and not be pressurised by developers to pack in lots of small pokey family-unfriendly spaces that then don't foster the community feel in the right way.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>There is no mention of the parks being upgraded to support additional residents. Also plans encouraging footfall to either end of sydenham should be considered. Lots of Lower sydenham shops are not used or filled because it's a bit far from the</p>	1		

		top of the high street and nothing really down there to encourage people to walk. Bistros or Bars, Delis need to be encouraged down the road so that people use all the shops. Less charity shops and nail bars and more of a mix of usage. The shop fronts next to the Dolphin are tired and do not encourage people to come down the road. Only the Dolphin and Raffaele restaurants get people this end. So more thought about connecting main high street to the lower end would be good.

Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. The proposed development on willow way will increase local housing exponentially and put too much pressure on amenities including doctors and schools - particularly with the develop of the nearby police station and Mais house. The height of the proposed development is way out of character with the local surroundings.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	1	<p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p> <p>The draft Local Plan site allocation proposed for Willow Way LSIS sets out land-use principles and development guidelines. It does not set out specifics around the height of buildings on this site, as this will be established at the planning application stage. Part 2 of the Local Plan on High Quality Design includes policies on managing building heights which will need to be considered alongside the site allocation.</p>	No change.

		<p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. What about people's livelihoods? I travel miles to attend the mechanics you intend to rip down, these plans have been drawn up with no consideration or thought. It's taken me decades to find a garage I trust, this would be a nightmare for all of the staff leaving them without an income. The garage should be left out of the plans.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision? Yes</p> <p>2. Do you have any comments on the proposed key objectives? it is nice for the council to have a vision but not at the cost of other peoples lives. no one should play god and decide on a persons future without asking or consutling them first. this is a compete disgrace in the way matters have been conducted as a community we cannot keep building estates that continue to overpopulate already densely populated areas. london as a whole is too crowded and here we are trying to squeeze more people in. please don't use the term 'affordable housing' as the only people that benefit are the developers and councils pockets</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA1: West Area place principles</p> <p>4. Please provide your comments on the topic(s) selected above? far too many estates already exist in this densely populated area that has a poor infrastructure with low availability on school paces and gps</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Land at Sydenham Rd and Loxley Close</p> <p>6. Please provide your comments on the site allocation(s) selected above. loxely close/ sydenham road I have recently been made aware of the 'Lewisham local plan'. I am incredibly concerned as my business falls in the outlined area for the loxely close/sydenham road proposed development. I have no letter or correspondence either asking for permission or consent in this matter. Having witnessed the futility of campaigning against a lewisham consultation in the past over the closure of a special needs school, I really know first hand that these 'consultations' are merely PR exercises whilst the machine rolls on and decisions already made . I hope I am wrong this time but doubt it.</p>	5	<p>The Local Plan sets out a positive strategy for managing future growth and development across the borough, having regard to the Good Growth policies set out in the London Plan and the principles of sustainable development set out in Government's National Planning Policy Framework.</p> <p>The plan process has followed the NPPF guidance and all consultation has been carried out in accordance with our Statement of community Involvement.</p> <p>Like all London Boroughs Lewisham is trying to tackle a housing crises and are directed by the London Plan to plan positively to meet its housing targets of 1,667 homes per annum.</p> <p>Like all London Boroughs Lewisham is trying to tackle a housing crises and are directed by the London Plan to plan positively to meet its housing targets of 1,667 homes per annum.</p> <p>With regard to site allocation – Land at Sydenham Rd and Loxley Close the London Plan directs Local Authorities to allocate surface car parks and single storey retail for redevelopment to make best use of available land.</p>	Loxley Close and Sydenham Road site allocation boundary amended to exclude building containing Bishop's Furniture Store.

		<p>This development would be near at least 10 existing multiple-tower block estates that already exist in an area where infrastructure is at breaking point. School places are insufficient to demand and any local person would vouch for the difficulty in gaining access to their local GP.</p> <p>I also note there is another earmarked on the corner of Sydenham Road and Mayow Road - immediately next to another estate. This two plans border on the ridiculous for their approval and locations in an area that is already overcrowded and underfunded by help from the local council.</p> <p>On a personal note (and I cannot find this in the literature/guides available), what happens if a development is passed and the owner of a building does not want to sell/participate etc or how would they be compensated?</p> <p>I am at an age now where I do not want to retire but do not want the upheaval of relocating to find another customer base after having made so many customers/friends in my 20 years of trading at this address. I do not wish to see my shop knocked down and replaced with a more modern property with exactly the same amount of housing that my site provides just to fill a developer's pockets.</p> <p>also, Lidl is the only supermarket at this end of Sydenham that provides accessible and affordable food to the local population and you wish to knock it down to provide housing??? really ???</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>yes</p> <p>why not simply ask the owners of the land if they have an opinion before deciding to include their life's work in a public consultation</p>

Please provide your comments on the site allocation(s) selected above.</p> <p>You say supporting the local neighborhood, how is it by tearing down one of the last remaining family pubs and a local friendly garage ..seems very hypocritical</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>	3	<p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>The Council recognises the important role that public houses play in the local economy and Lewisham's distinctiveness. Therefore, the draft Local Plan Policy EC7 (Public houses) sets out a new 'presumption in the favour of the retention of public houses'. This will help to ensure that any future proposals for redevelopment of land within the Willow Way LSIS site fully consider the pub and its amenity through the masterplan and design-led process. However it is acknowledged that the site allocation policy could be amended to provide more clarity on the need to protect the public house and its amenity.</p>	<p>The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>Willow Way LSIS site allocation amended to include new development guidelines around protecting the character and amenity of the pub.</p>

3	LWA	<p>1. Do you have any comments on the proposed vision? I think you need to look at other failed mass urban development in local history Deptford Bermondsey old kent road elephant and castle. All perfectly functional communities deemed unworthy and replaced with concrete jungles that breed antisocial behaviour crime and mental health issues. Over development with no where people want to live small cramped flats and houses replacing family homes with soulless boxes.</p> <p>2. Do you have any comments on the proposed key objectives? Mass urban development is driven by targets and money with no regard the needs wants and local community. If the area is consulted you take a statement from a young generation that think a skate park is what they need and will save the community. People need areas to get out and use as they want ie local parks many of which were donated by the Victorians now these areas would be mass development. Look at history to see where a community grows. Not a bank balance or target sheet.</p>	2	<p>The National Planning Policy Framework requires that Local Plans must set a positive framework for managing growth and development to meet identified local needs. The Council has prepared evidence base documents which set out future needs for new homes, workspace and jobs, community facilities and supporting infrastructure. In addition, the London Plan sets out a housing target for Lewisham which the Council must seek to address through the Local Plan.</p> <p>Whilst acknowledging the challenge of accommodating growth, the Local Plan sets out a framework to help manage this in a sustainable way, in a manner that respects the distinctive qualities of Lewisham's neighbourhoods and provides a clear strategy for future investment within them.</p>	No change.

		<p>The local car garage for example is more needed than a artisan cafe that sells 50 versions of milk to a community.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA3: Forest Hill district centre</p> <p>4. Please provide your comments on the topic(s) selected above? Local shops can't survive as rates are too high address this rather than pulling out the soul and replacing with boxes</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Willow Way LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above. Blatantly a land grab the area has been suffering from the last badly thought out schemes the council was involved in. The infrastructure cant cope with any more badly thought out schemes. These proposals are drawn up by people who have no local knowledge or real life experience and have designed a utopia that looks great but in functionality will be inept and further destroy the local community. We all know the industrial areas will be small over priced and unfit to run a business. Small firms are struggling as it is and its expected a number of small businesses to stay profitable while you knock down their premises and wait while the proven inadequate scheme builds them a new base to operate from.</p> <p>These grand schemes are proven to be unsuccessful. Look at past history in Deptford, old kent road, Bermondsey and The Elephant and castle! Perfectly functioning local communities deemed unfit for purpose by local know all know nothings that are replaced with soulless developments that isolate, separate and encourage crime and gang mentality. Shiny slums that dont offer a real home people want to live just boxes to exist.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? The Tesco and other flat developments have left the local areas over populated and contributed to a local crime increase with the undesirable inhabitants the council have installed how can you be trusted with an even bigger area to ruin. Local areas are best left to local people to develop and utilised by the community to build or install business they require. Not mass urban development driven by targets and money serving others not the local community</p>		<p>The Local Plan is being prepared through several rounds of formal public consultation and additional engagement with local communities and other key stakeholders, in line with the Council's adopted Statement of Community Involvement.</p> <p>The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has informed the preparation of the Local Plan, and some site allocation policies include requirements for the provision of specific types of infrastructure.</p>

The garage is an important part of the community as is the open spaces. Wildlife need these spaces to flourish. Trees, plants and shrubs are also needed to cut down air pollution something which is high in Lewisham and built up areas due to the extreme amount of traffic which will only be added to with the building of more homes. More people = more cars!</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? I feel that the underhanded way in which the council has conducted itself in this matter is disgusting. People have a right to be notified about what is a possible in their area and must have a say early in the process not as an after thought! Especially the land / property owners!!</p>	2	<p>Noted. The Regulation 18 stage public consultation has been carried out in accordance with the Council's adopted Statement of Community Involvement.</p> <p>Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p> <p>The draft Local Plan Part 2 section on Green Infrastructure sets out the strategic approach to protecting and enhancing green/open spaces, along with requirements for urban greening. It is acknowledged that this can have multifunctional benefits, including for improving air quality and supporting biodiversity.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p>	<p>The site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.</p>

		<p>built up a strong community of customers, the vast majority have always said they will not go anywhere else, we are our own community not just somebodys mechanics. We are a trusted and vital part of this local community being there for our customers through good times and bad.</p> <p>Being here since I was 16 has also meant I have built up my own personal customer portfolio, they specifically come here and ask for me, if I wasnt here they would go elsewhere taking their custom with them.</p> <p>Furthermore, the owner of the premises has not been informed of the plans, the first he saw about it was from the signs on the lampposts. Lewisham say that landowner engagement has been undertaken but they clearly missed out the landowner of one of our sites in the new proposal. It says it wants to create jobs but it is effectively putting people out of one.</p> <p>Everyone here is now stressed and concerned, taking that stress home to our families. Times are stressful enough just keeping ourselves and our families safe without having this extra worry put on us.</p> <p>I strongly oppose these plans going up as far as Dartmouth Service Station and the immediate surrounding land</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>I am a shop owner of which my property is included in a proposed identified redevelopment . This has been purposely kept under the radar and when I found the proposals by complete accident I immediately contacted the local authority. I was told not to worry and by NO circumstances would future compulsory purchases be made and that these proposals were just trying to identify available areas. Well here we are a year later and in the middle of a covid crisis where my business is crippled and now there are meetings about my property that I have not been invited to. lewisham council... you should feel very ashamed.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>yes. this is simply the local council trying to over develop an area at bursting point. you simply cannot keep adding housing to invrease area population without the infrastructure of amenities to back it up. Lewisham are trying to cash in on areas that will increase in value should the bakerloo line ever happen.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p>	1	Noted	Loxley Close and Sydenham Road site allocation boundary amended to exclude building containing Bishop's Furniture Store.

	<p>Land at Sydenham Rd and Loxley Close</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>this would simply overcrowd an area already saturated by housing blocks in an area which cannot cope with sub standard amenities such as overcrowded schools and gps</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>yes. try asking the people who actually own the land if they want to sell before deciding to include it in a plan. Would that not be the politest way of dealing with the matter? not even a letter in the post??? lewisham- be ashamed</p>			
--	---	--	--	--

		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>Yes - the potential for some of the shops in area 3 and the Dolphin need to be left as they are. The Dolphin has been there for 100s of years.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>Not in theory</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>113-157 Sydenham Rd 154 – 160 Sydenham Rd 74-78 Sydenham Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>We should not be looking to redevelop a thriving local pub and other businesses. Maybe to build around them.</p> <p>The Audi car showroom is good for the area as it gives the impression that this is a more affluent area (than it actually is).</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Please look into the heritage of the Dolphin pub. Often described as one of the best beer gardens in London. And a real local hub</p>	1	<p>Noted. The draft site allocations referred will provide for the mixed-use redevelopment. The policy proposals do not preclude the retention or re-provision of floorspace or units for existing businesses.</p> <p>The proposed site allocation for 113-157 Sydenham Road addresses the Dolphin public house in the development guidelines. It states that the pub must be retained and that development must conserve and enhance its historic significance.</p> <p>It also states development must not adversely impact on the character and amenity of the locally listed public house.</p>	No change.
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>As a resident, I am very enthusiastic about Lewisham's vision to increase our housing stock by means of densification on small and medium plots.</p> <p>We are suffering a dire housing shortage, affecting not only the very poorest in society, but also young workers starting out, and young families who cannot find the larger homes they need.</p> <p>The answer to this is to provide abundant housing, of all kinds: from studio flats to family homes, but social rent and private ownership. We cannot allow established property owners to issue a veto over the needs of other borough residents on obtuse grounds; the only way to tackle the housing crisis is to increase supply of all kind. The best way to do this is by filling-in car parks and industrial sites within our neighbourhoods.</p> <p>2. Do you have any comments on the proposed key objectives?</p>	0	<p>Support for vision and site allocations noted.</p> <p>The draft Local Plan sets out proposals around the development of small housing sites. This will help the Council to meet the borough's London Plan target for small sites, which forms a component of the borough housing target. The Council has adopted a Small Sites Supplementary Planning Document which will support the Local Plan.</p>	No change.

				<p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>113-157 Sydenham Rd 154 – 160 Sydenham Rd 74-78 Sydenham Rd Land at Sydenham Rd and Loxley Close Former Sydenham Police Station</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>These are all good choices for development. In particular, the land at 113-157 and 74-78 Sydenham Road are ripe for development. The original intention of the Victorian designers of the high street were for shops below, with 3-5 storeys of housing above, served by bus and train routes. These sites deviate from that vision: car showrooms, car washes and one-storey buildings are clearly inappropriate in a high street. They should be returned to a mixture of housing above and commercial use underneath. Doing so will not only provide the housing we need, but also provide footfall to support our high street and create a lively street scene at all times of day. The claim from the local amenity society that the row of takeaways at 113-157 Sydenham Road must be "saved" as some of our "best businesses" is self-evidently absurd.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>			
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>There don't seem to be any plans to get rid of Paul Green House, 185 Dartmouth Rd, Forest Hill, London SE26 4RQ Why on earth not?</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>Add Paul Green House, 185 Dartmouth Rd, Forest Hill, London SE26 4RQ to redevelopment plan</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LWA3: Forest Hill district centre</p>	0	At this point in the plan process we are not considering additional site allocations. This will be considered at a future review stage.	No change.

				<p>4. Please provide your comments on the topic(s) selected above? N/A</p> <p>5. Do you have any comments on the proposed site allocations? Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>			
		3	LWA	<p>1. Do you have any comments on the proposed vision? Really exciting to see such positive changes in the pipeline, particularly pleased to see such focus on public realm in and around Forest Hill station.</p> <p>2. Do you have any comments on the proposed key objectives? N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below LWA3: Forest Hill district centre</p> <p>4. Please provide your comments on the topic(s) selected above? I think the potential to improve public realm and introduce more businesses and workspace to the area is great, these changes will have a positive impact on the vibrancy of the areal and make it nicer and safer to walk around and spend time in.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below Land at Forest Hill Station West Land at Forest Hill Station east</p> <p>6. Please provide your comments on the site allocation(s) selected above. Improvements to these sites In particular will have a positive impact on Forest Hill town centre</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered? N/A</p>	0	Support noted.	No change.
		3	LWA	<p>1. Do you have any comments on the proposed vision? Concerns about the increase in traffic & parking problems that will ensue from all of the extra residential units and cycling routes that are being proposed. for Sydenham</p>	0	Noted. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and	No change.

			<p>Road. Sydenham Road is already an extremely congested route and often at a standstill.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>No</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>No</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>113-157 Sydenham Rd 154-160 Sydenham Rd 74-78 Sydenham Rd Land at Sydenham Rd and Loxley Close</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>Concerns about increased traffic and parking problems as a result of so many extra residential units. Most residential properties in Sydenham have on street parking only. With the advent of the electric car, I am not sure how or where residents will be able to charge their cars.</p> <p>Your design ideas sound wonderful but we only have to look at St Phillip Neri School, Sydenham to see how badly that turned out. There was considerable local opposition to that plan as people felt that the construction was too large and did not fit in with the street scape. The architects went to great pains to "sell" the design of the building assuring opposers that it would be in keeping with the local area</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Are you over developing the Lewisham West area ? We are desperately short of recycling facilities. The instances of people leaving rubbish on the streets are increasing, as is fly tipping and over development could accentuate the problem.</p>		<p>the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Parking provision will need to be carefully managed in accordance with the London Plan parking standards, recognising the strategic priority to support modal shift away from private car use.</p> <p>Details on parking provision for electric vehicles are set out in the Local Plan Part 2 section on Transport, Policy TR4 Parking. This sets a minimum requirement for EV charging points where new parking is provided in development.</p> <p>A comparatively small amount of growth and development is planned for the West area, particularly when considering other parts of the Borough, such as the North and Central areas. This is owing to the limited amount of strategic development sites (i.e. site allocations) that have been identified within it, through the Council's housing land availability assessment which has informed the draft Local Plan.</p> <p>Flytipping and rubbish/recycling collection are outside the scope of the Local Plan. These comments will be forwarded to colleagues in the Council's Waste management service.</p>		
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>I would like to know how developing an already saturated area will help improve the dangerous road of Waldram Crescent (A205) and the bend approaching Forest Hill station?</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>More buildings will mean more traffic and more cars pushed onto Waldram Crescent, which is heavily residential, causing pollution and traffic noise to residents.</p>	0	<p>Too detailed for the Local Plan but we will pass your comment on to our Highways team</p>	No change.

			<p>This will increase the traffic load on the approach, where there is no safe pedestrian crossing when a slip road using the existing foot underpass was supposed to be developed to stop the congestion.</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LWA1: West Area place principles LWA3: Forest Hill district centre</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>More buildings will mean more traffic and more cars pushed onto Waldram Crescent, which is heavily residential, causing pollution and traffic noise to residents. This will increase the traffic load on the approach, where there is no safe pedestrian crossing when a slip road using the existing foot underpass was supposed to be developed to stop the congestion.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>Land at Forest Hill Station west Land at Forest Hill Station east</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>More noise from development, increased traffic due to more housing and more traffic pushed onto A205 which has an extremely dangerous bend approaching Forest Hill station.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>The area is already highly residential and full of new developments. More blocks of flats will mean more population in an already overpopulated area.</p>				
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>The proposals are very 'safe' and lacking in ambition and yet again there doesn't seem to be any clear overall plan plan. Commuter traffic is a problem in all areas and no clear proposals as to how this will be addressed. Ladywell isn't even mentioned in the first paragraph even though it is part of the West area.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>Ladywell is blighted throughout the day by through traffic which was made worse by road changes on Lewisham High Street and the gyratory at the bottom of Loampit Vale. When are the Council going to sort this out</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p>	1	Too detailed for the Local Plan but we will pass your comment on to our Highways team	No change.

Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>Traffic</p>			
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>It seems to have nothing much to say about Ladywell. In particular, where is the vision for improving the central shopping area of Ladywell? For example, currently the area is blighted by (through) traffic including HGVs. I would like to see a vision that prioritised walking and cycling.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>I would like to see a vision for developing the shopping area of Ladywell and reducing traffic on Ladywell Road to make it a healthier environment for residents</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LWA2: connected network of town centres</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>Ladywell centre should be recognised as a key public centre in the same way as Crofton Park, Brockley Cross and others identified. It is a key focal point for Ladywell and Brockley and efforts should be made to identify and enhance its unique character. This would likely recognise that more needs to be done to stop Ladywell Road being a route for Kent-based commuters and construction lorries.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>	2	<p>Noted. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Part 3 West Area place principles include policies which refer Ladywell. In response to consultation feedback, further information on this neighbourhood will be included in the plan.</p>	Local Plan updated to include additional text relating to Ladywell.

		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>The plan isn't ambitious enough.</p> <p>The number of cars on our streets is simply shocking. Every residential road in our neighbourhood is packed with parked cars, people should be made to reassess their car usage. In my opinion, only electric cars should be allowed for people who really need a vehicle (work or limited mobility) everyone else should walk, cycle, use transports, use car share.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>I very much agree with the interchange at Brockley station. It will be a great improvement. Now, the plan says "transform the Brockley Rise / Brockley Road (B218) into 'healthy streets'" that sounds great but the B218 also includes Malpas road and Florence road. Is it an oversight? Will the council finally remove the B-road classification from those two narrow residential roads? Or have they been, yet again, forgotten on the plans?</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>LWA1: West Area place principles</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>The plan does not mention at all the HGVs problem.</p> <p>About "Locally Significant Industrial Sites" in Endwell Road, it's important to note that this site is surrounded with residential streets. A few of the businesses attract HVGs in the area and that is very problematic! Pollution, noise, vibrations, traffic, oversized vehicles. I believe some type of businesses should be encouraged to move to more appropriate areas.</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>111-115 Endwell Rd 6 Mantle Rd</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>I very much agree with the development of those sites, they are just an eye sore and make the area look rundown.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>	2	<p>Too detailed for the Local Plan but we will pass your comment on to our Highways team</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>Details of the Brockley Station Interchange are set out in the infrastructure Delivery Plan (IDP) which is a companion document to the Local Plan. However, it is acknowledged that some additional supporting text can be helpful.</p> <p>Draft Local Plan policy TR5 on Deliveries, Servicing and Construction addresses amenity impacts that are likely to be caused by HGVs. Where appropriate, the draft plan requires that a Delivery and Servicing Plan and/or Construction Logistics Plan is submitted as part of a proposal's Transport Assessment.</p> <p>Endwell Road LSIS site allocation seeks employment-led mixed use redevelopment with compatible commercial, community and residential uses.</p>	Local Plan amended with additional information on the Brockley Station Interchange in supporting text to the West Area place policies.
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>no concrete proposals, just nice-sounding sentiments</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>no concrete proposals, just nice-sounding sentiments</p>	1	<p>Noted. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport</p>	No change.

				<p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>no concrete proposals, just nice-sounding sentiments</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>Land at Forest Hill Station east</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>no concrete proposals, just nice-sounding sentiments</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>The main issue for Forest Hill is the huge volume of commuter traffic which floods through the area. Unless I missed it, there are no plans to deal with that. Why not consider tunnelling the A205? The documents are full of principles, but no concrete proposals.</p>	<p>modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies. Ideally, the improvement of strategic public transport network together with modal shift policies will help to address commuter traffic.</p> <p>Whilst recognising the South Circular is a TfL road, the Council considers that its use and environment can be improved for those choosing to travel by walking, cycling and of public transport, applying the Healthy Streets approach set out in the London Plan. The Council will continue to work with the Mayor of London/TfL and other stakeholders to deliver improvements along this corridor. As an example, feasibility work for the re-routing of the South Circular at Catford.</p> <p>As the South Circular is a TfL road, any proposals for tunnelling would need to be dealt with by the London Mayor and TfL.</p>	
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>Whilst it is pleasing that the Malham Road industrial site will be protected and enhanced, it is concerning that the plan seeks to redevelop other industrial sites that are currently occupied (Forest Hill Station East, Perry Vale LSIS). The plan should not be seeking to displace existing businesses from sites that are in use. As a local resident, there is a great benefit in having industrial businesses, such as those on all three sites, close by. Similarly the proposal to develop the Jenner Health Centre into residential property is concerning as this will inevitably have a negative impact on the healthcare provision on site.</p> <p>Rather than trying to redevelop sites that are already in use the plan should instead focus on vacant sites</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p>	<p>1</p> <p>Noted. The draft site allocation for Land at Forest Hill East and Perry Vale LSIS provides for employment-led, mixed-use redevelopment of the sites. The policy proposals do not preclude the retention or re-provision of floorspace or units for existing businesses.</p> <p>The site allocation for Health Centre will enable the facility to be re-provided at the current site as part of a new mixed-use development. Any proposal for off-site re-provision would only be considered where other Local Plan policies on community infrastructure are satisfied. This is considered to be consistent with the London Plan approach for social infrastructure.</p> <p>The policy on masterplans mentions that proposals must address how the</p>	No change.

				<p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>Jenner Health Centre Land at Forest Hill Station east Perry Vale LSIS</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>I'm opposed to redevelopment of Jenner Health Centre for anything other than healthcare facilities. Adding residential or other property on the site will only reduce the capacity of the site to provide healthcare. 'Re-provision' of healthcare must ensure that the site remains equipped with the same healthcare facilities, the same area of floorspace for healthcare provision and able to provide at least the same services as currently. It cannot be allowed for any reduction in the capabilities of the site, not for the sites facilities to be relocated away elsewhere.</p> <p>Both Land at Forest Hill Station east and Perry Vale LSIS are currently occupied. The plan should not be seeking to redevelop sites which are currently occupied by businesses as this will disrupt / displace the businesses that are currently using sites, and potentially result in them disappearing from the area. There are enough empty street frontages in Forest Hill that you do not need to be displacing existing businesses to make room for more frontages on Waldram Place and Perry Vale.</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>		<p>development sites relate to neighbouring properties and ensure active engagement with the landowners and occupiers of the site.</p>	
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>What happened to Ladywell in the list of neighbourhoods? Did you write this in the expectation of convincing the LGBC people of your view that Ladywell should no longer exist?</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>None selected</p>	0	<p>Noted. Ladywell is one of the neighbourhoods included in the draft Local Plan 'West Area'. This is represented graphically on the map at the start of Part 3 (Figure 13.1). However it is acknowledged that paragraph 18.1 at the start of the Part 3 West Area section does not refer to Ladywell. This is an editing error that will be rectified.</p> <p>During the public consultation, the Commonplace webpage included a schedule of online information sessions. This listed neighbourhoods for which 'area-based' events would be taking place. Ladywell was not initially included in the list for the West Area. This editing error was rectified during the consultation after it was called to the attention of Council officers.</p>	<p>Local Plan updated to include additional text for Ladywell.</p>

				<p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>		The Part 3 West Area place principles include policies which refer Ladywell. In response to consultation feedback, further information on this neighbourhood will be included in the plan.	
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>Looks Good To me - I'm not sure about all the summary points mentioned but really glad that greater focus will be given to healthy streets on the two main link roads of the South Circular and Brockley Rise/Road. Neither are nice to cycle on now and improvements would be welcome.</p> <p>I think the focus on Upper Sydenham and Forest Hill are also welcome, the former could certainly do with some public realm improvements around the bridge and it's heavily car-dominated.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>No</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>No</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>No</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>No</p>	0	Support noted.	No change.
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>Would love to have better facilities around stations and making the south circular less of a speeding motorist death trap. I've had to help injured cyclist on various occasions due to bad drivers hitting them around the station/Perry vale junctions of the south circular</p> <p>2. Do you have any comments on the proposed key objectives?</p>	0	The Local Plan supports and seeks to promote walking, cycling and the use of public transport through the Healthy Streets Approach (see the Part 2 Transport policies for further details). Part 3 of the Local Plan sets out the Council's objectives to improve the South Circular in accordance with the Healthy Streets Approach.	No change.

			<p>Would welcome healthy alternatives and this would make a massive difference in improving my quality of life as would provide me with better air quality and a safer daily commute</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>		<p>The draft Local Plan part 2 policies on public realm set out the Council's objectives and policies for improving the environment around stations. Additional requirements for some stations have been set out in the Part 3 site allocations.</p> <p>The Council has prepared a Local Implementation Plan, which will help give effect to the London Mayor's Transport Strategy. This will be used to help secure investment in public transport including facilities at and around stations.</p>	
	3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>The vision has some nice words, but is basically void of any ambition. It's a watered-down, lukewarm attempt to placate everyone and offend no-one, but in doing so it is rendered meaningless.</p> <p>What Lewisham needs is a really exciting, ambitious, and meaningful vision which takes into account that the way we human beings live has to radically and fundamentally improve in the immediate future in order to meet the challenge of living sustainably on this planet - the only one we have.</p> <p>Polluting vehicles should be banned. All new building should be zero carbon. No carbon-intensive building material should be used. All new building and refurbishments / rebuilding should result in clean energy sources being used for heat, light and power.</p> <p>You should be encouraging - insisting on - local energy co-ops. Large-scale, polluting, privatised utilities should be banned.</p> <p>All residential streets should have a 5mph speed limit for polluting vehicles, with pedestrians given priority at all times. Trunk roads should have a properly enforced 20mph limit, with bus and cycle priority at all times and in all places. There is no justification for private cars in a densely packed city. They are dangerous, polluting, noisy and socially destructive.</p> <p>Light pollution is a major problem, causing stress in humans, and interfering with the diurnal habits of wildlife. All street lamps should be motion sensitive - i.e. they</p>	7	<p>The draft Local Plan has been prepared in line with the National Planning Policy Framework and its principles for sustainable development, as well the London Plan policies around 'Good Growth', which is defined as growth that is socially and economically inclusive and environmentally sustainable.</p> <p>The draft Local Plan acknowledges the issue of the global climate emergency. Informed by the Council's Climate Emergency Action Plan it includes a suite of policies to support the transition to low and zero carbon development, including for requirements for new buildings, support for the retrofitting of existing stock, and enabling modal shift away from private car use to more sustainable modes. Further details are set out in the Part 2 policies on Sustainable Design and Infrastructure and Transport and Connectivity respectively.</p>	No change.

			<p>should be off unless someone is there. Lewisham should be a dark sky area, with as little light pollution at night as possible.</p> <p>We need to organise our shops and amenities so that everyone is within walking distance of what they need. The '15 minute city'. Nobody should get in a car to get anywhere.</p> <p>Nowhere in this 'vision' is there real, imaginative, ambition. What a missed opportunity.</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p> <p>None selected</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>N/A</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>		<p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plans ambitions and policies and are set out clearly in Part 2 Transport policies. However, speed limits are outside the scope of the local plan.</p> <p>The Council does not exercise control to ban polluting vehicles from roads. It will however continue to lobby the London Mayor / Transport for London to extent the ULEZ beyond the South Circular.</p> <p>Light pollution is addressed in the Local Plan Part 2 policies dealing with amenity.</p> <p>The proposed spatial strategy for the Borough, set out in the draft Local Plan Part 1, seeks to promote the 15-minute neighbourhood/city concept.</p>		
		3	LWA	<p>1. Do you have any comments on the proposed vision?</p> <p>N/A</p> <p>2. Do you have any comments on the proposed key objectives?</p> <p>N/A</p> <p>3. Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below</p> <p>None selected</p> <p>4. Please provide your comments on the topic(s) selected above?</p> <p>N/A</p> <p>5. Do you have any comments on the proposed site allocations? Select the site(s) and comment below</p>	0	<p>Noted. The repair and maintenance of consented development and buildings is outside the scope of the Local Plan. The Council will consider enforcement action where there is unauthorised development.</p> <p>The draft Local Plan Part 2 section on High Quality Design includes a policies addressing shopfronts, outdoor advertisements and digital displays.</p>	No change.

			<p>JK Banquets Hall Forest Hill</p> <p>6. Please provide your comments on the site allocation(s) selected above.</p> <p>SO UGLY AND IN APPALLING CONDITION. Frankly, Forest Hill should be ashamed of this place. Not only is the garish signage totally out of keeping with what was once a beautiful Victorian/Edwardian town, but the building itself is literally falling down - holes in the rood, pigeons flying in and out, water pouring into the building. Compulsory purchase order or force them to repair/maintain the building. Why can the council not regulate disgusting garish signage like that??</p> <p>7. Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>N/A</p>

Lewisham Local Plan

Regulation 18 consultation statement

Appendix 3 – Regulation 18 Draft Local Plan Commonplace Responses Parts 4 and 5

September 2022

Part	Section, policy or paragraph	Respondent submission	No. of Agreements with comment	Council officer response	Action
4		You need to take local people of this journey so I would like to see a continuing communication and consultation strategy more clearly articulated.	1	The Council's adopted Local Development Scheme sets out information on the plan process and consultation opportunities. The point is noted and this information will also be included on the local plan webpages.	Update the Council's local plan webpages to include a summary of consultation feedback and information of next steps in the plan preparation process. Consultation on the Regulation 19 version of the Local Plan will be publicised in accordance with the Council's adopted Statement of Community Involvement and relevant planning regulations.
5		How is anyone meant to have an opinion on all this information? It makes me want to leave Lewisham after living here happily for 30 years. I despair every time I see all the tower blocks when I go to the centre, there seems to be a new one every time I visit	0	The length of the draft plan reflects that it will update and consolidate 4 adopted plans into a single document. We prepared a summary version of the Local Pan to accompany the document to make the process more accessible. We also structured the Commonplace site by topic	The Local Plan has been reviewed and updated to make it shorter and more concise, where possible. A plain-text version of the plan has also been prepared.

				and area – again to aid accessibility.	
5		The size of these and the fact they have to be there at all indicates that the plan is really not written to be read and understood without knowledge of planning jargon. If you want to engage with local people then you need to use a medium that is easily accessed and understood.	0	<p>The length of the draft plan reflects that it will update and consolidate 4 adopted plans into a single document.</p> <p>We prepared a summary version of the Local Pan to accompany the document to make the process more accessible.</p> <p>We also structured the Commonplace site by topic and area – again to aid accessibility.</p>	The Local Plan has been reviewed and updated to make it shorter and more concise, where possible. A plain-text version of the plan has also been prepared.

Lewisham Local Plan

Regulation 18 consultation Statement

Appendix 4 – Commonplace Interactive Map Responses

September 2022

Where are you commenting on?	Why do you feel this way?	Topic	Officer response
Fernbrook Road	Continued lack of interest from TFL and the Council about speed tables that, when passed over by buses or delivery vans, make the houses shake. Cars still speed down the street so the table is not providing any benefit and is in fact damaging properties and causing unnecessary mental health issues for residents.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Speed limits are outside the scope of the Local Plan.
Mayow Park	This is an amazing park with a great cafe, tennis and community sports with an active Friends group.	Community Infrastructure, Green Infrastructure	Noted. The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.
Catford Bridge	Neglected.	N/A	Noted. The draft Local Plan includes proposals to regenerate Catford town centre, including the area around Catford Bridge.
Unused green space	This green space right near Dacres Wood Nature Reserve has so much potential. Instead it is full of overgrown weeds, broken benches and litter. What a waste of an amazing space for local residents to use.	Green Infrastructure	This comment will be passed to colleagues in the Parks, sport and leisure team. The Local Plan advocates the principle of a Greener Borough ensuring all Lewisham residents benefit from quality green spaces.

Sandhurst road	Traffic - allowing large trucks to use sandhurst/sanglely as a south circular alternative. Too many bus routes for a narrow residential road.	Transport and connectivity	This comment will be passed to transport colleagues.
Mayow park	It is a nice space	Green Infrastructure	The Local Plan advocates the principle of a Greener Borough ensuring all Lewisham residents benefit from quality green spaces.
Mercia Grove	A small conservation area in lewisham central is overrun with business vehicles day and night. Residents fear for their lives should an ambulance be needed as access is regularly blocked by non-resident vehicles. The unique nature of the road is threatened by development above the roofline on Lewis Grove. Residents of adjoining areas habitually fly tip at the intersection and the cost to the council of cleanup rises yearly.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling The enforcement of flytipping is outside the scope of the Local Plan.
The High Street	Whilst the high street does seem to be improving, I feel the high street has so much potential and the vacant units could attract quality retailers.	Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities. The Local Plan includes policies which provide greater support for the temporary use of vacant units.
Railway bridge from Dacres Road	The bridge is not accessible for people in wheelchairs or with prams. Which makes it very difficult to support all the great businesses on Dartmouth Road. It also feels	High quality design, Community Infrastructure,	This comment will be passed to transport colleagues. The Local Plan aims to create Healthy and Safe communities by addressing the detriments of physical and mental health. The Local Plan also aims to provide physical infrastructure needed to support

	unsafe and it and the surrounding area are filthy	Transport and connectivity	growth and sustainable places, including through the use of CIL funding and developer contributions.
home park	Full of litter, playground often in disrepair, old toilet block unused, Gazebo attracts drug users	Green Infrastructure, community infrastructure	This comment will be passed to the parks, sport and leisure team. The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.
Road crossing at Windrush Lane/Mayow Road/Sunderland road	This is where lots of families cross the road to go to and from Perrymount School. There is no crossing, it's dark, the traffic moves really fast and it's hard for cars on the roundabout to see people crossing	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Lighting	The lighting on Kangley Bridge Road needs improvement - it feels very badly lit and not comfortable to walk to/from the station in the dark. The fact that the Bridge is currently closed doesn't help.	High quality design, Community Infrastructure, Transport and connectivity	The Local Plan aims to create Healthy and Safe communities by addressing the detriments of physical and mental health. The Local Plan also aims to provide physical infrastructure needed to support growth and sustainable places, including through the use of CIL funding and developer contributions
Beckenham Place Park	Because it is mostly natural parkland, it feels like I am miles away from London, all the filth, crowds, traffic, people, my dog can swim in the river, and I can BREATHE. I live the antique fairs, jazz bands, stable yard and garden, but the house needs work - keep the artists and make the rest into a much nicer wedding venue/conference centre/boutique hotel, something other	Green Infrastructure	The Local Plan advocates the principle of a Greener Borough ensuring all Lewisham residents benefit from quality green spaces. The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.

	than a falling down mansion way past its best		
Springbank road	Lack of investment on this street compared to the other side of the tracks on staplehurst road is very noticeable. Paving in bad state of repair, constant fly tipping, no enforcement on bins being left on the pavement permanently and shops purposely being made unrentable to try and get a change of use to flats.	Sustainable design, Economy and culture, High quality design	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities.
Woolstone Road	Every day people speed down this road recklessly, and ridiculously fast. Even the buses ignore the speed limit. Many, many residents have had their parked cars damaged by speeding cars and buses. There are families with pets, young children, elderly folk, a play school, Drs surgery - someone is going to get hurt. Cranston to Houston crossing also dangerous - people drive across Woolstone without even looking	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Speed limits are outside the scope of the Local Plan.

Parkfield Road (A2)	Dangerous pedestrian crossing, and a neglected feel	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling. Comments will be passed to colleagues in the Transport team
Mayow Park	Why would you suggest a fenced dog area? It's a PARK. How about a fenced child area, or a fenced dog-haters area? Or how about a fenced area for all those disgusting people who have massive picnics and leave their trash all over the place for other people to clear up?? The vast majority of dogs are well behaved, and the vast majority of dog-owners are responsible. LEAVE US ALONE! We pay our council tax you know. Mayow is as much ours as yours!	Green Infrastructure	Comment to be disregarded due to derogatory tone.
JK Banquets	Please do something about that disgusting 'banqueting centre', with the hideous garish signage totally out of character, and the holes in the roof with pigeons flying in and out, missing tiles, water pouring into the roof space. It really drags the area down.	High quality design, Sustainable design	Noted. The council does not exercise control over development which has been consented.
The bridge Leisure	Closing the Bridge Leisure are Centre will really negatively affect the health of our community.	Economy and culture, Community Infrastructure	The Local Plan aims to promote Healthy and Safe communities by addressing the wider detriments of physical and mental health. The Local Plan will also aim to ensure the delivery of high quality health (including leisure) facilities that meet the need of the local community.

			Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.
Sydenham Library	The library is in need of investment to update it to meet the needs of the diverse community	Community Infrastructure	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
The public lavatory outside Sydenham station	Years ago there was a perfectly serviceable lavatory on this spot requiring minimal attention. It was closed and years later replaced by a highly expensive (though free to users) lavatory that could be used by only one person at a time. For over a year now this modern wonder has been out of operation. Why?	Community Infrastructure	Comment will be passed to colleagues in Park, Sport and Leisure.

<p>High Street and "Lower Sydenham"</p>	<p>Considering Sydenham has 2 mainline train stations and the East London Line, I'm surprised it has been overlooked for regeneration by Lewisham Council.</p>	<p>High quality design, Housing</p>	<p>The draft Local Plan sets support the vitality and viability of Sydenham District Centre.</p>
<p>Mayow park</p>	<p>Green space, nice cafe and mostly toilets! Such an improved space. Some sail or other type of shade fir the dog free children's area would be great for the summer.</p>	<p>Green Infrastructure; community infrastructure</p>	<p>Comment to be passed to colleagues in Parks, Sport and Leisure. The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy</p>
	<p>Appalling for cyclists. And not much better for pedestrians. Too much traffic. Too polluted</p>	<p>Transport and connectivity</p>	<p>comment highlights a need for an improved cycling infrastructure and the strategic objective of healthy and safe communities</p>

The pedestrian crossing and general street design	This is a missed opportunity to do something about this dangerous crossing and the general car centred forest hill main area. Pedestrians are expected to perch on the tiny island in the middle of the road. The traffic light sequence means it's rarely safe for pedestrians to cross and the priority is completely about cars. The whole area is tarnished and degraded by the focus on the south circular flowing freely with no thought for the pedestrian.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Holbeach Road Car Park	No free parking. This deters people from shopping in the area and using local businesses.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.
Bins near Montrose Court & Rattray Court	Bins frequently not emptied by council, council collections spilling waste over road, and fly-tipping hotspot.	Sustainable design, Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement The enforcement of flytipping is outside the scope of the Local Plan.
225 bus extension	The 225 bus extension was announced by the local Labour party but TfL have confirmed no plans to extend. Poor bus links in the Verdant Lane area, causing people to need to use cars.	Transport and connectivity	The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity. It is not however within the scope of the Local Plan to influence bus or rail timetables.
225 bus extension / local transport	225 bus extension was promised by local Labour party, but TfL have confirmed not	Transport and connectivity	The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail

	going ahead. Poor transport links on Hazelbank Road / Bellingham Road		and other stakeholders to increase transport capacity. It is not however within the scope of the Local Plan to influence bus or rail timetables.
Public garden on Verdant Lane / Pasture Road Junction	Unappealing except for drug dealers who seem to do good business at this location.	N/A	Comment will be passed to colleagues in the Neighbourhood Community Safety Service.
Catford Town Centre	It's drab and busy. Glad to hear that council want to re-imagine this area!	High quality design	Noted.
Bakerloo Line Extension	Bakerloo Line extension MUST continue between Lewisham and Hayes. It has been hinted that it might terminate at Lewisham - further south needs it more!	Transport and connectivity	<p>The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity.</p> <p>The route for Phase 1 of the BLE has been established with a safeguarding Direction in place. The GLA is currently reviewing the feasibility of route options for Phase 2 of the BLE, beyond Lewisham station.</p>
Blackheath (LGBT hate crime)	LGBT hate crime not acceptable	Health and Wellbeing	Noted. The Council agrees that LGBT hate crime is not acceptable under any circumstances.
Leegate Shopping Centre	Drab, empty properties	Economy and Culture	<p>The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities.</p> <p>The Local Plan includes proposals to facilitate the regeneration and renewal of Lee Green District Centre.</p>

Bins near Braemar Court	disgusting, always overflowing and street filled with litter	Community Infrastructure	Comment will be passed to colleagues in Waste Management
Hither Green Station (Springbank Road Exit)	Now closed at off-peak hours	Transport and connectivity	It is not within the scope of the Local Plan to manage the opening and closing times of TFL or Network Rail managed stations.
Hither Green Station (Toilets)	For years toilets have been closed in the day and sign tells customers to speak to staff for key, but they always say they don't know where it is and do not attempt to find it.	Community Infrastructure	Noted. Comment does not relate to a strategic planning issue
N171 bus towards London	The last N171 bus towards leaves at approximately 03:40, hours before the first train. It is very busy, indicating a clear demand.	Transport and connectivity	The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity. It is not however within the scope of the Local Plan to influence bus or rail timetables.
N171 towards Tottenham Court Road	Last bus is HOURS before first train from Hither Green.	Transport and connectivity	The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity. It is not however within the scope of the Local Plan to influence bus or rail timetables.
Hither Green Cemetery	The cemetery was closed for months, even after cemeteries all over the country were open! It's still frequently closed during a funeral, despite the size of it.	Community Infrastructure	Comment will be passed to colleagues in Bereavement Services

Molesworth Street (Northbound)	There is already a wide cycle lane on the pavement, which is really good. Now the left lane has been closed off for an additional cycle lane. Neither cycle lane is frequently used. Now traffic wishing to go straight ahead at the traffic lights towards Loampit Vale has to wait behind traffic turning right towards Lee High Road and Lewisham Hill.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
No pin dropped	Nice green space	Green Infrastructure	Noted.
Fly-tipping hotspot	Don't like fly-tipping, especially when it's not cleared	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement
Post Office closed	The post office was closed. This area is poorly served.	Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities. The council exercises no control over the closure of post offices.
1-12a Sandhurst Road	Car parking on pavement - almost always. Overflowing waste almost constant. Large crowds gathering outside barbers making noise.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.
Hither Green Cemetery	No gate into cemetery from Cumberland Place	Community Infrastructure	Comment will be passed to colleagues in Bereavement Services

(Cumberland Place access gate)			
Torridon Road Primary School (barriers)	Barriers in road causing traffic congestion. Even though schools are currently closed to all but a handful of vulnerable pupils.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Verdant Lane (20mph speed limit)	I agree with 20 mph I think everywhere else in the borough, but 30 mph is appropriate on Verdant Lane.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Speed limits are outside the scope of the Local Plan.
Verdant Lane (20mph speed Limit)	I support 20 mph throughout almost every road in the borough, but Verdant Lane should be 30 mph.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Whitefoot Lane (20mph dual carriageway)	I support 20mph speed limits throughout almost all of the borough, but 30 mph is appropriate on Whitefoot Lane	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Fly-tipping hotspot	I don't like fly-tipping.	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement
Overflowing commercial bins	Don't like waste all over street.	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement

Illegal parking on pavement	Business owners (especially a pizza/chicken takeaway and a motor cycle shop) park vehicles illegally (including ones with illegal registration plates) blocking pavement	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.
South Circular / Verdant Lane / Hither Green Lane Junction	Poorly designed. Especially: <ul style="list-style-type: none"> * traffic from Verdant Lane turning right see green light and turn right in front of oncoming traffic because they don't know to wait for filter arrow or no oncoming traffic. * traffic blocking pedestrian crossing by railway bridge. * traffic undercutting in left lane out of Verdant Lane to turn right. * traffic in right lane on St Mildred's Road to turn left * traffic in right lane of Hither Green Lane to turn left 	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
No free parking near delivery office	Risk of being ticketed while collecting mail.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards. CPZs outside the scope of the Local Plan
Lack of lighting	Dark and unsafe	Sustainable design, Community Infrastructure	The Local Plan aims to create Healthy and Safe communities by creating safer neighbourhoods and improve perceptions of safety by ensuring the built environment comprises of welcoming spaces.
Slippery pavement	Slippery pavement caused by water coming down from railway and moss growing.	Sustainable design, High quality design	This is not within the scope of the Local Plan. To be addressed by Network Rail

Illegal parking	Illegal parking, especially vehicles related to garages, often with parts (wheels, wings, windows) missing, often no registration plates or registration plates covered.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.
Poorly-designed junction	Poorly designed junction - confused motorists (South Circular, both eastbound and westbound) - safety issue	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Forster Memorial Park	Nice park but toilet facilities needed!	Community Infrastructure, Green Infrastructure	The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions
I strongly agree with the previous comments to many cars parked on the road.		Transport and connectivity	The Local Plan conforms to the London Plan car parking standards. CPZs outside the scope of the Local Plan
Narrow Pavement	The pavement is too narrow while the street is too wide. It's a 20mph road that looks like a 4 lanes!! On the other end, the front gardens are parking for trash bins leaving no room for much needed greenery. Alternatively the gardens are planted but the bins are sitting on the pavement reducing the width for pedestrians.	Transport and connectivity, Green Infrastructure	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Placement of personal bins is not within the scope of the Local Plan.

Lack of railway crossings	Forest Hill town centre is dissected by the railway. A lack of accessible pedestrian crossings means that commercial sites east of the railway are cut off from the main centre and southern part of Dartmouth Road, reducing footfall and limiting potential for expanding and intensifying land use east of the railway. Residents on the east of the railway have longer walks to the main centre and pools/ leisure centre.	Transport and connectivity	The Local Plan sets out policies to enhance access and permeability in the Forest Hill District Centre, including public realm enhancements at the station approaches.
Mayow Road crossing into Mayow Park	Since closure to a number of streets post COVID, traffic is diverted to Mayow Road causing volume and speeding of cars making it unsafe to cross the road into and out of the park, particularly with young children.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Street scape	Much better street scape on Brockley Road. Make the street more lively and support local business as well as the library.	Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Adamsrill Road	Cars are using this street as a rat race to cut through Sydenham through to Perry Rise. The road widens outside of the school and drivers take the opportunity to speed at all hours of the day and night making it unsafe and causing noise pollution at night.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

De Frene Road	The pavements are in a terrible state having been patched up badly by utility companies over many years, the trees that used to line the road have been removed and cars often travel down the road as if it is a racetrack.	Transport and connectivity	
Mayow Road	This road is dangerous to cross. Cars travel at high speed and often overtake on the wrong side of the island. The recent road closures on Bishop Thorpe and Silverdale have increased the volume of traffic and traffic calming measures are needed. The island is not large enough to comfortably accommodate a family, especially with buggies / bikes / scooters when heading to Mayow Park.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Better Access & Flexibility	There is presently poor stair levels and no disability access and I see multiple people using unsafe ways to get to and off platforms. The scenes at peak times are also horrifying with the trains completely full.	High quality design, Community Infrastructure	The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity. And improve transport infrastructure. It is not however within the scope of the Local Plan to influence bus or rail timetables.
Main high street	There is no maintenance here of shop fronts. Used by multiple facilities like meat supplies etc. which are not customer facing and internal so should be allocated to much needed useful services.	Economy and culture, Sustainable design	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities

Bellingham Leisure Centre	It is great we are identifying so many spaces to utilise better but this great space to boost health and local community is really shambolic at best. Really poorly equipped and maintained. If this can't be improved then utilise this space for something better.	Economy and culture, Community Infrastructure	The Local Plan aims to promote Healthy and Safe communities by addressing the wider detriments of physical and mental health. The Local Plan will also aim to ensure the delivery of high quality health (including leisure) facilities that meet the need of the local community.
Bridge Broken/dirty/unsafe	We requested and the contractors worked on it for four months last year causing disruption but the bridge is nearly back to its old state. Clearly showing how much it is utilised to use the walkway. This needs to be improved. Also, multiple people smoking and unlawful activities heard of on social channels really need to be checked near a great walking area and way.	Community Infrastructure, Transport and connectivity	The Local Plan aims to promote Healthy and Safe communities by addressing the wider detriments of physical and mental health. The Local Plan will also aim to ensure the delivery of high quality health (including leisure) facilities that meet the need of the local community.
Broken Pavements and poorly lit	The whole road has broken pavements which forms multiple puddles in rains and also unsafe walking conditions in wintery evenings as lack of street lighting too	Transport and connectivity	Comment will be passed to colleagues in Highways
Lee Station Approach on Burnt Ash Lane	Too car oriented.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Brockley Grove	Speeding cars (and buses!) are out of control on Brockley Grove. This does so much harm to our neighbourhood in terms of safety, pollution, and noise.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

Brockley Rise	Traffic lanes are extremely wide and average speed is far above 20mph, especially on the downhill stretch.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Stillness school / Brockley Rise	Needs school streets implementation	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Linear Park	It is hugely popular at the moment, thanks to extra exercise being taken. It is looking unloved. The so-called repairs to the bridge at the conjunction of the Ravensbourne and the Pool are appalling. Some cyclists are a nightmare. No attempt to socially distance and walkers are expected to dive off the paved path. Unleashed dogs, with owners thinking we ALL must love their animals. Many of those dog chasing the birds in the river, with owners not intervening.	Transport and connectivity	Comment refers mostly to restrictions that were in place during the Covid-19 lockdown
Stondon Park	The pavements on both sides are much too narrow, especially the one with cars parks on the pavement. And there is no need for such wide lanes. It encourages speeding, over-taking and it's not wide enough to include a bus lane so it doesn't help with traffic.	Transport and connectivity	<p>Comment will be passed to colleagues in Highways</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>

<p>Honor Oak Park</p>	<p>Traffic speeds down it during quiet times which is a danger to families using the local services.</p> <p>The pavement outside the station is much too narrow, it only allows for single-file pedestrians, it doesn't allow for social distancing of even safe access in and out of the station. And the road too wide, encouraging speeding.</p> <p>The road is constantly leaking from the water mains and all repairs have been poor leading to further damage only a few weeks later. There are several sites like this all along Honor Oak Park and pot holes are increasing. Speed pillows don't restrict speed as drivers just straddle them and carry on at more than 30mph.</p> <p>The road is too narrow for buses because of the volume of parking spaces.</p> <p>The road is a local family friendly street and it is dangerous to have lorries driving down it.</p> <p>There are not enough safe crossing points, people frequently run across the road in between traffic between Sainsbury's and 2 spoons/Mama Dough.</p> <p>There are too many pizza takeaways now that Dominoes has arrived, they should not have been given permission to lease a business there. They also cause too much waste building up on the pavement and</p>	<p>Transport and connectivity</p>	<p>Comment will be passed to colleagues in Highways</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
-----------------------	--	-----------------------------------	---

	<p>their moped drivers are inconsiderate of local neighbourhood streets.</p> <p>The bus stop on the high street stops all traffic when buses are stopping and the Sainsbury's lorry is loading. And also forces train users to go back along the very narrow pavement to the station.</p> <p>Free parking on the side roads is causing commuters to take up local parking spaces and making the roads single lanes.</p>		
--	---	--	--

Beadnell Road	Rubbish dumped on the alleyway between Beadnell Road and Garthorne Road, and no way of getting to Devonshire road and beyond other than going to the very busy Honor Oak Park or Forest Hill area which are not pedestrian friendly.		Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Comment will be passed to colleagues in Environment Crime Enforcement
Manor Park	Speeding always has been a problem and still is. Made worse by the comparatively empty streets since the LTN was imposed. Very dangerous for pedestrians/cyclists.	Transport and connectivity	Comment will be passed to colleagues in Environment Crime Enforcement
Hither Green Station	Step free access to all platforms - for wheelchair users and those less able to use stairs. The entrances and exits to the station can be foreboding at night. Sage secure cycle lockers with a very visible security camera. A pick up and drop off area for cars.	Community Infrastructure, Sustainable design, Transport and connectivity, High quality design	The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity and improve rail infrastructure.
Manor House Gardens	A lovely park - has a few issues. Adult cyclists using it as a 'rat-run' cycling at speed with no consideration for people on the foot path. The Dog exercise area is very well used in all weathers. The planting/trees/grass/gates and fences are always neglected and in disrepair.	Green Infrastructure	Comment to be passed to colleagues in Parks, Sport and Leisure.

Entrance to Waterlink Way	To get to the Waterlink Way you have to go past the side of Sainsbury's and the place the buses turn. There is nothing inspiring or safe about getting children to this lovely green area.	Transport and connectivity	The Local Plan advocates the principle of a Greener Borough ensuring all Lewisham residents benefit from quality green spaces. The plan includes policies which seek to enhance access to Waterlink Way.
the pavements and roads on this estate	The pavements are falling into disrepair, becoming a trip hazard for elderly residents, as well as looking unsightly. A combination of slabs and tarmac, with lots of grass growing through them.	Transport and connectivity, Community Infrastructure	Comment to be passed to colleagues in Highways
Mayow Park	The park has so much to offer: ancient oaks, a great variety of other trees, birds and other wildlife. Children's playground and zip wire area. Wooded areas. An orchard. Playing field. A large hay meadow opposite the cafe. The cafe is popular and it's great to have toilets. The Friends of the Park work with Glendale and Lewisham to ensure the park is the best it can be.	Green Infrastructure	Noted. The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.
Street crossing	This crossing is a perennial issue. It is dangerous.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling. This comment will be passed to colleagues in Strategic Transport
Street crossing	This crossing is very dangerous. Traffic speeds along Mayow Road and pedestrians attempting to enter Mayow Park are at risk of being hurt.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling This comment will be passed to colleagues in Strategic Transport

Home Park	Home Park is a beautiful space but it is woefully under-cared for and badly in need of maintenance. It is recognised by the Lewisham Council parks & open spaces strategy 2020-2025 as being under funded and in need of support.	Green Infrastructure	<p>The Local Plan advocates the principle of a Greener Borough ensuring all Lewisham residents benefit from quality green spaces</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Cycle lane/on street parking	On street parking on both sides of Sydenham Hill—at this point and towards Rock Hill—narrows the road causing cyclists and motorists to come into conflict with one another. There is ample off-street parking for all the properties along Sydenham Hill, so it would seem completely unnecessary to allow parked vehicles to block cyclists' use of the cycle lane. (The recently painted cycle lane around the edge of some of the parked vehicles is too narrow and places cyclists directly in the 'door zone'—i.e. making them vulnerable to vehicle users suddenly swinging open a door into the path of cyclists.)	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.

<p>Mayow Park</p>	<p>Mayow Park serves a very diverse community: a range of ages, ethnicity, single people, couples, families with children, people with dogs, all generally get on together. You can get to know other locals over time by visiting the park regularly. But it can feel too small for the amount of people using it. Unfortunately a VERY few dog owners want their own fenced off dog area which would shrink the amount of space available for anyone else. Dogs and their owners are for the most part a valuable part of the park community and get involved with the life of the park.</p>	<p>Green Infrastructure</p>	<p>The Local Plan advocates the principle of a Greener Borough ensuring all Lewisham residents benefit from quality green spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
<p>Incoherent plans from the council in terms of air quality</p>		<p>Sustainable design</p>	<p>The Local Plan includes a dedicated policy on Air Quality, which is considered to be consistent with the London Plan, and will work together with the Council's Air Quality Management Strategy.</p>
<p>Bridge over the railway - important link</p>	<p>This is an important link across the railway, connects me across to forest hills pool, Crystal Palace and Sydenham wood - used by lots of families as safe crossing</p>	<p>Transport and connectivity</p>	<p>The Local Plan also aims to provide physical infrastructure needed to support growth and sustainable places, including through the use of CIL funding and developer contributions</p>

<p>Sayes Court playground</p>	<p>The children's playground at Sayes Court is in terrible condition and badly designed. Some many local residents don't have access to private outdoor space and rely on playground like this for their children to get fresh air and exercise. This playground is poorly maintained, makes terrible use of the available space and attracts rubbish and vandalism because it doesn't looked cared for. It's also under used because it's such a grim prospect.</p>	<p>Green Infrastructure</p>	<p>The Local Plan advocates the principle of a Greener Borough ensuring all Lewisham residents benefit from quality green spaces.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
<p>Dangerous road</p>	<p>Sydenham Hill is a very dangerous road. Firstly, cars should be prohibited from parking on the road. At least one major accident involving an upturned car has happened here in the last year. Secondly, a cycle Lane is needed (a proper cycle super highway) connecting Lewisham with Southwark from Crystal Palace to Sydenham Hill, the down Sydenham Hill to the South Circular and then beyond to useful destinations such as Peckham.</p>	<p>Transport and connectivity</p>	<p>The Local Plan conforms to the London Plan car parking standards.</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
<p>Speeding cars/buses</p>	<p>Far too many vehicles abusing the speed limit on Kirkdale. Is it possible to put speed cameras in place.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>

Junction Manwood/Ewhurst Road	Horrific junction for pedestrians & cyclists using this main route which connects/access to Prendergast Ladywell Primary School & Ladywell Fields park, which are key community places.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Moving from Lewisham station to Lewisham Centre	Getting from Lewisham Station to Lewisham Centre is a nightmare for cyclists and pedestrians. Car driving is prioritised.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Water Link Way Extension to Thames.	The Waterlink Way from Sydenham to Ladywell is very nice and gets a lot of use. Is it possible to extend it to the Thames as there is no easy walk/cycle way once you leave the Waterlink Way @ Ladywell.	Transport and connectivity, Green Infrastructure	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.
Walkway from Dacres Road along railway to FH station.	The pathway that runs along the railway line feels a bit neglected with litter and overgrown weeds, specially towards the FH end. Don't always feel safe even in the day. The area near FH pools where the benches are is often full of litter and sometimes people drinking there which is not very inviting for a high street like Dartmouth road.	Transport and connectivity, Green Infrastructure	Comment will be passed to colleagues in Parks, Sport and Leisure and the Neighbourhood Community Safety Service. The Local Plan advocates the principle of a Greener Borough ensuring all Lewisham residents benefit from quality green spaces

<p>Unsafe roundabout @ Kirkdale.</p>	<p>The roundabout junction is not safe to cross. Needs a pedestrian crossing. Should not be so difficult to roll out pedestrian crossings, and it does not need to be made political as it is such a basic requirement.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
<p>Underpass for FH train station needs to be made cycle friendly</p>	<p>Pls make the underpass at FH station cycle friendly, then adjust the road/lights so that cyclists leave the south circ and go under the rail tracks, and rejoin the south circ near Morleys/Coop.</p>	<p>Transport and connectivity</p>	<p>The Local Plan aims to provide physical infrastructure needed to support growth and sustainable places, including through the use of CIL funding and developer contributions. Comment will be passed to colleagues in Strategic Transport</p>
<p>Cycle highway from East Dulwich station through FH to Catford.</p>	<p>Please create a proper segregated blue cycle superhighway along the South Circ. Please also reduce the speed limit to 20mph from the end of Lordship Lane right through to Catford to make it safe. The hills in this area make cycling very dangerous to begin with.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
<p>Cycle lane Brockley Rise to New Cross.</p>	<p>Think this would make another good segregated cycle superhighway.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling. Comment will be passed to colleagues in Strategic Transport</p>
<p>Eliot Bank</p>	<p>Eliot Bank is in a VERY bad state of repair. Presumably the council do not own it? But who does, and can they maintain it because grit and mud spills onto Sydenham Hill and surrounding footpaths.</p>	<p>Transport and connectivity</p>	<p>Comment to be passed to colleagues in Strategic Transport</p>

Footpath connecting Sainsbury's/ London Road with Derby Hill Crescent and Thorpewood Ave	Footpath is neglected, with poor lighting and paving. Feels unsafe when it is dark.	Transport and connectivity, Community Infrastructure	<p>Comment to be passed to colleagues in Highways</p> <p>The Local Plan aims to create Healthy and Safe communities by creating safer neighbourhoods and improve perceptions of safety by ensuring the built environment comprises of welcoming spaces.</p>
Buckthorne Cutting	<p>Half if the Buckthorne Cutting is a fantastic nature reserve but it has not been included in the Local Plan - not even as a Lewisham Green space.</p> <p>The other half of the Cutting is falling in to neglect and disrepair under property development management and is under threat even though it is listed as an Asset of Community Value.</p>	Green Infrastructure	The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection the Local Plan can designate on a Green Space.
Courtrai Road Scout Hut SE23	This is a neglected community space for children and your people. It has been empty for years and looking worse and worse but could be lovely.	Community Infrastructure	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection the Local Plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
Buckthorne nature reserve	It is an amazing place full of local people volunteering to make it special but in the local plan it is not listed or recognised.	Community Infrastructure, Green Infrastructure	The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection the Local Plan can designate on a Green Space.

Courtraï Scout Hut	This land has been sitting derelict for way too long! Local kids need somewhere to go that is green and full of trees and wildlife.	Community Infrastructure	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection the Local Plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
Courtraï road site	It is now a dirty eyesore, I believe a church occupies the old scout building. And it has a big green space behind it that no one is allowed access to.	Community Infrastructure	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection the Local Plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
Buckthorne Cutting Nature Reserve	Because you haven't even bothered to include this amazing local green space on your map! It's been here for three years providing sessions for local schools and nurseries & you don't even know it exists. You have put the picnic tables the fourth reserve provided and decorated with lovely art work on the eddystone bridge on the map but don't recognise this brilliant green space. Put it on the map.	Green Infrastructure	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection the Local Plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>

<p>Railway cutting alongside Honor Oak Park station</p>	<p>This is part of the railway cutting which has been categorised as a site of Importance to the whole of London for Nature Conservation, but it is not being maintained for nature conservation by Network Rail. This is damaging to the wildlife corridor.</p>	<p>Transport and connectivity</p>	<p>Comment to be passed to colleagues in Green Scene.</p> <p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection the Local Plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
<p>The railway cutting alongside Honor Oak station</p>	<p>Because it has the designation of a Site of Metropolitan Importance for Nature Conservation but has been concreted over.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection the Local Plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
<p>Honor Oak Park train station</p>	<p>Station itself nice with friendly helpful staff. But you come straight out onto a road with horrible broken railings, and no space for people to pass each other. Turn left down the road and there's a large pavement area.</p>	<p>Transport and connectivity</p>	<p>Noted. Comment will be passed to colleagues in Strategic Transport</p>

Buckthorne cutting	Beautiful space for children and adults alike to enjoy nature, wildlife and precious green space	Green Infrastructure	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection the Local Plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
Buckthorne cutting Courtrai rd	Scout hut woodland site in disrepair-developer trying to sell woodland that could be nature reserve	Community Infrastructure	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection the Local Plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
Home Park	I have lived next to Home Park for 20 years and it has never been a park I have been happy to use, even when the kids were small. Uninspiring, covered in dog mess. Poorly laid out.	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>This comment will be passed to colleagues in Parks, Sports and Leisure</p>
Parbury Road	Speeding cars in street full of young children. Cars have been heard revving their engines and racing down the street and slamming on their brakes. What chance do	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

	<p>children have? Speed bumps are useless and polluting.</p>		
Grierson road	<p>Fire gate onto Honor Oak Park is overrun by mopeds and motorbikes. This is illegal and not being enforced. I have seen a few near misses with pedestrians.</p>		<p>Comment will be passed to colleagues in the Neighbourhood Community Safety Service</p>
No protection for Duncome Hill Green	<p>Despite a lengthy campaign by local residents and some Council members to prevent a totally inappropriate building development on this site, there seems to be no commitment in the latest version of the plan to protect this valuable green space.</p>	<p>Housing, Green Infrastructure</p>	<p>Site has been designated as Local Green Space in the Crofton Park and Honor Oak Neighbourhood Plan giving it the same protections as MOL and Green Belt.</p>
Agnew Road	<p>There is a new electric car charger but there is no marked bay stating that it is for electric vehicles only. Often cars park there that are not electric meaning no electric cars can charge.</p>	<p>Transport and connectivity, Sustainable design</p>	<p>Comment will be passed to colleagues in Strategic Transport. The Council has a strategy already in place to increase the number of electric charging points.</p>

Honor oak park	Cars speed down the hill as there are inadequate speed restrictions. The zebras crossing is really dangerous as the speed often means cars come round the bend and can't slow down in time to stop. It's a really busy crossing because it's next to the station close to many school etc. The crossing should be moved further down to outside Sainsbury's as people try and cross there anyway.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Stinson park	Again traffic speeds along this road, there are frequent accidents but investment was made in improving crouton park, which was great, but no thought to speed restrictions on a long stretch of road which car drivers just see as an opportunity to speed.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
The sad council flower beds	There are several raised 'flower beds' along this stretch of the road with a few half dead rose bushes and weeds. These could be a great asset to bio diversity if given to people in the community to look after. V low cost to out in low maintenance plants. Would hugely improve this stretch of road. They are on both sides of the road	Green Infrastructure	Comment to be passed to colleagues in Parks, Sports and Leisure. The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.
Sydenham Wells Park	Very nicely landscaped and maintained. The walk through Hillcrest Wood is also very nice.	Green Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.

Replacing green space with car parking space.	Not exactly sure what's going on here on Eliot Bank but it looks like green space is being replaced with car parking spaces. Why would this be? Perhaps it's temporary due to building works? The flats are only a very very short walk to a very well serviced bus stop on the South Circular and maybe only 7/8 minutes to FH station, so unsure why there's a need for MORE CARS.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling.
Home Park	I feel so sad that this potentially beautiful park is not valued and is underused. The park is used predominantly as a thoroughfare rather than a destination as with other parks in the area. there is so much potential in the park, we have a beautiful avenue of trees- but litter and rubbish tarnish it. we have beautiful open green field that is just stunning in summer light and even more stunning in winter low sun, but is often peppered with dog poo. We have an interesting children's playground, but it is run down with brown equipment, overflowing bins and gates that don't close properly or are so heavy that it could cause injury to a child. The allotment space in the top corner which has SOOOO Much potential, but has been locked for at	Green Infrastructure	<p>Comment to be passed to colleagues in Parks, Sport and Leisure.</p> <p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

	<p>least two years. We have the gym which is fantastic, but its placement on the direct route up to the other gate makes it just a corridor.</p>		
Springbank Road	<p>Disgraceful to allow the pavements to fall into such a state of disrepair with bins and rubbish all over the pavements. Compare with the investment Lewisham Council has made on Staplehurst Road to develop the shops.</p>	<p>Transport and connectivity, Sustainable design, Economy and culture</p>	<p>Comment to be passed to colleagues in Strategic Transport and Highways</p>
Staplehurst Road	<p>Too much investment has been focused on Staplehurst Road to the detriment of other areas of Hither Green, particularly the west side of the tracks. Invest in the wider community not just the affluent area.</p>	<p>Transport and connectivity, Sustainable design, Economy and culture</p>	<p>The Local Plan aims to sustain and create inclusive neighbourhoods and communities and promote equality of opportunity for everyone.</p>

<p>Tree-lined footpath along former railway line</p>	<p>This is a unique green corridor along the former railway line with the old railway tunnel. London Wildlife Trust (LWT) ecologists lead guided walks through here. You can continue walking through from Wells Park Rd on a route passing through more woodland to come out onto Sydenham Hill or go on to Westwood Park. The woodland is so wild and natural it feels as though you've discovered it. It's a logical extension to nearby Sydenham Hill Wood at the other end of the tunnel, which is protected by Southwark as a nature reserve of Metropolitan Importance.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p>
<p>Courtrai Road, Buckthorne Cutting</p>		<p>Green Infrastructure</p>	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
<p>Buckthorne Cutting Nature Reserve</p>	<p>I wonderfully wild nature reserve on our door step. An important green space for many struggling species.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>

<p>Scout Hut, Court Road, Buckthorn Cutting</p>	<p>This place has so much potential to benefit the community and biodiversity but it has been horribly neglected.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
<p>Winchfield Road/Fairlawn Park</p>	<p>This is a hot spot for flytipping, van loads of rubbish dumped on a weekly sometimes daily basis. It used to be isolated to the concealed entrance to the Lewisham Homes office, but since that has been hoarded for construction, the flytipping has moved to the footpath and the small area of green opposite.</p>	<p>Community Infrastructure</p>	<p>Comment will be passed to colleagues in Environment Crime Enforcement</p> <p>The prevention of flytipping is outside the scope of the Local Plan</p>
<p>Scout hut on Coutrai road, parallel to the railway line</p>	<p>This is a great piece of land with beautiful trees and no through traffic. It has been left to deteriorate and was recently taken over by squatters.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
<p>Malpas road</p>	<p>Too much traffic for this narrow residential street. This map is misleading in terms of proportions/size. Malpas road and Florence road are narrow.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>

Ladywell arena	The track was used by clubs for training and sports and members of the community for a safe well lit space to walk and exercise early in the morning. Now its use is restricted to clubs which excludes the local community.	Community Infrastructure	<p>The Local Plan aims to promote Healthy and Safe communities by addressing the wider detriments of physical and mental health. The Local Plan will also aim to ensure the delivery of high quality health (including leisure) facilities that meet the need of the local community.</p> <p>Comment will be passed to colleagues in Parks, Sports and Leisure.</p>
N/A	It's a dangerous crossing especially if you're with a child or someone who can't walk fast. The path down from the park leads straight across to the road to the pedestrian bridge over the railway. However, this is on a slight hill and traffic from the west can't see pedestrians well and also tend to be driving fast. There's a traffic island a little way to the east but it's that bit less convenient.	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Strategic Transport.</p>

<p>Buckthorne nature reserve</p>	<p>After moving into the area in late 2019, my partner and I volunteered at the Buckthorn nature reserve over the summer in 2020. It was a wonderful opportunity for many reasons. It made us both feel much more part of the local community, and like we were giving back to the area. Through the reserve, we got to meet many people active in the community, and became much more interested in the area's history. On top of that, the reserve is a really special place in itself, with really interesting geology and animal life. The addition of tables and garden boxes in the Eddystone road culdersack has also transformed the area. I'm genuinely proud to walk through it and feel like I've contributed something to the community.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
<p>Courtrai Road Scout Hut and old Dandy Fifth park</p>	<p>This was once a community asset, with a rich local history, but has been mismanaged by a property developer and allowed to fall into disrepair.</p>	<p>Community Infrastructure</p>	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>

Buckthorne Cutting	Unused community space	Community Infrastructure	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
Sayes Court Park	The tarmac is peeling away and unsafe for children - there are two swings to serve hundreds of children who live the two estates that adjoin this space (neither of which have their own dedicated play spaces). Rubbish accumulates and there is street drinking. What could be a green haven feels like a wasted space for children.	Sustainable design, Community Infrastructure	<p>Comment to be passed to colleagues in Parks, Sport and Leisure.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Playground at Home Park	A once nice little playground, it is now in need of some much overdue TLC. It has not been maintained or shown any love for numerous years and it is now looking worse for wear. There are so many flats and houses surrounding the park, and it is clearly used by a lot of families, but it looks like the authorities have completely forgotten about it	Community Infrastructure	<p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p> <p>This comment will be passed to colleagues in Parks, Sports and leisure.</p>

Courtraï road scout hut	Designate as a Local Green Space	Green Infrastructure	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
Buckthorne Road	<p>This street would benefit from traffic calming measures - it's used as an alternative to the main road, particularly when traffic builds up and many cars travel down it far too quickly.</p> <p>It is a designated cycle route and crossed by a pedestrian pathway and would benefit from less through traffic.</p>	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Courtraï Scout Hut and surroundings	This site has a lot of potential but is currently a deteriorating mess attracting fly tipping.	Community Infrastructure	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p> <p>The prevention of flytipping is outside of the scope of the Local Plan.</p>

Buckthorne Road	Cars use this road as a rat run whenever there is congestion or roadworks on Brockley road. They travel at speed in a road where children and cyclists can suddenly appear at the junction of Eddystone road.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Eddystone Road seating area	The volume of Motorcyclists that speed through here is getting dangerous. They serve around the seating and tables where families gather and speed across the footbridge. Someone will one day get killed.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Pedestrian path under railway bridge by Fordham park	The crossing is dangerous, cars come round the corners very quickly sometimes.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Home Park community garden	It obviously has not been used or looked after for more than several years	Green Infrastructure	<p>Comment will be passed to colleagues in Parks, Sport and Leisure</p> <p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

Scout Hut site, Courtrai Road	The site is currently poorly maintained and run down, and there is risk to the site's biodiversity and history in letting this continue.		<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
Cold blow lane	It's generally unpleasant to walk along this way, as the pavement breaks halfway and you need to cross the road. However cars speed along so can feel really dangerous. It also feels dingy and dark.	Sustainable design, Transport and connectivity	<p>Comment to be passed to colleagues in Highways and Strategic Transport.</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
New cross road	This should be a high street for quite a large local area (e.g. telegraph hill, hatcham etc) but currently is so unloved. A new coffee shop opened recently and has been so popular - suggesting there is demand for local business.	Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Junction A20 with Lewis Grove and Belmont Hill	Virtually no provision for pedestrians seeking to cross the road at this junction with a pedestrian crossing over only one of the arms of the junction.	Transport and connectivity	Comment to be passed to colleagues in Highways and Strategic Transport.
Cold blow lane	The underpass on Cold Blow lane feels unsafe to walk under as a pedestrian - you	Transport and connectivity,	Comment to be passed to colleagues in Highways and Strategic Transport.

	have to keep switching paths as the pavement doesn't continue on both sides.	Community Infrastructure	The Local Plan aims to create Healthy and Safe communities by creating safer neighbourhoods and improve perceptions of safety by ensuring the built environment comprises of welcoming spaces.
Buckthorne cutting - old scout hut and land	Because it's a derelict Scout hut with beautiful trees and wildlife but is fenced off boarded up and not benefitting the community , it could be A nature reserve or community garden has used for woodland activities such as forest school or exploring for local children and families and local schools and nurseries. Because of lockdown everyone has realised the importance of nature and local green space which is accessible and open to the people who live nearby	Community Infrastructure	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
Home park	This beautiful park is undervalued and empty.	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Mayow road near Mayow Park/ Burghill road	A pedestrian crossing is desperately needed here. This would help kids cross safely and slow down traffic.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

Bell Green retail park	Bell Green retail park is too car-centric. It is dangerous and unwelcoming for pedestrians.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.
Mayow road	Crossing the road near park is dangerous especially for kids on school run and using park. Also many car accidents here.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Buckthorn cutting	I am 14 years old but I have never ever been able to go to my local green space. And due to covid I would have liked to have access to it to get a break from online school.	Green Infrastructure	Comment refers mostly to restrictions that were in place during the Covid-19 lockdown
Home Park	Poorly maintained playground, Lacking in facilities: no toilets, cafe People littering - council refuse workers work hard to clean up though	Community Infrastructure	Comment will be passed to colleagues in Parks, Sports and Leisure. The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions
The Bridge Leisure centre	Needs to be re-opened	Community Infrastructure	The Local Plan aims to promote Healthy and Safe communities by addressing the wider detriments of physical and mental health. The Local Plan will also aim to ensure the delivery of high quality health (including leisure) facilities that meet the need of the local community.

			Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.
Cornmill Gardens concrete culvert	The new concrete culvert between Cornmill Gdns and the Ravensbourne/Quaggy confluence is a disaster. The green corridor so invested in with the Waterlink Way, Ladywell, Cornmill etc has been rendered useless by this intrusive tunnel that stops all species in in tracks. It is now full of rubbish and silt. With this new giant block about to be built, this area will become a dead zone for wildlife.	Green Infrastructure	<p>Comment will be passed to colleagues in Parks sport and leisure.</p> <p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Dangerous road junction at Canonbie Road on Honor Oak Road	Rat running up Canonbie Road (very steep) from Honor Oak Road creates a daily problem at this junction on a route that families use to take children to school. The speed and lack of awareness of pedestrians and the topology combine in extremely dangerous driving and associated congestion problems onto Honor Oak Road.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

Street space	<p>The pavements aren't wide enough - they force pedestrians into the road to avoid lampposts and residents' bins. People in wheelchairs and mobility scooters would be completely unable to navigate one side of the street which I think is unacceptable. This is exacerbated by cars parked on the pavement, further reducing pedestrian space.</p> <p>When the road is busy it feels very dominated by traffic which isn't very pleasant.</p>	Transport and connectivity	<p>Comment will be passed to colleagues in Highways and Strategic Transport</p> <p>The Local Plan conforms to the London Plan car parking standards.</p> <p>The Local plan also advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
street space	<p>Cars speeding really fast make this area of town feel really dangerous. It's horrible walking along here.</p>	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling.</p> <p>Speed restrictions for motor vehicles are outside the scope of the Local Plan.</p> <p>Comment to be passed to colleagues in Highways and Strategic Transport.</p>
Children's play park, Winsford road	<p>The equipment is old and in poor repair, the park is frequently littered, and the space could be must more effectively used.</p>	Community Infrastructure	<p>Comment to be passed to colleagues in Parks, Sport and Leisure.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

Traffic lights for traffic turning right from Perry hill into Perry Rise.	This is a very dangerous junction, it is very hard to see oncoming traffic particularly as there are often buses coming from the opposite direction waiting to turn right into bell green who obscure your view. You can't see whether the lights have changed from a position in the yellow box waiting to turn right. I feel a serious accident here is an inevitability if something isn't done to change the way the lights work. give traffic turning right from Perry Hill a period of time with no oncoming traffic to allow them to make their turn.	Transport and connectivity	It is not within the scope of the Local Plan to manage the frequency of traffic lights.
Sainsburys	Though I feel there is much to do to improve Bell Green I feel it is imperative that Sainsbury's is maintained. There are no other large supermarkets in the area and closing Sainsbury's altogether or drastically reducing it in size would impact on many in the local area who rely on it to do their grocery shopping - particularly those without cars.	Economy and culture, Community Infrastructure	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.
Burford Road	Cars frequently speed skins Burford Road, using it as a cut through from Perry Hill. There are always cars parked on both sides	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling.

	of the road and lots of children around hence it is very dangerous.		Speed restrictions for motor vehicles are outside the scope of the Local Plan.
Perry Hill	Cars frequently speed along Perry Hill, there have been a number of accidents in recent years.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Junction of Woolstone Road, Houston Road and Cranston Road	This is a dangerous junction, I have witnessed several near misses due both cars and pedestrians.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Car park	It is very difficult, especially for people with mobility problems/wheelchair users to leave/re-enter the car park - there's no point having disabled spaces if you can't reach them on foot/on wheels.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards
Access to Forest Hill station	No step free access to Forest Hill station from Perry Vale meaning a long journey along Waldron Vale and the South Circular.	Transport and connectivity	The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity and improve transport infrastructure
Constant fly tipping	N/A	Community Infrastructure	Noted. The prevention of flytipping is not within the scope of the Local Plan
Speeding/Problematic speed bumps	N/A	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

<p>Launcelot Road</p>	<p>The road is full of cars parked on the pavement and sometimes blocking the pavement for pedestrians. There is an ugly school building that doesn't fit the design of the other buildings at all and is screaming ugliness. There are not enough trees. Car traffic is way too much for this residential road with 2 schools.</p>	<p>Transport and connectivity</p>	<p>The Local Plan conforms to the London Plan car parking standards.</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport</p>
<p>Brockley and Ladywell Cemeteries</p>	<p>The local cemetery is a central space for the community around Brockley, Ladywell and Crofton Park.</p> <p>It is a fantastic place to walk around, pay your respects to those buried there and learn about the community. The trees and plants there make it a great place to escape for short walks. That said, the maintenance of the cemetery is very poor. Paths are broken and access to the location is not consistent. There are three entry points, with the one Brockley Rd and Ivy Rd being the primary one. The secondary one on Brockley Grove and Ivy Road being open some of the time. But the entrance by Brockley Grove and Huxbear St (opposite the Baptist Church) rarely open now. This limits access to the historic open space.</p>	<p>Green Infrastructure, Community Infrastructure</p>	<p>Comment will be passed to colleagues in the Bereavement team.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

<p>Blythe Hill Fields</p>	<p>This is a great park to walk up to with the family, for kids and to see London. It is open and a great location to (pre-pandemic) to meet local friends and family. It is missing some locations to sit down and exercise. Also a local cafe like Pistachoes on Hilly Fields.</p> <p>At night, it needs some more street lighting, designed to avoid upward light-polution.</p>		<p>This comment will be passed to colleagues in Parks, Sport and leisure</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
<p>Lewisham High Street and Market</p>	<p>The whole of Lewisham Shopping Centre, High Street and Market needs to be redesigned built up for the community. It is the heart of Lewisham town centre, but feels old and forgotten. It does not deliver to the community or make it into an aspirational destination.</p> <p>The market and stallholders are great for fruit and veg. Great quality and offered at good prices.</p>	<p>Economy and culture, Community Infrastructure</p>	<p>The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities.</p> <p>The Local Plan includes proposals to support the redevelopment of the Lewisham Shopping Centre, ensuring the market remains at the heart of the town centre with improved amenity for businesses and visitors.</p>
<p>Marnock Road and Lindal Road Network Rail land</p>	<p>Not good. Rubbish tipped there, no cleaning it up, just no pride in the community as you walk past and see the rubbish and lack of upkeep of the green space by either the council, Network Rail or volunteers.</p>	<p>Community Infrastructure</p>	<p>Comment will be passed to colleagues in Environment Crime Enforcement and Parks, Sport and Leisure.</p>

Ladywell Playtower	<p>This venue is being left to rot and decay. The Ladywell community needs this building and location to be renovated so that appropriate facilities are made available to the local community.</p> <p>Debate about this location has gone on for too long.</p>	Community Infrastructure	There is currently a live planning application regarding the renovation of the Ladywell Playtower which at the time of writing will be determined in due course.
Car park	Have seen the notice for development of the car park space. Would be disappointed to lose the car park faculty. If this goes there is no where left to park in the vicinity of forest hill which I think will be a real shame for local businesses there.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards
Chudleigh Road	Cars speed down the road, both from Brockley Grove to Bexhill Road as well as from that junction to Ladywell Road. These cars and vans go very fast through this residential street.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Ha'penny Hatch approach path	This path is always strewn with litter and fly-tipped items, and is a graffiti hotspot. Often an area where graffiti "artists" congregate too, and it's often antisocial. Lighting is patchy, particularly close to the bridge. It doesn't feel a safe area, and muggings are common.	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement and the Neighbourhood Community Safety Service

Bronze Street	Crumbling walls around the border of Ferranti Park and Sue Godfrey Nature Park - not well maintained	Green Infrastructure	<p>Comment will be passed to colleagues in Parks, Sport and Leisure.</p> <p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces</p>
Woolstone Rd	<p>Not even half of all cars stick to the speed limit. Many are even driving recklessly. The road is narrow and I feel extremely unsafe as a pedestrian and cyclist.</p> <p>As a resident on the street I am also impacted and concerned about the air and noise pollution from the road and people speeding. This includes all the through traffic via Cranston Rd making this junction particularly scary to cross</p>	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Bell Green Retail Park Access	<p>Cars accessing the retail park coming from Perry Hill and Perry Rise roads are all speeding recklessly. There is low visibility around the junctions, bad lighting and a general lack of pedestrian friendly infrastructure to navigate the retail park.</p> <p>I do not feel safe at all to visit the retail park as a pedestrian and had 2 near misses with cars.</p>	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling. The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.</p> <p>The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.</p>

Catford Rd Bridge	This bridge is absolutely appalling in how unsafe it is for pedestrians and cyclists. The amount of traffic and pollution needs urgent action considering that this bridge is a main access route for the 2 train stations.	Transport and connectivity	The Local Plan aims to create Healthy and Safe communities by addressing the detriments of physical and mental health. The Local Plan also aims to provide physical infrastructure needed to support growth and sustainable places, including through the use of CIL funding and developer contributions. The Local Plan includes policies to support the regeneration of Catford town centre, including public realm enhancements around Catford Bridge.
Pavements	The pavements on this stretch of Catford Hill road are not fit for purpose. Residents block them with their cars and the surface is all damaged from the constant access by people's cars to park here. Even as a well abled walker I have problems navigating this stretch of pavements. It must be near impossible for someone with a pushchair or less abled pedestrian or for the elderly. In particular with the cars on the road next to the pavement all speeding		Comment will be passed to colleagues in Highways. Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Pedestrian Crossing	The pedestrian crossing here is awful. It takes probably 20 minutes to safely cross this junction as a pedestrian with a clear priority given to cars while people have to breath their exhausts while stuck on tiny middle islands. The entire Bell Green Retail park needs a complete rethink about how to make it more accessible for pedestrians.	Transport and connectivity	This comment will be passed to colleagues in Highways. Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.

Wells Park Road	We cross this road with our child every day to use the park. While we are grateful for the zebra crossing and the recent (temporary?) barriers to prevent parking, this road is used often for very fast, very dangerous driving.	Transport and connectivity	<p>This comment will be passed to colleagues in Highways and Strategic Transport.</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
Speeding mopeds on Grierson Road	<p>Too many mopeds use Grierson road as a shortcut, obtaining excessive speeds down this normally quiet road.</p> <p>They join Honor Oak Park high street by going round the gate at the end of Grierson road and mounting the pavement.</p>	Transport and connectivity	<p>This comment will be passed to colleagues in Highways and Strategic Transport.</p> <p>It is not within the scope of the Local Plan to determine the types of vehicles that use public roads.</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
Junction Ewhurst Road	Crossing the street can be difficult and dangerous. A lot of cars speed up on that section on the road towards Catford too, which make it a hazard, especially for the children at Ladywell Pendergast school.	Transport and connectivity	<p>This comment will be passed to colleagues in Highways and Strategic Transport.</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
Cycle track constantly used by motorbikes	The island has space on both sides for cycles and kids play on the island. But there are constant motorbikes coming through, often at fast speed. It is often the same motorbikes at the same time of day.	Transport and connectivity	<p>This comment will be passed to colleagues in Highways and Strategic Transport.</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>

parking on pavements during school drop off	Constant parking on pavements by people parking to drop off kids. It's dangerous for children crossing honor oak road as it adds another hidden variable.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.
Silver street development	Permission was granted for huge tower outside cluster looming over houses and conservation area	High quality design, Heritage, Housing	The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough.
Travis Perkins exit	Vans leaving Travis Perkins come up the ramp often driving quickly and using sat navs, then drive into the road without clear sight of cyclists and pedestrians.	Transport and connectivity	It is not within the scope of the Local Plan to address how drivers enter and exit this site.
Traffic	Winchfield Road - Fairlawn Park is used as a cut through for cars going to and from the high street and wanting to avoid the roundabout at bell green. They are often speeding and I have witnessed a number of collisions / accidents. It also creates high levels of noisy traffic throughout the night for a residential road - and in the daytime it is dangerous with a school nearby	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.

Cut through	Winchfield Road and Fairlawn Park are rat runs/ cut through for cars to and from the high street. It is used at all hours and not only is it unfair to residents it is dangerous. There have been multiple accidents. There is also a primary school that has access on both streets and has the cars racing by. Also the GPS location for the industrial estate sends lorries via Fairlawn Park and they get stuck having to reverse out to Sydenham Road. Not only is this dangerous but has caused damage to cars in the process.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling This comment will be passed to colleagues in Highways and Strategic Transport
Malpas Road	This road is way too small to be classed as a B road!	Transport and connectivity	This comment will be passed to colleagues in Highways and Strategic Transport who address with road classification issues. It is not within the scope of the Local Plan to re-classify
Shardelous	The speed bumps on this road are useless. The vibrations caused as drivers fly over them is rattling the nearby houses!	Transport and connectivity	This comment will be passed to colleagues in Highways and Strategic Transport. Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Shardeloes	Truck parking lot!!! Really?!? The road towards Brockley Cross is literally a parking lot for all the trucks delivering to Howarths. Surely there should be better controls to manage this!	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.

Car parking on Manwood Road pavements	Car parking on the pavement makes this a narrow stretch the walk and very difficult for pushchairs and wheelchair users.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.
Haseltine	Haseltine is an excellent school but surrounded by very busy roads with so many pollutants.	Transport and connectivity	The Local Plan aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes.
Ladywell Road	This road is extremely busy, especially during school run hours and when most people finish work. It's gridlocked from Adelaide Avenue down to Lewisham High Street. There is dangerous amounts of pollution being spewed out there every day. mount of pollution	Transport and connectivity	The Local Plan aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes.
Sydenham Hill/ Sydenham Rise	The roads are steep. with lots of traffic(more so with the proposed building in the area) I am fed up with cyclists calling for cycle lanes which are impracticable and will endanger everyone else. They could USE another routes or exercise in the Surrey Hills!	Transport and connectivity	It is not within the scope of the Local Plan to restrict the amount of cyclists who use a particular road. Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Sydenham Hill	Dangerous for pedestrians and cyclists.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

<p>Sydenham Hill/ Sydenham Rise</p>	<p>Busy road but cyclists think they are entitled to a cycle lane. Parking on the road slows down the traffic which is fast enough anyway. More 363 and 356 might reduce car use. Cyclists not stopping as they fly down this hill and Kirkdale .. should have license plates like cars so can be fined for speeding.</p>	<p>Transport and connectivity</p>	<p>It is not within the scope of the Local Plan to draft policy that could be used to restrict the use of bicycles. Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
<p>Hatcham Works site as it is at present with Sainsburys etc..</p>	<p>The only green space for many around..a more open site where you can breathe ..off the VERY TOXIC main road, with mature trees..useful facilities.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces. The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
<p>New pedestrian and cycle link</p>	<p>Lack of pedestrian link from the centre of the Bellingham Area directly into the developing Bell Green area.</p>	<p>Transport and connectivity</p>	<p>Comment will be passed to colleagues in Highways and Strategic Transport The Local Plan aims to provide physical infrastructure needed to support growth and sustainable places, including through the use of CIL funding and developer contributions The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.</p>
<p>Lack of bus services</p>	<p>Lack of connectivity via buses</p>	<p>Transport and connectivity</p>	<p>The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity and improve</p>

			transport infrastructure. It is not however within the scope of the Local Plan to influence bus or rail timetables.
Lack of transport	Transport black spot.	Transport and connectivity	The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity and improve transport infrastructure. It is not however within the scope of the Local Plan to influence bus or rail timetables.
Home park	Needs some TLC. Great community space but poorly maintained, broken playground etc.	Community Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
The bridge leisure centre	Great community space- good range of classes for young and old. Must be re-opened after covid. Such a loss to the community otherwise, just Kidz after school and breakfast club runs from there, family swimming, pitches, etc.	Community Infrastructure	<p>The Local Plan aims to promote Healthy and Safe communities by addressing the wider detriments of physical and mental health. The Local Plan will also aim to ensure the delivery of high quality health (including leisure) facilities that meet the need of the local community.</p> <p>Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.</p>

Home Park	It's a great space, with beautiful trees but run down with potholed paths and neglected play park.	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Home Park		Green Infrastructure	No comment submitted
Speeding traffic and ineffective speed bumps	Traffic is encouraged to speed down this road without consequences. The speed bumps don't work.	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>The officer however does not agree with the insinuation that traffic is encouraged to speed down any road within the borough.</p>
Gilmore Road/Clarendon Rise Junction	Road layout encouraging dangerous driving.	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>The officer however does not agree with the insinuation that traffic is encouraged to speed down any road within the borough.</p>

Home Park	This park with its amazing avenue of trees and beautiful library could be so much nicer. It is so underused, lonely, shabby and sometimes menacing I live between Home Park and Mayow Park but never feel attracted to Home Park.	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Loo block, Home Park	This disused loo block is Sydenham's shame and does a disservice to the whole area. Visitors to Sydenham arriving via Sydenham road are greeted by this rotting eyesore with its hideous Gentlemen sign. This repulsive structure attracts flytipping. It probably also attracts crime.	Green Infrastructure, Community Infrastructure	<p>This comment will be passed to colleagues in Parks, Sport and Leisure as well as the Neighbourhood Community Safety Service.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
The Bridge Leisure Centre	The Bridge Leisure centre is a valuable asset to our community and must not be allowed to close.	Community Infrastructure	<p>The Local Plan aims to promote Healthy and Safe communities by addressing the wider detriments of physical and mental health. The Local Plan will also aim to ensure the delivery of high quality health (including leisure) facilities that meet the need of the local community..</p> <p>Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.</p>
Beckenham Place Park	This park is beautiful.	Green Infrastructure	Noted

			The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.
Kirtley Road	There is always so much fly tipping at the end of this road, on the way to the health centre.	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement The prevention of flytipping is not within the scope of the Local Plan
Silverdale	Silverdale could be quite a nice road but it is so full of litter and flytipping.	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement The prevention of flytipping is not within the scope of the Local Plan
Corner of De Frene Rd and Perry Rise	There is so much fly tipping at this location.	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement The prevention of flytipping is not within the scope of the Local Plan
old co-op building	Such a shame that we could not have had a new medium sized supermarket such as the old co-op at this location. The co-op used to draw people to the high street.	Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities

<p>Dhamecha cash 'n carry</p>	<p>I live in Barmeston Road and the back of my house looks directly at this enormous light industrial building. It was erected with no thought at all given to screening, green landscaping or for the fact it is surrounded by residential houses and backs on to the Ravensbourne River. The boundary (until many recent complaints to the manager) consisted of a very ugly steel fence with tatty, ripped black membrane semi-attached. There is now a six foot odd fence in front of it but this in no way near disguises it's huge height, or 24 hour floodlights which shine into our windows, disturb bats and river wildlife and the sheer bulk of the structure with no attempt at landscaping that blights our homes and gardens. It is incredible that planning was given with no conditions for tall trees bordering the car park /river and boundary with our gardens to be planted to help soften the endless noise of tannoy announcements, loaded trolleys on tarmac or vans with radios blaring and people shouting. There have been promises of landscape planting on the boundary but these have been broken. In line with the plans for the greening and better landscaping of Catford the improvement of this site - which is literally a few meters from the back gardens of many Barmeston</p>	<p>High quality design, Green Infrastructure, Sustainable design</p>	<p>Comment will be passed to colleagues in Planning Enforcement.</p>
-------------------------------	--	--	--

	<p>Road properties and adjoins the River Ravensbourne, should be addressed.</p>		
<p>New Ravensbourne Retail Park plans</p>	<p>There is mention in the Plan of Barmeston Road (where I live) becoming something of an access road (although the wording is unclear) for the new retail offering. I wanted to clarify what that meant as I feel a</p>	<p>Economy and culture, Transport and connectivity</p>	<p>If an application for the site is submitted a delivery and servicing plan would need to be submitted as part of the application. As a residential road Barmeston Rd would not be used as the main servicing road, this would be reserved for the A21.</p>

	small, quiet, residential road would be entirely unsuitable for that purpose?		
Home park sydenham	Because there is lots of litter and the playground needs revamping.	Community Infrastructure	<p>Comment will be passed to colleagues in Parks, Sport and leisure and Environment Crime Enforcement.</p> <p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Pool River	<p>The river and area between Catford and Sydenham is great for walks and cycling along the path. Yet, there is rubbish and the banks are overgrown, limiting access to the river.</p> <p>It feels like a forgotten location for people to visit and enjoy. I have seen some volunteers clearing the area, but more support and planning is needed.</p>	Green Infrastructure, Transport and connectivity	<p>The Local Plan aims to promote and protect the ecological, biodiversity and amenity value of the Borough's natural assets – including trees, green spaces and water spaces and seek to enhance existing assets or make new provision through new development wherever opportunities arise.</p>

Pomeroy Street	our health and safety is at risk	Transport and connectivity	It is not clear what the intent of the comment is.
Pavement parking.	Pavement parking here is an insult to pedestrians. These are huge houses, often with driveways, but you still allow drivers to use public space and a private garage.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.
Barmeston rd	There is no communal cycle storage on this street although I have repeated applications. Storing bikes safely when they are routinely stolen from gardens is very difficult - and that's if you're lucky enough to have a garden. If the council genuinely wants us to be less reliant on cars it needs to provide more kerbside cycle shelters.	Transport and connectivity, Green infrastructure	Comment will be passed to colleagues in Highways and Strategic Transport. The Council has a policy of increasing the availability of on street cycle storage in the Borough however the delivery of cycle storage is subject to available funding.
Trees	Unlike the heavily greened and tree lined conservation streets just across the A21 Barmeston road is a concrete wasteland. Many residents have said they would like trees in front of their homes but all but one have been told the sites are 'unsuitable' by the council for various odd reasons. Trees help with pollution and create better		If residents have been informed that the site is unsuitable for tree planting it would be outside the scope of the Local Plan to address this. The Local Plan however aims to promote and protect the ecological, biodiversity and amenity value of the Borough's natural assets

	environments yet the council is effectively blocking this road from having any.		
Home Park	Thanks to those who cut the grass regularly, but the litter left is dangerous to pets and small children		Comment will be passed to colleagues in Environment Crime Enforcement
Barmeston road	Barmeston road looks shabby and neglected. It would really benefit from tree planting and is often a site for fly tipping especially opposite the post office and on the corner of Charlsley road and Barmeston road. On some days the road is clogged with post office vehicles making access for residents difficult.	Transport and connectivity, Community Infrastructure, Green Infrastructure	Comment will be passed to colleagues in Highways and Strategic Transport. The Local Plan aims to promote and protect the ecological, biodiversity and amenity value of the Borough's natural assets

Beckenham Place Park	<p>There has been a huge investment in the park which meets some local need (bearing in mind it is on the Bromley border). The council has stated that more even more funding and development is going in to the park despite rejecting many other green space enhancement requests due to lack of funding.</p> <p>There are a lot of other green spaces and not just open parks that need attention - this is starting to look like a vanity project that isn't benefitting a lot of Lewisham residents.</p> <p>Share the funding across the borough please and take in to account high pollution areas, density of schools and threatened green land - these could really use a share of the money that is allocated to Beckenham. This is a labour borough after all - principals of equality should be in all funding decisions.</p>	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Illegal parking	Consistent illegal parking (inc widespread misuse of blue badges) on the double yellows along Adenmore Road, restricting access and putting residents at risk.	Transport and connectivity	<p>The Local Plan conforms to the London Plan car parking standards.</p> <p>Parking enforcement is not within the scope of the Local Plan</p>
Albion green	Lovely small nature oasis hidden away	Green Infrastructure	Noted

			The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.
Springbank Road	Keen to see the area developed. Want to make sure any scheme is sympathetic to the surrounding area... no hi-rises please!!	High quality design, Housing, Sustainable design	The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough The Local Plan also advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Parking.	Unrestricted parking bay means residents can't often park outside their own home (I have to park three roads away). Meanwhile a local garage uses the space to park cars being worked on. Seems a bit wrong frankly. The bays are effectively supporting a small business at the expense of residents paying hundreds of pounds for parking every year	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards. Parking enforcement is outside of the scope of the Local Plan
Street and conversion of shops to nothinfnuseful	This area has an opportunity to be a nice local centre with a couple of cafés and restaurants rather than ugly conversions to residential.	High quality design, Housing, Sustainable design, Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities

Ha'penny hatch.	Love this site with a bridge over the Creek from where I've seen a seal with my children! Never feels unsafe here and is always busy (have never heard about 'muggings' there). The ever changing graffiti art looks beautiful and is a really positive sight as the previous semi-legitimate wall for graffiti in Brookmill park was knocked down years ago.	Community Infrastructure	<p>Comment will be passed to colleagues in the Neighbourhood Community Safety Service.</p> <p>The Local Plan aims to create Healthy and Safe communities by addressing the detriments of physical and mental health. The Local Plan also aims to provide physical infrastructure needed to support growth and sustainable places, including through the use of CIL funding and developer contributions</p>
Eastern Road	<p>There was a nice area of undergrowth opposite the entrance to Hilly Fields woods which has now tragically been destroyed. This was previously a great 'wild' patch full of birdsong and where I would take my children to pick blackberries. Trees have been cut down and made into insect loggeries in a pathetic attempt to mitigate the destruction of this small habitat. Apparently flower beds are going to be planted. It's such a pit that this small wild area is going to become another ecologically sterile wasteland!</p>	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Bricklayer cemetery	Love Brockley cemetery which is a serene haven of quiet and an important place for wildlife as it is not messed around with too much. There is no problem with litter and no intrusions of cafes or shops.	Green Infrastructure, Community Infrastructure	Comment will be passed to colleagues in Bereavement Services

Pine Tree Way street name.	When the new housing was built on this site the road was named after the pine trees, on the opposite bank of the river, that were used to screen the depo on the other side.	Green Infrastructure, Sustainable design, Housing, High quality design	It is not within the scope of the Local Plan to review the names of specific roads
Smead Way street name.	When the new housing was built on the former Sundermead Estate this road was named after it. Unfortunately the developers appear to have looked at a map where Sundermead had been abbreviated to 'S'mead' and named the street Smead Way.	High quality design	It is not within the scope of the Local Plan to review the names of specific roads
Waterway Avenue street name	The name of the street is generic and sounds like it was picked from a property developers brochure.	High quality design	It is not within the scope of the Local Plan to review the names of specific roads
Hilly Fields woods	It's great that this is a nature area but is very heavily used and dog walkers seem to think this area is a toilet for their dogs where they don't need to clean up.	Green Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement and Parks, Sport and Leisure.
No Barmeston Road bike shelters	There are no bike shelters here and cycling is a key way to get around in this area. It's essential that we get somewhere to store our bikes here.	Transport and connectivity	<p>Comment will be passed to colleagues in Highways and Strategic Transport.</p> <p>The Council has a policy of increasing the availability of on street cycle storage in the Borough however the delivery of cycle storage is subject to available funding.</p>

Trees and greenery	Barmeston Road could be a beautiful street with its many grand, period houses. There is a lack of greenery here though and we really need trees to be planted, to create a pleasant, leafy area.	Green Infrastructure	Comment will be passed to colleagues in Parks, Sport and Leisure. The Local Plan aims to promote and protect the ecological, biodiversity and amenity value of the Borough's natural assets – including trees, green spaces and water spaces and seek to enhance existing assets or make new provision through new development wherever opportunities arise.
Barmeston Rd and Ravensbourne Retail Park	I have read all the plans regarding the new Ravensbourne Retail Park which sounds good but there is the suggestion that Barmeston Road could become some kind of service road. This would be a disaster for the road as it is a quiet residential area with period properties and great potential for regeneration.	Transport and connectivity	If an application for the site is submitted a delivery and servicing plan would need to be submitted as part of the application. As a residential road Barmeston Rd would not be used as the main servicing road, this would be reserved for the A21.
Barmeston Road part of conservation area	The map showing the large conservation area stops short of Barmeston Road. I am concerned that this is because there are plans for it to become a service area for the Ravensbourne Retail Park.	Heritage, Economy and culture	If an application for the site is submitted a delivery and servicing plan would need to be submitted as part of the application. As a residential road Barmeston Rd would not be used as the main servicing road, this would be reserved for the A21.
Top of Upper Brockley Road	Inadequate bike stands which would otherwise be useful for parents dropping children off at Myatt Gardens.	Transport and connectivity	Comment will be passed to colleagues in Highways and Strategic Transport.
Mews behind houses	It's a badly kept area with lots of rubbish which is a pity as it could be a nice lane to wonder down like the mews around the other end of Brockley.	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement The prevention of flytipping or littering is not within the scope of the Local Plan

Courtrai Road	The Scout Hut and top of the road have become a popular site for dumping in the street but whoever owns the scout hut land hasn't been locking after it.	Community Infrastructure	<p>Comment will be passed to colleagues in Environment Crime Enforcement</p> <p>The prevention of flytipping is not within the scope of the Local Plan</p>
Retail Parades on Springbank Road	Streetscape and public realm need investment and enhancement.	High quality design, Sustainable design	The Local Plan also aims to provide physical infrastructure needed to support growth and sustainable places, including through the use of CIL funding and developer contributions

<p>Railway Corridor boundary with Springbank Road</p>	<p>Boundary buffer with Springbank Road needs enhancement.</p>	<p>Green Infrastructure</p>	<p>Comment will be passed to colleagues in Parks, Sport and Leisure.</p> <p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p>
<p>South of Lewisham Library - shop frontages and street landscape (too much shabby retail)</p>	<p>Along this road, many of the shops seem to do little business. Most of the shop fronts are tatty or gawdy (with ugly Lycamobile signs or similar) and the area looks depressed as a result. Some of the retail premises trade out of attractive old properties but the buildings aren't visible because they have one storey extensions at the front (e.g. just south of the library on the opposite side of the road). In addition, the road is polluted and is too narrow at many points to enable cycle lanes</p>	<p>Economy and culture</p>	<p>The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities</p> <p>The Local Plan also aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes</p>
<p>Wild area between Adamsrill Road and Dr Green Roas</p>	<p>The amount of wildlife I see, particularly house sparrows and creatures</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p>
<p>Open Space/ former Allotments between Adamsrill Road and DeFrene Road</p>	<p>This site has not been touched for many years and is a heaven for wildlife.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p>

Wild land	The land between Adamsrill and De Frene is something that is really special to the local community and especially the kids who like watching and listening to the wildlife. Adults do too. It's a perfect home for an array of creatures and species.	Green Infrastructure	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.
A little green space on Montrose Way	There's a green space here totally neglected, dirty, even dangerous, with a broken bench.	Green Infrastructure	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.
Open space	At the moment it's inaccessible and overgrown. It used to be allotments but is now not being used at all. On the upside there is a lot of wildlife out there including a flock of sparrows and some starlings, and possibly even bats!	Green Infrastructure	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.
Kirkdale thorpewood	Very dangerous crossing.	Transport and connectivity	This comment will be passed to colleagues in Highways Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

<p>Dangerous road crossing</p>	<p>There is no pedestrian crossing to cross Pomeroy Street here. It is therefore very difficult to cross safely due to traffic coming from so many directions. This is the main route to supermarkets for many pedestrians and hence should be made safer.</p> <p>It is also dangerous for cyclists - cars turning left here don't see cyclists and I have seen multiple instances here involving cars and cyclists.</p> <p>This road feels polluted and dirty and is not a nice place to walk.</p>	<p>Transport and connectivity</p>	<p>This comment will be passed to colleagues in Highways and Strategic Transport</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
<p>Junction of Houston Road and Perry Hill</p>	<p>Very difficult to cross the road to get to the bus stop & waterlink way. Cars speed up Perry Hill and use these roads as cut throughs for the south circular</p>	<p>Transport and connectivity</p>	<p>This comment will be passed to colleagues in Highways and Strategic Transport</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
<p>Pathway up to the bridge</p>	<p>There is always a puddle underneath this tree and doesn't seem like it is draining properly despite attempts to improve it</p>	<p>Green Infrastructure, Sustainable design</p>	<p>Comment will be passed to colleagues in Parks, Sport and Leisure</p>

<p>Continuation of waterlink way through Wickes and Halfords</p>	<p>Waterlink way has been a lifeline for many during the lockdown and is used by so many local people.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces</p>
--	--	-----------------------------	--

<p>Gellatly Road SE14 5TT. This road is designated a B road and is too narrow for the traffic it has to cope with. It is difficult to cross the road especially with vehicles exceeding the 20 mph limit when they are not stationary with idling engines. Our 6 year old has to cope crossing this road to get to school. It should not be a B road. Traffic should be re routed down main roads and not be directed through this residential area.</p>	<p>Because it is difficult negotiating this road with the large amount of traffic on this narrow road</p>	<p>Transport and connectivity</p>	<p>This comment will be passed to colleagues in Highways and Strategic Transport who address with road classification issues.</p> <p>It is not within the scope of the Local Plan to re-classify roads.</p>
<p>Open space between Adamsrill and De Frene Road</p>	<p>The space provides a haven for wildlife. We need more spaces like this for environment.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's</p>

			<p>network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Gillian Street	<p>This small road is often used as a rat run for people trying to avoid the lights. Because of the nature of the road cars frequently drive in excess of the 20mph speed limit. This means that crossing the the road on the corner of Vicars Hill and Gillian Street is very dangerous - this is exacerbated by the number of vehicles which park on the double yellow line. I have seen too many near misses - especially with young children.</p>	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling.</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport</p>
	Great selection of independent businesses.	Economy and culture	Noted but location not disclosed
Ladywell Fields	<p>This is one of the best parks in Lewisham. Great for relaxing and enjoying a bit of peace amongst the bustle.</p>	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

A20 by Lewisham Gateway Phase 2 through to Loampit Vale.	This part of the road is really troubling as a cyclist. The layout of the roads seem to encourage people to speed around corners.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Comment will be passed to colleagues in Highways and Strategic Transport.

<p>The entirety of the shopping area at Bell Green.</p>	<p>Lewisham seems to be cryptic in what it is planning -again. Most people will turn up in their cars and not be aware of the proposals posted on the lamp posts primarily on the lower use service road/bus loop. The idiotic scheme put forward by the Sydenham Society (ca2018) appears resurrected - effectively creating a sink estate where the retail outlets are replaced with blocks of flats. The promises that shops will return has low credibility - the street market in Catford is evidential after 'restyling'</p> <p>As they are, the retail shops on the Bell Green estate, Sainsbury's especially, are very useful. They are conveniently located and easily accessed. Conversely, Sydenham high road has been made difficult to use as has been Catford itself. Both are shadows of their former selves (one doubts that Catford will be improved by the ULEZ expansion along with the proposed re-routing of the S.Circular; articulated lorries will almost certainly cause problem on tight turns).</p> <p>As for the car parks being car friendly, one hopes that cars parks are just that. What could be dealt with is posting (a) sensible speed limit(s) and creating elevated</p>	<p>Transport and connectivity, Economy and culture, Housing</p>	<p>The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.</p>
---	---	---	--

	<p>pedestrian walkways. Additionally, the traffic light phasing on the main roads peripheral might well be altered so that the temptation to use the Sainsburys car park as a cut through is diminished.</p>		
--	--	--	--

Cars parking on the footpath	Cars park on the footpath here often making it difficult for people to pass. The road is really wide here so there should be no reasons whatsoever for cars to encroach on pedestrian space.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.
A2 at the intersection of Deptford High Street	This is an area that has a lot of pedestrian traffic and vehicular traffic. The speed at which traffic moves along the A2 is too fast to make it safe for other users. Moreover there is a crossing that is outside Addey and Stanhope School where pedestrians need to wait for a very long time on a narrow footpath to cross.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling The Local Plan also conforms to the London Plan car parking standards. CPZs outside the scope of the Local Plan
Small site opportunity	Under used surface parking	Transport and connectivity	Noted
Add to Lewisham Link	This is London cycle network route 22 and provides a well used link from Catford to central London. It enters the borough at Eddystone Road, turns on Buckthorne Rd then Bartram Road before jiggling across Brockley Road and down Sevenoaks and then Ewhurst Rds before entering Ladywell Park	Transport and connectivity	Noted.
Small site opportunity	MOT garage and back yards of commercial buildings that present an untidy face to Stondon Park.	High quality design, Housing,	Noted We are not adding site allocations at this stage of the Plan process. This site may be considered during the plan review in due course.

		Sustainable design	
Tennis courts	Run down	High quality design	Comment to be passed to colleagues in Parks, Sport and Leisure
Tennis courts	Run down	High quality design	Comment to be passed to colleagues in Parks, Sport and Leisure

<p>Coop</p>	<p>If understood correctly, it looks like the site is earmarked to be redeveloped into flats. This would be of huge detriment to the local community.</p> <p>Firstly, a majority of the customers walk to this site, minimising the carbon footprint of shopping for groceries in the area.</p> <p>Secondly, the only realistic alternative would be the Sainsbury's by Grove park station. This leaves the older community of Downham travelling much further for the regular shopping, plus it's a more expensive shop when reviewed on an average per-basket review.</p> <p>The store is heavily involved in the local community, in addition to being a local employer. The staff know many of the regular customers, including the older shoppers in which the familiarity and friendliness of the staff supports their well-being in the area. Plus the store is involved in local initiatives with children, has a thriving notice board and proved itself an invaluable hub during Covid.</p> <p>There is already council land nearby which could be redeveloped without removing a major asset to the area.</p> <p>I am certainly not alone in my concern for the proposed plans and opposition is building. I work in public consultation and on viewing the placemaking strategy, and</p>	<p>High quality design, Housing, Sustainable design, Community Infrastructure</p>	<p>The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities.</p> <p>The consultation for the Local Plan Reg 18 document was extensive in both promotion and activity. Unfortunately the Council were unable to promote the consultation through physical means and also were unable to hold physical workshops due to the Covid-19 restrictions that were in place at the time.</p>

	<p>the method of commenting on specific areas of development, I am concerned that those most affected will be either unable to contribute to this conversation, or completely unaware of the plans altogether.</p>		
--	--	--	--

Small site opportunity	Under used garages with surface parking which could be replaced with two/three storey houses.	Housing, High quality design	Noted We are not adding site allocations at this stage of the Plan process. This site may be considered during the plan review in due course.
Small site opportunity	Two storey mixed use commercial building, postwar.		Noted We are not adding site allocations at this stage of the Plan process. This site may be considered during the plan review in due course.
Co op redevelopment	This is my local shop and it may be redeveloped into flats. I'm really worried that I have no other suitable shop local as I have no car and can only walk short distances. The small shops on the high street are terrible and cannot service my needs. It is also a social outing for me as I live alone. I am friends with many of the staff in the co op and they are a good employer in the area. I also think they contribute to the area with their fundraising. Do not replace it with a block of flats catering to low income people only and remove this hub of local activity. My friends are also upset that a community pub is being removed and not replaced, it really removes the soul of an area.	Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities

Alley	fly tipping hot spot. Dangerous feeling, dark, depressing, scary, uneven footpath down this alley. Used by me, the local people and children from the schools, never feels safe.	Community Infrastructure	Comment will be passed to colleagues in the Neighbourhood Community Safety Service and the Environment Crime Enforcement The prevention of flytipping is not within the scope of the Local Plan
Ivorydown, congested and unwelcome feeling	The traffic from the schools particularly at the Launcelot end of the street is awful. Please fix this by making more traffic patrols of the area during school starting and finishing times to discourage parents double parking. I've nearly been hit by cars here due to people driving on the footpath. The street itself needs a face lift with new footpaths like on downham way, as well as requires trees planting to improve the air quality created by all the idling engines.	Transport and connectivity	This comment will be passed to colleagues in Highways and Strategic Transport. The Local Plan conforms to the London Plan car parking standards.
Parade of shops needs a facelift	This sad and depressing parade of shops could be the lifeblood of grove park/downham. Conveniently located opposite the station it is a shame it is dirty and in such a poor state.	Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Bell Green Lane / Kent House Lane	I live on the road	N/A	N/A

Space behind Adamsrill, Niederwald, De Frene and Fairwyn Roads.	Currently an extremely overgrown and wasted space. Home to some wild animals but also vermin.	Green Infrastructure	Comment to be passed to colleagues in Parks, Sports and Leisure.
Home park	It has huge potential and is so neglected versus Mayow park in upper Sydenham.	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Dangerous speeding	Cars use Tannsfeld as a short cut to avoid the lights at the end of Newlands Park. Many many cars break the speed limit and the blind corner on Tannsfeld opposite Alexandra Rec is incredibly dangerous. It's only a matter of time until a child gets hit by a car here.	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Determining speed restrictions are not within the scope of the local plan</p>
Queensthorpe / Earlsthorpe	Flytipping behind Earlsthorpe Road has been going on for years House next to Queensthorpe Houses has been squatted for years and Council has refused development that would greatly	Community Infrastructure	<p>Comment will be passed to colleagues in Environment Crime Enforcement</p> <p>The prevention of flytipping is not within the scope of the Local Plan</p>

	improve the place and provide family housing		
Parking of large vans	Large vans are parked at the upper end of Dukesthorpe obstructing view and causing safety issues to be able to turn onto Bishopsthorpe Speeding vehicles from nearby Audi garage has not been addressed	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.
Torridon Road	Noisy, traffic, speeding drivers, poor air quality on what should be a quiet residential street.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
	It's a great shortcut and I definitely wouldn't want it to be closed - but it's quite scary to walk down it at night. It's poorly lit and could perhaps benefit from cctv put up high so that it can't be vandalized. With a sign saying this area is on camera...	Transport and connectivity	Comment will be passed to colleagues in the Neighbourhood Community Safety Service No area selected
Junction		Transport and connectivity	No comment made

Hermes Depot at Ashgrove Estate	Frequency of lorries 12ton+ through day & night.. Noise, pollution & nuisance. Hermes private drivers waiting on the carriageway - parking on double yellows, blocking crossovers & gate access and leaving engines idling.	Transport and connectivity	Comment to be passed to the enforcement team. This is an issue regarding the conditions agreed on the planning application and is not within the scope of the Local Plan
Home park	Could be improved the park feels unloved	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Old Kent Road	This street should be a much better high street. Empty shop fronts and losing the White Hart makes this feel like it's going under.	Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Green space between Adamsrill and De Frene Road	Much needed green space for local wildlife to flourish.	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

<p>Bell Green shops and surrounding busy roads</p>	<p>The pedestrian access to Bell Green is appalling. I regularly walk there with my young children and the pollution they are exposed to on the journey is horrible. There is limited pedestrian access into the (unnecessarily large) car park.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling.</p> <p>The Local Plan also aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes.</p> <p>The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.</p>
<p>Mayow Park playground</p>	<p>We love Mayow Park and the value it gives to the local community but the children's playground is long overdue an upgrade</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
<p>Forster Memorial Park</p>	<p>The park requires toilet facilities and better lighting.</p>	<p>Community Infrastructure</p>	<p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

Broadfield Road	This road has become a rat-run route. Cars speed up and down to access the South Circular, particularly during peak times. We have a nursery on our street so this is particularly dangerous as there are babies and toddlers around at the same time every morning, most of whom are on the pavement as their parents walk them. Speed humps required. Or cameras or both.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling. This comment will be passed to colleagues in Highways and Strategic Transport.
Dowanhill Road between Broadfield and Wellmeadow Roads	Fly tipping hotspot. Please install signs or cameras or better lighting or all of the above.	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement The prevention of flytipping is not within the scope of the Local Plan
Honor Oak Park	Dominated by noisy, polluting and dangerous through traffic.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Devonshire Road	Ruined by rat run traffic.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Honor Oak Road	Dangerously narrow pavements. Road and area dominated by noisy, dangerous and polluting vehicles, 24/7.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

Hengrave Road	Dominated by traffic.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Parade of shops in Honor Oak Park	Ruined by polluting cars, lorries and vans.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
High Street & Market	The market is incredibly scruffy with mismatched tarpaulins/covers. If they all matched say in Lewisham Colours turquoise/white stripes it would look so much better. Most Councils in London have already recognised this. The High Street itself looks like something from Eastern Europe will poor shops fronts, scruffy little phone shops and the most appalling paving.	Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities Officers would like to highlight that some of this comment is derogatory and will not be considered.
Stondon Park	Dominated by dangerous, polluting through traffic.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Hilly fields - Adelaide Ave/Eastern Road entrance	The park has been great place to go for a walk and walk the dog (we always clean up after our dog!). However, there is no street light between the Adelaide avenue / Eastern road entrance and the top of the hill. As a result it feels unsafe to walk through the part after sunset and we have been yelled at by a drunk person walking in	Green Infrastructure	Comment will be passed to colleagues in the Neighbourhood Community Safety Service The Local Plan aims to create Healthy and Safe communities by creating safer neighbourhoods and improve perceptions of safety by ensuring the built environment comprises of welcoming spaces. The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.

	the park when we did walk through this route in the evening once.		
Ladywell village	I like small independent shops.	Economy and culture	Noted
Sainsburys Lee Green	I don't think Sainsburys supermarket in Lee should be altered in any way! Its a integral supermarket for local people and should be preserved. Local people cannot function without it planned flats will disrupt shopping which is a vital resource.	Economy and culture	<p>The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities.</p> <p>The Local Plan supports the regeneration of the Lee Green district.</p>

<p>Adamsrill nature reserve</p>	<p>I love birds and wild life. So does my primary school aged daughter. I believe this site is unique and could be used to support the mental health, ecological diversity, and an accessible open green space in this ward.</p> <p>There is an obvious and urgent need for this right now. I love the peace and tranquility of the space and understand as the parks are full to bursting atm we need more green space now more than ever.</p> <p>There are demonstrable mental health benefits to wild nature space.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to promote and protect the ecological, biodiversity and amenity value of the Borough's natural assets – including trees, green spaces and water spaces and seek to enhance existing assets or make new provision through new development wherever opportunities arise.</p>
---------------------------------	--	-----------------------------	---

Summerfield Street sign damage	The Summerfield Street sign looks like a car has hit it - it is buckled from the centre.	Transport and connectivity	The Local Plan does not have the scope to manage the maintenance of road signs. This is the responsibility of TFL.
Open space between Adamsrill & De Frene Rd	<p>Developers are circling this space for building more homes.</p> <p>Not only is this space completely unsuitable for development, but what is being done to support the local infrastructure with all these new homes being built?</p> <p>Are any of these homes affordable? Will there be more schools, doctors, parking etc etc?</p>	High quality design, Housing	<p>The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places</p>
Disused green space between De Frene and Adamsrill	This space is a sanctuary for birds and wildlife in an area of small manicured gardens that see the wide variety of birds because they nest and feed in this space.	Green Infrastructure	The Local Plan aims to promote and protect the ecological, biodiversity and amenity value of the Borough's natural assets – including trees, green spaces and water spaces and seek to enhance existing assets or make new provision through new development wherever opportunities arise.

Tiger junction	This is a very badly designed crossing for pedestrians and those with young children. Because of the zig zag way the crossing points are designed its very hard to be able to make it across in one go with the result that it could take you four changes of lights to get across to the diagonally opposite side. In reality many of us have to cross without the green man which is hardly the example we want to set for children. I realise its a busy junction but surely something more pedestrian friendly could have been created when the redesign was done? It feels incredibly user-hostile and goes against the message we want to send about walking and healthy lifestyles.	Transport and connectivity	This comment will be passed to colleagues in Highways and Strategic Transport Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
School street scheme	The closure of the road outside Adamsrill school makes the road feel so much safer for kids and parents. Plus it allows for better social distancing	Transport and connectivity	Comment refers mostly to restrictions that were in place during the Covid-19 lockdown
Deptford Creek	Need to use the creek for formal residential moorings throughout.	Housing	Moorings within the Thames is not within the scope of the Local Plan.
Telegraph Hill	It's a great area, well cared for, good facilities for the elderly, nice parks and most of it is a conservation area so all the roads are pleasant to walk around	Heritage, Community Infrastructure	Noted

Miserable parade of shops, no crossings, tarmac central reservation	This stretch of Southend Lane is horrible	Transport and connectivity, Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Bell Green Retail Park	I come here on foot - it is so awful. Please keep the idea of redeveloping this site into a mixed use development with lots of shops and cafes. As long as the buildings are not too tall then it could be like the sainsbury's at Catford station. P	Housing, High quality design, Economy and culture	The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.
poor connection / crossing at the end of River View Walk	dangerous, unpleasant	Transport and connectivity	Comment will be passed to colleagues in Highways and Strategic Transport.
poorly connected train station	horrible horrible station, unpleasant to approach from all directions. Poor connections to bus routes	Transport and connectivity	The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity and improve transport infrastructure. It is not however within the scope of the Local Plan to influence bus or rail timetables.

Local pool and leisure facilities	If the council is closing the Bridge because the building is inherently problematic, then please commit to rebuild the centre as a new flagship design and asset for our area	Community Infrastructure	The Local Plan aims to promote Healthy and Safe communities by addressing the wider detriments of physical and mental health. The Local Plan will also aim to ensure the delivery of high quality health (including leisure) facilities that meet the need of the local community..
Lack of footbridge over railway	It seems there is a footbridge missing between honor oak and forest hill. There are some lovely walks around this area that would greatly improve this.	Transport and connectivity	The Local Plan will be used to aid the Council with working in partnership with bodies such as Central Govt, GLA, TFL, Network Rail and other stakeholders to increase transport capacity and improve transport infrastructure. It is not however within the scope of the Local Plan to influence bus or rail timetables
Brockley and Ladywell Cemeteries	The Cemeteries are great places for reflection and contemplation, and for studying plants and wildlife.	Green Infrastructure, Community Infrastructure	Noted
se26 4dd	Air pollution from the is a large busy road with homes very close to this road, creating a poor environment to live - air pollution from cars is dangerous to health in many ways.	Transport and connectivity	The Local Plan aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes

<p>Bell Green retail park - the area between Perry Hill and the river</p>	<p>Ugly, polluted air, unpleasant to walk through</p>	<p>Transport and connectivity</p>	<p>The Local Plan aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes</p> <p>The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.</p>
<p>Former scout hut and land near corner of Courtrai Rd in Crofton Park</p>	<p>This neglected land could be converted into a nature reserve, perhaps with visitor centre attached giving information on the local flora and fauna, a valuable extra green space and potential educational resource, in Lewisham council's mission to do its bit to raise awareness of the issue of climate change and actively contribute towards encouraging wildlife, wildflowers, bees etc.</p>	<p>Community Infrastructure</p>	<p>The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.</p> <p>The Local Plan aims to promote and protect the ecological, biodiversity and amenity value of the Borough's natural assets – including trees, green spaces and water spaces and seek to enhance existing assets or make new provision through new development wherever opportunities arise</p>
<p>Bradgate Rd, Aldi Site</p>	<p>Happen to hear that there is consultation out to build 119 residential units on this site. How tall will this proposed building be. I live on Bradgate Rd and am very concerned about the shadow that this proposed building will cast on my home.</p>	<p>Housing, High quality design</p>	<p>Officers will not comment on specific planning applications. Opportunities will be given to comment on specific developments once a planning application has been submitted</p>

<p>Sainsbury's and the retail park</p>	<p>It's extremely useful to have a large Sainsbury's and the retail park - bigger supermarkets are generally cheaper than their Local/Metro/Express counterparts as well as having a better range of products. The shops in the retail park are really useful - as a non-car owner, being able to walk/get the bus to B&Q is incredibly helpful! I'm very concerned at the proposal to put housing on this site, with no consideration for where the residents will shop, or any other relevant infrastructure (GPs, schools, dentists) as well as depriving local residents of useful and well-used shops. Particularly when there is a drive to reduce car use, removing a retail park which is accessible by foot, bike and bus seems incredibly short-sighted.</p>	<p>Economy and culture, Community Infrastructure</p>	<p>The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities</p>
<p>Bridge on the Waterlink Way</p>	<p>Even after repair, it's not good to cycle over and isn't even ideal for walking! It needs to be properly repaired.</p>	<p>Transport and connectivity</p>	<p>Comment to be passed to colleagues in Highways and Strategic Transport.</p> <p>The Local Plan also aims to provide physical infrastructure needed to support growth and sustainable places, including through the use of CIL funding and developer contributions</p>

Maintaining wildlife - Hilly Fields	loving the reinstatement and management of the park - great to see the mass of recent brambles to be kept at bay.	Green Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Hilly Fields	It is a rare spot to experience nature and wildlife.	Green Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Hilly fields drainage!	When heavy rainfall the water runs off park taking sediment with it, the ground is heavily mown and trampled so poor retention.	Sustainable design	Comment will be passed to colleagues in Parks, Sport and Leisure. The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Hilly field Crescent crossover needed.	Traffic is still coming round corner with poor visibility- need to put crossover for pedestrians where it is needed.. not 8m out of way of corner.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Hilly Fields	It is a lovely park but replacing some of trees lost over years along boundary would be good.	Green Infrastructure	This comment will be passed to colleagues in Parks, Sport and Leisure The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Brookmill Park	Close to wildlife and the pond is beautiful and river .	Green Infrastructure	Noted

			The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Mountsfield park	Love the park, great work from volunteers.	Green Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Gordonbrock	Public sports area- ie tarmac court should be made accessible at weekends and evenings.	Community Infrastructure	It is not within the scope of the Local Plan to determine the opening hours of leisure facilities This comment will be passed to colleagues in Parks, Sport and Leisure
Waterline way	Difficult crossing between two areas of waterline way. Need a stronger cycle and pedestrian link	Transport and connectivity	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces
Mews	Gate makes it inhospitable, spoilt green route with tarmac.	Green Infrastructure	Comment will be passed to colleagues in Parks, Sport and Leisure.
Memorial Gardens	Because you still bother to do crazy bedding. It is good to have diversity in parks, some wild, some formal and some floral.	Green Infrastructure	Comment will be passed to colleagues in Parks, Sport and Leisure. It is not within the scope of the Local Plan to determine flower types within parks.
Catford	Because it is up beat and vibrant with interesting shops.	Economy and culture	Noted The Local Plan commits to the further investment of Catford through the Catford Framework.

Deptford High street	Vibrant interesting and like ships and market	Economy and culture	Noted
Bridge leisure centre	Great as it is somewhere you can play badminton	Community Infrastructure	<p>The Local Plan aims to promote Healthy and Safe communities by addressing the wider detriments of physical and mental health. The Local Plan will also aim to ensure the delivery of high quality health (including leisure) facilities that meet the need of the local community</p> <p>Any proposal for the redevelopment of community infrastructure will be assessed against existing London Plan and Local Plan policies and draft Policy CI1 Safeguarding and securing community infrastructure.</p>
Ravensbourne Park	Lovely quiet park	Green Infrastructure	<p>Noted</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy</p>
Ladywell fields	Part of a lovely walk.	Green Infrastructure	<p>Noted</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy</p>
Roads generally need suds stepped out planting beds to slow traffic and improve drainage.	Traffic is too fast and need more trees.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

Brockley and ladywell cemetery	Because you can't walk through the cemetery.	Green Infrastructure	Comment will be passed to colleagues in Bereavement Services
Pearson's Avenue	At the end of school when Addeys is being dismissed cars sometimes drive too fast around this corner	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Ladywell Fields Park	The park doesn't feel very safe when it's dark due to dimly lit paths, a lack of patrols and motorbikes racing through the park in the evenings. The park is used by walkers, people coming out of the station and those using the tennis courts and it feels very unsafe walking around the park when it's dark. Toilet facilities are very limited and restricted to cafe opening times, so after 4pm there are no toilet facilities (tennis courts are open until 9pm).	Green Infrastructure, Community Infrastructure	Comment will be passed to colleagues in the Neighbourhood Community Safety Service and Parks, Sport and Leisure The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions
Mountsfield park	Lovely open space and like the new cafe very much.	Green Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
ladywell fields	it's a wonderful open park	Green Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy

Ladywell fields	This us a fantastic space and the community tennis initiative is v welcome but the facilities and safety leave a lot to be desired.	Community Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Hilly Fields	Wonderful park with spectacular views and great variety of space.	Green Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Near the village, maybe the heath itself	It's a great place.	Green Infrastructure	Noted
Ladywell fields	Park can feel unsafe in the dark	Community Infrastructure	Comment will be passed to colleagues in the Neighbourhood Community Safety Service.
Road Gateway	It is a dreadful layout, for everyone, pedestrians , cycles and cars. Hard to know which lane to be in no cycle route or easy way through station.. cars caught between lights on junction.	Transport and connectivity	Comment will be passed to colleagues in Highways and Strategic Transport.
Gardens along high street.	They are lovely green with great trees.	Green Infrastructure	Noted
Lewisham Park	Like the variety of parks, this one has some lovely trees and plants.	Green Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy

Ladywell park	The park is very good but it could be excellent. Really appreciate the opportunity to have a say.	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy</p>
Ladywell fields	This is a very good park but it could be excellent	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy</p>
Make a quiet route for cyclists.	Cars trace down and cut through, it has potential for 'country lane feel and will help keep cemetery quieter.. can link across towards Ladywell fields.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Grove Park (but also borough wide)	There is a complete lack of cycle lanes in Grove Park. The area has been under constructions over and over again, and never a safe cycle lane put in. The whole area needs to make cycling safely accessible.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

<p>Corner of Senlac Road and Exford Road (traveling in direction of Winn Road)</p>	<p>50% of cars driver over this corner of the pavement through laziness. This should have pinch points at this junction or at least metal bollards on the corners. Many children cross at this junction as it is en route to Coopers Lane Primary School.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
<p>Winn Road</p>	<p>Cars travel at a minimum of 50% over the speed limit. There are regular accidents and bollards destroyed. This is a route for children to walk to school or visit the park.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
<p>downham Community Centre Wesley Halls</p>	<p>I look forward to meeting people, learn new things and keep active</p>	<p>Community Infrastructure</p>	<p>Noted The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>

<p>Sydenham Hill/ Sydenham Rise</p>	<p>There is a proposal to divert cycle lanes through the Sydenham Woods. This is outrageous. The Woods will be degraded by hard core paths, wildlife and plants disturbed. Obviously a plan to appease the cycling lobby ..who dont stop for traffic lights or people crossing roads when going downhill and now want to treat the Woods conservation area like a Park.</p>	<p>Transport and connectivity</p>	<p>Sydenham Hill Wood is situated in the Borough of Southwark. Any plans regarding Sydenham Hill Woods cannot be considered by the Lewisham Local Plan</p>
<p>Platform 4 closure</p>	<p>Whoever has approved the 'Platform 4' closure, should be held criminally responsible. I know this has happened a long while back, but it is even more important now - to resolve this. Thousands of new commuters moved to the area. The overcrowding is a constant health & safety risk. I've been shoved around, pushed, tripped, fell, you name it.. Additionally, in Covid times - presents additional risks.</p>	<p>Transport and connectivity</p>	<p>It is not the scope of the Local Plan to determine which station platforms stay open or closed.</p>
<p>Springbank Road</p>	<p>The recycling facilities in Hither Green are none existent. I need a car to drive to the recycling centre in New Cross to recycle  textiles and fluorescent light bulbs. No investment in Hither Green at all</p>	<p>Community Infrastructure</p>	<p>The Local Plan aims to manage waste responsibly by prioritising the implementation of the most sustainable options in the waste hierarchy and safeguarding appropriate sites for the Borough to meet its strategic waste requirements.</p>

Retail park	This retail park is littered with rubbish, which is such a shame in the middle of the Waterlink Way which is a really peaceful green space so close to the middle of Catford. I'm concerned this will pollute the rivers and be harmful to wildlife.	Sustainable design, Green Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement
Beckenham Place Park	We are so lucky to have this huge green space for all to enjoy.	Green Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Bell Green retail park	The pedestrian access to the retail park from all sides is terrible - the main routes are through the car park, where I've had several near misses as a pedestrian. Everything is designed for cars, without even basic pavements or pedestrian routes. This is not only a problem for shoppers, but it is a main route the the Waterlink Way - it's almost not worth accessing green space if you have to walk through a dangerous, dirty and polluted area first.		Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.

<p>Lower half of Perry Rise</p>	<p>This is a highly congested route where cars speed down the hill. People rarely stick to the 20 limit! It's extremely difficult and dangerous for parents and children at Brent Knoll school to cross. Serious congestion also makes parking difficult. Our car was written off outside our home by a driver trying to park quickly on the busy road. We've also witnessed cars crashing into parked cars at speed on the hill. Luckily neither of these incidents involved people - I worry with increased development at Bell Green this would no longer be the case.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling.</p> <p>This comment will be passed to colleagues in Highways and Strategic Transport</p>
<p>Sydenham Hill SE26</p>	<p>It's a very beautiful ridge, full of Nature and wonderful views over London. The Sydenham Hill Woods, Hillcrest Woods and down to Sydenham Wells Park with it wonderful birdlife, bats and Nature. The views up to the Ridge are wonderful and green full of lush trees that should not be spoilt. When looking from Central London the Green Ridge is very special.</p>	<p>Green Infrastructure</p>	<p>Noted</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy</p>
<p>Cold Blow Lane</p>	<p>Scared and unsafe</p>		<p>Comment will be passed to colleagues in the Neighbourhood Community Safety Service.</p>

<p>Location not given</p>	<p>The proposed increase to dense and high rise housing in New Cross is insane. The area has been struggling for decades to get out of being an underprivileged, under resourced and high crime area. How can it possible be sane to add more high density high rise housing that destroys the Victorian nature of the area and drags it even further down? Where the infrastructure that is already lacking? How to cope with the overstretched public transport already here? What to do about the massively polluted roads and A2, already some of the worst in London? The very LAST thing New Cross needs is more population, especially in dense and high rise properties. I totally oppose increasing the proposed housing density increase. An SE14 resident of 50 years standing.</p>	<p>Housing, High quality design, Sustainable design, Transport and connectivity</p>	<p>The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough.</p> <p>The Local Plan also aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
<p>Dangerous junction for pedestrians and cyclists</p>	<p>Cars speed up and down pepys rd. cars frequently go wrong way up Sherwin road. Cyclists go wrong way down Sherwin and musgrove rds to avoid A2</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>

Potential redevelopment sainsburys site	Overly dense housing with no consideration of impact on Hatcham conservation area. Does not take account of cumulative impact of other dense developments that are planned (Kender triangle) but not yet built. Will only make traffic worse in an already congested area. Risks viability of bakerloo line extension	Heritage, Housing, Transport and connectivity, High quality design	<p>The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough.</p> <p>The Local Plan also aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
Waste site	The whole area is a dusty polluted mess amongst residential housing. How was this ever allowed to happen	Sustainable design, Housing	The Local Plan aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes
Drakefell road traffic	Terrible traffic congestion. Parking on pavements make them impassible	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.
Dangerous junction	Dangerous and difficult for cyclists to turn right from good wood rd onto new cross road	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>

<p>Bromley Road Retail Park</p>	<p>Any plans for a residential provision here, (along with other mixed uses), could be acceptable and potentially improve the location, but due consideration would have to be given to the current level of light pollution from existing businesses in the vicinity, (such as Access Self Storage and Selco), which would adversely affect any amenity all night long.</p> <p>Also, road access at junction Bromley High Street/Crantock Road is already a concern, and might be compounded further.</p> <p>Great opportunity, thereafter, for a 'village like' development with a consideration for additional 'greening'.</p>	<p>Transport and connectivity, Housing, High quality design, Sustainable design</p>	<p>The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough.</p>
<p>Area of wild green space (former allotments) behind Niederwald Rd, Adamsrill Rd, Fairwyn Rd & De Frene Rd</p>	<p>Lovely oasis of wild green space that contains protected species. Lots of birds and other wildlife.</p>	<p>Green Infrastructure</p>	<p>Noted</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
<p>Lee Green District Centre</p>	<p>it feels like its only designed for vehicle drivers. Pedestrians feel squeezed onto the narrow pavements near the busy polluted roads and like an after thought</p> <p>The centre doesnt feel planned in a holistic way</p>	<p>Transport and connectivity, High quality design</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling.</p> <p>The Local Plan supports the redevelopment of the Lee Green District centre.</p>

Leegate centre	Run down space	High quality design, Sustainable design	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Buckthorn Nature Reserve		Green Infrastructure	N/A The Local Plan aims to designate Buckthorne Cutting as Metropolitan Open Land therefore providing the highest level of protection a development plan can designate on a Green Space.
Lee Green	While there is a need for new housing - and especially social housing - which should be at least 50% of any new development - the number of units proposed seems excessive to the area. What are the infra-structure proposals for community development e.g. education, health, community activities,etc. The changes to traffic movements with the LTN has increased the volume on the main roads and a huge residential increase will bring more traffic and delays into the area.	High quality design, Sustainable design, Housing, Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough

<p>Drakefell and Gellatly Roads</p>	<p>Drakefell and Gellatly Roads have been overlooked by the Local Plan and yet the problems highlighted for years still remain. Local developments are likely to lead to more traffic on this very busy B road and yet there has been no consideration to making Drakefell and Gellatly Roads "healthy" streets too, to mitigate these effects.</p> <p>Pavement parking makes it very difficult for prams and wheelchair users, especially on bin day.</p> <p>HGVs regularly use the road as a rat run and are forced to double back at the width restriction.</p> <p>Avignon Bridge is not supposed to carry the weight load it currently carries and there is a real danger of structural collapse.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>The Local Plan conforms to the London Plan car parking standards.</p>
<p>leegate</p>	<p>I understand that 630 new homes are planned for leegate and that Sainsbury and the BMG garage may have the same number of homes. I understand the need for new housing but there is no mention in the Local Plan of what schools, GP surgeries and improvements in public transport will be put in place to support this housing. I live 1 street away from Brindishe Lee, close to Leegate, and my children were offered a place in a school in Grove Park</p>	<p>Housing, High quality design, Sustainable design</p>	<p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p> <p>Opportunities will be given to comment on specific developments once a planning application has been submitted</p>

	<p>The Local Plan does not give maximum heights for buildings I am concerned that this will lead to much taller buildings in the area</p>	High quality design	The Local Plan conforms to London Plan policy regarding building heights in the borough.
manor park	<p>river could be more visible with accessible banks in main part of the park river could either have a secondary flow or a second pond to take in excess river flow existing pond could be linked to river</p>	Green Infrastructure	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.
public refuse and recycling bins	<p>the recycling information is contradictory. The coloured banner shows pictures of items that can be recycled. However a portion of the household items image is repeated in the smaller black and white banner which shows items that should not be recycled.</p>		The Local Plan does not have the scope to determine how information on recycling in the borough is communicated.
Edith Nesbit Gardens	<p>This little area has some mature trees and landscaped areas with paths for walking and a play area for young children. The benches encourage people to sit and talk and it's a restful place. It is well used by dog owners .</p>	Green Infrastructure, Community Infrastructure	<p>Noted</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

<p>pavement outside of police station/river conduit</p>	<p>- the River Quaggy is completely hidden under the temporary, very wide pavement in front of the Lewisham Police Station - the River Quaggy is housed in a very narrow, ugly concrete conduit in front of St Steven's Church</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p>
<p>The BMW Garage Site Allocation</p>	<p>Because public access to the River Quaggy is proposed to be opened up with any development on this site This would be a fantastic form of public realm in Lee Green</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p>

	<p>We wish to register our strong objection to the plans by Galliard to build 630 new homes in Leegate. The infrastructure does not exist to support the thousands of extra people that will be living in these homes. The services currently available in the area will be overwhelmed. Has any major funding been allocated to this project? It sounds as though Galliard just want to pack as many people into an area regardless of the cost to those people or the people already residing in that area. The traffic on Burnt Ash Road, especially since the Low Traffic Neighbourhood scheme was implemented, has been horrendous, slightly eased since the tweaking, but still of a very high volume. The Leegate proposal will just add more people trying to access an already polluted, high volume traffic area. The plans do not fit in with the aesthetic of the area. There will be a huge monolith rising up at one end of Burnt Ash Road out of keeping with nearby buildings. This consultation is rushed and it is quite disgraceful that people in the local area have not been kept informed and given enough time to consider these proposals.</p>	<p>Housing, High quality design, Sustainable design, Transport and connectivity</p>	<p>Opportunity to object to specific planning applications will be given to residents and the wider community during the application process.</p> <p>However; The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions.</p> <p>The consultation on the Regulation 18 Local Plan was undertaken by meeting all required statutory considerations. There were however statutory regulations in place due to the Covid-19 pandemic that restricted the activities and promotion on the consultation.</p>
--	---	---	--

Fordham Park bins	There aren't enough bins in the park and many don't have lids so litter builds up or blows away. This is terrible for the environment, looks untidy and encourages others to also leave their rubbish lying around.	Community Infrastructure	This comment will be passed to colleagues in Parks, Sport and Leisure. Bin maintenance is not within the scope of the Local Plan.
Lee Green			No comment submitted

<p>Ennersdale Road</p>	<p>Ennersdale Road has been severely neglected and this narrow residential street (built in the 1890s) has been sacrificed to traffic as a dangerous rat-run. Lewisham's own figures counted 60,000 vehicles a week pre-lockdown. The designated parking spaces on both sides of the street include 50% of the pavement – cars park with two wheels on the pavement. This makes social distancing impossible for even two people passing in the street unless one person walks on the road. The footpath is usually completely impassable on bin days (Thurs morning), when the only way to walk down the street is to physically push aside bins or to walk on the road. As curbs are covered by parked cars, there is no room for planting trees and the tight space left on the footpath is regularly neglected by street cleaners (the build-up of litter is horrendous).</p> <p>Ennersdale is around the corner from two local primary schools (on Beacon Road and Leahurst Road). There is no pedestrian crossing, so parents and children are forced to dash across the road between cars and vans (something I've continually observed from my front window). Ennersdale Road is also home to a large St Mungo's Spring Gardens Hostel, which specializes in</p>	<p>Transport and connectivity, Sustainable design</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Planning</p>
------------------------	--	---	--

	<p>housing homeless people with 'mental health issues and/or alcohol and drug dependencies'. Again, these are residents who are extremely vulnerable, almost exclusively pedestrian, and often disabled. Unlike local drivers, they are unlikely to have much leverage in terms of lobbying for local issues with councillors or on social media. Even in non-pandemic conditions, the road is not welcoming to pedestrians or accessible to those with physical disabilities. This is particularly urgent as the road is one of the few accessible pedestrian routes between East and West (or Lewisham Central and Lee Green).</p>		
--	--	--	--

Drakefell Road	Speeding cars, heavy traffic, no safe crossing to access the park and last but not least very dirty, it has been months since somebody cleaned the street.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
New Housing Proposal	Although I totally appreciate the need for new housing, this proposal is ugly does not take into account several serious issues.	Housing, High quality design	The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough
BMW/ Quaggy River	The river area is not open for active commuting.	Transport and connectivity, Green Infrastructure	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.
Pedestrian Crossing	It is very dangerous crossing. Cars constantly cross the junction when it is busy. The box junction is not adhered to	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

	<p>Re: Closing roads around local schools at school opening and closing times.</p> <p>While it is good that children should be protected around school opening and closing times, it is also the case that since the LTN was implemented the traffic on main roads has been horrendous only slightly eased by the tweaking of the LTN. For the school scheme if implemented, during the hours of 8.30am to 9.30am and 2.45pm to 4pm the cameras at Manor Lane, Ennersdale Road and Dermody Road will NOT allow traffic in ANY direction. This will reverse the tweaking of the LTN which was much needed after people on main roads were practically poisoned with traffic fumes. So, once again, traffic on Burnt Ash Road, Hither Green Lane and surrounding main roads will be crawling or at a standstill making pollution much greater than it ever was before the LTN was implemented. Fine for those living in the side roads, but dangerously unhealthy for residents living on main roads. The attitude of some living in the side road can be summed up by one of these residents commenting how quiet and 'nice' it is now in the side roads, but she was annoyed that when joining the main road on Burnt Ash Road to drive her son to Thomas Tallis, the journey took her much longer. The irony and hypocrisy</p>	Transport and connectivity	<p>This comment will be passed to colleagues in Highways.</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
--	---	----------------------------	---

	<p>escaped her. Surely, you should be fining parents who insist on taking their children to school by car? This scheme will mean that they will still bring their children, but will be leaving their cars parked just outside the exclusion zone, creating more mayhem. The LTN is elitist and does not benefit all Lewisham residents.</p>		
--	--	--	--

Legate Centre Development	Far too dense No indication of any local infrastructure support for yet more residents Will end up looking like Lewisham Town centre development, pretty grim and dystopian.	Housing, High quality design, Sustainable design	The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough. The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions
Pavement slabs replaced with ugly tarmac	Slab pavements are part of character of the area. It seems when we get to end of tax year there is a sudden rush to slap tarmac down replacing the slabs also covering the tree roots	Sustainable design	This comment will be passed to Highways and Strategic Transport. This concern is not within the scope of the Local Plan.
Perry Vale Care Park	An under-utilised facility.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Unused Commercial Space	There is an unused commercial space here on the corner of Childers Street and Rolt street - I appreciate the companies here are trying to let these spaces. However this and many others in the area have been left empty for the past 3 years and are being vandalised.	Economy and culture	Comment will be passed to colleagues in the Neighbourhood Community Safety Service.
Woodpecker Road Bins - No Tops	In the local parks all of the bins have tops on them to stop litter blowing out of them. All of the bins in the woodpecker road estate do not have this. The area around Hawke tower is a real wind tunnel, this	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement and Parks, Sport and Leisure. This issue is not within the scope of the Local Plan

	causes the litter to be blown all over the place.		
Maintain the grassy areas in the estate	There are lots of grassy areas on the estate which have been neglected.	Green Infrastructure	This comment will be passed to colleagues in Parks, Sport and Leisure.
Community Notice Board	I love the idea behind the communal notice board and the way this was used to ask for ideas for the area.	Community Infrastructure	Noted This issue is not within the scope of the Local Plan.
Manor Park	This is SUCH a wonderful park. It's a beautiful spot in the local area. Please keep working hard at maintaining it. Sometimes the fountain is switched off which is a great shame because it's a very good way to help ease the stresses of the day. The team behind the cafe pistachios in the park are brilliant too.	Green Infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.
Leegate	It feels as though this develop has been talked about for over a decade? Is that correct? Please can it be speeded up. Strikes me there is a potential here, as per the plans, to have a mixture of social housing and affordable private housing that is so very needed. The buildings are also an eyesore and local businesses would benefit from the whole area looking better and	Housing, Community Infrastructure	The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough. Opportunities will be given to comment on specific developments once a planning application has been submitted

	prosperous. A place that people can feel proud of and an important community hub		
The area outside the tennis courts	Please put in some bike racks. So many people cycle to these courts and there is nowhere to secure them and we're not allowed to take them on court.	Transport and connectivity	<p>Comment will be passed to colleagues in Highways and Strategic Transport.</p> <p>The Council has a policy of increasing the availability of on street cycle storage in the Borough however the delivery of cycle storage is subject to available funding.</p>
Current Galliard Homes proposals for Leegate	<p>Up to 15 storeys is too tall</p> <p>Up to 630 new homes is too much density on this site</p>	Housing, High quality design	Opportunities will be given to comment on specific developments once a planning application has been submitted.
Heavy levels of through traffic	Even in COVID lockdown with generally reduced levels of traffic, Geoffrey Road is still significantly congested on a daily basis by through traffic, with frequent gridlock, noisy arguments as motorists jostle past each other on a road that is too small and resulting air pollution.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

<p>Leegate development - Galliard proposal</p>	<p>Firstly I have had no direct communication on the Galliard development! For the previous reiteration I was sent information. Noted proposal on the Local Plans fails to truly address the needs of Lee Green. Firstly if the designation of “District” is to have merit, Lewisham has fallen far short of any thought or investment in this area for decades. I grew up in the area and sadly saw the decline of the shopping hub. The proposals in the Plan does not account for the locality of people’s wellbeing, health and needs. It is ill-considered and is treats Lee Green as a poor cousin to other districts. There is a particular issue for Lee Green due to it’s condensed nature, location on key traffic routes. These have not been considered appropriately in sensitivity analysis, nor mitigation’s to improve. The needs and impact to the existing community as well as the new community has not been factored in currently to make the Local Plans sustainable. Dwarfing the corner with inappropriate massing, ie very tall structures, will further deteriorate this area of Lee Green.</p>	<p>Economy and culture, High quality design, Sustainable design</p>	<p>Opportunities will be given to comment on specific developments once a planning application has been submitted.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
--	---	---	---

Honor Oak Park	Traffic is prioritised and people on foot and cycle have to work around this. It should be the other way round!		Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling.
Bridge parapet on southern bridge over railway	The parapets on either side of this bridge are an early work by renowned concrete artist William Mitchell and commissioned by the GLC when he used to have a workshop in Forest Hill. Not cared for even though the council has a duty of care over public art in the borough (and have been notified about this) and it should be celebrated. The brief was to erect an interesting structure which deterred graffiti - it has achieved this!		Comment will be passed to colleagues in Planning and Highways and Strategic Transport.
Back Garden space	Garden space forms important wildlife corridors which are just as important as railway embankments. They are also crucial amenity space	Green Infrastructure	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.

Honor Oak Rec	Engage with Southwark council on what is primarily recreation space for Lewisham residents (the Rec and One Tree Hill itself, i.e. not just the nature reserve).	Green Infrastructure	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
Enforce action against unpermitted development	It is all very well having policy but of little use unless it is enforced especially when there are flagrant breaches	High quality design, Sustainable design	If there is suspicion of an unauthorised development please contact the Planning Enforcement team.
School street improvements	Make safer for pedestrians with school children	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Cycle Crossing	<p>There are cycle route either side of the A2 (New Cross Road) but there is no save way to cross it at that point.</p> <p>There is a pedestrian crossing further a long but it has an island in-between which is too small for pedestrians and cycles.</p>	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

<p>Lee Centre</p>	<p>I feel really optimistic about the redevelopment of this run down shopping centre. However I hope that the things that are good about it are retained. Space for community centred business, I love yoga house, Cade, the swop shop. There's very little in hithergreen and lee in terms of community gathering spaces apart from MHG so public space, playgrounds and community/ business spaces are really important. The important thing is to keep these spaces affordable in perpetuity. I don't mind about the height but additional school and GP provision is important.</p>	<p>High quality design, Sustainable design, Housing, Economy and culture, Community Infrastructure</p>	<p>Opportunities will be given to comment on specific developments once a planning application has been submitted</p> <p>The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities</p>
<p>Former allotments off Adamsrill Road</p>	<p>It was never planned, but the site has become - over the years - an valuable natural habitat, part of the 'green infrastructure' of the area: Mayow Park (a Site of Importance for Nature Conservation), Dacre's Wood, Sydenham Garden, the river walk, etc, etc. It supports a wide range of species, as noted in the other comments by local residents. As the density of this area increases (a number of large construction sites are currently active) these pockets of biodiversity become more and more important. Quite apart from the enjoyment they bring, they also have</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p>

	functional benefits, removing heat and air pollution.		
More planting to support climate emergency	It is great we have trees here but would be even better to underplant trees with shrubs to counter pollution and give houses on lanchester way more screening from queens road	Green Infrastructure	Comment will be passed to colleagues in Parks, Sport and Leisure. This issue is not within the scope of the Local Plan
Neglected space.	Tarmac is old bumpy and ugly. Also does not absorb rain water. Trees have tarmac all the way up to roots of trees	Green Infrastructure, Sustainable design	Comment will be passed to colleagues in Highways and Parks, Sport and Leisure. This issue is not within the scope of the Local Plan
Road floods in heavy rain. Ugly wide pavement on both sides of new cross road	Lots of hard surface which is angled so that water goes into the road and floods. In winter frequently v large puddles with road surface that gets damaged by buses creating a hazard for cyclists	Sustainable design	The Local Plan aims to guard against the risk of flooding by ensuring, however the Council is not responsible for flooding on public roads. Issues such as this should be raised with Thames Water.

Wide ugly pavement lots of hard surface	Very concrete pavement area	Sustainable design	Comment will be passed to colleagues in Highways Maintenance
Wide ugly pavement which contributes to flooding in heavy rain	Missed opportunity with climate emergency	Sustainable design	The Local Plan aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes.
Bell Green	This whole area (Sainsbury's, the retail park, the gas holder site, Orchard and Pear Tree Courts, and the industrial site bounding Stanton Way) makes me sad and frustrated every time I come here. It has been a long series of terrible missed opportunities. Planning permission should never have been granted - it fails so predictably and on so many levels. There is no sense of place or identity, no character, no coherent frontage or animation to the surrounding streets, no purposeful sense of front and back, poor connection to existing pedestrian routes, badly considered pedestrian crossing strategy, minimal soft landscape, substandard maintenance, basic design and shoddy construction. A site of this size was a gift and it has been squandered.	High quality design, Sustainable design, Transport and connectivity, Green Infrastructure	The Local Plan includes proposals for the redevelopment of the Retail Park, which will include the reconfiguration of street layout and public realm.
Contra flow for cyclists	This is a quiet road which is great for cyclists but only one way	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

Rat run road	Having troutbeck 2 way creates rat runs across telegraph hill with cars able to turn right onto new cross road	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Wide ugly pavement		Transport and connectivity	No comment submitted
Damaged pavements	Caused by cars mounting pavement for gellatly stores as road is narrow. Pavements also get narrow / impassable when cars are on pavement	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards. Comment will be passed to colleagues in Highways and Strategic Transport.
Trees planted around flats	Great to see more trees planted rather than only neglected lawn	Green Infrastructure	Comment will be passed to colleagues in Parks, Sport and Leisure. Contact should also be made to the management company who maintain the building and grounds
Trees planted	Great to see trees planted	Green Infrastructure	Noted The Local Plan advocates the principle of a Greener Borough
Dangerous crossing	Very difficult to cross road on foot or bike given heavy traffic and unsympathetic drivers	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

Cycle path not clear / dangerous as Halfords/ wickes wntrance	Poorly laid out and not clear to motorists that this is a cycle path	Transport and connectivity	This comment will be passed to Highways and Strategic Transport
Lack of planting	It is a wonderful space but feels neglected due to lack of imaginative planting.	Green Infrastructure	Comment will be passed to Parks, Sport and Leisure The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.
Neglected space	Surface is bumpy and neglected making it uncomfortable to cycle on. Patches of grass look unkept/ uncared for	Transport and connectivity	Comment will be passed to Parks, Sport and Leisure and also Highways

<p>Gaillard redevelopment of Lee Green</p>	<p>I've been informed Gaillard wish to build a heavy density set of high rise apartment buildings in the redevelopment of Lee green. I'm very pro the redevelopment and think it could be a real asset to the community but there are serious issues with what is being pushed through with little consultation.</p>	<p>High quality design, Housing</p>	<p>Opportunities will be given to comment on specific developments once a planning application has been submitted</p> <p>The Local Plan supports the redevelopment of the Lee Green District Centre.</p>
<p>Flower beds</p>	<p>Great that we have them- more please and encourage local businesses to maintain them</p>	<p>Green Infrastructure</p>	<p>Noted</p>
<p>Proposal for 900+ units is too high density</p>	<p>This together with the Kender triangle and goodwood site is too much cumulative development in new cross. Mega high rise is inconsistent with neighbouring conversation areas. Current amenities- schools, nurseries, parks, drs surgeries and transport already over Subscribed over capacity. Inconsistent with plan objectives of more family housing</p>	<p>High quality design, Sustainable design, Housing, Heritage</p>	<p>The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>

Magnificent pine tree	There is a wonderful pine tree next to the railway line on the goodwood site	Green Infrastructure	Noted
Magnificent black mulberry tree	Please protect and plant more!	Green Infrastructure	Noted
Planting along river ravenbourne	Haven for wildlife. Helps alleviate flooding in lewisham	Green Infrastructure	Noted
Wonderful planting	Planting in alley way is wonderful. It is a joy to walk down here	Green Infrastructure	Noted
Neglected space.	Fly tipped and lots of litter	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement The prevention of flytipping is not within the scope of the Local Plan
Opportunity for more bio diversity	Lack of planting / grass area	Green Infrastructure	Comment to be passed to colleagues in Parks, Sport and Leisure
Wide ugly pavemenr	Lots of tarmac	Sustainable design	Comment to be passed to Highways

<p>Stanstead Road parade</p>	<p>The parade has been left to decay - no local amenities for locals to use, no greenery and care-worn public realm. Also an urgent need to tackle the toxic congestion going into Catford.</p>	<p>Sustainable design, Economy and culture, Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
<p>Don't run the Green Link this way</p>	<p>Running the Link from Crofton Park Station to Ladywell through the cemetery is not the best route, as it would be less attractive to women during darker hours.</p>	<p>Green Infrastructure, Transport and connectivity</p>	<p>Noted</p>
<p>Don't run the Green Link this way</p>	<p>Running the Link up steep roads, while a direct line, will make this less attractive for people of all abilities.</p>	<p>Sustainable design, Transport and connectivity</p>	<p>Noted</p>
<p>Ravensbourne Road/Sunnyside</p>	<p>Serious safety concerns about crashes and near-misses due to rat-running around blind corners. Insufficient traffic-calming measures, no space to pass and no safe crossing points for the legions of people making their way from the South Circular to Blythe Hill Fields</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>

<p>Galiards Home proposal</p>	<p>Proposed height of buildings too high Proposed amount of flats too many No consideration for the aesthetic feel of the local area i.e older buildings. More traffic, greater strain on local infrastructure and facilities. A money making idea without any consideration for those who already live in the area.</p>	<p>High quality design, Housing, High quality design, Heritage, Transport and connectivity</p>	<p>Opportunities will be given to comment on specific developments once a planning application has been submitted</p>
<p>St Dunstan's Triangle</p>	<p>The layout of this section of the South Circular causes one of the worst bottlenecks on the A205. Idling cars stuck in traffic causing an air-quality hot spot.</p>	<p>Transport and connectivity</p>	<p>The Local Plan aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes.</p>

<p>Eastern Avenue, Hilly Fields</p>	<p>The stretch of undergrowth on the western side of the top of Eastern Avenue was one of the only remaining pieces of wild habitat left on Hilly Fields. The brambles, nettles, cow parsley, alkanet and other native plants that grew there were like a fingerprint of what would have been there for hundreds of years when this area was farmland bordered by hedges. In fact this stretch may be what's left of a former hedge judging by the trees that line the road here such as hawthorn. These plants provided food and shelter for a wide range of invertebrates as well as birds and small mammals. Below the undergrowth were rotting logs and generations of leaf litter. All this has now been cleared and replaced largely by bare soil devoid of its covering of decaying vegetable matter. I am told that native species have been planted. There is also a pile of logs. I do not see the point in destroying established habitat and replacing it with somebody's version of what they think the habitat should be. The reason the brambles and other plants were growing so vigorously was that they were perfectly suited to that particular corner of Hilly Fields. Wildlife is under extreme pressure worldwide. Not just biodiversity but the actual numbers of individual insect, other invertebrates and vertebrates as well</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to promote and protect the ecological, biodiversity and amenity value of the Borough's natural assets – including trees, green spaces and water spaces and seek to enhance existing assets or make new provision through new development wherever opportunities arise.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
-------------------------------------	---	-----------------------------	---

	<p>as plants and fungi. It is acts of destruction like this which are repeated all over the borough that are helping to make it less biodiverse and less wild. The native species planted could have been planted further down Eastern Avenue where there is just mown grass. That would in the long term have actually been positive for Lewisham's wildlife.</p>		
--	--	--	--

Ravensbourne Rd	Hazardous rat run. No place to cross safely. Poor street lighting and pavement that isn't fit for purpose.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
-----------------	---	----------------------------	--

<p>Leegate shopping centre</p>	<p>Proposals are being considered by the council and the community have not been consulted</p>		<p>Opportunities will be given to comment on specific developments once a planning application has been submitted</p>
--------------------------------	--	--	---

Shopping parade/South Circ	Atrocious air quality. Family area that had to endure toxic air and a complete lack of investment to create a quality commercial hub for our community. In an area of young families, this parade could be a vital resource for the thousands of people that live in the surrounding streets. As it is, people have to use their cars to travel to retail parks and supermarkets to shop. The parade offers no option to shop local.	Sustainable design, Economy and culture, Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>The Local Plan aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes</p> <p>The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities</p>
Stanstead Road	Gridlocked traffic. Terrific air quality issues	Transport and connectivity	The Local Plan aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes.
Drakefell Road	The pavements are blocked with parked vehicles. Some of these are parked here for extended periods, when the owner does not appear to live here. Residents are often forced to walk in the road and mix with traffic. Moreover footfall is increasing due to more people using Telegraph Hill upper park, and yet social distancing is not possible on narrow blocked pavements. Any meaningful local plan would prioritise walking and therefore enforce the pavement parking ban. This is not the case in Drakefell Road. This local plan is likely to make the situation worse as it does not explain how the increased population	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards.

	<p>across the borough are going to be physically able to walk and use public transport if pavements are inaccessible.</p>		
<p>Ravensbourne Road/sunny side junction</p>	<p>This is used as a rat run and frequently has large lorries getting stuck and damaging parked cars. Cars generally go too quickly down the road also.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>
<p>Kirkdale Roundabout</p>	<p>This area is too dominated by fast traffic.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>

Kirkdale	Unsafe for cycling as not enough space and many drivers drive too fast and dangerously. Cars are often driving way above speed limit.	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>
South Circular at Forest Hill	Cyclist safety	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>
Central Catford	Cyclist safety	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>
Sydenham Wells Park	Best park in London	Green Infrastructure	<p>Noted</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

<p>Unsafe road crossing (Taylors Lane)</p>	<p>Dangerous exits from the park</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>
<p>Baxters Field</p>	<p>Mopeds and motorcycles use Baxter Field as a cut through, they often speed through the park where there are children playing, it is very dangerous</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>
<p>Baxters Field</p>	<p>Lack of concern for nature in the Glendale/Lewisham Parks contract</p>	<p>Green Infrastructure</p>	<p>Comment will be passed to colleagues in Parks, Sport and Leisure</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy</p>
<p>Rushey Green</p>	<p>An unwelcoming and intimidating road to cycle on.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>

Ladywell Road	It is dangerous and intimidating entering and exiting Ladywell Fields and following the Waterlink Way.	Green Infrastructure	Comment will be passed to Parks, Sport and Leisure
Brockley Road roundabout	Terrible place for cyclists - what are cyclists emerging from the lovely route via Eddystone Rd supposed to do to turn right? Drivers rarely understand the cyclists may be doing a U turn on the roundabout, and are often tempted to take over. Some more frequent users of this route are forced to go against the flow of traffic to reach a pedestrian island before rejoining the road, or to wait dangerously at the entrance to the "roundabout" until the road is clear.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Comment will be passed to colleagues in Highways and Strategic Transport.
Ravensbourne Road	This is the street where I live. I love the community and many of the things we have but there are some real problems that make me worried about my family and my future here.		Noted
Ravensbourne Road	Perilous t-junction with cars meeting from three directions at speed with often obscured corners due to parked cars. Essential that something should be done to make this junction safer.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Comment will be passed to colleagues in Highways and Strategic Transport.

Stanstead Road	Grim parade. Place making is nonexistent, unwelcoming environment and of little use as an essential shopping hub for locals.	Sustainable design, Economy and culture, High quality design	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Pavement parking	The allowance of payment parking on the woodlands makes the street very unfriendly for pedestrians. Cars regularly double park on this corner and it is dangerous for all pedestrians, cyclists and drivers. The lack of CPZ also means cars and vans are regularly abandoned here.	Transport and connectivity	The Local Plan conforms to the London Plan car parking standards. CPZs outside the scope of the Local Plan
St Dunstan's traffic lights	Lewisham and TfL need to think about this area and how stripping out reasons for the permanent traffic jam that builds here will help the CO2 levels so near to so many schools and homes of young families.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Brookmill Park - bike route	It's a great north-south route by bike or on foot.	Transport and connectivity	Noted
Empty building	I hope this building's beauty is restored, right now it is covered in graffiti but we could use a new school or GP or anything really.	Heritage, Community Infrastructure	Noted

Ravensbourne	Dangerous pavements Speeding cars No place to cross with children Too dark and scary Fly-tipping	Transport and connectivity, Sustainable design, Community Infrastructure	Comment will be passed to colleagues in Highways/Parks, Sport and Leisure and Environment Crime Enforcement Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Paved area in front of Waldron Health Centre	Missed opportunity to have more greenery and a space for pollinators!	Green Infrastructure	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.
The Albany Garden	What an amazing community space and spot of greenery! Always look forward to walking by.	Green Infrastructure	Noted

<p>Between Lewisham College and the Laban Centre.</p>	<p>The area has huge potential, but I fear control has already been handed over to private developers.</p>	<p>High quality design, Sustainable design, Community Infrastructure</p>	<p>All planning applications are subject to a rigorous assessment process. It is not correct to ascertain that control of a site is handed over to private developers.</p>
<p>Lee green crossroads</p>	<p>This is an incredibly polluted, traffic-clogged junction that has no protected space for cyclists and is incredibly unpleasant for pedestrians. At points there are four lanes yet there is no safe space for bicycles. Building more lanes only encourages more driving. This area should be prioritised for segregated bike lanes, planting and wider pavements. Speeding and driving in general must be discouraged - there simply isn't the space for the number of vehicles currently on our roads and the resulting pollution is causing a public health crisis. We also need the LTNs expanding to ensure there are safe</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>

	and pleasant places for cyclists and pedestrians. Thank you		
Pedestrianise Deptford High Street	Deptford High Street is so vibrant and a key part of this community, but it's been such a shame seeing Rye Lane get pedestrianised and meanwhile Deptford high street still involves dodging cars to cross.	Transport and connectivity	Rye Lane was pedestrianised as part of Southwark Council's Covid -19 management plan to encourage increased footfall on the high street. It is no longer pedestrianised. Comment refers mostly to restrictions that were in place during the Covid-19 lockdown
Blythe Hill shops	Nothing there to shop locally Rundown Ghost town day and night Intimidating atmosphere Non-stop traffic	Transport and connectivity, Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Trash house	This derelict building wasn't given planning permission after it was built, so for a decade it has been sitting and accumulating trash in the yard, an eyesore and a waste of	Housing	Comment will be passed to colleagues in enforcement. The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough..

	space in an area that could easily use more housing.		
Central Catford - redeveloping the shopping centre	The redevelopment needs to retain space for the small-scale stalls run by local people - not just welcome in the gin-making incomers that the private developers think will make Catford attractive to the home-buyers priced out of wherever.	Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Shuttered community centre	There are a few vacant buildings that are a missed opportunity to add a positive to the community, either as their original use or as a nursery or incubator for local businesses or anything at all!	Community Infrastructure, Economy and culture	The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Blythe Hill-Ladywell Fields-Catford/Catford Bridge-Catford Town Centre	Missed opportunity. For cyclists wishing to avoid the south circular, travelling from Honor Oak to Catford is currently tricky. The 'natural' route is to take the roads over/around Blythe Hill and into Ladywell Fields - but then the railway gets in the way. The promised bridge over the railway that Barratts were due to build would be ideal to enable the cyclist to safely complete the final leg of the journey. Currently, they have to go as far north as the hospital, to use the whilgig bridge in that part of Ladywell Fields; or brave the death trap of Catford Road.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Comment will be passed to colleagues in Highways and Strategic Transport.

<p>Blythe Hill shops</p>	<p>Abandoned looking Bad smog and air No shops of any quality Of no use to the local community Intimidating atmosphere Ghost town day and night Non-stop traffic No shelter for bus stop Waste bins everywhere</p>	<p>Transport and connectivity, Sustainable design, Community Infrastructure</p>	<p>The Local Plan aims to address a number of the issues highlighted in this comment</p>
<p>Next to the railway</p>	<p>This beautiful area is blocked off to the public in many places. Making a walking route all the way along would not only allow us to access the incredible nature there, which is great for our physical and mental wellbeing, but will also act as a green commuting corridor. Already Lewisham has some of the most polluted roads in London. Active commuting and taking people away from the busy Baring Road is exactly the kind of initiative that Lewisham claims to support in their constant fight against the car and pollution.</p>	<p>Transport and connectivity, Green Infrastructure</p>	<p>The Local Plan aims to realise the long term reductions of energy use and carbon emissions in helping London become a zero carbon city by increasing the use of sustainable transport modes.</p>
<p>River Pool Linear Path</p>	<p>Missed opportunity. Catford Bridge is a death-trap for cyclists and the cantilevered bridge is still years away.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling.</p> <p>The Local Plan supports the redevelopment of Catford including improved infrastructure.</p>

			The Local Plan also aims to provide physical infrastructure needed to support growth and sustainable places, including through the use of CIL funding and developer contributions
SOUTH CIRCULAR	Terrible traffic all day and night Bad smog in that whole area	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Bridge over the railway between Silverdale and Sydenham Park Rd.	I can't get over the bridge using my bicycle: the steps are too steep. My legs are strong, my upper-body less so! More importantly, the bridge is also inaccessible to wheelchair users and difficult for parents/carers pushing a buggy.	Transport and connectivity, Sustainable design	The Local Plan aims to create Healthy and Safe communities by addressing the detriments of physical and mental health. The Local Plan also aims to provide physical infrastructure needed to support growth and sustainable places, including through the use of CIL funding and developer contributions
Unused / neglected commercial space	Units here have been left empty since these buildings were erected (at least 5 years) and have seen rats move in and vandalism encouraged.	Economy and culture, Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement and the Safer Neighbourhoods Team The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities
Crofton Park Railway Garden	This open space has become very important to local people since it opened in June 2019, and especially over the past year.	Green Infrastructure	Noted

			The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.
	Wickes, Halfords, etc - useful shops, but v unlovely. As someone who lives reasonably close by (Hurstbourne Rd) I would be completely happy if you put high-ish-rise flats here by the station - so that young childless workers can fall out of bed in the morning and onto a train to go to work; and come home to spend their hard-earned cash in Catford's new amenities at night/ at the weekend. Hang onto all the good quality social housing possible in Perry Vale, Bellingham and Downham, for families who need the space.	High quality design, Sustainable design, Community Infrastructure, Housing	The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough.
Terrible litter and fly tipping	There is a lot of litter in this area and fly tipping. It makes the area ugly, is bad for the environment and wildlife and generally makes the locals feel they are living in a dirty area. The messier it is, the less locals will care or make the effort to keep it tidy.	Community Infrastructure	Comment will be passed to colleagues in Environment Crime Enforcement The prevention of flytipping is not within the scope of the Local Plan
Horniman gardens	This place is a gem	Economy and culture	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.

Pedestrian walkway	This pedestrian walkway is very dangerous. It is under a railway bridge, is a tight bend for cars and has a narrow pavement. It feels unsafe to walk under and cars go round the bend / past you, very fast and at close range. Real tragedy waiting to happen.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Dangerous crossing area	This busy road is hard to cross and there are no traffic lights or helpful ways to get pedestrians across the road. There is a lollipop person at school times but is an issue more times of the day/week.	Transport and connectivity	Comment will be passed to colleagues in Highways and Strategic Transport. Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Junction where Honor Oak Road meets Forest Hill Rd and Honor Oak Park	It is difficult to turn out of Honor Oak Road. Viewing can be hard and traffic sometimes speeds. There are also dangers for pedestrians.	Transport and connectivity	Comment will be passed to colleagues in Highways and Strategic Transport Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Local wildlife / bird feeding	Many feed the birds bread which is not only really bad for them but encourages rodents, which are a threat to the dwindling nesting bird population.		Noted This issue is not within the scope of the Local Plan

<p>park cafe honle</p>	<p>This cafe is a huge asset to the area. Serving wonderful food and drink and providing a much needed stopping place for many in the community. The area doesn't have many eateries or cafes so honle is really important for the neighbourhood and Martin and his team make such a difference.</p>	<p>Economy and culture, Community Infrastructure</p>	<p>Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
<p>Pedestrian / cycle bridge across from Beadnell Rd to Devonshire Road</p>	<p>It is a great idea, but it would be very damaging to the two nature reserves (Devonshire Road and Garthorne Road). This would not fit with Lewisham biodiversity plans.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces</p>

<p>Lee gate</p>	<p>I feel this redevelopment has dragged on far too long, the council has failed to listen to the views of local residents, and now is considering proposals of 15 storeys and 650 units which is more appropriate at Kidbrooke or Lewisham roundabout than in a residential area that accommodates families with conservation and listed buildings served by an infrastructure that is already at breaking point, pre-COVID. It is extremely upsetting to face the prospect of Lee Green looking like Lewisham roundabout. I cannot believe that Lewisham Council has not set out strict criteria already to stop wasting more time on this project, when so much should have been learnt from the St Modwen applications.</p>	<p>High quality design, Heritage, Housing, Sustainable design</p>	<p>Opportunities will be given to comment on specific developments once a planning application has been submitted.</p> <p>The Local Plan aims to proactively respond to population growth and help meet London's housing need by positively managing the delivery of new homes across the borough.</p> <p>The Local Plan aims to provide essential physical, community and green infrastructure needed to support the growth of sustainable places by coordinating investment through CIL funding and developer contributions</p>
-----------------	---	---	---

<p>Traffic calming measures are needed in Grierson Road.</p>	<p>Too many vehicles, mostly cars and motorbikes, travel too fast along Grierson road, where there are many small children and also older people.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>
<p>Disused pub</p>	<p>This building has been boarded up and unused for many years. It could be something really great for the community either as a restaurant / pub / cafe. We don't really know why it has never been open to business investment.</p>	<p>Economy and culture, Community Infrastructure</p>	<p>The Local Plan advocates for a thriving local economy which ensures that all identified Town and Local centres remain the focus for community activity and support growth including retail, business and cultural activities</p>
<p>Land at the back of Northbrook Park</p>	<p>This land is beautiful, with incredible biodiversity and value. we need this to be green space and not built on. This area is part of a green corridor between the south circular and Elmstead woods that desperately needs protecting - it is an important carbon sink as well as full of vitally needed wildlife.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

<p>Bradgate Road</p>	<p>The two way traffic flow on the narrow Bradgate road creates daily tension and danger for pedestrians and residents. Two cars cannot safely pass, and so cars often have to hold back, meaning the other car speeds along, and/or there is regular aggressive confrontations and arguments and refusal of either party to back up. I have suffered physical and verbal abuse from having tried to intervene to resolve stand offs, when motorists are beeping horns at bedtime for children.</p> <p>Also, Bradgate road is used as a rat run to avoid the A21/south circular route which will become even more acute if the proposed town centre regen and south circular re-route goes ahead.</p> <p>It needs resolving, in advance.</p>	<p>Transport and connectivity</p>	<p>Comment to be passed to colleagues in Highways and Strategic Transport</p> <p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>
<p>Garthorne Road Nature Reserve</p>	<p>Garthorne Road Nature Reserve is a delightful quiet space in the borough.</p>	<p>Green Infrastructure</p>	<p>Noted</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>

<p>Ringway gardens and horse meadow</p>	<p>Beautiful, vital spaces. This is part of our amazing wildlife corridor between the south circular and Elmstead Woods, yet it is perennially under attack from development. The council are not doing what they should do to protect it - SINC and MOL reviews are inaccurate.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces</p> <p>The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
<p>Aldi redevelopment</p>	<p>I am concerned that the redevelopment could be highly damaging to the light and privacy of residents on Bradgate road contrary to proposed policy QD11. The previous development on the car park (17 Scrooby St) caused significant overshadowing and loss of privacy and shouldn't really have been allowed in its current form.</p>	<p>High quality design, Housing, Sustainable design</p>	<p>Opportunities will be given to comment on specific developments once a planning application has been submitted.</p>

<p>Burnt Ash Hill</p>	<p>Burnt Ash Hill has a huge volume of traffic at nearly all times of the day and night. Huge skip lorries, and other large vehicles drive along it at speed, swerving to avoid the speed bumps and traffic islands. On numerous occasions I have seen people overtaking other drivers at >40 mph. It is so dangerous. The traffic along this road must be reduced - we are just suffering from people cutting through our neighbourhood in their hurry to get somewhere else.</p> <p>There is also ZERO cycling infrastructure - in order to cycle down Burnt Ash Hill you have to cycle on the wrong side of the road or the pavement in the mornings in order to get past the huge queue of traffic waiting for the lights. There are cars parked all along both sides of the road, which means there is no room for cyclists.</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>
<p>Burnt Ash Pond</p>	<p>Really sad every time I see how run down the pond is - thick weed all over it. Also it's inaccessible! Why can't we enjoy this space or enable children to learn here?</p>	<p>Community Infrastructure, Green Infrastructure</p>	<p>Comment to be passed to colleagues in Parks, Sport and Leisure.</p> <p>The Local Plan aims to promote and protect the ecological, biodiversity and amenity value of the Borough's natural assets – including trees, green spaces and water spaces and seek to enhance existing assets or make new provision through new development wherever opportunities arise.</p>
<p>Coopers Lane School</p>	<p>School street is brilliant! Thank you!</p>		<p>Noted</p>

<p>Grove Park Nature reserve and green corridor</p>	<p>The plan refers to green infrastructure, but only seems to have the formal parks. If it's just the parks, then it needs relabelling, otherwise it should include ALL green infrastructure, including MOL, SINCs, nature reserves, green corridors, etc. Some green space maps miss a significant part of the MOL land in Grove Park</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces</p>
<p>Eckington gardens and Monson road</p>	<p>Eckington gardens is not a generally pleasant park to want to spend time in. It is quite dark and can feel intimidating to walk through at times.</p>	<p>Green Infrastructure</p>	<p>Comment will be passed to colleagues in the Neighbourhood Community Safety Service and Parks, Sport and Leisure. The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces</p>
<p>Bridgehouse meadows.</p>	<p>The space is currently used poorly and no attempt has been made to make it more interesting with landscaping.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces. The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy.</p>
<p>Cycle lane contra flow please</p>	<p>Dangerous road. Frequently has drivers using it the wrong way. Only way to avoid busy new cross road</p>	<p>Transport and connectivity</p>	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p>

Brockley Rat-run	Rat-running should be prevented	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Dangerous crossing	The crossing to Hilly Fields park is not safe	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Brockley Cross	Very dangerous traffic intersection / double roundabout. Poor visibility and road markings on pedestrian crossing near railway bridge.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Green space	Just improves the whole area by having green space for larger trees.	Green Infrastructure	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces
Parks and night skies	Too many lights in park. Lights are more frequent than on roads, badly positioned.		It is not in the scope of the Local Plan to determine where lights are positioned within parks.

Slagrove place	Nothing done to design attractive green space.	Green Infrastructure	The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces
Street scape	Dead trees no scale with new planting - which might even be dead.	Green Infrastructure	Comment will be passed to colleagues in Parks, Sport and Leisure.
Station approach	Not very 'approachable' could be a little urban square with trees, but instead just a road making it seem cars have priority.	High quality design, Transport and connectivity, Green Infrastructure	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Ladywell Fields	Lacking on biodiversity and design..	Green Infrastructure	The Local Plan aims to promote and protect the ecological, biodiversity and amenity value of the Borough's natural assets – including trees, green spaces and water spaces and seek to enhance existing assets or make new provision through new development wherever opportunities arise.
Sherwin road - cycle lane contra flow		Transport and connectivity	No comment submitted
Roundabout	This is a dangerous and very busy roundabout. Cars flip here, and accidents are common. There is no option for	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling

	pedestrians to cross anywhere in close proximity.		Comment will be passed to colleagues in Highways and Strategic Transport.
Pond regeneration in Folkstone Gardens	I welcome regeneration of this lovely space, it was carried out in really unpleasant way though - and looks like works were never completed? There are still remains of the fence on the side of the pond that were never removed. Park fencing that was broken during grass cutting got nicked and now some dog owners bathe their dogs in this wildlife resource.	Sustainable design, Green infrastructure	Comment will be passed to colleagues in Parks, Sport and Leisure The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Mercury way recycling centre	The amount of mess and damage (to pavements, trees) from vehicles coming out of the recycling centre here is very disappointing. On a rainy day you this road is a mess to cycle though because of the dirt on the road. On a dry day this place is converted with heavy dust. It's so unpleasant to walk though here.	Transport and connectivity	Comment will be passed to colleagues in Highways and Strategic Transport. It is not within the scope of the Local Plan to resolve this issue.
Mercury way pavements	Most pavements alongside this road are not wheelchair accessible.	Transport and connectivity	Comment will be passed to colleagues in Highways and Strategic Transport

Mercury way - cycle way	The cycle way coming from the arch on Surrey Canal road onto Mercury way needs to be looked at. The Mercury way cycle way sugaring is impossible to ride on, and the cycle way doesn't re-join the road in any reasonable way. Fixing it will allow more people avoid blind turn onto Surrey Canal road.	Transport and connectivity	Comment will be passed to colleagues in Highways and Strategic Transport Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling
Playground	There are big patches of almost bare earth in the planting areas. Are they being treated with pesticide? Why aren't there plants here.	Green infrastructure	This comment will be passed to colleagues in Parks, Sport and Leisure.
Bridgehouse meadows	Many people use this space for picnics gathering and dog walking. It's nice and the view is lovely! It's one of the rare open areas to fly a kite or play without disturbing a picnic.	community infrastructure, green infrastructure	Noted The Council will continue to support investment in its parks and open spaces. Further details are set out in the Parks and Open Spaces Strategy
Estate redevelopment	Re-development of old buildings into new ones is positive in many ways. There is a deep need for new quality contemporary business premises development. Of course there is a worry about the business currently here- where do they go, can we afford to loose more workplaces locally?	Economy and culture, sustainable design, High quality design, Heritage	It is an aim of the Local Plan to protect and enhance the Borough's employment spaces

<p>Eastern Rd/Access Lane cutting (Hilly Fields Park)</p>	<p>A lot of hard work is gradually giving results in terms of increasing biodiversity and planting of trees - part of local, regional and national policies relating to global warming and pollution control.</p>	<p>Green Infrastructure</p>	<p>The Local Plan aims to support London in achieving its National Park City status by protecting, enhancing and connecting the Borough's network of parks, open and water spaces including the delivery of a Green Grid to improve linkages to and between these spaces.</p>
---	---	-----------------------------	---

Garthorne Road	Motorists block the gate, denying cyclists access.	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>This issue is not within the scope of the Local Plan</p>
Bromley Road	No safe crossing, and no public trees for entire length, between Laurence House and Retail Park, (Crantock Road).	Transport and connectivity, Green infrastructure	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling.</p> <p>It is not within the scope of the Local Plan to determine where trees are plated however it does advocate the principle of a greener borough.</p>
	B238 traffic often blocks the through route north or southbound on Grierson Road, stopping safe cycling.	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>
	It's super dangerous to join as a cyclist here, and there is no provision to join Eastbound traffic for cyclists.	Transport and connectivity	<p>Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling</p> <p>Comment will be passed to colleagues in Highways and Strategic Transport.</p>

	Lack of provision for cyckists accessing Q1 via Monson Road.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Comment will be passed to colleagues in Highways and Strategic Transport.
Brockley Rise	No provision for cyclists to safely enter Brockley Rise for local shops etc from the Chandos Roundabout.	Transport and connectivity	Local plan advocates Healthy Streets Approach. This is based on re-balancing the road network to reduce car dominance give priority to movement by walking and cycling Comment will be passed to colleagues in Highways and Strategic Transport.
Brockley Rise	Vehicle idling is a major problem	N/A	This issue is not within the scope of the Local Plan. Local plan advocates Healthy Streets Approach. Introduction

The new Local Plan will shape Lewisham to 2040. Its aim is to establish a shared vision for the future of Lewisham so the more people are involved and share views, the better the aspirations of our diverse communities will be reflected.

Last year, during the COVID-19 restrictions, over 1,400 people joined a borough-wide digital consultation to help inform Lewisham Council's new Local Plan. Not everyone could join digitally and whilst the overall response rate to last year's public consultation was strong, it highlighted a number of issues that the Council wanted to address for the Local Plan, but also to better improve how we engage with Lewisham's diverse communities more generally.

The Planning Team took the initiative to hold a second round of consultation to specifically hear from those who don't usually share their views with the Council. This new phase of targeted consultation will not only inform the new draft Local Plan but will help ensure the Council's overall approach is more inclusive.

As well as digital exclusion, we know there are lots of reasons why people's views aren't heard during public consultation including disability, ethnicity, sexuality, mental health problems or financial circumstances. Those facing homelessness, refugees or displaced people may also not be in a position to contribute.

As Covid-19 restrictions were lifted, officers were able to talk to people in-person at local community groups and events in community spaces, so a series of targeted sessions were planned to encourage local people who wouldn't usually participate in public consultation to share their views through an informal conversation with the team.

The objectives for this new programme were to broaden the reach of the new Local Plan consultation to include views from seldom-heard audiences - aiming for at least 40 percent to be those who have never taken part in consultation with the Council - offering a safe, welcoming environment for conversation.

Part One: Approach

We planned a carefully targeted approach focusing our publicity and engagement on networks and groups where we are likely to reach our target audience.

In-person conversations took place in accessible locations across the borough where we could meet people in spaces where they feel comfortable and at ease to talk openly. In every instance, this meant going out to planned events rather than hosting events and hoping people would seek us out.

At the start, we hoped to speak to at least 100 people with the aim to ‘understand rather than to be understood’. We contacted over 50 stakeholders plus all elected councillors at Lewisham Council to help refine our priority groups and events.

Not only did we hope to gather insights to inform the Local Plan, but we sought to make long, lasting connections that would help shape future public engagements.

Target audience

Lewisham’s population growth is rapidly accelerating and young people make up a significant and growing demographic group (one in four people are under 19). Overall, 46% of the population are from a Black, Asian or Minority Ethnic background, but this rises to over 75% among school children. Lewisham is the 15th most ethnically diverse local authority in England.

Reflecting this diversity, the Planning Team broadened the scope of consultation for this programme to seek views from a specific target audience, local people from Black African, Black Caribbean, Asian and Minority Ethnic background; young people aged 18-25 and other seldom-heard groups specifically those with disabilities, those identifying as LGBTQ+ and refugees. These groups of people were among the least likely to contribute to the previous consultation on the Local Plan and hearing their views was therefore important.

To do so, the team made contact with community leaders across the five Local Plan character areas, to organise consultation sessions and connect with related user groups. For example, the team managed to reach young people under 18 by attending the monthly Bank of Things meeting led by the Young Advisors.

Gathering feedback

Feedback was gathered from two sources. Firstly, from conversations during in-person events which were occasionally captured on feedback forms but more likely from notes taken by officers during and after informal conversations. Secondly, from the digital survey which was shared by email to stakeholders and available for those attending consultation sessions via a QR code or web address as a way for people to answer questions in their own time.

Our feedback analysis therefore covers insights from responses gathered from three different sources: printed surveys, digital survey entries, and conversations tracked during consultation events.

Event materials

For each event, a large display board showing a map of Lewisham was used as a focus for discussion. This was a useful conversation starter and provided a focus for conversations to talk about neighbourhoods and connections.

Figure 1. Photos of events at the Green Man and Bank of Things (left to right)

Printed PDF versions of the five character areas (Lewisham North, South, Central, East and West) were provided to consult and help attendees learn about proposed plans for their local area.

Feedback forms were also available.

Team

The consultation team was formed by members of the organisation Team Catford, a local engagement and place-making team; along with the Director of Planning; Planning Policy officers; and a former Young Advisor. For more information about the team, please email localplan@lewisham.gov.uk.

Feedback questions

Feedback questions were focused on four macro topics highlighted in the survey, titled as follows: “your neighbourhood” (question 1 to 11) and “your home” (question 17 and 18); “your outdoor space” (question 12 to 16); “how you move around” (question 19 and 20) and “climate emergency” (question 21 to 24).

The questions were straightforward and written to create engaging conversations on the topics listed above. Specifically, the definition of “your neighbourhood” included questions to understand things that consultees liked or disliked from the places they live, together with how safe they feel about moving around and how often they visit a local town centre.

On a smaller scale, two questions were asked about people's homes, specifically about the things they would like to improve within their current place and also inviting people to describe their ideal home to live in.

The third topic was about going outdoors, with questions seeking to understand more about what it means for people to go out and visit local parks along with perceived strengths and weaknesses of the borough's green infrastructure.

"How you move around" was the fourth topic within the survey, and it sought to identify preferred modes of transport along with things that would make people's travel easier.

The last topic related to Lewisham's declaration of a climate emergency. Here we asked questions to better understand people's awareness of and views on the changing climate, to learn which aspects of climate change primarily affects Lewisham residents and what people think should be done at a neighbourhood level to address this issue.

A copy of the survey is included in Appendix A.

Part Two: Reach

Overall, the team spoke to 200 participants in-person with over 90 survey responses.

Almost 97% of participants had never participated in public consultation with the Council before (see Figure 2).

By location, views were shared from individuals evenly spread across the five Local Plan character areas - **Central** (Catford, Hither Green and Lewisham), **East** (Blackheath, Grove Park and Lee), **West** (West: Brockley, Crofton Park, Forest Hill, Honor Oak, Ladywell, Telegraph Hill and Sydenham), **South** (Bellingham, Downham and Bell Green) and **North** (Deptford, North Deptford and New Cross).

Around 10% of survey responses were shared online via the digital survey.

Have you participated in public consultation on the draft new Local Plan before?

Figure 2. Pie chart showing participation in previous public consultation

Events

10 consultation events were held in places and places of interest around the district, including one held virtually, as defined by our key audience. Some of these locations are outlined in the map (see Figure 3) and include public libraries, the civic suite,

community hubs, a local market, and a food bank.

Participants were encouraged to fill out the survey and share their comments with the consultation team. Later, the team compiled all data into a single database to undertake the feedback analysis outlined in Part Three.

Alongside the core consultation team, planning policy team members joined each session and were able to provide in-depth information on local planning issues.

Conversations were spontaneous and free-flowing with members of the team loosely following the themes and questions from the survey to elicit insights from participants. Each conversation lasted around 10-15 minutes allowing in-depth, meaningful views to be shared and this led to detailed and specific issues to emerge.

Events held are detailed below.

- **Monday 21st March**, 5pm - 7pm at Bank of Things, Unit 19, Lewisham Shopping Centre
Key audience: Young Mayor Advisors
- **Tuesday 22nd March**, 11am - 2pm at Deptford Lounge
Key audience: general public
- **Thursday 24th March**, 11am - 2pm at Downham Library
Key audience: general public
- **Friday 25th March**, 9:30am - 11:30am at Irish Centre
Key audience: families
- **Sunday 27th March**, 10am - 4pm at Catford Food Market
Key audience: general public, interest groups
- **Tuesday 29th March**, from 11am - 2pm, Lewisham Library
Key audience: general public
- **Tuesday 29th March**, from 5pm - 7pm, Phoenix Community Housing at Green Man
Key audience: women's residents group

- **Thursday 31th March**, from 5pm - 7pm, Lewisham BME Network, virtually via Teams
Key audience: BME groups
- **Monday 4th April**, 5pm - 7pm at Bank of Things, Catford Civic Suite
Key audience: Young Mayor Advisors
- **Thursday 7th April**, 12pm - 2pm at Kathy's Place
Key audience: volunteers, general public

The large map displayed at events shows the geographical location of these events - see Figure 3 on the following page.

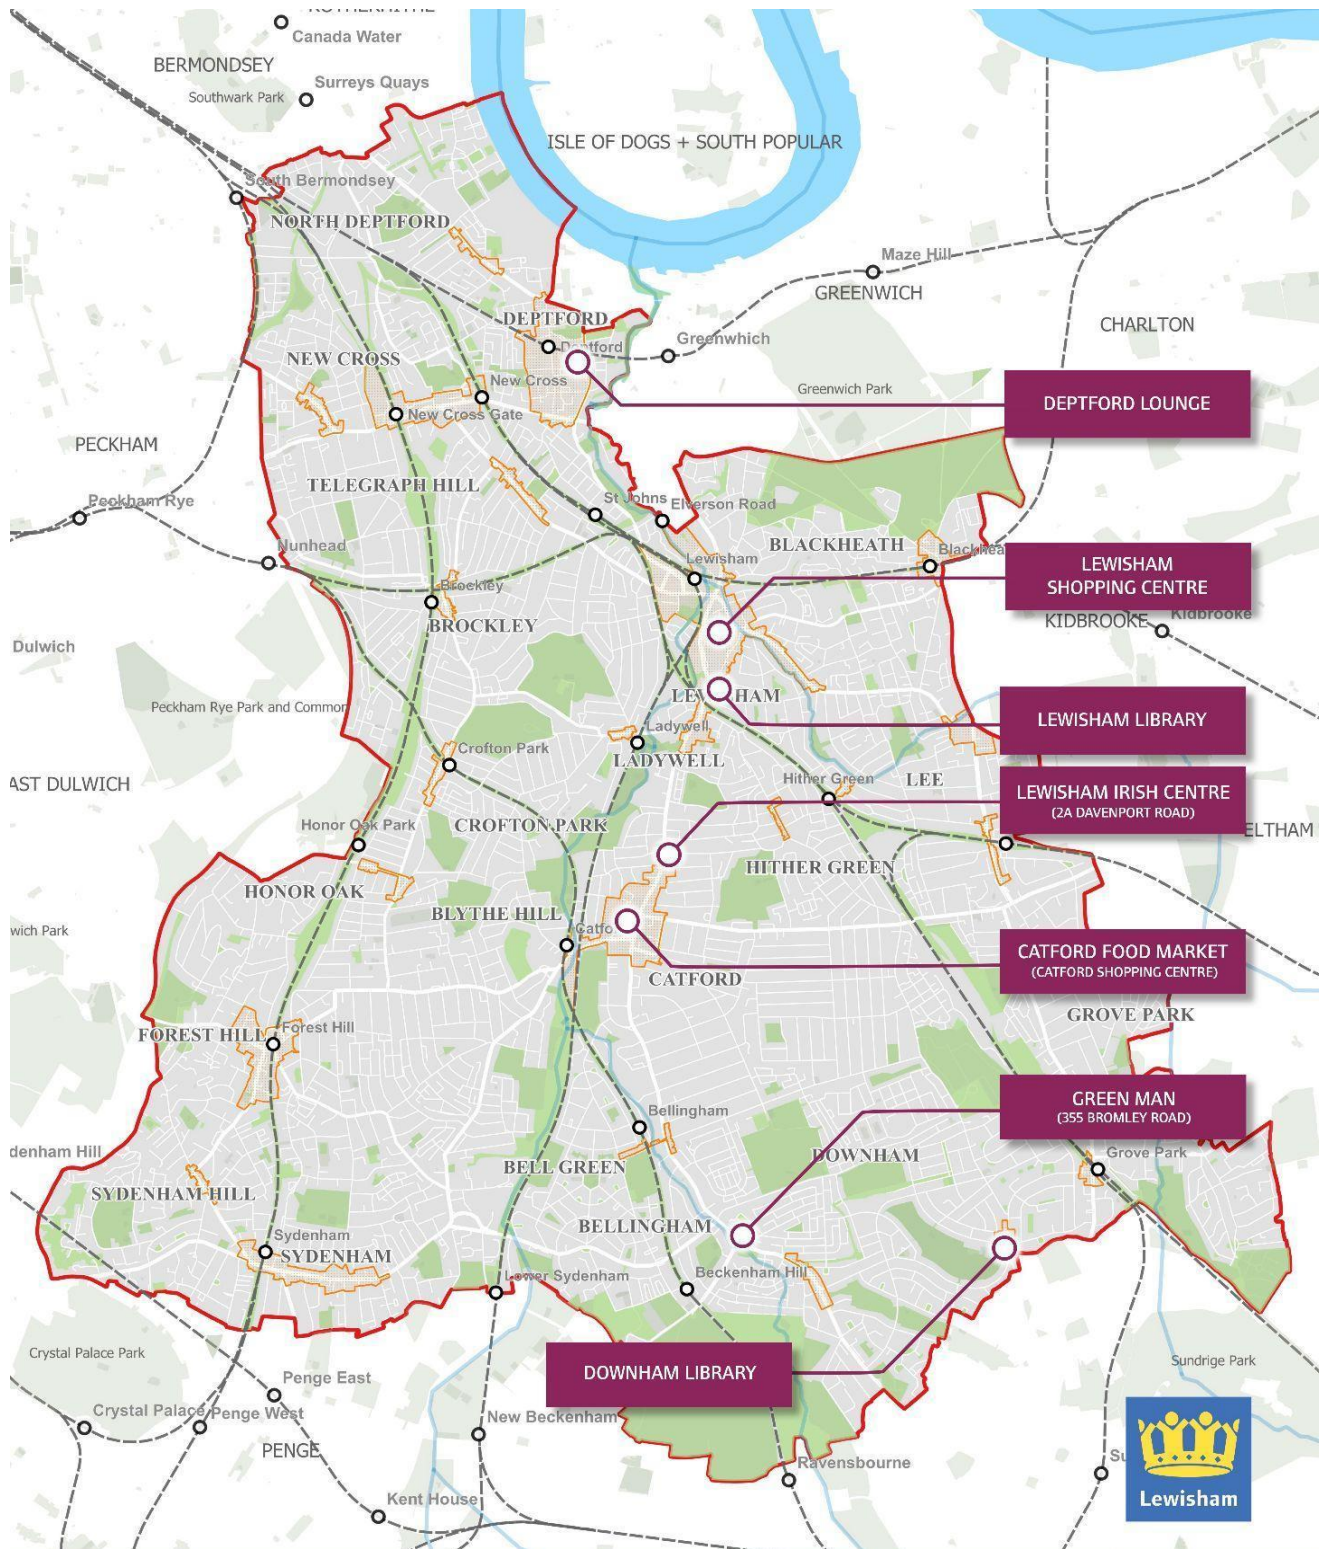

Figure 3. Large map displayed at events

Demographics

To broaden the reach of the Local Plan consultation to include views from our target audiences - young people aged 18-25, people from a Black, Asian and Minority Ethnic background as well as specific seldom-heard groups including refugees, people with disabilities and those identifying as LGBTQ+ - we set ourselves a target of at least 40 percent response from these audiences.

In addition to questions on issues relating to the Local Plan, we asked questions that allowed us to build a picture of the demographics of respondents.

A younger response

We found that **65%** of the consultees were **under 40s**, with **30%** under 29 years old, including those under 18, and **35%** within 30 and 39 years old.

Figure 4. Pie chart showing the age of consultees

We effectively reached this audience through two targeted events hosted by the Young Advisors, however because we generated so much engagement overall, the proportion of responses from those within this age range was just over **11%**.

The remaining **35%** were over 40s, with the highest representation between 45 and 49 years old.

Reflecting Lewisham's diverse ethnicities

We found that 58% of consultees were from a Black Caribbean, Black African, mixed or multiple ethnic background or any other White background. This exceeded our overall target and allowed for a richer, more representative view by ethnicity.

Survey responses show that **24%** were English/Welsh/Scottish/Northern Irish/British, **22%** Caribbean, **18%** African, **12%** any other white background and **6%** Any other mixed or multiple ethnic background.

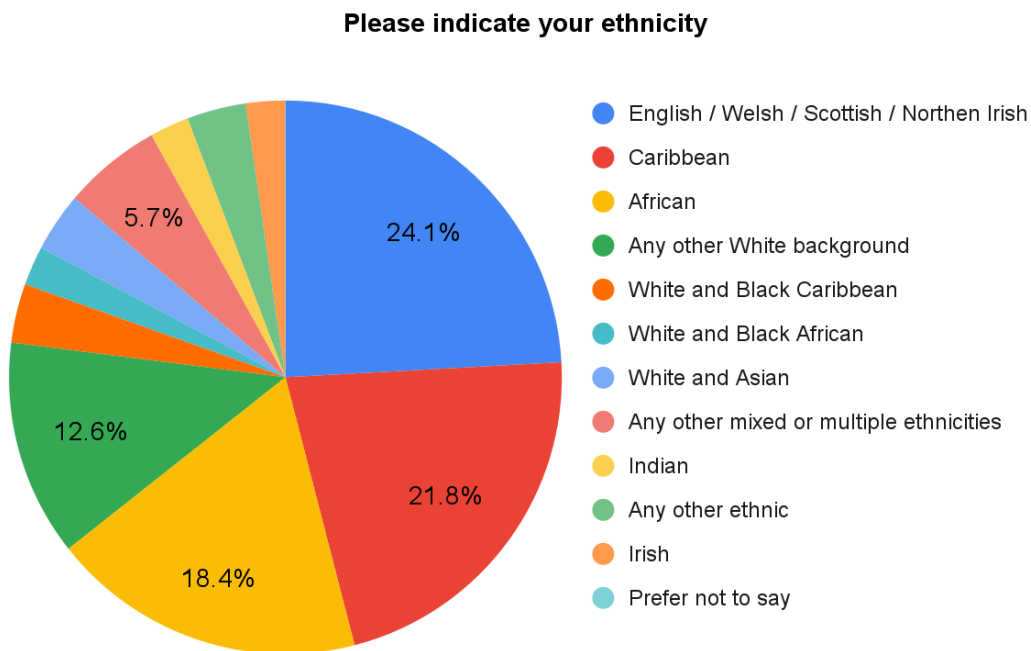

Figure 5. Pie chart showing the ethnicity of consultees

People with disabilities

We found that 19% of consultees considered themselves to have a disability, with 38% of these describing it as cognitive or learning disability or difficulty. We gathered a number of responses which raised issues specific to these characteristics.

Figure 6. Pie chart showing proportion of consultees with disabilities

How would you describe your disability?

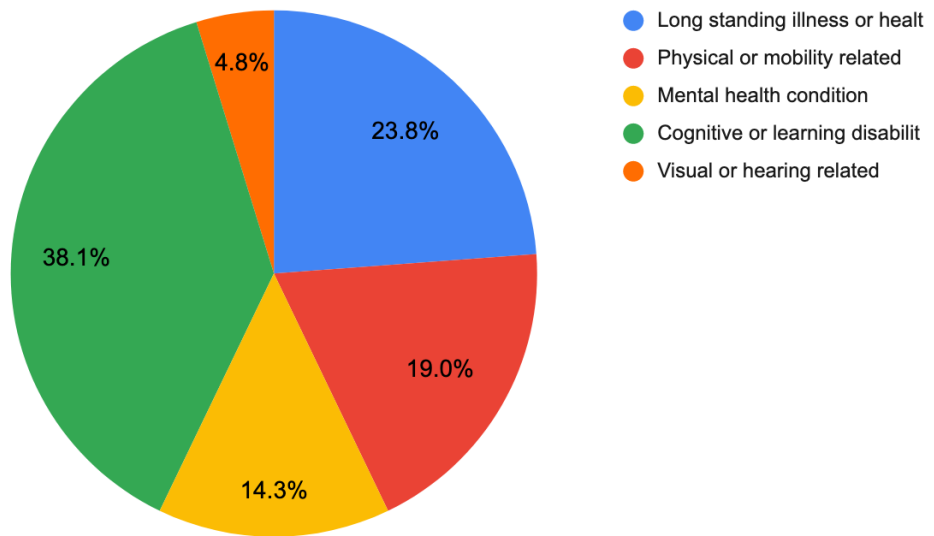

Figure 7. Pie chart showing distribution of type of disability

LGBTQ+ voices

Almost 15% of respondents identified as LGBTQ+ with a further 2.3% choosing not share their sexual orientation.

Which of the following best describes your sexual orientation?

Figure 8. Pie chart showing distribution of sexual orientation

With the ongoing Ukraine conflict, our efforts to reach refugee networks within Lewisham were stalled. We therefore didn't record any conversations or capture views from these groups.

Part Three: Emerging themes

All our conversations related to the Local Plan. We structured our questions around four macro themes - as detailed below - which allowed a range of specific issues to emerge, not necessarily widely-held views or the opinion of a majority, but views that are insightful into the views of some of the seldom-heard communities within the borough.

These views are explored below against the four macro themes on the following page.

Taking the time to listen

Perhaps the most striking observation of the entire consultation was the depth of valuable insights shared through this new approach.

A more in-depth discussion - conversations were longer, over 10-15 minutes per person and allowed individuals to warm to the team and help build a rapport. It was during these more in-depth conversations that we found the most insightful views were shared, ideas and opinions that would not surface through a survey response alone, but allowed the team to understand the position based on the individual's circumstances.

A comfortable space - some conversations just wouldn't have taken place if we hadn't gone out to groups or venues. Talking to busy carers as their children played at toddler sessions or going to small meeting places out in the borough enabled us to reach individuals who, by their own admission, would never come to a Council event.

Hearing from those who never talk to the Council - this was a very specific piece of work focusing on a distinct audience - those who have not engaged with previous consultations. Starting to understand the lifestyles, attitudes and issues of those who don't usually engage provides a richer understanding.

Consider the individual - from our conversations, we heard specific views driven by the individual's own life experience sometimes as an older person, sometimes as a female or as a young adult. We heard very striking views and attitudes that profoundly shaped individual's attitudes to living and spending time in Lewisham, that should be considered as policy is developed.

In your own words - our teams went to lengths to avoid any planning jargon, or indeed even mentioning planning policy and how the Local Plan was taking shape. Rather the focus of discussion was on issues around the Local Plan, which encouraged a freer conversation and allowed views to surface naturally.

About your neighbourhood, the place you live

This series of questions was intended to explore the way local residents perceive their neighbourhood, the place where they live, defining strengths along with weaknesses, and providing an overview of what it means to be part of Lewisham. The team noted that most of the participants did not have a clear understanding of the borough's boundary but valued key local assets, such as green areas.

We heard that people think Lewisham has a strong character with an established and diverse sense of community. In both survey responses and tracked conversations, residents told us they love to live in a neighbourhood that celebrates diversity with its eclectic and friendly mix of cultures, while retaining its own character.

When it comes to housing, many people were concerned about the quality around Lewisham of both old and new construction, particularly when compared to other boroughs. More public and affordable housing was a common theme in our conversations, especially when we spoke to residents from the north of the borough.

Conversations with carers and parents of grown up children revealed thoughts about the affordability of housing. Strong views were expressed about provision for those who were struggling with the cost of day to day life, supporting families and 'trapped' in rented accommodation. A woman explained that her daughter was facing the prospect of reluctantly having to move out of Catford because of increasing rents. She explained that her daughter worked and had a reasonable income but the rising rent levels meant that it was barely affordable to live close to her family and where she grew up going on to explain that not being eligible for social housing effectively means her living conditions were worse than many.

"Affordable should be accessible to those who are not on the housing list but being priced out due to high rents or not being able to afford a deposit."

When asked "How safe do you feel in your neighbourhood?" from 1 to 10 (with 1 being the least safe and 10 being the most safe) we had an average score in our survey of 6.75, with the lowest score received mostly by people living in the central area followed by those living in the south of the borough.

Vulnerability was often described as a common feeling when going out in Lewisham. This is explored in more detail in the following section.

As for the cultural offer, many young people called for more activities and meeting places. Some people across all the areas feel excluded from what is happening in the area and have little knowledge of the cultural and geographical resources of the area.

One woman told us that there was a real need for community support through events and donations, but it was important to think about protecting people's dignity. She explained that pitching events as 'free' was sometimes not the most sensitive approach and it would be better to charge a token or variable amount to avoid people feeling stigmatised by accepting free support.

"Events should be a minimum charge or pay what you can afford rather than free as this can be stigmatising and make people feel insignificant."

Your outdoor space

In this section of the survey we wanted to learn more about the local residents' experience of going outdoors, what they like and what they don't like when they visit local parks and access green infrastructure in Lewisham.

Overall, we heard a strong positive view from everyone on getting outdoors whether that was for fresh air, daily exercise, playing sports, skating, meeting friends, volunteering, going to the cinema or the theatre or reading by the river. We heard that people felt that the borough has good quality parks within easy walking distance. Many people told us they consider Lewisham's parks and green spaces their first choice when deciding on an outdoor activity. General comments about green spaces and parks pointed out a lack of benches and seating and while people spoke about older or tired playground facilities in some areas, most people recognised these spaces were well loved and well used by children nevertheless. In the south of the borough a few people noted they were keen to be kept better informed about the development of Beckenham Place Park.

Several people were keen to see improvements of green areas with a particular emphasis on consideration for different park users.

Conversations with women of all ages allowed very specific issues to emerge around feelings of safety in parks later in the evening - specifically Beckenham Place Park that is occasionally open into the evening for events and activities. It was noted that the walk towards the mansion is poorly lit with virtually no surveillance, which makes it a frightening place for women to walk alone. It was explained in two conversations that the fairy lights do not do a sufficient job of illuminating the area to make women feel confident or secure and one woman explained that there was nobody in the park able to help if she wanted to raise the alarm or request assistance. She went on to note that CCTV and surveillance would help build her confidence in using the space in the dusk and into the evening.

“The lighting is dreadful. I used to go to meditation classes during the winter. At night, the lights [fairy-style lights] go out completely. There needs to be an option to call for help. Sometimes I go to Kew Gardens and there's a number you can call within the grounds if you're feeling vulnerable. There's no phone number for the park - who should I call? I would feel safer if there was the reassurance that there is someone looking out for you.”

Talking to an older woman, who had mobility issues, she explained that it was becoming harder and harder to get to parks. She noted that parking restrictions and School Streets - particularly at Manor Park Gardens and Forster Memorial Park meant that it is hard to drive and park a car close enough to be able to access the park on foot. On Beckenham Place Park, she explained she felt digitally excluded because there are only contactless payment methods and she wasn't able to pay using cash. She said she felt excluded from being able to park her car and therefore, due to her mobility issues, from using the park at all.

“At Forster Park, with the school street and its restrictions, means I get fined for driving up to use the parking spaces. With mobility issues, this is a problem for me. At Beckenham Place Park, you can only pay by mobile phone, which I can't do so again I'm excluded. It's the same at Manor Park - because the surrounding streets are resident parking / charged parking so I can't access the park.”

One older woman talked about a reluctance to venture outside at times of the day when school children would be using the buses and congregating around bus stops. She explained that some groups of children were intimidating and she was fearful for her own safety as well as the safety of the children within the groups. She suggested that many older people, particularly women, chose not to use buses at these times of the day.

“School children and older people don't mix well on the buses. Older people go home when the children come out of school - we can't get on the bus. It is not welcoming when they're crowding on the pavements and by the bus stops. It's intimidating. I think they've staggered the school finish times but it's still a problem. It is not safe for the children either - ex students and others - who mix with more vulnerable children.”

A number of same sex couples that we spoke with in House of Catford said they didn't fear being robbed but did fear a homophobic attack. This suggests that the definition of community safety and the measures that are considered to improve safety should be broadened to incorporate all aspects and perceptions of safety.

Moving around

Here we asked Lewisham residents to share their preferred means of transport when commuting or moving around the district along with what could help enhance their travel experience.

In response to the question "How do you move around?" most consultees responded with a preference to walk or use public transport (bus and train). Responses suggest that 1 in 3 own a car and use it for their travel, with 1 in 5 relying on bicycles for their travels. One of the most common criticisms of neighbourhood travel we heard related to traffic and congestion, which for many is the first thing in their neighbourhood that needs improvement.

Some people pointed out the low frequency of buses in the south of the district and the need for more frequent train connections to the city centre.

We heard some safety concerns for both pedestrians and cyclists who feel discouraged in moving around in certain parts of the neighbourhood, particularly in the areas around the Central Area, where some have suggested the need for improvements to the current road layout, improved traffic light system when crossing roads along with improved cycle paths.

Overall, most people believe fewer cars would make the transportation experience much better.

Climate emergency

Two questions in the survey focused on the climate emergency. The section was introduced by the question "Did you know Lewisham has declared a climate emergency", which allowed the conversation to explore familiarity with this pledge, strength of feeling towards climate commitments and awareness of the ongoing actions taken by the Council.

The results made it possible to understand the impact of this problem, both on the personal and community spheres, exploring ways to address and raise awareness at a local level. In response to the question "How much do you care about this issue?", on a scale of 1 to 10 (with 1 being very little and 10 being very much), respondents indicated high levels of concern with an average score of 8.

Both the short and long-term consequences of a changing climate were highlighted. Among them, many people mentioned air pollution and all the consequences that this generates for people with existing health problems, such as asthma. Some have mentioned the mental health consequences, highlighting the anxiety and insecurity brought by climate change, particularly when thinking about future generations.

Some people talked about anticipating unexpected weather conditions as an obvious consequence of the climate emergency and expressed worry about facing unpredictable events such as floods or extreme heat along with overall long-term impacts on the planet. When asked to provide a way to address this problem at the neighbourhood level, 1 in 5 people believe that everyone should recycle more and not rely on plastic.

This feedback was followed by other lifestyle changes that people felt could make a difference which included using sustainable modes of transport (1 in 8) and changing eating habits (1 in 10). Some consultees highlighted how actions from a Council perspective, such as better and accessible communication, can raise awareness and consider this issue as a priority. Some respondents stated that this can influence the decisions of organisations in supporting sustainable practices, for instance by providing more green jobs.

A few women talked about expectations from the Council on better communications about climate change, explaining that they hoped for more information about what could be done and more information within communities suggesting pop-up stalls or mention of initiatives within regular communications.

“I think it's being addressed on a superficial level by the Council. They're not doing much on the ground. Would like to know more about what can be done. The targets and ambitions seem unrealistic.”

One woman went on to explain that she felt the Council is trusted and in a strong position of authority and that they should capitalise on this to explain what individuals can do to support the effort. She noted that the recent mailer about solar panels didn't really work and many of her friends and neighbours actually thought it was a 'scam' She explained that if the Council had explained the rationale for choosing this partner and detailed the benefits of the scheme more clearly more people would have been willing to consider the offer.

“The Council should have explained this better. They should send us information about what solar panels are, what types are available and why it helps. They should explain why they chose the preferred supplier and reassure residents about the offer. People need to be educated about it otherwise it looks like a scam.”

Shape the future of your local area

Lewisham Council has a role in shaping the places we live. A new Local Plan is being prepared to shape Lewisham to 2040. We want local voices to be heard in this vision, especially those people who haven't shared views already. Please take a moment to answer a few questions that will help us better understand what's important to you and your local area.

1. Have you participated in public consultation on the draft new Local Plan before?
 Yes
 No

Let's talk about your neighbourhood - the area where you live

2. Do you live in Lewisham?
 Yes
 No
3. Which area best describes where you live?
 Central: Catford, Hither Green and Lewisham
 East: Blackheath, Grove Park and Lee
 North: Deptford, North Deptford and New Cross
 South: Bellingham, Downham and Bell Green
 West: Brockley, Crofton Park, Forest Hill, Honor Oak, Ladywell, Telegraph Hill and

Sydenham

4. What's your connection to the local area?
 Live here
 Work here
 Study here
 Go to school here
 Visit here

Let's talk about living in your neighbourhood. Thinking about the place and how you feel about living here.

5. What do you like?
 free text
6. What don't you like?
 free text
7. Is there anything about your neighbourhood that you think needs to be improved?

free text

8. How safe do you feel in your neighbourhood?
1 - 10 (*one feels very unsafe, ten feels very safe*)

Let's talk about the time you spend in your neighbourhood.

9. Do you visit your local town centre often?

Yes

No

10. If yes, what do you go there for?

free text

11. If not, why don't you spend time there?

free text

12. What is your favourite thing to do outdoors?

free text

13. Is it easy to do this near your home?

free text

14. Do you visit local parks and open spaces?

free text

15. What do you like about local parks and open spaces?

free text

16. Is there anything about the local parks and open spaces that could be improved?

free text

What is important when you think about home?

17. If you could live in a perfect home, what would it have or look like?

free text

18. If you could improve your current home, what would you do?

free text

We'd like to know how you get around.

19. How do you get around?

Walk

- Cycle
- Car
- Bus
- Train
- Other, please explain

20. What would improve or make your journeys easier?
 free text

Lewisham has declared a climate emergency.

21. Do you know what this means?
 Yes
 No

22. How much does this matter to you?
1 - 10 (*one doesn't matter to me, ten it is very important to me*)

23. How does climate change affect you?
 free text

24. What do you think the people in your neighbourhood could do to address climate change?
