Grove Park Neighbourhood Forum	3	LEA Figure 16.2	In the previous table, objective 6 as well as clause D of policy LEA1 it states that Baring Road will also be transformed into a healthy street. This is not reflected in the map on Fig 16.2..	<p>Noted. The Healthy Streets Approach is intended to apply to all streets, in accordance with the London Plan. The East Area section makes clear the Healthy Streets Approach will be advocated on the A2212.</p> <p>Fig 16.2 does not highlight all streets which have been identified as a focus for the Healthy Streets Approach, rather it reflects on those streets which are 'growth corridors' identified in the spatial strategy Policy OL1 - the A2212 road is not such a corridor.</p>	No change.
Grove Park Neighbourhood Forum	3	LEA Figure 16.2	Amend Fig 16.2 to include the Grove Park Town Centre as a healthy street, as part of the redevelopment of the centre	<p>Noted. The Healthy Streets Approach is intended to apply to all streets, in accordance with the London Plan.</p> <p>Fig 16.2 does not highlight all streets which have been identified as a focus for the Healthy Streets Approach, rather it reflects on those streets which are essential to the delivery of the spatial strategy.</p>	No change.

Grove Park Neighbourhood Forum	3	LEA Figure 16.2	This area is about enhancing the Green Infrastructure Links, and therefore the map should better communicate this, by mapping all the key parks, MOL, and GI.	Noted. A balance needs to be struck regarding the clarity of the diagram and an excess of information. We have grey-scaled the base map in order to highlight the key principles for the sub area.	Local Plan amended to ensure the base map has all key open spaces illustrated.
Lee Forum	3	LEA	Lee Green specific 3. We request that the council conduct a Detailed Area Strategy SPD for Lee Green to provide more detailed guidance about how policies in the Local Plan will apply for the Lee Green district centre as a matter of urgency. With three large site allocations at a congested and polluted junction in Lee Green it's essential that transport, infrastructure, public realm and design are planned for holistically, not in a piecemeal fashion.	Noted. The preparation of SPDs is outside the scope of the Local Plan and the current consultation. We note the request and will give this due consideration. There are many areas across the Borough where significant growth is expected. Preparing SPDs for all of them will be challenging given the Council's budget pressures and current resources.	No change.
Lee Forum	3	LEA Site allocations	Lee Green specific 4. Since the three large site allocations at Lee Green significantly increase height and density in the area, quality of design is essential. The site allocations should include much more detailed design guidance around how to build sensitively in a heritage rich, conservation area recommended area, including e.g. step downs in height to respect local heritage, maximum heights, appropriate materials, massing and articulation.	Noted. The draft Local Plan policies in the Part 2 Sections on High Quality Design and Heritage must be read together with the site allocations. The Local Plan is a strategic document and the Council needs to carefully consider the level of detail provided for sub-areas and site allocations. A more granular approach to site design could be prepared through the neighbourhood planning process.	No change.
Lee Forum	3	LEA	Lee Green specific 7. Lee Green is poorly served for bus routes to Greenwich Peninsula and Greenwich village. A local consultation has been carried out and found that should such routes be put on that many more people would choose to take the bus rather than drive there, improving active travel. We would like to see the aspiration of these two bus routes included specifically in the Lee Green section of the plan.	Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan. Specific contributions to transport, including local bus routes etc. will be negotiated through S106 agreements with the developer. The Council will continue to work with and lobby the London Mayor and Transport for London for improvements to bus services.	No change.
Lee Forum	3	LEA Section 06	Lee Green specific 8. Lee Green is unusually rich in heritage. We suspect this point can get forgotten because it's heritage is split between two boroughs, both of which hold separate lists of Lee Green's heritage. We therefore request that this rich heritage is recorded holistically and clearly in the local plan so that developers might plainly see it. Specifically please show on the map the locally and nationally listed buildings shown here. <i>Officer note: Representation includes a map of heritage assets.</i> Please also mention that most of Lee Green has already undergone a conservation area assessment by [name removed], the Mayor or London's heritage officer, and include a link to his recommended conservation area boundaries in the local plan, which can be found here .	Noted. Planning policies within the Local Plan only cover areas within the Lewisham borough boundary. However, the Council has been liaising with the Royal Borough of Greenwich to inform the preparation of the Local Plan and fulfil its statutory Duty to Cooperate. The draft Local Plan Part 2 policies on Heritage seek to ensure that development proposals preserve and enhance the significance of heritage assets, and require applications to submit a Heritage Statement. The level of detail and cross boundary nature of the heritage assets could be captured in the emerging neighbourhood plan for the area.	No change.
Lee Forum	3	LEA	We support the key spatial objectives on page 635 but it is unclear how they are to be translated into reality when development takes place.	Noted. The spatial objectives are expanded on in the subsequent place principle policies for the East sub-	No change.

				area, which will be used to assess planning applications.	
Lee Forum	3	LEA	Almost the entire row of buildings on north side of Eltham Road and Lee High Road and up Lee Road in Lewisham and Greenwich are locally listed with Lewisham and Greenwich councils. Two buildings are Nationally Listed Grade II (The Fire Station and Old Police Station) The entire Lee Green town centre, excluding Sainsburys, Penfolds and Leegate, was recommended to become a conservation area by (name removed) in 2019 , highly respected heritage advisor to the Mayor of London (see his Seven South London Town Centres Heritage Report). Lee Neighbourhood Plan echoes this and the policy has been highly popular at public consultation. This information should all be repeated in Lewisham's Local Plan	Noted. The draft Local Plan Part 2 policies on Heritage seek to ensure that development proposals preserve and enhance the significance of heritage assets, and require applications to submit a Heritage Statement.	Local Plan amended to refer to historic character of Lee Green in East sub-area section on Context and Character.
Lee Forum	3	LEA	On a scale of 1-6 Lee Green has a relatively low Public Transport Accessibility Level of 3. It is cut into four quarters by polluted and congested A and B roads. It is not close to a train station and no proposals for transport improvements have come forward.	Noted. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The Council's Local Implementation Plan (LIP) sets out further information on local area projects and investment to support the London Mayor's Transport Strategy.	No change.
Lee Forum	3	LEA	Lee Green is not identified as an area for intensification in Lewisham's Local Plan and for that reason none of Lewisham's planned Infrastructure Levy spending is planned for Lee Green. Lee Green is not allocated any spending for new schools for example, despite the proposed Leegate having over 450 units it and Lee Green having several more large site allocations in it. 450 housing units is more than the Leybridge Estate has. Yet when the Leybridge Estate was built Brindishe Lee was built to educate its children. By what mechanism can we expect Lee Green's infrastructure to be improved to accommodate the several thousand new residents planned for Lee Green?	Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan. Specific contributions to local areas will also be negotiated through S106 agreements.	No change.
Lee Forum	3	LEA	We've no doubt developers will try to say that distinct and well designed tall buildings can support place making, act as focal buildings that support legibility and wayfinding and contribute to the character and identity of new quarters. Saying it doesn't make it so: There is no evidence people are struggling to find their way around Lee Green or that Lee Green is not already rich in character.	The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
Lee Forum	3	LEA Site allocations	Sites 3 to 7 are in within the Lee Forum boundary and the descriptions for these site allocations need to align with the Lee Neighbourhood Plan site allocations. If not, developers will not know which one to follow. Whilst there is a good deal of commonality they are not exactly matched. We ask the Council to adopt the Lee Forum site allocations as it is to be submitted shortly, once Lee Forum is redesignated, as there are key elements missing from the council's site allocations which have already been	Noted. Neighbourhood plans are required to be consistent with the strategic policies set out in the Local Plan. Neighbourhood plans can provide policies and guidance which are additional to those set out in the Local Plan. In preparing the draft Local Plan the Council has had regard to the Lee Neighbourhood plan.	No change.

			approved locally through advanced consultation. The Lee Neighbourhood plan is now close to adoption.		
Lee Forum	3	LEA IDP	Lee Green specific 5. Lewisham's (2015) Infrastructure Delivery Plan is included in the evidence base of its local plan. It states that Lee Green's population is expected to grow by 670 people by 2033. For this reason no infrastructure improvements are planned for Lee Green. Yet its estimated Galliards proposal of 630 new homes will bring around 1700 new residents and the other 4 site allocations in Lee Green will bring an estimated 6000 new residents. The non site allocation but large Eurocar site on Lee High Road is currently preparing to make an application to build new housing as will other sites in Lee Green. Bringing non site allocation and site allocation development together, it's estimated Lee Green's population may increase by 7000 people during the life of the plan. The Local Plan says The IDP will be subject to regular review and updating over the plan period. We request that a promise of this be reiterated in the Lee Green section of the plan to reassure the community given that the current IDP is particularly out of date as regards Lee Green.	Noted. Following the Regulation 18 consultation, the Infrastructure Delivery Plan has been revised to include the latest GLA population projections on a ward by ward basis. The Council has engaged with key stakeholders to consider the updated projects and input into the IDP, where appropriate.	Infrastructure Delivery Plan amended to include latest GLA population projections, and project lists updated to take account of these, where appropriate.
Lee Manor Society	3	LEA QD 04	An important driver of the plan is the council's desire to provide sufficient housing and the need to meet the London mayor's plan housing targets. This can conflict with local character which is for low-to-medium rise buildings in many parts of the borough. Approvals for tall buildings up to 30 or 35 storeys in central Lewisham have created canyons and overshadowing in the town centre and an unattractive street-level atmosphere. We do not want to see this approach extended to other parts of the borough – our specific concern is with the Leegate redevelopment – where it is even less appropriate with a proposed 15 storey 'signature' building overwhelming the modest crossroads. Many high-rise developments of the 1960s (rising to much less than 30 storeys) proved unsuitable for family occupation and – just 60 years on – are being demolished. We note that Robert Jenrick, secretary of state for housing, has issued a direction regarding Policy D9 Tall Buildings to ensure such developments are only brought forward in appropriate and clearly defined areas.	Noted. The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document. The London Plan includes detailed design requirements for tall buildings, which the draft Local Plan proposes to take forward along with additional local requirements.	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
Lee Manor Society	3	LEA	East Area It should be made clearer that the proposals are aspirational because there is already widespread concern that the plans are already agreed.	Noted. The purpose of the Local Plan and the process for preparing the plan is set out clearly within Part 1 of the Main Issues and Preferred Approaches document.	No change.
Lee Manor Society	3	LEA	Lee Green. The Plan recognises that this, one of the smallest district centres, has poor quality public realm and is dominated by busy roads and a busy road junction. It speaks of a hope that the proposed redevelopment of Leegate could provide 'a catalyst for renewal, making Lee Green vibrant, more welcoming and accessible.' (p633 para 16.7). It speaks of addressing 'the dominance of vehicular traffic at the main junction.' (p635). It is difficult for us to see how traffic can be much reduced at the junction even if London-wide proposals for Low Traffic Neighbourhoods are pursued. The Eltham Road/Lee High Road corridor will	Noted. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The Healthy Streets Approach is established by the London Plan and includes a wide range of measures and interventions, the specific nature of which will be considered on a case-by-case basis. The Council will	No change.

			<p>remain busy. It is not clear in the Plan to see how these roads could be transformed into 'healthy streets.'</p> <p>The answer, we suggest, is to move the traffic-free hub of Lee Green some 50 yards to the south combining public space in a redeveloped Leegate with a redeveloped Sainsbury's site on the west side of Burnt Ash Road. The latter should also include a decently sized public square with expanded pedestrian links further west to Brightfield Road and Hedgley Street. (p658 et seq.). The design and potential height of the development needs to be handled sensitively because the site abuts the Lee Manor Conservation Area immediately to the west. This would leave the north side of the Lee Green junction (p659) cut off from the south. But a public path/square running alongside the river Quaggy on the car salesroom site and a public space on Osborn Terrace overlooking the Quaggy to the east of Lee Road (requiring cooperation with Greenwich borough) would go some way to pedestrianizing the north side and re-integrating the two sides of Lee Green. We support the Plan's proposal for mixed use, including housing, on the car showroom site and improvements in access to the Quaggy. Unfortunately extending a path along the Quaggy as far as Lee Road will need creative solutions because the Lee Road shops run right up the bank of the river.</p>	<p>continue to work with and lobby Transport for London to deliver investment in support of this approach.</p> <p>The site allocations for the Lee Green centre sets out requirements for public realm and access improvements, which will be considered through the site masterplanning process.</p> <p>These comments will be forwarded to colleagues within the Council's Highways service.</p>	
Lewisham Cyclists	3	LEA Key spatial objectives	<p>Page 635 Key Spatial Objective 6 in the main document refers to</p> <p>"transform the South Circular (A205, Baring Road) and Lee High Road (A20) into a Healthy Street". We would suggest the wording of this is altered to "adopt the healthy streets approach along the A205, Baring road and A20 corridor" and encourage the planning team to follow TfL guidance on this which is clear and unequivocal. This should also form part of the strategic planning document for the whole corridor, and form conditions of planning along the corridor, including CIL contributions to part fund improvements.</p>	<p>Noted. Planning conditions attached to consents will be determined on a case-by-case basis. These are outside the scope of the Local Plan.</p>	<p>Terminology for Healthy Streets Approach amended as suggested.</p> <p>Local Plan amended to refer to London Cycle Design Standards.</p>
Lewisham Liberal Democrats	3	LEA	<p>Lib Dem response to Lewisham Local Plan (with specific reference to the East area)</p> <p>The Lewisham Local plan is fundamentally a plan to build more housing, with aspirations to improve retail outlets, enhance the environment (including access to the Quaggy), protect (but not increase) green spaces and to offer community /cultural /work spaces so that more facilities are provided locally. In order to produce a healthier, safer environment for us all, it also promotes cycling and walking, wants to improve the areas around train stations, and proposes to create 'healthy streets'.</p>	<p>Noted.</p>	<p>No change.</p>
Lewisham Liberal Democrats	3	LEA	<ul style="list-style-type: none"> Two of the buildings in the borough which are going to be demolished and replaced by residential accommodation are a hostel and a respite centre. What alternative arrangements are being made for their clients? 	<p>Unclear which buildings are being referred. Current planning applications are outside the scope of the Local Plan. The draft Local Plan sets out requirements dealing with re-provision of specialist accommodation.</p>	<p>No change.</p>
Lewisham Liberal Democrats	3	LEA	<ul style="list-style-type: none"> We are told that 'Blackheath Village district centre will build on its unique qualities as a visitor destination with a vibrant night time economy', 	<p>Noted. Blackheath's designation as a District Centre has been carried forward from the adopted Local Plan and assessed against a defined set of criteria. Its</p>	<p>No change</p>

			but have residents been asked whether or not they would like this increase in footfall and noise at night?	<p>designation as a night time economy area 'of more than local significance' is established by the London Plan. The suitability of appropriate uses within the town centre will be assessed against relevant Local Plan policies.</p> <p>Both the adopted and draft Local Plan include policies dealing with the protection of local amenity.</p>	
3	LEA Leegate	The thought of Sainsbury's and the BMW site being developed to be part of the high rise development just adds to the existing issues.	<p>Noted. The indicative site capacities are not predicated on high rise development. They have been set using a standard methodology, which is in line with that used in the London Plan Strategic Housing Land Availability Assessment. Further details are set out in the Council's Site Allocations Background Paper.</p> <p>The site capacities will however represent a step change in density from the existing character. The Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p>	No change.	
3	LEA Leegate	The London Plan and Lewisham's response are quite clear that Lee Green should not qualify as a Tall Building area. There is no evidence to change this.	The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA Leegate	Local residents and trades people are fully aware that the Lee High Road is heavily congested and polluted for large parts of the day and significant junctions such as Lee Road/Burnt Ash Road are heavily over used. This has of course been exacerbated by the introduction of the Low Traffic Neighbourhood. To build along the routes seems to be a folly: it will create homes in the air that are less polluted but their tenants will contribute, towards making those on a lower level even more polluted than they are now.	<p>Noted. Low Traffic Neighbourhoods are outside the scope of the Local Plan.</p> <p>Your comments will be forwarded to colleagues in the Council's Highways service.</p>	No change.	
3	LEA Leegate	Part of any plan should look at the refurbishment of the accommodation between Lee crossroads and Lewisham. The properties are already poor and will be made worse	Noted. The nature of this comment is too detailed for a strategic policy document.	No change.	
3	LEA Leegate	It was interesting to read the logic behind the building of Brindishe Lee School which clearly failed because of the size of the catchment area. This proposed development will need a new school on the same side of the road. With the increased intensity of traffic it would be un reasonable to ask families to cross the main roads.	Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.	No change.	
3	LEA Leegate	The plans need far more detail to be taken seriously. We need to be able to see the reality of proper infrastructure: Schools, play space, leisure facilities, Medical provision (GP, health centres, chemists etc.)	Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate	No change.	

				the level of growth anticipated through the Local Plan.	
	3	LEA	<p>I note the vision in the various documents about the Plan.</p> <p>REVIVING HIGH STREETS Lee Green will once again become a focus for community activity and the shops and commercial space will be enhanced to serve the local neighbourhood. Leegate Shopping Centre and other town centre sites will deliver new genuinely affordable homes and workspace. Reducing the dominance of vehicle traffic at the main junction, will allow further improvements to public space in the town centre.</p> <p>Re-establish Lee Green district centre as a welcoming and thriving hub of commercial and community activity. Deliver public realm improvements and high quality, mixed-use developments through the renewal of Leegate Shopping Centre and other town centre sites. Address the dominance of vehicular traffic at the centre's main junction.</p> <p>I like the sound of the vision</p>	Noted	No change.
London Wildlife Trust	3	LEA 01	We support these principles, especially in respects of Parts J and L.	Support noted.	No change.
	3	LEA 01	<p>States there will be "intensification of sites.....on Baring Road from Grove Park Station to Heather Road/Bramdean Crescent</p> <p>There needs to be clarity regarding which sites would be deemed appropriate for intensification as these are not highlighted under site allocations and there is no way of scrutinising the intentions behind this principle or determining its consequences.</p> <p>This stretch of Baring Road includes some extremely important local facilities and buildings including: Ringway Community Centre and gardens. The Ringway Centre, gardens including the wooded area should be better protected from development. The gardens need to be recognised as community gardens. The historical importance of the house at the Ringway Centre as a base for activism against inappropriate development in London should be noted and the house locally listed. If the proposed road structure had not been defeated there would have been significant impacts on communities and neighbourhoods along the proposed route. The campaign reflected an era dominated by the car and large road infrastructure projects taking precedence which is in direct opposition to current thinking and of interest in the development of public attitudes and political direction. Please see: https://www.roads.org.uk/ringways Napier House TA Centre. Napier House should be locally listed and protected against inappropriate development.</p>	<p>The Local Listing process is outside the scope of the Local Plan. Buildings can be nominated for Local Listing however. Please see the council website for details.</p> <p>The Local Plan provides policies to protect open space and biodiversity sites. The intensification along strategic corridors refers to brownfield / previously developed land, not open space and ancillary facilities.</p>	Local Plan amended to provide clarification on approach to intensification within this area.

			<p>This general principle of intensification could see sections of housing demolished to create inappropriate higher/denser development - especially close to the Grove Park Local Centre this could seriously affect the open 'village' feel and give a sense of enclosure.</p>		
3	LEA 01	<p>LEA1 - A c) p637 and p653 - 656 I agree the Lee Green Centre needs support. The carpark site needs regeneration.</p> <p>However, the car cleaning business is really important for the area and well used. This should remain in some form or another and I'd like to see this business and the people it employs protected as a regular visitor to the car wash site.</p> <p>The Yoga House London Studio is important for the local area and one I use - how will Lewisham protect or offer an alternative site for the yoga space if the centre undergoes renovation. Will it still have the same rent if a new building is placed on that site? Will the rent be controlled for a long period of time to ensure that the studio isn't pushed out of the area by rising/recoupment of building costs?</p> <p>Will the same be true for the Faction Bookshop and Rhubarb and Custard Cafe? As these are key things I and other local residents want to keep not to be displaced in the Local Area Plan. How will Lewisham Council partner and preserve these key businesses for our local area?</p> <p>How far will the renovations on this site go? Will they stretch as far as the row of shops on Burnt Ash Road (Leegate House)? As this is where I do my weekly shop in the SWOP market. This is a key aspect of my day-to-day life it has a huge positive impact on Lewisham (the shop owners won the Mayor's Enterprise Award) and on the environment, reducing my carbon footprint through reducing the plastic I use. Arts Network is also a great local charity and there is a grocer that supplies SWOP. Will these sites be protected/supported as above? Could the grocers be expanded to provide plastic free fruit and veg (so missing from the area? Could there be a space for a weekend market? (The local pizza van at Hither Green Station could come, as could the German Sausage van if it could be spared from Lewisham market one day!) This would be such a huge improvement for the local community. Could the wetherspoons be kept in some way but given a new modern and outdoor space?</p> <p>D p637 I agree with the improvement of the roads including the A205 and A20.</p> <p>Flower Pots</p>	<p>Any future application for Leegate will include non-residential floorspace and a re-location strategy for the existing businesses. The Council's Economic Development team will be heavily involved in this process and will seek to retain as many viable local businesses as possible.</p> <p>Flower pots are outside the scope of the Local Plan but we will pass your comments on to the Transport team.</p> <p>With regard to the suggested road improvements we will pass your comments on to the Transport team.</p>	No change.	

However, I am concerned about approaches to these. The introduction of flower pots across South East London has made driving incredibly difficult for me and has increased the pollution my car has given out. I have the smallest car and engine possible and only use the car when I have to, but with friends in Peckham, Herne Hill and Brixton the alternative is three lots of public transport and a journey exceeding an hour and a half rather than a 20-minute car journey. The layering of flower pots on flower pots has made it so incredibly difficult and a labyrinthine approach to getting to even my most simple of drives.

To give one particularly horrific example, I had a recent cancer scare where I had to drive to Lewisham Hospital to get a scan. The journey should have lasted 12 minutes. It lasted an hour and a half and I was late for my scan. You can imagine the mental strain of having to do that alone in a pandemic, regardless. Add blocked off roads around Manor Park which meant I couldn't get through to Lewisham High Street to get to the hospital as each way I turned was blocked off. Add turning back to go down the South Circular to try going that way to find back-to-back traffic all the way passed Lee station back to the South Circular and all the way to Hither Green Lane. And then add all the closures on Hither Green Lane to Lewisham High Street. I have never been so stressed in all my life. I am pro-environment but the emissions and traffic I have seen every day show this is not working. This is more likely to drive me out of London than stop me using my small, energy efficient car to make journeys I can't make by ill-connecting cross-town South London public transport.

Burnt Ash Hill / South Circular

The crossing at Burnt Ash Hill where it intersects the South Circular is incredibly dangerous.

When I moved here there were no traffic lights or place for pedestrians to cross. There are now traffic lights but these have caused additional dangers to crossing the road safely.

1) If crossing to go towards Lee Station down Burnt Ash Hill, the lights never turn green across the whole road. This means as a pedestrian, in order to not spend a large amount of time waiting at the crossing most people run in the shortest of spaces between the lights changing or when only one lane is turning round the corner from BAH onto the A205. This is incredibly dangerous and more often than not people get caught out. The lights need to be green for pedestrians to cross the whole of the South Circular not just half of it at the time.

2) The area in the middle has been given a lip of concrete which is a serious trip hazard as no-one follows the path laid out by the initial improvements apart from prams. It's just not human behaviour. This way you have lots of people walking over a three inch plus lip every day, often in a hurry to catch the brief moment they can run across the road in one go. It's dangerous.

			<p>3) The staggered traffic light on the corner of BAH and A205 (I'd say North East?) actually makes it more dangerous for people to cross. If you'd previously been running across while the light was red for the cars on the South Circular now you have the added complication of the cars that would be turning from BAH getting stuck at that staggered traffic light. So now you are stuck between cars stopping for the traffic light, oncoming traffic from BAH while trying to run quickly before the light changes. It's a nightmare.</p> <p>All of this could be avoided by sending someone to see how local people use the crossing at peak morning, evening and an off-peak time before putting in these changes. It is no less dangerous to cross this road now, it's just dangerous in different ways caused by the improvements. I'd also say that during lockdown, I've made less and less of an effort to go down Lee High Street. This is 1) because of the high levels of active begging outside of the Coop and 2) because of the dangerous crossing.</p> <p>F, G & H - I'm a frequent visitor and orderer of Brockley Brewery on the Chiltonian Estate. It has a taproom which is tucked away and underused in the middle of an industrial estate. This seems like such a waste in terms of footfall to the site. In my mind, the garage owned by Travis Perkins on the corner of Holme Lacey and Burnt Ash Hill Road would be much better purposed as a public-facing brewery opposite Lee Station or a multi-purpose site with a Brockley Brewery and other bars/shops/butchers/greengrocers than it will ever be as an extension of Travis Perkins' timber yard (which already has an entrance less than 5 mins walk from BAH). Imagine the increased business, jobs and look of the area of a local brewery with a high street facing taproom than an extended entrance to a specialist merchant site that not many local people use. This is a local business that is underutilised and known about. It could do with some council support and a better site.</p> <p>BAH crossing in front of Sainsburys. It is difficult to access the shops on Burnt Ash Hill and Lee Gate House. There is a crossing at the crossroads (but not much there) and a crossing at the corner of the Sainsbury's and the wetherspoons but many people try to cross the road right in the middle from the Sainsburys exit to the SWOP shop. It would be much easier to cross safely if a pelican crossing was put there or the crossing across BAH was moved further down BAH to opposite the Sainsbury's.</p>		
Blackheath Society no 2	3	LEA 01	<p>LEA1 East Area place principles. The mixing of statement of general principles and application of principles to specific centres is unclear, scattered and confusing. As a result, no clear, coherent and unique vision for each centre emerges. See specific comments below for how this affects the Blackheath District town centre.</p>	<p>Noted. Lewisham's East Area comprises of Blackheath, Lee and Grove Park and as such the vision and policies for the area straddles these three areas. Nevertheless there are a number of references to the spatial qualities of Blackheath and specific place</p>	<p>No change.</p>

				policies relating to preserving and enhancing the distinctive qualities of Blackheath Village.	
Blackheath Society no 2	3	LEA 01	We see LEA1 East area principles B, C and H as crucial to preserving and enhancing the wider setting of Blackheath, but are disappointed that there is no mention of reducing the traffic problems of the area that impinge on the walking and cycle environment and public realm, as mentioned specifically in D in relation to the A205, Baring Road and Lee High Road in the Lee neighbourhood.	Noted. The borough-wide policies address reducing car use and public realm enhancements.	No change.
Grove Park Neighbourhood Forum	3	LEA 01	Clause M of Policy LEA1. Typo, refers to north area, but should read East Area.	Noted.	Point M has been deleted as a repetition from points covered elsewhere.
Lee Manor Society	3	LEA 01 LEA 02	Suggestions are made in the Plan to 'naturalise the Quaggy river'. We support this idea but wonder how it can be achieved in the built-up townscape along its path in Lee. (p639 -L and 640 -F). Public space, as suggested above, at the car showroom site and Osborn Terrace could include more natural banks to the river.	Noted. Whilst river naturalisation, and particularly deculverting, may be difficult to achieve in some areas the Local Plan ambitions and policies will be the starting point for discussions with developers. Where the Council considers that river enhancements can be feasibly delivered, requirements have been set out in the site allocation policies.	No change.
Lee Manor Society	3	LEA 01	The Plan suggests a more prominent role for what it calls the Burnt Ash local centre . We assume this to mean the shopping parades to the west of Burnt Ash Road between Southbrook Road and the railway line and to the east of Burnt Ash Hill between the railway line and Our Lady of Lourdes Catholic church. The shops on the Burnt Ash Hill side have a run-down appearance, narrow pavements and unnecessary 'anti-pedestrian' railings at some points. We welcome any attempt to improve this area which includes the approaches to Lee station.	Noted.	No change.
Lewisham Cyclists	3	LEA 01	LEA1 East Area place principles; In order for the council to meet Policy TR3 in the East area, LEA1 sections D, G and K need to state the requirement for public realm to be provided with the Healthy Street approach adopted throughout the corridor from Blackheath Village, via Lee Road, through Lee Green junction, along Burnt Ash Road and Baring Road up to and including Grove Park town centre.	Noted.	Local Plan supporting text amended to strengthen and make clear this objective in terms of implementing the Healthy Streets Approach.
London Wildlife Trust	3	LEA 02	We support this policy in respect of Part F.	Support noted.	No change.
	3	LEA 02	LEE GREEN ROPOSED DEVELOPMENT: It seems to me that Lewisham needs to take a look at what Greenwich is doing: only building eco-friendly homes; structuring the new builds taking into account the local environment - green spaces/ trees/ etc. Looking at the result of Lewisham's building policy around and near the station, nothing could be more hideous, less people-friendly or less environmentally responsible. You are at the moment creating the slums of the future. I know you are instructed to build x-number of homes but you have to find far more innovative & creative ways to do so. It's your job to do so.	Noted. The draft Local Plan is considered to set out a positive strategy for managing future growth and development across the Borough, consistent with the Good Growth policies set out in the London Plan, and the principles of sustainable development set out in national planning policy. The draft Local Plan introduces a significant step-change from the adopted Local Plan on policy approaches across a number of policy areas such as design quality, climate change mitigation and adaptation, and sustainable transport.	No change.
	3	LEA 02	Dear Sir/madam	Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to	No change.

			<p>I am appalled at the changes suggested at Leegate. 15 stories for the tower blocks is too high in a residential area such as Lee where we suffer from daily traffic jams. What's more what are you thinking of at the plans to build further tower blocks on the Sainsbury site and the garage space on Lee high Rd. - another heavily congested area. All this building, if it happens will add to the very poor air quality in the area, second only to Greenwich as being one of the most polluted areas in the country.</p>	<p>express their views on the scheme through the Development Management process.</p>	
3	LEA 02	<p>We write with reference to the planned development at LeeGate.</p> <p>We are very concerned to see the density and sheer amount of housing that is planned for this area by Galliard homes.</p> <p>We are very concerned at the proposed height of these blocks and tight density of the buildings in this area. We think this will have a negative impact on the aesthetics of the local area. We cannot understand how Lewisham Council can sanction this when there is no existing building at this height around locally.</p> <p>We are extremely concerned about the prospect of more housing in this area without the needed infrastructure to support an increase in the local population, medical needs and education to begin with.</p> <p>We are also very concerned at the impact this would have on the local traffic situation, which is already diabolical, in light of so many of the local roads being closed off.</p> <p>We would like these plans to be withdrawn and reconsidered. Also for them to be put out for proper public consultation so that as local residents we are consulted properly. We believe that any new housing must not exceed that of the existing flats in this area. We also feel there needs to be much work done to improve the infrastructure of the area.</p> <p>We wish to be kept updated with all developments with this proposal.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The Local Plan consultation is being carried out in accordance with the Council's adopted Statement of Community Involvement (SCI).</p>	<p>No change.</p>	
3	LEA 02	<p>I welcome the proposal to develop Lee Green.</p> <p>However, the plans are not appropriate for the area for the following reasons</p> <ul style="list-style-type: none"> - the height of the proposed buildings is not in keeping with the area - road traffic will only get worse. Eltham road is already congested and the size of the proposed development would make this worse <p>I would also like to reiterate the importance of having local shops on the ground floor of the proposed developments.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Lee Gate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The draft Local Plan site allocations for the Lee Green centre seek to ensure that for mixed-use developments main town centre uses are retained or re-provided at the ground floor level.</p>	<p>No change.</p>	

			The area needs amenities. A large supermarket with parking access also needs to be maintained		
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I have read the plans for Lee Green and surrounding area and would like to express my absolute objection to what is being proposed. My reasons are as follows.</p> <p>I totally disagree with the height of the buildings on the plans. Lee agreed is a small community area and should not become dominated by such huge buildings that will</p> <p>Have very densely populated accommodation. They are way too high and it would totally block out the sky line and make the area very overpowered by huge buildings.</p> <p>It totally unsuitable for such a small area. I understand the need for increased b b housing in London , but this has to be balanced with sensible developments that do not impact negatively on people’s lives.</p> <p>The proposal stated 450 more housing units. How is the local area going to cope with such an increase? With not enough amenities to meet the needs of all the people who would then be living there. Where are the schools and doctor surgeries that Would be needed to accommodate all these new residents.</p> <p>Increase in through traffic to an already car heavy main road. This would be Unsustainable if you introduce more residence on that scale into the area. There has been no local consultation People who live here were fully involved. Last time when St. Modwen were proposing new buildings for the Lee gate space. All local residents must be consulted, I live very close to the proposed site and this</p> <p>Will affect my life hugely.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within the Local Plan we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am shocked to learn that Lewisham Council might approve the plan proposed by Galliard Homes for Leegate. This plan includes 15-torey high blocks. This is a monstrous development for Lee Green, if allowed by Lewisham Council. The highest building currently in Lee Green is 10-storey. What about schools and medical services for such a development? Don’t children and families in this proposed development need such services?</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>As a resident of Lee Green, I was very very concerned to see the new proposals relating to Leegate. Whilst there are some positive aspects to the plans - particularly the ‘green’ aspects of the proposals and the plans for public spaces - there are several other elements that will be severely damaging to the local area. My main concerns are:</p> <p>1. The height of the proposed buildings. The illustrations of the development illustrate very graphically how out-of-keeping the buildings will be with the rest of the area. The nearest tall buildings are I believe 10 storeys high - I feel</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	

			<p>very strongly that this new development should not be allowed to exceed that height.</p> <p>2. Related to this, the proposed increase in the amount of accommodation will add a very large population to the locality and it is not clear how this will be assimilated by local services (such as health, education and transport).</p> <p>3. The document has reassuring words about limiting the amount of parking, but it seems very clear that adding such a large increase to the population of the area, will inevitably lead to a large increase in the number of cars on the roads locally and can only add to the already overwhelmed traffic lights at Lee Green - particularly at a time when the Council have introduced a LTN locally in an attempt to deal with the large volumes of traffic going through the area.</p> <p>Whilst there is an urgent need to address the situation on the site at Lee Green, I hope the Council will ensure that these grotesque proposals do not proceed in their present form.</p>		
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I object to the proposed plan which is too ambitious and will ruin the identity of Lee green and ignores the listed buildings and dwarfs them impacting on the light for current residents.</p> <p>The density is a concern there already has been too much development putting demand for the local infrastructure and this plan will triple it.</p> <p>The proposed plan for building so high will ruin the sky line.</p> <p>The 15 storey high is exceeding maximum local height by 37%. This must be reduced and kept in line. 450 homes is far too high this needs to be reduced to at least 250 and 75% help to buy or similar. Young working people are struggling to buy homes this needs to be addressed. I oppose the current plan and will be taking this further.</p>	Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am writing to express my concerns on the proposed development of leegate by galliard homes.</p> <p>I am concerned about over development, density and the impact on infrastructure and services namely Lewisham hospital which is already over stretched and under resourced and would like to know how Galliard homes propose to mitigate against this with the increase of people in the area?</p>	Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I live at SE12 OPH I and many others believe you should add a Lidl and 1 fast food restaurant or cinema to make it better maybe a VUE cinema or Mac Donald fast food restaurant. A Lidl will be much appreciated.</p>	Noted. The draft Local Plan makes provision for a wide range commercial uses to locate within town and local centres, including supermarkets and restaurants. However, the plan cannot make requirements for particular businesses or commercial operators.	No change.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>If Lewisham Council had the gumption, and it must be said the money given the way central government has starved local authorities, it would have compulsorily purchased this site (if it does not already own it) and built what the area actually needs - a decent state secondary school - either to</p>	Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change.	

		<p>replace or extend nearby Trinity, which has to do its best on an entirely inadequate site in nearby Taunton Road.</p> <p>The proposed redevelopment exists solely to meet targets and make money for the council and developer. It shows no consideration for the local community, who will be negatively impacted.</p> <p>I have seen the proposed development by Galliard of the Leegate Centre site.</p> <p>Whilst the decrepit, redundant Leegate Centre should have been replaced many years ago, it must not under any circumstances be with this development. It is completely out of scale with the surrounding area, and will bring the soulless banlieues of Lewisham Way to a new outpost on the Lee High Road, where once established, we can expect a multiplier effect with similar proposals for the Sainsbury's and BMW sites.</p> <p>I would want to know much more about how the local infrastructure of roads, schools, medical facilities etc., already under pressure, will be supported to sustain a development on this scale.</p> <p>If Lewisham Council had the gumption, and it must be said the money given the way central government has starved local authorities, it would have compulsorily purchased this site (if it does not already own it) and built what the area actually needs - a decent state secondary school - either to replace or extend nearby Trinity, which has to do its best on an entirely inadequate site in nearby Taunton Road.</p> <p>The proposed redevelopment exists solely to meet targets and make money for the council and developer. It shows no consideration for the local community, who will be negatively impacted.</p>	<p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I would comment on the Local Plan/plans to build new homes in three locations including the Leegate Centre, BWW garage on Lee High Road and Sainsbury's Lee Green as follows:</p> <p>Amenities/traffic – Sainsbury's in Lee Green. It is a good local supermarket in a residential area that serves the community well. Local residents often walk or cycle to Sainsbury's in Lee Green or use the buses 178, 122, 202, 261 and 321 to reach the supermarket. I often see elderly local residents using the bus to take a short ride to the supermarket. If it was too closed it would mean that local people would need to travel further to larger supermarkets using cars to travel longer distances, increasing traffic pollution and congestion in the local area.</p> <p>Employment - Sainsbury's provides employment for many local people.</p>	<p>Noted. Much of this response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The draft Local Plan site allocations for the Lee Green centre seek to ensure that for mixed-use developments main town centre uses are retained or re-provided at the ground floor level. The allocation for the Sainsbury's site will enable the retention or reprovision of the supermarket on site.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update</p>

		<p>Density – If the current level of housing is to be increased in Lee Green, then a corresponding increase in infrastructure, such as schools, traffic congestion and pollution, doctor surgeries, and transport (trains, buses, cycle lanes) is required. Planned infrastructure improvements for Lee Green should be explicitly named in Lewisham's Local Plan. It is troubling that the Leegate Centre, Sainsburys and BMW garage could be built upon to provide more housing when doctors surgeries, school places, public transport etc. are already oversubscribed. As a local resident of Lee Green, parent of school age children and frequent bus user overcrowding on buses at peak times is very unpleasant and stressful. It is difficult to get local children into local schools, an increase in homes would increase demand for school places. As a primary school teacher in the local area, I am well aware that local children sometimes have to travel great distances to get to school because they were unsuccessful obtaining a place in the area, despite having named several local choices on their list.</p> <p>Height of buildings - The maximum height of any new buildings should be no taller than the current buildings on the sites of Leegate, Sainsburys and BMW garage. A 15-storey building would be entirely out of keeping with the area. I would want this maximum height for Leegate, Sainsburys and BMW garage sites to be included in Lewisham's Local Plan.</p> <p>Housing - I would want the Local Plan to explicitly state that any new development on the sites in Leegate, Sainsburys and BMW should not just be studio or 1/2-bedroom flats but would be a mix with family suitable homes (3 bedrooms). Affordable homes for families and key workers should be a priority. On the 12th of March 2021 mayor Sadiq Khan confirmed plans to prioritise key workers for new build intermediate-level affordable homes.</p> <p>I would want the Local Plan to state that there must be significant green and public spaces in any development of Lee Green, including Leegate, Sainsburys and BMW. In December 2020 a coroner made legal history by ruling that air pollution was sadly a cause of death of a 9 year old girl, who was resident in the local area. Failure to reduce traffic pollution levels and increasing demands on local services could again see a similar tragedy occurring. Illegal and toxic air pollution is a public health crisis for all.</p>	<p>requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The draft Local Plan Part 2 policies on Housing set out the Council's objectives around genuinely affordable housing, which are in line with the London Plan. It is acknowledged that the plan could provide more details around housing size mix, informed by needs identified in its Strategic Housing Market Assessment.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The Part 3 East Area policies include additional details, including requirements for public realm enhancements in the site allocations.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I appreciate you've received a few of these by now, but as a resident of Leyland Road, SE12 8DT I wanted to add my voice to the below.</p> <p>TLDR version:</p> <p>Broadly think the Local Plan sounds great.</p>	<p>General support for Local Plan noted.</p> <p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.

			<p>Definitely want to see the Leegate centre redeveloped, but unlike the last round of the plans from St. Modwen (which seemed reasonable) the most recent proposals from Galliard feel a bit extreme in terms of density and height.</p> <p>Hoping this is the opening move of their negotiation strategy, rather than a proposal that's being seriously considered. The Leybridge estate height feels like it should become the maximum, but also not the norm across the development.</p>		
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I live in SE13 5QL postcode, a 10-minute walk from Leegate. I am very concerned at talk of 15-storey tall buildings. In my opinion, this would genuinely ruin the area. Whilst I am disappointed that it is taking years to sort out the mess that Leegate has become, and I recognise that there is a shortage of housing in Lewisham borough, I feel that anything higher than eight or maybe ten storeys would be detrimental to the locality. Tidied up, I see this area as potentially having a village feel, but if a very tall building goes up - followed by others, no doubt - then this area will become uglier and a place no-one will want to visit or care much about. There is huge potential to make the Leegate development a real asset that people want to visit; a "windy city" ambience is not wanted.</p> <p>Also, I feel very strongly that, whatever happens, Sainsburys must continue trading and not close - should building plans make this preferable. Please note what happened in Burnt Ash Lane, Bromley, when Waitrose shut down - for a few weeks, supposedly - and Lidl took over a year to open its new store, leaving vulnerable people high and dry. I know the circumstances are very different but plans can change. This sort of behaviour - where customers are treated badly by supermarkets - cannot be allowed.</p> <p>I have previously taken a keen interest in the original plans for re-development, attending presentations and talking to the planners. I hope that we will be kept informed about plans. I don't like to be cynical but I also hope that Covid-19 is not used as a handy excuse to plough on without consulting the local population who care very much about their neighbourhood.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The draft Local Plan site allocation for Sainsbury's Lee Green, LEA SA04, will enable the retention or reprovision of the supermarket on site.</p> <p>The Local Plan consultation has been carried out in accordance with the Council's adopted Statement of Community Involvement.</p>	No change.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am responding to the Local Plan in particular on the issue of the future development of the Leegate Shopping Centre. It is very important that the Centre is redeveloped into a good shopping and social meeting area with new housing as well but as a local resident I do have some major concerns about the current proposals being developed by Galliard Homes which I will outline below.</p> <p>I understand the Council is potentially looking at 3 sites to develop, The Leegate Shopping Centre, The BMW garage Site and Sainsbury. It would be helpful to have some firmer guidance in the Local Plan to ensure that all these sites are developed in ways that link up with each other and</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>East Area site allocations development guidelines amended to refer to Grade II listed fire station and local listed Old Tigers Head.</p>	

			<p>enhance the whole area. The Plan should state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p> <p>However, I have major concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach 15 storeys high which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - which are 10 storeys high. I think the Local Plan should set a 10 storey maximum height limit for any single building planned for the Lee Green area and also state an expectation that most new housing development should be in keeping with existing buildings of 3 or 4 storeys so that the public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings which would block out light from these areas. Very tall buildings would make the area unwelcoming and unattractive and deter people from using the shops and facilities being planned for the site. There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. But to do this any development will need to respect the proportions of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures of their proposed Leegate development.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by older people when shopping etc.</p>	<p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The site allocations require that the sites are re-integrated with the surrounding street network and take account of locally listed heritage assets. Each application will be considered separately, taking into account its surroundings.</p>	
3	LEA 02	Lee Green Development Area	<p>This area is already far too busy with traffic. It would be good to put right the buildings opposite the fire station but not to increase the population by adding more buildings.</p>	<p>Noted. The draft Local Plan must set a positive framework for managing growth and development in order to meet identified local needs, consistent with the National Planning Policy Framework.</p> <p>The amount of development sites and growth planned for the East area is relatively limited when compared to the North, Central and South areas of Lewisham.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan</p>	No change.

				requirements in terms of housing targets and making best use of available land within the capital.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>Lee Green Development proposals</p> <p>The emerging Plan from the Leegate pre consultation is not in line with Lewisham council's 'Draft Local Plan.'</p> <p>Density and height are out of proportion to infrastructure. Mass and bulk proposed which is up to 15 storeys is out of proportion to the setting of the local area. The plans also suggest additional areas which will be encompassed in the future plans. i.e. Sainsbury's, the BMW garage at Lee Green etc. without setting a clear limit of height, bulk or density.</p> <p>The plan does not currently explain Lewisham's budget or infrastructure improvements necessary to support the proposed additional housing.</p> <p>As residents of and contributors to the local community we would ask that the following is considered and is written into the Local plan prior to acceptance of planning permission.</p> <p>1) Maximum height for Leegate centre to be in accordance with existing buildings and reflected in the plans and within the Lewisham local Plan rules.</p> <p>2) Maximum height of other buildings to be introduced to Lee Green is no higher than the existing 4 storey Victorian buildings on Lee High Road.</p> <p>3) The development rules are fixed in terms of mass, height and density for all Lee Green surrounding areas so that creeping high rise sprawl is avoided within the area.</p> <p>4) The development takes into consideration and sets out the infrastructure improvements that are required. Lewisham council sets out how they will fund this with clear plans and time scales.</p> <p>5) Lewisham sets out a plan for how the green space behind Eltham Road to the north side can be used to facilitate increasing levels of population, whether this area forms Parkland for use by the whole community.</p> <p>We really need the support of our local council and must be able to trust them to ensure that our local area is not ruined by their lack of foresight or planning and non-adherence to their own policies</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>Any planning application that may be submitted for the site will be assessed against our adopted Development Plan.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA 02	<p>Large increases in housing need corresponding increases in infrastructure. The resulting development of the three sites at Lee Green would need an increase in the provision of schools, particularly local primary schools, doctors surgeries, hospitals, transport, parking and children's playgrounds.</p>	<p>Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update	

			<p>The Lee Green development will have a big impact on the lives of the local residents and we would like the planned infrastructure developments for Lee Green to be explicitly named in the plan. The current transport links and other infrastructure would not support such the proposed development.</p> <p>The development of tall buildings such as the ones proposed at Lee Green would a hostile environment with a wind tunnel effect. These are not developments that are for families but dormitory accommodation for a more transient population. The development around Lewisham station is proof of that. We should be making new developments more human and people friendly. Lee Green has a community feel and any new developments should be on a low level fitting in with the area that exists. Developments should include play areas and open spaces, small shops and doctor's surgeries, a new primary school. Developments should build a community not a dormitory. Buildings at Lee Green should be no higher than 10 stories with lower level buildings and space between. This height should be written into Lewisham's Local Plan to ensure developers cannot exceed that limit or try to sneak higher developments through at a later stage in the planning, as nearly happened with the development of the Catford Dog Track.</p>	<p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I am responding to the Local Plan in particular on the issue of the future development of the Leegate Shopping Centre. It is very important that the Centre is redeveloped into a good shopping and social meeting area with new housing as well but as a local resident I do have some major concerns about the current proposals being developed by Galliard Homes which I will outline below.</p> <p>I have major concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach 15 storeys high (!) which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - which are 10 storeys high. The new housing development should be in keeping with existing buildings of 3 or 4 storeys so that the public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings which would block out light from these areas. I believe very strongly that the Merridale flats at the top of Carston Close should not have their view obscured or their sunlight blocked out by tall buildings. Also, tall buildings would make the area unwelcoming, unattractive and deter people from using the shops and facilities being planned for the site.</p> <p>There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. But to do this any development will need to respect the proportions of the local area and not create the highrise blocks of parts of</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The Local Plan is a strategic policy document and the Council needs to carefully consider the level of detail provided for each area within the site allocations. Further detailed guidance at a masterplanning level would normally be undertaken as part of a Framework Document or Supplementary Planning Document (SPD).</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Leegate Shopping Centre, Sainsbury's Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger's Head Pub and/or Grade II Listed Fire Station</p>	

			<p>Kidbrooke Village and Lewisham town centre. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures of their proposed Leegate development.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities for residents and people when shopping etc. There are not enough school places for children in the borough of Lewisham as it is!</p> <p>I understand the Council is potentially looking at 3 sites to develop, The Leegate Shopping Centre, The BMW garage Site and Sainsbury. It would be helpful to have some firmer guidance in the Local Plan to ensure that all these sites are developed in ways that link up with each other and enhance the whole area. The Plan should state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p>		
3	LEA 02	<p>I have read some of the plans for Leegate and the Lee Green area and have several concerns:</p> <p>1) no new buildings directly on the Lee Green crossroad or the 3 sites of interest should be above the height of the local historic buildings e.g. the Old Tigers Head and the Fire Station.</p> <p>2) any buildings should be sympathetic to the original style and feel of Lee Green.</p> <p>3) the density of housing should take into account the limited capacity of local schools, for parking, and transport services. Over populating the area will have serious consequences if these are not in place first.</p> <p>4) the council should be careful not to set precedents which will blight planning and the quality of life in the area for years to come</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The draft Local Plan Part 2 policies on High Quality Design and Heritage seek to ensure that development proposals respond positively to local character, along with preserving and enhancing the significance of heritage assets. These policies must be read in conjunction with site allocation policies.</p>	<p>Leegate Shopping Centre, Sainsbury's Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger's Head Pub and/or Grade II Listed Fire Station.</p>	
3	LEA 02	<p>LEA2 - Lee Green district centre and surrounds An extract from the draft is as follows: "There is significant potential to reinforce the role of Lee Green District Centre through targeted renewal. It contains a number of sites, including the Leegate Shopping Centre, whose comprehensive redevelopment will significantly enhance the place qualities of the centre whilst delivering new housing, improved retail provision and community facilities. They should also deliver a complementary mix of uses, including new housing, whilst ensuring that the centre's predominant commercial and community role is maintained and enhanced".</p>	<p>Noted. Much of this response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The draft Local Plan Part 2 policies on High Quality Design and Heritage seek to ensure that development proposals respond positively to local character, along with preserving and enhancing the significance of</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>	

		<p>There are three significant sites identified at Lee Green: Leegate, Sainsbury's and BMW. When all are developed the character of Lee Green will be radically altered. While the district centre undoubtedly requires improvement it is vital that Lewisham Council ensures all three schemes are in accordance with the wording of the draft Plan: "Development proposals should respond positively to the evolving urban scale and character of the town centre and its immediate surrounds. Development should be designed to provide for an appropriate transition in scale, bulk, mass and height between the centre, its edges and surrounding residential neighbourhoods."</p> <p>However, while supporting the principle of these words, I am concerned how developers will be held to account in terms of implementation, especially as the Leegate proposals are already in the development pipeline and will set a precedent for the other sites. The Leegate Environmental Impact Assessment screening and scoping report submitted to the Council in March 2020 already prepares the way for buildings of 16 storeys and up to 486 dwellings, albeit as a worst case development scenario. Both figures exceed the current proposals and suggest the developers will push for taller buildings and an increased intensification of housing which is unacceptable on a site less than 2 hectares and will set a precedent for the other development sites. The tallest buildings in the vicinity are c11 storeys, to go up 16, even at the junction of Burnt Ash Lane and Lee High Road, is excessive and is not in keeping with the scale of the surrounding low rise neighbourhoods to the west and north, or with the rest of the junction with the two Tiger Heads buildings. The Local Plan should be clear on the maximum height appropriate for each of the three development sites at Lee Green and not allow these to be exceeded. It should also set maximum acceptable density levels for each site. High density need not necessarily mean high rise development and the density and building height limits are both critical information. Nevertheless, the redevelopment of the three sites is to be welcomed as long as they add amenity value and are implemented with regard to the local neighbourhood. The BMW site should be required to open up and improve the River Quaggy. All three sites should be required to include retail and commercial space at the ground floor in order to encourage active frontages on this busy pedestrian intersection. Despite the impact of COVID on retail, it is important that Lee Green remains, and is encouraged to be an improved local retail centre. The addition of c 600+ residential units on the three sites will mean that shops will be more viable and local residents, as now, will walk from Blackheath and Manor House to use them. Loss of shops and any food retail would mean increased driving to supermarkets causing more congestion. Lewisham should ensure appropriate local retail and commercial provision at Lee Green is retained in the Plan.</p>	<p>heritage assets. These policies must be read in conjunction with site allocation policies.</p> <p>The draft Local Plan site allocations for Lee Green centre will enable provision for a wide-range of main town centre uses at the ground floor level with residential above. They also require significant public realm enhancements to be delivered to support the centre's vitality and viability.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	
--	--	---	---	--

3	LEA 02	<p>Solving the Tigers Head crossroads: Traffic and better pedestrian crossings linking all 4 sides of the junction Lee Green and particularly the Tigers Head Junction are extremely dangerous and awkward to navigate as a pedestrian. I have frequently encountered cars running the Red lights and travelling across the pedestrian crossings when the Green Man is showing. This is due to a tight junction which is barely possible to turn right/left without running the red lights. The junction takes a long time to cross and usually requires a wait in the central reservation surrounded by heavy goods traffic and idling vehicles. It is essential to the local area that this junction be made pedestrian friendly and also easier for vehicles to navigate without driving dangerously. As it stands, I avoid crossing this junction with a pushchair and use businesses further away with easier access.</p>	<p>Noted. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The issues around traffic, movement and safety in the area (particularly around the junction) are recognised, and the site allocations for Lee Green require that development proposals deliver significant public realm enhancements to help address this.</p> <p>The Council will continue to work with and lobby Transport for London to deliver improvements in the area.</p> <p>These comments will also be forwarded to colleagues in the Council's Highways team.</p>	No change.
3	LEA 02 LEA SA 03	<p>I was so disappointed to learn from BetterLee Green that the consultation period is very short indeed, so proper consultation is not being facilitated by the council.</p> <p>Additionally such a disappointment to see that the development proposals for Leegate are again totally disproportional to the space and location. The Galliard plan is much more intensive and less green as well as fewer spaces for public than even the first St Modwen proposal which the local BetterLeeGreen community fought so hard to get amended, with the support of Lewisham council officials who listened.</p> <p>The amended version was much better on all accounts with no unneeded supermarket and more green and public space. There should be limited developments of green sustainable flats but focus on local amenity shops, workshops, and open spaces.</p> <p>It's been shown that the area is highly polluted. New the even taller high rise buildings shown in artists plans will exclude light as well as trap the traffic pollutants within enclosed buildings.. The development should go no higher than it currently is, unless an entirely green design, and should be improved to include much more greenery at ground level, Ideally keeping all the mature trees while greening up the public square.</p> <p>It is so ironic that Lee Green, the first area in London reached on the A20 from the M25 which sounds so green, has no connection to its name or history, although the development of Leegate offered the chance to rectify this with a green outdoor area. Lewisham council listened to the community with the St Modwen proposal making them amend their initial design on these points. Why are they ignoring all the community requests made at the time in allowing anything like the new proposal? The standards</p>	<p>Noted. The Local Plan consultation was carried out in accordance with the Council's adopted Statement of Community Involvement. The consultation ran for roughly a 12-week period, well over the statutory minimum 6-weeks.</p> <p>Much of this response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The draft Local Plan includes provisions around urban greening and green roofs, open space and biodiversity. Please refer to Part 2 policies on Green Infrastructure.</p> <p>Air quality is addressed in the Part 2 policies on Sustainable Design and Infrastructure.</p>	No change.

		<p>approved before ought to be the minimum standards and even more requested from Galliard.</p> <p>It is known affordable homes are needed but many of those proposed won't be affordable, but solely creating profits for Galliard without improving local amenity and communal space!</p> <p>In these covid times not only is the importance of green space as opposed to flats with no access to greenery known to be harmful for mental health, but the demand for them is decreasing as people with cash to invest in property are moving out of London. Additionally the inevitable result of people working from home much more, there will be even more empty former office spaces - it is these that should be converted into the needed affordable homes.</p> <p>Please use joined up thinking and look at quality of life for local communities which has been so important in lockdown, and halt the relentless flat building for investors with reduced quality of life for locals.</p> <p>The new Lewisham centre including the new roundabout is now so dense with high apartments that lack of light and green space will be the main problem for any new occupiers. And fewer post-Covid will find the main benefit to be buying there to commute into London via the train service on the doorstep. It has been shown the main priority during And post Covid times is likely to be properties with gardens or green space not the former closeness to public transport as working patterns will be changing forever.</p> <p>Please take on these issues and don't make the same mistake at Lee Green.</p> <p>And finally most importantly please ensure any new developments, apart from essential outside quality spaces, also have green roofs and green walls beneficial for biodiversity, air quality, and quality of life for residents which has been long proven beneficial.</p> <p>Please make the developments necessary be models of what can be achieved as opposed to repeating the same mistakes which are now completely out of date with modern life and sustainability, and connection to our living planet. Present these as minimum standards to developers like Galliard whose main aims are making short term profits regardless of quality of life for the future community and urban biodiversity.</p>		
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am responding to the Local Plan in particular on the issue of the future development of the Leegate Shopping Centre.</p> <p>I also understand the Council is potentially looking at 3 sites to develop, The Leegate Shopping Centre, The BMW garage Site and Sainsbury. 			<p>these sites are developed in ways that link up with each other and enhance the whole area. The Plan should state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p> <p>I have major concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach 15 storeys high which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - which are 10 storeys high. I think the Local Plan should set a 10 storey maximum height limit for any buildings planned for Lee Green so that the public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings which would block out light from these areas. This would make the area unwelcoming and unattractive.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a vibrant community centre and parking facilities especially needed by older people when shopping etc.</p>	<p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>The Local Plan is a strategic policy document and the Council needs to carefully consider the level of detail provided for each area within the site allocations. Further detailed guidance at a masterplanning level would normally be undertaken as part of a Framework Document or Supplementary Planning Document (SPD).</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	
3	LEA 02	<p>Additionally if 630 new homes are to be developed at Leegate (and presumably with more to follow at Sainsbury's and the BMW garage once they are redeveloped) where is the infrastructure that will be needed? The local primary and secondary schools don't have capacity, more doctors surgeries will be needed and the transport links at Lee and Hither Green are overcrowded during non-COVID times and do not have capacity for many more additional commuters.</p> <p>The traffic is already a nightmare around Lee and the extra demands on the roads (many of which are closed off under the healthy neighbour scheme) both due to works vehicles during the development stage and then from the increased density once the housing is built will result in constant traffic jams. The intersection by the Tigers Head is a nightmare now with traffic going from the A2 to Lewisham constantly blocking the box junction and making it difficult to travel from Lee to Blackheath.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>Any major application that is submitted to the Council must be accompanied with a comprehensive Transport Assessment, and will be assessed against the existing Development Plan policies.</p>	No change.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I would comment on the Local Plan as follows:</p> <ul style="list-style-type: none"> Density - if the current level of housing is to be increased in Lee Green, there needs to be a corresponding increase in infrastructure, such as schools, doctor surgeries, and transport (trains, buses, cycle lanes). I would want planned infrastructure improvements for Lee Green explicitly named in Lewisham's Local Plan. I am not happy for Leegate, Sainsburys and BMW garage to be built upon more intensively in order to include more housing. 	<p>Noted. With regard to density and the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Local Plan housing policies amended to include a target housing size mix.</p>	

			<ul style="list-style-type: none"> The maximum height of any new buildings should be no taller than the current buildings on the sites of Leegate, Sainsburys and BMW garage. I would want this maximum height for Leegate, Sainsburys and BMW garage sites to be included in Lewisham's Local Plan. I would want the Local Plan to explicitly state that any new development on the sites in Leegate, Sainsburys and BMW should not just be studio or 1/2 bedroom flats but would be a mix with family suitable homes (3 bedrooms). I would want the Local Plan to state that there must be significant green and public spaces in any development of Lee Green, including Leegate, Sainsburys and BMW. 	<p>The draft Local Plan site allocations for Lee Green centre make provisions for public realm enhancements, including new publicly accessible open space.</p> <p>The draft Local Plan Part 2 policies on Housing set out the Council's objectives around genuinely affordable housing, which are in line with the London Plan. It is acknowledged that the plan could provide more details around housing size mix, informed by needs identified in its Strategic Housing Market Assessment.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am responding to the Local Plan about the issue of the future development of the Leegate Shopping Centre. 		<p>these areas. Very tall buildings would make the area unwelcoming and unattractive and deter people from using the shops and facilities being planned for the site.</p> <p>There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. But to do this any development will need to respect the proportions of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures of their proposed Leegate development.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by older people when shopping etc.</p>	<p>facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I am responding to the Local Plan regarding the future development of Lee, particularly Leegate Shopping Centre.</p> <p>It is very important that the Centre is redeveloped into a good community area for local businesses to have affordable rent and new housing. As a neighbouring resident, I'm raising concerns about the current proposals suggested by Galliard Homes.</p> <p>Lewisham Council is planning to develop three sites:- The Leegate Shopping Centre, The BMW garage, and Sainsbury's.</p> <p>Guidance in the Local Plan doesn't ensure that all these sites are developed in ways that link up with each other and enhance Leegate. The Plan should state clearly that new developments in the area must fit in with existing older buildings at the Lee Green Cross Roads. These buildings average two storeys and have a maximum height of four storeys. They include a Grade II listed fire station and a locally listed Old Tigers Head pub.</p> <p>The River Quaggy alongside the BMW site and the back of Weigall Road playing Fields is opened up with access for all as nature is very important for people's health. The work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee.</p> <p>My main concern is the planning of up to 630 new homes, their height and the infrastructure regarding them in Lee.</p>	<p>Noted. The Local Plan is a strategic policy document and the Council needs to carefully consider the level of detail provided for each area within the site allocations. Further detailed guidance at a masterplanning level would normally be undertaken as part of a Framework Document or Supplementary Planning Document (SPD).</p> <p>Much of this response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>When a planning application is submitted for any of the 3 sites within Lee Green a comprehensive Construction Management Plan will need to be submitted, and assessed by the Council to minimise disruption.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements</p>	<p>Leegate Shopping Centre, Sainsbury's Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger's Head Pub and/or Grade II Listed Fire Station</p>

			<p>The proposed height of the new buildings in the Leegate development by Galliard Homes, is I proportional to existing buildings and the current structure. Their proposed block heights will reach 15 storeys high, which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - they are 10 storeys high. Any new Local Plans should set a 3-storey maximum height limit for any single building planned for the Lee Green area. It should also state an expectation that most new housing developments should be in keeping with existing buildings of 3-storeys. This will ensure public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings, overcrowding and helps to ensure safety. Tall buildings reduce natural light in surrounding areas - may I see a light study test please? Very tall buildings will make the area unwelcoming, unattractive and deter people from using the shops and facilities being planned for the site. With up to 630 new homes, this increases crime and shall place a big burden in already over-subscribed services such as schools, GPs and hospitals. Most trains do not run very frequently and most mornings (prior to lock down) it was impossible to fit into an overly crowded train carriage. The amount of new people into Lee will place a burden on services.</p> <p>How is the building work, particularly large lorries, gas and electrical digging, going to affect local residents? With Local roads closed off and traffic congestion, particularly school runs, this is going to exasperate traffic standing still and poor air quality.</p> <p>There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. Developments need to respect the proportions and community feel of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by older people.</p>	<p>etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>We have read the plans for developing the Leegate site and as very longterm residents in the local area would like to offer the following comments</p> <p>1. Further development on the Leegate site (and possibly later also the Sainsburys and BMW sites) should be permitted. But NOT to 15 storeys in height. The maximum height should be 10 storeys, as on the neighbouring Leybridge Estate.</p>	<p>Noted. Much of this response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>	

			<p>2. There should also be the return of the short line of small shops along Burnt Ash Road which were demolished when Sainsburys was built. The loss of some Sainsburys parking could easily be compensated by Sainsburys' huge underground car park. This half-dozen small shops would help to return the 'town-centre' feel to Lee Green, which has been lost in recent years, and is clearly featured in 20th century photographs of Lee Green.</p> <p>3. If the target of 600+ new housing units is to be pursued (and these homes may well be needed), it is essential that expanded education, health, and transport and parking provision is built into the development plan.</p>	<p>Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	LEA 02 LEA SA 03	<p>I have been made aware of the latest plan for the development of LEEGATE, which is directly adjacent to where I live, in Burnt Ash Road, SE12 8RF.</p> <p>Local neighbours have drawn up a response (we were given just 2 days to respond – not very long at all.) I agree with every single point made in this response, which comprises 5 paragraphs, and is regarding the 3 sites mentioned in the Plan, the past good development of the River Quaggy, the height of the proposed buildings (15 storeys high()), and the necessity of infrastructure to support the massively increased housing here. I will therefore not repeat what has been written to you, as I support all of it.</p> <p>I do want to stress that I am most concerned about the height of the proposed housing – 15 storeys is totally out of keeping with this Lee Green area - the highest building at present being 10 storeys high; and parking. Parking here is nearly impossible at present. And while the demolition and building is progressing, it will be totally impossible, as a large car park will be demolished. After completion, where will the new owners/tenants park?</p> <p>I am pleased that Leegate is to be dealt with, after all these years of dereliction, but fear what the new development is going to look like, and how very crowded this area will then be. I have lived here since 1943, with the exception of about 5 years in Brockley, so I remember what Leegate looked like before the shops were demolished and the current (now empty) buildings erected.</p>	<p>Noted. Much of this response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am horrified by the local plan in respect of the proposal that the Leegate centre, the Sainsbury's site, and the BMW site should be targeted for high rise flats densely populated offering low quality Homes.</p> <p>The high-rise building that exists at the Lee gate centre has always looked out of place, is an eye site and overly high in comparison to the surrounding older buildings which are much more in keeping with Lee Green.</p> <p>Our feedback to the Lee forum was that we wanted the area to improve not go further downhill.</p>	<p>Noted. With regard to densities and the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>With regard to access to public transport we appreciate that Lee Green is not Lewisham and as such the densities of site allocations have been reduced to reflect the hierarchy of centre.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	

		<p>Why is the council putting forward a proposal to denigrate where we live?</p> <p>Why are your expectations for our community so low?</p> <p>Why doesn't the local plan focus on infrastructure improvements, amenities improvements, safety improvements?</p> <p>Lee Green is not Lewisham. It does not have hundreds of buses. It does not have multiple trains every hour going direct to multiple London destinations. It does not have a DLR or underground station no are any of these things likely to come to Lee Green based on the councils total Phalia in this area over the last 25 years. Given TfL's plans for reducing the quality of the Lee train service (i.e. to remove all direct trains to London Bridge forcing everyone to change at Hither Green) the idea of adding so many extra homes is ludicrous.</p> <p>The current residents of the existing high-rise buildings rely extensively on cars due to poor public transport. Where will all the extra cars go?</p> <p>The triangle of roads formed by the South circular Burnt ash Road and Eltham Road are already congested and the pollution has already killed one little girl. How does this plan in any way support the reduction of traffic pollution or the encouraging of cycling?</p> <p>The focus should be on building homes with each one having some private outdoor space (garden, decent balcony). Human beings need access to outdoor space. One would've thought that the pandemic would've shown you the importance of individual outside space.</p> <p>Why does the Lewisham plan persist in a development approach which has already been shown to damage both the mental and physical well-being of its residents?</p> <p>We don't want mass produced low-grade ugly housing forced on us. Nobody wants to live in a rabbit hutch or rely on dirty unsafe elevators to reach their homes. Where in the local plan don't you give any consideration to the safety of the residents?</p> <p>How many women will be attacked on their way home into these high-rise monstrosities? How many will be too many?</p> <p>Come on Lewisham raise your game.</p> <p>Lee and Lee Green already have some really lovely independent shops in the Lee gate centre and the surrounding area. We do not want chain stores selling cheap (because they rely on child labour and cheap labour from abroad) products which do not last.</p>	<p>With regard to car use the London Plan sets out targets for 90% of all trips in inner-London to be made by sustainable modes by 2041. As such all new development will be car-free or car-'lite' with minimal parking to discourage car use.</p> <p>The draft Local Plan takes forward the London Plan housing design standards, including for outdoor amenity space.</p> <p>We do not agree with your characterisation of new development within Lewisham.</p> <p>With regard to policies on improving access to green spaces please refer to draft Local Plan Part 2 on Green infrastructure.</p> <p>With regard to policies on sustainability please refer to draft Local Plan Part 2 on Sustainable design and infrastructure.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	
--	--	---	---	--

			<p>This is Lee Green not Lewisham. The two locations are very different. Why doesn't the local plan include introducing a large green? It is after all Lee Green.</p> <p>The densification of the Lee gate centre with any green area above ground level being invisible to local residents/users of the Lee gate centre is unimaginative and suggests a lack of diversity in the team.</p> <p>I am against the proposal to build 630 homes at the Lee gate centre.</p> <p>I am against the proposal to build high rise flats all the way around the Leegate centre.</p> <p>I am against the proposal to turn Sainsbury's into another high-rise monstrosity.</p> <p>I see nothing in the plan that shows you have integrated The need to create an environment which is safe for women at all hours of day and night whether they are out socialising or travelling to and from work.</p> <p>I see nothing in the plan that promotes individual and community well-being through the increasing of green spaces which are accessible by all and through the development of homes which allow the residents the dignity of having some individual private outside space.</p> <p>I see nothing in these proposals to indicate you have taken any account of the need to reduce pollution nor to increase the safety of cycling or indeed to improve public transport links for Lee Green and Lee.</p> <p>In summary the local plan shows you haven't listened to local residents at all.</p>		
	3	LEA 02 LEA SA 03	<p>I understand that we can write to you with comments on the Galliard Leegate development plans. Please see my comments below.</p> <p>Whilst I am supportive of new housing I have serious concerns about the height of the proposed development.</p> <p>Galliard Homes are proposing building up to 15 storeys high, exceeding maximum existing local height by 37%. This is far too tall and will drastically change the feel of the area which has locally and nationally listed buildings which are much smaller. The galliard homes should be no taller than the existing leegate Centre.</p> <p>Allowing Galliard to build at 15 stories would also set a precedent for developers wanting to redevelop the Sainsburys and BMW sites, who would think they could also exceed existing local height by 37%.</p> <p>I am also very concerned about the lack of infrastructure locally for all of these new homes. Where will this be</p>	<p>Noted. Much of this response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.

			<p>funded from? If the Sainsburys and BMW garage sites are developed to similar density as Galliards proposed Leegate plans, demand for local infrastructure will be tripled. There must be adequate additional schooling, transport and NHS services provided for all of these new homes.</p>		
3	<p>LEA 02 LEA SA 03 LEA SA 04 LEA SA 05</p>	<p>I have looked at the 3 areas designated under this plan, namely Leegate, Sainsbury's and the car dealers all of which appear to be scheduled for demolition.</p> <p>This would appear to be a very long, noisy, dusty project whether taking the whole area or one section at a time, rather ironic in view of all the road closures in the area to improve air quality.</p> <p>There are also the problems of already being a very busy traffic junction before the increase in vehicles to the building proposals is taken into account, a terrible wind corridor with many umbrellas lost each year (which will be exacerbated due to the height of the new buildings) and depreciation of the surrounding properties, both by lack of privacy and noise pollution.</p> <p>Just look at how long the building works by Lewisham Station/Loampit Vale have taken under the Regeneration project of 2000 (?) and still the chicken boxes continue to be built along that road.</p> <p>How many storeys high and percentage of affordable/social housing are also ongoing issues at Lee - we all know now that developers' put down the percentage necessary to obtain planning permission which is removed to a token when building commences (due to increased costs not previously factored into the calculations!).....</p> <p>On a more practical note, I do hope a supermarket provision with parking will remain throughout or the 'new' one will lose a lot of trade by people having changed habits over a period of deprivation.</p>	<p>Noted. If and when a planning application is submitted for any of the 3 sites within Lee Green a comprehensive Construction Management Plan will need to be submitted, and assessed by the Council to minimise disruption.</p> <p>The draft Local Plan sets a strategic target for 50% of new homes to be for genuinely affordable. The percentage of affordable housing approved at the planning stage is agreed within a legally binding S106 agreement. We are not aware of any development in Lewisham where this legal agreement has been breached.</p> <p>Draft Local Plan Site allocation 4 Sainsbury's Lee Green includes the requirement for main town centre uses, which could accommodate the re-provision of a supermarket.</p>	No change.	
3	<p>LEA 02 LEA SA 03 LEA SA 04 LEA SA 05</p>	<p>Employment Leegate – 570m2 currently with 36 homes and capacity for approximately 500 FTE jobs in retail and offices Sainsbury – 500m2 currently no homes and approximately 200 FTE jobs in retail BMW site – 230m2 currently no homes and capacity for approximately 20 FTE jobs in retail and industrial Schemes that have been considered by the council for these sites all put at risk all of the actual and potential employment on these sites. Leegate applications made by, and discussions with, St Modwen and, more recently, Galliard have had ever decreasing space for employment opportunities. The draft Plan says “re-establish Lee Green district centre as a welcoming and thriving hub of commercial and community activity” but the talks with Galliard recently make no indication of this commitment by</p>	<p>Noted. Much of this response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The draft Local Plan Part 2 policies on High Quality Design and Heritage clearly set out that development proposals must respond positively to the site context, including local character. The plan must be read as a whole.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local</p>	<p>Local Plan Part 2 policy on High Quality Design amended to refer to building to a human scale as a design principle.</p> <p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>	

		<p>the council. The draft Plan also says the council will “introduce stronger protections for employment sites, so they remain in business use” but the Galliard proposals indicate that the council have no intention of keeping to this principle either.</p> <p>The other two sites (Sainsbury and BMW) have never had any residential use so the only protection for the 220 FTE jobs is in the draft Plan principle that would “enable the mixed-use redevelopment of some sites for new workspace and housing - but only where there is no loss of business space”.</p> <p>It appears that the Galliard Homes proposal is allowed to play the trump card of “1,667 new homes a year” that allows all other considerations being ignored – height, bulk, employment, heritage, density.</p> <p>Heritage and local character</p> <p>The area around Lee Green often falls outside the narrow definition of “heritage” but its 20th century heritage of interwar housing, neighbouring early Conservation area, post war developments (Leybridge Court, residential infill and early shopping centre) give the area a special “heritage”.</p> <p>The Leegate Centre as well as the Sainsbury and BMW site contribute to that mixed local character. Encapsulating the rapid expansion and development of the twentieth century within a small space shared with much older buildings and a major junction of the A20 arterial road. The close proximity to the significant Leybridge Court Estate (and later Millford Tower) along with an example of a very early (1970s) Conservation Area (Lee Manor) and high quality interwar development of the Crown lands of Eltham Palace make this a special place.</p> <p>The Quaggy River, along with its culverted tributaries, are testament to both Lee Green’s more ancient past and its future potential as a cultural and bio-diverse centre.</p> <p>The Leegate Centre is an eyesore. But this is the fault of the recent owners. A much smaller investment could revive the shopping centre as an employment hub for local people, a cultural centre, contribute to the successful retail District Centre and could even accommodate more homes. It appears that the Galliard Homes proposal is allowed to play the trump card of “1,667 new homes a year” that allows all other considerations being ignored – height, bulk, employment, heritage, density.</p> <p>Tall buildings and bulk</p> <p>I would echo an answer given on Commonplace regarding the height of new buildings at Lee Green District Centre: I am also worried that there is no mention of building to human scale, with generous public realm, set-backs and articulations to reduce any sense of scale. I would like all these details spelled out in policies and site allocations Here is the kind of text I would like to see included (taken from Hounslow's Great Western Corridor Masterplan and</p>	<p>Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	
--	--	---	---	--

			<p>Capacity Study 2019) “Where the height differential between areas with different height approaches is more than two storeys, the abrupt change in height creates an imbalance and breaks the coherence of the urban fabric”. “Higher development may feel domineering and undermine the integrity of buildings with lower height”. “Generally heights should overcome strong height differentials through the stepping down of development at the interface with public realm”. “Buildings may have one or two set-back storeys behind the main frontage. Due to their limited visibility from the street space set-back storeys have little impact on the perceived building height or enclosure of the street space”. “The approach is to promote mid-rise buildings rather than very tall buildings, as they will be better able to avoid or limit harm to heritage assets”. “There will be occasions where a tall or bulky development of a certain scale is simply unacceptable due to the potentially destructive effects on the setting of heritage assets”. “The higher a building, the greater will be its propensity for harm, fuelled by developer ambition rather than any genuine pressing economic, regenerative or environmental driver”.</p> <p>I would also like to see this kind of wording from Historic England's Tall Building guidance included in Lewisham's Local Plan "There will be some locations where the existing qualities of a place are so distinctive or sensitive that new tall buildings will cause harm regardless of the perceived quality of the design" and that "conservation area appraisals identify areas of increased sensitivity to tall buildings"</p>		
3	LEA 02	<p>I live in the eastern part of the borough and I am especially concerned about the site allocations in Lee Green (District Centre) and at Lee Station (Local Centre)</p> <p>Note: This area is not called Burnt Ash. Locally it is sometimes called Lee and sometimes called Lee Station – the area sometimes called Burnt Ash is likely to be found somewhere around the top of Burnt Ash Hill. The Chiltonian Industrial Site can only be accessed from Manor Lane and this is not in this Local Centre. These types of error on a local planning document is very disheartening to find as it indicates a poor understanding of the area by officers and/or consultants.</p>	<p>The name Burnt Ash is simply being used to distinguish appropriately between Lee Gate and other areas and references the principle north south road running through it. The naming of Burnt Ash centre is consistent with the previous Local Plan.</p>	<p>Local plan amended to remove reference to Chiltonian Industrial Estate.</p>	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I would comment on the Local Plan as follows:</p> <ul style="list-style-type: none"> Density - if the current level of housing is to be increased in Lee Green, there needs to be a corresponding increase in infrastructure, such as schools, doctor surgeries, and transport (trains, buses, cycle lanes). I would want planned infrastructure improvements for Lee Green explicitly named in Lewisham's Local Plan. I am not happy for Leegate, Sainsburys and BMW garage to be built upon more intensively in order to include more housing. The maximum height of any new buildings should be no taller than the current buildings on the sites of Leegate, Sainsburys and BMW garage. I would want this 	<p>Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Local Plan housing policies amended to include a target housing size mix.</p>	

			<p>maximum height for Leegate, Sainsburys and BMW garage sites to be included in Lewisham's Local Plan.</p> <ul style="list-style-type: none"> I would want the Local Plan to explicitly state that any new development on the sites in Leegate, Sainsburys and BMW should not just be studio or 1/2 bedroom flats but would be a mix with family suitable homes (3 bedrooms). I would want the Local Plan to state that there must be significant green and public spaces in any development of Lee Green, including Leegate, Sainsburys and BMW. 	<p>Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The draft Local Plan Part 2 policies on Housing seek that developments provide a mix of housing tenures and sizes. It is acknowledged that the plan could provide more details around housing size mix, informed by needs identified in its Strategic Housing Market Assessment.</p> <p>Given the urban nature of the sites in Lee Green and the need to optimise the use of available land to respond to London's housing crisis it not possible to include significant, large open space – however each scheme should provide adequate public and private amenity space.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>Thank you for consulting on your Local Plan.</p> <p>I see that the plan envisages redevelopment of the Leegate shopping centre and the Sainsburys and BMW garage sites. I appreciate that there are demands to provide new housing across LBL and do not object to this in principle for these sites.</p> <p>That said any development needs to be in keeping with the existing built environment. In particular buildings should be of a similar height to those already in the area. This is mainly low rise residential with the exception of the Leabridge estate where the tower blocks are some 10 storeys high. Ten stories would seem to be a reasonable cap for this part of the Borough. Additionally the Leabridge estate has significant green areas around the blocks so providing a people friendly environment. Any new development should replicate this spacing /density as far as possible. Also the Leabridge estate is set a distance back from the road ways which avoids a canyoning effect. The local plan should include strict requirements about the effect of tall buildings on wind and sunlight. There is not much point having open spaces which are rarely in sunlight and act as wind tunnels. The two listed buildings on the north side of Eltham Rd/Lee High Rd are of 3/4 storeys and their value will be diminished if they are overshadowed by very tall buildings. The plan should address this point with height restrictions of 10 floors.</p> <p>The junction at Lee Green is already very heavily congested. This is often caused by buses stopping to pick up on the southbound side of Burnt Ash Rd (opposite Sainsburys) which creates a back up of traffic across the lights. As part of any redevelopment a pull in for buses should be created on the east side of Burnt Ash road and preserved on the west side. The development should be as car free as possible with no street parking permits being granted. This is reasonable as the site is close to bus links and within walking distance of two railway lines. These</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>With regard to car use the London Plan sets out targets for 90% of all trips in inner-London to be made by sustainable modes by 2041. As such all new development will be car-free or car-'lite' with minimal parking to discourage car use.</p> <p>The remainder of the comment seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>	

			<p>infrastructure concerns should be explicitly covered in the plan.</p> <p>The cgi images provided in support of development proposals show very heavily massed and tall buildings completely out of character with the local surroundings. The plan should allow for redevelopment with is more sympathetic in style/size/configuration to its surroundings.</p> <p>This should also include the green environment. New developments should not be required simply to improve on the intensity and diversity of wildlife on the site in question but should be required to at least match that of their surrounding neighbourhood. This requirement should be included in the plan.</p>		
3	LEA 02 LEA SA 03	<p>I have seen some of your proposals for a local Plan and have heard something of the Galliard Homes proposals for the Leegate site, though these last have not been published, still less been the subject of any public consultation.</p> <p>In the light of this we have the following comments : -</p> <p>GENERAL</p> <p>1. We are concerned that the Council’s draft plan appears to give too much latitude to developers in the area around the LeeGreen road junction. It looks like an invitation to excessive development there.</p> <p>2. We do not want to see a forest of high buildings there which would not be appropriate for the site. Lee Green is not a genuine “town centre”, unlike Lewisham; it is more akin to a village centre. The buildings of Leybridge Court provide a misleading comparator. They are well spaced and well set back from the roads and the rest of the surrounding area. We suggest that 10 storeys should be the maximum with any such blocks set back from the roads, with most buildings significantly lower.</p> <p>3. The potential for very substantial numbers of new housing units would be likely to lead to unreasonable pressure on local infrastructure and community services. For example schools, health and community facilities, traffic and parking.</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am responding to the Local Plan in particular on the issue of the future development of the Leegate Shopping Centre. It is very important that the Centre is redeveloped into a good shopping and social meeting area with new housing as well but as a local resident I do have some major concerns about the current proposals being developed by Galliard Homes which I will outline below.</p> <p>I understand the Council is potentially looking at 3 sites to develop, The Leegate Shopping Centre, The BMW garage Site and Sainsbury. It would be helpful to have some firmer guidance in the Local Plan to ensure that all these sites are</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Leegate Shopping Centre, Sainsbury’s Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger’s Head Pub and/or Grade II Listed Fire Station</p>	

		<p>developed in ways that link up with each other and enhance the whole area. The Plan should state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p> <p>However, I have major concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach 15 storeys high which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - which are 10 storeys high. I think the Local Plan should set a 10 storey maximum height limit for any single building planned for the Lee Green area and also state an expectation that most new housing development should be in keeping with existing buildings of 3 or 4 storeys so that the public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings which would block out light from these areas. Very tall buildings would make the area unwelcoming and unattractive and deter people from using the shops and facilities being planned for the site. There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. But to do this any development will need to respect the proportions of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures of their proposed Leegate development.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by older people when shopping etc.</p>	<p>Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>The emerging Plan from the Leegate pre consultation is not in line with Lewisham council's 'Draft Local Plan.'</p> <p>Density and height are out of proportion to infrastructure. Mass and bulk proposed which is up to 15 storeys is out of proportion to the setting of the local area. The plans also suggest additional areas which will be encompassed in the future plans. i.e. Sainsbury's, the BMW garage at Lee Green etc. without setting a clear limit of height, bulk or density.</p> <p>The plan does not currently explain Lewisham's budget or infrastructure improvements necessary to support the proposed additional housing.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>

		<p>As residents of and contributors to the local community we would ask that the following is considered and is written into the Local plan prior to acceptance of planning permission.</p> <p>1) Maximum height for Leegate centre to be in accordance with existing buildings and reflected in the plans and within the Lewisham local Plan rules.</p> <p>2) Maximum height of other buildings to be introduced to Lee Green is no higher than the existing 4 storey Victorian buildings on Lee High Road.</p> <p>3) The development rules are fixed in terms of mass, height and density for all Lee Green surrounding areas so that creeping high rise sprawl is avoided within the area.</p> <p>4) The development takes into consideration and sets out the infrastructure improvements that are required. Lewisham council sets out how they will fund this with clear plans and time scales.</p> <p>5) Lewisham sets out a plan for how the green space behind Eltham Road to the north side can be used to facilitate increasing levels of population, whether this area forms Parkland for use by the whole community.</p> <p>We really need the support of our local council and must be able to trust them to ensure that our local area is not ruined by their lack of foresight or planning and non-adherence to their own policies.</p>	<p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I have recently read of the plans for the development of the Leegate Centre at Lee Green and the potential for development on the current Sainsbury's site and BMW site. This plan is not in line with the council's own 'Draft Local Plan'.</p> <p>1. The proposal includes 15 storey blocks on the current Lee Green/Leegate site which is 37% higher than the blocks further down Eltham Road. The Mayor of London's planning policy states that tall buildings should only be built in places with transport links and other infrastructure that can support them. Lewisham has already explicitly excluded Lee Green from its Tall Building opportunity areas in its draft Local Plan. Tall buildings are expressly against the wishes of the community in the Lee Neighbourhood plan which has been widely consulted on. The development at the Leegate site should not be higher than it currently stands.</p> <p>2. The Sainsbury's site and BMW site should be kept at heights of the Victorian buildings that surround them - certainly no higher than the three storeys of the Tigers Head, houses on Lee High Road and the Victorian villas on Burnt Ash Hill. This maximum height needs to be written into the Lewisham Local Plan for certainty.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>

			<p>3. The creeping high rise sprawl that has occurred at Kidbrooke and Lewisham must be avoided in this residential and historic area. Therefore, the development rules should be fixed in terms of appropriate mass, height and density (see points 1 and 2 above) for all Lee Green surrounding areas.</p> <p>3. Local infrastructure will not support development at this scale. Two trains an hour have already been cut from Lee Station and (out of lockdown) the trains are packed at rush hour; it is difficult to get on to the packed trains from Lee Station or Hither Green station at morning rush hour or on trains to these destinations from Waterloo or London Bridge at rush hour. Since the implementation of the LTN (much needed), the main roads are extremely congested (even in lockdown and we await to see the increase in traffic on the main roads after lockdown); this obviously has an impact on the length of bus journeys. The local schools are at capacity. It is nigh on impossible to get an appointment at local GP surgeries and the waits in Lewisham A&E are already untenable.</p> <p>I hope that residents can trust the local authority to honour their views and take account of the Lee Neighbourhood Plan</p>	<p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>

3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>Leegate, Sainsbury & BMW development proposal</p> <p>Traffic:- Since the introduction of the current Low Traffic Neighbourhood scheme the current roads, particularly in this area are unable to cope with the filth pollution and traffic jams created. You cannot cycle everywhere and the public transport system is atrocious in south London. People therefore need to use cars particularly the old and disabled. The current roads can't cope and adding significantly more homes will exacerbate the problem.</p>	<p>Noted. Low Traffic Neighbourhoods are outside the scope of the Local Plan.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	<p>No change.</p>	

			Schools, doctors, hospitals. How many new schools, doctors surgeries and hospital beds are you intending to create? Trying to register at a doctors, find a school place or get seen at a hospital in this area is impossible.		
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>As a local resident (SE12 8NU) I am writing concerning the local plan for Lee Green and Leigate. I am very concerned that the three sites in this area not be overdeveloped. Any development on the Sainsbury's site should not exceed the height of the existing buildings adjacent to the site, or the Old Police station. This is also true of the BMW garage site where any new structure should not exceed the height of the Old Tiger's Head and adjacent buildings. On the Leigate site the redevelopment should not exceed the height of the current buildings on that site. Sufficient parking should be made available for the new properties and shoppers.</p> <p>The building of genuinely affordable family homes should be prioritised over high density housing. Due consideration should be given to the surrounding infrastructure - roads, schools, GPs, parking and public spaces and the number of new homes limited accordingly.</p> <p>Any redevelopment needs to enhance the character of the area rather than change it beyond recognition as has happened in Lewisham. Proper consultation with existing residents of the area should take place.</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The Local Plan sets out a policy of a strategic target of 50% affordable homes</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am responding to the Local Plan in particular on the issue of the future development of the Leigate Shopping Centre.</p> <p>In my opinion it is very important that Leigate Centre is redeveloped into a thriving attractive and welcoming shopping and social meeting area catering for residents well-being alongside new housing.</p> <p>As a local resident I do have some major concerns about the current proposals for the development by Galliard Homes which I will outline below.</p> <p>I understand the Council is potentially looking at 3 sites to develop, the Leigate Shopping Centre, the BMW garage site and the Sainsbury site. It would be helpful to have some firmer guidance in the Local Plan to ensure that all these sites are developed in a cohesive and linked way in order to enhance the whole historic area of Lee Green. The Plan should state clearly that new developments on these sites must fit alongside and complement existing older buildings at the Lee Green cross roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p> <p>It would be a main feature of the plan to ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing fields is opened up with pedestrian access and pathways for all. The work of the Friends of The Quaggy and Lewisham Council has been effective in developing some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the LeegGate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The draft Local Plan Part 2 policies on High Quality Design and Heritage clearly set out that development proposals must respond positively to the site context, including local character. The plan must be read as a whole.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Leigate Shopping Centre, Sainsbury's Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger's Head Pub and/or Grade II Listed Fire Station</p>	

		<p>work should continue and now be of benefit to the residents of Lee.</p> <p>I have major concerns about the height of the buildings proposed for Leegate by Galliard Homes. The plans suggest blocks of flats to reach 15 storeys high which by far exceeds the height of any other building in the area and is fifty percent higher than the highest nearby buildings - the flats on the Leybridge Estate - which are 10 storeys high.</p> <p>I think the Local Plan should state an expectation that most new housing development should be in keeping with existing buildings of 3 or 4 storeys in order to facilitate walking, sitting and shopping in pleasant landscaped public areas.</p> <p>Very tall buildings are overbearing, they block out light and create wind tunnels. This makes areas unattractive, undesirable and unwelcoming and could deter people from shopping or meeting and using planned local facilities. A congestion of towering flats and the very busy and polluted junction and feeder roads would in my opinion only attract loitering and encourage anti-social activities. There must be a maximum height limit set for this development.</p> <p>There is an opportunity to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. In order to do this any development will need to respect the proportions of the local area and not create a ghost town of highrise blocks as seen in parts of Lewisham town centre.</p> <p>It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to compaction of very high buildings that appear in Galliard Homes simulated pictures of their proposed Leegate development.</p> <p>It is essential that the infrastructure is developed to match the number of proposed new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by older people when shopping etc.</p>	<p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	LEA 02 LEA SA 03	<p>I have just learned today of the Leegate /Lee Green proposed plans. I do have some concern that details of this have not been more widely circulated.</p> <p>From what I see so far, I would have concerns on the following matters: 1. Duration of the building work. There does not seem to be any timeline. This appears to be a major infrastructural development and the risk for chaos, additional traffic and</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.

			<p>pollution over a protracted undefined period would not be welcome - nor safe - at an already very busy strategic transport interchange and residential area.</p> <p>2. Increased Environmental pollution. During build and after completion with the additional proposed c.600 dwellings this would be adding further to the road traffic and numbers of cars moving generally through - in what is already an area suffering high levels of air pollution (from traffic).</p> <p>3. Where are the plans for more cycling and more pedestrian-friendly areas?</p> <p>4. The height of the proposed building - 15 stories - is vastly out of proportion to the rest of the locality. There is no visual of what is proposed, that I can find, but this would seem unsightly. How can this high density of housing be able to provide the space (inside and outside) to support the good mental wellbeing of those who will live there?</p> <p>5. Local infrastructure and public amenities. I do not see plans for the additional schools, GP/health services and other public amenities - will there be such additional provision made to accommodate the enlarged community and within the time frame?</p>		
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>Lewisham's Local Plan and Galliard Homes proposals to develop Leegate:</p> <p>1. In the draft Local Plan, three large sites in Lee Green have been allocated for housing – Leegate, Sainsburys and the BMW garage. These sites cannot possibly sustain a high volume of housing without a corresponding substantial increase in infrastructure. How would this be effected? Where is it suggested there would be space for the required schools, GP surgeries, dentists, and all the other services required by the residents. Where would there be open green spaces, it would appear that the housing would take up all the available space. The nearby parks are already very busy. Has any thought been given to the level of pollution which would inevitably increase on the present levels? What about transport links, these are barely sufficient for the existing population , hence the reliance on cars and over recent months the low traffic neighbourhood scheme has led to an increase in congestion, delay for emergency services and resulted in more pollution. Lastly on this point is this density of housing actually required given the fact that London’s population is decreasing and are flats in tower blocks the type of accommodation actually required? Is there not a need for low rise housing for young families and the elderly?</p>	<p>Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The Council has prepared a Strategic Housing Market Assessment, which looks at housing needs of different groups. This has informed the preparation of the Local Plan. Further details are set out in Part 2 Housing policies.</p>	No change.	
3	LEA 02	<p>3. Re Timing</p> <p>I realise that I am commenting on the last day but due to the lack of consultation with the local community I have only just learned of this</p>	<p>Noted. The Local Plan consultation was held for roughly a 12-week period which is 6 weeks more the statutory minimum set out in our Statement of community involvement.</p>	No change.	

3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I am responding to the Local Plan in particular on the issue of the future development of the Leegate Shopping Centre. 3	LEA 02 LEA SA 03	<p>I am writing with regards to the plans for Leegate in Lee Green. As a resident of Lee for over two years and growing up in the Borough of Lewisham, I have seen many changes. From Lewisham Centre, where the ever growing and influx of new build properties and high risers. To the gentrification of areas like Deptford and New Cross its looks like a completely different Lewisham.</p> <p>I would like the Leegate area to be a place where people can socialise and keep a community feel. The area in general lacks spaces to socialise and has many historical properties. I understand that there is a housing crisis, however I feel that building so align with what already exists. Furthermore many of these new builds claim to be affordable but are really not. It would be nice for local people to have a place to start up a small business and include their community for support. After the pandemic it will be needed to have a place to socialise after so much time in isolation.</p> <p>I think that our young people also need somewhere to safely socialise. This in turn could limit the amount of criminal crime that we see if under 25's. Many young people result to this because of a lack of community and productive things to do on their doorsteps. It would be great to see young and old in one space to limit any further stereotypes and prefigured and mass media publicises.</p> <p>These are my opinions on what I would like to see happen in my local area and the proposed plans for Leegate.</p>	<p>Noted. The draft Local Plan proposals broadly seek to support the revitalisation of Leegate centre to secure its future as a vibrant hub of community and commercial activity. This includes the provision of significant public realm enhancements, modern workspace and business units, and a wide range of complementary main town centre uses.</p> <p>The draft Local Plan sets an overall target for 50% of new homes to be genuinely affordable, with affordability linked to local income levels.</p>	No change.
3	LEA 02 LEA SA 03	<p>I was shocked to learn of the plans for the new Lee Gate Centre and the surrounding area which reached me last night with a deadline for this Sunday. The proposals show no understanding of the area, its infrastructure and traffic burden that is already thundering through it.</p> <p>Area: At a proposed height of up to 15 storeys, the building would be by far the highest in the area. We have seen at the Lewisham roundabout what eyesores these are likely to be. If you are going to build ugly and brutal, why make it the most visible building in the area? Why do you want to change a community by parachuting Canary Wharf type blocks? There are better ways to achieve affordable housing. You would also add a large amount of people to an area that is creaking at the seams, where a school development was blocked allegedly for lack of space.</p> <p>Infrastructure: The "Tiger" junction is known across London for the wrong reasons. Routine floodings, a traffic choke point, pollution and lack of educational facilities in the surrounding area mean that already with the existing amount of people, the infrastructure is creaking. Catchment areas for primary schools are tiny not to speak of secondary school. I cannot see how this fragile and overwhelmed infrastructure will absorb such a high density project.</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process</p> <p>Low Traffic Neighbourhoods are outside the scope of the Local Plan.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.

			<p>Traffic: We all "fondly" remember the LTN project last year that put the community under strain. LTN was introduced by a general agreement that the area suffers from ridiculous amounts of traffic congestion, leading to pollution (we have the first casualty with "pollution" on the death certificate), ridiculous delays for traffic and a general hostility to cyclists and pedestrians. The current situation is unacceptable, adding another 450 households would be plain stupid. I would already encourage future residents to sue Galliard Homes for the damages caused by pollution on their health and properties.</p> <p>I strongly urge you to reconsider this proposal that would make the area unliveable for current and future residents. If only in your own interest, the resale value of your properties will decline substantially once the dynamics that I have described above play out.</p>		
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am responding in a personal capacity to the Local Plan in particular on the issue of the future development of the Leegate Shopping Centre. It is fundamentally important that the Centre is redeveloped into a good shopping and social meeting area with new housing as well, but as a local resident for over 20 years, I share a number of very significant major concerns about the current proposals being developed by Galliard Homes with many neighbours and local residents, which I will outline below.</p> <p>I understand the Council is potentially looking at 3 sites to develop, The Leegate Shopping Centre, The BMW garage Site and Sainsbury's. It would be helpful to have some firmer guidance in the Local Plan to ensure that all these sites are developed in ways that link up with each other, do not change the character of the current layout and enhance the whole area. The Plan has to state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p> <p>However, I have extremely serious concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach 15 storeys high which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - which are 10 storeys high. I think the Local Plan should set a 10 storey maximum height limit for any single building planned for the Lee Green area and also state an expectation that most new housing development should be in keeping with existing buildings of 3 or 4 storeys so that the public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings which would block out light from these areas. Very tall buildings would make the area unwelcoming and unattractive and deter people from using the shops and facilities being planned for the site.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. 			<p>There is a great opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. But to do this any development will have to respect the proportions of the local area and absolutely must not create disproportionately large high rise blocks - like parts of Kidbrooke Village and in Lewisham town centre. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures of their proposed Leegate development. The overpowering development as shown would simply dwarf the surrounding area.</p> <p>I believe it is also essential that appropriate infrastructure should be developed so it can match any influx of new residents with the right amount of increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by older people when shopping etc.</p>

			<p>planned for the site, as well as deterring potential future residents on the nearby roads - I know for a fact it would deter me should I be looking in the local area. I welcome the opportunity to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16. but to any development will need to respect the proportions of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre. Lee Green's most vibrant parts are based on the period buildings and green spaces, so it is important to respect this. Whilst the existing Leybridge flats are 10 storey blocks, they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures. It's in the name Lee Green, and development should look to accentuate this - bringing a natural feel with communal green spaces that sets it apart from over-tall and overbearing concrete blocks.</p> <p>Regarding the BMW garage Site and Sainsburys, the plan has to ensure that all these sites are developed in ways that link up with each other and enhance the whole area. The Plan should state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p> <p>I also believe that the local infrastructure should be developed so it can match the number of new residents from schools and green spaces to sufficient additional parking facilities. We have already been known to face a rat-run in commuter times as well as intense traffic, and local residences need no more pressure on our streets.</p>	<p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	LEA 02	<p>Development of Lee Green I support the stand that Lee Green development needs to be limited in height and density. There are old, neglected building that must be restored and re-purposed. Plans must ensure that the quality of life for Lee residents is improved with less traffic and parking.</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. But to do this any development will need to respect the proportions of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard's simulated pictures of their proposed Leegate development.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a vibrant community centre and parking facilities especially needed by older people when shopping etc. The plan should state the importance of developing new green spaces and improving existing ones for leisure use as more families come into the area. For example, the Edith Nesbit Gardens on Leyland Rd. provide a small but well landscaped area for people to walk and exercise dogs but the play area is in great need of refurbishment. As more young families move into the area they will need more play areas and safe green spaces for their children.</p>	<p>The draft Local Plan Part 2 policies on High Quality Design and Heritage clearly set out that development proposals must respond positively to the site context, including local character. The plan must be read as a whole.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
--	--	--	--	--

			The infrastructure improvements needed for Lee Green's development should be explicitly outlined in Lewisham's Local Plan.		
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I agree about the need for developing Leegate and the BMW garage for housing. However, the 'tall building' clause that excludes Lee Green from developing high rise buildings is not honoured in the plans. The criteria for excluding 'tall buildings' has not changed and Lee Green remains very much a low rise low density residential area that promotes community and inclusivity. A high rise and high density building plan will be detrimental to this and to the health and wellbeing of Lee Green residents.</p> <p>Any plans that also increase the density also impact on local infrastructure, services and transport. There is already significant congestion and pollution in Lee Green and having tall building on 3 sides will create a stagnant pool of pollution that is against the clean air commitments being made. This is especially in relation to December's Southwark Coroner's Court inquest that found that air pollution 'made a material contribution' to the death of Lewisham resident 9-year old [name removed].</p> <p>I urge Lewisham Council to consider these points and be accountable to its resident on these matters for the long term. The environment and 'community for all' should be at the heart of any development.</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The Council acknowledges the issue of poor air quality. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. 			<p>Lewisham council can help support the community by ensuring:</p> <ol style="list-style-type: none"> 1. Maximum of 10 stories high 2. School and healthcare facilities on site 3. Dedicated cycle lanes at Lee Green 4. Pedestrian Access to River quaggy 5. Increased public green space. 	<p>The draft Local Plan proposals for the Lee Green and East area include provisions around Healthy Streets to support walking and cycling, and improving access to the Quaggy.</p>	
	3	LEA 02 LEA SA 03	<p>Galliard Homes should not be allowed to exceed maximum existing local height by 37% including the Sainsburys and BMW sites, which also should not exceed existing local height by 37%.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	<p>No change.</p>
	3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am emailing to submit my views with regards to the consultation of the draft Lewisham Local Plan. I have just been informed that Galliards Homes have purchased the site at Leegate, Lee Green which is opposite my home in Eltham Road, SE12 8ES. I am aware that Galliards are in talks with Lewisham regarding their plans for the Leegate site which includes a proposal of up to 630 new units up to 15 storeys in height. I am also aware that included in the local plan are potential new building sites at Sainsbury's and the BMW garage, all located very close to each other in the same area.</p> <p>I understand there is no guidance in the local plan for height limits for the Leegate site, even though the Lee Neighbourhood Plan states that "building height should be in keeping with the surrounding buildings including the building design, mass, scale and detailed design and that generous set backs and public realm are included in order to build human scale". This needs to be clearly clarified in the local plan. Also The plan needs to give detailed guidance and clear plans on future building developments within the Lewisham and Lee Green area in order to guide future developers on what can and cannot be permitted in the area.</p> <p>The London plan states that tall buildings should only be built in places with transport links and other infrastructure that can support them. Well clearly the team at Galliards do not live in the area as although there is transport links in place these are severely stretched to the limit and if you add a possible 630 new units (or more) it will be impossible to get anywhere on public transport. This will include more cars in the area and what with the recent introduction of Low Traffic Neighbourhoods you will be contributing to the increase of traffic along Eltham Road and surrounding areas. Increasing pollution and poor living conditions to the residents already in place. We also do not have the infrastructure in place in the area to deal with the mass</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The draft Local Plan Part 2 policies on Sustainable design and infrastructure address low and zero carbon development.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>

		<p>increase on local resources, including Schooling, healthcare, car parking and shopping access.</p> <p>The Local plan needs to address these issues and state clearly with regards to housing intensification how it will support low carbon emissions, promote positive health for local residents impacted by the new developments, and how it will create more amenities needed for the growth in the area. It will also need to state how it will look out for current residents during the construction of these new properties with regards to noise pollution, dust pollution, access to their homes during the many years it will take to complete.</p> <p>I believe the maximum story height of any new developments in Lee Green should be four storeys in keeping with the area. The proposal shows that the buildings will be far too close to the main road and will take any natural light and overshadow the houses on the opposite side of the road, negatively impacting residents that already live there. There will also need to be more green areas to help with the increase in pollution that this design of buildings will create in the area on top of an already busy main road.</p>		
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I am responding to the Local Plan in particular on the issue of the future development of the Leegate Shopping Centre. It is very important that the Centre is redeveloped into a good shopping and social meeting area with new housing as well but as a local resident I do have some major concerns about the current proposals being developed by Galliard Homes which I will outline below.</p> <p>I understand the Council is potentially looking at 3 sites to develop, The Leegate Shopping Centre, The BMW garage Site and Sainsbury. It would be helpful to have some firmer guidance in the Local Plan to ensure that all these sites are developed in ways that link up with each other and enhance the whole area. The Plan should state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p> <p>However, I have major concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach 15 storeys high which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - which are 10 storeys high. I think the Local Plan should set a maximum height limit for any single building planned for the Lee Green area and also state an expectation that most new housing development should be in keeping with existing buildings of 3 or 4 storeys so that the public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings which would block out light from these areas.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Leegate Shopping Centre, Sainsbury's Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger's Head Pub and/or Grade II Listed Fire Station</p>

			<p>Very tall buildings would make the area unwelcoming and unattractive and deter people from using the shops and facilities being planned for the site.</p> <p>There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. But to do this any development will need to respect the proportions of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures of their proposed Leegate development.</p>		
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I was shocked to see the new plans for Leegate and the proposals to permit future tall buildings on the nearby Sainsburys and BMW sites. Whilst I support the building of affordable and sustainable new homes, and believe that Leegate has been allowed to fall into disrepair, I object to the density and height of the proposed new buildings.</p> <p>Please can you inform me how the current infrastructure (in particular access to schools, health centres, public open space, public transport) will be developed to support the building of up to 630 new homes.</p> <p>It is a blessing that planners of the past retained the heritage of the Grade II listed buildings that make up the North side of the Lee Green junction, giving the location a sense of place and character today. This heritage was destroyed on the South side of the junction. Current and future generations would value decent, sustainable and attractive homes, community services and infrastructure that enhance the character of Lee Green, rather than maximum height, maximum density blocks, with maximum profit for developers and long lasting negative impact on local people. Please do not allow buildings of up to 15 storeys on this site: it is not appropriate. None of the blocks should be higher than the nearby 10 storey Leybridge blocks, which are of much lower density, surrounded by green space, trees and hedges and not overshadowing listed buildings.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.	
3	LEA 02	<p>I do understand the need for increased housing stock. I also welcome development of the Leegate site in Lee Green, however I would like to a significant proportion of green spaces within any developments and a maximum building storey height for any future housing developments to be no higher than 4 storeys on the Leegate site in keeping with the surrounding area and for building height and density of any developments to be mentioned in the Local Plan. I would like to see a building height of no more than 4 storeys at the Sainsbury's site and no more than 4 storeys at the BMW garage site..</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	

				<p>Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>Given the urban nature of the sites in Lee Green and the need to optimise the use of available land to respond to London's housing crisis it not possible to include significant, large open space – however each scheme should provide adequate public and private amenity space.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I am aware that there is a need for housing stock within London and that within the Local Plan in addition to the Leegate site, Sainsbury's and the BMW Garage which are all in close proximity to my home have been identified as potential sites for housing developments in the future. It concerns me that there is no detailed guidance within the Local Plan setting out clearly the plans for future developments within Lewisham and the Lee Green area specifically and this may allow future developers the right to build as set out in the Local Plan.</p> <p>If guidance is not robust and clear the impact on the Lee Green and surrounding area will be detrimental in so many areas. The infrastructure within the area does not support any extensive developments. The area is already negatively impacted by the introduction of the Low Traffic Neighbourhoods which is unfairly and dangerously contributing to increased traffic along Eltham Road and the surrounding streets. Mass housing developments will exacerbate this, resulting in huge volumes of traffic and carbon emissions which come with it, affecting the health of the residents who live in the area. In addition, huge developments will lead to an increase in car parking, shopping access, schools, along with a huge demand on public transport. We do not have the infrastructure in place to support this.</p>	<p>Noted. The Local Plan is a strategic policy document and the Council needs to carefully consider the level of detail provided for each area within the site allocations. Further detailed guidance at a masterplanning level would normally be undertaken as part of a Framework Document or Supplementary Planning Document (SPD).</p> <p>Low Traffic Neighbourhoods are outside the scope of the Local Plan.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p>	No change.	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>In respect of Local Plan guidance for Lee Green, I am happy for the Leegate, Sainsbury's and BMW Garage sites to be built on for housing, but the density of housing must be in keeping with the surrounding area and adhere to the London Plan. The Sainsbury's site could be redeveloped to include low-level housing but the supermarket must be retained, particularly as the demand for such facilities will increase if more housing is built. The BMW Garage is on a small site and I would prefer the garage to remain, but if the site is to be used for housing, it must not tower above the adjoining buildings and must also allow for access to the River Quaggy as stated in the Local Plan. I would be delighted if Leegate is developed, but there must be facilities for the local community including neighbourhood retail space and other community facilities such as a community centre and fitness/wellness facilities. The London Plan clearly states that tall buildings should only be built in places with transport links and other infrastructure that can support them, and on that basis Lewisham has explicitly excluded Lee Green from its Tall Building</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	

			<p>opportunity areas in its draft Local Plan. Galliard's plans to build up to 15 stories high are totally unacceptable and would severely detract from the overall look of Lee Green. We have all seen the detrimental effect of the large number of tower blocks in Lewisham town centre and this building density would be completely out of place in Lee Green. In my opinion the maximum height of the Leegate development should be 10 stories (with some variation between the buildings), 5 stories for the Sainsbury's site and no more than 3 stories on the BMW Garage site.</p>	<p>Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>Galliard Homes should not be allowed to exceed maximum existing local height by 37% including the Sainsburys and BMW sites, which also should not exceed existing local height by 37%.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	<p>No change.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>We wish to make the following points regarding Lewisham's Local Plan and Galliard Homes proposals to develop Leegate:</p> <p>Density</p> <p>In the draft Local Plan, three large sites in Lee Green have been allocated for housing – Leegate, Sainsburys and the BMW garage. It is questionable whether these sites can all sustain a high volume of housing. Large increases in housing need corresponding increases in infrastructure. Lee Green is not currently allocated any money from Lewisham council's major infrastructure spending pot. Other wards are. Lee Green also receives the lowest amount of all Lewisham's wards from the much smaller 'community' infrastructure pot. Galliard Homes proposals for Leegate are for over 630 housing units; more units than the Leybridge Estate behind Leegate has. When the Leybridge Estate was built, Brindishe Lee was built to educate its children. To serve all the residents of the proposed Galliard Homes development, considerable increase to the infrastructure of Lee Green will be needed and if the Sainsburys and BMW garage sites are developed to similar density as Galliards proposed Leegate plans, demand for local infrastructure will be tripled. In addition to schools, GP surgeries, dentists, improvements in public transport and green spaces would be required for residents. These infrastructure improvements should all be named in Lewisham's Local Plan, and information given on their location, when this will happen and how they will be paid for.</p> <p>Increasing the housing density would also add to traffic generated by the residents by way of delivery vans, visitors etc. The newly imposed Low Traffic Neighbourhood scheme has generated considerable additional traffic congestion at the traffic lights at Lee Green as traffic is funnelled on to Eltham Road and Burnt Ash Road and a huge residential increase will bring more traffic delays into the area.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Leegate Shopping Centre, Sainsbury's Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger's Head Pub and/or Grade II Listed Fire Station</p>	

			<p>We also question the necessity of developing all three sites with the population of London shown to be decreasing.</p> <p>Height The 10 storey Leybridge Estate behind Leegate is currently the tallest building in Lee Green but Galliard Homes are proposing building up to 15 storeys high, exceeding maximum existing local height by 37%. If this were allowed, it could be a precedent for developers wishing to redevelop the Sainsburys and BMW sites, therefore we propose that the 10 storey height limit for each site is written into Lewisham's Local Plan. The London Plan states all tall buildings should only be built in places with transport links and other infrastructure that can support them. Any new development should fit in with the local area which has a 4 storey high Grade II listed fire station opposite Leegate, a locally listed Old Tigers Head of 3 storeys opposite and the Lee Manor Conservation Area in the vicinity.</p>		
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am responding to the Local Plan in particular on the issue of the future development of the Leegate Shopping Centre. It is very important that the Centre is redeveloped into a good shopping and social meeting area with new housing as well but as a local resident I do have some major concerns about the current proposals being developed by Galliard Homes which I will outline below.</p> <p>I understand the Council is potentially looking at 3 sites to develop, The Leegate Shopping Centre, The BMW garage Site and Sainsbury. It would be helpful to have some firmer guidance in the Local Plan to ensure that all these sites are developed in ways that link up with each other and enhance the whole area. The Plan should state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p> <p>Lewisham Homes have been very supportive of adding Swift boxes or Swift bricks into the soffits of new buildings and I think that addition would also be very welcome along with any other nature friendly initiatives that can be added.</p> <p>I do have major concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach 15 storeys high which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - which are 10 storeys high.</p> <p>I think the Local Plan should set a 10 storey maximum height limit for any single building planned for the Lee Green area and also state an expectation that most new housing development should be in keeping with existing buildings of 3 or 4 storeys so that the public areas provided</p>	<p>Noted. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures of their proposed Leegate development.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by older people when shopping etc.</p>		
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I am responding to the Draft Local Plan, As a local resident I have focussed on the proposals as they affect Lee Green and especially the issue of the future development of the Leegate Shopping Centre. I do also have some major concerns prompted by recent and current development proposals which prompt some of our comments below.</p> <p>The draft plan proposes that Lee Green be designated a District Centre and there is a cluster of 3 sites proposed for development, The Leegate Shopping Centre, The BMW garage Site and Sainsbury.</p> <p>There should be guidance in the Local Plan to ensure that all these sites are developed in ways that link up with each other and enhance the whole area and do not negatively affect the area.</p> <p>DESIGN Context</p> <p>The Plan should state clearly that new developments on these sites must sympathetic with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head. Figure 5.1 in the draft plan appears to identify the Lee Green sites as a proposed location for tall buildings (30m plus). Lee is a suburb and not a city centre, this scale is not appropriate to the existing fabric and the phrase "emerging context" looks like a pretext for overdevelopment.</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The Local Plan is a strategic policy document and the Council needs to carefully consider the level of detail provided for each area within the site allocations. Further detailed guidance at a masterplanning level would normally be undertaken as part of a Framework Document or Supplementary Planning Document (SPD).</p> <p>The new London Plan has removed the density matrix, as developments are now expected to use the design-led approach to demonstrate how the 'optimal capacity' of a site will be realised. Therefore it is not considered appropriate to set a fixed plot development / density ratio for housing. The Local Plan takes forward the London Plan approach, with additional details to ensure full consideration of a site and its local context, including heritage and character.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Leegate Shopping Centre, Sainsbury's Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger's Head Pub and/or Grade II Listed Fire Station</p>	

			<p>Plot Development ratio/ Density There should be some form of guideline to the allowable density of building footprints. Increased building Height should be balanced against reduced plot coverage. Permeability, rights of way, access to Daylight & Sunlight minimum Pavement widths The Leybridge Court Towers are 10 stories above ground level and were recently used by st Modwen as a benchmark for height and a justification for their proposals however these towers have shallow floorplates and have significant landscaped grounds surrounding them and allow daylight</p> <p>Public green space and amenity The maps in the Draft Plan identify that there is a lack of public open space the substantial increase in population density resulting from the development of these three sites will create an increased need for open spaces for leisure and sport. While the neighbourhood has several lovely existing parks (some of which are located in Greenwich). These are all well used and the increase in population will place these under greater pressure. Most of the existing open spaces are the legacy of historic planning or post war development. The local plan should include some proposals for improved public space and amenity in Lee. The recent developments proposed at Leegate reduced public civic space.</p> <p>Ecology The work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lewisham.</p> <p>Infrastructure There appears to be no explicit link between the additional development/population, proposed at Lee Green and the provision of social infrastructure. Parks, sports facilities. Nursery Schools, primary Schools, Secondary schools, Doctors, Dentists, The infrastructure improvements needed for Lee Green's development should be explicitly outlined in Lewisham's Local Plan.</p>	<p>Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>We will continue to work with key stakeholders, including the Friends of the Quaggy, through the plan making and development process. The draft Local Plan includes a number of provisions for river protection and improvements, including in the East area.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	LEA 02 LEA SA 03	<p>I am responding to the local plan for the redevelopment of the Leegate centre.</p> <p>While I understand the need for redevelopment of the Leegate, I would ask the current proposal by Galliard to be scrapped and redesigned. I DO NOT believe we need over 10 storey or higher buildings in area which is typically built no higher than three.</p> <p>We live right by the Leegate centre and the area has been brought to life by the new shops and yoga studio which has allowed independent businesses and a community hub to</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>It should be noted that although the Council does encourage developers to carry out pre-application consultation with residents there is no statutory requirement and this is at the discretion of the developer.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	

			<p>thrive. This has added real value to our local area and I would hope that any new proposals would incorporate opportunity for independent businesses into the new space. Lockdown has also show that we desperately need to protect public space, so the centre of the Leegate and green space should not be built on. But most importantly the towers should be in keeping with other buildings in the area, as has always been the case with new buildings. Our flats on Burnt Ash Road are three storeys high and set back from the road and this is high enough. There is not enough green space to accommodate the increase in people or community facilities such as schools or doctors for anything bigger. We desperately need affordable housing in the area, but not luxury apartments or similar.</p> <p>Please do not go ahead and give more time for public consultation before allowing this redevelopment.</p>	<p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The site allocations for Lee Green district centre include requirements for development to contribute to the delivery of significant public realm enhancements, including new publicly accessible open space within the town centre.</p> <p>The draft Local Plan Part 2 Green infrastructure section also set out policies for the protection and enhancement of open and green spaces.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I am writing to let you know my opinion on how the draft Local Plan could better support quality development in Lee Green.</p> <p>I am in principle supportive of the Leegate, Sainsburys and BMW garage sites being built on as they are brownfield sites and there is a clear need to protect the existing Metropolitan Open Land in the area. I am also happy to hear of the intention to open up public access to the Quaggy and aim to create high quality public space for pedestrians in Lee Green. However, I am concerned by the density of development suggested e.g. in St Modwen's former plan for Leegate, and apparently also in the draft plans for Leegate suggested by Galliard Homes. I feel that it is especially important to set specific limits for the density of development in the Lee Green area, as it would not be reasonable not to expect all possible sites to be developed to the same intensity in future, once a precedent has been set with one site. There are several important potential negative impacts of too dense development on these sites, which I shall detail below.</p> <p>Infrastructure</p> <p>I am concerned that developing these three sites intensively could lead to many new housing units being added to the area, without making allowances for improving local transport infrastructure. Public transport in the area appears to be good, with bus services and three train stations within walking distance. However, at peak times much of this existing public transport is already at full capacity.</p> <p>To build many more homes, without enough dedicated parking space for household cars because of the aim for new developments to be greener – which I am very supportive of – further investment in safe cycling infrastructure in this area, especially segregated lanes, and consultation with TfL on how local stations and bus services can support such an increased demand in public</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>	

transport is needed. I am concerned that otherwise the impact of dense new developments putting many more people onto public transport will cause such overcrowding that those people who do have the option of using cars will be more inclined to do so, which would be against the council's intention for the area with the work on introducing Low Traffic Neighbourhoods.

Education

I am concerned that the aim to develop the Leegate, Sainsbury's and BMW garage sites as mixed retail and residential use has not properly taken into account the current provision of education in the area. The primary schools in the area seem to be at or over capacity according to Ofsted, and it will not be an easy thing to set up new schools – the International Academy of Greenwich has just attempted to set up in the Lee Green area, and is now closing to all years except its current Year 10, which seems to be partly due to inability to source a permanent site. I urge the council to carefully consider the density of residential development which can be supported by existing primary schools, especially as the existing housing in the area remains attractive to young families according to the material put through my door by estate agents! Unless the council has evidence that the number of children in the area will somehow be going down soon, which continued movement of families into the area does not suggest, dense residential developments in the Lee Green area will cause a considerable local shortage of school places and this must be considered when decisions on housing density are made.

Height

Lewisham has explicitly excluded Lee Green from its Tall Building opportunity areas; yet Galliard Homes are proposing to build up to 15 storeys high, again setting a precedent for future development at the Sainsbury's and BMW sites to also build so high. Galliard claim that this height will not negatively impact on the three conservation areas and Lee Green's own listed buildings – which I question – however the council must also consider the likely impact on the conservation areas and Lee Green's own heritage features once the Leegate scheme has set a new maximum height for the area. In my opinion, the Leybridge Estate's ten storey height should be the maximum for the Lee Green area.

Also, this ten-storey maximum height should be allowed only when there is significant space between buildings of the maximum height; even if there are low-rise blocks between these. Several suggested schemes for Leegate have created considerable mass at around eight storeys across most of the development, and then top this with multiple even higher buildings. Even by itself, this will create a considerable change to the character of the area, and should something similar be planned for the Sainsbury's site the area and its listed buildings will become considerably overshadowed, certainly figuratively

			<p>and probably also literally. Great height and large massing of just-a-bit-shorter buildings will also certainly impact on the quality of public space at ground level in the area.</p> <p>I look forward to seeing the results of the consultation and the final Lewisham Local Plan</p>		
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>From what I have read in the proposal the plan does not provide information on how improvements to infrastructure and funding for such infrastructure will be met. For such a large development (and possible future developments on the nearby BMW garage and Sainsbury's sites) infrastructure improvements will be required.</p> <p>The emerging Plan from the Leegate pre consultation is not in line with Lewisham council's 'Draft Local Plan.'</p> <p>As residents of and contributors to the local community we would ask that the following is considered and is written into the Local plan prior to acceptance of planning permission.</p> <ol style="list-style-type: none"> 1) Maximum height for Leegate centre to be in accordance with existing buildings and reflected in the plans and within the Lewisham local Plan rules. 2) Maximum height of other buildings to be introduced to Lee Green is no higher than the existing 4 storey Victorian buildings on Lee High Road. 3) The development rules are fixed in terms of mass, height and density for all Lee Green surrounding areas so that creeping high rise sprawl is avoided within the area. 4) The development takes into consideration and sets out the infrastructure improvements that are required. Lewisham council sets out how they will fund this with clear plans and time scales. 5) Lewisham sets out a plan for how the green space behind Eltham Road to the north side can be used to facilitate increasing levels of population, whether this area forms Parkland for use by the whole community. <p>We really need the support of our local council and must be able to trust them to ensure that our local area is not ruined by their lack of foresight or planning and non-adherence to their own policies.</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan. Further details on the infrastructure funding are set out in Part 4 of the Local Plan on Delivery and monitoring.</p> <p>The site allocations for Lee Green district centre include requirements for development to contribute to the delivery of significant public realm enhancements, including new publicly accessible open space within the town centre.</p> <p>The draft Local Plan Part 2 Green infrastructure section also set out policies for the protection and enhancement of open and green spaces.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>I am responding to the Local Plan in particular on the issue of the future development of the Leegate Shopping Centre. It is very important that the Centre is redeveloped into a good shopping and social meeting area with new housing as well but as a local resident I do have some major concerns about the current proposals being developed by Galliard Homes which I will outline below.</p> <p>I understand the Council is potentially looking at 3 sites to develop, The Leegate Shopping Centre, The BMW garage</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Leegate Shopping Centre, Sainsbury's Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger's Head Pub and/or Grade II Listed Fire Station</p>	

			<p>Site and Sainsbury. It would be helpful to have some firmer guidance in the Local Plan to ensure that all these sites are developed in ways that link up with each other and enhance the whole area. The Plan should state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p> <p>However, I have major concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach 15 storeys high which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - which are 10 storeys high. I think the Local Plan should set a 10 storey maximum height limit for any single building planned for the Lee Green area and also state an expectation that most new housing development should be in keeping with existing buildings of 3 or 4 storeys so that the public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings which would block out light from these areas. Very tall buildings would make the area unwelcoming and unattractive and deter people from using the shops and facilities being planned for the site. There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. But to do this any development will need to respect the proportions of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures of their proposed Leegate development.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by older people when shopping etc.</p>	<p>character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	LEA 02 LEA SA 03	<p>I would like the plan to state that all future developments in Lee should be in keeping with existing developments, which are three or four stories high. The vast majority of buildings in this area are low rise.</p> <p>I would like the plan to state that if buildings are going to match the height of the one building that is taller - the Leybridge estate - that they must, like Leybridge, be set back from the main road and have a similar proportion of communal space per square foot of housing.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	

			<p>The plan should state that no new buildings in Lee should be taller than Leybridge and should recognise that Leybridge is an anomaly in the area. Leybridge's 10 stories are not a baseline for the area.</p> <p>There are serious issues around pollution on the junction by the Tigers Head and I understand these have previously been illegally high. The plan should state that new developments must not add to pollution on this junction.</p> <p>Any new developments must contribute to the local infrastructure in a proportionate and meaningful way. That means schools, community centres and green space along with genuinely affordable housing.</p> <p>It's really important that we ensure communal access to the Quaggy and the plan should prioritise access to green space and waterways.</p> <p>I think all of us who live in and around Leegate are happy that St Modwen are finally doing something about their poor quality stewardship of this part of our neighbourhood – even if 'that thing' is selling Leegate on. Their inability to do what they wanted with the site was in large part to do with our co-ordinated local response to their unsuitable plans. We will expect Gaillard to do better, and local people will expect them to present a plan for Leegate which is in keeping with the area. We will support the council as much as we can in ensuring a good result for Leegate and our community.</p> <p>The plan should as far as possible ensure new development balances social good with private profit – or at the very least, to ensure developers cannot use our neighbourhood simply to boost multi-million pound profits (Gaillard reported profits of £62m in 2019) and shareholder returns to people who live far away from here.</p>	<p>housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	LEA 02 LEA SA 03 LEA SA 04	<p>I understand the consultation on the plans for Leegate closes on 11 April. Lee Green has been run down for some time and this does need to be addressed but I do have some concerns about the plans I've seen and whether what's proposed is really consistent with the principles for development reflected in Lewisham's Local Plan.</p> <p>My main concern is about the potential height of the new development. I understand that it's proposed that properties may be up to 15 storeys high. This seems excessive and out of step with the rest of the local area. The Leybridge Estate is 10 storeys and most other buildings in the neighbourhood are considerably less. As well as dominating the landscape, tall buildings, especially when grouped together tend to block out light which would have an impact on for passing pedestrians, residents and the planting at ground level. I'm concerned that allowing 15 storeys here could set a precedent for other developments in the area. My personal preference would</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>Site allocation 4 Sainsbury's Lee Green includes the requirement for town centre uses which could accommodate the reprovision of a supermarket.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	

		<p>be for the new development to be no higher than Trinity School.</p> <p>I hope that Sainsburys will be retained and that the retail facilities will be expanded and improved. Given the potential increase in population arising from the plans, local facilities and services will need additional capacity. At the moment it's not clear to me how this will be addressed.</p> <p>Finally, while I welcome the suggestion that the River Quaggy should be opened up, more generally in the models of the development that I've seen it looks as if many - and possibly all - of the current trees around Sainsburys and on the adjacent streets would be removed and the extent of any new planting around the site looks quite limited. I hope that's not the case. Apart from aesthetic considerations, trees and other planting help counterbalance the effects of air pollution. These are busy roads.</p>	<p>Both the current and draft Local Plan include provisions around tree protection and, where necessary, appropriate replacement. This will be assessed through the Development Management process, should any future development proposal come forward.</p>	
3	<p>LEA 02</p> <p>LEA SA 03</p> <p>LEA SA 04</p> <p>LEA SA 05</p>	<p>A number of sites have been identified in Lee, being Leegate, Sainsbury's, Holme Lacey and Burnt Ash. Whilst I do not disagree that these areas are in need of development and improvements the current infrastructure is already under pressure. For instance:</p> <ol style="list-style-type: none"> 1. It is already difficult to get a doctors appointment within 7 days of request (and this was pre-Covid). We are not alone, this is a common problem in the area.; 2. school places are difficult to get locally (I note that your LP summary states that there are extra spaces to pupil uptake but I do not believe this is the case in this locality) albeit it might be the case Borough wide. 3. The transport network cannot currently cope and this cannot expect to improve with an even greater population in the "east" of the borough. Roads, buses and trains are at times impossible to use due to high volumes of traffic/people. 4. Green areas and play parks are already extremely busy and more families moving into the area will only further negatively impact on this. 5. Shops - there needs to be sufficient shops for the proposed size of the population and a variety of sized shops and offerings. Smaller shops should be given assistance to establish themselves. 6. Extra policing - greater population will require great police presence. <p>Given that the Leegate development alone is for 630 residential units - the potential strain on the current infrastructure is deeply concerning for us as current residents.</p> <p>What action will be taken to ensure that all developments are committed to a measurable improvement to all aspects of the current infrastructure which will be impacted by the development. For instance, I see that the Leegate proposals suggest financial contributions will be made - how can it be measured that all such contributions are</p>	<p>Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>The remainder of the response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The site allocations for Lee Green district centre include requirements for development to contribute to the delivery of significant public realm enhancements, including new publicly accessible open space within the town centre.</p> <p>The draft Local Plan Part 2 Green infrastructure section also set out policies for the protection and enhancement of open and green spaces, and Part 2 Community infrastructure dealing with children's place space.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>

			<p>spent on improving infrastructure in the immediate vicinity to the development which will be most affected and not dispersed through the borough.</p> <p>Also, I note that the proposed height of the Leegate development is 15 storeys. This is excessive and not in keeping with the area creating an eyesore and a “concrete jungle” feel. This should not be permitted at this height.</p>		
Blackheath Society no 2	3	LEA 02	<p>LEA2 Lee Green district centre and surrounds. We support the thrust of this policy. We particularly support the policy assertion in A that ‘Development proposals must contribute to a coordinated process of town centre renewal that responds positively to the area’s distinctive character.’ This implies a much-needed masterplan for the whole area rather than separate uncoordinated proposals for, say, Leegate and the Sainsbury’s site opposite it. We are concerned that the Plan as it stands may allow developers to argue for excessively tall, dense redevelopment of Leegate with poor public realm and lack of coordination with the rest of the District town centre. We are concerned that many of the same mistakes in respect of height, density, traffic, public realm and general lack of masterplan that have been made in recent town centre development in Lewisham centre will be repeated in Lee Green.</p>	<p>Noted. The Local Plan is a strategic policy document and the Council needs to carefully consider the level of detail provided for each area within the site allocations. Further detailed guidance at a masterplanning level would normally be undertaken as part of a Framework Document or Supplementary Planning Document (SPD).</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p>	No change.
Lee Forum	3	LEA 02 Site allocations	<p>Lee Green specific</p> <p>2.The height of all site allocations in the Lee Green area need to set out a maximum height for each site allocation.</p>	<p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>More explicit thresholds and guidance will be included in a revised policy on building heights, which will need to be read together with the site allocations.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
Lee Forum	3	LEA 02 LEA SA 03	<p>Leegate is a test case for the draft plan. The developer is currently proposing building 37% higher than the nearest tall building, which itself would not be admissible under the draft plan. Will Lewisham fight this?</p> <p>We consider there to be a danger of a mini cluster of buildings built ever higher by ambitious developers thinking each can build 37% higher than the last one. Should this happen the height of the 3rd site will be 28 storeys. This will not reflect the context and surrounding 3 storey buildings that the draft local plan claims to aspire to.</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.
Lee Forum	3	LEA 02	<p>The Lee Neighbourhood plan calls for a detailed design guide/master planning of Lee Green District Centre. This is essential given the above points and that Lewisham’s draft local plan includes three site allocations which together, when accounting for planned density, will overwhelm the rest of the town centre put together. We ask that Lewisham include an SPD specifically for Lee Green District centre.</p>	<p>Noted. The draft Local Plan provides a renewed emphasis on planning for the future of Lee Green, with an expanded suite of area-based and site specific policies, which represents a step change from the adopted plan.</p> <p>The Council has no plans at present to carry out a masterplanning exercise for Lee Green. We will keep this under review.</p>	No change.

Lee Forum	3	LEA 02	Lee Green district centre has three large site allocations in it which will, when built, increase the housing on those sites by a multiple of over 40. Yet no mention is made of how and what local infrastructure will be built to cater for hundreds of new homes.	Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.	No change.
Lee Forum	3	LEA 02	Page 640 LEA2 Lee Green district centre and surrounds makes no mention of the Forum or Lee Manor Conservation area or Proposed Conservation by (<i>officer note: name redacted</i>) and Lee Forum that comprise the bulk of the area. It should do. Extensive consultation with residents has been conducted about how they want the area to develop in drawing up the Neighbourhood Plan. The draft Neighbourhood plan, which is at an advanced stage, should be referenced in this section of Lewisham's Local Plan.	Noted. The Local Plan part 2 policies on Heritage address the historic environment including Conservation Areas. The place principles for the East Area reflect the need for development proposals to respond positively to the distinctive character of neighbourhoods within the sub-area. The plan must be read as a whole. The designation of new CAs is separate to the Local Plan process. Officers have taken into account emerging Neighbourhood Plans during the preparation of the Local Plan, having regard to the stage they have reached in the plan process. This is consistent with national planning policy and guidance. Many of themes and objectives for the Neighbourhood Plan have been captured by the local plan, for example, recognition of the network of green infrastructure and revitalisation of the town centre. Neighbourhood plans should set non-strategic policies which complement and help implement the Local Plan.	No change.
Lee Forum	3	LEA 02	We support the inclusion of workspace for Leegate where there is to be development for housing, a mix of retail and business units. Small offices add to a flexible mix and will increase local employment possibilities.	Support noted.	No change.
Lewisham Liberal Democrats	3	LEA 02	1. The work must be planned carefully so that residents have alternative places to shop during the rebuilding process (for supermarket sites). (LEA2 claims that development at Leegate and Sainsbury's, etc. should be coordinated, but there is no reference to this in individual site allocations.) What plans are there for the sequencing of work to ensure that benefits are maximised and disruption/costs are minimised?	Noted. The three sites at Lee Green are privately owned and as such it is difficult to predict when the sites will come forward. If and when planning applications are submitted these will need to be supported by a Construction Management Plan.	No change.
Lewisham Liberal Democrats	3	LEA 02	2. While it is a good idea to develop small shopping centres near railway stations, the Lee Green shopping centre is not served by a train station within a reasonable distance and public transport would have to be improved for it to be viable without substantial car parking.	Noted. The approach to focus development within and around town centres is a policy principle established by the London Plan, which the Local Plan takes forward.	No change.
Lewisham Liberal Democrats	3	LEA 02	3. The effects of the Lee Green LTN on traffic flow in the area has not been properly considered. The expressed aim to turn major arterial roads (onto which traffic has been funneled by LTNs) into 'healthy streets' seems a vain hope. With no plans for widening the roads or diverting the through-traffic travelling from central London to Kent and vice versa, it is not clear how Lee High Road, parts of Baring Road, the South Circular or the A21	Noted. Low Traffic Neighbourhoods are outside the scope of the Local Plan. The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.	No change.

			(Bromley Road) can be made more user-friendly. How are we going to reduce 'the dominance of vehicle traffic at the main junction', i.e. the crossroads at Lee Green? A thorough analysis of traffic flow throughout the borough taking into account recent modifications such as LTNs and cycle routes needs to be undertaken.	The site allocations within Lee Green set requirements for significant public realm improvements to support the Healthy Streets approach, the detailed nature of which will be considered through the development approvals process.	
Lewisham Liberal Democrats	3	LEA 02	<ul style="list-style-type: none"> If planning permission is granted, how will an increase in residential units from 450 to 630 in the Leegate development be supported and how will this affect the height of proposed buildings? See the scoping letter at https://planning.lewisham.gov.uk/online-applications/applicationDetails.do?activeTab=documents&keyVal= LEWIS DCAPR 108788. Will the financial contribution mentioned in the scoping letter (p. 7) be adequate to cover all the extra facilities needed: 'If the socio-economic assessment demonstrates that there will be an impact, mitigation will likely take the form of a financial contribution'? 	Noted. This response relates to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.	No change.
Lewisham Liberal Democrats	3	LEA 02	<ul style="list-style-type: none"> Consideration should be given to the establishment of an arts and creative industries hub in part of the Leegate Centre similar to those seen in East London e.g. at the Chisenhale Artplace https://chisenhale.co.uk/ 	Noted. The draft Local Plan makes provision for main town centre uses within Lee Green, which can include business and cultural uses. However in taking a flexible approach to support town centre viability it does not specify individual uses. The draft Local Plan has however identified where there may be scope for new Cultural Quarters, and these are set out in Part 2 in Economy and culture.	No change.
	3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>As a local resident I am responding to the Local Plan in particular on the issue of the future development of the Leegate Shopping Centre as I have some concerns about the proposals being developed by Galliard Homes. I understand the need for additional housing but it is essential that this it is redeveloped alongside shopping, nature and social meeting areas. Consideration need to be given to cyclists and cycle storage too for the residents of Lee.</p> <p>I understand the Council is potentially looking at 3 sites to develop, The Leegate Shopping Centre, The BMW garage Site and Sainsbury. It would be helpful to have some firmer guidance in the Local Plan to ensure that all these sites are developed in ways that link up with each other and enhance the whole area. The Plan should state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads most of which have a height of 3 or 4 storeys and include a Grade II listed fire station and a locally listed Old Tigers Head.</p> <p>I do have major concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach 15 storeys high which far exceeds the height of any other building in the area - the flats on the Leybridge Estate -</p>	<p>Noted. 			<p>which are 10 storeys high. I think the Local Plan should set a 10 storey maximum height limit for any single building planned for the Lee Green area and also state an expectation that most new housing development should be in keeping with existing buildings of 3 or 4 storeys so that the public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings which would block out light from these areas. Very tall buildings would make the area unwelcoming and unattractive and deter people from using the shops and facilities being planned for the site. Surely such high buildings would create a wind tunnel and be most unpleasant for people to use the space socially.</p> <p>There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. But to do this any development will need to respect the proportions of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces which is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures of their proposed Leegate development.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by older people when shopping etc.</p>	necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.	
3	LEA 02 LEA SA 03 LEA SA 04 LEA SA 05	<p>I am responding to the Lewisham Local Plan in particular on the issue of the future development of the Leegate Shopping Centre. It is very important that the Centre is redeveloped but as a local resident I do have some major concerns about the current proposals being developed by Galliard Homes and I would like to share these with you.</p> <p>I also understand the Council is potentially looking at three sites to develop, the Leegate Shopping Centre, The BMW garage site and Sainsbury's. It would be helpful to have some firmer guidance in the Local Plan to ensure that all these sites - should one or more be chosen for development - are developed in ways that link up with each other and enhance the whole area. The Local Plan should state clearly that new developments on these sites must fit in with existing older buildings at the Lee Green Cross Roads, most of which have a height of three or four storeys and include a Grade 2 listed fire station and a locally listed Old Tigers Head public house.</p> <p>I have major concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach fifteen storeys high which far exceeds the height of any</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Leegate Shopping Centre, Sainsbury's Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger's Head Pub and/or Grade II Listed Fire Station</p>	

			<p>other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - which are ten storeys high. I think the Lewisham Local Plan should set a ten storey maximum height limit for any buildings planned for Lee Green so that the public spaces provided for walking, sitting and shopping would not be overpowered by an array of high buildings which would block out light from these areas. To build to the heights proposed would make the area unwelcoming, unattractive and deter people from using the shops and facilities being planned for the site. There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Lewisham Local Plan suggests on page 633 para 16.7. But to do this, any development will need to respect the proportions of the local area and not create the high-rise blocks that have now been erected in parts of Kidbrooke Village and Lewisham town centre.</p>	<p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
Grove Park Neighbourhood Forum	3	LEA 03	<p>However, the policy falls short in setting out the vision for Grove Park especially the town centre and new district park that was put forward in the neighbourhood plan. Policy LEA3 should be elaborated, as it is done so for LEA2 for Lea Green. All the development principles especially a green infrastructure led development approach should be stated. Including the need for a collaborative masterplanning approach.</p>	<p>Noted. Officers have taken into account emerging Neighbourhood Plans during the preparation of the Local Plan, having regard to the stage they have reached in the plan process. This is consistent with national planning policy and guidance. Many of themes and objectives for the Neighbourhood Plan have been captured by the local plan, for example, recognition of the network of green infrastructure and revitalisation of the town centre. Neighbourhood plans should set non-strategic policies which complement and help implement the Local Plan.</p> <p>The key spatial objectives for the sub-area address the future of Grove Park Local Centre, and this is carried through to the place principles and site allocations, which reinforce the need for sites to be delivered comprehensively through a masterplan process.</p> <p>Policy LEA3 deals more broadly with the Strategic Area for Regeneration, rather than the town centre itself. The more extensive list of policies for LEA2 (in comparison to Grove Park) is commensurate with the higher order of Lee Green in the town centre hierarchy as a District Centre, as well as the nature and scale of development that is planned to come forward within the centre.</p>	No change.
Grove Park Neighbourhood Forum	3	LEA 03	<p>Welcome clause A, especially given the effort put in by the local community in establishing its neighbourhood plan.</p>	<p>Support noted.</p>	No change.
London Wildlife Trust	3	LEA 04	<p>We welcome and support this policy.</p>	<p>Support noted.</p>	No change.
Blackheath Society no 2	3	LEA 04	<p>LEA4 Linear network of green infrastructure. We support the development proposals. However we think the network of green infrastructure has been under defined and overstated. There appears to be no map showing the open spaces and parks and the lengthy built-up river, walking and cycle routes between them.</p>	<p>Noted.</p>	<p>Local Plan amended to show green infrastructure on Policies Map and other maps</p>

Grove Park Neighbourhood Forum	3	LEA 04	Clause A rightly points out the network of GI, however the corresponding map in Fig 16.2 does not represent this very well. We propose that the map is edited to highlight all GI in the neighbourhood area. Clause A could also relate back to the main policy which delivers Lewisham's green grid.	Noted.	Local Plan amended to show green infrastructure on Policies Map and other maps
Grove Park Neighbourhood Forum	3	LEA 04	Clause B should also highlight the ecosystem services offered by GI. Ecosystem services is now a well-known term and firmly established in Government strategies (i.e. 25 year environment plan) and documents, and is a fundamental aspect of why GI should be promoted, protected and enhanced, so that the multiple benefits are realised. While it can be covered by term 'environmental value', it should more explicitly make the links to the totality of services it offers, particularly in relation to climate adaptation and mitigation.	Agreed.	Policy LEA4.A amended to highlight the multifunctional value of Green Infrastructure.
Grove Park Neighbourhood Forum	3	LEA 04	This policy fails to highlight and promote the delivery of the most key objective, which is to deliver a new district park in this area as a key component of the linear network of green infrastructure, to bring about the beneficial use of MOL, in line with existing London and national policy.	Noted.	Text amended to make reference to the Councils ambition to create an integrated District Park at Grove Park.
Grove Park Neighbourhood Forum	3	LEA 04	Clause B(c) rightly promotes the enhancement of Green Chain Walk, which provides an east-west walking and cycling link. However, it should also highlight the nature trail from south circular to Elmstead Wood, through the proposed new district park and south through the renewed town centre, which creates a north – south link and connects the green spaces along the highlighted 'strategic green link' on the map in Fig 16.2.	Noted.	Local Plan amended to refer to east-west and north-south links.
Blackheath Society no 2	3	LEA 05	LEA5 East Lewisham links. As with LEA4, we support the development proposals, which they complement. However, again we feel the concept has been under defined. Again there seems to be no map (or cross-reference to one elsewhere).	Noted. The sub-area Lewisham Links policies have been absorbed into a borough-wide policy. Maps of the links for each of the sub-areas will be provided in the Regulation 19 plan. The plan must be read as a whole.	Local Plan amended with Lewisham links maps for each of the sub-areas.
Grove Park Neighbourhood Forum	3	LEA 05	Fig 16.2 highlights 'Lewisham Links'. However, to make clear that this is the same (?) as East Lewisham Links, the key label should be made the same.	Noted. The sub-area Lewisham Links policies have been absorbed into a borough-wide policy. Maps of the links for each of the sub-areas will be provided in the Regulation 19 plan. The plan must be read as a whole.	Local Plan amended with Lewisham links maps for each of the sub-areas.
Grove Park Neighbourhood Forum	3	LEA 05	Clarification is needed on the terms town versus local centres. Policy seems to designate two types? Locally one tends to refer to a 'town centre' when talking about Grove Park, even though its 'designation' is a local centre. Some clarity on the definition is needed to avoid confusion.	Noted. The hierarchy of centres is defined within the draft Local Plan part 2 Policy EC11 Town centre network and hierarchy.	No change.
Royal Borough of Greenwich	3	LEA SA 01	Heathside and Lethbridge Estate: While we support the redevelopment of the site, the improvements to the public realm and the increased permeability it provides, the allocation should be more explicit regarding appropriate heights. This site is on relatively high ground and those tall buildings that have already been delivered on the site are extremely prominent in views towards the west from Greenwich Park and Blackheath, more prominent than the much taller buildings at Lewisham Town Centre. The allocation should acknowledge this prominence and restrict building heights to ensure that further development does not exceed the heights of the already-delivered tall elements.	Noted. Heathside and Lethbridge has an existing planning approval and as such the heights for the development have now been established.	No change.

3	LEA SA 03	<p>I have concerns about the height of the buildings now proposed for Leegate by the current developers, Galliard Homes, as it seems they intend one block to reach 15 storeys high which far exceeds the height of any other building in the area and is fifty percent higher than the other highest nearby buildings - the flats on the Leybridge Estate - which are 10 storeys high. I think the Local Plan should set a 8 storey maximum height limit for any buildings planned for Lee Green so that the public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings which would block out light from these areas. This would make the area unwelcoming and unattractive and deter people from using the shops and facilities being planned for the site. There is an opportunity now to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7. But to do this any development will need to respect the proportions of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre.</p> <p>I believe it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a vibrant community centre and parking facilities especially needed by older people when shopping etc.</p>	<p>Noted. This response relates to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
3	LEA SA 03	<p>Dear Team, Having lived in the area since 1989, I have seen many changes. Thankfully, nothing as ridiculous as the latest Galliard Home plan for the Leegate Centre Site. This site changed hands for £Few hundred thousand when St Mowden first bought it. Now, with 650 units being submitted, the land could be worth £Millions And let's not beat around the bush, just a £Few hundred thousand will come back as Section 106 The rest, into the Galliard Homes pockets and out of the Borough Meanwhile, we will be living with this monstrosity for the next 10 years > and then the next 20 years as it sits empty waiting for another land speculator makes a play. Meanwhile the Borough will carry the cost of another failed development. Please, have some dignity. Tell the developer what can be done on this site. If you do not know the area – let me know and I'll show you around</p> <p>Density & Height Match the density of the Leybridge Estate Match the height of the Tigers Heads ... 4 storeys on any building fronting the roads Peak up to 8 on 2 towers at the back of the plot Add some green > plenty of green Its call Lee Green after all</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.

Have proper spaces between the blocks
With Green Space in between
And a little water feature [do you know that the Quaggy River is a short skip from the plot ?]

Use

Flats and apartments

A little street level retail space – boutique shops [if you know the area – you will know what I mean]

A little small office space

Precedent

If you green light this clump of building on an inappropriate site > it starts an arms race

The Sainsbury's site can be traded up ... to match the same height & density

So to the Stephen James site

Why not add the Pentacostal Church

Set an honest and suitable precedent

This is not Lewisham Town Centre

Representatives

You are our representatives

You are not Galliard Homes employees, on a profit share

You ask, "where do we find space for additional homes ?"

It is in front of you

Use the space wisely, and get properties built [not more land speculation that your indecision on this site has allowed on this site for decades]

The site can take some 250 units

Plus a handful of small retail space & space office space

--- for local people ... serving local people

Just look at the drawings

The plan is obscene

Look at all the green space on the Leebridge Estate

Compare that with the Galliard site

Make a difference to the neighbourhood

Two 8-storey towers – adjacent to Leebridge

Four 4-storey blocks ... 2 facing Sainsburys and 2 facing the fire station

All landscaped

Please don't forget about balance > look after the people

Badly design & built developments = vacant properties = vandalism, neglect, insufficient funds for management fee

= cycle of decline

Overcrowding = deprivation

Density = squeeze on local amenities

Too many units = squeeze on social services

Lack of green space = pollution

Lack of green space = bleak, unwanted properties > blight

You 3 know the site as well as I do.

			<p>If the history of Leegate tells us anything If the history of “London’s ugliest shopping centre” tells us anything</p> <p>The last thing we need on this site is an ugly, over crowded, ill thought out development le just bigger and uglier than the one it replaces</p> <p>Please represent the interests of the area Demand that Galliard Homes make a fair profit from the site by building what is needed Not an exorbitant profit and stuff us for years</p>		
3	LEA SA 03	<p>Lee Gate Proposed Development:</p> <p>I am a local resident and am very concerned to read the plans by Galliard Homes to develop this site with 3 x 15 storey buildings for 450 homes.</p> <p>15 storeys will be completely at odds with the current architecture, most of it low rise, max 3 storeys high, with the exception of the 10 storey existing block of flats. This will be a complete eyesore, akin to the ugly high rise development in central Lewisham. I am concerned that 450 homes here will create even more traffic, more overcrowding getting across Lee Green, and more car fumes. We need low rise, green spaces and more trees planted.</p> <p>How is it proposed that the infrastructure will be expanded to accommodate the additional 450 new homes, the traffic is tailing back at that junction at 7am. There is already a huge squeeze on school places, as well as no room at GP surgeries for new patients.</p> <p>I would appreciate the opportunity to review the planning application.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	
3	LEA SA 03	<p>To the Planners</p> <p>The proposed development at LeeGate is unacceptable to any rational councillor or resident.</p> <p>The height and density of the 450 homes is completely out of character with the area and should not be allowed.</p> <p>This is a blatant profit maximisation scheme at the expense of local residents. Not only will the proposal completely dominate the skyline, the local infrastructure will simply not be able to cope.</p> <p>Has the experience with St Modwen taught the council nothing about the motives behind the developers. If Galliard have over paid for the site, that’s their problem, not the local residents.</p> <p>I will strongly object and consider a civil legal case against Galliard and the Council if these proposals are passed by Lewisham council.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the LegGate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	

3	LEA SA 03	<p>I am writing in response to reading about the Local Plan for Lewisham and also the new proposals to redevelop the Leegate Centre. I live in Lee and have lived in LB Lewisham for the majority of the last 23 years. I am excited that Lee is to benefit from new homes and regeneration however I have some concerns. These points should be included in the local plan and be included in the brief for redeveloping Leegate;</p> <p>Building Design & Layout I am worried that the height of the tower in Leegate will be too high and may set a precedent for future new buildings in the area e.g. the proposed BMW garage and Sainsbury sites. I am concerned that any new buildings should complement the surrounding buildings and that height is a key consideration. I don't think the new developments should be higher than the existing Leybridge Buildings. Dense, high buildings worry create dark, unsafe, unwelcoming public areas between them. I would ask that distance between buildings, total height and pedestrian access are carefully considered so that Lee is a welcoming, safe place to live and shop.</p> <p>Increasing local facilities and schools in relation to additional homes I feel strongly that there is a need to build new, affordable housing in our area but the number of homes must be matched with additional green spaces, schools and transport links and capacity. I am the mother of a toddler and am concerned that there are too few school spaces already, it is unfair that we may need to travel by bus or car with primary school children.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
3	LEA SA 03	<p>Galliards proposed Leegate plans:</p> <p>I'm writing to you regarding the plans to re develop Lee Gate.</p> <p>At present, with the introduction of the LTN in Lewisham, the thought of over another 1000 drivers entering the junction at Lee Gate means that Lewisham will be grid locked. Therefore, it is unsustainable to be building 650 new properties on this small site unless you ensure that the residents do not own motor cars.</p> <p>I live in [text removed] and the barricades mean that I just drive further to get to the same place to avoid the traffic jams. This is the main route from Kent and the only people this affects is the local residents. You cannot stop through traffic by blocking the roads - the drivers have an inelastic demand and have no alternative. How else will goods imported get to their destination without a significant increase in transport costs?</p> <p>Is the borough going to provide more refuse dumps locally? Driving to New Cross from Lee is impossible so the rubbish is being dumped on the streets because the</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The LTN is not part of the consultation and is outside the scope of the Local Plan.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The site allocations set out requirements for public realm improvements to support this approach.</p> <p>The London Plan also has stringent parking requirements which promote car-free development in accessible locations and car-'lite' development elsewhere. As such an increase in homes should not necessarily correspond with an increase in car use.</p>	No change.

			<p>borough makes it impossible for people to dispose of their items and so they fly tip.</p> <p>I thought that we'd had one development with high rises and that has just been knocked down. It was called Kidbrooke. This was on a much bigger site and failed so why will this be any different?</p> <p>The two policies - building homes and preventing road use are diametrically opposed. More people mean more consumption, more cars and more carbon emissions.</p> <p>Without a sensible road use policy, the traffic caused by this development will be horrendous and pollution worse.</p> <p>I therefore object to this proposal and would like my comments noted.</p>		
3	LEA SA 03	<p>The proposals are not acceptable. They are a dominating mass of building which would overwhelm and be disproportionate in a community of homes and businesses of much smaller stature. The proposals are a cynical over development of a site which would distort a junction which has a listed four storey fire station and buildings of interest.</p> <p>This area is named Lee Green but the proposals have no 'green', indeed the large plane trees would be lost and public space disregarded.</p> <p>Over developing to this extent would set a precedent for the Sainsbury's and BMW garage sites and build problems for the future of our community. During our post COVID-19 recovery period where will the finance come from for schools, health- centres, transport and other infrastructure which would be needed to support a development like this? Where would this sit with the 'healthy neighbourhood scheme' when it would vastly increase the number of vehicles on our streets?</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>Details on the approaches on infrastructure funding are set out in the draft Local Plan Part 4 section on Delivery and monitoring.</p>	No change.	
3	LEA SA 03	<p>The Leegate centre is rundown so it would be great for it to be developed but the proposal from Galliard Homes will not result in a development that complements the area and develops the site in a sympathetic way. The proposed height and density of the development will be out of scale to the surrounding area. There is no need to build to 15 storeys - that will be completely out of character for the area and result in "tower blocks" with little landscaping, dark area and little green space. Lower rise buildings with landscaping and mixed use areas to reflect how we can live post-COVID would be a better way to develop - the Kidbrooke Estate has used landscaping effectively.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	
3	LEA SA 03	<p>At more local level I am concerned about the scale of the plans for redevelopment of the Leegate Shopping Centre. It is important that the redevelopment provides a good shopping and social meeting area alongside new housing, but as a local resident have major concerns about the height of the buildings proposed for Leegate by Galliard Homes, as it seems they intend one block to reach 15 storeys. This is fifty percent higher than the other highest</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p> <p>Leegate Shopping Centre, Sainsbury's Lee Green and Land at Lee High Road and Lee Road site allocations amended to refer to the Old Tiger's Head Pub and/or Grade II Listed Fire Station</p>	

		<p>nearby buildings, the flats on the Leybridge Estate, which are 10 storeys high.</p> <p>The current proposals are on a scale that does not fit with the local building profile. Existing older buildings at the Lee Green Cross Road are mostly 3 or 4 storeys, and include a Grade II listed fire station and a locally listed Old Tigers Head. I would like to see a 10 storey maximum height limit for any single building planned for the Lee Green area and an expectation that most new housing development should be in keeping with existing buildings of 3 or 4 storeys. This would mean that the public areas provided for walking, sitting and shopping would not be overpowered by an array of high buildings, which would also block out light from these areas.</p> <p>There is an opportunity to develop Lee Green into the 'vibrant, more welcoming and accessible' centre as the Plan suggests on page 633 para 16.7, but to do this any development will need to respect the proportions of the local area and not create the highrise blocks of parts of Kidbrooke Village and Lewisham town centre. It is important to note that although the existing Leybridge flats are 10 storey blocks they are set well back from the road and are situated in large green spaces. This is very different to the mass of high buildings bunched closely together that appear in Galliard Homes simulated pictures of their proposed Leegate development</p> <p>Given the potential of up to 630 new families moving into the area it is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre and increased transport provision: in pre-COVID days it was often importable to get on to trains at peak times with the existing number of residents, and buses were also often full.</p>	<p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	LEA SA 03	<p>I am writing in response to the proposals for development at Lee Green. Clearly there is a considerable need for improvement and I respect there is a need for housing. However the provision of additional housing should not come at the cost of depressing the area with overcrowding, inadequate service provision - schools, medical facilities etc. Galliard's proposal for high density housing is not the answer to a housing crisis. Lewisham needs to provide housing of a high standard, respecting the right of the residents of such development, to a quality of life- one that is not crammed into high rise flats adjacent to busy roads.</p> <p>I strongly reject any proposals to develop housing above 3 - 4 storeys on the buildings detailed in the proposals. The development of Lewisham town centre is a deplorable example of poor planning, showing scant regard for quality of life. High rise flats, packed close together, doubtless with privacy issues, close to areas of high road congestion</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.

			<p>causing harm to health etc. There is no sense of overall design and material use - a total eyesore, This must not be repeated in Lee.</p> <p>I urge the planning committee to scrutinise Galliard's proposals and put the quality of life of potential residents first. Consider the detrimental impact on road congestion - Sainsbury's and other retail outlets will undoubtedly entail higher car usage. Lewisham has some beautiful, well kept greenspaces with a phenomenal skyline visible from many areas - something many of us have come to value highly, during the last year. Don't destroy Lee with high rise development.</p>	<p>Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
3	LEA SA 03	<p>I have just seen the plans for developing Leegate. I have had little time to consider this in detail, but there is very little detail to study. The following points strike me immediately :-</p> <p>1) This is a very large development, the projected height seems to me quite excessive and out of keeping.</p> <p>2) While I understand the need for new homes the addition of some 450 seems excessive for this small area.</p> <p>3) 450 homes will demand an increase in local supportive infrastructure, this will require financing and further distortion of the locality.</p> <p>4) The considerable increase in local population which is planned will add, without doubt, to the pollution of an already highly polluted area with increased traffic.</p> <p>I am afraid that I have to record that I am highly opposed to these proposals as they stand at present.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.	
3	LEA SA 03	<p>Leegate Shopping Centre</p> <p>I have already added my comments for the Lewisham local plan on the Commonplace website but today (just 24 hours before the closing date for comments) I understand that Galliard Homes are thinking of building a 15 storey building with over 600 homes on the Leegate Shopping Centre site. This is outrageous! How is the area supposed to cope with these extra residents and their cars especially since the LTNs have made living in Lee very difficult?</p> <p>I am in agreement that this land is redeveloped into a good shopping and social meeting area, with an enlarged Community Centre at street level but the current proposals being discussed/developed by Galliard Homes CANNOT be allowed to go ahead. To construct a block of 15 storeys in height, far exceeds the height of any other building in the area so the Local Plan should state that the expectation of new shops/housing developments should be in keeping with existing buildings of 3 or 4 storeys so that any public areas/green spaces for walking or sitting would not be blocked off from any sunlight. The 3 London Plane trees</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.	

			<p>should remain. There needs to be respect for the proportions of the local area.</p> <p>A very tall building would be an eyesore and make the area unwelcoming, unattractive and deter people from using the new shops and facilities being planned for the site. Otherwise Lee Green will just become another Kidbrooke Village or Lewisham Town Centre as the new high-rise blocks in these areas have destroyed any community; they are dark, unsafe, horrible and just a wind tunnel catching the pollution.</p> <p>It is essential that the infrastructure should be developed so it can match the number of new residents with increased medical services, schools, green spaces, play areas, a good size community centre for people to use and sufficient parking facilities which will be especially needed by disabled and older people when shopping etc. The plan should state the importance of developing new green spaces and also improving existing ones for leisure use as more families come into the area. The infrastructure improvements needed for Lee Green's development should be explicitly outlined in Lewisham's Local Plan.</p>	<p>The draft Local Plan Part 2 section on Green infrastructure sets out approaches to green and open spaces. In addition, the site allocations for the district centre include provisions for new publicly accessible open space.</p>	
3	LEA SA 03	<p>Leegate Centre/Galliard Homes development proposal:</p> <p>The proposed development of the Leegate site is not in keeping with the scale of the existing site and its surroundings. Lee Green is not a town centre but a community in which the existing buildings respect the scale and future ones should do so.</p> <p>The density of the proposed dwellings is too great for the area to sustain without major investment in schools and supporting services. And where would these be provided?</p> <p>The height of the buildings would dwarf the immediate buildings and have a major visual impact on the surrounding area. The adjacent Leybridge estate is quite imposing but at least it is in a spacious green setting with trees.</p> <p>The development of Leegate is an ideal opportunity for a design that is both architecturally innovative, green and ecologically pioneering, not just a replica of the architectural follies that seem to be the norm in the 21st Century</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>	
3	LEA SA 03	<p>I am writing regarding the Leegate proposed development. I understand that the Council is considering proposals where Leegate could be up to 15 stories high and could include over 450 new homes.</p> <p>Allowing a development 15 storey high in an area where the surrounding buildings are at most four-storey high is simply grotesque. I am opposed to these plans. In addition it would set a precedent for further developers to demand similar increases over existing heights. I would urge the council to oppose such plans. The new development</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	<p>No change.</p>	

			should be no higher than the existing 10. -storey Leybridge estate, which is already the tallest building in Lee Green		
3	LEA SA 03	<p>I was shocked to hear from a neighbour in SE12 that Galliard homes have proposed a new scheme and there is only until the 11th to comment.</p> <p>The last scheme proposed by St Modwen wasn't right, and this is even worse. Nothing should be taller than the existing site. Nor should there be more density - it should maintain an open feel.</p> <p>Will it include a primary school? A GP? All things that are already stretched in the area.</p> <p>Please consider the local environment and impact.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	
3	LEA SA 03	<p>I write to express disagreement with the proposed plan by Galliard Homes to redevelop the Leegate Centre.</p> <p>First of all, the only messages I have received as a local resident on Cambridge Drive have been through a local community email group, not from Lewisham council, and further only on Friday, 9th April. It is beyond absurd that a response for comments is expected by Sunday, 11th April. It feels as if there is something wrong going on here.</p> <p>I will point out we all feel Leegate needs to be redeveloped but the proposed plans I have seen are unworkable for local residents and should not be approved.</p> <p>Building height of 15 stories - no way! 630 homes - no way! There should be a limit of 4-6 stories on anything built on that site consistent with the current building (certainly no higher). 630 homes is far too many for that tiny condensed area as density is already an issue. The leegate intersection is already the worst around for miles and it could not accommodate additional traffic from residents of 630 homes. This is crazy. If even half of these houses are built, what new infrastructure will go into the area to accommodate this? The plan makes no mention of any of this so therefore cannot be approved until a full infrastructure assessment on traffic (do not say new residents won't be allowed cars!), what new schools will be built, how many more NHS surgeries will be added, what transport links will be added (we will need a new DLR stop or tube stop nearby before this building is completed as the existing train lines are not good enough to accommodate the current population in normal times. I understand Sainsbury might get knocked down in this process and if so, where is a new supermarket (will need to be larger than existing) going to be built to accommodate all the new homes? There is no other supermarket in the local Lee Green area so residents cannot afford Sainsbury's to not exist for any period of time.</p> <p>Strangely, given the recent emphasis on clean neighbourhoods and bike lanes, etc. All of that will have to be reversed as there is no way the area can support the</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.	

		<p>increased density with all the streets blocked off. Cycling will have to be prohibited in the area as there will be a real chance with all the new residents and traffic that cyclists will get killed. It would be a real shame to unblock some of these roads as the area was just getting nice again. Oh well, the council cannot have everything.</p> <p>In summary, a development of the size being envisioned does not belong in this area or the Lee Green intersection. It would be better to build such a development on land out in the country where there is space and less congestion.</p> <p>I truly believe these plans and the little time residents have been given to respond are close to insulting. Let's get LeeGate redeveloped but with a sensible plan that fits the area and is not too large.</p>		
3	LEA SA 03	<p>We are writing to voice our opposition to the new development proposed by Galliard Homes at Leegate.</p> <p>As residents of [text removed], we would like a solution to the Leegate area. However, the plans that were put forward by Galliard are at a significant cost to the area.</p> <p>450 homes and tower blocks at 15 stories (or higher!!!) is not an appropriate development for the area. Leegate should not be turned into another Lewisham central with tall block towers and overcrowded streets. The buildings should be 5 - 10 stories in height. No higher than that. 10 stories MAX in height.</p> <p>The proposed structures would dwarf the surrounding areas and not to mention, there is a distinct lack of greenery in their proposal. All we see is a few scattered trees and lots of pavement. 50% of the buildings in Lee are listed buildings and the proposal does not fit with the architecture of the area. This sets a precedent that other developers would build tall towers and blight our community.</p> <p>Now, what about the infrastructure? Where will the children of the development go to school? Our neighbouring schools are at capacity and we would need a new school built to accommodate those children. Leybridge Estate was built and Brindishe Lee was built to educate those children. There is nothing in the plans as to where the children would go to school.</p> <p>Will there be more bus services to and from Lewisham to accommodate the new residents? What about a new secondary school? There is no discussion on how or what kind of infrastructure will be built.</p> <p>What would we like to see in the Leegate area?</p> <p>An area that looks similar to what was done to the Leybridge Estate. You have 1 - 2 towers of 10 stories and lots of greenery around the area. Or perhaps 4 - 5 towers</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.

			<p>of 6 stories in height? Greenery and spaces for residents and locals to enjoy.</p> <p>Have a look at the Conington Road area and you will see a small development that doesn't feel like it is intrusive. Housing should be adequately spaced with lots of light and greenery. Space of walking, cycling, and limit the use of cars since our area can't cope with any more cars.</p> <p>More local shops, not another Sainsbury's. We need a space to encourage local shops with discounted rents and revive the area with a bustling high street. We have a few great shops on Lee Road and we don't see why we can't encourage more locals to open their own businesses.</p> <p>Please lodge our opposition to the proposal by Galliard Homes.</p>		
3	LEA SA 03	<p>I write to you in regards to the proposed development at Lee Gate, which has recently been purchased from previous developer St Mowden's by Galliard Homes. The full plans for the development have still not been made available to the wider public, despite the deadline for public consultations over the Lewisham Local Plan being two days away.</p> <p>The limited information which has been shared so far indicates that the development will include some 450 homes, with some towers reaching a height of 15 storeys. While Leegate has long been under-utilised and in an almost derelict state and must certainly be redeveloped, Galliard Homes' plan would significantly alter the skyline of the local area and increase the density of what is currently a largely suburban, low-density area. The local plan should state that developments in the Leegate area should not exceed the existing height of 10 storeys and, if they were to include 10-storey towers, should not be built in the density currently proposed. A density similar to that of the Leybridge estate would be more appropriate.</p> <p>Furthermore, public services in Leegate and the local area are already under serious strain. Traffic is a significant problem at the Leegate intersection, queues at Leegate post office regularly last for an hour or more, and trains through Lee are already filled to capacity during normal non-pandemic times. The homes in the Galliard development, as with all other newbuild developments in the area, will be marketed towards commuters working in central London. The addition of 450 new homes will therefore place huge amounts of strain on the local transport services, which could become unmanageable without the necessary public investment. The local plan should include provisions for further investment in transport links and public services in the Leegate area.</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA SA 03	<p>I have been made aware that plans are afoot by Galliard Homes to redevelop Leegate with new homes that will be in a development as tall as 15 storeys high...!</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to</p>	No change.	

			<p>I also understand that the tallest buildings in the surrounding area are no more than 4 storeys high...so I think it is fair to say that this is very much out of keeping with the local area and could set a dangerous precedent.</p> <p>I would strongly urge not to accept such plans and instead suggest a design more in keeping with the local geography.</p>	<p>express their views on the scheme through the Development Management process.</p>	
3	LEA SA 03	<p>Density</p> <p>Welcoming both new residents and new housing would be expected but the council has entertained proposals for Leegate Centre over the last few years that many people find unacceptable in terms of housing density. Being told that PTALs and guidance on housing units per hectare are no longer going to be used has left people at a loss as to how to discuss just what is “high density”. In the confusion it appears that developers are getting greedier and greedier and that council officers and members are spinning in their race to meet targets that few local people support.</p> <p>The Mayor of London has said that a supplementary planning guidance will be issued to assist councils apply density policy. This guidance will not be subject to consultation and has not been published yet. The ambiguous language of the London Plan is reflected in the draft Local Plan.</p> <p>In the draft Local Plan we have a few words on density but it would seem that Galliard Homes are not being asked to look even at this developing policy. Part Two sections 5.6, 5.32 and 5.51 along with QD6 appear to be relevant but have been ignored.</p> <p>It appears that the Galliard Homes proposal is allowed to play the trump card of “1,667 new homes a year” that allows all other considerations being ignored – height, bulk, employment, heritage, density.</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The Local Plan is required to be in general conformity with the London Plan. The new London Plan 2021 has removed the ‘density matrix’ and development proposals must now demonstrate how they will deliver the optimal capacity of a site using the design-led approach. The draft Local Plan takes this direction, and sets out additional policies to ensure that proposals have regard to the site context, including local character and heritage.</p>	No change.	
3	LEA SA 03	<p>I am writing to express my concern about Galliard Homes proposed development on the Leegate site.</p> <p>The suggestion that the development could be up to 15 storeys high seems to be completely out of scale with other properties in the area and also sets a worrying precedent for other possible developments in the area.</p> <p>What extra provision is being made for local infrastructure and facilities (schools, doctors, traffic etc.) if the proposal for up to 630 new homes goes ahead?</p> <p>We went through all of this when St Modwen made their ever escalating proposals for the site.</p> <p>I realise that the site needs to be redeveloped and that it is an ideal site for new homes but not at the expense of the aesthetics and sustainability of the existing community.</p> <p>The changes to traffic flow in the low traffic zones have already greatly increased the traffic on Burnt Ash Road and the Tigers Head junction, such a large development on Leegate would only make this worse, with knock on</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The site allocations for the district centre make provisions for public realm enhancements to support this approach.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.	

			<p>consequences for pollution which is already above acceptable levels.</p> <p>Don't destroy the character and sustainability Lee Green by waving through these proposals (which seem to have had very little public exposure or input).</p>		
3	LEA SA 03	<p>I have just read about the new planned development for Leegate and was very concerned about the architects plans I saw. I have been a Hither Green/Lee resident for over twenty years and feel that the plans proposed by Galliard Homes of 450 units would be detrimental to local life.</p> <p>1. From a visual viewpoint, I am concerned about the impact that modern fairly low quality building would have on an area which mostly consists of period victorian housing. It looks quite similar to the developments in Kidbrooke village and I cannot see how this would fit in in our area. I am particularly concerned about the 15 storey height of the development which would completely ruin our area.</p> <p>2. This is an already populated area, with little extra space for parking. Where would the cars of future inhabitants go and local residents already struggle to find a parking space?</p> <p>3. Local primary and secondary schools are already over-subscribed. The International Academy of Greenwich which had been planned in the fields opposite is now closing as the council refused planning permission. Where will the children of these families study?</p> <p>I therefore oppose the plans as they currently stand and would urge the council to reconsider their decision.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies.</p> <p>The London Plan sets more stringent parking standards, and the expectation is that new developments within the town centre will be car-free or 'car-lite'.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan</p>	No change.	
3	LEA SA 03	<p>LEEGATE</p> <p>4.The Council will recall all too vividly the lengthy dialogue with St Modwen before they sold the site. A number of important parameters were established then than must not be lost sight of. There will clearly need to be full and effective consultation on the proposals that emerge from Galliard Homes.</p> <p>5.As we recall it, the original St Modwen proposals some years ago did not offer enough housing, particularly public housing. However to go to 600+ units from the last St M. figure we saw which was 400- will surely overdevelop the site.The blocks look to be too high ,overshadowing other parts of the area. We also need to retain small scale useful retail units- pharmacists, hardware, newsagents, gyms, cafes. Some space for community provision and services would also be essential. Some of the accommodation needs to be in family houses and not just flats. Then there was agreement at an earlier stage that some public open space needed to be retained in any redevelopment. Finally, the more units, the more the problems referred to at 3. above</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	

3	LEA SA 03	<p>Why a Section S215 Notice under the Town and Country Planning Act 1990 was never issued to St Modwen defies belief? Maybe in the light of the Fly tip that is the Council's Local Recycling Bin area on the corner of Leegate that blights the Square and Trees, one should be served on themselves?</p> <p>The Plane trees are pollution busting assets which have not had the TPOs restored as they should have once the ASDA fell through. They have given service for years and will continue to do so for quite a while yet. They co-exist with the splendid line at Leyland Road and are undoubted habitat for many species. These should be the starting point for a green square with the existing throughput away from pollution. I show photos of the rubbish attracting alley at Osberton Road which is now the access to Cambridge Drive as an illustration of when the Council built over the road.</p>	<p>Noted. This response seems to be relating to proposals previously prepared by St Mowdens for the Leegate site and is not part of this Local Plan consultation.</p> <p>Both the adopted and draft Local Plan include provisions on tree retention, and where necessary replacement. The assessment of any trees lost as part of any future proposals for Leegate will be made through the Development Management process and residents will have the opportunity to express their views as part of the statutory consultation.</p>	No change.
3	LEA SA 03	<p>Having seen the proposals regarding Galliard Homes for Lee Gate I am horrified. The idea of more high rise buildings in any part of Lewisham is terrible. I address the following:</p> <p>Housing type - firstly Lewisham lacks medium to low rise safe social housing, we do not require anymore large, imposing buildings in Lewisham. Experiencing the ongoing works near Lewisham Station has the infrastructure been taken into account, where are these tenants going to be parking, more fumes, more traffic and already we have roads closed to "make things better" but actually forcing more traffic onto the main roads, slowing all journeys. In general appointments already take forever, the occupants will need to GPs, schools all services anyone living in their borough deserves and these are already pushed to the limit. The trains at Lewisham and Hither Green (the most popular stations) are like rush hour all the time since the new blocks in Lewisham as these are the best routes home, Lee and Blackheath are two platform stations and it would mean the same for them. Stations I consider comfortable to travel from.</p> <p>Maximum height - if approved this should low to medium rise, the road widths are too narrow this is not the US, the path down to Deptford already has too many tall buildings, it is imposing the traffic is ridiculous and if the housing does not have enough parking, then this will cause an additional issue. This should be considered for all three sites. Lee is an area where you meet people who have lived here for over 30 years happily due to what it looks like, its proximity to services, trains.</p> <p>In general, intense additional is a bad idea, it is already priced people out of the market when it comes to buying with the ridiculous "Blackheath borders" tag of the last 5-6 years allowing agents to value properties ridiculously. If the idea is to attract I feel it will make the affluent leave if they are surrounded by more traffic, it is their voices that are the loudest on social media when they cannot get from A to B without driving all around all the place, if the parks are packed and they cannot get a GP appointment for</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The draft Local Plan sets a strategic target for 50% of all new homes to be genuinely affordable. Further details are set out in the Part 2 section on Housing. Planning applications will be assessed against the extant development plan policies.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.

			<p>weeks due to the surgeries trying to serve their communities, will they stay. They will move out for more space and less competition for local amenities. If the idea is just income, the supply of more affordable housing would be the best option, there are a large amount of people paying too high rents who would love to stay in this area and contribute for the longer term but with this plans you chase the further afield.</p> <p>Any plans that encroach on the quaggy, the park or any of the views and spaces are a bad idea, which are what attract people to the area, not high rise ugly flats as those in the middle of Lewisham and enroute to Deptford. The housing in the area is already quite intense it would be nice to have space thoughtfully occupied.</p>		
3	LEA SA 03	<p>Lewisham's Local Plan and Galliard Homes proposals to develop Leegate:</p> <p>2. Re Height</p> <p>It is proposed that the height should be 15 storeys which is 37% higher than the nearest high rise block and totally out of keeping with the older buildings nearby which are at most of 3 or 4 storeys and some of which are listed. The proposed development does not fit in with the local area and furthermore appears to contravene the London Plan which provides that tall buildings should only be built where there is infrastructure and transport links to support them. As I have said earlier this is not the case here and there does not appear to be any provision for this, indeed there would be nowhere for it.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA SA 03	<p>We would like to respond to the consultation on Lewisham's Local Plan as people who live in Lee Green. We are very concerned by the plans we have seen from Galliard Homes for the Leegate Shopping Centre site, and in particular by the proposed 15-storey tower which would dominate the crossroads and surrounding area.</p> <p>As people who walk across the crossroads at Lee Green all the time, I would not want to see the environment in that area, which already suffers from traffic and pollution, made worse by the building of a tower which is completely out of scale with surrounding buildings and would block out light. We think the Local Plan should specify a maximum height for developments in Lee Green which should not be any higher than the existing ten-storey residential blocks, which are also set back a considerable way from the road.</p> <p>We are equally concerned that Galliard are suggesting the site could accommodate up to 630 units. As far as we are concerned the 450 units proposed by St Modwen in its plans, which we saw at the local library, is the absolute maximum that should be allowed on the Leegate site. Again, it would be sensible to include a limit in the Local Plan so developers have a clear understanding of what would be suitable. We are disappointed that, given the comments already made about the Lee Green area in the Local Plan, that Galliard should propose a housing density</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The site allocations for Lee Green district centre include provisions for significant public realm enhancements to support this approach.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	

			<p>that would be very damaging to our area and totally out of character.</p> <p>As the Local Plan states, a successful redevelopment of the Leegate centre is crucial to the future of Lee Green. The redevelopment will bring more traffic to our already crowded roads - there will be more people in our busy local parks, needing medical treatment, in our schools and on our trains. So both for their sake and for ours, it is really important that we do not sacrifice in the process the good things about Lee Green - the greener and more suburban character that you mention in the Local Plan, and I would add the attractive and friendly environment.</p>		
3	LEA SA 03	<p>I am writing to you to object to the building of a 15 storey high rise block in Lee Green. Tower blocks are not the best way to house people – architects should be made to live in such blocks to see how inconvenient they are. Also they throw huge shadows and will also overlook all the houses in the surrounding area. People with families prefer to live in a house with a garden so that children can play safely under the eyes of their parents and not playing 15 storeys lower where parents cannot safely let their children play. Lee Green is supposed to be an area where it is pleasant to live and erecting such large buildings which will tower over other buildings and homes is not the way to go. I hope these thoughts will be taken into consideration at the next planning meeting and also that all Lee Green residents will be informed and enabled to attend any such planning meeting before final decisions are made.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA SA 03	<p>We wish to register our strong objection to the plans by Galliard to build 630 new homes in Leegate.</p> <p>The infrastructure does not exist to support the thousands of extra people that will be living in these homes.</p> <p>Where are the schools, health facilities, public transport, the shops including places to eat and drink and the green spaces that will allow people to relax and unwind?</p> <p>The services currently available in the area will be overwhelmed.</p> <p>Has any major funding been allocated to this project? The Lee Ward already receives the lowest amount of funding than any other ward in Lewisham.</p> <p>No building should be fifteen storeys high in this area! Five storeys high at the most.</p> <p>It sounds as though Galliard just want to pack as many people into an area regardless of the cost to those people or the people already residing in that area.</p> <p>We live on Burnt Ash Road and the traffic, especially since the Low Traffic Neighbourhood scheme was implemented, has been horrendous, slightly eased since the tweaking,</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public</p>	No change.	

		<p>but still of a very high volume. The Leegate proposal will just add more people trying to access an already polluted, high volume traffic area.</p> <p>The plans do not fit in with the aesthetic of the area. There will be a huge monolith of blocks of flats rising up at one end of Burnt Ash Road out of keeping with nearby buildings.</p> <p>Will there be balconies built into the design of these flats that will be big enough to accommodate a small table and chairs so people can have some small private outdoor space? This is vitally important for people's well-being. Balconies have been built onto every new block of flats in the centre of Lewisham and in Kidbrooke.</p> <p>This consultation is rushed and it is quite disgraceful that people in the local area have not been kept informed and given enough time to consider these proposals.</p>	<p>transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The site allocations for Lee Green district centre include provisions for significant public realm enhancements to support this approach.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>Details on the approaches to fund infrastructure are set out in the draft Local Plan Part 4 section on Delivery and monitoring</p> <p>The London Plan includes minimum internal and outdoor amenity space standards, which all development proposals must comply with. The draft Local Plan proposes to take forward these space standards.</p>	
3	LEA SA 03	<p>I object to this development in the form proposed by Lewisham and Galliard.</p> <p>I live near the site of this proposed development at the address below. (Note: address redacted by Council).</p> <p>If the development materialises at the scale, density and proportions implied by the plan conceptual drawings provided, it will be a most insensitive imposition that degrades the already poor quality of the built environment around the site e.g. Leegate precincts;. It will become a blight on the area before the shine wears off its cladding panels. Evidence - the hi-density megablock structures that we have seen thrown up along the riverfront in Greenwich (destined to turn into a sterile and unpleasant ghetto, and already showing the signs).</p> <p>The proposed structures are gross and overbearing and charmless and of intimidating dehumanising scale, "carbuncle" etc.. Imagine huddling in those dim cold canyons between the massive buildings trying to light a fag in the wind tunnels? The only relief might be graffiti.</p> <p>The proposed accommodation implies an increase in local resident density that far exceeds the capacity of the local retail, health, schools, leisure and other facilities available in the area, which is already borderline in terms of its capacity in these aspects. Local school catchments (for the schools that people want to get into) are already measured in envelopes of tens of meters. If this goes ahead almost all of the people who live in it will be off to Lewisham and Catford for the shops. Why not put them in Lewisham and Catford and reduce your carbon footprint and stop particulates and NOx from all the buses?</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The site allocations for Lee Green district centre include provisions for significant public realm enhancements to support this approach.</p>	No change.

		<p>The proposal ignores the physical reality of the site. The high density blocks on the Riverfront in Greenwich etc. sit within the expansive "riverscape" which grants some relief and space around the monolithic buildings. But such towering buildings are not appropriate in a location hemmed in on all sides by roads and lower building frontages, and no surrounding open vistas/sightlines to provide perspective and scale in which the buildings might be looked at so that at least they look like aesthetically interesting objects (even if nobody really likes living in them).</p> <p>I suggest something more sensitive like what has been done in Kidbrooke Village? Presumably the answer is that there is not enough area on the Leegate site so you can't get the bums in beds. So the developers want to go upwards and not sideways. In this setting that is a recipe for disaster that will bestow upon Lee a bigger Leegate eyesore than what we already have. Might it be wise to attend to lessons of that failed project to avoid repeat the planning and design errors of the past?.</p> <p>I am in favour of a sensitive smart city sustainable green infrastructure style redevelopment of this site - and something like a Kidbrooke Village style approach to the scale, green corridors and space etc. might work well. It should not include a tower block, and it should be designed to integrate into a corridor of increasing greenness and leafiness along the axis of Burnt Ash Road - Blackheath. Keeping that in mind the tower block will be much better fitted in at the Lewisham town end of the Lee-Lewisham axis.</p> <p>In other words my suggestion is the very obvious one - knock Leegate down, put something of no more than four storeys on the site with some nice trees and bistro's etc. Add some smart things like tech businesses, arts, etc. Face reality - there is no room here. Keep the high density housing in the places which are the natural homes of high density accommodation - i.e. the urban centres of Lewisham and Catford where all the shops are. Then the Borough will end up with a smart clean working town centre and a low density nice leafy suburban parts.</p> <p>I do hope this does not get further serious consideration. If it does I think it would show that Lewisham Council has a pretty disdainful attitude to the sustainability of our community and the quality of our local environment. I have long been surprised that the Council seems to think it's acceptable for people to continue living in the Leegate complex in its current state of decrepitude. St Modwen should be ashamed of the state of the place. Perhaps they are but can't do anything.</p> <p>Please register my objection to this proposed development. I suggest this proposal really does need re-</p>	<p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
--	--	---	---	--

			<p>appraisal and re-design at a fundamental level. It seems so thoughtless proposal that I wonder if it has been put out as a provocative opening gambit to elicit reaction from local community members about what they really want! No doubt it will be effective in that, but will it do any good? I haven't made much comment in the past but I believe the Lee community has been telling the Council for several years what it wants in relation to the St Modwen Leegate redevelopment, but those inputs must have, largely, been ignored judging from this Galliard proposal.</p> <p>Presumably if there is no room to build anything the Govt will relent on its exhortations to Council to build more. Is the Council looking at it from that point of view? I am sure if you took Boris Johnson to Leegate and showed him what you are proposing to build on there he would tell you it's bonkers. Has anyone thought of that?</p>		
3	LEA SA 03	<p>Leegate - new development proposals:</p> <p>Having briefly seen some of the proposals I am concerned about the adverse impact on the neighbourhood and the environment. Please send further details of the above proposal as I wish to comment urgently - regards - John Bevan.</p> <ul style="list-style-type: none"> - I have concerns about the height of the development proposed and believe that this is a case of overdevelopment on behalf of the developers! - Does the development takes account of the urban grain and context of the site! Currently this seems most unlikely! - What studies have been carried out to ensure that the resulting traffic is not going to cause yet more pollution on surrounding roads to the detriment of those living nearby? - With the amount of homes being proposed the adverse effects on infrastructure must be very serious. What is proposed to alleviate this? Are more GP's surgeries being proposed and have local hospitals been consulted about the impacts of this proposed development and what about the impacts on existing schools? - What conservation of environment has been considered? With the current climate crisis what measures have been taken to ensure that the buildings proposed do not contribute to the detriment of environment and to ensure positive standards of insulation and the embodiment of green energy? - As regards design and planning it is important that the spaces between buildings is as important as the buildings themselves - to provide a cleaner and more healthy environment, including more open, green space. - It appears here that too many buildings have been crammed onto the site. Overdevelopment again! 	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	<p>No change.</p>	

			<p>- What account has been taken in planning the housing with the need for more home working and the inevitable spatial consequences for the planning of living areas?</p> <p>- How much consultation has been undertaken with local residents and retail premises? Subsequently we all have to live with the consequences of the Councils development decisions. Please let this development be an exception to often poorly built planning and development, and to create better and more humane living and working spaces.</p>		
3	LEA SA 03	<p>I object to any 15 story buildings being built in Lee green. The maximum I would be happy with is 5 stories.</p> <p>If more housing is built, where will these people work? They will have to travel on the already busy trains and buses. They will contribute to the already busy roads if they are car owners.</p> <p>I hope that local business will be able to thrive? Especially charity shops seems SWOP as they are good got the environment and this is EXACTLY what should be the main focus.</p> <p>I also hope that access to the river will be made.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The draft Local Plan Part 2 section on Economy and culture sets out approaches to grow the local economy, recognising that Lewisham has one of the lowest jobs to resident worker ratios in London. The revitalisation of the district centre will support this objective.</p> <p>The draft Local Plan makes provision for a wide range of main town centre uses within Lee Green district centre. However to support the viability of the centre with a flexible policy approach, it does not specify the nature of business activities sought.</p> <p>The draft Local Plan makes provisions for river restoration and improved public access to the Quaggy and other rivers.</p>	No change.	
3	LEA SA 03	<p>High rise developments and Leegate Leegate shopping centre has been bought by a residential developer who plan to replace the shopping centre with a high rise development completely at odds to its historic surroundings.</p> <p>This area fronts a junction and would completely dominate and overshadow the four other historic corners which consist of Victorian buildings if no more than four to five stories in height.</p> <p>The local plan should protect areas such as this from high rise development. Family apartments and family housing mixed with independent retail that aesthetically matches the other three corners would benefit this area which acts as a gateway to Lee Green. A shaded, windy corridor caused by faceless high rises does not. Lewisham Gateway has already suffered from a disconnected look and feel of high rises. This is the council's opportunity to show they can work hand in hand with developers on sympathetic redevelopments that add character not take away from an area.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The London Plan, and draft Local Plan Part 2 Design section, include policies which address amenity, and in the case tall buildings, microclimate.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA SA 03	<p>I would like to reply to the Galliards plans for Leegate. I haven't had time to look at them in detail but what stood</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for</p>	No change.	

			<p>out was the large number of dwellings and the height of some of housing. This is a busy residual area already and the I'm not sure that for the couple of thousand extra people you propose to move here it will be a good experience. The height of the buildings is a real problem and would impinge on an already crowded area. They would dwarf the few attractive buildings around Leegate. How are these plans going to help or improve the area of Leegate? Will this number of dwellings be needed in the future? More people are leaving London and house prices in parts are already going down.</p>	<p>the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The latest population projections issued by the Greater London Authority indicate that whilst Covid-19 and Brexit have had short term impacts on migration patterns, London is forecast to continue growing over the long-term.</p>	
3	LEA SA 03	<p>Leegate shopping centre development:</p> <p>I do not support current proposals being developed by Galliard Homes for the Leegate shopping centre. The area does need redevelopment but the plans put forward do not enhance the local environment or economy.</p> <p>Considering the past 12 months' of lockdown we've all had to live under, the proposals fail to provide these new residents with adequate green space, Blackheath, Greenwich park, sutcliffe park and manor house gardens are already very busy and attracts people from miles around. The nearby Edith Nesbit park is not an inviting or adequate space to accommodate potential 630 plus residents.</p> <p>The height of the development is a safety concern especially as the windows of the apartments will directly overlook pavements - this is dangerous!</p> <p>There is no indication how they will deal with the further drain resources in this area - i.e. impact on schooling.</p> <p>The new development will increase traffic and pollution in an already busy area.</p> <p>I hope you take my concerns into consideration.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	
3	LEA SA 03	<p>In response to the consultation period for the Lewisham Local Plan, I am very much against the Galliards proposal to build up to 15 storeys high on the Leegate site.</p> <p>This is inappropriate and does not appear to be in compliance with the Local Plan. It would overshadow existing historic buildings and is likely to present dangerous shadowing and glare for the Lee Green junction, already the site of recent fatal accidents.</p> <p>The number of residential units would also require considerable increases in local infrastructure. Nowhere does Galliards appear to wish to contribute locally to amelioration of their plans impact on the neighbourhood.</p> <p>Please take these points into account when looking at the planning application.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>Planning applications will be considered against the extant development plan, having regard to any material weight afforded to emerging plans and the statutory stage they are at in the plan-making process.</p>	No change.	

3	LEA SA 03	<p>I am horrified at the plans for a 15 storey development at Leegate. I consider a development of no more than 5 storeys more suitable to the surrounding area. Any more than that would mean that the residents would not feel part of the strong community in the area.</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegte site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.
3	LEA SA 03	<p>I approve of building more homes, but I think we need to ensure proper provision of surrounding facilities. The traffic situation along Lee High road is worse than ever since the bus lanes were made 24/7 and more housing can only exacerbate this. I use the Sainsburys every week so want this to remain. I would not like to see buildings above around six storeys and hope there will be provision for green space and play areas. .</p> <p>Leegate has been an eyesore for years and it is surely time to fix it, but high rise and no neighbourhood provision is not the right solution.</p>	<p>Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The draft Local Plan site allocation for the existing Sainsbury's site would enable the reprovision of a supermarket.</p> <p>The draft Local Plan site allocations for the Lee Green district centre make provisions for significant public realm improvements, including publicly accessible open space.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
3	LEA SA 03 LEA SA 04 LEA SA 05	<p>I have just been made aware of the new plans for Lee Gate redevelopment.</p> <p>The scale of this redevelopment is beyond what the local infrastructure can support. The local primary school is one form entry with a catchment area which does not always extend beyond Burnt Ash Road. The local GP surgeries are small and already at capacity. The local private nurseries are over subscribed. The train stations in either direction of this redevelopment are already running very busy services with no plans for more trains to run through these stations.</p> <p>The size and height of this redevelopment is unsympathetic to the local area and sets a precedent for future high rise buildings. The redevelopment of the area surrounding Lewisham station is warning of what could happen to this junction. Tall buildings overshadowing a busy road do not make very pleasant walk ways.</p> <p>Further to this I do not think that the Sainsbury's site or BMW garage site should be included in these plans.</p> <p>This redevelopment is showing a bad side to big business and town planning placing profits and targets before local</p>	<p>Noted. As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The remaining points seem to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>It should be noted that the National Planning Policy Framework (NPPF) makes it clear that Councils should</p>	No change.

			<p>communities. This is not what should be built here, in an area where previous attempts have been made to secure the historic nature and importance of the area.</p> <p>Any redevelopment should not exceed in height what is already here. A maximum of three stories would also not overshadow the local historic buildings. Any redevelopment should be sympathetic to what was here before. Developments of these kind would improve the area socially and economically as it would make the area more desirable and inspire a greater sense of community. Redevelopments which work with local communities have better long term outcomes for all involved rather than a short term goal of quick development.</p> <p>The fact that these talks have not been made public also illustrates an understanding of the strong ill feeling these plans will produce. Again smacking of profits over people.</p> <p>In a time of mayoral voting these things should be more transparent and open.</p>	<p>proactively enter into Pre-application discussions with developers and work proactively with developers to resolve issues prior to an application being made. This pre-application process is confidential. The Council in this regard is simply undertaking its statutory duty as per the NPPF.</p>	
3	LEA SA 03	<p>I'm writing to object to the Gaillard Homes Leegate planning proposal. This plan proposes buildings that are too high and occupation that is too dense. The proposals breach guidelines from the London Plan, Lewisham's Tall Building guidance and the advice of Historic England. The buildings will completely spoil the architectural and lived-in environment, radically reducing space, dominating the listed and other local buildings and distorting the amenable, human scale that currently characterizes Lee. The practical concerns that the plan raises are no less alarming than the environmental ones. No significant infrastructure is proposed to accommodate occupants of 450 residences, whose health and education will have to be catered for by other local already-overcrowded schools and health facilities. The traffic problems that already exist in Lee will become much worse. Both new and current residents in the area will be harassed, cramped and beset with many more day-to-day privations and challenges than they currently face. I am not of course objecting to development in Lee in general, which can and should happen. Yet the Gaillard development will only significantly benefit the developers, Lewisham Council and any commercial facility that will be on the site. It obviously won't improve the quality of life of current residents or offer adequate space and facilities for new ones. Please take these considerations seriously and think about your residents as well as your financial imperatives. Consider the huge developments in the centre of Lewisham and ask yourself honestly how many residents that lived in the area beforehand think their lives have been improved by them. If you think local people are happy with these developments, then I suggest that you're either being disingenuous, or you don't know your residents well at all. Please don't make the same mistake in Lee.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	<p>No change.</p>	
3	LEA SA 03	<p>Regarding the Lee Gate plans. We already have a significant number of new high rise buildings due to the</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Leegreen we appreciate that</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>	

			<p>Kidbrooke development and do not need more in Lee Gate. These are a blight on the landscape and difficult for upper floor residents, especially during lockdowns when they are stuck inside without regular access to a green space. We do need housing but Lee Green also needs a green area for children, more trees, leisure facilities and local shops. We have a supermarket at Lee Gate and any expansion of this is unnecessary with other large supermarkets serving the area, based in Kidbrooke, Eltham, Lewisham. Lee Green could be a beautiful area. We already have established Victorian buildings which with some thoughtful landscape surrounding could transform the area.</p>	<p>this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The draft Local Plan site allocations for the Lee Green district centre make provisions for significant public realm improvements, including publicly accessible open space.</p>	
3	LEA SA 03	<p>I am writing to submit my views on the consultation of the draft Local Plan for Lewisham. I am aware that Galliards Home's have purchased the site at Leegate, Lee Green which faces directly on to my home in Eltham Road, [text removed]. I understand Galliard Homes are in consultation with Lewisham Council with regards planning proposals on the Leegate site which involves a proposal to build up to 450 units on the Leegate site. I note that these units may well be up to 15 stories in height. Lewisham Local Plan does not include any guidance with regards height limits at the Leegate site. This is in contrast to the Lee Neighbourhood Plan which states that "building height should be in keeping with the surrounding buildings including the building design, mass, scale and detailed design and that generous set backs and public realm are included in order to build human scale".</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA SA 03	<p>Please do not build excessively high buildings in Leegate which would not be sustainable by local infrastructure. 15 stories is too high and the plans show a group of buildings with no green space, soulless and bleak.</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA SA 03	<p>I live in Lee. The proposed images of Leegate are truly awful. 15 stories within a small area is totally overbearing. This area has huge traffic problems already so the ambition to build so intensely is environmentally irresponsible. There should be a community development in line with the area and not a high build complex. It is without any consideration for the history of Lee. A community</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	

			<p>development supports local people with facilities and shops to aid them.</p> <p>This looks like a money grabbing, cynical development and not in line with the values a Labour Controlled Council should support.</p> <p>You need to consult with your community...you're not some Tory Council who doesn't care about the hearts and minds of its community so please rework with us working with you.</p>		
3	LEA SA 03	<p>I am shocked to learn that Lewisham Council might approve the plan proposed by Galliard Homes for Leegate. This plan includes 15-torey high blocks. This is a monstrous development for Lee Green, if allowed by Lewisham Council. The highest building currently in Lee Green is 10-storey. What about schools and medical services for such a development? Don't children and families in this proposed development need such services?</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA SA 03	<p>Dear Planners,</p> <p>I am writing on behalf of my wife and myself - two local citizens.</p> <p>Due to the pandemic it has of course been impossible for gatherings like the local assemblies where local people can consider and discuss developments as those proposed for Lee Green and Leegate in particular.</p> <p>In the Plan the first objective is to re-establish Lee Green as a "welcoming and thriving commercial and community place." It seems that our planners have handed over control to a developer, Galliard, to decide what is going to be done. What is being proposed by the developer is way out of scale of what the local community wants and deserve. We are strongly against what is on the table right now.</p>	<p>Noted. The Local Plan consultation is being carried out in accordance with the Council's adopted Statement of Community Involvement.</p> <p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	
3	LEA SA 03 LEA SA 04	<p>I would like the following added to the above plan; No building on the Leegate site or Sainsbury site to be taller than 10 stories. Where new builds are next to listed buildings they must be no taller than the listed building Dwelling density to be no higher than leybridge court. More money must go in the plan for infrastructure. In particular, for schools, and for off road parking.</p>	<p>Noted. The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	

3	LEA SA 03	<p>I have a flat at [text removed]; could you please let me know my flat is affected by Leegate Shopping Centre development?</p> <p>If I lose my flat for new development I need a new flat in new development.</p> <p>I need a 3 bed room flat.</p>	<p>The Local Plan is a strategic policy document against which any future planning applications will be considered. We would recommend that you contact your landlord for further details on any emerging planning application and how this may affect your tenancy.</p>	No change.
3	LEA SA 03	<p>Leegate shopping centre has been taken over by Galliard Homes, who propose to build over 400 flats, in blocks of up to 15 storeys high. This is too much for this area. The public transport is already overcrowded at peak times, and there aren't enough schools or doctors surgeries in the area to cope with so many more people. Not to mention the environmental concerns of water supply, sewage removal and refuse/recycling collections for 400+ extra homes.</p> <p>Earlier proposals, under the previous owners, were more agreeable: a tasteful shopping area, with independent shops, a reasonable amount of new homes, some allotments and a pedestrian seating area. Something like that would work, but not the high rise estate that has now been proposed.</p> <p>Also, I hope you have dropped the plans to shoehorn new houses and flats into the Effingham Road garages. This was discussed at a meeting a year ago and we, the residents, put our objections to the architects/councillors at the time.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.
3	LEA SA 03	<p>A friend has today alerted me to the proposals for Leegate.</p> <p>Having lived in the Borough of Lewisham for 19 years I feel it appropriate to respond to this proposal having deep knowledge of the local area around Leegate. During those 19 years I lived in Lochaber Road, Courtlands Avenue, Harland Road and now Kingsand Road. Having shopped at the Sainsbury's for most of those years (12 years total), and passed through the intersection as a pedestrian, cyclist and driver I have intimate knowledge on the multiple redesigns at this major intersection, some which were from memory replaced several years later due to the design being inadequate.</p> <p>I moved this year to Kingsand Road, and the traffic calming and quieter neighbourhoods implemented in 2020 with initially no consultation. So I have first hand knowledge of the extra traffic that has been pumped out onto the main roads and the intersection of Burnt Ash and Lee High Road. Moving home is time consuming and the roads I had used in my previous move from Harland Road to Ladywell, was no longer a 'legal route'. The quieter neighbourhoods meant that what should have been a 15-20 minute journey each way, became 45 minutes to 75 minutes dependant on traffic volumes.</p> <p>So I can say first hand that if there is limited or no infrastructure budget for the Leegate proposal - an Underground station, DLR station, additional buses (for workers NOT school children), widening of roads for dedicated cycle lanes, then an additional 450 housing units</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The site allocations for Lee Green district centre include provisions for significant public realm enhancements to support this approach.</p> <p>The remaining comments seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to</p>	No change.

			<p>will add more congestion to an already highly congested area. On this basis alone I object to the proposals.</p> <p>Part of the reason I have lived in these areas is that I like the local community feel, the low rise housing and buildings in and around the Lee / Hither Green (Blackheath Borders side) area, the style of the buildings and that it has become a conservation area.</p> <p>Why is the council not building low rise 4 story max in line with existing height of properties in this area? If the council has to provide local housing why not "own the land" and build on it so that it has a modern and affordable housing stock?</p> <p>Long term I believe this to be preferable to a house builder profiting from building high rise apartments and then arguing about how many affordable properties they have to provide. My understanding is that on every recent development in the borough the developer has successfully reduced the number of affordable housing units. 15 stories feels like other local properties adjacent to the proposed development will be dwarfed. 15 stories in height also feels out of step with the conservation area requirements and building restrictions.</p> <p>The building alone on this site will add additional heavy traffic vehicles to a road system that is already at capacity.</p>	<p>express their views on the scheme through the Development Management process.</p>	
3	LEA SA 03	<p>I have seen the plans for Lee Green and surrounding area and would like to express my absolute objection to what is being proposed. The main objections I have is are listed below:</p> <p>1.The height of the proposed buildings. There is no way that a small community area should become dominated by such huge buildings. They are obscenely high and it would totally block out the skyline and make the area so heavily overpowered by huge buildings. I understand the need for increased housing in London, but this has to be balanced with sensible developments that don't impact negatively on people's lives. These new developments should not be higher than the current buildings.</p> <p>2.Galliard plans propose 450 more housing units. How is the local area going to cope with such an increase in popluation with not enough amenities to meet the needs of all of thoe people who will then be living there? Where are the schools and doctors surgeries that will be needed to accoodate these new residents.</p> <p>3. There has been no local consultation. People who live here were fully involved last time when St Modwen were propsoing new buildings for the Lee Gate space. All local residents must be consulted.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>Any major application will also assess the impact of the proposal against infrastructure requirements.</p> <p>It should be noted that although the Council does encourage developers to carry out pre-application consultation with residents there is no statutory</p>	<p>Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.</p>	

				requirement and this is at the discretion of the developer.	
3	LEA SA 03	<p>I have recently learnt about new proposal for the Lee Gate development by Galliard Homes.</p> <p>I am a local resident and I really enjoy living in the area.</p> <p>However, after reading the details I have my points of concern that I would like to share, please see below:</p> <ol style="list-style-type: none"> 1. The height of the 15 storey building - does not match existing landscape, exceeds buildings around and increases population in already busy space. 2. Over 600 new houses - I don't think existing nurseries, schools and GPs and dental surgeries will be able to cope. Will this be addressed by the council? I am also concerned about additional traffic that will be added to/around Lee Green area- as you might be aware the pre-covid situation lead to enormous traffic on the connecting roads. 3. Will new proposal include/ will be required to include: green spaces, playground, communal spaces (as Lee Gate currently play big role in hosting activities run by local communities)? 4. Lewisham Council planning team will allow another towered development that will become another front runner for the Carbuncle award - where local community is not consulted and only height and the amount of sold flats count without thinking how it will all work for families that live/ will be living in the space. <p>While I would like to see Lee Gate being developed I would hope it can be done without impacting the quality of life of existing residents. Where we still have enough schools, can see a doctor where required and are not surrounded by 15 storey towers.</p> <p>I appreciate making decisions like this is difficult and finding a balance and satisfying all involved parties is challenging/ not always possible but would hope the planning team can listen to our/residents voices and address our concerns.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	
3	LEA SA 03	<p>Lee Green/Leegate Proposed Development:</p> <p>My concerns about and objections to the proposed development are the following:</p> <ul style="list-style-type: none"> • Some of the buildings are too high and will dominate the area - the design seems quite ugly • The design is very unsympathetic to the existing architecture of the area • The local area does not have the infrastructure (schools, roads, parking places, GPs) to cope with such a large increase of housing and population • The Lee Green junction is very busy already and there are regular traffic jams which will be increased with higher population and private vehicles 	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>The Local Plan will help give effect to the London Plan objective for 90% of journeys in inner-London to be made by walking, cycling and the use of public</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	

			<ul style="list-style-type: none"> • There are already excessive amounts of pollution on our streets and the increase of so many homes and resulting vehicles will add to that • I am not sure if there are any green spaces or community hubs? Lee Gate used to be a pleasant shopping area years ago with stores such as Boots and Woolworths as well as independent shops and planting which made it an attractive area to walk through. <p>I hope all local residents' views will be taken into consideration.</p>	<p>transport. The promotion of sustainable transport modes are central to the Local Plan ambitions and policies and are set out clearly in Part 2 Transport policies. The site allocations for Lee Green district centre include provisions for significant public realm enhancements to support this approach.</p> <p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p>	
3	LEA SA 03	<p>I would like to register my strong objection to the possibility of a 15 storey tower being built at Leegate by Galliard Homes. The previous St Modwen proposal was, in my view, far superior as it offered a much lower construction height as well as a mixed residential/retail development and was far more sympathetic to the local area. I supported that St Modwen proposal and was unhappy when it did not proceed due to some changes being required by Lewisham with the result that St Modwen then decided that it was no longer in their commercial interest to develop the site and so they decided to sell it instead. Now it appears that the residents (of which I am one) will end up with something far worse. This is unacceptable in my view.</p> <p>In my view:-</p> <p>a) a 15 storey height will be an eyesore to the whole area and the number of houses proposed will drastically worsen the already bad traffic in the area which has recently become even more congested by the local road closures. I consider this 15 storey height totally unacceptable;</p> <p>b) This risks the same height development being built on the Sainsburys and BMW garage site which would also be unacceptable;</p> <p>c) I would like to see something far more in line with the previous St Modwen proposal i.e. an attractive mixed residential/retail site of limited height (no more than 6 storeys) with adequate parking.</p> <p>I have lived in Lee for 26 years and Leegate has been a complete embarrassment to the area for far too long. This is an opportunity to greatly improve the area and a 15 story development is NOT the way to achieve that.</p>	<p>This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.	
3	LEA SA 03	<p>I have very recently discovered there are new plans in the pipeline for Leegate. Whilst supporting a new development for this area I cannot agree with the proposals I have very recently read about. Having realised the deadline for submitting any views is in little over an hour I have decided that the email below submitted by another local resident says exactly the things that I want to say. So rather than</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.	

			<p>rewording it at such short notice I am copying and pasting it.</p> <p>Building height of 15 stories - no way! 630 homes - no way! There should be a limit of 6 stories on anything built on that site consistent with the current building. 630 homes is far too many for that tiny condensed area as density is already an issue. The Leegate intersection is already the worst around for miles and it could not accommodate additional traffic from residents of 630 homes. This is crazy. If even half of these houses are built, what new infrastructure will go into the area to accommodate this? The plan makes no mention of any of this so therefore cannot be approved until a full infrastructure assessment on traffic (do not say new residents won't be allowed cars!), what new schools will be built, how many more NHS surgeries will be added, what transport links will be added? Existing train lines are not good enough to accommodate the current population in normal times.</p> <p>In summary, a development of the size being envisioned does not belong in this area or the Lee Green intersection.</p>	<p>The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	
	3	LEA SA 03	<p>4. With regard to the Leegate centre, which is the development nearest to our house, I should like to make the following comments: pls avoid overly high buildings (I'd suggest not more than 5 storeys); I'm not convinced there is demand for a huge amount of retail space in that area so suggest you don't build a lot or at least keep the plan flexible in this regard. It would be lovely if you could develop a hub of independent shops but I appreciate that's challenging; please include some green space amenities integrating paths and cycle routes (this works well around the new Kidbrooke station development).</p>	<p>Noted. The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.</p> <p>The draft Local Plan proposals for Lee Gate district centre seek to ensure provision of a wide range of main town centre uses, along with a mix of business unit typologies. However, the plan cannot prescribe the nature of end users occupiers (for example, independents as suggested by the respondent).</p> <p>The site allocations for the district centre make provisions for the delivery of significant public realm improvements, including new publicly accessible open space.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
	3	LEA SA 03	<p>I am shocked to learn that Lewisham Council might approve the plan proposed by Galliard Homes for Leegate. 15 story high blocks would create an ugly addition to the area. Lewisham had enough of these high rise buildings with no provisional planning for new schools and creation facilities for the people of Lewisham. The centre of Lewisham has become like a jungle of high rise buildings with no green spaces.</p> <p>I hope that this monstrous plan will be stopped.</p>	<p>Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process.</p>	No change.
Lee Forum	3	LEA SA 03	<p>The Council's online session for the East Area 16 March confirmed that the previous approved application for Leegate sets the height levels at 11 storeys, as the Council</p>	<p>Noted. The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights.</p>	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.

			is required to take account of that previous application approval. Given that Lee Green is clearly not included in figure 5.1 as an area appropriate for tall buildings and that 11 storeys was only granted to St Modwen based on the 1960's towers behind Leegate, which under the draft plan would be inadmissible as 'anomalous' to the area, we ask that site allocation 3 makes this 11 storey height a maximum in the Leegate site allocation description. The height at Leegate will act as a reference for heights at the other two site allocations at the Lee Green cross roads should they come forward for development in the future	The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.	
Lee Forum	3	LEA SA 03 GR 04	The large canopy trees on north east corner which have TPOs are included in the Lee Forum's site allocation for Leegate but not the Plan's site 3 allocation. The loss of these large very old trees removes much needed breathing space and greenery at the site and the community strongly resisted their loss under the St Modwen's plans. They need to be included in the site allocation in the Plan as on p374/F states F Proposals involving the removal of protected trees (i.e. those covered by a Tree Protection Order and trees within Conservation Areas), or those that would have a detrimental impact on the health and visual amenity provided by protected trees, will be strongly resisted. The Council may identify and seek to protect trees that are of a significant amenity, heritage, ecological, or other value through the development management process. What is meant by 'will be strongly resisted'?	Noted. The approved application for Leegate has established the principal of removing the TPOs. However the assessment of any loss of trees in subsequent applications will be assessed through the Development Management process.	No change.
Lee Manor Society	3	LEA SA 03 Section 05	Lee Green and other district centres. The hope expressed is for these to 'retain their distinctive features,' and to be a 'focus for growth, renewal and sensitively managed change.' However, 'respecting local character and accommodating change should not be seen as mutually exclusive'. Leegate, the faded 1960s shopping centre that dominates the Lee Green crossroads, is due to be redeveloped by a new property owner, Galliard Homes. Lewisham planners and councillors failed to take community concerns into account when approving an earlier proposal for redevelopment (involving a large supermarket, very little public space and plentiful parking). We can only hope the sentiments expressed in this plan – which may not be in force when a revised planning application is made – will carry more weight. The plan does call (p91) for designs 'to understand the local and distinctive context of the site' and to include 'effective engagement with the local community.' LMS believes redevelopment should respect the proportions of the local area including 'the height, scale, mass and bulk both in the immediate vicinity and the surrounding area'. Additionally, we support 'building heights that are sensitive to the site's immediate and wider context' (p109).	Noted. This response seems to be relating to proposals currently being prepared by Galliards for the Leegate site and is not part of this Local Plan consultation. Residents will have the opportunity to express their views on the scheme through the Development Management process. Planning applications will be considered against the extant development plan, having regard to any material weight afforded to emerging plans and the statutory stage they are at in the plan-making process.	No change.
Lewisham Cyclists	3	LEA SA 03 LEA SA 04	Leegate Shopping Centre & Sainsbury's Lee Green; In order for the Council to meet policy TR3 in the East area, Development requirements (16.26) should take into account plans for strategic cycle routes identified in the Council Transport Strategy running north-south along Burnt Ash Road as	Noted	Leegate Shopping Centre and Sainsbury's Lee Green site allocations amended by referencing the strategic cycle route along Burnt Ash Road

			integral to providing access to high quality public realm and adopting the Healthy Streets approach.		
Make Lee Green	3	LEA SA 03	We support the redevelopment of the Leegate centre in a way that enhances and serves the whole community. If commercial options are not viable, consideration should be given to turning the area back in to green space.	Noted. At the current stage in the plan process, the Council has engaged with the landowner and the site is considered to be deliverable within the plan period.	No change.
Royal Borough of Greenwich	3	LEA SA 03	Leegate Shopping Centre: We fully support the redevelopment of this site in a manner that enhances and reinforces the role of Lee Green district centre, including a range of town centre uses. While there are some existing tall and large buildings in the area, including a mid-century office block on the site itself, these generally detract from the character of the area, which is predominantly low-rise and Victorian. The allocation should include some direction on appropriate height and scale, emphasising that the site should be predominantly mid-rise and that any taller elements should be located towards the south to reduce their impact on the more historic parts of the town centre.	Noted. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document. The location of specific tall buildings on-site and the impact on the historic parts of the town centre will be considered as part of the Development Management process.	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
	3	LEA SA 04	Sainsbury's Site Why is this even mentioned for redevelopment? It is the only supermarket in the area and also the closest for the residents of Blackheath. It would be a waste of money to remove the supermarket and develop this land. Don't do it. I understand there is a shortage of affordable housing but as the pandemic has shown more people are now working from home and are likely to continue to do so therefore it is important that any new affordable housing should have outside green space. No new high rise blocks need to be built as there will be plenty of office blocks empty ready to convert into homes.	Noted. The London Plan directs that Local Plans seek opportunities to facilitate the redevelopment of single-storey retail developments in order to make a more optimal use of land. The site allocation SA04 provides for main town centre uses, which allow for the re-provision of a supermarket on site.	No change.
	3	LEA SA 04	SAINSBURYS SITE 6.We do not think this site should be considered for MAJOR redevelopment for housing or anything else. Do not encourage the developers. Closure of such a useful facility for residents would be a seriously retrograde step. Residents won't want to find themselves in the situation that , from an unnecessary proposal from St M. for a second superstore, we end up with none	Noted. The London Plan directs that Local Plans seek opportunities to facilitate the redevelopment of single-storey retail developments in order to make a more optimal use of land. The site allocation SA04 provides for main town centre uses, which allow for the re-provision of a supermarket on site.	No change.
	3	LEA SA 04	p657 - Sainsbury's I wholeheartedly disagree about doing anything with this site whatsoever. We have no local medium to large supermarket anywhere in Lee let alone Lee Green (and not in Hither Green or Blackheath high street either). If you took away this supermarket provision on the land and changed it to different purpose in the future the closest supermarket I'd have would be Lewisham Tesco's (on the 273 that is a long journey for someone without a car if you're trying to decrease car usage), Eltham? Bromley? or Catford? I don't even know where. During lockdown, Sainsburys was one of the few places I could go as a single person to get some human contact apart from my social bubble (who was on one of those harder to reach surrounded by flower pot roads). Please	Noted. The London Plan directs that Local Plans seek opportunities to facilitate the redevelopment of single-storey retail developments in order to make a more optimal use of land. The site allocation SA04 provides for main town centre uses, which allow for the re-provision of a supermarket on site.	No change.

			please don't change the use of this building. It and its amazing staff has got me through lockdown. The local area depends on it and seeing it with empty shelves and the effect on those less lucky in the area was utterly heartbreaking - this site needs to stay as a supermarket so local residents can access local supermarket without cars. The Coop is not enough by any means for this large an area.		
Lee Forum	3	LEA SA 04	Site 4 Sainsbury's Lee Green includes adding to the large canopy planting along Burnt Ash Road. As Burnt ash is a Lewisham owned road it is also possible to include this improvement on the Site 3 Leegate site as part of the declared intention to improve the public realm.	Agreed.	Leegate Shopping Centre site allocation amended be referencing tree planting along Burnt Ash Road
Lee Forum	3	LEA SA 04	We would like site 4 to have a maximum height limit of 10 storeys and site 5 to have a maximum height limit of 5 stories to reflect their local contexts.	Noted. The London Plan directs that Local Plans identify locations that may be suitable for tall buildings and to set parameters for building heights. The draft Local Plan has been informed by a Tall Buildings Study. Following consultation on the Regulation 18 draft Local Plan, the Council has undertaken additional work on the Tall Buildings Study, which has informed the Regulation 19 document.	Local Plan amended with additional details and requirements on building heights, informed by the Tall Buildings Study update.
Lee Forum	3	LEA SA 04	Improving the crossroads working with TFL is vital to changing the street scape. All efforts should be made to protect pedestrians from harmful pollutants and increase safety. All nearby bus stops should be set back to avoid the junction getting locked up and the turn into Sainsbury's refigured to avoid congestion.	Agreed. The Council will continue to work with TFL to secure street scape improvements as part of the Healthy Streets Approach.	Sainsbury's Lee Green site allocation amended by referencing a healthy streets corridor
Royal Borough of Greenwich	3	LEA SA 04	Sainsbury's Lee Green: Confusingly, the allocation recommends that taller elements be delivered away from the Grade II listed Police Station, but then encourages them in the northeast corner, which is adjacent to the police station. We would encourage any tall buildings to be directed to the southern part of the site, where they would have less impact on the historic part of the town centre.	The location of specific tall buildings on-site and the impact on the historic parts of the town centre will be considered as part of the Development Management process.	No change.
Lewisham Liberal Democrats	3	LEA SA 04	<ul style="list-style-type: none"> Sites like the Sainsbury's at Lee Green, Leegate shopping centre and the Aldi in Catford could indeed be put to better use, by building upwards, creating large and small retail units, and additional housing. However, this involves demolishing existing buildings, and reducing substantially the number of parking spaces available. The clearly stated aim is to provide only a minimum amount of parking and new residential accommodation will not have parking associated with it. However, if Sainsbury's is rebuilt on the existing site and if there is another large shop such as Asda in the Leegate shopping centre, then these will attract customers coming by car, and this will have implications for parking and traffic in the area (see 5 above). Underground parking at Leegate should be seriously considered and no archaeological objections against it seem to exist. 	Parking requirements for all future planning applications will be assessed against policy TR4 Parking.	No change

	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee	Noted. Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee	Noted. Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	We have the Quaggy River running through Lee and I would ask that access and regeneration of the riverside around the BMW garage site is included in the local plan	Noted. Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigal Road playing Fields is opened up with access for all.	Noted. Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	would like to see the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee.	Noted. Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	<p>BMW Garage Site</p> <p>Again the Local Plan should state that any new buildings on this site will not be higher that 3 or 4 storeys to fit in with existing older buildings at the Lee Green Cross Roads which include the locally listed Old & New Tiger Heads and the Grade II listed fire station. Please ensure that the River Quaggy running on one side of the BMW site and along to the back of Weigall Road playing fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening in the past with better flood control (Ladywell Fields, Sutcliffe Park and Manor Park). That work should continue and be of benefit now to the residents of Lee.</p>	<p>Noted. With regard to the indicative capacity for the site allocations within Lee Green we appreciate that this will be a step change in density from the existing character. However the Council is responding to a housing crisis and the need to respond to London Plan requirements in terms of housing targets and making best use of available land within the capital.</p> <p>Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.</p>	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee.	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	The River Quaggy alongside the BMW site and the back of Weigall Road playing Fields is opened up with access for all as nature is very important for people’s health. The work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee.	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.

	3	LEA SA 05	The BMW site and along to the back of Weigall Road playing Fields should be opened up with access for all to The Quaggy – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee.	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	BMW DEALERSHIP SITE 7. No strong views about car dealerships, But it is surely not sensible to say that planning guidelines for this site as well as Sainsburys should be guided by the same principles as adopted for Leegate. If anything it should be the other way about - I. e. the more development on the Leegate site, the less the scale of the development on the others if the problems set out at points 2 and 3 above are not to become worse.	Noted. The draft Local Plan sets out clear site specific guidance on all site allocations.	No change.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee.	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Parks) and that work should continue and be of benefit now to the residents of Lee.	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee.	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee. 			and Manor Park) and that work should continue and be of benefit now to the residents of Lee		
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	I would like to see more care and imagination with planning, for example public access to the River Quaggy on the BMW site to make Lee Green a better and healthier place for all people to live in now and in the future, alongside appropriate development.	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all.	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please ensure that the River Quaggy by the BMW site and along to the back of Weigall Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
	3	LEA SA 05	Please will you also ensure that the River Quaggy by the BMW site and along to the back of Weigal Road playing Fields is opened up with access for all – the work of the Friends of The Quaggy and Lewisham Council has seen some wonderful greening and better flood control (Ladywell Fields, Sutcliffe and Manor Park) and that work should continue and be of benefit now to the residents of Lee.	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
Lee Forum	3	LEA SA 05	Site 5 Land at Lee High Road and Lee Road opening access to the River Quaggy is supported and supports the proposed new Quaggy Playing Fields park included on The Campaign for Rural England’s Ten New Parks for London. We ask the council to require any development to enhance the river, its water quality and amenity for residents through access and additional riverbank greening.	Within draft Local Plan site allocation LEA SA05 a key requirement is improvements to enhance access to and visual amenity of the River Quaggy.	Land at Lee High Road and Lee Road site allocation amended, with enhanced access and amenity of the river moved from Guidelines to a Requirement.
Lewisham Cyclists	3	LEA SA 05	Land at Lee High Road and Lee Road; In order for the council to meet policy TR3 in the East area, Development requirements (16.34) should take into account plans for strategic cycle routes identified in the Council Transport Strategy running East West along A20 Lee High Road and north-south along Lee Road as integral to providing access to high quality public realm and adopting the Healthy Streets approach.	Agreed	Land at Lee High Road and Lee Road site allocation amended by referencing Healthy Streets corridor and the A20

Quaggy Waterway Action Group	3	LEA SA 05	<p>Land at Lee High Road and Lee Road Pages 659-660 Site allocation 16.32 Mixed-use redevelopment of existing car dealers comprising compatible main town centre and residential uses. Public realm enhancements including improved access to the River Quaggy. Opportunities 16.33 This site is located within Lee Green district town centre. The western part of the site is occupied by a car dealers and its associated showroom parking. The eastern part of the site comprises a terrace of properties with a mix of residential and main town centre uses, including a public house, and is an integral feature of the townscape. The River Quaggy runs along the back of the site. Redevelopment and site intensification, along with the introduction of a wider range of uses, can provide a more optimal use of land to support the long-term vitality and viability of the town centre. Redevelopment can also enable public realm enhancements, with improved access to the River Quaggy. 16.34 Development requirements</p> <ul style="list-style-type: none"> • Retention of the existing terrace of properties at the eastern part of the site, including the public house. • Postive (<i>sic</i>) frontages with active ground floor frontages within the Primary Shopping Area, including at Lee High Road. • Delivery of new and improved public realm, in accordance with a site-wide public realm strategy, including: <ul style="list-style-type: none"> • Improvements to enhance access to and amenity value of the River Quaggy • Along Lee High Road and Lee Road, improvements to the forecourt at the road junction <p>16.35 Development guidelines</p> <ul style="list-style-type: none"> • The design of development should respond positively to the existing terrace at the eastern edge of the site. • Development should be designed to enhance access to the River Quaggy which runs along the northern edge of the site, and to improve its ecological quality and amenity value. <p>QWAG Comments: Enhancing the amenity and ecological quality of the River Quaggy should be a requirement, not a guideline. There is considerable opportunity in this section to be imaginative with public access to an improved river and local amenity, including cross boundary connections.</p>	Agreed	Land at Lee High Road and Lee Road site allocation amended to include reference to improved ecological quality and amenity value, as suggested.
Royal Borough of Greenwich	3	LEA SA 05	Land at Lee High Road and Lee Road: While we support the redevelopment of this site and the introduction of town centre uses along the high road and improvements to the public realm, the allocation should include more guidance regarding design. The eastern part of the site includes a terrace of attractive 2-3 storey Victorian shops and it faces a similar terrace on the Greenwich side of the road. The redevelopment of the site should ensure that this small-	The Local Plan is a strategic policy document and the Council needs to carefully consider the level of detail provided for each area within the site allocations. Further detailed guidance at a masterplanning level would normally be undertaken as part of a Framework Document or Supplementary Planning Document (SPD).	No change.

			scale, Victorian character is retained and that any taller or larger buildings are located far enough to the west that they do not appear within the street scene along Lee Road.		
	3	LEA SA 06	<p>Lee Station Local Centre</p> <p>This is one of the most successful Local Centres in Lewisham. The almost 100% continuous occupancy rate of shops is the main evidence of this success. The addition of a small Co-op supermarket five years ago has brought new vigour. The continued industrial employment use of the Citroen garage site as part of a larger Travis Perkins operation also shows the success here.</p> <p>The lack of development sites is a relief as residents see the effect of new housing around other rail stations in the Borough and beyond. The small industrial site in Southbrook Road is maintaining local employment opportunities and it would be a sad reversal if this was appropriated for housing just because its rail station proximity would give a premium profit for developers and a target tick-box for members and officers.</p>	The site is considered an appropriate site for mixed use redevelopment and the site allocation provides for employment floorspace, in addition to residential, in order to maximise the potential of the site.	No change.
Lee Manor Society	3	LEA SA 06	<p>The Plan proposes a redevelopment of Southbrook Mews, a small industrial/business site at the Burnt Ash Road end of Southbrook Road. The site includes a locally listed industrial building. The suggestion is for a mix of business and residential uses on the site with buildings rising in height to the railway line. We feel it is overambitious to include housing and it would be better for the site to continue to provide small business premises/workspaces. The age of the wall fronting Southbrook Road is not known to us, but we see no need for its removal. It provides security for businesses on the site. We also see no need for the creation of a pedestrian walkway from the south-east corner of the site to Burnt Ash Road and Lee station, as suggested by the plan.</p>	<p>The site is considered an appropriate site for mixed use redevelopment and the site allocation provides for employment floorspace, in addition to residential, in order to maximise the potential of the site.</p> <p>Disagree, a more positive frontage could be created with the demolition of the wall.</p> <p>Disagree about the pedestrian walkway as this will help to increase connectivity with the railway station.</p>	No change.
	3	LEA SA 07	<p>Early Opportunity for Site Allocation action?</p> <p>There is currently a Planning Application in to expand the site. Previously a Cricket Field and with the John Pound 1870s former Lee Public Halls and Steam Laundry Building still in situ. As the basic structure is still there, consideration should be given to incorporating it in the Development once the modern additions are removed. As the site is currently under review, CONNECTIVITY consideration should be given to creating a walking /cycling through route to the Industrial Estate avoiding the road and narrow pavements of Holme Lacey Road and past the John Pond Building. This is in line with Lewisham's healthy streets policy.</p>	Noted. The site now has planning consent for a builders merchants and operational yard.	Travis Perkins and Citroen Garage site allocation has been removed from the Plan
Lee Manor Society	3	LEA SA 07	<p>Proposals here would appear to prevent the redevelopment of the Travis Perkins/former Citroen car showroom site as currently proposed by Travis Perkins. If the street frontage is to be made more welcoming and the building line of the Holme Lacey Road houses to be preserved Travis Perkins should not be allowed erect the large shed at the proposed location. We welcome this approach if it leads to streetscape on both Burnt Ash Hill and Holme Lacey Road that better reflects the residential and shopping character of the area. (p663).</p>	Noted. The site now has planning consent for a builders merchants and operational yard.	Travis Perkins and Citroen Garage site allocation has been removed from the Plan

	3	LEA SA 08	<p>P666 - the local Mayfields Hostel</p> <p>I have no issue with the local hostel being close to where I live on my road and often see the residents being taken for walks by their caring and professional staff. I'm not sure about the change of the use of this building at all. This seems to remove the ability of the building to home mentally ill vulnerable people and instead creating flats and a gallery. A) That sounds pretty horrible to me and upsetting for mentally ill residents having to move because Lewisham want to redevelop the area. B) This is a local plan, and I can only assume locally mentally ill people live there. I can't agree that this is a new 'optimal use of the land' or the creation of 'high quality housing' if this relocates (locally) vulnerable people. Lewisham is for everyone, not for the sole purpose of gentrification, but as a local area that should be inclusive to those with challenges as much as those without. And as I also couldn't be more local to this hostel, I wholeheartedly disagree with relocating it so the area can benefit from 'optimisation'. If this land is being used to support the vulnerable, it is already being used optimally. I would prefer it as a residential hostel supporting the community to the increased footfall from an unneeded museum, gallery or crèche on a residential road, or a building site and new-build flats on a road with predominantly older beautiful houses, it seems out of touch with the residential nature of the road.</p>	The site is considered an appropriate site for residential redevelopment.	No change.
Lewisham Liberal Democrats	3	LEA SA 08	<p>Mayfields Hostel https://lewisham.gov.uk/organizations/mayfield. Although planning permission has already been granted for 47 residential units (DC/17/103886), it seems that the scheme is now to be 'redesigned to allow for more efficient use of the site'. Will the new plans respect the nature of the surrounding area and not go above the five-six-storey height limit? Will all the trees be retained? Will a financial contribution be made to fund the extra social services required? The limited parking proposed is unrealistic.</p>	<p>The residential capacity of the site allocation remains the same as the consented scheme – 47 gross / 21 net units.</p> <p>Optimal capacity for the site and the scale and nature of development will be established at planning application stage through a design led approach.</p> <p>The site allocation already emphasises to the retention of existing mature trees and trees of value.</p> <p>Parking requirements for all future planning applications will be assessed against policy TR4 Parking.</p>	No change.
Grove Park Neighbourhood Forum	3	LEA SA 09	<p>Under 16.51, Development Requirements, the policy must more explicitly state that the town centre should be 'green infrastructure-led' to provide a greener public realm that connects the proposed new district park with Chinbrook Meadows and beyond.</p>	Agree.	Sainsbury Local and West of Grove Park Station site allocation amended to provide further clarity on links to existing green infrastructure.
Grove Park Neighbourhood Forum	3	LEA SA 09	<p>Development requirements should be numbered, so that they are easier to refer to, rather than bullet points.</p>	Agree that bullet points are not easy to refer to.	Bullets points in all site allocations changed to numbers for ease of future referencing
Lewisham Cyclists	3	LEA SA 09	<p>Sainsbury Local and West of Grove Park Station; In order for the council to meet policy TR3 in the East area, Development requirements (16.51) should take into account plans for strategic cycle routes identified in the Council Transport Strategy running north-south along Baring Road as integral to providing access to high quality public realm and adopting the Healthy Streets approach.</p>	Agree.	Sainsbury Local and West of Grove Park Station site allocation amended to reference Healthy Streets corridor and cycle route

3	LNA	<p>Please record my comments in response to the consultation on Lewisham’s Local Plan:</p> <p>Canal Approach I request that Lewisham Council prioritise reopening Canal Approach towpath, part of Deptford Parks Liveable Neighbourhood as a key strategic route for North Deptford.</p> <p>Play & School Routes Play does not feature as a priority North Deptford. Covid-19 has meant children in this high-density area have had little access to high quality play. Existing playgrounds are of low quality. The playground promised in 2014 alongside the £300k+ skatepark has not materialised. This should be delivered and other playgrounds across the area updates alongside safer streets and school routes. Prioritise a huge investment in playgrounds and safer streets for children.</p> <p>Polluting Industry Reduce the number of trucks coming to the area by changing the use class of industrial and waste processing sites like scrapyards and private waste processing. Support low pollution industries that create jobs for local people in healthy environments.</p> <p>SELCHP SELCHP is proposed as an integral part of the Local Plan. Waste incinerators are usually located in the most deprived neighbourhoods this is socially unjust. Furthermore, by 2035, incineration will be a more carbon-intensive process than even landfill. Remove SELCHP as a priority and shut it down so the borough can meet its climate emergency targets.</p> <p>New Riverside Park The population will grow dramatically due to 10k homes in the Evelyn Ward plus another 7k homes at Millwall and Canada Water. There is no plan to increase green space despite council documents stating the need to do so. Make delivering a new riverside park for Deptford on the protected wharf at Convoys Wharf a priority.</p>	<p>Canal Approach – The Local Plan identifies this as a key strategic route for North Deptford highlighted in fig 15.2 and underpinned by the North Lewisham Links policy. The Council have been working with local groups as part of the Liveable Neighbourhoods Project to progress the scheme. Due to the financial challenges that TFL find themselves as a result of COVID-19 the project is having to be scaled back in terms of the scope. The details of which are currently being discussed</p> <p>Play & School Routes - The Local Plan is underpinned by the Council’s Parks and Open Spaces Strategy 2020-2025 which outlines the key priorities for improvements including many within the Deptford area. Lewisham Council has announced the revamp the play equipment in four popular Deptford parks. Evelyn Green, Sayes Court, Deptford Park and Folkestone Gardens will all benefit from refurbishments which are due to take place in the coming months.</p> <p>Polluting Industry – There are a number of areas in the north that are designated Strategic Industrial Land which are protected by the London Plan. It is therefore difficult for planning to limit the industrial uses on these sites however wherever possible we will try and ensure that these industries move away from heavy industrial uses such as scrapyards etc. to more low pollution industries. SELCHP - The London Plan sets out the strategic approach to achieve net waste self-sufficiency (i.e. the equivalent of 100 per cent of London’s waste should be managed within London by 2026). It requires that the Council, through the Local Plan, identifies and safeguards waste sites/facilities in order to meet the borough’s apportioned tonnage of waste. SELCHP plays an important role in helping the borough to meet its London Plan waste apportionment figure. For the time being, the Local Plan must therefore continue to safeguard the site for waste management uses.</p> <p>New Riverside Park – The provision of new open space is identified within the draft Local Plan site allocations including new open spaces at Convoys Wharf. The Local Plan recognises that as an urban borough accommodating significant growth it is unfeasible to deliver large areas of new open space and instead the focus will be on improvements to the existing provision.</p>	No change.
3	LNA	<p>Please record my comments in response to the consultation on Lewisham’s Local Plan:</p> <p>- Polluting Industry</p>	<p>Polluting Industry – There are a number of areas in the north that are designated Strategic Industrial Land which are protected by the London Plan. 3	LNA	<p>We are on the Boundary with Greenwich Borough and therefore greatly affected by what happens there. There is such disparity between Lewisham and Greenwich. We are also affected by TFL’s actions. It is apparent that there is little cohesive thought about impacts of the separate actions by any of these bodies. At times, it feels as though we are the forgotten part of Lewisham.</p> <p>We have lived in our current accommodation for 45 years! You would think that we had a voice but no; constantly told what is best for us, like naughty children. I have walked and run the Borough, cycled for a long time to and from work. This was because train and bus were unhealthy crowded nightmares, (no change there)! I learnt roadcraft cycling, sadly lacking in today’s new ‘cyclists ‘.</p> <p>You have to take precautions, ensure that your bicycle has bell, working lights and you can be seen in the dark. The concept of Walking and Cycling requires personal responsibility and consideration as much as vehicles. If someone wants to race, do it at a Velodrome or Race Track.</p>	<p>Our approach to encourage sustainable modes of transport including walking, cycling and public transport are outlined in Policy TR3 Healthy streets as part of healthy neighbourhoods.</p>	No change.	

			<p>This leads me to the point that if you have a Cyclist's Charter in the Local Plan, you also need a Pedestrian one. The first mode of transport is walking and yet our pavements are in need of repair, they are obstacle courses. Signage is out of control. It is often in the wrong place. The recently installed cameras and signs restrict the pavement space even more. The plethora of signage and street furniture ranges from cabling cabinets, phone masts, CPZ posts, bollards, planters, bus shelters, five types of refuse collection bins, (including commercial bins) Estate Agent Signs protruding at head height over pavements. Add the indiscriminate dumping and vehicle parking, including 'allowable CPZs' and a Pedestrian's lot is not a happy one. This is even worse for someone with impaired sight or difficulty walking! Yet we are told this a Healthy Neighbourhood?</p>		
	3	LNA	<p>The Positive</p> <p>The main positive from the LLP is the central preservation of the Bakerloo Line Extension as it's central premise and the safeguards the area currently owned by Sainsbury's for the construction and excavation of the tunnels.</p>	Noted	No change.
	3	LNA	<p>The Negatives, Density – Housing over Quality and a lack of structural Environmental Concerns</p> <p>Delivery of the Bakerloo Line the New Cross appears include a mass housing project on top of the planned station. The LLP appears to be obsessed with an exaggerated residential development that is justified by the arrival of the BLE. There is much less emphasis retail or business opportunities. More over there is also an absence of green or public space, which is mentioned on the LLP but contradicted by the proposal to home vast number people on top of the Bakerloo Line Extension. The site cannot satisfy all needs. It cannot be a transport hub, mass housing project, retail estate and urban meeting place. Planners have to be realistic in what the site can be used for.</p>	<p>The site allocations in New Cross have been informed by the New Cross Area Framework which was extensively consulted on and endorsed by M&C. The indicative capacities for these site allocations reflect the areas central location within a district centre with excellent access to public transport and services.</p>	No change.
	3	LNA	<p>Pollution and Air Quality</p> <p>New Cross Road has the worst pollution London. Plans in the LLP to improve the air quality directly contradict the expansion of residential properties in the area by more than 6000 residential units that will bring their carbon footprint in extended vehicle use, services and domestic energy use. The plan cannot claim Green credentials whilst contradicting itself in its methods and aspirations for the area.</p> <p>SELCHP air quality and residential proximity</p> <p>South East London Combined Heat and Power (SEPCHP) is a processing plant for rubbish servicing much of the South East. In reality the SELCHP is an incinerator pumping toxic gasses and particulates into the air of New Cross Gate. In the Hatcham Society's response the LLP it states:</p>	<p>Canal Approach – The Local Plan identifies this as a key strategic route for North Deptford highlighted in fig 15.2 and underpinned by the North Lewisham Links policy. The Council have been working with local groups as part of the Liveable Neighbourhoods Project to progress the scheme. Lewisham Council has announced the revamp the play equipment in four popular Deptford parks. Evelyn Green, Sayes Court, Deptford Park and Folkestone Gardens will all benefit from</p>	No change.

			<p>“the latest figures released by the government’s Environment Agency for 2019, that SELCHP reported a release of 361,665,000 kg of Carbon Dioxide and 144,818,000 kg of Carbon Dioxide from Qualifying Renewable Fuel Sources. Meanwhile, there was 566, 632 kg of Nitrogen Oxides released last year. Nitrogen Oxides include Nitrogen Dioxide, a harmful gas which damages lungs. “</p> <p>It goes on to say that :</p> <p>“The amount of Carbon Dioxide released from SELCHP was 3.3 times more than what was released from the Edmonton Solid Waste Incinerator in 2019 and SELCHP released 2.5 times more Nitrous Oxides than the Edmonton Solid Waste Incinerator. We also do not know the amount of Carbon Dioxide released through the burning of ‘biogenic Co2’ - food waste - as highlighted in Channel Four’s Dirty Truth About Your Rubbish: Dispatches (March 2021). A report titled ‘Health Effects due to Emissions from Energy from Waste Plant in London’ created for the GLA published in May 2020 found that SELCHP had the highest NOx emission rate out of London's incinerator plants. “</p> <p>I support the advances in rubbish recycling over the last few years however the role of SEPCHP and its relationship with the Lewisham Local Plan need to be re examined and should not, as is stated in the LLP, be safeguarded. A full enquiry should be initiated into the role of SELCHP in our community and a clear and accessible publication of all data relating to processing waste. This has to include:</p> <p>Any breaching of toxin levels emitted by the plant</p> <p>Efficiency in terms of the quantity of material that is processed there</p> <p>A clear indication of the weekly source of the material being processed</p> <p>An inability to clarify SELCHP’s role in polluting the air in New Cross and the surrounding area frankly makes a mockery of any green aspirations asserted in the LLP.</p> <p>I cannot see how homes can be built in such close proximity to the incinerating plant. Lewisham in their North area Plan looks to "safeguard strategic waste management sites including SELCHP" while promoting the redevelopment of Millwall Football stadium adjacent to SELCHP with 2,500 new homes planned. This means that home building is ear marked by the LLP in close proximity to a known emitter of toxic gasses and hazardous particulates.</p>	<p>refurbishments which are due to take place in the coming months.</p> <p>Polluting Industry – There are a number of areas in the north that are designated Strategic Industrial Land which are protected by the London Plan. It is therefore difficult for planning to limit the industrial uses on these sites however wherever possible we will try and ensure that these industries move away from heavy industrial uses such as scrapyards etc. to more low pollution industries.</p> <p>SELCHP - The London Plan sets out the strategic approach to achieve net waste self-sufficiency (i.e. the equivalent of 100 per cent of London’s waste should be managed within London by 2026). Lewisham Council has announced the revamp the play equipment in four popular Deptford parks. Evelyn Green, Sayes Court, Deptford Park and Folkestone Gardens will all benefit from refurbishments which are due to take place in the coming months.</p> <p>Polluting Industry – There are a number of areas in the north that are designated Strategic Industrial Land which are protected by the London Plan. It is therefore difficult for planning to limit the industrial uses on these sites however wherever possible we will try and ensure that these industries move away from heavy industrial uses such as scrapyards etc. to more low pollution industries.</p> <p>SELCHP - The London Plan sets out the strategic approach to achieve net waste self-sufficiency (i.e. the equivalent of 100 per cent of London's waste should be managed within London by 2026). It requires that the Council, through the Local Plan, identifies and safeguards waste sites/facilities in order to meet the borough's apportioned tonnage of waste. SELCHP plays an important role in helping the borough to meet its London Plan waste apportionment figure. For the time being, the Local Plan must therefore continue to safeguard the site for waste management uses.</p> <p>New Riverside Park – The provision of new open space is identified within the draft Local Plan site allocations including new open spaces at Convoys Wharf. The Local Plan recognises that as an urban borough accommodating significant growth it is unfeasible to deliver large areas of new open space and instead the focus will be on improvements to the existing provision.</p>	
	3	LNA	<p>Canal Approach I request that Lewisham Council prioritise reopening Canal Approach towpath, part of Deptford Parks Liveable Neighbourhood as a key strategic route for North Deptford.</p>	<p>Canal Approach – The Local Plan identifies this as a key strategic route for North Deptford highlighted in fig 15.2 and underpinned by the North Lewisham Links policy. The Council have been working with local groups as part of the Liveable Neighbourhoods Project to progress the scheme. Due to the financial</p>	No change.

			<p>Play & School Routes Play does not feature as a priority North Deptford. Covid-19 has meant children in this high-density area have had little access to high quality play. Existing playgrounds are of low quality. The playground promised in 2014 alongside the £300k+ skatepark has not materialised. This should be delivered and other playgrounds across the area updates alongside safer streets and school routes. Prioritise a huge investment in playgrounds and safer streets for children.</p> <p>Polluting Industry Reduce the number of trucks coming to the area by changing the use class of industrial and waste processing sites like scrapyards and private waste processing. Support low pollution industries that create jobs for local people in healthy environments.</p> <p>SELCHP SELCHP is proposed as an integral part of the Local Plan. Waste incinerators are usually located in the most deprived neighbourhoods this is socially unjust. Furthermore, by 2035, incineration will be a more carbon-intensive process than even landfill. Remove SELCHP as a priority and shut it down so the borough can meet its climate emergency targets.</p> <p>New Riverside Park The population will grow dramatically due to 10k homes in the Evelyn Ward plus another 7k homes at Millwall and Canada Water. There is no plan to increase green space despite council documents stating the need to do so. Make delivering a new riverside park for Deptford on the protected wharf at Convoys Wharf a priority.</p>	<p>challenges that TFL find themselves as a result of COVID-19 the project is having to be scaled back in terms of the scope. 3	LNA	<p>a. Additional Strategic Site Allocation Deptford Station North Access/Egress</p> <p>DNA supports an access and egress on the northern site of Deptford Station. This would improve and shorten routes to and from the station from the north where much of the growth of population and employment will take place, adding capacity by distributing people at peak times and connect with the London Quietway route Q1. This may also support Evelyn Local Centre.</p>	<p>At this stage we are not reviewing additional site allocations. However this could form part of the next Local Plan review</p>	No change.	
3	LNA	<p>"DNA should emphasize its "refurbish first" policy, to preserve built environment of various periods - especially 20th century that may not be listed.</p> <p>Deptford is very low on designated listed and protected areas, compared to other parts of the Lewisham borough. Yet it has the widest range of historical periods in the borough - detailed in the Characterization Report by Aecom commissioned by DNA.</p> <p>Site 3: The Riverside Youth Centre building is an "iconic" building of the 20th century on Pepys estate and should be refurbished first.</p> <p>Note: I think that this site allocation may be withdrawn, altogether. From what I heard.</p>	<p>Whilst the Council will always encourage developers to look at refurbishment options where possible this is not always feasible and not always the best use of land.</p> <p>Information on nominations for locally listed buildings can be found on the councils website</p> <p>The plans policy on affordable housing is clearly stated and underpinned by our evidence base. 60 – 80% socially rented will simply be unviable and therefore the plan would not conform to the National Planning Policy Framework.</p>	No change.	

			<p>Site 12: A new covered market area, all-weather, as a high quality and aesthetically beautiful feature in the area to attract existing and new footfall. To assist in keeping Deptford High Street a viable shopping experience in the later 21st century, after the redevelopment of Convoys Wharf.</p> <p>New housing redevelopment needs to be at least 60% to 80% socially rented at Council levels and secured tenancies. At 100% on Council owned land. Refer to DNA housing policies.</p> <p>Evelyn Street 'local centre'. Historically Evelyn Street had many more shops than it presently has. Other 'feed' in streets can be encouraged, too, to have local shops and workshops once again. To encourage "Keep in Local" in leisure and work.</p>		
	3	LNA	<p>RE: Lewisham Local Plan Please record my comments in response to the consultation on Lewisham's Local Plan:</p> <p>Canal Approach I request that Lewisham Council prioritise reopening Canal Approach towpath, part of Deptford Parks Liveable Neighbourhood as a key strategic route for North Deptford.</p>	<p>Canal Approach – The Local Plan identifies this as a key strategic route for North Deptford highlighted in fig 15.2 and underpinned by the North Lewisham Links policy. The Council have been working with local groups as part of the Liveable Neighbourhoods Project to progress the scheme. Due to the financial challenges that TFL find themselves as a result of COVID-19 the project is having to be scaled back in terms of the scope. The details of which are currently being discussed</p>	No change.
	3	LNA	<p>Play & School Routes Play does not feature as a priority in North Deptford. Covid-19 has meant children in this high-density area have had little access to high quality play. Existing playgrounds are of low quality. The playground promised in 2014 alongside the £300k+ skatepark has not materialised. This should be delivered and other playgrounds across the area updates alongside safer streets and school routes. Prioritise a huge investment in playgrounds and safer streets for children.</p>	<p>Play & School Routes - The Local Plan is underpinned by the Council's Parks and Open Spaces Strategy 2020-2025 which outlines the key priorities for improvements including many within the Deptford area. Lewisham Council has announced the revamp the play equipment in four popular Deptford parks. Evelyn Green, Sayes Court, Deptford Park and Folkestone Gardens will all benefit from refurbishments which are due to take place in the coming months.</p>	No change.
	3	LNA	<p>Polluting Industry Reduce the number of trucks coming to the area by changing the use class of industrial and waste processing sites like scrapyards and private waste processing. Support low pollution industries that create jobs for local people in healthy environments.</p>	<p>Polluting Industry – There are a number of areas in the north that are designated Strategic Industrial Land which are protected by the London Plan. It is therefore difficult for planning to limit the industrial uses on these sites however wherever possible we will try and ensure that these industries move away from heavy industrial uses such as scrapyards etc. to more low pollution industries.</p>	No change
The St John's Society	3	LNA Vision Spatial Objectives	<p>LEWISHAM'S NEIGHBOURHOODS AND PLACES: 15 LEWISHAM'S NORTH AREA St. John's, Brookmill Road or Somerset Gardens are not mentioned as heritage assets, nor in the overall 'Vision' or 'Spatial Objectives' for the North Area.</p>	<p>We are unable to mention all heritage assets in the plan but the council has a comprehensive list on our GIS system and on our website. Designated and Non-designated Heritage Assets also have separate policies in the Section 2 of the draft Local Plan</p>	No change.

			<p>Welcome the support for 'active uses' at street level.</p> <p>St. John's railway station suffers from poor accessibility.</p>		
3	LNA	<p>New Riverside Park</p> <p>The population will grow dramatically due to 10k homes in the Evelyn Ward plus another 7k homes at Millwall and Canada Water. There is no plan to increase green space despite council documents stating the need to do so. Make delivering a new riverside park for Deptford on the protected wharf at Convoys Wharf a priority.</p>	<p>New Riverside Park – The provision of new open space is identified within the draft Local Plan site allocations including new open spaces at Convoys Wharf. The Local Plan recognises that as an urban borough accommodating significant growth it is unfeasible to deliver large areas of new open space and instead the focus will be on improvements to the existing provision. The existing protected Wharf is protected at the London Plan level.</p>	No change

3	LNA SA 01				
3	LNA		Albeit, outside the realm of this plan, there should be a real push for Lewisham to encourage a sustainable river crossing. (Like the cycle/pedestrian bridge from Greenland Dock to Canary Wharf) the massive population growth in Evelyn ward especially, needs addressing. Canada Water / Surrey Quays is not enough. It is frustrating that the two tunnels that attract much traffic and associated pollution are either side of Lewisham. A bridge in between would be a great help and have huge benefits for the poorest ward, often dumped on in comparison to many other areas.	Noted. This is outside the scope of the Local Plan however we will pass your comments on to our Transport team.	No change.

			delivered and other playgrounds across the area updates alongside safer streets and school routes. Prioritise a huge investment in playgrounds and safer streets for children.	Evelyn Green, Sayes Court, Deptford Park and Folkestone Gardens will all benefit from refurbishments which are due to take place in the coming months.	
	3	LNA	Polluting Industry Reduce the number of trucks coming to the area by changing the use class of industrial and waste processing sites like scrapyards and private waste processing. Support low pollution industries that create jobs for local people in healthy environments.	Polluting Industry – There are a number of areas in the north that are designated Strategic Industrial Land which are protected by the London Plan. It is therefore difficult for planning to limit the industrial uses on these sites however wherever possible we will try and ensure that these industries move away from heavy industrial uses such as scrapyards etc. to more low pollution industries.	No change.
	3	LNA	SELCHP SELCHP is proposed as an integral part of the Local Plan. Waste incinerators are usually located in the most deprived neighbourhoods this is socially unjust. Furthermore, by 2035, incineration will be a more carbon-intensive process than even landfill. Remove SELCHP as a priority and shut it down so the borough can meet its climate emergency targets.	SELCHP - The London Plan sets out the strategic approach to achieve net waste self-sufficiency (i.e. the equivalent of 100 per cent of London's waste should be managed within London by 2026). It requires that the Council, through the Local Plan, identifies and safeguards waste sites/facilities in order to meet the borough's apportioned tonnage of waste. SELCHP plays an important role in helping the borough to meet its London Plan waste apportionment figure. For the time being, the Local Plan must therefore continue to safeguard the site for waste management uses.	No change.
	3 3	LNA LNA SA 01	New Riverside Park The population will grow dramatically due to 10k homes in the Evelyn Ward plus another 7k homes at Millwall and Canada Water. There is no plan to increase green space despite council documents stating the need to do so. Make delivering a new riverside park for Deptford on the protected wharf at Convoys Wharf a priority.	New Riverside Park – The provision of new open space is identified within the draft Local Plan site allocations including new open spaces at Convoys Wharf. The Local Plan recognises that as an urban borough accommodating significant growth it is unfeasible to deliver large areas of new open space and instead the focus will be on improvements to the existing provision. The existing protected Wharf is protected at the London Plan level.	No change.
	3	LNA	RE: Lewisham Local Plan Please record my comments in response to the consultation on Lewisham's Local Plan: Canal Approach I request that Lewisham Council prioritise reopening Canal Approach towpath, part of Deptford Parks Liveable Neighbourhood as a key strategic route for North Deptford.	Canal Approach – The Local Plan identifies this as a key strategic route for North Deptford highlighted in fig 15.2 and underpinned by the North Lewisham Links policy. The Council have been working with local groups as part of the Liveable Neighbourhoods Project to progress the scheme. Due to the financial challenges that TFL find themselves as a result of COVID-19 the project is having to be scaled back in terms of the scope. The details of which are currently being discussed.	No change.

	3	LNA	<p>Play & School Routes Play does not feature as a priority North Deptford. Covid-19 has meant children in this high-density area have had little access to high quality play. Existing playgrounds are of low quality. The playground promised in 2014 alongside the £300k+ skatepark has not materialised. This should be delivered and other playgrounds across the area updates alongside safer streets and school routes. Prioritise a huge investment in playgrounds and safer streets for children.</p>	<p>Play & School Routes - The Local Plan is underpinned by the Council's Parks and Open Spaces Strategy 2020-2025 which outlines the key priorities for improvements including many within the Deptford area. Lewisham Council has announced the revamp the play equipment in four popular Deptford parks. Evelyn Green, Sayes Court, Deptford Park and Folkestone Gardens will all benefit from refurbishments which are due to take place in the coming months.</p>	No change
	3	LNA	<p>Polluting Industry Reduce the number of trucks coming to the area by changing the use class of industrial and waste processing sites like scrapyards and private waste processing. Support low pollution industries that create jobs for local people in healthy environments.</p>	<p>Polluting Industry – There are a number of areas in the north that are designated Strategic Industrial Land which are protected by the London Plan. It is therefore difficult for planning to limit the industrial uses on these sites however wherever possible we will try and ensure that these industries move away from heavy industrial uses such as scrapyards etc. to more low pollution industries.</p>	No change
	3	LNA	<p>SELCHP SELCHP is proposed as an integral part of the Local Plan. Waste incinerators are usually located in the most deprived neighbourhoods this is socially unjust. Furthermore, by 2035, incineration will be a more carbon-intensive process than even landfill. Remove SELCHP as a priority and shut it down so the borough can meet its climate emergency targets.</p>	<p>SELCHP - The London Plan sets out the strategic approach to achieve net waste self-sufficiency (i.e. the equivalent of 100 per cent of London's waste should be managed within London by 2026). It requires that the Council, through the Local Plan, identifies and safeguards waste sites/facilities in order to meet the borough's apportioned tonnage of waste. SELCHP plays an important role in helping the borough to meet its London Plan waste apportionment figure. For the time being, the Local Plan must therefore continue to safeguard the site for waste management uses.</p>	No change
	3 3	LNA LNA SA 01	<p>New Riverside Park The population will grow dramatically due to 10k homes in the Evelyn Ward plus another 7k homes at Millwall and Canada Water. There is no plan to increase green space despite council documents stating the need to do so. Make delivering a new riverside park for Deptford on the protected wharf at Convoys Wharf a priority.</p>	<p>New Riverside Park – The provision of new open space is identified within the draft Local Plan site allocations including new open spaces at Convoys Wharf. The Local Plan recognises that as an urban borough accommodating significant growth it is unfeasible to deliver large areas of new open space and instead the focus will be on improvements to the existing provision. The existing protected Wharf is protected at the London Plan level.</p>	No change

			Approach towpath, part of Deptford Parks Liveable Neighbourhood as a key strategic route for North Deptford.	challenges that TFL find themselves as a result of COVID-19 the project is having to be scaled back in terms of the scope. The details of which are currently being discussed.	
	3	LNA	Play & School Routes Play does not feature as a priority North Deptford. Covid-19 has meant children in this high-density area have had little access to high quality play. Existing playgrounds are of low quality. The playground promised in 2014 alongside the £300k+ skatepark has not materialised. This should be delivered and other playgrounds across the area updates alongside safer streets and school routes. Prioritise a huge investment in playgrounds and safer streets for children.	Play & School Routes - The Local Plan is underpinned by the Council's Parks and Open Spaces Strategy 2020-2025 which outlines the key priorities for improvements including many within the Deptford area. Lewisham Council has announced the revamp the play equipment in four popular Deptford parks. Evelyn Green, Sayes Court, Deptford Park and Folkestone Gardens will all benefit from refurbishments which are due to take place in the coming months.	No change
	3	LNA	Polluting Industry Reduce the number of trucks coming to the area by changing the use class of industrial and waste processing sites like scrapyards and private waste processing. Support low pollution industries that create jobs for local people in healthy environments.	Polluting Industry – There are a number of areas in the north that are designated Strategic Industrial Land which are protected by the London Plan. It is therefore difficult for planning to limit the industrial uses on these sites however wherever possible we will try and ensure that these industries move away from heavy industrial uses such as scrapyards etc. to more low pollution industries.	No change
	3	LNA	SELCHP SELCHP is proposed as an integral part of the Local Plan. Waste incinerators are usually located in the most deprived neighbourhoods this is socially unjust. Furthermore, by 2035, incineration will be a more carbon-intensive process than even landfill. Remove SELCHP as a priority and shut it down so the borough can meet its climate emergency targets.	SELCHP - The London Plan sets out the strategic approach to achieve net waste self-sufficiency (i.e. the equivalent of 100 per cent of London's waste should be managed within London by 2026). It requires that the Council, through the Local Plan, identifies and safeguards waste sites/facilities in order to meet the borough's apportioned tonnage of waste. SELCHP plays an important role in helping the borough to meet its London Plan waste apportionment figure. For the time being, the Local Plan must therefore continue to safeguard the site for waste management uses.	No change
	3 3	LNA LNA SA 01	New Riverside Park The population will grow dramatically due to 10k homes in the Evelyn Ward plus another 7k homes at Millwall and Canada Water. There is no plan to increase green space despite council documents stating the need to do so. Make delivering a new riverside park for Deptford on the protected wharf at Convoys Wharf a priority.	New Riverside Park – The provision of new open space is identified within the draft Local Plan site allocations including new open spaces at Convoys Wharf. The Local Plan recognises that as an urban borough accommodating significant growth it is unfeasible to deliver large areas of new open space and instead the focus will be on improvements to the existing provision. The existing protected Wharf is protected at the London Plan level.	No change
	3	LNA	RE: Lewisham Local Plan Please record my comments in response to the consultation on Lewisham's Local Plan: Canal Approach I request that Lewisham Council prioritise reopening Canal Approach towpath, part of Deptford Parks Liveable Neighbourhood as a key strategic route for North Deptford.	Canal Approach – The Local Plan identifies this as a key strategic route for North Deptford highlighted in fig 15.2 and underpinned by the North Lewisham Links policy. The Council have been working with local groups as part of the Liveable Neighbourhoods Project to progress the scheme. 			even landfill. Can you please Remove SELCHP as a priority and move it somewhere else so the borough can meet its climate emergency targets. Even new double glazing does not stop the dust getting in and continuous dusting is a requirement.		
	3	LNA	Trees: Can you please plant more trees and look at the root cause of why the trees in the surrounding areas are dying and need to be recorded in a registry. (Deptford park), not to mention our own gardens.	The council is working in partnership with Street Trees for Living and planting hundreds of trees per year. If you would like to report a damaged or dying tree please contact Green Scene. Details can be found on the Council's website	No change.
	3	LNA	Play & School Routes Play does not feature as a priority North Deptford. Covid-19 has meant children in this high-density area have had little access to high quality play. Existing playgrounds are of low quality. The playground promised in 2014 alongside the £300k+ skatepark has not materialised. This should be delivered and other playgrounds across the area updates alongside safer streets and school routes. Prioritise a huge investment in playgrounds and safer streets for children and plantation of trees for them. And, of course, Lewisham Council must be more aware than most due to the ruling on the death of that little girl in your Borough.	Play & School Routes - The Local Plan is underpinned by the Council's Parks and Open Spaces Strategy 2020-2025 which outlines the key priorities for improvements including many within the Deptford area. Lewisham Council has announced the revamp the play equipment in four popular Deptford parks. Evelyn Green, Sayes Court, Deptford Park and Folkestone Gardens will all benefit from refurbishments which are due to take place in the coming months.	No change
	3 3	LNA LNA SA 01	New Riverside Park The population will grow dramatically due to 10k homes in the Evelyn Ward plus another 7k homes at Millwall and Canada Water. There is no plan to increase green space despite council documents stating the need to do so. Make delivering a new riverside park for Deptford on the protected wharf at Convoys Wharf a priority.	New Riverside Park – The provision of new open space is identified within the draft Local Plan site allocations including new open spaces at Convoys Wharf. The Local Plan recognises that as an urban borough accommodating significant growth it is unfeasible to deliver large areas of new open space and instead the focus will be on improvements to the existing provision. The existing protected Wharf is protected at the London Plan level.	No change
	3	LNA	Please note that TALL building are deteriorating the landscape of the city. this is absolutely not right for mental health and building not more that 4 to 5 levels should only be considered. Who will want to live in an area that is built of tall block of flat that is horrible. Not to mention the light deprivation so many tall building cause. This causes problems with our immune system which is rather important in these Covid times.	We know that tall buildings can be a decisive issue for residents. However the London Plan makes clear that tall buildings are part of the solution to tackle the acute housing shortage. The London Plan directs the Local Plan to identify suitable locations for tall buildings. We believe that tall buildings could be considered in our opportunity areas and in certain town centres that have good access to public transport, jobs and local services. We believe this is a sensible and sustainable approach.	No change.
Deptford Society	3	LNA	Page 365 Local site allocations for tall buildings and increased population density in the north of the borough contradicts the strategic objectives for healthy and safe communities (G16-19 page 51). The identified opportunity areas mapped for the north area on page 55 are the same areas mapped as deficient to open space on figure 10.5, page 365 .	We do not agree that there is a contradiction.	No change.
Deptford Society	3	LNA	The plan mostly identifies sites either already with planning or known to be in public consultation but does nothing to profile sites which have the potential to be developed or where development might be encouraged - backlands behind Deptford High Street for example.	The draft Local Plan site allocations focuses on sites above 0.25ha but recognises the positive contribution smaller sites will make to the borough. In particular please refer to policy on small sites. The Local Plan will also be supported by Supplementary planning	No change

				documents, masterplans and Frameworks and in particular the Council's Small Sites SPD.	
DNA	3	LNA	02 Most of the objectives and policies for the North sub-area section in emerging Local Plan seem to be concerned with New Cross area and we ask to make them more Deptford relevant. We propose as a starting point to the following set of Objectives from the Deptford Neighbourhood Plan. Nearly 200 people from a cross section of the community have stated their full support for them. We developed the following five policy themes to focus our planning policy initiatives: 'Living in Deptford', 'Local Economy & Employment', 'Heritage & Identities', 'Health & Wellbeing' and 'Child-friendly Deptford'.	Disagree. Many of the objectives cover Deptford	No change.
DNA	3	LNA	03 All of Deptford is a recognised Regeneration Area in the London Plan. We ask the Council to develop local policy in full compliance with London Policy SD10 Strategic and local regeneration incl. clarity on how local communities are invited and enabled to engage in these matters in a meaningful way. This is in our view especially important as the Infrastructure Delivery Plan seems to be dating back from 2015. The needs of and opportunities for residents and businesses in Deptford are complex and need to be addressed on much more up-to date and hyper local data to guide a programme of priorities and areas for focused interventions in the context of unprecedented growth, the climate emergency, the economic shock and mental health shock from the pandemic and Brexit. Nearly 50% of Deptford children are living in poverty! DNA asks the Council to develop new and test all existing draft policies in regards to their child-friendliness. Other boroughs have developed SPDs and DNA feels that Lewisham needs to ensure it makes all environments child-friendly; LBL also needs to make the wellbeing of children and young people its key priority for planning and regeneration. Children and Young People are at the heart of sustainable development. We would urge the Council to use/borrow the assessment methodology from Hackney's 'GROWING UP in Child-Friendly Places; Supplementary Planning Document, October 2020'.	The draft Local Plan is supported by a revised Infrastructure delivery Plan. An Integrated Impact Assessment has been carried out on the draft plan and policies. We will review the work undertaken by Hackney	No change.
DNA	3	LNA	05 The Map below indicates Strategic Development Sites as presented in the emerging Local Plan (2021) and shows the quantum of development and their planning status. Sites No1,2,4,5,11,13 as well as 14,15 and 16, located in the Neighbourhood Plan area amount to over 6000 new homes and approx. 90000 sqm of town-centre and employment uses. Deptford high street is currently comprised of about 30000sqm town centre uses for comparison. This highlights the fact that Convoys Wharf is a new town on the river which will change the centre of gravity in Deptford. However, there are no high capacity public transport hubs along the River. We ask the Council in the North Sub Area Objectives section and Key Diagram and Policies to fully integrate Convoys Wharf and Plot 21 into the future planning. There is a shared concern in local communities that this type and scale of private sector development - without the necessary and accessible community, social and employment infrastructures and strategies connecting the new, often relatively affluent communities, with the existing, often economically challenged communities - will lead to an erosion of	Convoys wharf has a live planning permission with an accompanying S106 agreement which outlines improvements to public transport. Convoys Wharf was approved by the then Mayor of London Boris Johnson despite the Council's concerns regarding the scale and massing of the scheme. The Council must now work proactively with the developer to secure the best possible design for each reserved matter application within the parameters of the approved application and design code.	No change.

			<p>community cohesion, more inequalities, identity loss and ghettoisation. In our view, it is likely to lead to regeneration of the type that prices out local people from accessing already scarce amenities, services and opportunities. This concern is more widely reflected in the London Plan's clear corrective approach towards Good Growth moving community cohesion, decarbonising, urban greening and health and well-being infrastructures, improved air quality and more child-friendly environments more at the heart of growth while protecting employment land.</p> <p>Most of those sites included in this site allocation plan have planning consent (coloured in blue lettering), in preparation or live (yellow and orange lettering). A crude population estimate suggests between 12000 and 15000 new residents and between 3000 to 5000 jobs in the Neighbourhood Plan area accommodated on these sites alone. This does not take account of Plot 21 at Convoy's Wharf nor recent and significant new development at Plough Way and infill or retrofitting development in some of Deptford's sizeable warehouse buildings.</p>		
DNA	3	LNA	<p>06 Currently, the 11 Objectives identified for the Northern Sub Area seem to ignore that there is a second Opportunity Area. The profound changes to Deptford by the building out of Convoys Wharf is not mentioned beyond employment related objectives. <i>DNA asks the Council to change this omission and to take a more proactive approach to use planning obligations locally to improve the quality of life in Deptford.</i> DNA does not support the scale of development at Convoys Wharf but does support the public access and the opportunities for 'old' Deptford being much better connected with the River Thames. The 'Key Diagram' in North Sub Area section needs updating with a clear link to physically integrating Evelyn Street Local Centre with the layout consented at Convoys. DNA feels this needs much more detail overall for the benefit of Deptford as a whole - especially through directing payments made and committed under planning obligations into highly deprived communities such as Evelyn while planning ahead for needed capacity for walking and cycling (North-South especially).</p>	<p>Disagree. The spatial objectives for the East Area in the draft Local Plan include a footnote which clearly states that the Opportunity Areas include both the New Cross / Lewisham / Catford and Deptford Creek / Greenwich Riverside OAs. The Regulation 19 plan has been amended to provide a stronger focus on OAs at the front end of the plan in OL1, and to reduce repetition in the sub-areas. However, the spatial objectives for the sub-area, place principles and site allocations provide details on how growth and regeneration will be managed within the area, including Deptford Creekside.</p> <p>It is acknowledged that further details on integrating Evelyn Street Local Centre with new developments should be included.</p>	<p>Policy OL1 spatial strategy amended to provide more details around the Opportunity Areas.</p> <p>Local Plan amended with new key spatial objective and policy for Evelyn Street Local Centre.</p>
DNA	3	LNA	<p>07 In addition, and as shown on the map above, the emerging Local Plan indicates new strategic site allocations for Site 3, 6, 7,12 and is also promoting small sites in the plan area.</p> <p>a. <i>DNA proposes to review all 'new' Site Allocations in the neighbourhood plan areas with a clear 'secured in policy' commitment that these sites, as they are by and large under public sector control, are to become best practice, leading the way in terms of increasing walking and cycling priority, circular economy practises, especially in construction, construction material choices and operation, biodiversity, carbon neutral - fuel poverty combatting development, affordable co-working spaces and live-work units, child friendly spaces while significantly improving the services and the community offer. DNA's Refurbish, Remodel and Retrofit First policy must be at the heart of this regeneration strategy. 'Development which proactively delivers measures tackling the</i></p>	<p>Officers note that Lewisham's Mayor and Cabinet refused the application for DNA to be re-designated as a Neighbourhood Forum.</p>	<p>The Riverside Youth Club and 2000 Community Centre site allocation has been removed from the plan.</p>

climate emergency and contributes to Lewisham's carbon neutral by 2030 Action Plan commitment are strongly supported. Especially, if proposals apply a 'Refurbish, Remodel and Retrofit First' approach to dealing with existing structures on-site.' Our ask for public realm led design and development briefs with masterplan is we fully compliant with London Plan Policy D3 Optimising site capacity through the design-led approach. Developing masterplans following Passive Solar Design principles will also be helped by increasing the red line especially if the site and surrounding land is in public ownership in our view.

Site 8, 9, 10, 17 and 18 are in this context absolutely relevant and in addition to Site 1,2,4,5,11,13 as well as 14,15 and 16 when it comes to the planning for high capacity active movement corridors (walking and cycling in the main plus scooters and cargo bikes) in this part of the borough, especially when considering the new town at Convoys Wharf that emerges on Deptford Stand. The Mayor of London wants 90 per cent of all trips in the neighbourhood to be made by foot, cycle or public transport by 2041. This requires planning and some radical changes and investment in Deptford.

We recognises the last tranche of new site allocations recognises the need to invest in social and community infrastructure as well as industrial land away from the allocated residential-led sites. The Riverside Youth Club and 2000 Community Centre (Site 3), the Albany Theatre (Site 12) and Sites 5,6 and 7 at the edge of Folkstone Gardens are of strategic significance and can if designed well be transformative. The sites promoting new and modernised community, social and commercial uses, supporting this staggering increase in residential and employment populations. However, we feel the site areas as indicated by the red line around site 3, site 12 should be expanded to ensure the best use of land is delivered. All sites require a much needed integration of spaces and functions to deliver better outcomes for the community. Most of the land is under public sector control and the local plan and the site allocations can guide and set a framework

**b. Expanded Site Allocation | Site 3 | Grove Street Local Neighbourhood Centre
Wider area to be included in Site Allocations**

The Site Allocation Plan lists the Riverside Youth Club and 2000 Community Centre and focuses on the building only. DNA feels the site allocation should be widened so that together with the community a masterplan and planning application can be prepared addressing local needs and improving the Neighbourhood Centre as a whole, including how the buildings relate to the street, increase in community, health and wellbeing services, shops, affordable homes, especially those for the most vulnerable, making the Local Centre an exemplar for child friendly development, ensuring all are feeling safe after dark, improving connections with to the River and with Surrey Canal Linear Park and Deptford Park.

DNA asks the Council to make a policy provision securing a public realm led design and development brief with

			<p>masterplan in close collaboration with key stakeholders and the community at large for this Local Neighbourhood Centre – This would be an ideal site for Community Collaborative planning – as would the Albany Site too.</p> <p>c. Expanded Strategic Site Allocation No 12 The Albany Theatre</p> <p>DNA agrees with the proposal of the redevelopment of the Albany to fit the 21st century needs and provide more space and programmes for the local community. DNA would like to propose to include the underused market stall area next to the main building into the site allocation to provide in the future a double height covered market, space for young people and a multi-use street-level urban space all year around.</p> <p>DNA asks to detail the identified 5,002 sqm town centre uses as stipulated in the site allocation sheet on page 611 by securing</p> <ol style="list-style-type: none"> the existing amount of theatre space and employment space to be re-provided; the existing market stall space to be re-provided in a covered market building at affordable cost to the traders; affordable workspace is combined with live-work provision where possible; at least 10% of the new homes are for people in need of ‘Supported and Specialised Accommodation’; those most in need; the current amount of green space on site and all mature trees are retained; a green link with Margaret MacMillan Park is delivered; <p>DNA asks the Council to develop a design and development brief or mini-masterplan in close collaboration with key stakeholders and the community in the form of a community collaborative plan.</p>		
DNA	3	LNA	<p>a. More join-up and integration at Strategic Sites 5,6,7</p> <p>DNA supports the site allocations for employment at this location. It is a key link between north and south at the confluence of two parks and a primary school and strategic cycle and walking routes. DNA asks the Council to include about 1000 sq m of town centre uses for site 6 and 7 to allow for uses that may support the employment population, significant footfall and illuminate the public realm after dark. The use of the site 6 and 7 for housing is not supported. Noise and air quality are key reasons for objecting to this use at those two sites. This even before Site 8, Surrey Canal Triangle with over 3600 homes and 47000sqm of non-residential use is constructed and operational.</p> <p>DNA asks the Council to make a policy provision securing a public realm led design and development brief with masterplan in close collaboration with key stakeholders and the community at large using community collaborative planning for the 3 sites.</p>	Site allocations 6 and 7 are former Strategic Industrial Land Sites and are required to reprovide the existing employment space as a minimum. The indicative capacities of employment floorspace will provide significant local jobs.	No change
DNA	3	LNA	<p>a. Additional Strategic Site Allocation Evelyn Street Local Centre</p> <p>We support the Local Plan proposal to designate the Evelyn Street Shops as a ‘Local Centre’. Investment in this</p>	We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change.

			<p>part of Deptford is supported because it sits within an area of very highest deprivation, has a number of poorly performing open spaces, poor pedestrian and cycling environments, and provides land and green spaces with social infrastructure that could be improved.</p> <p>DNA asks the Council to make a policy provision securing a public realm led design and development brief with masterplan in close collaboration with key stakeholders and the community at large – using community collaborative planning. The redline area to include Evelyn Green, Evelyn Local Centre and Sayes Court Park with a commitment to increasing accessible green space and a high quality walking and cycling environment as well as improved community services, affordable work space and shops.</p> <p>A priority should be providing improved walking and cycling at this location will link Deptford high street, Deptford Station and New Cross Station with Convoys Wharf town centre, school, jobs, river front and riverbus. Improvements to Evelyn Street Junction via the Cycleway No 4 programme and planning obligation payments from Convoys Wharf should make a start of this investment programme. TfL's proposals, as shown below, are worrying as they do not facilitate a direct crossing between Sayes Court Street and Arbinger Grove, not for pedestrians nor for cyclists traveling north to south.</p>		
DNA	3	LNA	<p>08 The Neighbourhood Plan has detailed the concept of the North Lewisham Links and promotes this through the Deptford Green Links policy and further growth and strengthening of green and social infrastructures at the Health and Wellbeing Hub Zones and as well as clusters of affordable co-working space in the creative, green and health and wellbeing sectors, what we call Deptford Work Anchors. (See Attached an extract of our draft Regulation 16 policies for your assistance). We would like to discuss with the council to what extent the next version of Local Plan could expand on our work and identity those areas and policy themes as part of a regeneration framework and strategy for Deptford. See attached Deptford Plan draft policy extracts.</p>	DNA are no longer a designated Forum	No change
DNA	3	LNA	<p>10 In Deptford there are not one but two London Opportunity Areas and a Local Regeneration area designation. And as evidenced in the map above much of the private sector led development is already consented. The current lack of up-to date social, environmental and economic Opportunity Area evidence base makes it almost impossible to tailor a focused plan-led policy framework allowing the public sector to set priorities, lead and guide development and improve the health and wellbeing and prosperity in Deptford. This is fundamental to make best use of land and the planning obligations in our view. While a piecemeal private-sector led neighbourhood development might be acceptable in a low growth and/or affluent places with great infrastructures already supporting residents and businesses to operate at their optimum - it is, we feel entirely unacceptable for Deptford – especially taking account of the need to collectively respond to Climate Emergency and Pandemic</p>	<p>Noted.</p> <p>The Local Plan is subject to an Integrated Impact Assessment which tests the spatial strategy and detailed polices. Please refer to this document for further details.</p>	Policy OL1 spatial strategy amended to provide additional information on Deptford, Creekside Opportunity Area.

			<p>at all scales urgently-. Deptford is already the most densely part of the borough (120000+ people per km2) and with many of the Super Output Areas in the top 5% most deprived areas in all of England. DNA wants the Local Plan to recognise that nearly 50% of our children live in poverty, after housing cost (pre-pandemic data) and so many of our elderly living in poverty too. The Local Plan and Infrastructure Plan absolutely must address this unacceptable situation pro-actively, as priority and adequately with a focused area specific land-use planning and infrastructure plan. About 60ha of the Deptford Neighbourhood Plan area is public estate land and taking the streets and parks into account we feel the level of public control should lead to a set of policies specifically working with these assets to maximise the local benefits that can be generated from a post-carbon economy, a circular economy and a drive and need for more healthy urban environments in an area which will double in population.</p> <p><u>We therefore ask the Council to test and direct policies so they address the needs of the most vulnerable and develop focused strategies and policy framework for Deptford, especially focused on the land and assets they and other public sector agencies have control over.</u> Leading by example will be critical in Deptford where much of the development is already consented and a spatial strategy identifying where already secured and forthcoming planning obligations and <u>Section 106 monies should be invested maximising public good: Consultation from our Reg 14 Survey will help the Council to establish the community's priorities for S106 community projects within the DNA Neighbourhood Plan Area.</u> The Sub Area approach in the current version of the Local Plan could facilitate this more fully and taking Convoys'. It does not do that sufficiently in its current form.</p>		
DNA	3	LNA	<p>CHILD-FRIENDLY DEPTFORD – other comments:</p> <p>www.allianceforchildhood.org</p> <p>I've attached the calculation for Convoys Wharf plots 8 and 15. The calculator they used has been revised because it underestimated the number of children, for example by assuming that people in 2 bedroom accommodation tend not to have children. Because of overcrowding arising from the lack of affordable property families do move into 2 bedroom units. The calculator was revised in 2019. Here is a link to the GLA population yield calculator:</p> <p>https://data.london.gov.uk/dataset/population-yield-calculator</p> <p>Some boroughs have adapted it to suit their own population distribution. It would be good if Lewisham could do the same.</p> <p>DNA has a plan which will show the green routes, which would also be playable space for children. Both the minimum 10 sqm space and playable routes are important.</p> <p>Linked to the importance of involving children in the design, especially of public spaces, green spaces and</p>	<p>Convoys wharf has a live planning approval. Details of green space and play space provision can be found in the design documents associated.</p> <p>The Local Plans policies on affordable housing are in broad conformity with the London Plan and have been thorough tested through the SHMA and Viability Review.</p>	No change.

			<p>streets that DNA is putting forward – here is a further comment from Marion: is it possible to extend the policy to include involving children more generally in the design process not just in major developments?</p> <p>DNA would like LBL to come back to us regarding assumptions made and being used for the education and school provisions and section 106 contributions on the Convoys Wharf site – we know from our own Reg 14 consultation process that there is a strong need for secondary school provision on the Convoys Wharf Site which also includes Special Education Needs provision within it.</p> <p>DNA COMMENTS ON ‘SO-CALLED AFFORDABLE HOUSING CATEGORY OF SHARED OWNERSHIP’:</p> <p>DNA’s Neighbourhood Plan focuses on the need for truly affordable housing – which is LBL Social Rent or Affordable rent (if this is still 60% of market rent for people in Lewisham?). London Affordable rents are on average up to 50% higher than council social rent, and 30% higher than Housing Association rents.</p> <p>Excellent recent article demonstrating why Shared Ownership should not be seen as genuinely affordable:</p> <p>https://www.sharedownershipresources.org/an-expert-on/shared-ownership-and-the-impossible-dream/</p>		
DNA	3	LNA	<p>Evelyn Street 'local centre'. Historically Evelyn Street had many more shops than it presently has. Other 'feed' in streets can be encouraged, too, to have local shops and workshops once again. To encourage "Keep in Local" in leisure and work.</p>	Evelyn Street is identified as a local parade in the Local Plan	No change.
Environment Agency	3	LNA Site allocations	<p>North Area feedback Some of the sites in this area are also close to a number of permitted waste management sites and also in neighbouring boroughs. For the latest list of permitted waste sites with an Environment Agency permit visit our public register in the link below and search by site address or local authority https://environment.data.gov.uk/public-register/view/search-waste-operations</p> <p>This area has some ongoing issues with fly tipping so it is essential proposed development and any vacant sites/buildings have strong security measures to protect development sites from trespass and illegal waste deposits.</p> <p><i>LB Lewisham officer note: Table of sites with water management information included in original representation.</i></p>	Noted.	<p>The Local Plan Part 2 waste management policies have been updated to reflect that there are existing sites with EA waste permits that require safeguarding in accordance with London Plan.</p> <p>The Local Plan has been updated with additional policy points dealing with amenity in terms of waste management.</p>
Lewisham Cyclists	3	LNA	Page 561 Key Spatial Objective 8 in the main document refers to “transform the A2 into a Healthy Street”. We	Noted.	Local Plan amended by referencing the Healthy Streets Approach.

		Key spatial objectives	would suggest the wording of this is altered to “adopt the healthy streets approach along the A2 corridor” and encourage the planning team to follow Tfl guidance on this which is clear and unequivocal. This should also form part of the strategic planning document for the whole corridor, and form conditions of planning along the corridor, including CIL contributions to part fund improvements.		
Telegraph Hill Society	3	LNA	Key spatial objective 1 : We are significantly concerned over the intent behind the reference to “a new modern station at New Cross”. We assume, firstly, that this means New Cross Gate and not New Cross. On that assumption, as we have stated in all previous submissions, we believe that, whilst new station buildings would be required to the north of the existing building and underground, it is important for the heritage of the area that the existing station building on the New Cross Road – which is a distinctive feature of the area – should be retained. We note that § 15.59 states that the “creation of a new Bakerloo Line station should integrate with the existing station” which, contrary to KSO 1, implies the retention of the existing station buildings. The “a new modern station at New Cross” in KSO 1 could best be omitted or, if not, reworded to say “with station improvements at New Cross Gate”.	Noted – yes this means New Cross Gate. A new modern station could be developed which integrates the old. This will be thoroughly tested at the Development Management stage when proposals are brought forward.	Text amended to New Cross Gate
Telegraph Hill Society	3	LNA	Key spatial objective 8 is not acceptable as worded. The A2 is a major arterial network taking traffic from the whole of Kent and much of Sussex into central London and back out again. Any attempt to make it “into a ‘healthy street’ with public realm improvements that make walking, cycling and use of public transport safer and more convenient” is likely to push traffic onto residential roads, particularly across Telegraph Hill (see also paragraph 211) but also through the streets to the north of New Cross in order to gain access to the A200 as an alternative route. Static and congested traffic creates pollution. Spreading traffic across residential roads adds to the pollution on those roads, creates additional hazards for pedestrians, and adds to noise disturbance to residents of those streets. In short, making the A2 a “healthy” street risks making large proportions of the rest of the area less healthy. The policy should be reworded to include a proviso that this will only be done provided that no traffic is displaced onto residential roads and, as suggested under paragraph 211 that this will be established in advance by robust and transparent modelling and monitored thereafter.	We acknowledge that the A2 is a key arterial route and will continue to accommodate large volumes of traffic. However we still believe that improvements can be made to improve walking, cycling and public transport in line with TFL’s healthy street guidance. This will not impact on adjacent residential streets and any proposals will be tested thoroughly.	No change
Telegraph Hill Society	3	LNA	An alternative key spatial objective, which should be pursued, is to accept that the A2 is a major arterial road, to move cycling provision on to routes parallel to the A2 and to move, over time, the key shopping provision from the main road onto other sites (see our comments on shopping in paragraphs 169-171 above and on cycling- and pedestrian-friendly routes in paragraphs 238 and 250 below.)	We acknowledge that the A2 is a key arterial route and will continue to accommodate large volumes of traffic. However we still believe that improvements can be made to improve walking, cycling and public transport in line with TFL’s healthy street guidance. This will not impact on adjacent residential streets and any proposals will be tested thoroughly.	No change.
Telegraph Hill Society	3	LNA	As regards the statement in § 15.5, whilst we agree that the high street in Deptford may offer a “rich and vibrant mix of shops” it is hard to see that New Cross/New Cross	This is subjective	No change

			Gate does so. The retail take is, in our view, poor being mainly confined to food provision, off licences and a couple of dry cleaners (again refer to our comments on the shopping offer (paragraph 169) above.)		
Telegraph Hill Society	3	LNA	The Development Requirements (§ 15.59) need specifically to reference a requirement for a cycle/pedestrian route as an extension across the railway line from Hatcham Park Road to Batavia Road. This route is critical in that it will allow access to Fordham Park open space from any new development and will provide a safe route for cyclists without restricting traffic flow on the A2 and thereby prevent the need for measures that would increase traffic on residential side roads (see paragraphs 238 and 239 above)	This is captured within the site allocations.	No change
Telegraph Hill Society	3	LNA	Any Development Requirements (§ 15.59) and Development Guidelines (§ 15.60) for the site should include a specific reference back to the need for new green infrastructure and social infrastructure. Major objections to the previously proposed Hatcham Works developments from local residents included the impact of additional units on already crowded local parks and medical facilities (see Appendix 2). There should therefore be the requirement that any new development must not reduce the amount of available green recreational space on a per capita basis for the surrounding area and, given the identified lack of such existing space in the area, must increase it if possible.	The former Hatcham Works site is a highly accessible site in a District Centre and is suitable for high-density development. Whilst the site will accommodate open space and amenity space appropriate for a mixed-use town centre development it is not a development requirement to have a large public park. The site is within walking distance to Fordham Park.	No change.
Telegraph Hill Society	3	LNA	Any Development Requirements (§ 15.59) and Development Guidelines (§ 15.60) should further require that any redevelopment of the site should include a supermarket provision.	The indicative site capacity for the former Hatcham Works Site includes 17,550m2 of non-residential uses – which is more than adequate to accommodate a supermarket.	No change.
Telegraph Hill Society	3	LNA	The Development Guidelines (§ 15.60) should be reworded to require that the development includes no buildings that would dominate the Hatcham Park Conservation Area and should generally be limited to no more than six to eight stories (please refer to both Appendix 1 and Appendix 2). Designs should reflect the local character rather than merely and ambiguously “respond positively to the local character”.	The indicative capacities for the Former Hatcham Works site has been informed by the New Cross Gate Area Framework. This provides an indicative layout and massing for the site which is deemed appropriate by the Council. The former Hatcham Works site is a highly accessible site in a District Centre and is suitable for high-density development.	No change.
Telegraph Hill Society	3	LNA	The Development Guidelines (§ 15.60) need to ensure that adequate consideration is given to traffic flows such that they do not impact adversely on the Telegraph Hill and Hatcham Conservation Areas. We were deeply concerned about the Council proposals and the Sainsbury’s/Mount Anvil withdrawn proposals for the “Hatcham Works” site which, we believe, would have directed considerably more traffic through Telegraph Hill on a North-South route. We note § 15.59 which states that the integration of the site “will require a hierarchy of routes with clearly articulated east-west and north-south corridors”. We would like the policy to make clear that this refers only to walking and cycling connections and not road connections. There is no north-south road corridor at present and, indeed, in the 1990s the junction between Jerningham Road and the New Cross Road at New Cross Gate Station was specifically re-	Sites within the New Cross Gate Area will be car-free as per the London Plan parking requirements. A Transport Assessment will accompany any planning application for the site which will assess traffic flows through the area.	No change

			<p>designed after lobbying by the Telegraph Hill Society, with huge community support, to minimise the impact of north-south traffic generated by the development of the Sainsbury's supermarket and other retail outlets (there had been no significant traffic prior to that point). Given the residential nature of Telegraph Hill and the location of the Haberdashers' Askes' two schools at the north and south ends of Jerningham Road, we will strongly resist any proposal that would facilitate an increase in traffic along this road and through Telegraph Hill.</p>		
The Hatcham Society	3 3	LNA Key Strategic Objectives LNA SA 08	<p>We find it very troubling that Lewisham in their North area Plan looks to "safeguard strategic waste management sites including SELCHP" while promoting the redevelopment of Millwall Football stadium adjacent to SELCHP with 2,500 new homes planned.</p> <p>According to the aforementioned GLA commissioned report, "Emissions from the five EfW facilities within Greater London are predicted to be associated with 15 deaths of London residents per year." With this in mind, we do not believe it is ethical to both safeguard SELCHP and build more homes so close to the incinerator.</p>	The London Plan sets out the strategic approach to achieve net waste self-sufficiency (i.e. the equivalent of 100 per cent of London's waste should be managed within London by 2026). It requires that the Council, through the Local Plan, identifies and safeguards waste sites/facilities in order to meet the borough's apportioned tonnage of waste. SELCHP plays an important role in helping the borough to meet its London Plan waste apportionment figure. For the time being, the Local Plan must therefore continue to safeguard the site for waste management uses.	No change
Transport for London	3	LNA Key Spatial Objectives	<p>While we recognise that this local plan is generally supportive of cycle hire, we specifically recommend including cycle hire expansion in the Lewisham North Area which is both realistic and desirable, given the current cycle hire strategy to reach Greenwich Park, in line with CS4 expansion. However, with the success of cycle hire, TfL would also hope to work with the Borough to see if it might be possible to extend to other places. This would require land and funding to be secured e.g. through developer obligations.</p> <p>'8. Transform New Cross Road (A2) into a 'healthy street' with public realm improvements that make walking, cycling and use of public transport safer <u>and more convenient, and which support any expansion of cycle hire to the area</u>.'</p> <p>'9. Maximise the recreational and amenity value of the River Thames and Deptford Creekside by transforming the riverside area into a vibrant neighbourhood and visitor destination. Enhance public access to the river, including by repairing breaks in the Thames Path and Waterlink Way, as well as enabling river bus services at Convoys Wharf <u>and by providing opportunities for cycle hire expansion into this area</u>.'</p> <p>'10. Protect and enhance open and green spaces, including waterways. Continue to deliver and expand the North Lewisham Links, a connected network of high quality walking and cycle routes that link these spaces, <u>including supporting the potential for any cycle hire expansion along these routes</u>. Ensure these routes address existing barriers to movement, such as those caused by the tangle of railways and major roads'.</p>	Noted.	Local Plan amended to incorporate stronger direction for expansion of cycle hire in North Area.

London Wildlife Trust	3	LNA 01	We support this principles, especially in respect of Part F.	Support noted.	No change.
Port of London Authority	3	LNA 01	<p>11. Policy LNA1: North Area Place Principles</p> <p>Figure 15.2 must be updated to highlight the safeguarded wharf boundary for Convoys Wharf, and also must highlight the proposed riverbus stop at Convoys wharf, to the east of the safeguarded wharf boundary, as part of the public transport improvements for the area.</p> <p>Support the reference within the Transport and Connectivity section of the Local Plan and this policy on the support to enable riverbus services at Convoys Wharf. As part of part A(e), on 'land safeguarded to secure the delivery of strategic transport infrastructure', it is recommended that the Safeguarded Convoys Wharf is also highlighted here, which as noted elsewhere in this response is safeguarded for waterborne freight cargo handling which will help to achieve the councils objectives to facilitate good growth and achieve modal shift to more sustainable transport modes.</p> <p>In addition, support the reference to riverbus services within key spatial objectives no 9 for this area which proposes to maximise the recreational and amenity value of the River Thames and Deptford Creekside by transforming the riverside area into a vibrant neighbourhood and visitor destination, by enhancing public access to the river, including by as enabling river bus services at Convoys Wharf.</p>	<p>The Safeguarded Wharf is outlined in Fig 11.4 within Part Two relating to Policy SD9 Water Management and referenced within the Convoys Wharf Site allocation.</p> <p>The sub are map depicts strategic features and designations. The riverbus stop is too detailed to be shown on the map.</p>	No change.
Telegraph Hill Society	3	LNA 01	As stated in the preceding paragraphs, we have considerable concerns as to whether this policy is either achievable or, indeed, desirable. We agree that the A2 is a strategic movement corridor, but are deeply concerned that giving "priority to safe and convenient movement by walking and cycling" as set out in LNA2A.C and LNA2.D will push traffic onto residential roads, in particular across Telegraph Hill but also through the streets to the north of New Cross to gain access to the A200 as an alternative route. The A2 is the primary traffic route and must remain so. Issues around cycling can be dealt with by parallel cycle routes avoiding the A2 and shopping can be encouraged off the main road by the re-imagination of the shopping centre utilising vacant land to the north of the A2. This policy as it presently stands, is not acceptable and will be strongly opposed by residents.	We acknowledge that the A2 is a key arterial route and will continue to accommodate large volumes of traffic. However we still believe that improvements can be made to improve walking, cycling and public transport in line with TFL's healthy street guidance. This will not impact on adjacent residential streets and any proposals will be tested thoroughly.	No change
	3	LNA 02	New Cross Road has the worst pollution London. Plans in the LLP to improve the air quality directly contradict the expansion of residential properties in the area by more than 6000 residential units that will bring their carbon footprint in extended vehicle use, services and domestic energy use. The plan cannot claim Green credentials whilst contradicting itself in its methods and aspirations for the area.	Lewisham must plan for the growth required to meet its London Plan target of 1,667 new homes per year. Our view is that these homes are best located in areas which have good access to public transport, services and job opportunities to reduce the need for car use. New Cross is one of a number of areas where the draft plan promotes significant development. The draft Local Plan also sets out policies to reduce car use, insisting on car free development in accessible locations, promoting the use of sustainable forms of transport and identifying significant improvements to public transport.	No change

Lewisham Cyclists	3	LNA 02	LNA2 New Cross Road / A2 corridor Section A; as per point above. In addition, Section D includes "Interventions to support a rebalancing of New Cross Road to prioritise movement by walking and cycling, including by widening pavements and reducing pinch-points". Lewisham Cyclists expect any public realm scheme involving the removal of the Amersham Vale Gyratory to provide a high quality cycle route to facilitate the future cycling route 11 as per the Transport for London Cycling Action Plan from Deptford along New Cross Road connecting to Old Kent Road on the borough boundary.	Noted. We will pass this on to our Transport and Highways team.	No change
Telegraph Hill Society	3	LNA 02	At a minimum LNA2 should make it clear that the Council will only support proposals for change and will only itself make changes that do not result in an escalation of traffic onto primarily residential roads.	Agreed.	Policy LNA2 amended to address vehicle volume and movements.
Telegraph Hill Society	3	LNA 02	Policy LNA2.B.a should specifically include the need to respond sympathetically to the Hatcham Park, St James and Telegraph Hill Conservation Areas.	The policy states that proposals should respond positively to heritage assets – this includes conservation areas – this is outlined in Policy HE2	No change.
Telegraph Hill Society	3	LNA 02	In respect of policy LNA.D.a, please see our response to Key spatial objective 8 above - whilst we agree that the station will need upgrading to cater for the BLE, the original station buildings contribute to the heritage of the New Cross Road. A new station interchange (as stated here) is acceptable but a new station or an interchange which involves the destruction of the existing station building is not.	A new modern station could be developed which integrates the old. This will be thoroughly tested at the development management stage when proposals are brought forward.	No change
The Hatcham Society	3 3 2	LNA 02 LNA SA 08 GR 05	Bridgehouse Meadows There is currently a section of Bridgehouse Meadows nature conservation area which is gated and hardly used by residents apart from by itinerant dog-walkers. We would love to see that space opened up and turned into allotments and a community wildlife garden for local residents. This area is highly deficient in greenspace and this section is currently under-utilised. With the backing of the council, we would like to open it up and turn it into a positive community space which aims to benefit the residents of Manley Court Care Home and beyond.	We will pass this on to our Parks team	No change
The Hatcham Society	3 3	LNA 02 LNA SA 09	Hatcham Works What we welcome The main positive from the Plan is the protection of the Bakerloo Line Extension as it aims to safeguard the area currently owned by Sainsbury's for the construction and excavation of the tunnels. We approve of the changes between the draft New Cross Gate SPD and what is now proposed in the Lewisham Local Plan when it comes to proposed reopening of Hatcham's residential streets to traffic from the New Cross Road. The draft SPD saw the recommendation of creating a "new circular route via Harts Lane" [Point 9, Page 52 of the draft SPD] and the recommendation of creating a "secondary access to Hart [Sic] Lane via Hatcham Park Road - suitable	Support Noted.	Policy LNA2 amended to address vehicle volume and movements.

			<p>for Bus traffic' [Point 4, Page 43. We opposed these changes and 87 residents signed a petition against the reopening of Hatcham to traffic from the New Cross Road.</p> <p>We were pleased to see in the Plan that it now says "The layout of the site should incorporate sufficient space to accommodate interchange between bus, tube, rail, cycling and walking." [Lewisham's North Area, pg 49]</p> <p>We need this section to be more robustly phrased to completely rule out the re-opening of residential roads to vehicle traffic from New Cross Road to the Hatcham Works site and the proposed Surrey Canal triangle site.</p> <p>If the roads are reopened, this will go directly against the Mayor of London's Healthy Streets Approach which seeks to create streets which are "pleasant, safe and attractive".</p> <p>We also welcome the proposal of a "New walking and cycle access through the site from Hatcham Park Road / Hart's Lane. This must include a clearly articulated east-west route within the site, also enabling a link from Hatcham Park Road to Batavia Road via a bridge over the railway." We urge Lewisham Council to push for this new route - in line with policy LNA2 - before the delivery of the Bakerloo Line Extension which may take decades given the dire state of TFL's finances following the pandemic. We believe this will bring an immeasurable benefit to the residents in the North of the borough who may start cycling more. So many are discouraged from going on their bike in Hatcham because of the prospect of cycling on the hostile New Cross Road.</p>		
London Wildlife Trust	3	LNA 04	We support this policy in respect of Part B.	Support noted.	No change.
	3	LNA 04	<p>it is my hope that your Local Plan for the ongoing development of Deptford Creekside and surrounding areas is carried out with respectful acknowledgement and celebration of the beautiful diversity of life and culture that exists in this spectacular borough and that the upcoming (delayed due to Covid) London Borough of Culture award be positively integrated with the local community which is comprised of many extremely talented and creative individuals and groups.</p> <p>Why not employ local graffiti artists to spray hoarding boards rather than have the constant task of painting over rushed tags of pent up frustration?</p> <p>Why not experiment with tiny house build projects and eco-friendly building schemes such as air-crete, cob, earthbag and strawbale to name but a few options that can bring community groups together to co-learn and co-create whilst instigating and promoting a greener way to thrive even within city lives?</p> <p>The damning process of Tidemill left many folk heartbroken and downtrodden. There is a local resident</p>	The Local Plan provides strategic policies that support the culture and creative industries within the borough.	No change.

			<p>who saved a seed from the Indian Bean Tree and it's growing so well along with some other saplings. (I think that is it's name, forgive me as I've left this to the last minute due to a number of reasons regarding mental health, depression and general connection with the www) Why not plant this to grow in all its majesty on a public site for all to enjoy for generations to come?</p> <p>I heard comparisons that Tidemill wasn't the Hanging Gardens of Babylon or Kew so it didn't matter. How utterly short-sighted and narrow-minded. How about making a Knew Garden? Inviting folk to contribute plants and tips, etc. from around the world? I have faith in the funghi and would love to experiment with its many uses and forms. Plus edible flowers and other wholesome products...I wonder why the polytunnels and greenhouse on the Lewisham College site are still left unused after all this time? Vertical gardening, etc.</p> <p>How about letting us so many artists produce positively without an inherent capitalist start point but from an altruistic foundation? I dream of sound-healing domes and peace memorables, green and parkour spaces for people to meet and integrate and initiate well-being and positive social collaborations and idea-harvesting.</p> <p>Why not implement and encourage positive creativity and collective community actions that can benefit not only the locale but the whole world too?</p>		
Port of London Authority	3	LNA 04	<p>12. Policy LNA4: Thames Policy Area. Policy LNA4 must give a specific reference on the need for developments situated alongside Deptford Creek to ensure they are designed in line with the Agent of Change principle. On the Royal Borough of Greenwich side on Deptford Creek there is an operational wharf situated at Brewery wharf, safeguarded by ministerial direction, which can operate for up to 24 hours a day in line with tidal movements. In line with London Plan policy SI15 it must be ensured as part of any future development located in close proximity that any proposals are designed to minimise the potential for conflicts of use and disturbance, including during day and night time periods, to ensure operations at the safeguarded wharf are not constrained.</p> <p>Support the reference in the policy on the need for development proposals to enhance physical connections to the river or creek, including walking and cycle routes that enable access to the waterfront. This is in line with the PLA's Thames Vision which includes the goal to join up the Thames Path from source to sea, including enhancing access to riverside areas. Also support the references in part B (e & f) on the need to resist encroachment into the creek or river and foreshore and the promotion of river-related and marine uses, where appropriate.</p> <p>As part of the aim of the policy to activate the river or creek as an important part of the public realm and</p>	Support noted.	Changed incorporated within policy LNA 4 and other water management policies amended to refer to the Agent of Change.

			contributing to the liveliness of the waterfront, the PLA would support the promotion for increased recreational opportunities at appropriate parts of the river and Deptford Creek within the policy. This is supported by the Thames Vision which includes the goal to see greater participation in sports and recreation on and alongside the river.		
	3	LNA 2	<p>The 'Route 1' Cycle and Pedestrian Bridge</p> <p>A strong positive in the plan is the retention of the plan to build a bridge over the railway. This was a huge plus in the design for Hatcham Works and was even included in the Sainsbury's Mount Anvil plan although they described the bridge as an "aspiration" rather than a concrete realization in their plans.</p> <p>Keeping the bridge and the green 'Route 1' cycle and pedestrian route (including the pedestrian bridge) parallel to the New Cross road is an immense plus as part of the LLP and would link New cross Gate to Fordham Park. New Cross Gate chronically lacks green space to the bridge would provide a significant enhancement to the lives of New Cross Gate residents. Crucially would be transformational to the lives of the children in this area their journey to the local school of Deptford Green infinitely more safe and enjoyable. They would be walking safely away from the polluted noisy New Cross Road or the very narrow and dangerous underpass on Cold Blow Lane.</p> <p>The retention of the 'Route 1' bridge in the New LLP is a significant plus for the future of New Cross.</p>	Noted.	No change.
Transport for London	3	LNA 2	C Development proposals must reinforce the role of New Cross Road as a strategic movement corridor, giving priority to the safe and convenient movement by walking and cycling, as well as the use of public transport. This principal east-west route should be supported by a complementary network of legible, safe and accessible routes, including cycle routes, that link with it to enhance connections between neighbourhoods and places, providing opportunities for any expansion of cycle hire'.	Agreed this is addressed in Policy LNA2 New Cross Road / A2 corridor and also within the New Cross Area Framework endorsed by the Council.	Local Plan amended to incorporate stronger direction for expansion of cycle hire in North Area.
Greater London Authority	3	LNA SA 01	In addition, the corresponding Site Allocation for the comprehensive redevelopment of the site should refer more prominently to the role and long-term protection of the safeguarded wharf within the scheme. Safeguarded wharves are important to facilitate sustainable water freight (London Plan para 15.9.4), in particular in close proximity to central London.	The site allocation already mentions Appropriate safeguarding and re-activation of the existing wharf and associated vessel moorings, including for river based passenger transport. It should also acknowledge that the range of uses on the wharf will be restricted to those specified in the S106 agreement	Convoys Wharf MEL site allocation amended to mention long-term protection and to restrict the type of uses on the safeguarded wharf to those specified in the S106 agreement, to ensure compatibility with nearby residential use.
Royal Borough of Greenwich	3	LNA SA 01	Convoy's Wharf: We support the redevelopment of this site and its role in enhancing connectivity and reinstating the Thames Path, as well as the need to have regard to impacts on protected views and the setting of the World Heritage Site in establishing building heights and scale. This site is in close proximity to the Grade II* listed Church of St Nicholas, and the allocation should acknowledge that heritage asset and ensure that development respects its setting.	Noted	Convoys Wharf MEL site allocation amended to include reference to the Grade II* listed Church of St Nicholas.

Port of London Authority	3	LNA SA 01	<p>Site 1: Convoys Wharf Mixed-Use Employment Location. In principle support the allocation, which recognises the safeguarded wharf designation and includes reference to the need to reactivate the wharf with associated vessel moorings and up to 32,200 m² of employment floorspace (Sui Generis & Class B2). Support the reference in paragraph 15.21 (development requirements) on the need to reactivate the wharf. As part of this it is considered that specific reference is given in the site allocation on the need for the proposed residential development located in close proximity to the safeguarded wharf, to be designed to minimise the potential for conflicts of use and disturbance, including utilising the site layout, building orientation, uses and appropriate materials to design out potential conflicts in line with the Agent of Change principle. Support the reference under the development requirements, which recognises the need for the 'repair of breaks' in the Thames Path and extension of the route along the riverfront across the site, or as near as practical having regard to the safeguarded wharf. In principle this is supported and is in line with the PLAs Thames Vision, which includes the aim to join up the Thames Path from source to sea but notes that there are particular challenges in finding the best route near operational wharves and terminals. In addition, within the last bullet point of the site allocation, which refers to the need for Transport for London and the MMO to be consulted on development and design options, the PLA must be added as an additional consultee.</p>	Support noted. The site allocation already mentions appropriate re-activation of the existing wharf and associated vessel moorings, including for river based passenger transport. It should also acknowledge that the range of uses on the wharf will be restricted to those specified in the S106 agreement	Convoys Wharf MEL site allocation amended to mention long-term protection and to restrict the type of uses on the safeguarded wharf to those specified in the S106 agreement, to ensure compatibility with nearby residential use. Convoys Wharf MEL site allocation also amended to add Port of London Authority as a consultee.
	3	LNA SA 02	The linear park stretching from Greenland Place eastwards should be core to the timber yard development, linking communities, businesses and provisioning an alternative walking route away from Evelyn Street.	The route is seen as a key walking route and will be delivered through the Deptford Landings scheme	No change.
Port of London Authority	3	LNA SA 02	<p>Site 2: Timber Yard, Deptford Wharves at Oxestalls Road Mixed Use Employment Location. As highlighted above under policy SD9, specific reference must be given in the site allocation on the need to ensure any development proposals that come forward are designed such a way to ensure there are no conflicts of use or disturbance with the safeguarded Convoys Wharf, in line with the Agent of Change principle.</p>	Disagree. The site is not located near to the safeguarded wharf.	No change.
	3	LNA SA 03	Site 3: The Riverside Youth Centre building is an "iconic" building of the 20th century on Pepys estate and should be refurbished first.	Agree. There are now plans to refurbish parts of the building.	The Riverside Youth Centre and 2000 Community Centre site allocation has been removed from the Plan
DNA	3	LNA SA 03	Site 3: The Riverside Youth Centre building is an "iconic" building of the 20th century on Pepys estate, and should be refurbished first.	Agree. There are now plans to refurbish parts of the building.	The Riverside Youth Centre and 2000 Community Centre site allocation has been removed from the Plan
Lewisham Cyclists	3	LNA SA 04	Evelyn Court at Surrey Canal Road Strategic Industrial Location; This site needs to recognise the council transport strategy to deliver Cycleway 4 in making sure any development does not result in a reduction in existing footway or carriageway space. This should be detailed in	Noted	Evelyn Court LSIS site allocation amended to include a requirement for the site to facilitate the delivery of Cycleway 4.

			the development requirements as part of the public realm strategy.		
	3	LNA SA 05	Canal Approach I request that Lewisham Council prioritise reopening Canal Approach towpath, part of Deptford Parks Liveable Neighbourhood as a key strategic route for North Deptford.	The Local Plan identifies this as a key strategic route for North Deptford highlighted in fig 15.2 and underpinned by the North Lewisham Links policy. The Council have been working with local groups as part of the Liveable Neighbourhoods Project to progress the scheme. Due to the financial challenges that TFL find themselves as a result of COVID-19 the project is having to be scaled back in terms of the scope. The details of which are currently being discussed.	No change.
Lewisham Cyclists	3	LNA SA 06	Strategic Industrial Land (SIL) at Surrey Canal Road and Trundleys Road; This site needs to recognise the council transport strategy to upgrade Cycleway 10 (previously Quietway 1) in making sure any development does not result in a reduction in existing footway or carriageway space. This should be detailed in the development requirements as part of the public realm strategy.	Noted	Surrey Canal Road and Trundleys Road site allocations amended to include a requirement for the site to facilitate the delivery of Cycleway 10.
Lewisham Cyclists	3	LNA SA 07	Strategic Industrial Land (SIL) at Apollo Business Centre; This site needs to recognise the council transport strategy to upgrade Cycleway 10 in making sure any development does not result in a reduction in existing footway or carriageway space. This should be detailed in the development requirements as part of the public realm strategy.	Noted	Apollo Business Centre site allocation amended to include a requirement for the site to facilitate the delivery of Cycleway 10.
Sport England	3	LNA SA 08	Surrey Canal Triangle Mixed-use Employment Location Sport England would expect that existing sports facilities and playing field on this site are reprovided to a satisfactory standard; this includes any meanwhile uses. Provision of sports on this site should also be informed by Lewisham's evidence base for sport.	A new planning approval for the Surrey Canal Triangle site has now been approved. The site allocation will reflect this approval.	Surrey Canal Triangle MEL site allocation amended to reflect planning consent granted for the site.
Lewisham Cyclists	3	LNA SA 08	Surrey Canal Triangle Mixed-use Employment Location; This site needs to recognise the council transport strategy to deliver Cycleway 10 in making sure any development does not result in a reduction in existing footway or carriageway space. This should be detailed in the development requirements as part of the public realm strategy. As part of the Surrey Canal Triangle Masterplan, development requirements must also recognise the essential need for upgrade to the Connect 2 path running from Bridgehouse Meadows to Oldfield Grove and improve connectivity between Bolina Road and Cycleway 10, all in line with London Cycle Design Standards . CIL and S106 contributions from developers would need to take this into account.	Noted	Surrey Canal Triangle MEL site allocation amended to include a requirement for the site to facilitate the delivery of Cycleway 10. Also amended to include requirement to upgrade Connect 2 path.
	3	LNA SA 08	The improvement of Millwall Stadium is good for the future, but what about within its improvements incorporating the whole structure being covered in solar panels to help provide renewable energy for the local area.	This is detailed point and does not relate to the strategic nature of the Local Plan. Any proposal coming forward for Millwall Stadium will have to address the draft sustainability policies outlined in the plan.	No change.
	3	LNA SA 09	[A] - My last endeavour regarding planning matters in my Borough of Lewisham , was my letter to the Planning Department dated 23 February 2020 . titled - Planning Application DC/19/114283 , Sainsburys SE14 , Housing Density .	Whilst the council can advise applicants through pre-application processes it is entirely up to applicants if and when they submit applications. With regard to application DC/19/114283 this was later withdrawn by the applicant and has no bearing on the Local Plan site allocation.	No change.

			<p>My comment at the recent zoom consultation was that I feel disappointed that the Developer had apparently NOT been guided away from making the Application, by the Planning Department, as it appeared to be rather vulnerably poor. The nominal site area was drawn all over the place , including a little way up both Troutbeck Road and Jerningham Road , also the shops along the New Cross Road , A2 , were serviced from a major bus bay and there was an idiosyncratic relationship with the Hatch Conservation Area . However it may have been just a play around to establish Land Values.</p> <p>Whatever the local community , assume they are being served by the Lewisham Planning Officers , that appears in this case , the community was marginalised , and also there was a great waste of energy , which post pandemic must be avoided at all costs .</p> <p>[a] - The local community is disadvantaged, expertise / time available regarding Planning Application Assessments.</p> <p>[b] - Reduction in Energy, energy waste must become more of a consideration, in the age of the Climate Crisis.</p>		
	3	LNA SA 09	<p>Plans to redevelop the Sainsburys site at New Cross Gate faced major objections recently due to the nature of the proposed development. This included the building of several high rise towers, this would have had a huge impact on the current residents of the area. Due to overwhelming objections, these plans were abandoned. The current plan would see a return to the redevelopment of the site including high rise towers and very little if any green space. Any development of this site would need to take into account the conservation status of the area and not ignore it for high rise single flats that offer no long term value for families.</p>	<p>Where there are no current, advanced pre-application discussions the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Site Allocations Background Paper.</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site including the the site’s highly accessible location, suitable for high-density development as well as reflecting the site’s surrounding character and Conservation area. The indicative capacity has also been tested through the New Cross Gate Area Framework that has been endorsed by the council. -Based on these considerations, the residential units have been amended.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	<p>Former Hatcham Works site allocation amended by reducing residential capacity to 800 units, increasing employment floorspace to 7,550m2 and reducing main town centre floorspace to 10,000m2, in line with the New Cross Area Framework.</p>
Lewisham Cyclists	3	LNA SA 09	<p>Former Hatcham Works, New Cross Road & Goodwood Road and New Cross Road; Both sites need to recognise and acknowledge the future cycling route 11 as per the Transport for London Cycling Action Plan from Deptford along New Cross Road connecting to Old Kent Road on the borough boundary in making sure any development does not result in a reduction in existing footway or carriageway space. This should be detailed in the development requirements as part of the public realm strategy. Plans for a “new walking and cycle access through the site from Goodwood Road. This must include a clearly articulated east-west route within the site, also enabling a link from Hatcham Park Road to Batavia Road via a bridge over the railway” should require adequate CIL and S106 contributions from developers as a condition of planning</p>	<p>Noted. CIL and S106 are covered in Policy DM2 in Part 4 of the Local Plan.</p>	<p>Former Hatcham Works and Goodwood Road site allocations amended to include a requirement for the sites to facilitate/ contribute to the delivery of Cycle route 11.</p>

			with any bridge design meeting the Department for Transport Local Transport Note 1/20 and London Cycle Design Standards .		
The Hatcham Society	3 2	LNA SA 09 TR 04	There is also the issue that all the extra residents of the Hatcham Works site would need parking space. As it stands in the present we have commuters driving into zone 2 and taking public transport into the centre of London. There is widespread opposition in the community to imposing controlled parking zones (CPZ) in the area so the extra cars and parking spaces generated by the new Hatcham Works would inevitably overcrowd the streets of Hatcham Conservation area with cars.	Any proposal for the Hatcham Works site will be car-free. The Council is supportive of implementing Controlled Parking Zones, only where they have support from the public.	No change.
The Hatcham Society	3	LNA SA 09	Backing the views of the Telegraph Hill Society We wholeheartedly back the majority of the views put forward by the Telegraph Hill Society in response to Lewisham's draft Local Plan. We back the Telegraph Hill Society's view that "there would be considerable merit in designating the Hatcham Works site as the Primary Shopping Area for future development as it has the capacity to create a better local shopping experience than the A2 if sensitively developed." We also believe that the Hatcham Works site is not suitable for tall buildings and believe it would be more in line with the Borough's Vision if the area was developed for retail and for creative employment alongside a new green space. We back the Telegraph Hill Society's view for the Hatcham Works site that "the Development Guidelines (§ 15.60) should be reworded to require that the development includes no buildings that would dominate the Hatcham Conservation Area and should generally be limited to no more than six to eight stories (please refer to both Appendix 1 and Appendix 2). Designs should reflect the local character rather than merely and ambiguously "respond positively to the local character". We also back the Telegraph Hill Society's view for the Hatcham Works site that "The Development Guidelines (§ 15.60) need to ensure that adequate consideration is given to traffic flows such that they do not impact adversely on the Telegraph Hill and Hatcham Conservation Areas." We believe that the guidelines must robustly prevent any increase in traffic to both Conservation areas.	The indicative capacities for the Former Hatcham Works site has been informed by the New Cross Gate Area Framework. This provides an indicative layout and massing for the site which is deemed appropriate by the Council. The former Hatcham Works site is a highly accessible site in a District Centre and is suitable for high-density development. Any proposal that is submitted for planning will be subject to a Transport Assessment which will assess traffic flows.	No change.
The Hatcham Society	3	LNA SA 09	We also back the Telegraph Hill Society's view that at the very least, per capita green space should not be reduced and the Plan's target should be to increase it. This should be a core Lewisham strategy. We already highlighted in our response (paragraph 36) that we believe Hatcham Works is more suited for a new green space and transport interchange (alongside a Primary shopping area) to fulfil the needs of existing residents. The Hatcham Society would like to see existing green spaces such as the gated Bridgehouse Meadows nature conservation area improved and made more accessible.	The former Hatcham Works site is a highly accessible site in a District Centre and is suitable for high-density development. Whilst the site will accommodate open space and amenity space appropriate for a mixed-use town centre development it is not a development requirement to have a large public park. The site is within walking distance to Fordham Park.	No change.

Transport for London	3	LNA SA 09	<p>This provides strong protection for use of the site as a new BLE station, which we welcome. However, the wording should be strengthened to support the use of the site for construction as well. It should also make clear that the site is identified as a worksite for the BLE and is included in the formal safeguarding directions for the scheme. As such, no prejudicial development should occur before the BLE is delivered. This should be reflected in the text and identified development capacity under the different spatial strategy options.</p> <p>The Borough should consider using the draft local plan for safeguarding lands surrounding the site, including that of the existing railway station (New Cross Gate). This site allocation should also require car-free development.</p>	<p>Noted. The Local Plan must accord with the London Plan, which sets out policy on car parking. Parking for any new development will be car free.</p> <p>The Secretary of State has already safeguarded all of the land required for the construction and delivery of the BLE.</p>	Former Hatcham Works site allocation amended to make reference to no prejudicial development taking place prior to the delivery of the BLE and to a temporary works site.
	3	LNA SA 09	<p>Hatcham Works is simply too small to house the proposed 912 residential units. Without building skyscrapers that would not be in keeping with the area and in particular the adjacent conservation areas of Hatcham and Telegraph Hill. Proximity or otherwise of the tall buildings proposed in the LLP on the land currently owned by Sainsbury's does not solve the problem that huge infrastructure in terms of schools and welfare needed to support this huge influx of residents. In an already densely populated area the LLP is planning to raise the number of residents by 912 bringing the equivalent influx of cars and service traffic for that influx into the area. There appears to be no assessment of the environmental effects of these extra residents and their needs in the LLP.</p> <p>Parking</p> <p>There is also the issue that all the extra residents of the Former Hatcham Works would need parking space. As it stands in the present we have commuters driving into zone 2 and taking public transport into the centre of London. There is widespread opposition in the community to imposing controlled parking zones (CPZ) in the area so the extra cars and parking spaces generated by the new (Former) Hatcham Works would inevitably overcrowd the streets of Hatcham Conservation area with cars.</p> <p>Through Traffic in Hatcham Park Conservation Area</p> <p>I am concerned about how the LLP proposes to connect with the Hatcham Conservation Area. The LLP refers to a "positive" relationship to the Former Hatcham Works, suggesting that – 'There should be a positive relationship with the site's western edge, including the junction of Hatcham Park Road, Harts Lane and access into the site.' (15.60 Development guidelines).</p> <p>This is too vague and open to interpretation.</p> <p>It leaves the possibility open to a potential Developer to puncture through into the former Hatcham Works site</p>	<p>The indicative capacity for the former Hatcham Works site was informed by the endorsed New Cross Gate Area Framework.</p> <p>The site is a highly accessible site and suitable for high-density development.</p> <p>Parking for any new development will be car free.</p> <p>Further details on the key design principles for the site can be found in the New Cross Gate area Framework.</p>	No change.

			<p>from the Hatcham Conservation Area. This was vehemently opposed in the consultation for the SPD, which wanted traffic (buses delivery vehicles and cars re entering the Hatcham Estate. This was also proposed by the Sainsbury's and Mount Anvil developments which were met with a huge amount of local opposition, especially with regard to the placing of the waste facilities of the flats and the supermarket opening out into the conservation area.</p> <p>Our area has become safer quieter and infinitely more pleasant place to live and any ingress of traffic to the Conservation Area of Hatcham Park would firstly go against the healthy street ethic that the LLP wishes to champion and secondly be met with huge opposition by the local community who cherish the quiet enclave created by blocking Harts Lane and Nettleton rd which was an initiative backed by councillors and Lewisham council at back in June 2003 as part of the New Deal for Communities (NDC).</p> <p>These through traffic prevention tools should be safeguarded in the LLP and be labelled non negotiable in the LLP.</p>		
	3	LNA SA 9	<p>On a separate matter: when assessing schemes for the Hatcham Works site, please could you make sure that there will be well-lit pedestrian access from New Cross Gate station back into the Brocklehurst Street and John Williams Close residential areas. At the moment, the car park in front of TK Maxx - which everyone walks through to get home - and Harts Lane, are not safe walking routes at night. Harts Lane is always deserted, because it is only overlooked by three or four houses at Brighton Grove end. Ideally could you require a safe lit route across the Hatcham Works site that approximates to the short-cut across the car park to the ramp down to Harts Lane. In the online meeting, someone suggested that the ramp location could be an entry to the future tube station. That would be good.</p>	<p>These matters are picked up in the site allocation and the Council's endorsed New Cross Area Framework.</p>	<p>No change.</p>
Telegraph Hill Society	3	LNA SA 09 QD 04	<p>For the reasons set out in more detail in our commentary on policy QD4 (paragraphs 86 to 87) we do not believe the site is suitable for tall buildings and, as set out above, believe it would be more in line with the Borough's Vision for a welcoming borough and its policies on shopping and employment if the area was developed for retail (paragraphs 169 to 171) and for creative employment uses (paragraph 157).</p>	<p>The indicative capacities for the Former Hatcham Works site has been informed by the New Cross Gate Area Framework. This provides an indicative layout and massing for the site which is deemed appropriate by the Council.</p> <p>The former Hatcham Works site is a highly accessible site in a District Centre and is suitable for high-density development.</p>	<p>No change</p>
Telegraph Hill Society	3	LNA SA 09	<p>In terms of the aspiration and desires of residents for a liveable, welcoming and attractive area (which Lewisham's Vision aspires to) we would again refer you to the survey we carried out when the Sainsbury's/Mount Anvil scheme was put forward, which showed, inter alia:</p>	<p>The indicative capacities for the Former Hatcham Works site has been informed by the New Cross Gate Area Framework. This provides an indicative layout and massing for the site which is deemed appropriate by the Council.</p> <p>The former Hatcham Works site is a highly accessible site in a District Centre and is suitable for high-density development.</p>	<p>No change.</p>

			<p>(a) The development was over-dense and over-tall and the capacity for units should be reduced to no more than 7-10 storeys</p> <p>(b) No development should be built before the Bakerloo line is in place</p> <p>(c) There was insufficient provision for green space</p> <p>(d) There was insufficient provision for affordable homes</p> <p>(e) Any development should commit to funding all provision for sufficient new facilities, not just capital spend</p> <p>(f) No development should be built unless it incorporates adequate car parking</p> <p>(g) Concerns over traffic and “rat-running”</p> <p>(h) Concerns over the heritage impact and</p> <p>(l) Concerns over the impact on existing local communities. The full survey results are given in Appendix 2 to this paper.</p> <p>Issues (b) and (d) are addressed in the proposed Local Plan and there is scope, although involving ambiguity, for the proposed Plan to address some of the other points. It is, however, impossible for the Plan, given the current proposed number of development units, to meet the aspirations and wishes of residents as regards issues (a), (h) or (l). Even discounting a dense development and reverting back to the Council’s previous (and more acceptable) plan for 200-300 units, any development is wholly inappropriate given the capacity of the current railway lines through New Cross Gate which, pre COVID-19, led to regular situations where the platforms and carriages were dangerously overcrowded, and given the additional demand which will be placed on the railway system by the Besson Street development (recently approved) and any development on the Goodwood Road site. We reiterate, no substantive redevelopment of the site should be considered before the BLE is constructed.</p>	<p>Whilst the site will accommodate open space and amenity space appropriate for a mixed-use town centre development it is not a development requirement to have a large public park. The site is within walking distance to Fordham Park.</p>	
Telegraph Hill Society	3	LNA SA 09	<p>The site considerations in the table on page 603 should include “Deficiency of Open Space” and “Sensitivity to tall towers”. We find the lack of the first of these particularly surprising given the deficiency of public space in the North Area (as outlined in Part Two Section 10 of the Plan and graphically illustrated in figures 10.2 through 10.6). We presume this must be an error as it is clearly a key consideration in achieving a healthy borough as set out in the Vision (see our comments at paragraph 27).</p>	<p>Disagree. The Local Plan is a strategic document and the Council needs to carefully consider the level of detail provided for each site allocation. These matters are covered in Part 2 of the Plan which should be read as a whole.</p>	<p>No change.</p>
	3	LNA SA 09	<p>The plans to develop Hatcham Works seem to be exaggerated on the number of units. At 912 units, it would totally contradict the idea of creating spacious green spaces. Creating so many new units in such a small space would also put a huge strain on local infrastructure, i.e. schools and welfare needed to support this huge influx of residents</p>	<p>Lewisham must plan for the growth required to meet its London Plan target of 1,667 new homes per year. Our view is that these homes are best located in areas which have good access to public transport, services and job opportunities. The former Hatcham Works site at the heart of New Cross district centre has excellent public transport accessibility and excellent access to services and jobs. The indicative capacity</p>	<p>No change.</p>

			<p>One other problem that would be created by so many units, would be the problem of extra traffic and parking, created by residents and services needs</p> <p>Height of buildings is also of concern, the area is surrounded by conservation areas (Hatcham Park and Telegraph Hill) Both of which are made up of low buildings.</p> <p>Another concern I have is the threat of opening up Harts Lane and Hatcham Park conservation area to through traffic and access Hatcham Works. This is currently quiet safe residential area that would be hugely disrupted if through traffic was allowed in.</p>	<p>within the Site allocation was drawn from the Council endorsed, New Cross Area Framework which was extensively consulted on. The density proposed is deemed appropriate for the nature and context of the site.</p>	
3	LNA SA 09	<p>Hatcham Works is simply too small to house the proposed 912 residential units. Without building skyscrapers that would not be in keeping with the area and in particular the adjacent conservation areas of Hatcham and Telegraph hill. Proximity or otherwise of the tall buildings proposed in the LLP on the land currently owned by Sainsbury's does not solve the problem that huge infrastructure in terms of schools and welfare needed to support this huge influx of residents. In an already densely populated area the LLP is planning to raise the number of residents by 912 bringing the equivalent influx of cars and service traffic for that influx into the area. There appears to be no assessment of the environmental effects of these extra residents and their needs in the LLP.</p>	<p>Lewisham must plan for the growth required to meet its London Plan target of 1,667 new homes per year. Our view is that these homes are best located in areas which have good access to public transport, services and job opportunities. The former Hatcham Works site at the heart of New Cross district centre has excellent public transport accessibility and excellent access to services and jobs. The indicative capacity within the Site allocation was drawn from the Council endorsed, New Cross Area Framework which was extensively consulted on. The density proposed is deemed appropriate for the nature and context of the site.</p>	No change.	
3	LNA SA 09	<p>There is also the issue that all the extra residents of the Former Hatcham Works would need parking space. As it stands in the present we have commuters driving into zone 2 and taking public transport into the centre of London. There is widespread opposition in the community to imposing controlled parking zones (CPZ) in the area so the extra cars and parking spaces generated by the new (Former) Hatcham Works would inevitably overcrowd the streets of Hatcham Conservation area with cars.</p>	<p>Given the excellent public transport connections and to be in conformity with London Plan and Local policies any proposal for this site would be car-free and only require the specified disabled car parking.</p>	No change.	
3	LNA SA 09	<p>I am concerned about how the LLP proposes to connect with the Hatcham Conservation Area. The LLP refers to a "positive" relationship to the Former Hatcham Works, suggesting that – 'There should be a positive relationship with the site's western edge, including the junction of Hatcham Park Road, Harts Lane and access into the site.' (15.60 Development guidelines).</p> <p>This is too vague and open to interpretation. It leaves the possibility open to a potential Developer to puncture through into the former Hatcham Works site from the Hatcham Conservation Area. This was vehemently opposed in the consultation for the SPD, which wanted traffic (buses delivery vehicles and cars re-entering the Hatcham Estate. This was also proposed by the Sainsbury's and Mount Anvil developments which were met with a huge amount of local opposition, especially with regard to the placing of the waste facilities of the flats and the supermarket opening out into the conservation area. Our area has become safer quieter and infinitely more pleasant place to live and any</p>	<p>We feel that the wording within the Site allocation, together with other policies within Section 6 Heritage are adequate to ensure development preserves and enhances the Conservation Area.</p>	No change.	

			<p>ingress of traffic to the Conservation Area of Hatcham Park would firstly go against the healthy street ethic that the LLP wishes to champion and secondly be met with huge opposition by the local community who cherish the quiet enclave created by blocking Harts Lane and Nettleton rd which was an initiative backed by councillors and Lewisham council at back in June 2003 as part of the New Deal for Communities (NDC). These through traffic prevention tools should be safeguarded in the LLP and be labelled non-negotiable in the LLP.</p>		
3	LNA SA 09	<p>A strong positive in the plan is the retention of the plan to build a bridge over the railway. This was a huge plus in the design for Hatcham Works and was even included in the Sainsbury's Mount Anvil plan although they described the bridge as an "aspiration" rather than a concrete realization in their plans. Keeping the bridge and the green 'Route 1' cycle and pedestrian route (including the pedestrian bridge) parallel to the New Cross road is an immense plus as part of the LLP and would link New cross Gate to Fordham Park. New Cross Gate chronically lacks green space to the bridge would provide a significant enhancement to the lives of New Cross Gate residents. Crucially would be transformational to the lives of the children in this area their journey to the local school of Deptford Green infinitely more safe and enjoyable. They would be walking safely away from the polluted noisy New Cross Road or the very narrow and dangerous underpass on Cold Blow Lane. The retention of the 'Route 1' bridge in the New LLP is a significant plus for the future of New Cross.</p> <p>There is also the issue that all the extra residents of the Former Hatcham Works would need parking space. As it stands in the present we have commuters driving into zone 2 and taking public transport into the centre of London. There is widespread opposition in the community to imposing controlled parking zones on the area soothe extra cars and parking spaces occupied by new (Former) Hatcham Works would be detrimental to the area.</p>	<p>Supportive comments regarding route 1 are noted. With regard to parking, given the excellent public transport connections and to be in conformity with London Plan and Local policies any proposal for this site would be car-free and only require the specified disabled car parking.</p>	No change.	
3	LNA SA 09	<p>Re: Ex Railway Depot at Hatcham site/New Cross Gate, Lewisham/planning development</p> <p>Dear Sir/Madam</p> <p>With observation of further planning development of the above site which currently accommodates Sainsbury's supermarket - A very minimal showcase of Public notices have been placed upon few posts within the area of Sainsbury's - detailing the prospect of building development works within the Sainsbury's/car park area ONCE AGAIN.</p> <p>My concern with regards to this specific planning application, is that I, amongst my residential neighbours believed Sainsbury's had withdrawn their building application, to build three ugly extremely tall, light blocking 33 storey tower blocks, and reopen closed roads etc., in</p>	<p>The Local Plan consultation was carried out in accordance with our Statement of community Involvement.</p> <p>Much of this response relates to the Sainsbury scheme which has subsequently been withdrawn.</p> <p>The indicative capacities for the Former Hatcham Works site within the Local Pan has been informed by the New Cross Gate Area Framework. This provides an indicative layout and massing for the site which is deemed appropriate by the Council.</p>	No change.	

the SE14 area. It seems to me, that since the Covid 19 Pandemic, Sainsbury's has underhandedly decided to renew and go ahead with their building application, and only place minimal public notices of the fact, and in so doing covering themselves legally, but in fact hoping that the residents who live within the Hatcham Park Conservation area are so Covid 19 exhausted, that they don't either observe the very few public notices, or have the energy to notice or even begin to repeat a fight against this building application again. Is the council able to inform me otherwise, and correct me if my suspicions are wrong? Or am I indeed correct?

If so, then this is absolutely disgusting and intolerable, it totally disregards the mental wellbeing of the residents including myself, who live here, and because Hatcham Park residents have already fought against this ugly, noisy, development from happening, believing we had conquered this horrendous most negative prospect. It would then appear, that our human rights and wellbeing is being utterly ignored and yes, disregarded as insignificant.

Hatcham Park, and in particular Hatcham Park Road, is an extremely peaceful and quiet area, it has been for approximately 20 years. However, prior to this peaceful time, Hatcham Park Road, was a noisy, dangerous and awful cut through road, which traffic selfishly used to avoid waiting in traffic queues on the A2. The houses shook, and trembled, the noise was horrendous, and frequently residents were unable to cross the road without fearing for their lives, owing to the constant traffic. It drove us all berserk. As a consequence of this, and as a neighbourhood, for our health and mental wellbeing, we petitioned and fought to get these roads (re: Hatcham Park Road, Nettleton Road, Harts Lane) CLOSED to traffic, for the very reasons explained. Is the council expecting us to go back 20 years, and tolerate the reopening of these roads, and be happy about it, because if this is the case, the council is mistaken? If I am correct in my suspicions, it would appear to me that the concept of reopening our peaceful and safe roads is being considered once again. How dare Lewisham council and property developers, disregard our fight for peace and sanity, especially regarding the fact that our neighbourhood succeeded in obtaining road closures for the benefit of our health and safety.

I would like an explanation as to why the council and Sainsburys are prepared to act, as though Hatcham Park residents rights as a neighbourhood and in accordance with our past fight to get and achieve road closures don't matter! If building development does go ahead, then council residents such as myself, should be given the opportunity to either have double glazing installed at the front of Hatcham Park Road houses, despite the heritage tag, (heritage and conservation doesn't seem to be applicable in this Sainsbury's development case), or alternatively council residents should be given the option to move somewhere more peaceful - and to where three

			<p>33 storey ugly, light blocking tower blocks won't darken our days!!</p> <p>I hope to receive a response, that is honest and helpful and shows that residents opinions, health and wellbeing is being seriously considered and looked after. And that nothing will go ahead, without our knowledge and huge concerns being taken into account???</p>		
3	LNA SA 09	<p>Re the Hatcham Works Sainsbury's site.....this is the heart of the community made up by Telegraph Hill, Hatcham conservation estate and the traditional New Cross Gate high st.</p> <p>Raising the limit of the number of units able to be built on the site from circa 200 to circa 900 is outrageous. It would lead to the creation of another 'dormitory site' like those already blighting the borough, when what is needed is mixed use for shopping and employment, more parkland, and traditional style homes that aesthetically blend with the homes on the high st and in the 2 conservation areas it adjoins</p> <p>The height limit is set already by the relative heights around the site – with 4 to 6 floors being the maximum that would fit. (The high density, 4 floor, mansion block flats on New Cross Rd would be the ideal model to replicate to suit and provide the right look and type of large accommodation units which the locality needs.)</p> <p>Until and unless the Bakerloo line comes to New Cross Gate, it would be difficult to make a case even for 200 new residential units on the site. Step one MUST be to provide all of the infrastructure (transport and otherwise) for any new development and only after that should new strain be put on the already creaking amenities we have by the building of new homes.</p> <p>Any new 'vertical city' on the site would have the effect of gutting our community by creating a ghetto – a kind of gated community in the centre of our local life and a 'no go' area for all of us already living nearby.....and would be resisted strongly by everyone I've spoken to locally. We really ask you to PROTECT our Telegraph Hill/ New Cross Gate community by setting lower development levels for the site in the Plan and restricting what can go there in future years, in order to enhance the community and borough rather than weakening the restrictions which could result in us feeling sold out in the future.</p>	<p>Lewisham must plan for the growth required to meet its London Plan target of 1,667 new homes per year. Our view is that these homes are best located in areas which have good access to public transport, services and job opportunities. The density proposed is deemed appropriate for the nature and context of the site.</p>	
Telegraph Hill Society	3	LNA SA 10	<p>Our objections to densification apply less to this site as the proposed number of units is considerably smaller, although the capacity of the site will depend in part on the development capacity adopted for the Hatcham Works site. A tower on this site would not impact visually on the Telegraph Hill Conservation Area and would impact less on the Hatcham Conservation Area than any tower on the Hatcham Works site.</p>	<p>Any proposal which may come forward with a tall building on the site will be assessed against the tall building policy within the London Plan and Local Plan as well as policies relating to Heritage.</p>	No change.
Telegraph Hill Society	3	LNA SA 10	<p>We consider, however, that this site is especially appropriate for additional retail shopping, moving that shopping from the A2 into a more pedestrian friendly area and the considerations outlined in paragraphs 247 to 253 would also apply this site. In particular, care needs to be taken that the height of any buildings does not significantly impact on the appearance of the New Cross Road and, in particular, the adjacent Victorian shopping arcade as shown in the illustration accompanying paragraph 130.</p>	<p>The indicative capacities for the site include a substantial amount of town centre floorspace.</p> <p>Any proposal which may come forward with a tall building on the site will be assessed against the tall building policy within the London Plan and Local Plan as well as policies relating to Heritage.</p>	Goodwood Road site allocation amended to minimise impact of tall buildings on New Cross Road
	3	LNA SA 12	<p>Site 12: A new covered market area, all-weather, as a high quality and aesthetically beautiful feature in the area to attract existing and new footfall.</p> <p>To assist in keeping Deptford High Street a viable shopping experience in the later 21st century, after the redevelopment of Convoys Wharf</p>	<p>Too detailed for the Local Plan. We will pass on your suggestion to our Market team.</p>	No change.

	3	LNA SA 12	<p>I have looked on the local plan website and could find no information about the proposed build out of the Albany garden with its '102 residential units' and 'main town centre use floorspace'.</p> <p>At this early stage of your thinking I would like to object in strong terms to the build out on the Albany garden because:</p> <p>a) it will block the light to every space at the back of my property</p> <p>b) it will eliminate a massively important green space, a green lung in the midst of our heavily built up urban area.</p> <p>Please, do not carry this proposal out.</p>	The Albany theatre is identified as a site allocation in the draft Local Plan. The site allocation, which includes the specific requirement to reprovide the theatre use, is intended to secure the long-term future of the Albany. Should a planning application be submitted this will be subject to statutory consultation and you will have the opportunity to share your views on the proposal.	No change.
	3	LNA SA 12	<p>I would like to object in strong terms to the build out on the Albany garden because:</p> <p>a) it will block the light to every space at the back of my property, which would have a detrimental effect to my wellbeing.</p> <p>b) it will eliminate a massively important green space, a green lung in the midst of our heavily built up urban area. Deptford is hugely polluted and we are losing green spaces at a fast rate. The garden is a key space that should be protected</p>	The Albany theatre is identified as a site allocation in the draft Local Plan. The site allocation, which includes the specific requirement to reprovide the theatre use, is intended to secure the long-term future of the Albany. Should a planning application be submitted this will be subject to statutory consultation and you will have the opportunity to share your views on the proposals.	No change.
Deptford Society	3	LNA SA 12	Page 351/611 It is not clear how the development guidelines for the allocated Albany Theatre site will enhance or improve the existing open space as stated in the green infrastructure proposals. Can a clearer requirement be added to the development guidelines for this site, given that existing green space forms part of the site allocation.	The Albany theatre is identified as a site allocation in the draft Local Plan. The site allocation, which includes the specific requirement to reprovide the theatre use, is intended to secure the long-term future of the Albany. Should a planning application be submitted this will be subject to statutory consultation and you will have the opportunity to share your views on the proposals.	No change.
Deptford Society	3	LNA SA 12	Page 611 Albany Theatre. Any development of Albany land needs to retain mature trees and safeguard the green space, whilst ensuring the continuity of the historic street market. Development must also protect the enjoyment of public realm on Douglas Way and not create a wind tunnel effect.	Noted	Albany Theatre site allocation amended to include proposals to retain or re-provide the existing green space and mature trees and protect the operational requirements of the street market.
DNA	3	LNA SA 12	<p>Site 12: A new covered market area, all weather, as a high quality and aesthetically beautiful feature in the area to attract existing and new footfall.</p> <p>To assist in keeping Deptford High Street a viable shopping experience in the later 21st century, after the redevelopment of Convoys Wharf.</p> <p>New housing redevelopment needs to be at least 60% to 80% socially rented at Council levels and secured tenancies.</p> <p>At 100% on Council owned land.</p> <p>Refer to DNA housing policies</p>	<p>Market – we will pass your suggestions on to our Market team.</p> <p>The draft Local Policy is for a strategic target of 50% this is has been tested through the SHMA and viability testing.</p>	No change.
Lewisham Cyclists	3	LNA SA 13	Land north of Reginald Road and south of Frankham Street (former Tidemill School); In addition to LNA.78, the Development Requirements need to explicitly acknowledge the Council's own manifesto commitment to providing protected cycle lanes along Deptford Church Street, adjacent to this site as part of the North South Corridors it describes. This route is	Noted	Land north of Reginald Road and south of Franham Street site allocation amended to include requirement to provide cycle lanes along Deptford Church Street.

			of strategic importance and has been identified in the Council's own Transport Strategy.		
Lewisham Cyclists	3	LNA SA 14	Sun Wharf Mixed-use Employment Location; The development requirements fail to recognise the council transport strategy to deliver Cycleway 10 (Quietway 1) which runs over Ha'penny hatch bridge as well as Cycleway 35 (Greenwich to Kent House, running along Creekside). The development requirements should include making sure any development does not result in a reduction in existing footway or carriageway space. This should be detailed in the development requirements as part of the public realm strategy and should follow London Cycle Design Standards .	Noted	Sun Wharf MEL site allocation amended to include reference to Cycleway 10 and Cycleway 35. As well as requirement added to ensure new development does not result in a reduction of the existing footway or carriageway space.
Royal Borough of Greenwich	3	LNA SA 14	Sun Wharf: This allocation should make specific reference to the potential for tall buildings to be visible from the World Heritage Site and to impact other heritage assets within Royal Greenwich. For example, the site sits behind the Grade II listed former Greenwich Town Hall and its prominent art deco tower. There is a risk that a tall building on this site could undermine the prominence of that tower when viewed from Greenwich Park and from other locations within the World Heritage Site.	Noted	Sun Wharf MEL site allocation amended to reference World Heritage Site and detrimental impact of the views of heritage assets in Greenwich.
Port of London Authority	3	LNA SA 14 LNA SA 15	Site 14: Sun Wharf Mixed-use Employment Location & Site 15: Creekside Village East, Thanet Wharf Mixed-Use Employment Location Welcome reference to the safeguarded Brewery Wharf in the site allocation for site 14. This must also be highlighted under site 15 as well. In addition within the development guidelines section, reference must be given to the need to ensure any proposed development at these sites are designed in such a way to ensure there are no conflicts of use or disturbance, in line with the Agent of Change principle, due to the proximity of the safeguarded Brewery Wharf. Welcome the reference in the allocations on the need to protect and seek to enhance green infrastructure, including the Deptford Creek Site of Importance for Nature Conservation (SINC), the intertidal terrace and the sand martin bank at Deptford Creek, and on ensuring the right to navigation is maintained.	Noted	Sun Wharf MEL and Creekside Village East site allocations amended to reference the safeguarded wharf, reducing conflicts of use and disturbance in line with the Agent of Change principle
Royal Borough of Greenwich	3	LNA SA 15	Creekside Village East, Thanet Wharf: The development of the site immediately to the northeast and on the opposite side of Deptford Creek with tall buildings present opportunities for this site to include tall elements that contribute to the creation of a coherent skyline. However, this requires additional guidance, including clarity regarding the site's role in the overall delivery of the skyline. The allocation should clarify that heights on this site should step down from the adjacent tall buildings to respond to the predominantly mid-rise character of the area to the south and west, and to ensure that it does not undermine the setting of the Trinity Laban Centre which, while not a designated heritage asset, has acknowledged architectural value. Consideration should also be given to the impact of tall buildings on this site on views from the World Heritage Site, and to the impact of the cumulative	Noted. The location of specific tall buildings on-site and the impact on the historic parts of the town centre will be considered as part of the Development Management process.	Creekside Village East MEL site allocation amended to reference impacts on the setting and views of grade I listed St Paul's Church, Deptford and the nearby Deptford Creek Conservation Area, Deptford High Street and St Paul's Church Conservation Area, the Maritime Greenwich World Heritage Site and the Trinity Laban Centre

			development of the area, including the Creekside Village development.		
Lewisham Cyclists	3	LNA SA 16	Lower Creekside Locally Significant Industrial Site; Lewisham Cyclists believe public realm improvements at this location should link in to providing better interconnectivity with Deptford high street, enabling active travel by reducing vehicular dominance and providing the mentioned green corridor. This should be stated in the Development Guidelines.	Noted	Lower Creekside LSIS site allocation amended to include reference to public realm improvements
Deptford Society	3	LNA SA 16	Page 622 Lower Creekside Locally Significant Industrial Site. Land along Theatre Arm at 2 Creekside provides access for Deptford's long-term boat-dwelling community. Any development on this land should seek to protect and sustain this community as one of the important characteristics of the Creekside conservation area.	Noted	Lower Creekside LSIS site allocation amended to reference the need to protect and sustain Lewisham's boat dwelling community.
	3	LNA SA 17	I can see that there is a public consultation relating to the Besson Street Site, which to me is surprising because as far as I was aware a proposal was given planning permission for this site despite resident objections. My full objection is attached, but generally we feel that the proposed development is simply too big especially on the New Cross Road side, it specifically takes virtually 100% of the light from the rear of my house, it doesn't serve the community (the job estimates are wildly optimistic, the doctors surgery is relocating (no new jobs) and the pharmacy is not required (there are 3-4 pharmacies within walking distance and lloyds has just closed down showing that there is not a hugely viable business), the affordable rent is not actually affordable (I work for a bank and to afford these flats you need to be earning around £40k a year)... the list goes on. So all in all I think we can do better. But as I said I thought the site has planning permission so don't really understand the remit of the consultation.	The Local Plan is required to identify Lewisham's pipeline of development sites including those that have permission but have yet to be developed. Besson Street has indeed been granted permission and the site allocation reflects the approved permission.	No change.
Historic England	3	LNA SA 09 LNA SA 13 LNA SA 14 LNA SA 15 LNA SA 16	There are a number of site allocations that are located either in or adjacent to conservation areas, or that may affect the setting of listed buildings. As things stand, it does not appear that there has been any analysis of how the allocations would affect the significance of the relevant heritage assets. Indications of maximum building heights, derived from 3D modelling, within the design guidelines for these allocations would help provide clarity as to how to avoid harm to heritage significance. Indeed, the recently adopted London Plan policy D9 B(2) specifies that appropriate building heights should be identified in development plans. Furthermore, specifying such heights would also satisfy the requirements of para 16 of the NPPF that local plan policies should be unambiguous. Historic England has published advice on this issue, which can be found here: The Historic Environment and Site Allocations in Local Plans (historicengland.org.uk). We consider that allocations 9, 13, 14, 15 and 16 in the North Area should be revisited on this basis.	Noted. Following the Regulation 18 stage public consultation, the Council has undertaken additional assessments of North Area site allocations 9,13,14,15 and 16 using the Historic England guidance. These assessments will be published as part of the evidence base and have been used to inform the Regulation 19 document.	Relevant Local Plan site allocations amended to reflect the additional heritage assessments carried out.

3	LNA Site Allocations	<p>I would like to draw your attention to a site for possible development, in case of future changes of use to it. It runs along next to the westernmost track into New Cross Gate, from near Surrey Canal Road down to the Cold Blow Lane arches. I have attached here a location plan with the site outlined.</p> <p>You have included this site within a 'locally significant industrial site' (p6 in 'North Jan 2021 LEWISHAM LOCAL PLAN_accessible.pdf'), but it does not appear within any of the 'site allocations' for which you have outline proposals.</p> <p>At the moment it is occupied by a builders' merchant and a skip hire firm.</p> <p>If these firms move away, this site would be an excellent place for some local amenities: shops, cafe, a small supermarket branch, a public garden/square. There are thousands of people on these estates, and no cafe or corner shop that is really handy. This site might also be good for small-scale business and studio spaces, as well retail and leisure.</p> <p>It is the other side of the railway lines to your site allocation #'6 Strategic Industrial Land (SIL) at Surrey Canal Road and Trundleys Road', so it faces a different population of residents, and need no longer be industrial. The area immediately around it has already changed: it is now a low-rise residential area: the area east of the railway is still industrial, but the area to the west is not. Adding in some local amenities there would make a big difference; not doing so would be missing an opportunity to improve the area a great deal.</p> <p>In figure 5.1 in Part 2 of your proposals, you have designated this site as an 'opportunity area' for tall buildings. It should not be. You have also designated it as 'low-sensitivity' on figure 5.2. It is not.</p> <p>Please don't allow any tall or mid-rise/taller buildings there, That would not be appropriate. This site is right next to all the low-rise residential estates behind Mercury Way and John Williams Close, and just outside the Hatcham conservation area. The view to the east is pretty industrial - but it's still a good open view, in a low-rise area. It would be possible to put in two-storey buildings without going over the height of the railway embankment; three if you dig down half a storey.</p> <p>Please don't just let it fill up with more flats either, with no amenities.</p> <p>The 'arches' building there currently might be suitable for a refurb, in a similar way to the brick-industrial buildings at Deptford station.</p>	<p>We are not adding site allocations to the plan at this stage. We will however review the site as part of any Local Plan review in due course.</p>	<p>No change.</p>
---	----------------------	--	--	-------------------

			<p>The Millwall crowd walks past this site along Mercury Way, so cafes or a pub with a garden would thrive, There would still have to be a place to park for the hamburger van on match days.</p> <p>I hope these are possibilities for if and only if the site comes up for change of ownership/occupation.</p>		
3	LSA	<p>The DLLP discusses the importance of the characterisation of the South Area and refers to The Lewisham Characterisation Study (2019) as having been prepared to support the Local Plan. It identifies areas of the Borough where existing character may be reinforced, re-examined or re-imagined, as set out in Figure 3.2. The study provides an indication of opportunities where growth could be accommodated, including the London Plan Opportunity Areas and major centres such as the Bell Green / Lower Sydenham area.</p> <p>Regrettably, significant and important statements and observations in the DLLP are in error and do not accord with events of recent years.</p> <p>As an example, Bellingham Ward assemblies have not been a forum at which the DLLP has been presented or discussed. The DLLP asserts that those forums have been used for that purpose. I am a frequent attendee at these assemblies, I recall no such Assembly where consultation on the DLLP took place. Furthermore, I can find no Agenda or Record or Minutes of a Bellingham Assembly on the Council web-site where the DLLP was formally proposed, discussed or debated.</p> <p>My recall is this. There was a truncated and noticeably short presentation by the Sydenham Society of their proposed Master Plan produced in conjunction with Discourse Architecture. Neither the 3 JGD April 2021</p> <p>Sydenham Society nor our elected Councillors who were present, discussed the presentation in the context of it forming an inclusive or contributory part of the DLLP.</p> <p>The Sydenham Society at this presentation at the Assembly failed to stimulate any interest and gained no contributory response or input from within the Ward for their proposals. A principal reason for this failure was that the Society for the first time was engaging with Ward residents. A signal failure in the processes that Sydenham Society had deployed to develop its proposals and present a set of preliminary plans with objectives “locked-in” as a <i>fait accompli</i> without taking the essential step of consulting with any substantial number of Ward residents at any stage in their process, early or otherwise.</p> <p>It cannot be viewed as a satisfactory outcome that, whatever merits the Sydenham Society Master Plan may or may not have encompassed, the entire proposal lacked integrity. An absence brought about principally as a result of the Society’s decision to engage in consultation only</p>	<p>This response seems to be discussing several different studies.</p> <p>The draft Local Plan has been informed by the Characterisation Study 2019. This was prepared by the Council in collaboration and consultation with Neighbourhood Forums, Amenity and Heritage Societies and other community groups on the planning database. It was then subject to public consultation in accordance with our Statement of Community Involvement and open to all to comment.</p> <p>The masterplan for Bell Green and Lower Sydenham prepared by Discourse Architecture for the Sydenham Society is not a council masterplan.</p> <p>The visioning work prepared by the council for Lower Sydenham and Bell Green was paused and has not been endorsed by the Council.</p> <p>Whilst a detailed masterplan is required for the area over the last 2 years the Council has been focused on our COVID response and recovery and has not had the resources or capacity to commit to a detailed masterplan exercise which would have to involve significant technical studies as well as significant public consultation.</p> <p>The Council has recently received a Neighbourhood Area and Forum application for the area. The application is currently open for public consultation.</p> <p>The Local Plan consultation has been carried out in accordance with our Statement of Community Involvement.</p>	No change.	

with a closed group, in the main Sydenham Society members to the exclusion of those who should have enjoyed the greater entitlement to be consulted, namely Bellingham residents.

This has left an air of puzzlement within the ward about an entry in the minutes for the last Sustainable Development Select Committee on 14 January 2021, where, when addressing the Bell Green and Lower Sydenham Vision Study, the minute at 5.3 this appears, “ were also noted....The importance of the work carried out by the Sydenham Society“.

Furthermore, as the LPA has asserted in its presentations in webinar format, the formulation of a Master Plan for the Bell Green area, developed through consultations with residents and businesses, with detailed review of characteristics produced in other studies, combined with the needs of having a clear vision for the Bellingham area over the next 20 years, is both a fundamental necessity and is vitally important.

Ward residents welcome and look forward to being engaged in such a process, which until now, such opportunity has not been presented.

Appropriate public consultation providing opportunity for all parts of the community, residents and businesses, to come together to shape proposals for development and growth of the area must be initiated in accordance with Lewisham policy on the conduct of public consultations .

An extract from the LPA’s policy has this statement about the conduct of public consultation:

The statement also aims to ensure that local communities know when, how and for what reason a consultation is to happen.

The key objectives for consultation on planning matters are:

- *Consultation should be fit for purpose, meaning that the nature of the matter being considered will influence the type of consultation undertaken. This will be influenced by the resources available and the ability of the community to participate and respond.*

4 JGD April 2021

- *Consultation should commence early in the process to enable the community to influence decisions and to seek consensus on essential issues (wherever possible).*

- *Consultation should encourage wide community involvement and participation should be relevant to people’s experiences so as to get the community interested and involved.*

- *Consultation should be continuous, with opportunities for ongoing involvement.*

- *Consultation should be undertaken with clear processes and well understood ground rules. Involvement should also extend beyond those who are familiar with the system, and should extend to hard-to-reach groups.*

			<p>Scrutiny of these points provide clear indicators that none of these key objectives have been delivered in the consultation processes referred to in the DLLP. Nor were the objectives met during the Sydenham Society's endeavours to produce a Master Plan for Bell Green. During the preparatory phase for this submission a further Master Plan, possibly commissioned by the LPA, titled Bell Green and Lower Sydenham Vision Study came to light. It emerged that this study had been presented for consideration to the Sustainable Develop Select Committee on 14 January 2021 and that Committee resolved that the report be noted.</p> <p>Once more there is no evidence present in the minutes or in the two volumes of the report <i>that local communities know when, how and for what reason a consultation</i> or in this case a Study was taking place.</p> <p>This collective non-conformity with the LPA's own policy is of significant concern and the Council is invited to make a clear commitment to correct this position and deliver its principled key objectives in how future consultations are conducted with Bellingham Ward residents.</p> <p>It is desirable to see a shift in emphasis, address content of the DLLP and seek to have some elements of the plan to be more precisely articulated.</p> <p>It should be noted that because of the afore-mentioned errors, it is not possible to make responses that are specifically cross-referenced to the contents of Section 3.</p> <p>There are, however, a number of issues included in this response which are considered key and the LPA is invited to adopt in the DLLP after errors have been corrected and the draft has been reviewed and corrected.</p> <p>It is with a significant quantum of regret that the conclusion is reached that the contents of the Section 3 portions of the report do not reach a level of or accuracy, adequacy or integrity that deems those portions to achieve a level of clarity that is essential to this process.</p> <p>The Council is invited to redraft the sections affected by these errors and re-engage in a fresh consultation stage for this Area with a new timetable, suitably revised.</p>		
	3	LSA	<p>We are very concerned about many of the items in the Vision documents.</p> <p>It would seem that there is a major drive to greatly increase the number of houses/flats in the borough many at the expense of existing retail outlets e.g. Bell Green, Bromley Road Retail Park. Our feedback is don't do this.</p> <p>We suffer badly from low water pressure in our area and having consulted with Thames Water have been informed that a combination of too many properties being fed by an aged infrastructure means that this is very hard to fix. I</p>	<p>Noted. The Local Plan sets out a strategy to deliver Good Growth in line with the London Plan. It must demonstrate how the London Plan housing target for Lewisham of 1,667 per annum will be met. The London Plan provides a clear direction that out-of-centre retail parks should be considered for redevelopment to make a more optimal use of land.</p> <p>Following the Regulation 18 consultation the Council has commissioned a Retail Impact Assessment and Town Centre Trends Study to inform the appropriate scope for a new centre at Bell Green. The plan</p>	<p>Local Plan amended to clarify the position/scope of the proposed new town centre at Bell Green in the town centre hierarchy.</p> <p>Local Plan amended to include a new standalone policy on water supply and wastewater.</p>

			<p>have found nowhere in the vision documents stating how the water/sewage systems will be upgraded to accommodate this major increase in housing.</p> <p>The vision documents have many very positive aspects but seem very aspirational with no identified plan how it will ever be realised. Please can you supply a high level plan including timescales and costings for the vision in our area?</p>	<p>proposals provide for a new mixed-use redevelopment of the existing retail park(s) which would provide for a rationalisation of retail space but still enable a significant amount of commercial/town centre floorspace to be retained/re-purposed.</p> <p>The draft Local Plan includes policies on water management however it is recognised that further details on this could be included in the plan. The Council has consulted Thames Water during the preparation of the Local Plan and on the Infrastructure Delivery Plan to ensure this type of infrastructure is appropriately planned for.</p> <p>The Local Plan covers a 20-year period. Where possible the plan sets out indicative timeframes for the delivery of key development sites (i.e. site allocations). The Infrastructure Delivery Plan which sits alongside the Local Plan includes details on the indicative timeframes/costings for the delivery of infrastructure and projects which will support the plan's delivery.</p>	
3	LSA	<p>Looking at the South Area, I wholly support the general approach and understanding that we are dealing with what is now one of the most deprived areas in the country, where the priorities are for social, economic and environmental improvements, and improved commercial, leisure and community developments, together with vital improvement in transport and opportunities for training and employment. You may notice that I do not mention Housing in this context, not that it is unimportant, particularly in the need to strictly manage the growth in largely inappropriate and unsatisfactory Houses in Multiple Occupation (HMOs). However the reality is that the Downham Estate is already a vast area of primarily single story housing, built as one of the London Garden Suburbs after the 1st World War to house families from the slums of the East End and Deptford. What is missing in the area is the broad Infrastructure to encourage the area to thrive and emerge from its stigmatised reputation. The most it can absorb in terms of new housing is very 'small build' in character maintaining low height and the established character of the estate.</p> <p>What needs to be remembered is that Downham has actually LOST a large proportion of the infrastructure it used to have, and has often suffered downgrading within corporate replacement. It used to have a huge Cinema, 'The Splendid' on the A 21, a Pleasure Pond with boats and a miniature railway at Peter Pans Pond, the Downham Tavern, one of the largest public houses in the country, a Dance Hall next door, large enough for theatre and music events (both were on the present site of the Co-op, carpark, and the very small, dark and somewhat unappealing present Downham Tavern). There was a large library, a swimming pool, four banks in the Downham Centre, a quality Department Store I am told, plus Council</p>	<p>Noted. The Council has prepared an Infrastructure Delivery Plan (IDP) alongside the Local Plan. This sets out the different types of infrastructure, including social infrastructure/community facilities, required to support the levels of growth planned. The IDP has been prepared with input from officers across the Council's service areas, as well as external stakeholders and infrastructure providers.</p> <p>Broadly, the draft Local Plan acknowledges the issues of deprivation in the South Area and the area-based policies set out approaches to address this, including by promoting growth and new development in selected parts of the South Area as a means to generate new investment in this part of the Borough, including for new or enhanced community facilities.</p> <p>Separately, there will be an opportunity to fund community based infrastructure projects through the Neighbourhood Community Infrastructure Levy (NCIL), for which the Council has set in place governance arrangements.</p>	No change.	

			<p>Estate staff who looked after public green areas and corners and even helped residents to cut their hedges. To top it off there was a tram running through Downham Way to take early morning workers to the industrial centres along the Thames. A film was made where residents, many of them families who had never had a separate bathroom or hot water or their own toilet, a garden and several bedrooms, called Downham a 'Paradise'.</p> <p>As such I would like to see and hear plans and serious proposals for development of Infrastructure, which I imagine somehow connects with the phrase Public Realm? In essence Downham has lost a range of avenues for leisure, and is also limited by poor public transport, and there seems to be little corporate aim to deal with these issues holistically, to perhaps for instance provide for small live/work spaces for local entrepreneurs, and work towards providing quality sports facilities, lite tennis and football, within the Beckenham Place Park development. Although there is a more interesting and varied retail and business provision, than some have believed within the A21 Centre, including a music centre, a theatrical school, a flower shop, IT facilities, the Undertakers, Pet Shop, as well as food retailers and cafes, (which depend on space for local vehicle deliveries), many local people still primarily depend on their cars to get to larger and cheaper shopping facilities. Measures to mitigate pollution are also welcomed, but improved public transport is part of the corollary of reduction in car journeys, and improving breadth of facility within walking area.</p>		
3	LSA	<p>It surprises me to hear that the Downham Centre area of the A21 can be made into a 'Healthy Street' as it is a polluting, main and busy arterial road to the South, but I am sure local residents would be more than happy if some of the wide pavements can become subject to attractive street-scaping, planting trees, fitting benches and street furniture, making the area greener and more pleasant to utilise as their neighbourhood. Grants for Improvements to Shop Fronts, would also definitely help, but there needs to be a dedicated budget for improving this area which does not just depend on inappropriate developer contributions. Attractive street-scaping would also improve the environment in the secondary area of the Downham Leisure Centre and Co-op on Moorside, leading into Downham Way.</p>	<p>Noted. The A21 is identified in the Local Plan as a key corridor around which growth and new development will be encouraged. New development can help to deliver and fund improvements to the public realm in accordance with the Healthy Streets principles of the London Plan.</p> <p>Grant funding for shop front improvements is outside the scope of the Local Plan.</p>	No change.	
3	LSA	<p>Then I must come to the 'Elephant in the Room', the fact that this Planning exercise left the question of the Wesley Halls, Downham Community Centre, on Shroffold Road, off the Local Plan Consultation. As a Downham Councillor, I am concerned that this has prevented local residents from making public comment within this Consultation, on the reality that the Council intends to clear the site and allow Phoenix Housing to build flats or homes, with potentially very limited Community Provision. This has apparently been on the cards for some time but only very recently confirmed by the Cabinet Member for Housing and the</p>	<p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc) that is required to accommodate the level of growth anticipated through the Local Plan.</p> <p>We work with the relevant infrastructure providers to prepare the IDP but are reliant on these departments to provide us with all information required. If this issues are not captured in the IDP then please consult</p>	No change	

			<p>Lewisham Mayor. I add to this the observation that an area behind Wesley Halls has actually been derelict for many years and could have had a 'small build' provision constructed on it a long time ago. It is my opinion that Downham is an area that is calling out for and to maintain leisure, community and other Infrastructure, not more infill homes, with no extra provision for daily or evening provision, for the very young, the elderly, for training or employment. Planning has to accept that the Wesley Halls facility has provided for 40 years for inexpensive community provision, for Dance, for Martial Arts, for Choirs, Day Provision for Adults with Special Needs, Adult Education, Pre-school play groups, Community lunches, wedding receptions, birthday parties, Faith Services, outdoor community events, and a performing stage within one of the three large halls. The groups providing all of these activities are quite understandably very anxious about plans which would deprive the area of services they are familiar with and enjoy. The Halls will be reopening when the difficulties of the Pandemic ease with Covid-safe arrangements, and have a short respite to potential closure, but the current position is bound to lead to considerable and justified local controversy.</p>	<p>the individual providers. In this case the community's team.</p> <p>Nevertheless, we have strong policies within the Local Plan to protect community infrastructure – see Policy CI1 Safeguarding and securing community infrastructure</p>	
3	LSA	<p>You may say that my contribution is not looking at the actual sites mentioned for Downham. My comments are as follows. Most of the sites identified are privately owned and within the Local Plan, there is no indication which businesses would be prepared to come together with the Council for alternative development, and what their position is. Housing development on the Homebase/ Argos Centre could give scope for building homes, but would also remove the one large local hardware centre. Should it not revert to a greener aim of recovering the area of the Peter Pan Pond as a leisure garden and promote river naturalisation, if we are looking at environmental mitigation of the air quality effects of the A21? I think that any attempt to remove MacDonalds could be a cause for a community youth 'riot', and I also have doubts about who would be willing to live in a flat above MacDonalds. The idea of a building 'at height' by Sandpit Road, is completely inappropriate in the Downham Estate, unless it is no more than 4/5 floors, something like the development at the bottom of Whitefoot Lane. Regarding the Co-op on Moorside behind the pub, I and local residents would like to retain this as one of the few quality supermarkets in the area, and of course the Public House, Downham Tavern has to be retained or renewed. Another important area is to improve the 'unadopted' walkway on Old Bromley Road, which presents an ugly and unkempt route to the East side entrance of Beckenham Place Park. This needs to link up clearly with the exit to the Woodland Walk on Oakridge Road as part of a local Downham green corridor.</p>	<p>Noted. The majority of site allocations included in the draft Local Plan are in private ownership. The Council has engaged with and formally consulted landowners through the preparation of the local plan to identify whether the proposals and site allocations are deliverable. Feedback from landowners on the Regulation 18 consultation will be considered as work on the plan progresses.</p> <p>The Local Plan recognises and seeks to enhance the amenity/ecological value of the Peter Pan Pond. This is reflected the relevant site allocation.</p> <p>The Local Plan place principle Policy LSA1 sets out the aspirations and requirements for improving access to Beckenham Place Park. However it will be amended in line with suggestions.</p>	<p>Local Plan amended to identify improved access to Beckenham Place Park at east of Park, as suggested.</p>	
3	LSA	<p>What are local residents worried about, Flytipping and litter is a big one, currently a focus of Councillor and Environmental Group response, poor Transport is another one which needs liaison with TfL and Aviva locally. Unemployment and Poverty, with many families</p>	<p>Noted. The enforcement of flytipping and other nuisances, such as anti-social behaviour, are outside the scope of the Local Plan. However the plan policies seek to ensure developments are designed to protect and enhance local amenity.</p>	<p>No change.</p>	

			<p>still dependent on the Mutual Aid Downham Community Supermarket and Voluntary group support. This is the source of much of our casework, and issues like housing management and neighbour problems. The recovery of the area is a huge ask and the policies to make a difference are not always clear, but whatever Planning can contribute to a better, a greener and more attractive, a less deprived and more prosperous Downham, is welcomed.</p>	<p>The Local Plan broadly seeks to facilitate the delivery of new and improved public transport, and the Council has been liaising with the Mayor of London / Transport for London during the preparation of the Local Plan.</p> <p>The Local Plan identifies the South Area as a Strategic Area for Regeneration. It seeks to coordinate investment and supports targeted responses by a wide range of stakeholders to address deprivation and the social, economic and environmental barriers to opportunities experienced by communities in this area.</p>	
Downham Dividend Society	3	LSA	<p>5. The participation of the local community in prioritising the challenges Downham faces and developing solutions. Downham has been in poverty for 100 years, consultation has failed to shift the poverty and inequality. We want to recognise and strengthen the local expertise of people who live in Downham. This means local people will be trained and then paid as researchers in mapping community needs. Lewisham Pathways and Downham Dividend Society (CLT) have already developed pilot projects which are ready to be implemented.</p> <p>6. Rewarding volunteering and the building of the social capital of Downham. The local Lewisham card is not used widely enough in Downham it provides an excellent infrastructure to reward the voluntary activity we wish to incentivise. In addition Downham RSL's could be encouraged to adopt the best practices of other RSL's where tenants get rent holidays or even a small slice of ownership for long term voluntary contribution to the social capital of Downham. (The Downham Dividend).</p> <p>Similarly if the local people are seen as assets increasing access to services through expansion of Local Lewisham card.</p>	<p>Noted. The Local Plan is being prepared in accordance with the Council's adopted Statement of Community Involvement.</p> <p>The Local Plan identifies the South Area, which includes Downham, as a Strategic Area for Regeneration. It seeks to coordinate investment and supports targeted responses by a wide range of stakeholders to address deprivation and the social, economic and environmental barriers to opportunities experienced by communities in this area.</p> <p>The use of the Lewisham Local Card is outside the scope of the Local Plan.</p>	No change.
Downham Dividend Society	3	LSA	<p>7. Local employment and business strategy. We are seeking an employment strategy that works for Downham i.e. it must set specific targets for local to Downham. E.g. Phoenix RSL builds housing in Downham but their definition of local is London wide. To date to the best of my knowledge they have failed to employ a single person from their own building training programmes on their housing schemes. We want to set a benchmark target e.g. of 20% Downham based employment (with higher target for Lewisham residents). This will expose all the barriers that hinder local people getting the work in Downham. Then we will devise tailor made solutions. The target for local employment should be increased year on year.</p> <p>8. The Council recently let a contract to build a fence around the White Foot lane sports field. Once again Lewisham failed to contract with any Lewisham based business, let alone Downham based. The firm came from Sidcup. The Council has significant spending power, as</p>	<p>Noted. The evidence base studies indicate that Lewisham has one of London's smallest local economies. The Local Plan therefore sets out a strategy to support economic development and grow the local business base, along with providing more job opportunities for local residents and communities. Further details are included Part 2 on Economy and Culture.</p> <p>The Local Plan cannot prescribe that jobs/employment opportunities within Lewisham must be reserved for local residents. However, the draft local plan does seek to ensure that new major developments make provision for job and employment training opportunities, particularly during the construction phase, which may be secured by way of planning conditions or legal agreements.</p>	No change.

			recognised in your community wealth building policy, we want it to work for Downham.	Contract tendering is outside the scope of the Local Plan.	
Downham Dividend Society	3	LSA	9. Downham Love - Valuing and Celebrating the Diverse communities of Downham. This includes the white working class communities of Downham, members of whom feel their history and culture has not been valued. Downham was built by working class people. There was a very strong community spirit in the 60's and 70's. However it wasn't welcoming to us newcomers. We need to undercut those who will seek to create divisions within our communities by honouring our past histories and creating a shared vision of the future we want for our children.	Noted. The Local Plan recognises Lewisham's diversity. It supports inclusive and mixed communities which is reflected in the plan's strategic objectives.	No change.
Downham Dividend Society	3	LSA	10. Health, Sport and Well being - we aim to build a long term alliance with the health sector to meet the physical, emotional and spiritual needs of the community. The Downham Nutrition Partnership, Downham and Catford Health Through Sport Alliance, Downham Forest School alliance are all examples of partnership working with Downham based anchor organisations.	Noted. The Local Plan broadly supports and seeks to improve the health and well-being of the population. This is set out in the plan's strategic objectives and covered in a number of policy topic areas. The Council welcomes, and where possible will support, partnership working by local community organisations.	No change.
Downham Dividend Society	3	LSA	11 A sustainable strategy for the stewardship of the outstanding natural assets of the area. There has been gross underinvestment in the assets that were bequeathed to the people of Downham. Examples of Coin Street https://coinstreet.org/ and Westway Trust https://www.westway.org/ and TenemBee here in Downham demonstrates the additional level of resources that can be secured to contribute to the community wealth building agenda when communities participate in the regeneration of the areas they call home. 12. We need to get the Council to adopt an asset based approach to both the regeneration of its green spaces and to the people of Downham Such an approach would use the appreciation in the value of the land to fund services and improvements in the green assets of the area. With so much open space Downham could become a model sustainable village as all new housing could be heated by ground source heat pumps and other sustainable sources. This would provide resources for the upkeep of the green spaces as energy could be sold back to the grid.	Noted. The Local Plan includes a refreshed suite of policies on green infrastructure, which provide a basis for their continued protection and enhancement. Development contributions, whether through CIL or S106, can be used to support enhancements to local green and open spaces. The Council has prepared a Parks and Open Spaces strategy to set priorities in this respect. Part 2 of the Local Plan on Sustainable Design and Infrastructure promotes a transition to more sustainable energy sources. It supports the development of decentralised energy network across the Borough. However, the Council's latest Energy Masterplan indicates that there is more limited scope for DE network development in the Downham area compared to other parts of the Borough.	No change.
Downham Dividend Society	3	LSA	13. Recent impacts we want to prevent: <ul style="list-style-type: none"> The outstandingly successful £6m regen of Beckenham Place Park all took place on the 'posh side' of the Park with the 'free' swimming costing £5.50 an hour. Such pricing excludes most Downham residents. Affordable access could be provided through the Lewisham Local card to those willing to volunteer e.g. at the local social supermarket so for every 50 paying we have 10 local Lewisham card but it used to build the social capital of Downham Also the Eastern extension plan for the park has 10 objectives which don't even mention building links with the Downham community. It could be in Hyde Park! 	Noted. The specific arrangements around the management and pricing leisure facilities, including parks and open spaces, are generally outside the scope of the Local Plan. However the draft plan does make clear that where new dedicated open and play space provision is included as part of a housing scheme, this should be designed to be inclusive to all and made free to use. The Local Plan has been informed by an Integrated Impact Assessment which includes an Equalities Impacts Assessment. The Council considers that it is meeting its obligations under the Equalities Act through this process.	No change.

			<ul style="list-style-type: none"> Lewisham they have brought in a non- Downham based black organisation to provide football on the Whitefoot Lane sports field which charges £30 / month for football or £5 for 45mins for under 8's per child which excludes most of Downham. Ten Em Bee a well established black organisation rooted in Downham cross subsidises its provision through the use of its land and charges £20/ month including kit. Similarly a New Cross based organisation was allocated the only 'community plot in the Oldstead allotments and brought in an outside black organisation to 'teach Downham black people how to grow food' We have 3 black-led organisations in Downham already doing this work. It is counterproductive and disrespectful of our struggles for officers based in Catford to carry on such practices. <p>Key reports:</p> <p>Race and Health Inequalities: http://www.instituteofhealthequity.org/about-our-work/latest-updates-from-the-institute/build-back-fairer</p> <p>The local plan needs to be aligned with community wealth building approach: https://www.cumberlandlodge.ac.uk/read-watch-listen/resilient-communities-cumberland-lodge-report-july-2020 which has been adopted by Lewisham Council.</p>		
Lewisham Cyclists	3	LSA Figure 17.2	Figure 17.2, the map shown has a number of errors, including missing alignment for the Ringway corridor. This should be amended.	The plan has been revised to include a figure that incooperates the strategic green links and cycle infrastructure.	'Lewisham Links' maps added to each sub-area.
Sydenham Society	3	LSA	17 LEWISHAM'S SOUTH AREA (p673) The Sydenham Society supports the following comments made by Discourse Architecture in their recent submission, as reproduced here.	Noted. Responses to additional representations set out elsewhere in this Consultation Statement.	No change.
Sydenham Society	3	LSA LSA SA 01, LSA SA 02 LSA SA 03 LSA SA 04 LSA SA 05	Lewisham's South Area PART 3 – Site Allocations (p699) <i>Comments on Sites 1, 2, 3, 4 & 5 are given together:</i> 1 Former Bell Green Gas Holders 2 Bell Green Retail Park 3 Sainsbury's Bell Green 4 Stanton Square Locally Significant Industrial Site 5 Sydenham Green Group Practice Comment We strongly agree that proposals for the above sites should be made within the context of a Council-led master plan informed by the framework of proposals initiated by Discourse Architecture and the Sydenham Society. Our own community consultation at public meetings organised by the Sydenham Society (Railway Tavern 06.03.19 & Livesey Memorial Hall 12.09.19) identified a number of key areas of concern to local people that are not adequately addressed in the draft Local Plan:	Support for master-plan led approach noted. The Council acknowledges the strong local interest in a masterplan for the area and work undertaken by the community to support this. The Council will continue to take a lead role on the preparation of a masterplan to support the delivery of the Local Plan, working with and consulting a range of stakeholders including the local community and landowners. Part 4 of the Local Plan deals with delivery and monitoring. Policy DM 3 (Masterplans and comprehensive development) and provides the strategic approach for phasing and delivery of large sites. The Council will continue to work with and lobby Transport for London to improve bus services	Bell Green Retail Park and Sainsburys Bell Green Site allocations amended to reference options for the provision of a new railway station

		<ul style="list-style-type: none"> • The need for immediate action to improve the services and amenity in the area. There is frustration that proposals planned for the very long term may never happen and an appetite for modestly scaled interventions in the short and medium term, for example, to improve pedestrian crossings, and reduce the dominance of roads and associated air pollution. Proposals for Bell Green should recognise and facilitate the probability of incremental development as sites become available at different times. • Poor bus connectivity, particularly east-west along Southend Lane is a major complaint. We therefore argue that provision of a bus station with potential future inter-modal connections to the station for rail or Bakerloo Line services should form an integral component of the site redevelopment. • Redevelopment should not result in the loss of the hub of conveniently located retail units. It should be made clear that intensification and mixed-use redevelopment need not involve the loss of retail, but will allow the introduction of additional uses to the site <p>We believe that the Local Plan brief for new development at Bell Green can be successfully achieved with a layout based on established urban precedents for street-based architecture. The urban model of towers and slabs with poorly characterised spaces between, that has been adopted at Deptford and Lewisham town centres, should be replaced by a more regulated approach that is focussed on creating a positive public realm and spaces between buildings.</p> <p>The enhancement of the Waterlink Way should be bolder and incorporate a new east-west branch connecting to Perry Hill.</p> <p>Para 17.30</p> <ul style="list-style-type: none"> • <i>Development must not result in a net loss of industrial capacity, or compromise the functional integrity of the employment location, in line with Policy EC 5 (Locally Significant Industrial Sites).</i> <p>We support the retention of employment uses at Bell Green, but question whether the Stanton Square Locally Significant Industrial Site is an appropriate location for industrial activities, particularly the current low-intensity uses, which include a personal storage warehouse and a scaffold yard. We suggest that these activities will be a poor use of a site in close proximity to dense mixed uses and well-served by public transport. Instead, the employment emphasis at Bell Green could be related to retail, commercial, health, education, and hotel uses,</p>	<p>throughout the Borough, and particularly where these are needed to support levels of growth planned.</p> <p>The Local Plan proposals for the redevelopment of the Bell Green are likely to result in a loss of an element of existing retail floorspace. This approach is supported by the latest Retail Impact Assessment and Town Centre Trends Study, which indicates a diminishing need for retail floorspace over the long term. However, the local plan is proposing a mixed-use redevelopment a new centre within Bell Green which will provide for retail as well as a wider mix of main town centre uses.</p> <p>The designation and safeguarding of Stanton Square as an LSIS is supported by the Council’s Employment Land Study. The local plan seeks to enable the redevelopment of this site for a wider range of uses whilst ensuring no net loss of industrial capacity. This will complement the proposals for regeneration on other sites in this area, led by the masterplan.</p> <p>The Local Plan supports a transition to carbon neutrality. As part of this, the delivery of a decentralised energy network is identified in the South Area key spatial objectives. Its feasibility is demonstrated by the Council’s latest Energy Masterplan. The Part 2 policies on Sustainable Design and Energy support this approach.</p> <p>Bell Green Retail Park and Sainsbury’s Bell Green site allocations already include a requirement for improved east-west links from/to Waterlink Way.</p>	
--	--	--	--	--

			<p>combined with smaller-scale residential related uses, recognising the emerging prevalence of live-work arrangements. An appropriate response to this economic trend would be to design residential units adapted to facilitate the growth in home working, whether remote office working or smaller home-based businesses. These could range from provision of rooms or spaces within residential units that could be used as home offices, to residential units with street access to integral retail or workshop accommodation</p> <p>Finally, we would argue that the aspiration to build a sustainable future should be much bolder, making Bell Green a zero-carbon development.</p>		
Discourse Architecture	3	LSA Para 17.10	<p>The preparation of a Supplementary Planning Document and/or Masterplan by the Council is supported, provided that the development of the masterplan involves community consultation and that the final version of the masterplan reflects community views.</p> <p>Para 17.10 (p696)</p> <p><i>'...However, the level of this growth will be contingent on the delivery of strategic infrastructure necessary to support both new developments and existing neighbourhoods. This includes transport infrastructure and particularly the Bakerloo line extension...'</i></p> <p>We do not accept that redevelopment of the area should be contingent on the Bakerloo Line extension proceeding, or even the relocation of Lower Sydenham Station to Bell Green, although we have no doubt that these would act as powerful catalysts for regeneration. We agree that the lack of access to public transport is a major contributor to local deprivation, and that sites required for critical transport infrastructure should be protected to allow future construction. The need to tackle poor amenity at Bell Green is urgent and early interventions to improve the neighbourhood, even if modest, should proceed as a priority in parallel with efforts to improve the transport infrastructure.</p>	<p>The Council acknowledges the strong local interest in a masterplan for the area and work undertaken by the community to support this. The Council will continue to take a lead role on the preparation of a masterplan to support the delivery of the Local Plan, working with and consulting a range of stakeholders including the local community and landowners.</p> <p>The Regulation 18 Local Plan document set out several spatial strategy options, recognising that some or all phases of the BLE may not be delivered in the plan period (including for reasons of funding). The preferred approach for the spatial strategy is therefore not dependent on the BLE. However the spatial strategy and the Local Plan policies aim to facilitate the delivery of the BLE, and provide flexibility to respond to it. This includes provision for an uplift in site development capacities enabled by the BLE through higher public transport access levels, particularly in the Bell Green and Lower Sydenham area – this is signposted in the plan but it is acknowledged this could be made clearer.</p>	Local Plan amended to clarify Council's commitment to enabling the delivery of the BLE, whilst ensuring the plan is deliverable in the absence of the BLE.
	3	LSA	<p>1) Could you inform me as to where I will be able to do my weekly food shop, not day to day shopping? I currently use Savacentre at Bell Green and Lidl on Southend lane. 2) Where will Sydenham Green Group Practice be resited?</p>	<p>The Local Plan proposals for Bell Green seek to enable the redevelopment the existing out of centre retail parks to deliver a new mixed-use neighbourhood. This will continue to allow for the provision of a significant amount of retail floorspace in the area, including new or re-purposed groceries or supermarkets. Elsewhere, existing district town centres and local centres will be supported for a range of main town centre uses.</p> <p>The site allocation for Sydenham Green Group Practice will enable the facility to be reprovided at the current site as part of a new mixed-use development. Any proposal for off-site reprovion would only be considered where other Local Plan policies on community infrastructure are satisfied.</p>	No change.

Discourse Architecture	3	LSA LSA SA 01 LSA SA 02 LSA SA 03 LSA SA 04 LSA SA 05	<p>Lewisham's South Area (p696)</p> <p>Lewisham's South Area PART 3 – Site Allocations (p699)</p> <p><i>Comments on Sites 1, 2, 3, 4 & 5 are given together:</i></p> <p>1 Former Bell Green Gas Holders</p> <p>2 Bell Green Retail Park</p> <p>3 Sainsbury's Bell Green</p> <p>4 Stanton Square Locally Significant Industrial Site</p> <p>5 Sydenham Green Group Practice</p> <p>Comment</p> <p>We strongly agree that proposals for the above sites should be made within the context of a Council-led master plan informed by the framework of proposals initiated by Discourse Architecture and the Sydenham Society. We have engaged in initial consultation with the Council and 'We Made That' on their proposals for the site and will issue our formal comment on these under separate cover. Our own community consultation at public meetings organized by the Sydenham Society (Railway Tavern 06.03.19 & Livesey Memorial Hall 12.09.19) identified a number of key areas of concern to local people that are not adequately addressed in the draft Local Plan:</p> <ul style="list-style-type: none"> • The need for immediate action to improve the services and amenity in the area. ------------------------	---	--	--	--	---

		<p>We believe that the Local Plan brief for new development at Bell Green can be successfully achieved with a layout based on established urban precedents for street-based architecture. The urban model of towers and slabs with poorly characterized spaces between, that has been adopted at Deptford and Lewisham town centre, should be replaced by a more regulated approach that is focussed on creating a positive public realm and spaces between buildings.</p> <p>The enhancement of the Waterlink Way should be bolder and incorporate a new east-west branch connecting to Perry Hill.</p> <p>Para 17.30</p> <ul style="list-style-type: none"> • <i>Development must not result in a net loss of industrial capacity, or compromise the functional integrity of the employment location, in line with Policy EC 5 (Locally Significant Industrial Sites).</i> <p>We support the retention of employment uses at Bell Green, but question whether the Stanton Square Locally Significant Industrial Site is an appropriate location for industrial activities, particularly the current low-intensity uses, which include a personal storage warehouse and a scaffold yard. We suggest that these activities will be a poor use of a site in close proximity to dense mixed uses and well-served by public transport. Instead, the employment emphasis at Bell Green could be related to retail, commercial, health, education, and hotel uses, combined with smaller-scale residential related uses, recognizing the emerging prevalence of live-work arrangements. An appropriate response to this economic trend would be to design residential units adapted to facilitate the growth in home working, whether remote office working or smaller home-based businesses. These could range from provision of rooms or spaces within residential units that could be used as home offices, to residential units with street access to integral retail or workshop accommodation.</p> <p>Finally, we would argue that the aspiration to build a sustainable future should be much bolder, making Bell Green a zero-carbon development.</p>		
3	LSA Key spatial objectives	<p>The absence of certainty on lead times and delivery timetables highlight an observable over-reliance on delivery of Phase 2 within the DLLP which the Council must necessarily re-assess.</p>	<p>The Regulation 18 Local Plan document set out several spatial strategy options, recognising that some or all phases of the BLE may not be delivered in the plan period (including for reasons of funding). The preferred approach for the spatial strategy is therefore not dependent on the BLE. However the spatial strategy and the Local Plan policies aim to facilitate the delivery of the BLE, and provide flexibility to respond to it. This includes provision for an uplift in site development capacities enabled by the BLE through higher public transport access levels, particularly in the Bell Green and Lower Sydenham</p>	<p>Local Plan amended to clarify Council's commitment to enabling the delivery of the BLE, whilst ensuring the plan is deliverable in the absence of the BLE.</p>

				area – this is signposted in the plan but it is acknowledged this could be made clearer.	
	3	LSA Key spatial objectives	As an example, to set Objective 1 as the highest priority could be viewed as an unnecessary constraint on delivery of other objectives and factors that would deliver better results on the short and medium term for Bell Green.	The key spatial objectives are listed by number but this is not a reflection of their priority.	Local Plan amended to make clear that the key spatial objectives for these sub-areas are not listed in order of priority
	3	LSA Key spatial objectives	An example of an unnecessary deferral would be the delivery of a widened and heightened bridge with improvements to pedestrian safety measures on Southend Lane. To defer those works because it has insufficient priority or it may have a design conflict with any new or relocated station on Southend Lane could not be deemed acceptable by a body of Ward residents who have waited for bridge improvement works to be delivered for 25+ years. A contribution of s106 monies that the Council has now acknowledged in writing is unspent and is being held in the Council's account would beneficially assist in direct negotiations with Network Rail over the contributory costs of renewing the bridge. The final value of these s106 monies has not been yet established by the Council, after a further year-plus delay because of the pandemic. Last correspondence confirmed it was in the order of £2.4m.	The council recognises the potential need for the widening and increase in height at Southend Lane bridge. Whilst high level feasibility studies have been prepared in the past no detailed design work has been undertaken. The Council will work with Network Rail to explore options. This is likely to come forward as part of the BLE and/or the comprehensive redevelopment of Lower Sydenham and Bell Green.	Local Plan amended to include reference to Southend Lane bridge in the LSA1 place principles.
	3	LSA Key spatial objectives	The Council is invited to acknowledge that a thorough re-examination of priorities, across short, medium and long term objectives will constitute a major confidence building exercise for a community in a geographic location where progress is observably minimal.	Noted. The Local Plan covers a 20-year period. Where possible the plan sets out indicative timeframes for the delivery of key development sites (i.e. site allocations). The Infrastructure Delivery Plan which sits alongside the Local Plan includes details on the timeframes for the delivery of infrastructure and projects which will support the plan's delivery.	No change.
	3	LSA Key spatial objectives	Engagement by the community in consultations leading to development of a Master Plan requires a restoration of confidence in that same community that their efforts and contributions are valued.	Noted. The Local Plan is being prepared in accordance with the Council's adopted Statement of Community Involvement. The Council has and will continue to engage with the local community and community groups on planning matters, including any Council-led masterplans.	No change.
	3	LSA Key spatial objectives	The arrival of BLE would improve transport accessibility and thereby enhance the attractiveness of development in the area. Plans, though, for options that include relocation or addition of a station closer to Bell Green is far from providing certainty in terms its deliverability. At the point in the timeframe for the DLLP consultation, funding for BLE Phase 1 has just been approved. Firm delivery timetables for Phase 1 remain uncertain. Approvals in principle for Phase 2 are not secure nor is funding and thereby deliverability for Phase 2 cannot be forecast with any level of confidence beyond the 50% range.	Noted. The Council acknowledges that whilst the BLE has been included in the London Plan as a key transport project, funding to secure its delivery has not yet been secured. The Regulation 18 Local Plan document set out several spatial strategy options, recognising that some or all phases of the BLE may not be delivered in the plan period (including for reasons of funding). The preferred approach for the spatial strategy is therefore not dependent on the BLE. However the spatial strategy and the Local Plan policies aim to facilitate the delivery of the BLE, and provide flexibility to respond to it.	No change.
Lewisham Cyclists	3	LSA Key spatial objectives	Page 676 Key Spatial Objective 6 in the main document refers to "Transform the Ringway corridor (Southend Lane and Whitefoot Lane) and the A21 corridor (Bromley Road) into 'healthy streets'". We would suggest the wording of this is altered to "adopt the healthy streets approach along the Ringway corridor (Southend Lane and Whitefoot Lane) and the A21 corridor (Bromley Road)" and encourage the planning team to follow TfL guidance on this which is clear and unequivocal. This should also form part of the strategic	Noted. The draft Local Plan is clear that the Healthy Streets approach will be applied in line with the London Plan. Further details are set out in Part 2 Transport and Connectivity policies.	Local Plan amended to clarify objectives for transforming strategic corridors using the Healthy Streets Approach (rather than transforming corridors into Healthy Streets).

			planning document for the whole corridor, and form conditions of planning along the corridor, including CIL contributions to part fund improvements.		
Sydenham Society	3	LSA Key spatial objectives	Key Spatial Objectives (p678) Comment: These are supported	Support noted.	No change.
Discourse Architecture	3	LSA Key spatial objectives	Discourse Architecture prepared the 'Bell Green Urban Renewal' masterplan for Bell Green/Lower Sydenham in consultation with the Sydenham Society in 2019 17 LEWISHAM'S SOUTH AREA (p673) Key Spatial Objectives (p678) Comment: These are supported	Support noted.	No change.
London Wildlife Trust	3	LSA 01	We support these principles, especially in respect of Parts K and L.	Support noted.	No change.
Lewisham Cyclists	3	LSA 01	Lewisham Cyclists also believe Downham way should also provide additional protected cycle lanes to connect the Downham Estate, and area with lower PTAL, to both Local Centres in Grove Park as well as A21 Bromley Road and Beckenham Place Park. This should be included in LSA1 sections G and I.	Noted	Local Plan amended by referencing cycle lanes within site allocations
Sydenham Society	3	LSA 01	LSA1 South Area Place Principles (p681) Comment: These are supported Item M (p683) Transport infrastructure improvements: Provision of a new bus station, with intermodal connections to the train or Bakerloo Line, should be added as item c. to a. Bakerloo Line Extension, and b. Junction improvements	Support noted.	Site allocations amended to reference potential requirement for new station.
Discourse Architecture	3	LSA 01	LSA1 South Area Place Principles (p681) Comment: These are supported	Support noted.	No change.
	3	LSA 02	The content of Lewisham Local Plan's content relating to the public realm is welcome. It is felt essential that the bridge at Southend Lane is rebuilt with a design that both widens it and permits the doubling of the width of the carriageway and increase its height to permit the flow and use of double-deck buses along Southend Lane and provides safe footpaths on both sides of the roadway. It is considered pivotal and necessary to improve traffic flow and pedestrian safety measure combined with an opportunity to improve the sense of arrival to the area. The walking and cycle environment can be compromised along with the necessary passing widths for wheelchairs and prams in case of poor placement of street furniture such as electric vehicle charging infrastructure.	The council recognises the potential need for the widening and increase in height at Southend Lane bridge. Whilst high level feasibility studies have been prepared in the past no detailed design work has been undertaken. The Council will work with Network Rail to explore options. This is likely to come forward as part of the BLE and/or the comprehensive redevelopment of Lower Sydenham and Bell Green.	Site allocation amended to include reference to Southend Lane bridge.

			<p>In keeping with the LPA's Good Public Space Design principles, measures to ensure that public footpaths and cycleways in the area are improved upon, particularly with the introduction of good quality design for peninsula bays for charging points that avoid the placement of charging points on footpaths, are welcome.</p> <p>Similarly, consideration should be given to improvements of the layout and configuration of all pedestrian crossings in the Bell Green retail area.</p>		
Grove Park Neighbourhood Forum	3	LSA 02	<p>This policy doesn't elaborate on the Grove Park neighbourhood part, therefore even more reason to ensure that policy LEA3 – Strategic Area for Regeneration, Grove Park, is further elaborated, taking elements from the neighbourhood plan.</p>	<p>Policy LEA3 (Strategic Area for Regeneration, Grove Park) cross-references Policy LSA2. This is considered an appropriate response to capturing the policy which covers parts of two of the plan's 'character areas'.</p>	<p>No change.</p>
Sydenham Society	3	LSA 02	<p>LSA2 Strategic Area for Redevelopment (p685) Item C Transport infrastructure: add bus station with intermodal connections to rail or tube lines</p>	<p>Noted</p>	<p>Former Bell Green Gas Holders and Livesey Memorial Hall, Bell Green Retail Park and Sainsbury's Bell Green site allocations amended to reference increased bus services and/or potential requirement for new station.</p>
Discourse Architecture	3	LSA 02	<p>Item M (p683) Transport infrastructure improvements: Provision of a new bus station, with intermodal connections to the train or Bakerloo Line, should be added as item c. to a. Bakerloo Line Extension, and b. Junction improvements LSA2 Strategic Area for Redevelopment (p685) Item C Transport infrastructure: add bus station with internodal connections to rail or tube lines</p>	<p>Noted</p>	<p>Former Bell Green Gas Holders and Livesey Memorial Hall, Bell Green Retail Park and Sainsbury's Bell Green site allocations amended to reference increased bus services and/or potential requirement for new station.</p>
Transport for London	3	LSA 02	<p>LSA3 Bell Green and Lower Sydenham 2 Bell Green Retail Park 3 Sainsbury's Bell Green The policy states in part C that land will be safeguarded for the BLE to Hayes. However, it should make clear that this is not part of the formal safeguarding for the BLE. It is also unclear what safeguarding will entail for this site/area as the BLE option beyond Lewisham to Hayes and Beckenham Junction is only in the early design phase. TfL welcomes further dialogue on the matter so the local plan can provide greater clarity in future editions, and can be prepared with the consideration of infrastructure requirements.</p>	<p>Noted.</p>	<p>Local Plan amended as suggested, to provide clarity on safeguarding and route options for BLE.</p>
London Wildlife Trust	3	LSA 03	<p>We support this policy in respect of Part D)e.</p>	<p>Support noted.</p>	<p>No change.</p>
	3	LSA 03	<p>There could feasibly be an opportunity to extend the Linear Park into one or both of the larger development sites, and it is recommended that this option is explored, with a view to an overall biodiversity net gain, as</p>	<p>Noted. Bell Green Retail Park – noted.</p>	<p>Pool Court site allocation amended by referring to biodiversity.</p>

		<p>measured/calculated at an appropriate functional scale. Extending the Linear Park would also be in line with open space objectives, noting the key finding of the Lewisham Open Spaces Assessment (2019), which is that a significant amount of additional provision will be required to maintain standards (of access to open space) over the long-term. However, it is recognised that there is a need to balance wide ranging objectives when considering how best to redevelop these sites.</p> <p>I support the expansion of the Linear Park.</p> <p>Site specific policy currently states:</p> <ul style="list-style-type: none"> • Bell Green Retail Park – “Development proposals must protect and seek to enhance green infrastructure, including SINC, green corridor, Metropolitan Open Land and the Pool River.” • Wickes and Halfords, Catford Road – “Development should maximise opportunities to enhance the ecological quality and amenity provided by the River Ravensbourne, including by revealing the river through decluverting, repairing gaps in Waterlink Way and improving public access to it.” This site specific policy is broadly in accordance with the Site Specific Design and Development Guidelines set for Wickes and Halfords, Catford Road within the adopted River Corridor Improvement Plan SPD (2015). Figure 9.1 shows one of the figures from the SPD, showing the location of the Pool River Linear Park between BGLS and Catford, also highlighting proximity of Beckenham Palace Park. • Pool Court – the site specific policy does not reference biodiversity constraints or opportunities; however, it explains: “Applicants should consult with Network Rail and Transport for London on design and development options.” <p>I would like to see the biodiversity and green space commitments explicitly included in this Local Plan and at the sites mentioned above. In Bell Green, a community masterplanning approach should be undertaken and the proposals as they stand are unacceptable. The heritage assets of the Livesey Hall, War Memorial and Grounds needs to be fully recognised in any plan for Bell Green.</p>	<p>Wickes and Halfords – The site allocation policy has been informed by the River Corridor Improvement Plan, which development proposals will also need to have regard to.</p> <p>Pool Court – Agreed, an additional policy point on biodiversity will be included.</p> <p>The Council acknowledges the strong local interest in a masterplan for the area and work undertaken by the community to support this. The Council will continue to take a lead role on the preparation of a masterplan to support the delivery of the Local Plan, working with and consulting a range of stakeholders including the local community and landowners.</p> <p>The Local Plan addresses the importance of preserving and enhancing the heritage significance of Livesey Hall, Memorial and Grounds, This includes Policy LSA3 and the Bell Green Gasholders site allocation.</p> <p>Bell Green Retail Park and Sainsbury’s Bell Green site allocations already include a requirement for improved east-west links from/to Waterlink Way.</p>	
3	LSA 03	<p>A significant opportunity to improve visual enhancement for the Public Realm. Approaches to the Bell Green locus from three major road arteries will benefit from improvements.</p>	<p>Noted. The Local Plan and South Area site allocations broadly seek to improve the public realm in this area in accordance with the Healthy Streets approach and principles.</p>	<p>No change.</p>
3	LSA 03	<p>Augment transport links for Bell Green and improve connections to town centres and nearby railway stations and include enhancement to cycle and pedestrian walking routes.</p>	<p>Noted. The Local Plan and South Area site allocations broadly seek to improve the public realm and transport access in this area in accordance with the Healthy Streets approach and principles. It also seeks to capitalise on the opportunities presented by the Bakerloo line extension.</p>	<p>No change.</p>

3	LSA 03	Radical redesign of the entire road system, in an area that extends to and embraces Perry Hill's junction with Selworthy Road, Perry Rise to its junction with Adamsrill Road, the entire Bell Green gyratory system, Southend Lane to its junction with Moremead Road and Sydenham Road. The design principles must be rooted in public consultation and must seek, as a primary issue to minimize air pollution by reducing the frequency of stopping points in the flow of traffic round and through the entire system. It could be calculated that timeframes for the delivery of such a comprehensive proposal will be concomitant with the delivery of outcomes from nationally-led policies which deliver significant reduction in the use of polluting vehicles in all classes. That might be characterised as a win-win outcome.	LSA03 C.d does include reference to improving the existing network.	Policy amended to strengthen the need to significant improve the street network.
3	LSA 03	Radically redesign the existing rail bridge at Southend Lane and enhance it with the provision of integrated pedestrian safety measures with the provision of safe footpaths on both sides of the roadway. The bridge should be rebuilt with a design that both widens it and permits, as a minimum, the doubling of the width of the carriageway and increase its height thus improving the management of traffic flows and of access of double-deck buses on Southend Lane.	LSA03 C.d does include reference to improving the existing network.	Policy amended to strengthen the need to significant improve the street network.
3	LSA 03	Create dedicated parking to the rear of Livesey Memorial Hall for the use of patrons. In normal times regular and large attendance events such as funerals, weddings and other celebratory events are hosted there and local on-street parking for residents is overwhelmed on those occasions by patrons seeking parking space.	Parking provision will need to be carefully managed in line with the London Plan standards. Any such new provision will need to ensure there is no harm to the significance of these heritage assets. This will need to be considered through the development management process.	No change.
3	LSA 03	Introduce the opportunity to sensitively provide an appropriate density of new housing units. It may be deemed appropriate to consider provision similar in scale to Bell Green Phase III development.	The Local Plan Part 2 policies broadly support the sensitive intensification of sites, and set detailed requirements to ensure that development proposals achieve the optimal capacity of a site.	No change.
3	LSA 03	Reprovision and expand all necessary local services within new developments in the area that will serve the increased number of residents. Health centre care, dental care, schools and nursery provision and other social care needs must be addressed.	An Infrastructure Delivery Plan has been prepared alongside the Local Plan. This identifies the strategic infrastructure required to support the levels of growth planned in the Borough, and has informed the Local Plan policies. The Local Plan Part 2 policies also set requirements to for infrastructure provision which will be considered on a case-by-case basis.	No change.
3	LSA 03	Introduce appropriate volumes of retail and commercial floor space.	The Local Plan seeks to makes provision for an appropriate amount of retail and commercial floorspace, informed by the latest technical evidence. Employment land and retail studies have been commissioned and prepared to inform the preparation of the Local Plan. The site allocation policies set out indicative capacities for different types of land uses.	No change.
3	LSA 03	Introduce a policy for all car parks requiring conformance with ACPO and Home Office Scientific Development Branch standards to introduce secure car park status with good quality design, improved lighting, controlled access and CCTV coverage.	Noted. It is acknowledged that the Local Plan can provide further clarity and detail on the standards and design of car parking. For soundness, this will need to be in accordance with the London Plan.	Local Plan policy TR4 amended to better refer to and align with London Plan car parking standards.
3	LSA 03	Introduce a policy to install rapid-charge points for EVs around this area and in publicly owned car parks.	The draft Local Plan Part 2 policy on Parking includes requirements for charging points and electric vehicles.	Local Plan policy TR4 amended to better refer to and align with London Plan car parking standards.

				The Council has also prepared a Low Emission Vehicle Charging Strategy which will address provision that is not included within new development proposals.	
	3	LSA 03	<p>Expand the defined <i>Area 1 Former Bell Green Gas Holders</i> to add the entirety of The Livesey Memorial Hall, its grounds, former bowling green and former tennis court.</p> <p>The listed status of three elements, Livesey Hall War Memorial Grade II, Livesey Memorial Hall Grade II and Livesey Memorial Hall Boundary Wall Grade II on that expanded site is fully recognised. The Council is invited to accept that the non-listed areas can be sensitively re-provisioned, with or without Designation as Local Green Space, in a variety of combinations to enhance the Public Realm aspects and provide areas that can be of beneficial use to residents and visitors without compromise to the listed elements.</p>	The draft Local Plan addresses the importance of preserving and enhancing the heritage significance of Livesey Hall, Memorial and Grounds, This includes Policy LSA3 and the Bell Green Gasholders site allocation. However it is acknowledged that this could be reinforced by ensuring these assets are considered more coherently by amending the site allocation.	Former Bell Green Gas Holders site allocation boundary amended to include the Livesey Memorial Hall and its grounds, former bowling green and former tennis court.
	3	LSA 03	<p>The assertion at LSA.4 has this, “The Bell Green neighbourhood is known for its out-of-centre retail park, including a superstore and other large format outlets, as well as their associated surface car parking. These retail uses are adjoined by two former gas holders, which are prominent local landmarks. Some contemporary blocks of flats have been developed on the edge of these Bell Green sites however new development has generally been delivered in a piecemeal way.</p> <p>This creates an unfortunate and unnecessarily outdated view of the heritage of Bell Green. It adds further to the sense of inconsistency about the presence of the gas holders and lack of precision in the content of the DLLP for this area.</p>	Noted.	Local Plan paragraph 17.4 amended to more accurately reflect on existing character of area.
	3	LSA 03	The gas-holders were demolished and the site levelled in 2020.	Noted.	Local Plan amended to make clear gas-holders have been dismantled.
	3	LSA 03	Vision and Character commentaries are positive although there is an air of over optimism on matters where the LPA had little control on delivery of objectives.	Noted. This is a vision for the area which the Local Plan policies aim to support.	No change.
Sydenham Society	3	LSA 03	<p>LSA3 Bell Green and Lower Sydenham (p687) This is supported</p> <p>Item B The preparation of a Supplementary Planning Document and/or Masterplan by the Council is supported, provided that the development of the masterplan involves community consultation and that the final version of the masterplan reflects community views.</p> <p>Para 17.10 (p696)</p> <p><i>‘...However, the level of this growth will be contingent on the delivery of strategic infrastructure necessary to support both new developments and existing neighbourhoods. This includes transport infrastructure and particularly the Bakerloo Line Extension...’</i></p> <p>We do not accept that redevelopment of the area should be contingent on the Bakerloo Line Extension proceeding,</p>	<p>Support for LSA3 noted.</p> <p>The Council acknowledges the strong local interest in a masterplan for the area and work undertaken by the community to support this. The Council will continue to take a lead role on the preparation of a masterplan to support the delivery of the Local Plan, working with and consulting a range of stakeholders including the local community and landowners.</p> <p>The Regulation 18 Local Plan document set out several spatial strategy options, recognising that some or all phases of the BLE may not be delivered in the plan period (including for reasons of funding). The preferred approach for the spatial strategy is therefore not dependent on the BLE. However the spatial strategy and the Local Plan policies aim to facilitate the delivery of the BLE, and provide flexibility to respond to it. This includes provision for an uplift in site development capacities enabled by</p>	Local Plan amended to clarify Council’s commitment to enabling the delivery of the BLE, whilst ensuring the plan is deliverable in the absence of the BLE.

			or even the relocation of Lower Sydenham Station to Bell Green, although we have no doubt that these would act as powerful catalysts for regeneration. We agree that the lack of access to public transport is a major contributor to local deprivation, and that sites required for critical transport infrastructure should be protected to allow future construction. The need to tackle poor amenity at Bell Green is urgent and early interventions to improve the neighbourhood, even if modest, should proceed as a priority in parallel with efforts to improve the transport infrastructure.	the BLE through higher public transport access levels, particularly in the Bell Green and Lower Sydenham area – this is signposted in the plan but it is acknowledged this could be made clearer.	
Discourse Architecture	3	LSA 03	LSA3 Bell Green and Lower Sydenham (p687) This is supported	Support noted.	No change.
Lewisham Cyclists	3	LSA SA 01	Former Bell Green Gas Holders & Bell Green Retail Park; In order for the council to meet policy TR3 in the South area, Development requirements (17.19 & 17.22) should explicitly take into account plans for strategic cycle routes identified in the Council Transport Strategy running East-West through Bell Green Gyratory as integral to adopting the Healthy Streets approach as part of the public realm strategy and should follow London Cycle Design Standards .	The site allocations mention the need for enhanced walking and cycle connections between public spaces and the site's surrounding neighbourhoods. This will require a hierarchy of routes with clearly articulated east-west and north-south corridors.	No change.
	3	LSA SA 01	The first instance of significant error appears here and is replicated in both the location diagram and in the narrative. The former gas-holders are located on Alan Pegg Place not Bell Green Lane. At para 17.18 Development requirements, reference is made thus "Development must be delivered in accordance with a master plan for the Bell Green and Lower Sydenham area." Which master plan? There is no definition present – draft, existing, or proposed. Reference is also made to "Positive frontage on Bell Green Lane and other key routes". How is the author's intent to be interpreted from this statement and the mis-labelled associated diagram? Bell Green Lane is some distance away from this locus. It is within the bounds of this site that off-street car parking for patrons of the Livesey Hall should be optimally provided. An expansion to this area is proposed at Appendix A .	Noted. The masterplan referred is one that is endorsed by the Council and which the community has been engaged with and consulted on. The Council will continue to take a lead role on the preparation of a masterplan to support the delivery of the Local Plan, working with and consulting a range of stakeholders including the local community and landowners. Any proposal for the provision of additional car parking will be dealt with through the development management process.	Former Bell Green Gas Holders and Livesey Hall site allocation amended to accurately refer to the site location at Alan Pegg Place Former Bell Green Gas Holders site allocation boundary amended to including the Livesey Memorial Hall and its grounds, former bowling green and former tennis court.
	3	LSA SA 01	<i>The listed status of three elements, Livesey Hall War Memorial Grade II, Livesey Memorial Hall Grade II and Livesey Memorial Hall Boundary Wall Grade II on the expanded site is fully recognised. The Council is invited to accept that the non-listed areas can be sensitively re-provisioned, with or without Designation as Local Green Space, in a variety of combinations to enhance the Public Realm aspects and provide areas that can be of beneficial use to residents and visitors without compromise to the listed elements.</i>	Noted.	Former Bell Green Gas Holders site allocation boundary amended to including the Livesey Memorial Hall and its grounds, former bowling green and former tennis court. Former Bell Green Gas Holders and Livesey Memorial Hall site allocation amended emphasise public realm and amenity.
Southern Gas Networks	3	LSA SA 02	Southern Gas Networks (SGN) have infrastructure within the area outlined in red <ul style="list-style-type: none"> A 400mm PE Medium gas main & 30" Steel Medium pressure gas main. And 	Noted.	Bell Green Retail Park site allocation amended to reference existing gas infrastructure and working with utilities providers

			<ul style="list-style-type: none"> 180mm PE Low pressure gas main <p>If any/when planning application is submitted SGN, would have to object due to our strategic gas mains being in situ with in the red boundary.</p> <p>As a side note the retail units within the retail park have gas supplies the owner of that gas infrastructure is Fulcrum Pipelines Ltd (their ref 9010973) they would need to be notified as well.</p>		
	3	LSA SA 02	<p>This diagram contains another incidence of street naming error. Mis-labelled previously as Bell Green Lane in this diagram it has been labelled Southend Lane. Once more the road name should be Alan Pegg Place.</p> <p>The narrative contains statements that display the LPA's over-reliance on potential delivery of BLE Phase II.</p>	Noted. As set out elsewhere in the consultation statement, the delivery of the Local Plan and proposals for Bell Green and Lower Sydenham are not contingent on the delivery of the BLE.	Diagram amended as suggested.
Lewisham Cyclists	3	LSA SA 03	<p>Sainsbury's Bell Green; In order for the council to meet policy TR3 in the South area, Development requirements (17.26) should explicitly take into account plans for strategic cycle routes identified in the Council Transport Strategy running East-West through Bell Green Gyratory as integral to adopting the Healthy Streets approach as part of the public realm strategy and should follow London Cycle Design Standards.</p>	The site allocations mention the need for enhanced walking and cycle connections between public spaces and the site's surrounding neighbourhoods. This will require a hierarchy of routes with clearly articulated east-west and north-south corridors.	No change.
	3	LSA SA 03	<p>This diagram contains another incidence of street naming error. Mis-labelled previously as Bell Green Lane in this diagram it has been labelled Southend Lane. Once more the road name should be Alan Pegg Place.</p> <p>The narrative contains statements that display the LPA's over-reliance on potential delivery of BLE Phase II.</p>	Noted. As set out elsewhere in the Consultation Statement, the delivery of the Local Plan and proposals for Bell Green and Lower Sydenham are not contingent on the delivery of the BLE.	Diagram amended as suggested.
	3	LSA SA 04	<p>For the first time in this group, the diagram contains no street naming errors.</p> <p>Apart from the narrative containing the usual statements that display the LPA's over-reliance on potential delivery of BLE Phase II, the contents are supported.</p>	Noted. As set out elsewhere in the Consultation Statement, the delivery of the Local Plan and proposals for Bell Green and Lower Sydenham are not contingent on the delivery of the BLE.	No change.
on behalf of Sydenham Scheme LLP the owners of the Coventry Scaffold	3	LSA SA 04	<p>The Stanton Square site allocation is welcome in principle. In line with the comments above regarding the masterplan this is referenced again as part of this site allocation and it should be recognised that delivery will be on a phased basis given the multiple ownership and availability of sites. As long as this is promoted in the context of an illustrative masterplan then this would achieve the comprehensive and coordinated development sought by the policy. It is noted that the development capacity is identified as 'indicative' but the range of residential units is very low for a regeneration site such as this and further engagement is sought to understand how this was arrived at with a view to increase these figures.</p>	<p>Noted. Where no advanced pre-application discussions have taken place, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper.</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the need to provide co-location of uses, the amenity of the school opposite the site and the non designated heritage assets. -Based on these considerations, the land use mix and residential units have remained the same.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	Stanton Square LSIS site allocation amended to refer to partnership working, phasing, masterplans and Policy DM3.

	3	LSA SA 05	<p>Another incidence of street name error. The street name here is Bell Green - NOT Bell Green Lane.</p> <p>As in previous examples the narrative for this site allocation is rendered meaningless in terms of lack of clarity, leading to difficulty and improbable interpretation and plain error.</p> <p>LSA.34 Development requirements propose that “Positive frontages and improved public realm along Bell Green Lane, Holmshaw Close and Kirtley Road. The locations proposed are unfeasible.</p> <p>The proposal that “Appropriate re-provision of the existing health care facility, in line with Policy CI 1 (Safeguarding and securing community infrastructure) is supported. Please note the response made earlier that re-provisioning must address increases in the number of patients that the Health centre will be obliged to serve as a result of increased housing provision in the area.</p> <p>LSA.35 Development guidelines propose that “Consideration should be given to the introduction of a new walking route connecting Kirtley Road and Bell Green Lane.” What is the author’s intent here – to actually have a walking route to connect Kirtley Road to Bell Green as opposed to a more improbable and less than feasible connection to the real Bell Green Lane?</p>	<p>Error noted.</p> <p>Disagree that the development guidelines are unfeasible.</p> <p>Support regarding reprovision of health care facility noted.</p> <p>The site allocation does not specify that a walking route connecting Kirtley Road and Bell Green will be delivered, but instead states that consideration should be given to this new route.</p>	<p>Sydenham Green Group Practice site allocation map amended to show correct road name.</p>
Lewisham Cyclists	3	LSA SA 06	<p>Worsley Bridge Road Locally Significant Industrial Site; The development requirements fail to recognise the council transport strategy to deliver Cycleways running from Lower Sydenham to Bromley. The development requirements should include making sure any development does not result in a reduction in existing footway or carriageway space. This should be detailed in the development requirements as part of the public realm strategy and should follow London Cycle Design Standards.</p>	<p>Noted</p>	<p>Worsley Bridge Road LSIS site allocation amended to include reference to delivery of cycleways running from Lower Sydenham to Bromley.</p>
	3	LSA SA 06	<p>The narrative contains statements that display the LPA’s over-reliance on potential delivery of BLE Phase II.</p> <p>Otherwise, the proposals are supported.</p>	<p>Support noted. As set out elsewhere in the Consultation Statement, the delivery of the Local Plan and proposals for Bell Green and Lower Sydenham are not contingent on the delivery of the BLE.</p>	<p>No change.</p>
Historic England	3	LSA SA 08	<p>Site allocation 8 South Area (Excalibur Estate): Please note that the buildings referred to at para 17.48 are listed Grade II on the National Heritage List for England, rather than being locally listed as drafted.</p>	<p>Noted.</p>	<p>Excalibur Estate site allocation amended to accurately reflect status of listed buildings, as suggested.</p>
	3	LSA SA 11	<p>I am writing to express concern about the plans contained within Lewisham’s new Local Plan to develop the Co-op at 431-453 Downham Way.</p> <p>While I understand the need to build more housing and would generally support it, I do not support any development that would see the Co-op being demolished/ closed for a period of time.</p> <p>A lot of people in the area (including old and vulnerable people) depend on the Co-op for grocery shopping. It is very important for the community and getting rid of it would severely undermine the goal of the 15 minute</p>	<p>Noted. The site allocation provides for a mixed-use development which would allow for the re-provision of a retail unit at the ground floor level. Should any future development come forward in line with the site allocation policy, the closure or temporary re-location of the existing grocery store would be dealt with through the Development Management process.</p>	<p>No change.</p>

			<p>neighbourhood, which I know is at the heart of the Local Plan.</p> <p>Even if the plan is to include a food shop at the bottom of the block of flats once the development is finished, this would still entail the local area being without a decent grocery shop for, I imagine, a year. This would have a big impact on everyone in the area, especially older adults and those who do not drive.</p> <p>I would agree that the car park for the Co-op is too big and is not an efficient use of space. I would fully support a plan to make the car park smaller and to use that space for housing. However, I cannot support the current plan which would see the local area without a food shop for some time.</p>		
3	LSA SA 12	<p>Building proposal on WV GarageSite (Avondale Road):</p> <p>My husband and I moved to Avondale Road in 2018 when we purchased our first house for our young family. While we are very happy to be living here, we have a number of issues with the surrounding area which we believe the housing development proposal may impact upon.</p> <p>The first relates to the speeding traffic on Avondale Road coming from both ends of the street. Just the other day we experienced an Audi travelling at what we believed to be around 60mph or more on a residential street. While this is shocking and rather frightening to witness, it is sadly common.</p> <p>The second issue concerns the number of parked vehicles on the street and surrounding our house which is on the corner with Alexandra Crescent from the Beadles garage (legally, I realise). While the thought of the garage no longer being able to park cars in front and at the side of our house (sometimes for months at a time!), we are concerned that another built-up residential area would increase the number of cars parked along the street as well as cars using the street as a speeding area.</p> <p>I completely understand the housing shortage problem which you will be seeking to rectify but I urge you to take these concerns into consideration when looking at the ambition of this project and the impact it could have on those of us who have recently made it our home.</p>	<p>Noted. The amount of car parking provision on any future redevelopment of the site would be considered having regard to the nature and scale of development, and in line with the parking standards set out in Part 2 of the Local Plan on Transport and Connectivity. In general, the Local Plan seeks to limit the amount of car parking to encourage a shift to more sustainable travel modes such as walking, cycling and public transport.</p> <p>Off-street parking management is dealt with by the Council's Transport service, and Controlled Parking Zones may be implemented where appropriate.</p>	No change.	
3	LSA SA 12	<p>Beadles garage site - draft Local Plan</p> <p>1. My wife and I are residents of Avondale Road, Bromley.</p> <p>2 May I comment on your proposals for Beadles Garage. This submission is split into two headings:</p> <p>A The context - the Beadles site as it is now; B The future which is envisaged by Lewisham Council</p> <p>Please could you acknowledge safe receipt?</p>	<p>Noted. It is considered that there is scope for the sensitive intensification of this site, which the Local Plan supports in order to help meet local needs for housing and commercial floorspace. Where no advanced pre-application discussions have taken place, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This</p>	Beadles Garages site allocation amended to make reference to the A21 Healthy Streets corridor, to increase residential to 25 units and to increase employment/ main towncentre floorspace to 610m ² .	

		<p>3. We do not object to the general principle underlying your proposals. But we do consider that your planning department needs significantly to adjust the scale of ambition involved in respect of the Beadles site. We believe that both Bromley Council and the Highway Authority for the A21, Transport for London, need to be fully engaged.</p> <p>Part A The context - the Beadles site as it is now</p> <p>4 The Beadles site is, as you describe, at the junction of Avondale Road and Bromley Hill.</p> <p>5 Bromley Hill is a busy A road and a red route. There is already a serious speeding problem on the A21. There are speed cameras which seek to regulate traffic speed in the immediate vicinity of the Beadles site which is the subject of the draft local plan. There has been at least one death at this junction.</p> <p>6 The speed of motor vehicles on the A21 tempts drivers to take risks as they turn into the A21 from Avondale Road or from the Bromley Court Hotel slip road opposite. As recently as two months ago, there was a damage only, but significant, collision at the junction.</p> <p>7 Your planners may not realise that Avondale Road is itself dangerous, because it is a “rat run” for traffic from Bromley Hill to Burnt Ash Lane, just as Park Avenue is. Moreover, the western end of Avondale Road, where Beadles is situated, is a main artery for traffic going towards the Downham Estate. The police have been alerted and are monitoring the situation.</p> <p>8 With the closure of another VW site locally, Beadles has itself created a new traffic problem on Avondale Road. We are VW owners and have bought two new cars from them in the last six years. So we are not hostile to the garage - far from it.</p> <p>9 The staff at the garage park Beadles cars, as they are entitled to do, along Avondale Road. The risks from speeding traffic in Avondale Road have already been flagged. The risks are now exacerbated by the many extra cars which are parked along the road.</p> <p>10 In summary, the combination of speed and heavy parking at the western end of the road, create a dual risk for residents.</p> <p>Part B The future envisaged by Lewisham Council</p> <p>11 We recognise that, with a housing shortage in the London area, the Council will rightly want to increase housing availability.</p>	<p>has taken into account the complexities of the site – including the need to provide mixed use development by introducing residential units and to reflect the surrounding character of the site. The indicative capacity has also been tested through the A21 Development Framework that has been endorsed by the council. -Based on these considerations, the land use mix and residential units have been amended.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p> <p>The Council has consulted statutory consultees on the Local Plan proposals, including Greater London Authority / Transport for London, Metropolitan Police Service and Bromley Council. Their feedback will be used to inform the Regulation 19 stage document.</p> <p>Speed limits are outside the scope of the Local Plan. However, the plan does advocate for Healthy Streets principles in support of sustainable travel, to reduce vehicular dominance and improve safety.</p> <p>The draft Local Plan proposes to apply the Healthy Streets principles to the A21 Corridor, and elsewhere, whilst also promoting growth and new development within and around it. The London Plan should be referred for further information on the Healthy Streets approach and principles. There are a wide range of interventions and projects that could support Healthy Streets, and as a strategic document the Local Plan does not go into a great level of detail on these. The Council’s Local Implementation Plan (LIP) supports the London Mayor’s Transport Strategy, and further details can be found therein.</p> <p>Bromley Hill cemetery – the draft Local Plan seeks to protect existing cemeteries. The Council has prepared a Parks and Open Spaces strategy which sets out priorities for managing and enhancing open spaces.</p> <p>Transport Assessments are required alongside any major planning application so there is no need to specify this requirement in individual site allocations.</p>	
--	--	---	---	--

			<p>12 We also recognise that provision of employment floor space is a desirable objective.</p> <p>13 We think that “public realm enhancements“would improve the A21 corridor from Downham to the junction with Avondale Road. But we do consider that the local plan will need to be more specific since it is impossible for local residents to understand what is proposed, not least in the light of the rather woolly and opaque language that has been used.</p> <p>14 As for the cemetery on Bromley Hill, it would improve local amenity if the Council were to create the conditions in which the site’s historic and environmental importance could be enhanced. But, again, what does the Council have in mind?</p> <p>15 As for the Beadles site, the proposals are not suitable. They will, as presently envisaged, create additional risks to local residents. Why do we argue that there will be additional risks? The answer is that they are likely, unless the proposals for employment space and 22 residential units are scaled back, to increase road use disproportionately on Avondale Road itself. This is likely to result in the attendant risk of more speeding, both on Avondale Road and down Alexandra Crescent towards Downham.</p> <p>16 Moreover, without the imposition of safety measures in the Local Plan in respect of the junction of Avondale Road and Bromley Hill, the proposals will create additional danger at the junction by reason of the probable level of increased usage.</p> <p>17 It would not be impossible to impose suitable conditions to manage both sets of risks. But the Council should not proceed to finalise the Local Plan without a plan to address the risks.</p> <p>18 In a spirit of collaboration, please let us know whether we can help you.</p>		
3	LSA SA 12	<p>Lewisham’s (‘the Council’) New Local Plan (‘Plan’) – Proposed Site Beadles Garage (‘the Re-development or Site’)</p> <p>My comments are made in a personal capacity. Thank you for providing residents with the opportunity to contribute to the Plan. I agree entirely with the Plan’s intention to ensure that planning decisions are made in the best interests of neighbourhoods and communities. We operate an Avondale Road group, primarily for Neighbourhood Watch purposes, that is well represented by the residents and major concern has been expressed by many of us around the proposed Re-development. Whilst acknowledging that the Re-development presents a number of opportunities for Lewisham Council, not least</p>	<p>Noted. It is considered that there is scope for the sensitive intensification of this site, which the Local Plan supports in order to help meet local needs for housing and commercial floorspace. Where no advanced pre-application discussions have taken place, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the need to provide mixed use development by introducing residential units and to reflect the surrounding character of the site. The indicative capacity has also been tested through the A21</p>	<p>Beadles Garages site allocation amended to make reference to the A21 Healthy Streets corridor, to increase residential to 25 units and to increase employment/main town centre floorspace to 610m².</p>	

			<p>new residential units, based on the existing 'Site Allocation' I have a number of concerns which primarily centre on:</p> <p>A) The likely greater danger at the junction (A21/Avondale Road) itself, where there have been a number of accidents over the years (most recently on the 28 February);</p> <p>B) The likely increase in on-street parking , especially towards the western end of Avondale Road (and which is already used by Beadle's as an effective 'overspill car park');</p> <p>C) The likely increase in traffic on Avondale Road, possibly resulting in more cars exceeding the speed limit and creating additional danger (our road is already a recognised – by the Authorities -speeding 'hotspot') The current Council Notice states that its 'Site Allocation' expectations are that the Re-development will be for mixed use. It would be helpful if local residents (of both Lewisham and Bromley) could be notified as soon as possible as to the intended actual use of the Site. Whatever the Site's eventual use, parking and traffic considerations must be addressed and improve on the existing situation. It would be helpful to know if the Metropolitan Police and highway authority for the A21 (as a red route and an A road, TfL is the authority) have been approached for their input and, if so, what their feedback has been. I look forward to receiving the Council's response to my and other contributor's feedback into the Consultation/Planning invitation for comments</p>	<p>Development Framework that has been endorsed by the council. -Based on these considerations, the land use mix and residential units have been amended.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p> <p>The amount of car parking provision on any future redevelopment of the site would be considered having regard to the nature and scale of development, and in line with the parking standards set out in Part 2 of the Local Plan on Transport and Connectivity. In general, the Local Plan seeks to limit the amount of car parking to encourage a shift to more sustainable travel modes such as walking, cycling and public transport.</p> <p>Speed limits are outside the scope of the Local Plan. However, the plan does advocate for Healthy Streets principles in support of sustainable travel, to reduce vehicular dominance and improve safety.</p> <p>The Council has consulted statutory consultees on the Local Plan proposals, including Greater London Authority / Transport for London, Metropolitan Police Service and Bromley Council. Their feedback will be used to inform the Regulation 19 stage document.</p> <p>Transport Assessments are required alongside any major planning application so there is no need to specify this requirement in individual site allocations.</p>	
3	LSA SA 15	6. With regard to the proposed development of a traveller site for the Borough at Pool Court (off Fordmill Road), I fail to see why such individuals should be treated as a separate case and not treated like all other citizens and integrated into the borough like all others. You only need to think back at the previous site next to Lewisham Station and how it was kept. If such individuals do not wish to associate with their average neighbour, then it is up to them to make their own arrangement and not for the council to devote resources for unnecessary favourable treatment. The sooner they integrate the better.	Noted. The National Planning Policy Framework requires the Council to identify and plan positively for the housing needs of the gypsy and traveller community through the Local Plan process. The site allocation will help to ensure these requirements are satisfied.	No change.	
3	LSA SA 15	<p>Re: Population of Pool Court & Objection</p> <p>With the reference to the above, I am writing to inform you that since 2016, 100% of Sybil Phoenix House residents objected to the proposal.</p> <p>The population of Pool Court confirmed in 2016 that they will be adversely affected and had strongly objected to the Council planting a G&T traveller site adjacent to Pool Court. Please find attached copies of our letters sent on 28th November 2016 and 8th January 2018.</p>	<p>Objection noted. The Council also acknowledges that previous objections have been received from on emerging proposals for the Pool Court site.</p> <p>The National Planning Policy Framework requires the Council to identify and plan positively for the housing needs of the gypsy and traveller community through the Local Plan process. The site allocation will help to ensure these requirements are satisfied.</p> <p>Any future development proposal for the site will need to demonstrate that it will not lead to an</p>	No change.	

			<p>We need to be safeguarded and with the COVID in the air, the vicinity at Pool Court must be particle infection-free as we all know what happens with the gypsy residential use of land and the rubbish that is left behind when they moved from place to place. A daily working camera is needed to protect the anxious habitant. After all, we pay our taxes just like everyone else in the borough of Lewisham.</p> <p>Therefore, we expect to be safe.</p>	<p>adverse impact on amenity and public health and safety, in line with other Local Plan policies.</p>	
	3	LSA SA 15	<p>RE: Population of Pool Court and Objection</p> <p>With reference to the above, I am writing to inform you that since 2016, 100% of Sbyil Phoenix House residents objected to the proposal. Please see attached Pool Court's petition from no 62-73.</p> <p><Lewisham officer note: supporting documentary evidence of signed petition provided></p> <p>The population of Pool Court confirmed in 2016 that they will be adversely affected and had strongly objected to the Council planting a G&T traveller site adjacent to Pool Court. Please find attached copies of our letters sent on 28th November 2016 and 8th January 2018.</p> <p>We need to be safeguarded and with COVID in the air, the vicinity of Pool Court must be particle infection-free as we all know what happens with gypsy residential use of land and rubbish that is left behind when they moved from place to place. A daily working camera is needed to protect the anxious habitant. After all, we pay our taxes just like everyone else in the borough of Lewisham.</p> <p>If the community is equally valid, therefore, we are expected to be safe, protected from harm. Failing to do so, you will be held responsible for any disruption that would affect the population of Pool Court.</p>	<p>Objection noted. The Council also acknowledges that previous objections have been received from on emerging proposals for the Pool Court site.</p> <p>The National Planning Policy Framework requires the Council to identify and plan positively for the housing needs of the gypsy and traveller community through the Local Plan process. The site allocation will help to ensure these requirements are satisfied.</p> <p>Any future development proposal for the site will need to demonstrate that it will not lead to an adverse impact on amenity and public health and safety, in line with other Local Plan policies.</p>	<p>No change.</p>
London Wildlife Trust	3	LWA	<p>We support these principles, especially in respect of Parts B and G. We particularly welcome the reference to the landscape character of the old Great North Wood (including within supporting paras 18.8, 18.9), and how this is to be best protected within the Plan.</p>	<p>Support noted.</p>	<p>No change.</p>
	3	LWA	<p>I consider myself to be very fortunate to live in West Lewisham, particularly over the last 40 years living in Forest Hill and Sydenham, where Public Transport links are really good for both rail and buses, and there is a wide range of excellent facilities, many parks, varied retail, diverse groceries, a swimming pool nearby, Libraries (under pressure), the Sydenham Centre, Many good Pubs, the Comedy Poodle Club, restaurants and cafes, the Horniman Museum at Forest Hill, the Undertakers, Sports, Yoga and the Arts. The feted '20 minute Neighbourhood' to meet most immediate needs, more or less exists in this area.</p> <p>What are the issues then, I observe that retail and local business are in crisis. I think I am correct that two banks</p>	<p>Noted. The Local Plan and its spatial strategy broadly support the '20-minute neighbourhood' approach. The preparation of the plan has been informed by key evidence base studies, including on employment and town centres. The Part 2 policies on Economy and Culture seek to provide flexibility for a wider range of uses to locate in town and local centres to support their long term vitality and viability. Changes to the Use Class Order however limit the scope for the plan to control the specific mix of uses within centres (for example within the new Class E category, where changes of uses between different types of activities are permitted without the need for planning consent),</p>	<p>No change.</p>

			and a Building Society have closed in very recent years, we have only one bank left on Sydenham Road. Even without the Pandemic, businesses opened and closed frequently, and the same breadth of services do not re-open. A lot of shop fronts are shabby. Do we really need three Gyms, endless Pound shops and Phone shops? Change is of course inevitable and the Pandemic has not helped at all, but it is not easy to stick to Planning aims, if there is panic over empty premises and no finance to have a choice of outcomes or plans to extend potential usage.		
3	LWA	I think the conservation area in Brockley should have a plan to develop one off houses of architectural merit. There are already residential houses on many of the mews and the blanket ban on residential in the mews, should be lifted. There are some extremely cool houses in the mews and this is something Lewisham should be proud of.	Noted. The Local Plan Part 2 Policies on Heritage broadly support sensitively designed, contemporary housing designs in Conservation Areas. The extant and emerging Local Plans do not set blanket restrictions on new developments, however the policies seek to ensure developments respond positively to local and historic character, including the significance of heritage assets and their setting.	No change.	
3	LWA	Live/work should be encouraged in the area [Brockley] too. Covid has proved that a variety of businesses benefit from purpose built live/work buildings.	Noted. It is acknowledged that there is authorised live-work development in Brockley Rise area and Local Plan will be amended to provide in principle support for this type of development in specified locations.	Local Plan amended to provide additional support for live-work accommodation in Brockley (Dragonfly Place Endwell Road and Ashby Mews).	
3	LWA	<p>In 2016 the Council instructed a traffic survey of Drakefell Road and the immediate area. I have attached a copy (Project Centre Report Drakefell Road.pdf). The study identified a number of opportunities for improvement. None have been implemented.</p> <p>Local residents have long been advocating safer streets and a healthier neighbourhood. They were in active dialogue with Cllr Dacres (Cllr McGeevor's predecessor as cabinet member for transport) on the challenges faced by Drakefell Road and on the urgent need to address the issues caused by Drakefell Road being used as a rat run for drivers from outside of the borough who are trying to avoid the A2 and A20.</p> <p>In 2017, Will Norman, TfL's recently appointed Cycling Czar, attended the area and was very supportive of the need to address issues of pavement parking, lack of crossing points and an antisocial environment.http://www.drakefell.org/drag/12-drag-meets-mayor-s-walking-cycling-commissioner.</p> <p>In or around 2018, LIP3 funding had been allocated to improving the B2142 corridor and (subject to a further consultation) Sustrans was to be tasked with helping build a modified road layout that would be trialled for 6 months in a temporary form and then constructed in 2021. In particular filters were discussed which would have the effect of reducing the overall traffic volume for the whole ward, not just Drakefell Road. This funding was subsequently withdrawn.</p> <p>There has been a recent campaign to set up a school street outside the Haberdasher primary school on Pepys Road.</p>	Too detailed for the Local Plan. We will pass your comments on to the Transport Team.	No change.	

			<p>The campaign and its petition was about making the journey to school safer. I am delighted that the school street seems to be going ahead but once again Drakefell Road which is crossed by a great many parents and children on their way to school seems to have been forgotten.</p> <p>There are a number of allocated or proposed sites for development which impact on conditions in Drakefell Road, including a proposed development on the current Sky Roofing industrial site (corner of Drakefell Road and Wallbutton Road) as well as the site at Brockley Cross. There is clearly time for action. Drakefell Road is a sorry story of the Council and our elected representatives burying their heads in the sand.</p>		
3	LWA	<p>I would like the Drakefell Road and Gellatly Rd corridor to be considered for LTN status.</p> <p>The road is getting busier and for years now no action has been taken to address this and its consequences. There are more people living on this road than many in the surrounding vicinity and yet more and more traffic is funnelled down the road. There are regular traffic jams down the road. The east of the road is a pollution black spot. Every few minutes there is a car exceeding the speed limit on the road. The road is surrounded by schools but the crossings are poor or non-existent. The mix of traffic is now noisier with more LGVs and delivery bikes. You literally cannot hear your neighbours! No one wants to spend time at the front of their house so the community is weaker because of it. We have applied for no car days but been rejected. We have highlighted the weak bridge on Avignon road which is not enforced and lorries regularly travel over it, but again nothing has been done. We continue to get HGVs using the road as a shortcut and getting stuck. The road is plagued by cars parking on pavements which was made illegal in the 1970s but still somehow continues in Lewisham even though walking is now promoted as a key mode of travel by the council.</p> <p>The crux of the matter is 'car' king or is community?</p> <p>An LTN status for this corridor is an important first step to begin to address these worsening problems.</p>	<p>Low Traffic Neighbourhoods are outside the scope of the Local Plan. However, this suggestion will be referred to colleagues in the Council's Transport service for their consideration.</p>	<p>No change.</p>	
3	LWA	<p>Are there any other issues and/or approaches for the area that you feel should be considered?</p> <p>What happened to TFL's plans to address the queuing traffic on Waldram Crescent/London Road? There was talk of a diversion of traffic to the underpass walkway on Perry Vale which runs under the railway (which would mean no bend and a filter lane for Dartmouth Road could be introduced, reducing need for traffic lights). This should be part of the plans/be revisited - that is the only way that the A205 approaching Forest Hill could be converted to a healthy street.</p>	<p>Specific transport improvements such as diversions, filter lanes are beyond the scope of the Plan.</p> <p>Your comments will be forwarded on to the Transport team.</p>	<p>No change.</p>	

3	LWA Fig 13.1	<p>2. DIVISION OF SECTIONS- With relation to Telegraph Hill, the local plan section divisions appear to be totally arbitrary and make no sense at all. They do not take into account how the communities in those areas behave or what parts of the borough they are connected to and relate to for shopping etc. I live at the north end of Pepys Rd. I sat through zoom for 'my area' discussion from the council and realized it did not relate to me at any level. They were talking about Sydenham? Forest Hill? and goodness knows what other places, areas with which we have zero connection!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!</p> <p>On Telegraph Hill, we connect with the New Cross Road, Queen's Road. We shop at Sainsburys in the New Cross Road and on our own parades. We look to the Old Kent Road, Peckham, on occasion Deptford and Nunhead. But NEVER towards the areas mentioned in the discussion. I have never shopped or even visited the areas they mentioned, except for the Horniman's Museum. It is ludicrous to bang us in with them. To us, those areas are like another borough entirely.</p> <p>There is no logic to being unprecise and untidy with these borders for the Local Plan. They are too important to allow them to be so carelessly and messily drawn. Problems will arise down the line if these things are not ironed out properly. Telegraph Hill should be one unit. It was built as a unit in 1880, and is now a successful conservation area. The conservation area map could be considered as a guide for one of your sections, which would at least be logical as well as realistic.</p> <p>3. In particular, I would like to comment that parts of our conservation area have been wrongly classified as ripe for opportunity. REALLY? This is nonsense as we are in a distinct conservation area with clearly defined border. Nothing BLURRED there.</p> <p>This kind of careless and clumsy mapping with its arbitrary divisions is confusing! Developers who do not know the areas might be encouraged to think they can start trying to destroy parts of conservation areas as well as others. My home falls into one of your "Opportunity areas" and I am on Telegraph Hill within the conservation area. This should not be allowed to stand.</p> <p>The chairman of the discussion from the council actually tried to persuade us that boundaries don't matter because the edges are blurred! What does this mean? He defended it as if it was an asset to be imprecise and ambiguous? That is very worrying. Everything is about being accurate. Otherwise everyone will think they can bend the rules at infinitum. A lack of precision invites varied interpretations. This is dangerous when you have developers snooping around. The boundaries of the local</p>	<p>Part 3 of the Local Plan deals with Lewisham's 5 character areas. It sets out a vision, spatial objectives and planning policies for each. The sub-area approach responds to feedback from the public for the Local Plan to set a more 'place-based strategy' with a renewed focus on Lewisham's neighbourhoods.</p> <p>The character areas (and neighbourhoods within them) were informed by the Lewisham Characterisation Study, which was prepared in collaboration with community groups and subject to public consultation. Whilst it is acknowledged that people may not agree with the geographical extent of the areas, the character areas provide a useful way of planning at a more localised neighbourhood level.</p>	No change.
---	-----------------	---	--	------------

			plan sections MUST be very clear and precise to avoid abuse.		
3	LWA	<p>Telegraph Hill:</p> <p>Most people who live here do so because of the beauty and convenient facilities of the Victorian hill design. Yet protections for it seem to constantly be watered down when the plan should be leading the way on restoring and preserving what makes the area so wonderful. Where is the commitment for the Council to lead the efforts of preserving and restoring and policing more strongly that developments enhance rather than destroy?</p> <p>It's clear to anyone living here that infill construction could destroy all we value....and should be only allowed when it fits seamlessly with the traditional architecture that exists. There are wonderful examples where this has been done...and terrible examples where it hasn't. This would be easy to prescribe in the plan.</p> <p>We have so few family homes left that the plan should strengthen the protection of those remaining and ban further conversions of family homes to flats and HMOs. Policing and fines for those who infringe such rules should be increased, not relaxed.</p>	<p>Disagree. The Local Plan seeks to ensure that all new development preserves and enhances the significance of heritage assets and their setting, consistent with national planning policy. This includes conservation areas. The Local Plan sets out a strategy to deliver Good Growth that responds to the distinctive features of Lewisham's neighbourhoods. The plan recognises that infill development can help to restore and repair elements of the historic environment that have been eroded or lost.</p> <p>The Local Plan Part 2 policies on Housing seek to ensure that provision is made for a mix of housing types to meet local needs, including family housing. It includes policies to manage HMOs and ensure that development involving conversions does not result in the loss of family homes.</p>	No change.	
3	LWA Fig 18.2	<p>It is noticed that the West Lewisham link passes through Brockley & Ladywell Cemeteries. Although another map shows it as a walking route this does not mean that it will not be used by cyclists. The Cemeteries are havens for wildlife and for families to pay their respects, so such an activity is not appropriate.</p> <p>On the same map, Ivy Road is shown as an alternative route. This is preferable.</p>	<p>Map amended showing alternative route</p> <p>The cycle routes and quiet ways have been derived from the Lewisham cycle strategy – the Lewisham links routes are not intended to be key cycle routes.</p>	No change.	
3	LWA	<p>On 23rd of March I received an email from the HopCroft Neighbourhood Forum informing me that Lewisham Council had opened consultations on a range of potential developments across Crofton Park and Honor Oak. If I had not received this email, I would have been unaware of the consultations.</p> <p>One of the proposals is on land (car-park and garages) currently used by residents of the block that I live in. I have spoken to most of the neighbours in our block (310-316 Brockley Road) and some residents on Whitbread and Comerford Roads. None were aware of these consultations because there are no signs and we have not received any postal notifications about the plans. All confirmed that they rejected the proposal.</p> <p>In 2017 residents rejected a similar proposal because it would remove one of the few nearby local green spaces, block evening sunlight to residents on the lower floors of 310-316 Brockley Road and the Comerford Road block and morning sunlight to some residents on Whitbread Road. The proposal was also rejected because it would reduce amenities (including parking) to local residents. None of these issues have been addressed in the latest proposal, if</p>	<p>This consultation referred does not concern the Local Plan. Rather it is the Regulation 16 stage consultation on the Honor Oak and Crofton Park (HOPCROFT) Neighbourhood Plan. This plan identified a site named 'Land and Whitbread Road' as a potential development site. The neighbourhood plan is separate from the Local Plan.</p>	No change.	

			<p>anything they are literally being buried by building over them. Whitbread Road is also full with many residents and non-residents already parking on the road so the amount of traffic and noise would increase and the lack of car-parking space would be exacerbated. At present non-residents already park in our block's car-park so there are not enough spaces. Our block's car-park could benefit from electric car charging parking facilities.</p> <p>I would like to confirm that I reject this proposal.</p> <p>However, many residents have commented and complained for years as to why the green lawn by our apartment block (off Whitbread Road) was fenced off and the gate locked. Our block and neighbouring residents would like this area to be opened up as green space for public use. This could be as a mini forest to help local biodiversity or be turned into a mini community park or play area for local kids. The COVID crisis has highlighted the importance of (public) green space and many residents in local blocks do not have gardens. Residents and Council tax payers have to pay to maintain the fenced off green lawn area which they no longer have access to. At present this land offers limited to no environmental, social or economic benefits to local residents or the Borough. Instead of being used to generate funds we waste tax payers money maintaining it for no added value and this has been the case for decades. Situations like this need to change across the Borough</p>		
Brockley Better Streets	3	LWA TR 01	<p>Our research shows local priorities in the Ladywell/Brockley area are:</p> <ul style="list-style-type: none"> • Increase safety for everybody inside and around the Brockley Conservation Area • Prioritise cyclists, pedestrians and public transport • Reduce pollution • Emphasize the tranquil & residential nature of Brockley • Make the access points to Hilly Fields park safer for pedestrians, cyclists and public transport • Co-ordinate work across the Borough, and across London Boroughs, to reduce the through commuter traffic on residential roads from outer London to inner London. This traffic peaks during the morning and evening rush hours. <p>The issues that need immediate attention are:</p> <ul style="list-style-type: none"> • Too many accidents / near-misses • Heavy goods vehicles / buses / lorries driving through residential areas • Danger spots • Speeding • Aggressive / anti-social behaviour of motorists • High volume of cars • Use of residential roads as 'rat runs' • Cars on the pavement • Structural impact on properties • Exhaust emissions • Overcrowding 	Many of these priorities are captured within draft Local Plan within the strategic objectives and/or within the policies in Part 2 and 3 of the plan.	No change.

Possible solutions have been identified through a community design workshop covering the Brockley and Ladywell wards:

- Wider pavements
- Cycle lanes / designated routes
- One-way systems
- Bus filters
- Road layout ('Dutch roads')
- Landscaping
- Road furniture
- Zebra crossings / traffic islands
- Parking bays
- Crossing wardens during school hours

The roads most affected by rat runs in the Brockley / Ladywell area identified at the workshop and through other local consultations are shown here:

Ward Boundary Review and relationship with Lewisham Way

As the result of the Local Government Boundary Commission review of 2019/2020 it is affirmed that 'in readiness for national elections in May 2022' Brockley Ward should embrace the residential areas of Brookmill Road and St John's Conservation Areas. This means that Lewisham Way (A20) is now to be seen as an integral part of Brockley Ward and is not to be regarded as just a boundary as indicated on the West Area Key Diagram (p736).

The importance of this demands that as a major NW-SE traffic cross route it merits inclusion to be upgraded on a

Noted.

Local Plan amended to refer to Lewisham College

			<p>par with the transformation status afforded to the South Circular and Brockley Rise/Brockley Road re becoming a 'healthy street' with public realm improvements.</p> <p>In further justification for this it is highlighted that Lewisham Way is uniquely bordered on the south by substantial mature landscaped strips in the form of Deptford Memorial Gardens as extending beyond Wickham Road to Breakspears Road and thence to Lewisham College* and its car park beyond Tressillian Road.</p> <p>As these features are complemented on the north by the recently reinstated green area fronting Ashmead Primary School (as extended to face Lewisham Way) as well as the landscaped areas of St John's Church and the Bright Horizon's Day Nursery it is suggested that a unique opportunity now exists to designate Lewisham Way as a 'roadside local centre and green way'. A strong link with Spatial Objective 9 is therefore gained (p735).</p> <p>It is recommended thereby that this concept should be adopted and that the proposed boundary for Lewisham Way Local Centre be adjusted accordingly in the Draft Plan (p17 of the Proposed Changes to the adopted Policies Map along with references in the text to 18 Lewisham West Area at e.g. paras 18.5, 18.7, LWA1 Ac, LWA2 B, LWA4, 18.13).</p> <p>* NB: the reference to Southwark College (para 18.4) is incorrect - it should be changed to 'Lewisham College'.</p>		
Brockley Society	3	LWA TR 01	<p>Brockley Station Interchange</p> <p>It is appreciated that the intention to secure and deliver the Brockley Station Interchange is being retained as a Key Spatial Objective (p735 and TR1 p445). Whilst this deals with the possibility of providing platforms at a higher level to permit interchange between services that crossover from Lewisham to Victoria and Blackfriars the need for a Feasibility Study on the practicalities of this is paramount. As the former street level links to Brockley Lane Station still exist decisions on protecting the delivery of this vision are required. A Statement of Intent for Brockley Cross is needed as LWA5 or similar and should build upon the Local Centre Policy Map area (shown in Lewisham Local Plan - Proposed changes to the adopted Policies Map of December 2020, p18).</p>	<p>Support for Brockley Station Interchange noted. The Council will continue to work with stakeholders, including GLA/TfL and Network Rail, to investigate the feasibility of delivering this infrastructure upgrade.</p> <p>Local Plan Policy LWA2 (Connected network of town centres) addresses Brockley Cross however it is recognised that additional details could assist with the plan's implementation.</p>	Local Plan amended with additional details on the role of Brockley Cross in supporting the spatial strategy.
Brockley Society	3	LWA EC 03	<p>Live:Work Accommodation</p> <p>It is noted that live:work development is focused on the Forest Hill District Centre ((LWA3, p743 and Lewisham West Area, p746, para 18.11) as the only location in the Borough. This is incorrect as Ashby Mews in Brockley is a similar location where live:work units are being successfully integrated. Reference to this therefore also needs to be linked in with the Brockley Cross document LWA5 as suggested above.</p>	<p>Noted. It is acknowledged that there is authorised live-work development in Brockley area and Local Plan will be amended to provide in principle support for this type of development in specified locations.</p>	Local Plan amended to provide additional support for live-work accommodation in Brockley (Dragonfly Place and Ashby Mews).
Environment Agency	3	LWA	<p>Lewisham West Area feedback</p>		Some amendments to sites allocations have been made in line with the comments provided in the table of sites

		Site allocations	<i>LB Lewisham officer note: Table of sites with water management information included in original representation.</i>		
Forest Hill Society	3	LWA LWA SA 05 LWA SA 10	<p>Public Realm Issues</p> <p>The Forest Hill Society fully welcomes the Lewisham Local Plan’s content relating to the public realm.</p> <p>A. We welcome and support the consideration given to redevelopment and site intensification at the lands at Forest Hill station East and West. We consider this a pivotal and necessary opportunity to improve the sense of arrival to the area, as well as improving safety and utility for commuters and visitors. Our two concerns with this content are as follows:</p> <p>B. For the Station West land, the proposed ‘retention or appropriate re-provision of the existing dental surgery’ does not address the blocker this unit presents to greatly more meaningful transformation of the station approach and forecourt. We would contend that demolition of the existing buildings that consist of the dental surgery and bookmakers is essential to enable the redesign of this key junction and access point. Appropriate re-provisioning of the Dental Surgery, Post Office and Newsagents and other business should of course be addressed in this case in the Station redesign.</p> <p>C. For both Station East and West lands, we would encourage the inclusion in scope for the addition of pedestrian crossings and for improvements to the crossings on the immediate roads:</p> <ul style="list-style-type: none"> ● The lands to the Station’s east exit present an absence of a suitable pedestrian crossing close to the station’s exit on Perry Vale that the Society considers to be a hazard. ● The Station West land’s current crossings of the immediate South Circular present a sense of ‘islands within traffic zones’. These crossings significantly impede the sense of arrival for pedestrians including those arriving by rail to visit the significant cultural destination of the Horniman Museum and Gardens, and the Cultural Quarter site / commercial site of Havelock Walk. <p>D. The walking and cycle environment can be compromised along with the necessary passing widths for wheelchairs and prams in case of poor placement of street furniture such as electric vehicle charging infrastructure. We encourage measures to ensure that public footpaths and cycleways in the area are only improved upon.</p> <p>E. Consideration should be given to improvements of the layout and configuration of Perry Vale from its junction with Waldram Place to the South Circular, particularly to address public footpath clutter and provision of space for storage of wheelie bins. (Appendix C)</p>	<p>Noted. The Local Plan is a strategic policy document and the Council needs to carefully consider the level of detail provided for each area within the site allocations. It would be too detailed to refer to all existing businesses that should be re-provided within all of the site allocations. This will be determined through the Development Management process.</p> <p>It is worthwhile referencing the need for an enhanced pedestrian environment, without citing specific, detailed schemes.</p> <p>Agree that the word retention of the existing dental surgery may restrict redevelopment from taking place.</p>	<p>Land at Forest Hill Station West site allocation amended to make reference to improving pedestrian crossings and pavement widths within the vicinity of the site and to remove the word “retention”.</p> <p>Land at Forest Hill Station East site allocation amended to make reference to a new pedestrian crossing and pavement widths within the vicinity of the site</p>
Forest Hill Society	3	LWA	Appendix A – Forest Hill Station and Town Centre Masterplan (Discourse Architecture Design Pack)	The Local Plan sets out the Council’s strategic framework to facilitate Good Growth within and around Forest Hill. Officers have reviewed the community-led masterplan, and consider that the Local Plan reflects the broad aims and principles of	No change.

			<p>Appendix B1 Forest Hill Station and Town Centre Master Plan: Provision of Housing and Commercial Space Estimates.</p> <p>Appendix B2 Forest Hill Station and Town Centre Master Plan: Provision of Housing and Commercial Space Estimates.</p> <p>Appendix C: Waldram Place and Perry Vale Road Layout Alterations The Society considers it essential that pedestrian crossing be installed on Perry Vale in proximity to the exit for Forest Hill Station. Whilst the crossing is not indicated on the sketches, the Council is invited to add this proposal in its entirety to the Local Plan.</p> <p><i>Officer note: Appendix submitted as formal representations.</i></p>	<p>this. However it is recognised that there are feasibility and financial viability issues which may preclude or complicate the delivery of some elements of the masterplan (for example, those dealing with strategic infrastructure such as the A205 and Forest Hill Station / station approach), and they have not therefore been incorporated into the Local Plan.</p> <p>The indicative site development capacities set out in the Local Plan site allocations have been established using a standard methodology, which the Council considers is robust.</p>	
HopCroft Neighbourhood Forum	3	LWA Figure 18.2	<p>Fig 18.2:</p> <ul style="list-style-type: none"> • Should mark the key nature reserves along the marked 'strategic green links' • Duncombe Hill as a London Square and Local Green Space should be marked particularly as it is of significant visual amenity value. • Malham industrial estate should be marked as a designated employment site. • The Special landscape character of the New Cross to Forest Hill cutting should be marked. 	<p>Nature reserves are not planning policy designation but are noted in the Appendices of the Local Plan.</p> <p>Duncombe Hill has been designated as strategic open space within the made Crofton Park and Honor Oak Neighbourhood Plan. It is designated local green space.</p> <p>Employment sites are indicated in Fig.81 Employment Land Hierarchy.</p>	No change.
Residents Drakefell and Gellatly Roads	3	LWA	<p>After many years of dedicated collaboration with councillors on the issues of Drakefell and Gellatly Roads, we fully expected to see some mention of these roads in the detailed plan for the "West Area". However, Section 8 talks about transforming the South Circular, Brockley Rise and Brockley Road into "healthy streets" and there is not so much as a mention of Drakefell and Gellatly Roads. We would like to understand on what criteria Drakefell and Gellatly Roads are ruled out of being a Low Traffic Neighbourhood, or indeed of being a Safer School Street - the Haberdasher Aske's students have to cross Drakefell many times per day to reach their sports ground.</p>	<p>The Local Plan does not rule out streets being part of the Low Traffic Neighbourhoods. We will pass on your comments to the Transport team.</p>	No change.
Residents Drakefell and Gellatly Roads	3	LWA	<p>In May 2020 we wrote to Councillor Sophie McGeevor, as Cabinet Member for Transport, about the dangerously weak bridge on Avignon Road. We recommended that a bus gate be put in place. As far as we know, no changes have been made to the structure of the bridge and heavy skip vans and lorries continue to pass over it despite being significantly heavier than the weight restrictions. This is an urgent and dangerous issue. A simple solution of a bus gate with ANPR camera could improve safety while actually generating much needed funds for our road and our ward in general. We request an urgent update on this situation.</p>	<p>Specific transport improvements such as bus gates are beyond the scope of the Local Plan.</p> <p>Your comments have been forwarded to the Transport team.</p>	No change.
Sydenham Society	3	LWA	<p>Key Spatial Objectives (p735) Comment: These are supported</p>	<p>Support noted.</p>	No change.
Telegraph Hill Society	3	LWA	<p>We have little comment on this section which appears to ignore Telegraph Hill. See our comments on the North Area for our overall view that the Telegraph Hill and Hatcham</p>	<p>Noted. The character areas or sub-areas in the Local Plan were informed by the Lewisham Characterisation Study, and provide a helpful means of providing</p>	No change.

			Park Conservation Areas should be brought into the West Area in order to allow for a holistic treatment of the former Haberdashers' estate development and for our comments on how, if this is not done, the two sections of the Plan should be consistently presented to protect the joint area. The key requirement would be an SPD covering the whole estate.	<p>policies at a more granular or neighbourhood area (rather than borough-wide) level. The Local Plan must be read as a whole for planning decisions, which is clearly stated in Part 1 of the plan.</p> <p>The Council will consider the preparation of future SPDs to support the implementation of the Local Plan, taking into account resources available and key priorities areas to support the delivery of the spatial strategy. For Conservation Areas, the Council has and will continue to prepare a suite of Area Appraisals which provide additional guidance.</p>	
The Hatcham Society	3	LWA	We back the Telegraph Hill Society's view that Hatcham and Telegraph Hill, as parts of the Haberdashers' Estate, and as areas negatively affected by the A2, should be treated holistically in the Plan. Hatcham has more in common with Telegraph Hill (architecturally and in terms of heritage features) than with North Deptford. We propose therefore that the Hatcham area should be included in the West Area so that New Cross Gate, Hatcham Park and Telegraph Hill can be considered holistically.	Noted. The character areas or sub-areas in the Local Plan were informed by the Lewisham Characterisation Study, and provide a helpful means of providing policies at a more granular or neighbourhood area (rather than borough-wide) level. The Local Plan must be read as a whole for planning decisions, which is clearly stated in Part 1 of the plan.	No change.
The Hatcham Society	3	LWA	We also back the Telegraph Hill Society's view that a design guide on the Haberdashers' Estate (incorporating both the Telegraph Hill and Hatcham Conservation Areas) should be produced in order to ensure that a consistent approach is not lost by virtue of the arbitrary North/West split.	The Council will consider the preparation of future SPDs to support the implementation of the Local Plan, taking into account resources available and key priorities areas to support the delivery of the spatial strategy. For Conservation Areas, the Council has and will continue to prepare a suite of Area Appraisals which provide additional guidance.	No change.
Transport for London	3	LWA	We encourage public realm improvements around Forest Hill District Centre including to and near the South Circular. As mentioned in the local plan, we are happy to discuss the detailed plans along with Network Rail, before any details get incorporated in the local plan. It will be essential that bus journey times are not worsened. As part of this site allocation, consideration should be given to development of the large car park to the east of the station and some of the much smaller one adjacent to the main western entrance, along with public realm improvements.	Support noted. The site allocations in proximity to Forest Hill station include the existing car parks, and the policies support their rationalisation to deliver new mixed-use development that optimises the capacity of sites. The Council will continue to engage with GLA/TfL and Network Rail to deliver public realm and transport improvements in this area.	No change.
Residents of Sydenham Hill	3	LWA	<p>2. Sydenham Ridge: Area of Special Character</p> <p>We are concerned that the proposal to remove the Area of Special Character from Sydenham Hill is intended to further the infill policy which has already eroded the green spaces and views across Kent from Sydenham Hill, as well as impacting negatively on our wildlife habitats and corridors. We have noted that the development of Wells Park Place and Exeter Place at the top of Wells Park Road / Sydenham Hill has resulted in large quantities of hard landscaping at the expense of green land, the destruction of a mature and majestic oak tree and the displacement of springs which have been forced to emerge further down the hill. Token planting of non-indigenous decorative trees in formal lines is no substitute for the habitats thereby lost.</p>	<p>Noted. Following a review of the designations it is proposed to include Sydenham Hill Ridge as an ASLC in the Regulation 19 document.</p> <p>The draft Local Plan sets out a revised suite of policies on green infrastructure (Part 2 – Green Infrastructure) which seeks to provide stronger protection and enhancement green spaces, trees and biodiversity/habitats.</p>	Local Plan amended to include Sydenham Hill Ridge as an Area of Special Local Character.
Residents of Sydenham Hill	3	LWA	The proposed change to an Area of Special Local Character would allow building close up to non-heritage assets (such as the locally-listed buildings and the 1960s award-winning	Noted. Following a review of the designations it is proposed to include Sydenham Hill Ridge as an ASLC in the Regulation 19 document.	Local Plan amended to include Sydenham Hill Ridge as an Area of Special Local Character

			housing estates). The Site of Importance for Nature Conservation (SINC) would also be jeopardised on the Hillcrest Estate. The essential characteristic of the ridge, as a landmark running across the whole of South LONDON, of unbroken tree line, has already been threatened by the permission granted at Mais House, and demonstrates that the Tall Buildings policy carries no weight.		
Residents of Sydenham Hill	3	LWA	The reason given in the Lewisham Local Plan Appendix 2, para 6.8, is not convincing, that it would simplify the system if the designation were changed from ASC to ASLC, and appears to have no basis in terms of the importance given to the ridge by Natural England and by the GLA when it designated Sydenham Ridge as an Area of Special Character, “ which comprises a topographical feature where tall or bulky buildings would affect the landscape and local residential amenity “ (Lewisham Core Policy 17, the protected vistas, the London panorama and local views, landmarks and panoramas 2011 version) due to its “unique contribution to London”.	Noted. Following a review of the designations it is proposed to include Sydenham Hill Ridge as an ASLC in the Regulation 19 document. It is considered that the draft Local Plan Part 2 policies on Building Heights and Views, in combination with the designation of Sydenham Hill Ridge as an ASLC, will provide appropriate policy protection for the character, landscape and topographical features of the ridge.	Local Plan amended to include Sydenham Hill Ridge as an Area of Special Local Character
Residents of Sydenham Hill	3	LWA	We strongly oppose any change to the ASC designation. The area of this designation however could be improved to extend it, so that it covers the entire Sydenham Hill Estate, and also ideally across the Lammas Green conservation area to go as far as the Horniman sites of borough importance.	Noted. Following a review of the designations it is proposed to include Sydenham Hill Ridge as an ASLC in the Regulation 19 document. It is considered that the draft Local Plan Part 2 policies on Building Heights and Views, in combination with the designation of Sydenham Hill Ridge as an ASLC, will provide appropriate policy protection for the character, landscape and topographical features of the ridge.	Local Plan amended to include Sydenham Hill Ridge as an ASLC.
	3	LWA Key spatial objectives	I am writing in response to the Consultation on the Lewisham Local Plan (closing date April 11th 2021). Regarding the Lewisham West section of the draft plan, I note the proposal to: <i>“Transform the South Circular (A205) and Brockley Rise / Brockley Road (B218) into ‘healthy streets’ with public realm improvements that make walking, cycling and use of public transport safer and more convenient”.</i> Feeding into the B218 is the B2142 (Drakefell Road) which seems to have been omitted from the draft local plan. Lewisham council will recall that there has been a very long standing campaign by local residents regarding Drakefell Road. It is a residential road that suffers from traffic entirely unsuitable for a road of this nature. It is used by a large number of vehicles as a rat run to avoid heavy traffic on the A2 and A20.	The Local Plan does not rule out streets being part of the Low Traffic Neighbourhoods. We will pass on your comments to the Transport team.	No change.
	3	LWA Site Allocations	Please provide your comments on the site allocation(s) selected above. It seems excessive to have 3 separate sites in Forest Hill so close together. This will block views, create noise pollution due to works, increase traffic on the A205/more congestion at the bend to Forest Hill station which is dangerous. This is already densely populated area of Forest Hill. Lewisham Council suggest that the sites are mainly currently retail sites; that's simply not true; Perry Vale @	The London Plan provides a general direction that new development should be focussed within and around town centres and other highly accessible locations, amongst other locations. The Local Plan helps give effect to this approach through the spatial strategy for the borough. The Local Plan Part 2 policies set out requirements on design and will help to ensure that development proposals respond positively to the site and neighbourhood context. The	No change.

			Waldrum Park Road & Waldrum Crescent are heavily residential already and would be surrounded by these new sites.	West Area site allocations will support the delivery of the spatial strategy along with the long-term vitality and viability of Forest Hill district centre; they include development requirements and guidelines specific to the local context.	
Brockley Society	3	LWA 01	Brockley Road and new development/intensification Given the declared vision (LWA1 c, p757) that new development be directed to the main corridor of Brockley Road (B218) it is highlighted that those areas lying within the Brockley CA should be exempt from this requirement. In particular, the rows of shops and commercial property situated between: ^ Brockley Cross and along Brockley Road to Harefield Road ^ Wickham Road to Adelaide Avenue (known as 'Mid-town Brockley') should be excluded and that reliance on the assessment of future development should still be made via the Brockley CA SPD and the application of Article 4 Directions.	Noted. It is considered that the presence of a Conservation Area should not preclude development from coming forward. Sensitively managed intensification can be achieved where development conserves and enhances the significance of heritage assets and their setting, in line with national planning policy. The Local Plan makes clear the importance of the historic environment, and this is set out in Policy LWA1 and Part 2 policies (Heritage). Where there are heritage assets within or along the corridor, the policies will help to ensure that any such intensification is appropriate to the local context. The Local Plan must be read as a whole. The making of Article 4 Directions is outside the scope of the Local Plan.	No change.
Brockley Society	3	LWA 01	Page 737, paragraph B: We would suggest the following amendment: <i>Development proposals must respond positively to the character and heritage value of established residential areas...</i>	Noted.	Local Plan amended as suggested.
Brockley Society	3	LWA 01	Page 738, paragraph E: We would suggest the following amendment: <i>The sensitive intensification of established residential neighbourhoods will be supported where new development responds positively to their distinctive local character, including the landscape setting and any conservation area or other heritage assets.</i>	Noted.	Local Plan amended to refer distinctive local and historic character.
Brockley Society	3	LWA 01	Page 739, additions to paragraph J on page 738: For the reasons mentioned above, please add the following: <i>d. Lewisham Alterations and Extensions SPD (2019)</i> <i>e. Where applicable, conservation area Character Appraisals and SPDs</i>	Disagree. Select SPDs are mentioned within site allocations where they are directly relevant to the site.	No change.
HopCroft Neighbourhood Forum	3	LWA 01	This policy does allude to the historic landscape character : <i>"The historic landscape character, including woodland and topography, is also a defining feature of the West Area, which was once covered by the Great North Wood. Proposals will be expected to maximise opportunities to integrate urban greening to respond to and connect the remnants of the woodland, along with protecting and enhancing important views and vistas. "</i> However, without explicit mention and highlighting on the map, it is not clear what this clause is referring to, especially to those who do not know the area. This must be better explained and the cutting must be explicitly mentioned. (See recommended text below) Clause B must say it will not support development of the historic area of special local landscape.	Buckthorne cutting – identified as MOL and is therefore offered the highest possible protection.	No change.

			<p><i>The Buckthorne Cutting in Crofton Park formed part of the hamlet of Brockley Green, a name which has since disappeared from Ordnance Survey maps. It sat immediately adjacent to the area identified as being part of the 'Great North Wood' living landscape. The Great North Woods once stretched across the high ridge of land between Deptford, Selhurst and Streatham. It forms the western green infrastructure spine, connecting to the middle spine along the Catford Loop railway corridor. Between 1805 and 1809 the Croydon Canal was built and at Brockley Green/Buckthorne Cutting it reached its highest point (reported to be at 150/160 feet above sea level). The steep hill may explain why this section of woodland (Gorne Wood as it was named in 1600, to the the arrival of the canal in 1805) remained as a remnant of the Great North Wood. It currently sits above the level of surrounding roads, houses and rail sides.</i></p>		
HopCroft Neighbourhood Forum	3	LWA 01	<p>Clause J states: <i>"The Council has prepared evidence base documents and planning guidance to assist with understanding of the distinctive characteristics of the neighbourhoods and places within the West Area, and to help ensure coordination in the delivery of new ..."</i> Where is this? How does it reference the non designated heritage areas and the cutting of special local landscape character?</p>	<p>The Council has prepared a number of studies to inform the preparation of the Local Plan, including the Lewisham Characterisation Study, Open Space Assessment and Sites of Importance for Nature Conservation (SINC) review. These are available on the Council's planning webpages.</p>	No change.
Sydenham Society	3	LWA 01	<p>LWA1 West Area Place Principles (p737) Comment: These are supported</p>	<p>Support noted.</p>	No change.
Telegraph Hill Society	3	LWA 01	<p>If the current the split of the Telegraph Hill Conservation Area between North and West Areas is to continue, then it is important that the policies here are consistent, as far as the Telegraph Hill Conservation Area is concerned, with those of the West Area. In particular, the following policies are equally applicable to the North Area part of Telegraph Hill as they are to the West Area part. LWA1.B "Development proposals must respond positively to the character of established residential areas. This includes the historic character of the area's neighbourhoods, and particularly their town centres which are defined by their Victorian shopping parades and make an important contribution to local distinctiveness." LWA1.J Small site guidance generally. It would be wholly illogical to apply different policies to differing parts of the Telegraph Hill Conservation Area merely because they have been arbitrarily assigned to different Areas despite identical characterisations. It should also be considered that similar policies should apply to the Hatcham Conservation Area whose characteristics are similar to those of Telegraph Hill and Brockley. 243. An SPD or design guide on the Haberdashers' Estate (incorporating both the Telegraph Hill and Hatcham Park Conservation Areas) should be produced in order to ensure that this consistency of approach is not lost by virtue of the arbitrary North/West split. We would be very happy to work with the Council on an SPD or design code covering Telegraph Hill and have details of window designs, paths,</p>	<p>Noted. The character areas or sub-areas in the Local Plan were informed by the Lewisham Characterisation Study, and provide a helpful means of providing policies at a more granular or neighbourhood area (rather than borough-wide) level. The Local Plan must be read as a whole for planning decisions, which is clearly stated in Part 1 of the plan.</p> <p>It should be noted that the Local Plan Part 2 Policies on Heritage are borough-wide policies including for Conservation Areas. These will help to ensure consistency of approach in planning decisions for CAs.</p> <p>The Council will consider the preparation of future SPDs to support the implementation of the Local Plan, taking into account resources available and key priorities areas to support the delivery of the spatial strategy. For Conservation Areas, the Council has and will continue to prepare a suite of Area Appraisals which provide additional guidance.</p>	No change.

			ironwork, original ornamentation, materials and similar considerations already available. 244. For our comment on § 15.59, see paragraph 234 above.		
Tewkesbury Lodge Estate Residents Association	3	LWA 01	We welcome the recognition of the woodland heritage that is highlighted in Lewisham's Plan for its West Area (The Lewisham Plan page 733) , and we are glad that proposals for development will be expected to "integrate urban greening to respond to and to connect with the remnants of the woodland" (I.e. the Great North Wood (The Lewisham Plan p 737)	Support noted.	No change.
	3	LWA 01	Do you have any comments on the proposed approaches for the area? Select topic(s) and comment below. (LWA1 West Area Place Principles) The suggestion the A205 will become a 'healthy street' is just not plausible. Lewisham Council have already admitted the South Circular on the station approach @ Forest Hill will get worse in October when low emissions zone extended as it's not included. Additionally, if you do nothing to divert the traffic at the blind bend where traffic is invariably queuing due to the traffic lights, this congestion will increase & traffic pollution will get worse not better. If Perry Vale is pedestrianized, the traffic will just be pushed on to the A205. How can that be a healthy street?	Whilst recognising the extent of the current ULEZ, the Council's position is that this should be extended beyond the South Circular and it will continue to lobby the Greater London Authority and Transport for London for this. The Local Plan seeks to give effect to the London Plan Healthy Streets Approach, including on the A205, however it is recognised the wording around this could be made clearer. The Council will continue to engage with GLA/TfL to deliver improvements to the environment and access around the junction at Forest Hill station, and along the A205, taking into account the feasibility and scope for measures on the major London roads. Even smaller measures using the Healthy Streets approach can have beneficial impacts on human health and the environment.	Local Plan amended to clarify terminology on the objective and principles to transform the A205 using the Healthy Streets Approach.
Discourse Architecture	3	LWA 01	<i>6. Enable the delivery of new workspace and housing along with enhancements to the Forest Hill station approach through the renewal of industrial land at Perry Vale and Clyde Vale, as well as the redevelopment of sites around the station. (p737)</i> Comment: Forest Hill station and its environs are currently under-developed and unattractive, with poor quality public spaces. The enhancement to the Forest Hill Station approach is supported. However, the reliance on piecemeal development of the key central sites will fail to deliver the comprehensive redevelopment required to deliver a high-quality public realm and regeneration of the town centre. The fundamental problem that hinders positive urban development in Forest Hill, as well as much of the Borough, is that inherited road and rail infrastructure forms a physical barrier to movement by vehicles and pedestrians, dividing the area. The current quality of this environment is poor, and a bolder approach is required to deliver the aspirations of local people, the Mayor of London's Healthy Streets initiative and the Mayor's New Plan for London.	We understand the concern regarding piecemeal development and would require a comprehensive masterplan to be prepared as part of any application coming forward. We acknowledge the issue of traffic through Forest Hill and will work with TFL to see how improvements can be made.	No change.

			<p>The compartmentalized nature of sites around the station is a consequence of these barriers. A masterplan has been commissioned by the Council for Bell Green and Lower Sydenham, which is comprised of neighbouring sites under different ownership or tenure. The fragmented character of the sites around Forest Hill station makes the need for a coordinated vision for redevelopment more compelling. Without a Council commissioned urban plan, the challenge of creating transformative connections across the current road and rail barriers can never be adequately met.</p> <p>The local plan should require that a masterplan is developed building on the vision of the Forest Hill Society and Discourse Architecture proposals. A masterplan for the town centre could capitalize on the high footfall to the station and promote mixed use densification of the site appropriate to its location. Without a governing vision for the area, piecemeal development will continue to be unsatisfactory and fail to deliver the economic and social potential that local people demand. The local plan should be ensuring that development is within a framework that benefits local people. Failing the commission of a masterplan for the town centre, the Discourse Architecture / Forest Hill Society masterplan should be adopted as Supplementary Design Guidance for the future development. Following the issue of the New Mayor's Plan for London and consultation with Lewisham Planners, TFL and Network Rail, the DA/Forest Hill Society masterplan should be updated to include increased density of development and the redevelopment of the station on its existing site, rather than on the adjoining site.</p>		
Forest Hill Society	3	LWA 03	<p>Cultural Heritage Issues Commentary on Chapter 18 – Lewisham's West Area</p> <p>LWA3 – A The Forest Hill Society supports the Lewisham Plan the following: “Development proposals should contribute to securing the long-term vitality and viability of Forest Hill district town centre by enhancing the place qualities of the centre and its surrounds, as well as reinforcing its role as a key focal point for commercial, cultural and community activity.”</p> <p>As a district town centre within Lewisham, Forest Hill is an economic engine for growth, prosperity and jobs for the wider community. The town centre offers a mix of high street shops interspersed with a number of independent retailers, many based around both lifestyle and culture. The area attracts a range of businesses. The area's attraction extends into the evenings with a range of restaurants and pubs attracting visitors from across the Borough and neighbouring areas in Southwark and Bromley. This in turn attracts residents who benefit from this range of local business and services as well as fast access to central London.</p>	Support noted.	No change.
Forest Hill Society	3	LWA 03	<p>LWA – C The Forest Hill Society supports the proposal that:</p>	Support noted.	No change.

			<p>“Development proposals must contribute to enhancing the public realm in order to promote walking and cycling, as well as to make the town centre a significantly more accessible, safer and attractive environment.”</p> <p>The continuing success of Forest Town Hill as a district town centre, cultural quarter and area of local significance of night-time economic activity is at risk due to poor access for pedestrians in the surrounding road layouts and with access to and from the rail station. Therefore, we would invite the Council to give immediate consideration to those movements along main routes and station approaches within the responsibility of Lewisham Council and key transport partners Network Rail and TfL. This includes:</p> <ul style="list-style-type: none"> ● Improving the pedestrian crossing at the junctions of the South Circular, Dartmouth Road and Devonshire Road. ● Improving the access to Forest Hill Station on the east side/Perry Vale entrance. This is wholly unsuitable for users with mobility issues or for families with small children or infants. ● Improving accessibility to the underpass connecting the existing town centre to Perry Vale shops and parking. ● Install a suitable pedestrian crossing at, or very near to the Perry Vale entrance of the station to cross Perry Vale. ● Cycle access on north/south and east/west routes into Forest Hill town centre. ● Improving the public realm. 	<p>We will pass your more detail transport comments onto our Transport team.</p>	
Forest Hill Society	3	<p>LWA 03</p> <p>LWA SA 05</p> <p>LWA SA 06</p> <p>LWA SA 10</p> <p>LWA SA 11</p>	<p>Forest Hill Station & Town Centre Master Plan: Objectives and Aspirations: Areas 5, 6, 10 & 11</p> <p>This addresses <i>LWA3 Forest Hill district town centre and surrounds</i> and the site allocations defined for <i>Lewisham’s West Area</i>. Specifically, for Site Allocations 5, 6, 10 and 11, while proposed as separate site allocations, we feel it important these should be developed with a single vision as these sites are interconnected particularly as part of the district town centre.</p> <ol style="list-style-type: none"> 1. A proposal characterised by, <i>“We have a once in a 100 years’ opportunity to shape the centre of Forest Hill, reflecting the needs and aspirations of people that live and work in the area.”</i> 2. A significant opportunity for Public Realm visual enhancement that enhances and highlights the approaches to Forest Hill station on both the east and west side. 3. Develop transport links for the town centre and improve connections across the existing disparate parts of the centre. This should include enhancement to cycle routes with upgrades to the existing Sydenham Park footbridge and potential for examining the feasibility of an additional footbridge that will serve as a link between the Perry Vale car park and Dartmouth Road/London Road to provide a safer, more accessible and friendly access to Forest Hill Pools and the introduction of improved bus services that will enhance the visitor access experience to the Town Centre. 	<p>Whilst the Local Plan is a strategic policy document we have included design requirements and guidelines to guide development proposals coming forward. We accept that a masterplan for Forest Hill and indeed a number of other locations within the borough which are accommodating significant levels of growth would be beneficial.</p> <p>The Council has limited resources and capacity at present but will continue to review this situation.</p>	<p>No change.</p>

			<p>4. Redevelop the station building and expand its footprint with re-provision of retail and commercial space and upgrade the station to step-free level access for all platforms.</p> <p>5. Improve the station forecourt combined with a radical new layout of the Dartmouth Road/London Road/Devonshire Road junction and pedestrian crossing inclusive of the removal of the buildings containing WH Smiths, the bookmaker premises and the dental surgery with businesses being re-provisioned within the station redevelopment.</p> <p>6. Create a new level-access entrance to the station in the Perry Vale car park.</p> <p>7. Transfer dedicated parking for the station from the station forecourt to the Perry Vale car park.</p> <p>8. Introduce the opportunity to provide an estimated equivalent of up to 400 new housing units that are sensitively sited and of high-quality design. These numbers align well with the LLP's estimates for the West Site Allocations 5. Station West (86), 6. Clyde Vale (15), 10. Station East (41) and 11. Perry Vale (122) which estimated close to 300 expected units.</p> <p>9. Introduce an estimated 3,062 m² (sqm) commercial floor space with an equivalent volume of 9,291 m³ (cubm).</p> <p>10. Upgrade the existing car park on Perry Vale to conform to ACPO and Home Office Scientific Development Branch standards for a secure car park status with good quality design, improved lighting, controlled access and CCTV coverage.</p> <p>11. Introduce measures supported by policy to install rapid-charge points for EVs in Perry Vale carpark and other publicly owned car parks.</p> <p>12. Develop proposals that enhance connections from the Perry Vale side of the station to the town centre redevelopment along with the introduction of significantly elevated measures for greening (trees and shrubbery in particular) in keeping with several other principles defined in the Local Plan.</p>		
Forest Hill Society	3	LWA 03	<p>LWA3 – B</p> <p>The Forest Hill Society fully supports the proposal to designate the town centre as a cultural quarter and as an area of local significance of night-time economic activity, in line with Policy EC18 (culture and night-time economy). While the plan focuses on the twin anchors of the Horniman Museum and Havelock Walk, the area has additional attributes that add value to this designation and should be considered towards this.</p> <ul style="list-style-type: none"> ● Heritage and culture are interlinked, and the area includes several conservation areas including Forest Hill in the town centre and Perry Vale and the Christmas Estate adjacent to the town centre. ● The area includes exceptional Victorian and Edwardian architecture including on Dartmouth Road Louise House, the community-run Forest Hill Library, Forest Hill Pools and Holy Trinity Church of England Primary School (all listed buildings). 	Noted. This is too detailed for the Local Plan but could feed into any Cultural strategy or masterplan for the area.	No change.

			<ul style="list-style-type: none"> ● Efforts should be made to identify further buildings which contribute to Forest Hill’s cultural heritage and support the night-time economy. This may include special designation for pubs that lie in the district town centre. ● Retail operations in Forest Hill reflect the cultural mix of Forest Hill with stores based on art, crafts, music and heritage goods (antiques). ● The town centre benefits from a wide range of restaurants and pubs, which cater for a wide range of demographics both within Forest Hill and Lewisham and to visitors who will come to the area for its cultural activities. ● Outdoor leisure activity is also offered in and adjacent to the town centre with the Forest Hill Pools, Albion Millennium Green, Horniman Gardens and Sydenham Hill Wood. All of these offers links to both the areas heritage and cultural history of Forest Hill. 		
Sydenham Society	3	LWA 04	<p>LWA4 West Lewisham Links (p747)</p> <p>Comment: These are supported</p>	Support noted.	No change.
Forest Hill Society	3	LWA Key spatial objectives	<p>The Society fully supports the above noted Spatial Objectives 2, 4, 6 and 9.</p> <p>Though to achieve Objective 4, there are necessary and significant alterations needed to pedestrian movement around the Town Centre. This includes improving the existing poor access for pedestrians in the surrounding road layout and to and from the rail station. Rectifying this would contribute to the areas’ place as a Community Hub, plus development of commercial and employment opportunities.</p> <p>We invite the Council to acknowledge that adoption of the Forest Hill Station and Town Centre Master Plan (Master Plan) will constitute a major contribution to workspace and housing creation in Forest Hill. The Master Plan was created through a community consultation and carries significant community endorsement. It warrants adoption into the Lewisham Local Plan.</p> <p>In line with Objective 9, the Society is strongly committed to both Environment and Greening issues. We recommend the Council include additional opportunities for local engagement in the identification of designation of new Local Green Spaces. This will deliver both short and medium term successes culminating in both walking and cycling improvements that will be made more enjoyable for residents and visitors.</p>	<p>Support noted.</p> <p>The Local Plan sets out the Council’s strategic framework to facilitate Good Growth within and around Forest Hill. Officers have reviewed the community-led masterplan, and consider that the Local Plan reflects the broad aims and principles of this. However it is recognised that there are feasibility and financial viability issues which may preclude or complicate the delivery of some elements of the masterplan (for example, those dealing with strategic infrastructure such as the A205 and Forest Hill Station / station approach), and they have not therefore been incorporated into the Local Plan.</p> <p>Following the Regulation 18 consultation, the Council has prepared additional evidence base studies on Open Space taking into account feedback received. The Local Plan also encourages Neighbourhood Forums to identify new Local Green Space in neighbourhood plans.</p>	No change.
Lewisham Cyclists	3	LWA Key spatial objectives	<p>Page 735 Key Spatial Objective 8 in the main document refers to “Transform the South Circular (A205) and Brockley Rise / Brockley Road (B218) into ‘healthy streets’” . We would suggest the wording of this is altered to “adopt the healthy streets approach along the South Circular (A205) and Brockley Rise / Brockley Road (B218) corridor” and encourage the planning team to follow TFL guidance on this which is clear and unequivocal. This should also form part of the strategic planning document for the whole corridor, and form conditions of planning along the</p>	Noted. Local Plan Part 4 deals with funding and delivery and signposts that S106 may be used for Healthy Streets measures.	Local Plan amended to clarify terminology on the objective and principles to transform the A205 using the Healthy Streets Approach.

			corridor, including CIL contributions to part fund improvements.		
	3	LWA Key spatial objectives	Lewisham West Area Do you have any comments on the proposed key objectives? Three sites at Forest Hill seems excessive. The areas around here have shops yes, but there are residential flats above all of these as well as various existing flat conversions/apartment blocks, along Waldram Park Road/Crescent. The suggestion the area will also now be a 'night-time' hub is concerning to existing residents due to noisy pub goers making their way home. Pre-pandemic, we frequently had incidents of urinating in our apartment block's bin store and individuals trying to gain access to our flats (heavily intoxicated). A night-time hub is not wanted by residents. There are enough pubs/restaurants already.	Noted. The Council has undertaken numerous studies, including a Strategic Housing Land Availability Assessment, to identify sites suitable for development in order to meet the Borough's identified needs for housing and commercial space. The West Area of the Borough has a comparatively limited number of site allocations (potential development sites) and housing capacity when compared to other sub-areas, such as the North, Central and South. It is considered that the sites identified for Forest Hill are deliverable and will support the spatial strategy. The proposed designation of Forest Hill as an area of local significance for the evening and night-time economy both reflects and seeks to build on the town centre's existing character and function in supporting such complementary activities, and will help to support its long term vitality and viability. The Local Plan includes a refreshed suite of policies to help ensure that local amenity is protected.	No change.
Discourse Architecture	3	LWA Key spatial Objectives	Discourse Architecture prepared the 'Forest Hill Urban Renewal' masterplan for the centre of Forest Hill in consultation with the Forest Hill Society in 2017 18 LEWISHAM'S WEST AREA (p733) Key Spatial Objectives (p737) Comment: These are supported	Support noted.	No change.
Sydenham Society	3	LWA SA 09 LWA SA 12 LWA SA 13	Site Allocations (p751) <i>9 Willow Way LSIS</i> <i>12 Land at Sydenham Road and Loxley Close</i> <i>13 113-157 Sydenham Road</i> Development proposals for the above sites should be made within the context of a fully consulted-upon Masterplan and should conform to the design-led approach. Any future development on the site at 113-157 Sydenham Road should be very carefully considered, given the proximity of the locally listed Dolphin public house and garden. The principal current use of a car dealership affords an open aspect across this corner of Mayow Road and Sydenham Road with attractive views of the west-facing gable end of the pub. On the eastern side of the site, Berrymans Lane consists of a unique terrace of brick-built cottages which should be preserved.	The draft Local Plan sets a spatial planning framework the borough and West Area, which all development proposals on these sites will be required to respond positively to. The Regulation 18 stage consultation has provided the opportunity for the public to comment on the proposals for this spatial framework. The draft Local Plan Part 4 sets out that strategic site allocations should be accompanied by a site-wide masterplan, which supports the delivery of the spatial strategy. The Local Plan is clear that all new development must be delivered using the design-led approach. Site Allocation for 113-157 Sydenham Road includes development requirements for protecting the public house and its amenity.	113-157 Sydenham Road site allocation amended by referring to the gable end of the pub and the terrace on Berry Man's Lane.
	3	LWA SA 01	With regard to the proposals at 111-115 Endwell Road, I would repeat some of the above statements. The development of employment premises and homes on the Endwell Road/Brockley Cross Howarth Timber site should not add any traffic at all to the already congested junction at Brockley Cross. The development should be promoted as carbon neutral with access exclusively by public transport or non-carbon modes to meet the needs of the climate emergency we are now in. The buildings should	Noted. The Local Plan broadly seeks to promote modal shift away from private car use to movement by walking, cycling and use of public transport. Car parking provision on the site will be considered having regard to the maximum parking standards set by the London Plan. The Local Plan Part 2 policies on sustainable design and infrastructure set out requirements for minimising carbon emissions. The site allocation development guidelines refer to the	No change.

			be of a human scale to not greater height (2-3 storeys) to the nineteenth and twentieth century buildings on adjacent streets. Lewisham Gateway is a site of tall buildings; the Brockley Cross area must not be.	need for development to respond positively to the site surroundings, including established residential buildings.	
Forest Hill Society	3	LWA SA 03	<p>Site Allocation 3 Jenner Health Centre</p> <p>We support the inclusion of this site as an area of opportunity, and we emphasise the need for appropriate re-provision of the existing health care facility on the same site.</p> <p>We also recommend that road access to parking for the health care facility be carefully considered. Current road access is inside the new ULEZ boundary. Future road access should be considered from Stanstead Road to not financially penalize patients who require vehicle transport.</p>	<p>Support noted. The site allocation for Health Centre will enable the facility to be reprovided at the current site as part of a new mixed-use development. Any proposal for off-site re-provision would only be considered where other Local Plan policies on community infrastructure are satisfied.</p> <p>Whilst recognising the extent of the current ULEZ, the Council's position is that this should be extended beyond the South Circular and it will continue to lobby the Greater London Authority and Transport for London for this. Additional requirements as suggested are considered to be inconsistent with this position. To avoid repetition and to aid implementation of Policy TR4, references to the level of car parking required have been removed.</p>	No change.
HopCroft Neighbourhood Forum	3	LWA SA 03	We support recommendation for Jenner Health Centre development	Support noted.	No change.
NHS (HUDU)	3	LWA SA 03 LSA SA 05	We support the site allocations for Sydenham Green Group Practice and Jenner Health Centre. As the SELCCG and wide health sector review future needs in light of the challenges of the pandemic, the recently established Primary Care Networks and the South East London Integrated Care System (ISC) ongoing discussion with the Council as the local planning authority is welcomed. This will include identifying areas where additional or expanded capacity is required, and where existing facilities may need to change to provide modern affordable facilities.	Support noted. The Council has and will continue to engage with the NHS and other stakeholders to identify and plan for health care provision to meet local needs through the Infrastructure Delivery Plan, which sits alongside the Local Plan.	No change.
NHS Property Services	3	LWA SA 03 Call for sites	<p>Site Allocations</p> <p>NHSPS is the freehold landowner of a number of health facilities in Lewisham. Discussions have previously taken place in support of the following draft site allocations:</p> <p>3. Jenner Health Centre, 201-203 Stanstead Rd, London SE23 1HU</p> <p>A site submission was also made for South Lewisham Health Centre, 50 Conisborough Crescent, SE6 2SS, however no draft allocation appears for this site in the consultation document.</p> <p>Our representations review both sites in turn, taking account of proposed, and potential land use allocations.</p>	We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change.
NHS Property Services	3	LWA SA 03	<p>3. Jenner Health Centre</p> <p>The draft allocation for Jenner Health Centre is for a comprehensive mixed-use redevelopment of the existing health centre with residential and community uses. NHSPS support this allocation in principle and wish to make the following comments.</p>	Support for Jenner Health Centre site allocation noted. However, it is not considered necessary to amend the policy as suggested, as development proposals involving the redevelopment and rationalisation of the existing facility would also be considered against Policy CI1, which is referred in the development guidelines.	No change.

		<p>Jenner Health Centre is an existing operational purpose-built health facility dating from the 1970s. The existing building occupying the site comprises c. 2,000 sqm GIA of Class E health centre space, formerly D1. There have been extensions to the original building occurring in the 1990's and the existing building is considered to be of no architectural merit. The facility is outdated and in need of investment to meet the level of patient care required, now, and in the future.</p> <p>While the site is well used, it is currently underutilised in terms of development capacity and represents a good opportunity to improve the public realm, while providing an intensified mixed-use health led development, and housing.</p> <p>The site itself is in the freehold ownership of NHSPS and we have been working to understand development potential in light of health care requirements. NHSPS therefore support the proposed allocation of this site in principle and given the context, close to the surrounding centres, there is potential to increase the existing land use density and height. This would make way for a high-quality building with a new health centre and much needed residential dwellings. The residential element of this site will allow for investment in the new healthcare buildings and services for the community.</p> <p>The current aspiration is to redevelop the existing healthcare facility, with enabling residential development funding new and improved healthcare facilities and the NHS requires that sufficient value be generated to do this. An assessment will be made to help establish a reasonable development quantum and type of development to ensure the NHS can deliver a new healthcare facility. The greater the sites development potential, the greater value can be derived for investment in essential health services. NHSPS therefore support the acknowledgement that this site can be intensified.</p> <p>In summary, NHSPS support the principle of the proposed redevelopment of the site and seek to ensure that the site is allocated within the New Local Plan.</p> <p>Whilst there is an active healthcare need and demand on this site, with plans progressing to improve facilities, the NHS does require flexibility in its estate. Therefore, to guarantee the allocation is sound, by being sufficiently flexible, the allocation should also allow for a residential use only, if the healthcare services can be re-provided elsewhere. Any relocation would involve improving services, potentially co-located/integrated with other uses and in a more accessible location in accordance with commissioning requirements. To achieve this, a suggested amendment is provided below:</p>		
--	--	--	--	--

			<p>Site allocation: Comprehensive mixed-use redevelopment of existing health centre with enabling residential and community uses, or residential only, if the existing services are relocated within an alternative healthcare facility in the wider area.</p> <p>Any relocation of services would need to be thoroughly assessed and ultimately approved by commissioners. This process would also be in accordance with Core Strategy Policies CS19 (Provision and maintenance of community and recreational facilities) and CS20 (Delivering educational achievements, healthcare provision and promoting healthy lifestyles). This would also correspond with the objectives of London Plan policies S1 (Developing London's social infrastructure) and S2 (Health and social care facilities) which seek to ensure enhanced and improved social infrastructure is delivered in London.</p>		
	3	LWA SA 03	<p>Unfortunately I can't make the zoom meeting tonight but I would like to know more about the planned development for The Jenner Health centre. It is in need of development and could provide a lot of homes. However, the site is very polluted because of the traffic junction at brocket rise/A205. I believe this area was responsible for the pollution that caused Ella Kissi Debrah's tragic death. Do you have monitoring at this site?</p> <p>What sort of housing is planned for the site? I heard it might be sheltered housing for vulnerable people who are most affected by air pollution. How will you protect them from high levels of air pollution?</p> <p>Will there be car park space for residents? How will you ensure the development doesn't contribute to raised air pollution levels here in the short and long term?</p> <p>During recent roadworks 19-22 Feb, traffic was diverted down St Germans road. It was interesting to see there was very little build up of traffic here as cars could access the A205 without queuing and homes are further away from the road here. Is there a way of diverting traffic from queueing at Brockley rise that wouldn't adversely affect air pollution on the alternative routes?</p>	<p>Noted. The Local Plan broadly seeks to promote modal shift away from private car use to movement by walking, cycling and use of public transport. This approach is set in the context of improving poor air quality, and the A205 is an Air Quality Management Area. Car parking provision on the site will be considered having regard to the maximum parking standards set by the London Plan and the Local Plan Policy TR4. The nature of housing provision, including tenure type and dwelling mix, will be considered at the planning application stage, having regard to the Local Plan Part 2 Housing policies.</p> <p>Traffic diversion schemes are beyond the scope of the Local Plan.</p>	No change.
Discourse Architecture	3	LWA SA 3	<p>Comment:</p> <p>We support the proposed redevelopment of the site to provide housing and re-provision of the health centre. Given the scale of existing buildings on Brockley Rise and St Germans Road, which is higher than on Stanstead Road, we would support a maximum height of development as follows:</p> <p>Stanstead Road: 3-4-storeys</p> <p>Brockley Rise: 3-4-storeys</p>	<p>Support noted.</p> <p>Following the Regulation 18 consultation, additional work on the Tall Buildings Study has been undertaken to inform the Local Plan policies on buildings heights.</p>	Local Plan amended with more detailed requirements on buildings heights, informed by the Tall Buildings Study update.

			<p>St Germans Road: 3-4-storeys</p> <p>We do not support higher development in the centre of the site</p>		
	3	LWA SA 04	<p>Regarding the above proposed development of up to 30 residential units, could you please indicate how any re-development might impact on the existing residents of the Havelock House estate. I realise that things are at a very early stage, but as a resident of Havelock House, I have some concerns as to how this might impact on the all the residents of Havelock House and its 2 other blocks on the estate.</p> <p>I look forward to hearing from you.</p>	The site allocations has been removed from the Plan	Havelock House, Telecom Site and Willow Tree House site allocation has been removed from the Plan.
Forest Hill Society	3	LWA SA 04	<p>Site Allocation 4 Havelock House, Telecom Site and Willow Tree House, near Horniman Drive</p> <p>We recognise that there is potential for development on this site but we have concerns about possible impact on existing trees and small woodland area at the rear of the site. Consideration should be given to additional TPOs on this site to recognise the importance of this site, while leaving other space for potential development.</p>	Agree that redevelopment of the site would result in the loss of green infrastructure, so the site has been removed from the Plan	Havelock House, Telecom Site and Willow Tree House site allocation has been removed from the Plan.
Tewkesbury Lodge Estate Residents Association	3	LWA SA 04	<p>We have carefully considered the proposal for “The Havelock House/Telecom Mast Site / Willow Tree House Site” but at present we feel that we must oppose it for the following reasons. We think that in its present form the proposal is contrary to many of the principles that are set out in the Council’s Development Plan.</p> <p>1. Green space. Within the Green Infrastructure (Section 10) section of the plan is the statement that “The Council will seek to deliver net gains in biodiversity (and support the London Plan to be 50% green by 2050”. More specifically for the West Area, Point 9 of the objectives is to "Protect and enhance open and green spaces along with the distinctive woodland character of the area” . The proposed development of The Telecom Site will reduce the area of green space within the Borough by more than any other proposed site mentioned in the development plan for Lewisham West, and possibly by more than any other proposed site in the plan for the whole of Lewisham.</p> <p>2. The Great North Wood. The Development Plan for the West Area makes welcome reference to remnants of the Great North Wood that can still be seen in Forest Hill (see paras 18.2, 18.8, 18.9, 18.13). These remnants form a wildlife corridor between Sydenham Woods and One Tree Hill, both of which are recognised as Nature Reserves in the London Borough of Southwark. The proposed development site is one of the best parts of the Great North Wood that we have in Forest Hill, and for that matter in Lewisham. The Council should make sure that it retains not only all the Oak trees on the skyline but also the other areas of natural woodland that lie below, between The Telecom Mast and both Willow Tree House and Havelock House. Wildlife habitats. On page 368 of the Plan is the statement in para 10:11 that “It is imperative</p>	Agree that redevelopment of the site would result in the loss of green infrastructure, so the site has been removed from the Plan	Havelock House, Telecom Site and Willow Tree House site allocation has been removed from the Plan.

		<p>that wildlife habitats are protected and appropriately managed so that their special biodiversity value is maintained and, ideally, improved over the long-term.” The current wildlife value of the site is demonstrated by the following and recent observations.</p> <p>A pair of Peregrine Falcons bred there last summer. The Peregrine is at the top of the food chain, and “our” Peregrines would have preyed on small birds over the whole of the development site. A flock of 50 Redwing arrived from Scandinavia just before Christmas and 5 remained around the site until March. The site forms an important link in the wildlife corridor - see below.</p> <p>3. Wildlife corridors. As described in paras 2 and 3 above, the Oak trees on the development site are part of a wildlife corridor which traces the course of the former Great North Wood from Sydenham Woods to One Tree hill. Woodland birds still migrate along this corridor.</p> <p>In Spring there are Chiffchaff, Willow Warblers and Blackcap (regularly), Buzzard and Red Kite (occasionally) and Hobby and Firecrest (rarely).</p> <p>In late Summer there are Chiffchaff, Willow Warblers and Garden Warblers (regularly) and Pied Flycatchers (rarely).</p> <p>In Winter there are Redwing (regularly) and Brambling, Siskin and Redpoll (rarely)</p> <p>4. Biodiversity. Rare downland grasses, plants and invertebrates have been found on the nearby Honor Oak Road Reservoir Site, and a similar survey of the grassy slopes of the proposed development site would be prudent. We welcome the mention in the Plan of the need to survey all mature trees. However there are areas of hedge and scrub which add to the biodiversity of the site. For example they provide nesting sites for song birds which construct open nests, which are vulnerable to predation by squirrels and domestic cats. Blackbirds in particular have almost disappeared from our area.</p> <p>5. Net gains in biodiversity. We recommend that additional native trees other than Oak be planted on the proposed development site, partly to shield existing residents from the sight of the two masts that are on the site, but also to increase biodiversity. This would support the Council in its Plan “to deliver net gains in biodiversity (and support the London Plan to be 50% green by 2050)”. We are working with the Council to raise funds to plant native Hornbeam on the nearby Horniman Triangle to increase the biodiversity of our Great North Wood remnants: they are equally needed on the Telecom Site.</p> <p>Other concerns. As well as our concerns for the natural environment we also have the following concerns about the development of the site.</p> <p>1. If the Telecom Mast is to be retained, then the recommendations of the Stewart Report should be</p>		
--	--	---	--	--

			<p>followed, and local accommodation should not be built in close proximity to the Mast.</p> <p>2. Again if the Telecom Mast is to be retained, it would not be safe for a public footpath to pass close to such a potentially dangerous construction.</p> <p>3. Also, if the Telecom mast is to be retained it will not be possible to accommodate 30 residential units without radically changing the character of the site. According to The Plan's map, there is insufficient space for the construction of the 30 additional homes that are described in the plan, if they are to be built in the style of buildings already on the site and around it.</p> <p>4. Finally, the steep gradient of the site makes the creation of "the feel of a village green" (as described in the Plan) unrealistic.</p> <p>Conclusions</p> <p>We recognise that there is a pressing need for additional housing, and we know that the Council is obliged to meet the target of providing 1667 new homes every year. But the Council is also committed to "to deliver net gains in biodiversity (and support the London Plan to be 50% green by 2050)". On this site, which may be the greenest site in the Plan, we think that the needs of the environment should come first.</p> <p>For these reasons we urge the Council to remove the Telecom Mast, Willow Tree House and Havelock House from its Development Plan.</p>		
Discourse Architecture	3	LWA SA 05 LWA SA 10	<p>5 Land at Forest Hill Station west (Devonshire & Dartmouth Roads) (p760)</p> <p>10 Land at Forest Hill Station East (Waldram Place and Perry Vale) (p771)</p> <p>Comments on Sites 5, 10 & Forest Hill Town Centre & Station</p> <p>Further to our comments above on Lewisham's West Area - Key Spatial Objectives (p735), this critical area within Forest Hill should be subject to a masterplan, not left for piecemeal development. The public realm in the town centre is currently not fit for purpose. The Local Plan should establish a framework for redevelopment that promotes high quality buildings and public space on both sides of the railway.</p> <p>Forest Hill is currently divided by the heavy traffic of the South Circular and the rail line. The Local Plan should address these issues, which have a negative impact on the lives of local people. The pedestrian routes under the line via the existing station underpass and Waldram Crescent pavement should be improved and made more accessible.</p>	<p>Where there has been no advanced pre-application discussions the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of both sites including the need for an appropriate a mix of employment and town centre uses at this district centre site, whilst introducing residential uses and creating a sense of arrival into the district centre. -Based on these considerations, the residential units and employment floorspace have been amended for Land at Forest Hill Station West whilst they have remained the same at Land at Forest Hill Station East.</p> <p>Optimal capacity for the sites will be established at planning application stage through a design led approach.</p>	<p>Land at Forest Hill Station West and Land at Forest Hill Station East site allocations amended by making reference to masterplanning and landowners working in partnership.</p> <p>Land at Forest Hill Station West site allocations amended by reducing residential to 80 units and increasing employment floorspace to 801m².</p>

			<p>A new footbridge over the line, between Perry Vale and Clyde Terrace, could connect the east and west sides of Forest Hill and potentially link the residents of Perry Vale Ward with Forest Hill Pools. Improved residential links would create a more favourable commercial environment for the shops and restaurants at the north end of Perry Vale, which is currently cut off from the centre of Forest Hill.</p> <p>We believe that the density of development, in particular residential accommodation, could be increased in line with the new Mayor's Plan for London and the Forest Hill Society / Discourse Architecture master plan for the town centre.</p>		
	3	LWA SA 07 LWA SA 04	<p>Site Allocation: Featherstone Lodge, Eliot Bank and Havelock House, Telecom Site, Willow Tree House, Honor Oak Road</p> <ul style="list-style-type: none"> Both these sites are along the ridge of the Great North Wood, and retain its basic natural features of mature trees with grassland. They are an important part of the green corridor from Sydenham Hill Woods to One Tree Hill and are rich in local fauna and flora. These must be retained and enhanced as part of any housing development plan, along with ways to make it an inviting place for residents as set out above. London Wildlife Trust is an expert in these woodland habitats as it has managed the Sydenham Hill Wood nature reserve since the 1980s, and has run the Great North Wood project for the past 4 years. This has done much to develop the sense of integrity and history of the area and its value to the natural environment. I would urge the Council to work with the Trust to establish firm ground rules for developers, for these and any other development proposals along the ridge. 	<p>Disagree, Featherstone Lodge site allocation provides a variety of references to mature trees, natural landscaping and a tree survey, in order to protect the natural setting of the site.</p> <p>Agree that significant redevelopment of the Havelock House site and grounds may result in the loss of green infrastructure, so the site has been removed from the Plan</p>	Havelock House, Telecom Site and Willow Tree House site allocation has been removed from the Plan.
Sydenham Society	3	LWA SA 08 LWA SA 14 LWA SA 15	<p>Other sites listed: the former Sydenham Police Station in Dartmouth Road, 74-78 Sydenham Road and 154-158 Sydenham Road are all in the process of being built out.</p>	<p>Agree that the Sydenham Police Station site has been completed and that 154-158 Sydenham Road is nearing completion.</p>	Sydenham Police Station and 154-158 Sydenham Road site allocations have been removed from the Plan.
	3	LWA SA 08	<p>The Build at Site 8, The Former Sydenham Police Station of 33 units. This private development is virtually completed, I was surprised to find, having moved around the area very little during the Pandemic. What if any requirements were applied to the particular build by Lewisham Planning? What proportion of this private build is Affordable, what are the CIL costs payable to Lewisham Council and how will the CIL monies be used to contribute to improvements in infrastructure, environment or other local community improvements?</p> <p>The Build at Site 14, 154-160 Sydenham Road, another private development behind the main street frontages of 76 units near to Kent House Road. This is quite a large development. What, if any, requirements were applied to the particular build by Lewisham Planning? What proportion of this private build is Affordable, what are the CIL costs payable to Lewisham Council and how will the CIL monies be used to contribute to improvements in</p>	<p>Agree that the Sydenham Police Station site has been completed and that 154-158 Sydenham Road is nearing completion.</p>	Sydenham Police Station and 154-158 Sydenham Road site allocations have been removed from the Plan.

			infrastructure, environmental or any community improvements. Is any of this money available to local usage, as for instance you talk of improving frontages and many of the shop fronts in this area are shabby and need improvement, viability of businesses appears fragile?		
Forest Hill Society	3	LWA SA 09	Site Allocation 9 Willow Way Locally Significant Industrial Site We support the designation of Willow Way as a Locally Significant Industrial Site and believe that a combination of employment and residential uses is appropriate for the site. With careful development, there is the opportunity to ensure space for employment that fits with the nearby Forest Hill Cultural Quarter and supports the cultural and creative industries.	Support noted.	No change.
	3	LWA SA 09	I am writing to express my disapproval of the proposed development at the above site [Willow Way LSIS). There is a garage on this site, and car body shop, both of which I have used, in particular the garage and MOT Service centre. It has taken me 25 years of being a car owner to find a local garage which I trust, is female friendly (i.e., not patronising or scary) and does a great job at a reasonable price. This is an important local family run business that needs local support and has many loyal customers. I urge the council to rethink this proposal. The area already has empty flats on Kirkdale, we don't need more, but the local residents do need good local businesses in order to keep it flourishing	Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.	Willow Way LSIS site allocation has been amended to provide more certainty over the masterplan process, to give protection for the MOT centre and the amenity of the neighbouring public house.
	3	LWA SA 09	I. Views: It is a mistake to think that tall buildings can be built, say on the Sainsburys site, without obstructing the views from Telegraph Hill. That is where the real claustrophobia comes in. These views can never be replaced once gone. The example is the mess the city of London has made by totally allowing St Paul's cathedral to be obscured. It is so hard to see it now. This is vandalism. Certain cities like Paris have had the vision to see that these are immeasurably important assets. Panoramic views from Telegraph Hill fall in this bracket.	Noted. Following the Regulation 18 consultation, additional work on the Tall Buildings Study has been undertaken to inform the Local Plan policies on buildings heights. The London Plan sets out the London View Management Framework, which the Local Plan helps to give effect to – further details are set out in the Local Plan Part 2 policies on View Management.	Local Plan amended with more detailed requirements on buildings heights, informed by the Tall Buildings Study update.
	3	LWA SA 09	This is to affirm my opposition to the proposal {Willow Way West] My home is in Taylor's Lane, a km away, and I have been a customer at Dartmouth Service Station for (I believe) twenty plus years. It is an excellent small business- the sort you should be encouraging to flourish- and I can assure you that it is highly regarded locally. The proposal would mean its closure, loss of employment and the loss of a valued local amenity. I hope that you will ensure its survival.	Following the Regulation 18 consultation the Council has held landowner meetings. Informed by these discussions the site allocation for the Willow Way employment site has been amended to provide more certainty over the masterplan process and outcomes sought. This includes protections for the MOT centre and the amenity of the neighbouring public house.	Willow Way LSIS site allocation has been amended to provide more certainty over the masterplan process, to give protection for the MOT centre and the amenity of the neighbouring public house.
	3	LWA SA 11	I am a resident in Brockley Cross and I believe the site used by Howarth (timber shop) in Brockley Cross is a great site to develop. Brockley station (1 minute walk, 10-20 minutes	Support noted. The site allocation mentions that employment floorspace must be re-provided but also states that uses must be sensitively integrated into	No change.

			into the City), three bus lines (171,172, 484), three primary schools and two secondary within walking distance (John Stainer, Haberdasher, Myatt...). Howarth brings a high number of HGVs in the area which cause a number of problems. They are oversized (and seem to get larger every year) compared to our small residential streets, struggle to manoeuvre and cause traffic, noise, vibration, pollution....	the development in order to ensure the protection of amenity for all site users	
Discourse Architecture	3	LWA SA 11	<p>11 Perry Vale Locally Significant Industrial Site (p773)</p> <p>We question the designation of the narrow Perry Vale site as a 'Locally Significant Industrial Site'. If industrial use is retained at the south end of the site it will have negative consequences for the development of the site as a whole:</p> <ul style="list-style-type: none"> • Access to the industrial area by trade and heavy vehicles will conflict with residential use in the narrow portion of the site • The future construction of a footbridge linking Perry Vale and the east side of the railway with Forest Hill Pools and Dartmouth Road will be obstructed. This link would meet the requirements of the Mayor's Healthy Street initiative to encourage more travel on foot or by bicycle. <p>The Perry Vale site should be developed to a higher density, appropriate to its proximity to the adjacent public transport hub and town centre facilities, with co-location of residential and employment uses, rather than continuation of the existing occupation by single-storey commercial units and surface parking. This site could be viewed differently, as part of the proposed Forest Hill cultural hub. However, we accept that the current location of the post office sorting depot on the site is a valuable and convenient local amenity, albeit one potentially in conflict with mixed use densification of the site.</p> <p>We question the allocation of the Perry Vale site as a Locally Significant Industrial Site. The proximity of the site to the town centre and rail station differentiates this site from other sites identified for industrial development. The Perry Vale site is more suited for the co-location of residential accommodation and uses associated with the creative industries and the new Forest Hill cultural hub. There is also an opportunity to provide parking for visitors to the town centre who wish to engage in the cultural hub, night-time economy and swimming pool. Improving the connections across the railway, making them more attractive, accessible and safer will promote a balanced social and commercial environment across Forest Hill.</p>	Noted. The designation of Perry Vale as an LSIS has been informed by recommendations of the Lewisham Employment Land Study, which reflects the importance of ensuring sufficient industrial land and capacity to meet the Borough's future needs. The Local Plan makes provision for employment-led mixed use redevelopment of the site in order to make the optimal use of land and improve its place qualities, including improvements to the station approach. The development guidelines encourage that employment uses complement the Forest Hill Cultural Quarter.	No change.
	3	LWA SA 12	Site 12, Sydenham Road, Loxley Close - possible 131 units. This is an area covered by a largish privately owned warehouse style Lidl Supermarket with a locally Listed building close by, which I assume is the Golden Lion Pub, and it is stated that any redevelopment or intensification, must not impact negatively on this public house. There is	<p>The London Plan directs Local Authorities to allocate single storey retail stores and surface car-parks.</p> <p>The indicative site capacities have been derived from a standard methodology explained in the Site Allocations background Paper. The indicative capacity</p>	Land at Sydenham Road and Loxley Close site allocation boundary amended to remove furniture shop.

			<p>an old second hand furniture shop between. The supermarket is very popular with local families, as the prices are much lower than at other well-known local retail food suppliers like the mini Tesco and Sainsbury's. It seems doubtful that this privately owned business will come forward to develop in a manner that matches the style of local small retail businesses, housed in the traditional style higher up Sydenham Rd. There is a car park at the back which could be partially commandeered, but any build as proposed in the Local Plan, states that it should protect the amenity of nearby properties (like my own) with boundary landscaping, and I propose that it would be good to include a tree-filled greening of the ubiquitous tarmac. I would really support new and improved access to the allotments, as suggested, and that building heights are no higher than the 2 storeys of nearby homes. The Plan is positive, but to achieve it would appear to be quite a challenge.</p>	<p>also includes town centre uses which could be used to re-provide the supermarket.</p>	
3	LWA SA 13	<p>Site 13, 113-157 Sydenham Road – possible 168 residential units. This site covers the area of a largish private car dealership and hire car and car storage showrooms and external space behind. Again this is a modern development with no connection with the traditional character of the area. It is important that any new development or intensification does not impact on the really popular and traditional Public House next door, The Dolphin which is Listed. The Plan is positive in that it recommends design in line with the Conservation area close by on the Thorpe Estate. Again, is the dealership really likely to come forward for redevelopment, even though the very strong intention of the Local Plan is for a change of the modal style, from car to walking and cycling?</p>	<p>Support noted. The London Plan directs Local Authorities to allocate single storey retail stores and surface car-parks such as those associated with car dealerships.</p>	<p>No change.</p>	
3	LWA SA 14	<p>The Build at Site 14, 154-160 Sydenham Road, another private development behind the main street frontages of 76 units near to Kent House Road. This is quite a large development. What, if any, requirements were applied to the particular build by Lewisham Planning? What proportion of this private build is Affordable, what are the CIL costs payable to Lewisham Council and how will the CIL monies be used to contribute to improvements in infrastructure, environmental or any community improvements. Is any of this money available to local usage, as for instance you talk of improving frontages and many of the shop fronts in this area are shabby and need improvement, viability of businesses appears fragile.</p>	<p>All details on the planning application can be found on the planning website using the reference number DC/17/104571. 154-158 Sydenham Road is nearing completion.</p>	<p>154-158 Sydenham Road site allocation has been removed from the Plan.</p>	
3	LWA SA 15	<p>Site 15, The prior Supermarket on the corner of Girton Road/Sydenham Road is now being transformed into a Pure Gym. Neighbours know that I am a Councillor and have told me they are upset by the fact that this Gym is being allowed to stay open all night. Girton is a quiet residential road full of families and a number of older residents who are not happy with this situation, fearing the potential for night disturbance and late parking in the road. In your site proposition, the Local Plan states that this site should take account of residential amenity, and that any build should be in alignment with the character of</p>	<p>The Local Plan is a 20 year strategy so whilst the site may not come forward in the immediate future we would hope it would come forward in the plan period.</p>	<p>No change.</p>	

			<p>the area. In fact the building, a two storey modern smaller supermarket, has not been aligned with the local character since the 70s, and can only become so by being replaced altogether. The history is that the site was originally occupied by the Granada Cinema, opened 1931 and demolished 1971, a great building that was unfortunately not Listed and saved, as the Forest Hill Capitol Cinema building was. It is clear that the Gym is investing a lot in refurbishing the premises, and I assume will not be interested in discussing with Planning its demise and the quality rebuild envisaged by the Local Plan. There is therefore no financial CIL outcome and nearby residents are not content either. I invite your comment on this.</p>		
	3	LWA Site Allocations	<p>Perry Vale/Land at Forest Hill Station West/Land at Forest Hill Station East</p> <p>Do you have any comments on the proposed vision? The vision is flawed. The housing requirements has been based on data pre-pandemic and therefore needs to be reassessed based on the fact nearly 1million people leaving London to relocate due to flexible and smart working from home. More development in this densely populated area will increase emissions/pollution from traffic in area (Section of South Circular up to Forest Hill station with dangerous bend/poor access to Devonshire Road).</p>	<p>The latest evidence prepared by the GLA, which takes account of the impacts of Covid-19, suggests that there will continue to be significant population growth in London over the long-term, which will need to be considered through the plan process.</p> <p>The London Plan also sets a strategic housing requirement (target) for the borough that the Local Plan must meet.</p> <p>The Local Plan broadly seeks to promote modal shift away from private car use to movement by walking, cycling and use of public transport. This approach is set in the context of reducing carbon emissions and improving air quality.</p>	No change.
Blackheath Society no 2	3	Section 13	<p>Table 13.1 contains net home units and gross floor space for site allocations by Area and is very important, both in demonstrating ambitions for housing, workspace and town centre uses by Area and the potential ability to meet the Borough's increased housing targets in the new London Plan. The North and Central Areas look set for most development, the West and East the least. Is this driven by genuine need and strategic intent or by what is possible given site allocation analysis? This split should be more prominent as it drives much of the Plan. It needs genuine exposure and buy-in from all stakeholders, especially neighbourhoods directly affected. It looks broadly realistic given the character analysis of the Areas but potentially controversial and contentious. Are the Community/Green Infrastructure and Transport policies well-matched to these ambitions, especially in the North and Central Area? Here the BLE brings no new stations, only upgraded interchanges.</p>	<p>Noted. The figures in Table 13.1 are based on the indicative site capacities for the site allocations included in the draft Local Plan. The site allocations were identified through a Strategic Housing Land Availability Assessment, and are considered to be deliverable within the plan period. Further details are set out in the Site Allocations Background Paper, which is available on the Council's local plan Evidence Base webpage.</p> <p>As part of the Local Plan preparation an Infrastructure Delivery Plan (IDP) is published. The IDP sets out the necessary infrastructure (schools, health care facilities, road and public transport improvements etc.) that is required to accommodate the level of growth anticipated through the Local Plan.</p>	No change.
Brockley Society	3	Section 13 Paragraph 13.5	<p>Page 471, paragraph 13.5: As mentioned above, the Council's existing conservation area character appraisals and SPDs perform an important function in setting development standards that protect heritage assets. Any proposed additions, replacements or revisions should be publicly consulted on to ensure these standards are maintained and improved.</p>	<p>Noted. The Council's adopted Statement of Community Involvement sets out how the Council will engage with and consult the public on planning guidance documents.</p>	No change.
Greater London Authority	3	Section 13	<p>The Site Allocations are proposed to deliver 38,000 sqm net additional workspace and 24,000 sqm net additional town centre floorspace over the Plan period to 2040 (Table 13.1 of the draft Plan). Despite slightly different</p>	<p>Site allocations specify different floorspaces for employment and main town centre uses.</p>	Table 13.1 amended to latest floorspace figures arising from the site allocations.

			terminology and timescales, this appears to exceed the additional space requirements identified in the borough's Employment and Retail Studies (21,800 sqm employment floorspace up to 2038 and 14,500 sqm indicative retail floorspace up to 2035). The London Office Policy Review 2017 identified a negative composite floorspace demand of -2,500 sqm for the borough up to 2041, and Lewisham town centre was identified as showing demand for existing office functions, generally within smaller units (Town Centre Network Office Guidelines C), but not for mixed-use or speculative office potential. The council will need to produce evidence of demand that justifies the proposed level of provision and/or create the right economic conditions for exceeding demand through an evidence-based economic development strategy. The Mayor would be particularly concerned if this would result in a loss of industrial capacity (see also section below). In this context it is also important to make a clear distinction between industrial space, and office and retail development	The floorspace figures are indicative, based on a theoretical land use mix split. The actual floorspace to be delivered on sites coming forward could differ from these estimates as they will be considered more thoroughly through the Development Management process. An additional supply of floorspace, above and beyond the requirements suggested in the Employment and Retail Studies, will enable sufficient non-residential floorspace to be delivered throughout the Plan period, should some of the sites not be brought forward for development or their delivery delayed.	
NHS (HUDU)	3	Section 13 Table 13.1	The housing figures set out in Table 13.1 'Site allocations – indicative delivery outcomes' shows substantial housing growth across the different neighbourhoods and places. It is essential that the local plan demonstrates how infrastructure capacity required to meet the growth in population will be delivered. New residents will place additional demands on health infrastructure (acute, mental health, community and primary care). While the health sector (SELCCG and the wider NHS) have provided evidence to the Council of projects required together with the substantial investment needed to bring existing infrastructure up to modern standards, there are additional challenges from Covid-19 and resultant pressures which will continue for many years	Noted. An Infrastructure Delivery Plan is being prepared alongside the Local Plan. This sets out the infrastructure required to support the levels of growth being planned for, including social infrastructure and community facilities. The IDP has informed the preparation of the Local Plan. The NHS has been consulted on the IDP and helped to inform its preparation. The IDP will be subject to regular review over the plan period, which will assist with the identification of new infrastructure and funding gaps/commitments as information becomes available.	No change.
Quaggy Waterway Action Group	3	Section 13	QWAG supports the Local Plan's aim to 13 <i>"Retain, reinforce and help shape the distinctive character and identity of Lewisham's communities and townscapes by ensuring that all new development responds positively to the special attributes of its local context – including the cultural, historic, built and natural environment - and is designed, constructed and maintained to a high quality standard."</i>	Support noted.	No change.
Quaggy Waterway Action Group	3	Section 13	The Local Plan should support local distinctiveness but too much development has been permitted which is not resonant of or reflective of the locality, and could be plonked down anywhere.	Noted. The need for new development to identify and respond positively to Lewisham's local distinctiveness is a recurrent theme set out throughout the Local Plan. Previous decisions on planning applications are outside the scope of the Local Plan.	No change.
Quaggy Waterway Action Group	3	Section 13	The opportunity to ensure that works to the rivers and their confluence in central Lewisham made the most of Lewisham being one of the few London boroughs with not one but two rivers flowing through the main urban centre, and with much of the borough's diverse population able to be involved and inspired by greater contacts with and knowledge of their local rivers.	Noted. Part 3 of the Local Plan makes clear that the river network is a defining feature of the Central Area and that development proposals should maximise the ecological function and character of waterways, including river restoration around Lewisham town centre. The plan's site allocations set out specific requirements in this respect.	No change.
Quaggy Waterway Action Group	3	Section 13	The Lewisham Gateway scheme has done the minimum possible with the rivers, which remain in concrete albeit with some artificially created meandering, riffles and flow, and the nearby small open space is of limited amenity and	Noted. Previous planning decisions are outside the scope of the Local Plan. It is considered that the draft Local Plan provides a clear direction and robust	No change.

			ecological value and does nothing to underpin local distinctiveness; the scheme happens to be in central Lewisham but it could be anywhere because it says nothing about the area.	policies for waterway management in the Borough, including within central Lewisham.	
Quaggy Waterway Action Group	3	Section 13	It remains unclear how the Local Plan will result in spaces and places which support and reinforce the borough's distinct environment, heritage and culture.	The draft Local Plan Policy QD1 requires that all new development must be delivered through the designed approach, and informed by an understanding of the site's local context. This is an overarching policy, which other design policies emanate from. Part 3 of Local Plan set out policies and guidance which respond to the distinctive qualities of Lewisham's character areas and neighbourhoods. These were informed by the Lewisham Characterisation Study. Development proposals will be required to demonstrate how they satisfy the Local Plan requirements.	No change.
Historic England	3	Site allocations	The detail relating to design guidelines within site allocation policies as it relates to heritage assets and built character (although please see comments below in regard to tall buildings) is also welcomed. We do however have some comments in relation to specific sections.	Support noted. Responses to additional comments set out elsewhere in this consultation statement.	No change.
Historic England	3	Site allocations	As indicated above, we consider the design guidelines within the site allocations policies to be helpful both in their identification of relevant heritage assets and the design parameters set out intended to ensure the conservation of heritage significance. However, we also note that there is no reference to maximum building heights in any of the proposed site allocations within the zones identified as appropriate for tall buildings.	Noted. Following the Regulation 18 stage public consultation, the Council has commissioned additional work on the Tall Buildings study. This has been used to inform the Regulation 19 document, with further details on locations suitable for tall buildings and building heights. For planning decisions, the site allocations will need to be read in conjunction with other policies, including QD4 Building Heights.	Local Plan Policy QD4 amended with additional details on tall buildings locations and building heights.
London Borough of Bromley	3	Site allocations	With regard to the proposed site allocations, we have no specific comments but would welcome sites near the Borough boundary making explicit reference to this and the need to consider impacts on Bromley.	Noted. It is considered that the London Plan will help to ensure that developments appropriately consider and do not have an adverse impact on neighbouring boroughs.	No change.
NHS (HUDU)	3	Site allocations	The text within individual site allocations should make reference to mitigation of their impact on the borough's health infrastructure and contribute to expanding affordable and high quality capacity	The draft Local Plan Part 2 policy CI1 on Community Infrastructure requires development proposals to plan positively to meet identified need for community infrastructure having regard to the IDP, which would include health care provision. It is not considered necessary to repeat this policy in the site allocations. The plan must be read as a whole.	No change.
NHS (HUDU)	3	Site allocations	Within each site allocation under Development Requirements there should be reference to the need to mitigate the impact on health infrastructure.	The draft Local Plan Part 2 policy CI1 on Community Infrastructure requires development proposals to plan positively to meet identified need for community infrastructure having regard to the IDP, which would include health care provision. It is not considered necessary to repeat this policy in the site allocations. The plan must be read as a whole.	No change.
Royal Borough of Greenwich	3	Site allocations	In general, the site allocations should include more explicit guidelines or expectations in relation to building heights. This has particular relevance to sites close to or on the borough boundary, where tall buildings have the potential to impact the townscape and amenity of neighbourhoods within Royal Greenwich. We would also recommend that, where guidance around building heights and impacts on heritage assets is provided, this be moved from the "Development guidelines" section to the "Development	Noted. Following the Regulation 18 stage public consultation, the Council has commissioned additional work on the Tall Buildings study. This has been used to inform the Regulation 19 document, with further details on locations suitable for tall buildings and building heights. For planning decisions, the site allocations will need to be read in conjunction with other policies, including QD4 Building Heights.	Local Plan Policy QD4 amended with additional details on tall buildings locations and building heights.

			requirements" section to reflect the weight given to design and historic character in the NPPF.		
Sport England	3	Site allocations	<p><u>Site allocations</u></p> <p>With regard to any future site allocations, we would advise that the allocation of new sites for sports facilities should be identified through the use of a robust and up to date evidence base such as the Lewisham Playing Pitch Strategy. Para 96 of NPPF and planned positively para 92 of NPPF to ensure that the right facilities are in the right place. It is also essential that where sites adjacent to playing fields are proposed to be redeveloped that the new use does not prejudice the use of the playing field (for example, due to ball strike).</p>	Noted. The Local Plan has been informed by a technical evidence base, which includes The Lewisham Playing Pitch Strategy, Open Space Assessments and studies, and the Parks and Open Spaces Strategy.	Local Plan Policy Quality Design policy on amenity amended to reference that development does not prejudice the use of playing fields.
Thames Water Utilities Ltd	3	Site allocations	Table submitted which provides Thames Water's site specific comments from desktop assessments on water, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed development sites.	Noted.	Some amendments to sites allocations have been made in line with the comments provided in the table of sites.
Transport for London	3	Site allocations	<p>Sites within PTAL 4-6 should be clearly identified as car-free per the London Plan policy T6. In many instances, the development guidelines under site allocations (even with PTAL 6b) specify – 'Car parking provision should be the minimum required to maintain the viability of the town centre, whilst also reflecting the Public Transport Accessibility Level'. This statement is not in compliance with the London Plan, nor does it align with our evidence which demonstrates that better public realm and increased walking and cycling contribute more to town centre viability than does access by car. In fact, car dominance detracts from the public realm and therefore it detracts from the viability of town centres. And it should be noted that people walking and cycling spend more on London's high streets than do people who arrive by car (http://content.tfl.gov.uk/mts-walking-action-plan.pdf). Recent Department for Transport evidence supports this, suggesting that increasing access by sustainable modes can be driven by reductions in town centre car parking (https://www.gov.uk/government/publications/switching-to-sustainable-transport-a-rapid-evidence-assessment).</p>	Noted. The site allocations will be amended for conformity with the London Plan.	Local Plan policy TR4 amended to clarify that sites within PTAL 4-6 must be designed to be car-free. Local Plan site allocations amended by removing text on car parking that is not in general conformity with London Plan.
Transport for London	3	Policies Map	<p>Big Yellow Storage, 155 Lewisham Way, New Cross, London SE14 6QP and Wearside Depot</p> <p>These sites are not identified as a site allocations, but are critical in delivery of the BLE. The formal safeguarding directions give a degree of protection to the sites. However, it is considered that identifying future uses of the sites through a site allocation, including for BLE infrastructure, would serve as to best protect the interests of the BLE, and new underground services to Lewisham.</p>	Both sites are subject to safeguarding order which clearly identifies the sites.	Local plan amended to show the BLE safeguarded sites on the Regulation 19 policies map.

Lewisham Local Plan

Regulation 18 consultation statement

Appendix 2 – Regulation 18 Draft Local Plan Written Responses Split Part 4 and 5

September 2022

Organisation (if relevant)	Part	Section, policy or paragraph	Comment	Council officer response	Action
Telegraph Hill Society	4	DM	<p>The Plan also needs to detail how the Council will enforce and monitor its own compliance with the Plan. In order to retain the trust of both residents and developers it is extremely important that the Council transparently upholds the principles it is espousing.</p> <p>At the macro level this involves setting and monitoring progress towards achieving a detailed series of targets, and the need for the introduction of these is set out in our opening paragraphs on the Vision (paragraphs 3 to 8). To have such a "Vision" is admirable and, as we have said, Lewisham's Vision is laudably aspirational but, unless the progress towards it is measured and failures to achieve it rectified, it is worth less than nothing. A Vision that is not adhered to will simply lower the opinion of the Council in the minds of residents, stakeholders and</p>	<p>Part 4 of the Local Plan sets out a monitoring framework with targets along with indicators to measure performance of the plan, which is divided in to thematic policy areas.</p> <p>Part 4 policies set out the framework for delivering the Local Plan. This sets out a range of measures and tools, and indicates that the Council will use planning enforcement where necessary. In line with planning law,</p>	No change.

		<p>potential partners and will lose general respect.</p> <p>At a more granular level we have numerous examples of where planning policies have been ignored by developers and planning applications not made where they were clearly required with no enforcement action apparently taken. We also have examples where planning decisions have been made which were clearly against explicit bars in the UDP (i.e. where the UDP says “The Council will not allow ...” and yet the Council did so allow).</p> <p>Whilst we appreciate that the Council may not have the resources to follow up every infringement at present, that should not be expected to be the case throughout the life of the Plan, nor should any part of the “Vision” imply that such infringements might be allowed. To ensure the “Vision” succeeds, it needs to be enforced.</p>	<p>Part 1 of the Local Plan sets out that planning applications must be determined in accordance with the development plan, unless material considerations indicate otherwise</p>	
--	--	---	---	--

Culverley Green Residents Association	4	DM	<p>There are no success criteria At the moment, there seems to be a single success criteria — a building target. If it is achieved it will be a hollow achievement if it results in no change in Lewisham’s homelessness, or the flats are unoccupied investments, or the lack of green spaces and crowded transport means that the area is home only to the most economically disadvantaged. Targets could include reduction in homelessness, distance from green spaces, longevity of residency, etc.</p>	Disagree. The Local Plan sets out Strategic Objectives across a range of policy topic areas. Part 4 of the plan also sets out the Monitoring Framework with metrics against which the successful delivery of the plan will be assessed.	The Part 4 monitoring framework has been reviewed and updated with additional indicators.
Deptford Society	4	DM	<p>There is a general lack of quantifiable, verifiable targets against which the success or otherwise of policies can be judged.</p> <p>Ongoing issues with enforcement and maintenance of public space and heritage buildings continue to undermine delivery of attractive and welcoming public realm and shopping areas.</p>	Disagree. The Local Plan sets out Strategic Objectives across a range of policy topic areas. Part 4 of the plan also sets out the Monitoring Framework with metrics against which the successful delivery of the	The Part 4 monitoring framework has been reviewed and updated with additional indicators.

			<p>In Deptford High Street CA the following issues are particularly prevalent:</p> <ul style="list-style-type: none"> - Graffiti - Increase in fly-tipping and litter - Maintenance of public open space - Maintenance of buildings and shop fronts 	<p>plan will be assessed.</p> <p>Planning enforcement is outside the scope of the Local Plan.</p>	
Deptford Society	4	DM	<p>Enforcement</p> <p>Effective enforcement of planning control would support the Lewisham Local Plan however the plan contains no mission statement or mandate in respect of enforcement.</p> <p>The concept of effective management control can very easily be undermined where enforcement procedures are ineffective or where enforcement procedures are drawn-out. For enforcement to be effective it needs to be made public and dealt with efficiently.</p> <p>We have examples of unresolved enforcement cases which go back almost a decade.</p>	<p>Noted. Planning enforcement is outside the scope of the Local Plan. However an additional policy point will be included to note that the Council will use planning enforcement as a tool to support the delivery of the plan.</p>	<p>Local Plan amended with an additional policy point in Part 4 on Delivery and Monitoring to reflect that the Council will use powers available to it, including planning enforcement, to support the delivery of the Local Plan.</p>

		<p>We have other examples of long-standing cases where in response to enforcement action, planning consents have been granted for reinstatements and/or alterations but where these works have not been carried out and the original offence remains. The longer that cases are left unaddressed, the stronger the perception becomes that there are no planning constraints within the Conservation Area.</p> <p>We are aware there are limited resources within the enforcement team and appreciate officers' efforts. LBL enforcement currently allocates cases according to 4 levels of priority.</p> <p>Priority 1 cases include: 'works are being carried out which will cause irremediable harm, for example, works to a listed building, demolition of a listed building and works to trees with protection orders'</p>		
--	--	---	--	--

			<p>Priority 3 cases include: ‘installation of shop fronts, unauthorised detached structure and non-compliance with the approved consent. Visits to be carried out within 10–15 working days’</p> <p>Unauthorised alterations to buildings within the conservation area are currently treated as priority 3 cases; in view of its ‘at risk’ status we recommend the council classify them as priority 1 and that this be stipulated in the local plan.</p>		
Deptford Society	4	DM	<p>We would like to see clearer wording to set out how statements will be used in determination of applications. A clearer identification of measurement or quantitative requirements which should be demonstrated through submitted statements would be helpful, and how this information will be used to monitor and enforce agreed obligations and the quality of developments.</p>	<p>The Planning and Compulsory Purchase Act 2004 provides that development proposals must be determined in accordance with the development plan, unless material considerations indicate otherwise. This is set out in Part</p>	<p>No change.</p>

				<p>1 of the Local Plan. Planning statements support applications to demonstrate how policy requirements will be satisfied. The Council uses planning enforcement powers to ensure that development is for authorised uses.</p>	
Deptford Society	4	DM	<p>The strategy to deliver and monitor the plan is lacking. Documenting how regular updates to the local plan will be made, to capture and respond to changing needs and circumstances, and to allow opportunity for further engagement and consultation on progress is needed to ensure the effectiveness of the plan is maximised and the plan can remain adaptive and relevant.</p>	<p>Part 4 of the Local Plan sets out the framework for monitoring and delivering the Local Plan, which the Council considers is proportionate and robust.</p> <p>The Council is legally required to review its</p>	No change.

				Local Plan every 5 years and where necessary, update it to ensure it is in line with higher level planning policies. Where changes are proposed to be made, the Council will carry out consultation in accordance with its adopted Statement of Community Involvement.	
NHS (HUDU)	4	DM	The London Plan (March 2021) paragraph 11.1.37 states "Boroughs should use the London Healthy Urban Development Unit Planning Contributions Model (HUDU Model) to calculate the capital cost of the additional health facilities required to meet the increased demand". This should be reflected in the Local Plan, and set out in further detail in the updated Planning	Noted. The use of the HUDU model will be considered when the Council updates its Planning Obligations Supplementary Planning Document.	No change.

			Obligations SPD. We are keen to support the Council to use the HUDU Model and if the relevant officer makes contact this can be arranged.		
Blackheath Society no 2	4	DM 01	Not enough emphasis/detail on engaging/harnessing citizens and groups (DM1)	<p>Noted. Policy DM1 sets out that a wide range of stakeholders, including community, groups will support the plan's delivery. However it is acknowledged some further details in the supporting text could be helpful.</p> <p>The Council's Statement of Community Involvement should also be referred for further information.</p>	Policy DM1 supporting text updated to provide further details on how local communities will assist in delivering the Local Plan.
Blackheath Society no 2	4	DM 01	DM1 Working with stakeholders to deliver the	Noted. Policy DM1 sets out	Policy DM1 supporting text updated to provide further details on how local

			<p>Local Plan. There is far too little detail on how these aspirations/promises will be met, given recent poor engagement with local stakeholders and the manifest lack of capacity to do so effectively in the face of recent budget cuts and covid. In particular, more imaginative and transparent ways of engaging stakeholders in a modern, fluid and fast moving society (including the Council itself) need to be developed and embedded in Council processes and attitudes. A great opportunity is being lost by not engaging more frequently and effectively in dialogue with local knowledge, experience, ideas and enthusiasm of local amenity societies and community groups. A defensive silo approach needs to be avoided and partnership working encouraged.</p>	<p>that a wide range of stakeholders, including community groups will support the plan's delivery. However it is acknowledged some further details in the supporting text could be helpful.</p> <p>The Council's Statement of Community Involvement should also be referred for further information.</p>	<p>communities can assist in delivering the Local Plan.</p>
Telegraph Hill Society	4	DM 01	<p>As part of the delivery process and ensuring compliance with the principles in the Plan it is fundamental, as we have outlined above, for the</p>	<p>Noted. The preparation of design codes and planning guidance is</p>	<p>No change.</p>

			<p>Borough to commit to updating as soon as possible its guidance and detailed policies including Conservation Area Character Appraisals and to introduce design codes based on a more detailed understanding of each area. See our further references to this in paragraphs 60 131, 135, 142 and 258.</p>	<p>outside the scope of the Local Plan. However the Council has and will continue to prepare guidance to support the implementation of the Local Plan. The extent of guidance will be subject to resources available and priority of need for the information.</p>	
Telegraph Hill Society	4	DM 01	<p>There is very little in the Plan or the Vision which shows an on-going involvement with residents in what happens in the Borough once the final Plan is adopted. It is fundamental to good planning that local communities are involved, especially as such communities will evolve and change over the 40 year life of the Plan.</p>	<p>Noted. Policy DM1 sets out that a wide range of stakeholders, including community, groups will support the plan's delivery. However it is acknowledged some further details in the</p>	<p>Policy DM1 supporting text updated to provide further details on how local communities will assist in delivering the Local Plan.</p>

				<p>supporting text could be helpful.</p> <p>The Council's Statement of Community Involvement should also be referred for further information.</p>	
Telegraph Hill Society	4	DM 01	<p>Nor should relevant parts of any community be left out of consideration purely because of artificial boundaries drawn either for the purpose of this Plan or for electoral ward purposes. As Part Three of the Plan acknowledges, boundaries are blurred and developments in one area can affect easily affect others</p>	<p>Noted.</p> <p>The Council's Statement of Community Involvement sets out how it will consult the public on planning decisions.</p>	No change.
Telegraph Hill Society	4	DM 01	<p>Ward boundaries, in particular, do not relate to either character areas or neighbourhoods mapped out in figure 13.1. For example ¼ of Telegraph Hill is in the North Area and ¾ is in the West Area and yet it is all in Telegraph Hill Ward, which also includes</p>	<p>Noted. The character areas or sub-areas in the Local Plan were informed by the Lewisham Characterisation Study, and</p>	No change.

			<p>Honor Oak and the Kender Triangle. The Plan acknowledges that New Cross/New Cross Gate is the principal shopping centre for much of Telegraph Hill and the great majority of the Telegraph Hill Conservation Area and the community of people who live there will be affected by developments on the Hatcham Works site, but none of those people are in the New Cross Ward where Hatcham Works and the district shopping centre is located.</p> <p>We have argued in other submissions that the Ward boundaries are inappropriate for planning purposes and the split between the North and West Areas of the Plan make them even more so. It follows, therefore, that Local Ward Assemblies, for example, are an inappropriate vehicle for community engagement and new groupings, more in alignment to this Local Plan, need to be developed. The opportunity also seems to have been missed to align the Area</p>	<p>provide a helpful means of providing policies at a more granular or neighbourhood area (rather than borough-wide) level. The Local Plan must be read as a whole for planning decisions, which is clearly stated in Part 1 of the plan.</p> <p>It should be noted that the Local Plan Part 2 Policies on Heritage are borough-wide policies including for Conservation Areas. These will help to ensure consistency of approach in</p>	
--	--	--	--	--	--

			<p>boundaries with the four Neighbourhood Community Development Partnership areas used for health and social services planning.</p>	<p>planning decisions for CAs.</p> <p>The Council's Statement of Community Involvement sets out how the public will be consulted on planning decisions.</p>	
Telegraph Hill Society	4	DM 01	<p>We welcome the commitment by the Council in DM1.A to take a "proactive and positive approach" to working alongside community groups. In order to add some flesh to this otherwise bland statement, the Council should acknowledge that community groups do not have the resources, being volunteers, in the same way as either the Council or developers do. The planning process is therefore inherently biased and unfair and the Council should do all it can to ensure that any unfairness against local residents and community groups is removed as far as</p>	<p>The Council's Statement of Community Involvement sets out how the public will be consulted on planning decisions.</p> <p>Funding and support for community groups is outside the scope of the Local Plan.</p>	No change.

			<p>possible. There should therefore be firm commitments stated within the Plan that, when funds are available, the Council will:</p> <ul style="list-style-type: none"> • re-introduce the Amenity Societies Panel (even just providing the relevant files for discussion and a space to meet would be beneficial all round) • provide resources to help communities understand planning issues and get involved in the planning processes at Local Plan, area plans, neighbourhood plan and site-specific planning levels and also in designing Character Appraisals and Design Codes to further inform future local development and • provide similar levels of assistance to community groups and concerned residents as are provided for developers in terms of seeking advice. 		
Telegraph Hill Society	4	DM 01	We note that the wording of DM1.A which specifies “local communities and community groups” separately from “key stakeholders” suggests that local communities and	Agreed.	Local Plan policy DM1.A amended as suggested.

			community groups are not key stakeholders when, in fact, they are the primary interested parties in anything which affects their communities. We imagine this to be a drafting error and that the implication is not intended. We would suggest that this be re-written to read: "to working alongside key stakeholders, including local communities and community groups, key stakeholders, landowners and development industry partners, and the wider public"		
Telegraph Hill Society	4	DM 01	With reference to policies DM2.B and DM2.C we note that CIL money will be allocated "to help ensure local areas are appropriately supported with infrastructure and benefit from investment generated by new development". This should also state that it will be allocated to ensure that local areas are compensated for any disadvantages that might accrue from new development. The Ward Assemblies, as we have pointed out above (paragraphs 260 to 263) do not	Planning obligations (\$106 agreements) are legal obligations entered into to mitigate the impacts of a development proposal and the appropriate mechanism to ensure that development proposals are	No change.

			<p>correspond with the areas affected by developments and therefore are not the appropriate forums in which to discuss allocation of CIL monies. DM2.B and DM2.C need to be re-written to ensure that all residents affected by developments have an equal say in the use of neighbourhood CIL.</p>	<p>acceptable in planning terms.</p> <p>The Council has established governance arrangements for the allocation and use of Neighbourhood CIL (NCIL). These are outside the scope of the Local Plan.</p>	
Blackheath Society no 2	4	DM 02	<p>DM2 Infrastructure funding & planning obligations.</p> <p>The Council's record on planning infrastructure improvements/upgrades to match the demands and timing of new developments has not been good. Nor has its record in raising, collecting and utilising S106 and CIL funds, many of which remain unspent. More specific proposals and targets are needed in the Plan, rather than just theory.</p>	<p>Noted.</p> <p>Whilst we accept that the spending of S106 funds could be better the Council has delivered significant infrastructure improvements including a programme of school improvements and extensions,</p>	No change.

				<p>improvements to parks and open spaces and securing public transport improvements such as the DLR upgrade. For further details on planning contributions spend please see the IFS on the Council website.</p>	
Environment Agency	4	DM 02	<p>Infrastructure funding Lewisham raises a Community Infrastructure Levy (CIL) and paragraph B of DM2 states that a portion of this will be allocated towards neighbourhood priorities to help ensure that local areas are appropriately supported with infrastructure. We would like to highlight the benefit of considering the funding of improving flood defences with CIL. Improvements to flood defences could be incorporated into projects to provide additional local outcomes, such</p>	<p>Noted. Policy DM2 sets out a list of areas where planning obligations may be sought, and this includes flood risk management.</p> <p>The Council has set governance arrangements for the allocation and use of Neighbourhood</p>	No change.

			as the creation of parks and open spaces.	CIL. Proposals for projects involving flood risk management / improvements would be welcomed and will be considered through this process.	
Metropolitan Police Service	4	DM 02	<p>Section 106 / CIL contributions to mitigate impact on crime</p> <p>Policy H01 (Meeting Lewisham’s Housing Needs) of the emerging Lewisham Local Plan sets out that the Council will look to optimise the capacity of housing sites in order to ensure that</p> <p><i>a. “The draft London Plan minimum ten-year target of 16,670 net housing completions over the period 2020 to 2030 (or 1,667 net completions per year) is met and exceeded; and</i></p> <p><i>b. That delivery against Lewisham’s Local Housing Need figure is maximised.”</i></p>	<p>Noted. Policy DM2 sets out a list of areas where planning obligations may be sought, and this includes community safety measures.</p> <p>It is acknowledged that the draft IDP does not currently include a section on emergency services. The inclusion of this</p>	Infrastructure Delivery Plan updated to include new section on emergency services.

		<p>It goes on to state at paragraph 7.4 of the emerging Lewisham Local Plan that, <i>“It is imperative that we prepare Lewisham’s new Local Plan having regard to the draft London Plan, including the borough-level housing targets, in order to ensure it aligns with the spatial development strategy for the region. At the same time, we must ensure that national planning policy requirements are satisfied. Through the Lewisham Strategic Housing Market Assessment (2019), we have calculated the Local Housing Need (LHN) figure for the Borough, in line with the NPPF. The SHMA indicates that the current position for the borough is a minimum housing need figure of 1,939 net units per year based on the 2016 London Plan target. The LHN figure is 2,334 net units based on the draft London Plan (Intend to Publish version) annual housing target of 1,667 units. These LHN figures are significantly higher than Lewisham’s strategic housing</i></p>	<p>in the IDP would support relevant CIL spend over the plan period on infrastructure required to support growth.</p>	
--	--	---	---	--

		<p><i>target set out in both the current and draft London Plan.”</i></p> <p>In terms of employment in the Borough, Policy EC1 (A Thriving and Inclusive Local Economy) states that, <i>“The Council will help to build a thriving and inclusive local economy by attracting and generating inward investment”</i>. The sub text to this Policy states that <i>“Helping to facilitate a thriving, diverse and inclusive local economy is one of our key priorities. This means growing and strengthening the local economic base, making available a wide range of job opportunities, workspaces and employment sites across the Borough.”</i></p> <p>Further, Policy EC2 (Protecting Employment Sites and Delivering New Workspace) sets out that, <i>“There is a forecast need for 21,800 square metres of net additional employment floorspace (Use Class B1) in the Borough up to 2038.”</i> Growth in other land</p>		
--	--	--	--	--

			<p>uses such as retail and hotels is also expected.</p> <p>The growth in homes, offices and other uses will significantly increase the need for policing and the cost for associated infrastructure. This therefore represents a legitimate infrastructure requirement that should be accounted for.</p>		
Metropolitan Police Service	4	DM 02 CI 01	<p>Policy CI1 (Safeguarding and Securing Community Infrastructure) of the emerging Local Plan states that Lewisham Council will:</p> <p><i>“A. The Council will work collaboratively with stakeholders to identify current and projected future requirements for community infrastructure, and to secure the necessary provision of this infrastructure. Need for provision in the Borough will be considered having regard to the Infrastructure Delivery Plan, along with the relevant corporate plans and strategies of its key stakeholders, including for healthcare,</i></p>	<p>Noted.</p> <p>It is acknowledged that the draft IDP does not currently include a section on emergency services. The inclusion of this in the IDP would support relevant CIL spend over the plan period on infrastructure required to support growth.</p>	<p>Local Plan supporting text amended to refer to emergency services as part of community infrastructure.</p> <p>Infrastructure Delivery Plan updated to include new section on emergency services.</p>

		<p><i>education, recreational and other community services.”</i></p> <p>The sub text to this Policy, at paragraph 9.1 sets out <i>that “Community infrastructure is also commonly referred to as social infrastructure. It covers a range of services and facilities that contribute towards inclusive and sustainable communities by providing residents and visitors with opportunities to enjoy a good quality of life. Community infrastructure includes provision for health services, education and training, community facilities (including public houses), places of faith, and sport and recreation facilities for people of all ages and abilities.”</i></p> <p>We highlight that both the emerging Lewisham Local Plan and Draft Infrastructure Delivery Plan (November 2020) do not make reference to either ‘policing facilities’ or ‘emergency services’ as a social and community infrastructure. The MPS have to move towards</p>		
--	--	--	--	--

		<p>securing S106/CIL from development due to the impacts on crime. The MPS would like to have the ability to receive financial contributions during Lewisham Council's New Local Plan period and are in the process of working up a formula linking to development impacts which should be available soon.</p> <p>A breakdown of non-property related infrastructure sought by the MPS in the future is detailed below. This list has been taken from other Police and Crime Commissioners who are already receiving financial contributions;</p> <p>Staff set up costs</p> <ul style="list-style-type: none">- Uniforms.- Radios.- Workstation/Office equipment.- Training. <p>Vehicles</p> <ul style="list-style-type: none">- Patrol vehicles.- Police community support officers (PCSO) vehicles.- Bicycles.		
--	--	---	--	--

			<p>Mobile IT: The provision of mobile IT capacity to enable officers to undertake tasks whilst out of the office in order to maintain a visible presence.</p> <p>CCTV technologies: Automatic Number Plate Recognition (ANPR) cameras to detect crime related vehicle movements.</p>		
NHS Property Services	4	DM 02	<p>Policy DM2 Infrastructure funding and planning obligations</p> <p>It is important that the Council maximises opportunities to use the Community Infrastructure Levy and/or planning obligations to secure healthcare infrastructure. Large residential developments often have very significant impacts in terms of the need for additional healthcare provision for future residents, meaning that planning obligations or financial contributions for new healthcare facilities are necessary. The requirement that London boroughs recognise the role large sites can play in delivering necessary health facilities is critical.</p>	<p>Noted. The Council recognises the importance of ensure the population benefits from access to high quality health and social care in Lewisham. The Local Plan sets the framework to ensure that new development is appropriately supported by such infrastructure.</p>	<p>No change.</p>

			<p>Similarly, cumulative development can place incremental pressure on health services and the Council should actively engage with the NHS to ensure an equitable share of Community Infrastructure Levy funding is secured for healthcare developments and services. NHSPS will be working with the Council and CCG to ensure such funding is made available.</p> <p>NHSPS are also aware that the Council currently has a Community Infrastructure Levy charge of £103.17 per sqm on 'all other uses'. NHSPS have previously raised concerns about this charge via the Councils consultation on its Preliminary Draft Charging Schedule, September 2018. Without further detail, it is assumed that 'all other uses' also includes the provision of new, publicly funded, healthcare buildings.</p> <p>It should be noted that healthcare uses do not</p>	<p>Part 4 of the Local Plan deals with delivery, including arrangements to secure infrastructure. Policy DM2 sets out a list of areas where planning obligations may be sought, and this includes social and community infrastructure. The Infrastructure Delivery Plan also includes a section on health and care facilities, which will provide a link to relevant CIL spend over the plan period.</p> <p>The CIL Charging Schedule and CIL Rates are</p>	
--	--	--	---	---	--

		<p>generally accommodate revenue-generating operations and have operating costs that are often higher than the income they receive. They therefore require public subsidy and many of these developments will also be infrastructure themselves, which the Community Infrastructure Levy may be required to fund.</p> <p>Therefore, the Councils Charging Schedule should have a nil rate on healthcare buildings, as any charge could prevent the ability of the NHS to deliver the new infrastructure that is required to support Lewisham's aspirations for growth within the Plan.</p> <p>We would therefore request that both healthcare floorspace and any developments involving the NHS Estate should, without exception, be attributed at zero rate on the Charging Schedule.</p>	<p>outside the scope of the Local Plan.</p>	
--	--	--	---	--

Port of London Authority	4	DM 02	<p>14. Policy DM2: Infrastructure funding and planning obligations.</p> <p>Support the policy but consider that the list of areas where planning obligations may be sought, highlighted in part E is amended to include green and blue infrastructure, to emphasise the importance of the boroughs various waterways.</p>	Noted.	Local Plan amended to refer green and blue infrastructure in list of planning obligations, as suggested.
Transport for London	4	DM 02	<p>Part E lists a number of issues that may be addressed through planning obligations, however, there is currently no indication of their priority should financial viability issues arise. Part E should be amended to make it clear that affordable housing and transport infrastructure share equal highest priority, as set out in the London Plan.</p> <p>With the changes to the CIL Regulations (2010) last year, there is now greater flexibility in terms of how CIL and s106 work together and fund infrastructure. This requires a certain level of detail to understand what infrastructure is intended to be funded</p>	<p>Noted.</p> <p>Local Plan DM02 supporting text makes clear that affordable housing and transport infrastructure share equal highest priority in accordance with the London Plan.</p> <p>Local Plan amended to include formulaic</p>	Local Plan amended to include formulaic approaches to calculating planning contributions, where appropriate, informed by Viability Assessment Update.

			<p>through CIL and which is to be funded through s106, or indeed a combination of the two. Recent changes in government guidance now also require that any formulaic approach to s106 obligations is set out in the local plan, and as the previous Lewisham Planning Obligations SPD was adopted in 2015, you may wish to consider the obligations that could be addressed through a standard calculation or tariff-based approach and clearly set those out within the new local plan. You may also consider updating the Planning Obligations SPD in parallel with the local plan process to ensure that the Borough's approach to developer contributions is clear.</p>	<p>approaches to calculating planning contributions, where appropriate. The council envisages commencing work on an update to the Planning Obligations SPD as the local plan progresses towards adoption.</p>	
Transport for London	4	DM 02	<p>Whilst DM2 references planning obligations in connection with public transport improvements, it should explicitly reference the BLE. It remains TfL's view that it would be advantageous for the Borough to commit to identifying how planning obligations can support the</p>	<p>No decision has been made on this issues so this would be premature to include within the Local Plan.</p>	<p>No change.</p>

			<p>funding of the BLE, as there will be an expectation that significant developer contributions would be needed with the possibility of other Borough funding avenues. Using a dedicated proportion of CIL, or other levy could alleviate uncertainty for developers as to the obligations required, and reflect the relationship between the BLE and its role in unlocking developments in Lewisham. Currently, there is no formula set out as to how contributions could be calculated. Consideration of a formula/mechanism should be developed to capture monies or land needed for the BLE. Furthermore, we ask land to be safeguarded and routes provided to and from stations.</p>		
Blackheath Society no 2	4	DM 03	<p>DM3 Masterplans and comprehensive development. Masterplans need to cover broader areas, not just individual sites, so that there is more strategic, coordinated and holistic planning for areas, rather than competitive, defensive focus on individual</p>	<p>Noted. The Local Plan sets out the spatial strategy for the Borough, which will help to ensure a coordinated approach to</p>	<p>No change.</p>

			<p>sites that causes escalation of height, density, style etc. through precedent, plus a lack of sharing of the costs of amenity improvements and a hotchpotch result. Lewisham town centre is a prime example of failure over the past 10 years, Blackheath Hill is a very recent emerging example, and Lee Green looks to be in danger of a repeat of this trend.</p>	<p>managing growth and development, along with new investment. The Council has, and may in the future, prepare area-based frameworks where significant growth is planned and it considers additional guidance is necessary. Site masterplans are an important tool used to support planning applications, and to demonstrate how development proposals will support the delivery of the spatial strategy.</p>	
--	--	--	---	---	--

NHS (HUDU)	4	DM 03	<p>DM3 Infrastructure funding and planning obligations</p> <p>The wording of clause D ‘having regard to the policy requirements of the statutory Development Plan’ makes it essential that the individual policies including site allocations refer to the requirement to expand health infrastructure capacity for the plan to positively meet the housing and population growth it sets out.</p> <p>Paragraph 19.12 refers to a new SPD Planning Obligations being published. We look forward to working with the Council to reference and implement the NHS HUDU Planning Obligations Model as required by the London Plan.</p>	<p>Noted. The requirement for development proposals to plan positively for and support the delivery of community infrastructure is set out in draft Local Plan Part 2 policy CI1 Safeguarding and securing community infrastructure.</p> <p>The Council will engage with the NHS on the preparation of any future review and update to its Planning Obligations Guidance SPD.</p>	Noted.
	4	DM 05	<p>A true ‘vision’ for the future is what is needed, one that accepts the effects of COVID-19 and Brexit, neither of which have fed into this strategic document. We would therefore</p>	Noted.	

			welcome a more flexible and evolving set of strategies that could be reviewed as the effects from these on the built environment, the economy and the community are felt, understood and, as the report suggested, be ready to respond to changes in wider planning context. A more agile and flexible standpoint is needed. We would welcome a commitment to reviewing the Local Plan periodically to ensure targets are set, being reached and objectives respond to the changing and evolving needs of the borough.		
Blackheath Society no 2	4	DM 05 Table 19.1	<p>Table 19.1: Monitoring framework. Some targets seem very unambitious and occasionally complacent/unrealistic/unclear :</p> <p>LP15 Cultural infrastructure (venues & facilities). Unambitious given focus on culture and creativity. No list of such venues/facilities. Specific problem of facilities just across borough border (e.g. Blackheath Halls, Blackheath Conservatoire, Age Exchange</p>	<p>LP16 – We have strengthened our pubs policy to try and resist there redevelopment.</p> <p>LP17 – We have corresponded with our community’s team regarding community infrastructure –</p>	Noted

		<p>and its library, which are all in RBG but serve many Lewisham borough residents). How to measure: each venue not of equal value. Realistic?</p> <p>LP16 Public houses. No net loss. Unrealistic if for continuing in use as pubs, which are closing nationwide due to changing lifestyles. Need to retain and support good neighbourhood pubs or repurpose if heritage buildings.</p> <p>LP17 Community infrastructure. No net loss. Unambitious given forecast growth in population and new housing. Particularly important to retain and expand in areas of intense development, especially North and Central Areas.</p> <p>LP18 Open space. No net loss (designated). Unambitious, especially in the face of a rising population, lessons learned from covid about the importance of good quality and safe open space. And specifically green space? Is there a baseline for this, split between public and private (including gardens)? This needs</p>	<p>No further need was identified.</p>	
--	--	--	--	--

			<p>protecting and expanding, for reasons of health, well-being and carbon reduction, as well as to contribute to the Mayor's ambition of a green city (>50% overall).</p> <p>LPxx. No targets on capital spending (including CIL) on basic infrastructure to support new housing and other development.</p> <p>LP25-27 Housing & Workspace. What does 'in the character area' mean? Does it mean in each/all five character areas? If so, it is too vague, untargeted and uncalibrated. If not, it should specify by area, as in Table 13.1 on page 473</p>		
Blackheath Society no 2	4	DM 05	<p>DM5 Monitoring and review. Need to be careful of planning decisions driven by targets creating perverse incentives. Need to be realistic about timescale. Need targets for each 5 years of Plan's 20 years (as well as routine annual reporting monitoring review), then formal review, evaluation and change where needed. D Welcome focus on viability review regarding land values but other things will change</p>	Noted	DM5 amended to include 5 year review in line with the NPPF.

			e.g. population growth; retail habits; relative values of residential, commercial etc. use; impact of big transport infrastructure changes; etc.		
Deptford Society	4	DM 05 Table 19.1	<p>Page 805, table 19.1 (LPis) LPI18 - open space. We consider 'no net loss' to be a poor aspiration and would encourage the council to set a target to increase the amount of open space.</p> <p>Does the definition of 'open space' mean space that is publicly accessible? If not, a distinction should be made in any monitoring figures between the two.</p>	Disagree. Draft Local Plan monitor LPI18 is considered appropriate given the Local Plan objectives to protect open space. This will also help to support implementation and review of policies concerning acceptable loss of open space. However it is recognised that further monitors in the green infrastructure section could be added.	<p>Local Plan Policy GR2 amended to make clear distinction between open and green spaces.</p> <p>Further monitors in the green infrastructure section added to monitoring framework.</p>
Deptford Society	4	DM 05 Table 19.1	Page 805 , table 19.1 (LPis) LPI21 Air quality. Likewise we consider the LPI relating to air	Noted.	Further monitor on air quality added to monitoring framework, focussed on achievement of air quality objectives.

			<p>quality to be extremely unimaginative. It does nothing to drive improvements to the borough's existing air quality, which in some places (especially around the main roads in Deptford and New Cross) is already known to be extremely poor.</p>		
Environment Agency	4	DM 05	<p>We recommend the monitoring section of the new Local Plan could be updated to include annual updates on the total metres of rivers restored/improved, number of pollution incidents and m2 of urban greening e.g. areas of new/improved green spaces delivered such as parkland, riverside buffer zones and green roofs/walls.</p> <p>This will show how the positive new local plan policies on Green Infrastructure and climate change are delivering the policy objectives for environmental outcomes and urban greening, river restoration and adapting to climate change.</p>	Noted.	Further monitors in the green infrastructure section added to monitoring framework, including on river corridor improvement.
Historic England	4	DM 05	<p>Monitoring: It should be noted that the new London Plan</p>	Noted. The London Plan	Further monitors included on heritage and historic environment.

			<p>policy M1 (Monitoring) contains a new Key Performance Indicator relating to heritage. This is intended to monitor whether the applications that the GLA are consulted on have a beneficial, neutral or harmful impact on the historic environment – we would commend this approach to the Council in its monitoring framework.</p>	<p>monitors cover development activity in Lewisham in terms of referable applications. The Local Plan monitoring framework will be amended with additional monitors on heritage.</p>	
London Wildlife Trust	4	DM 05	<p>In Table 19.1 Monitoring framework, Green Infrastructure only has one measure, that of Open Space (LP18; No net loss of designated open space). We suggest another; no net loss in quantity of Sites of Importance for Nature Conservation.</p>	Noted.	Further monitors in the green infrastructure section added to monitoring framework.
NHS (HUDU)	4	DM 05 Table 19.1	<p>DM5 Monitoring and Review Table 19.1 which sets out Local Performance Indicators does not link the indicators to the vision and strategic objectives set out at the beginning of the Local Plan. Unfortunately, this makes it difficult to measure progress against the objectives.</p>	<p>Noted. The Local Plan monitoring framework has been reviewed and updated. Health is a cross-cutting issue so this topic area will</p>	Further monitors added to monitoring framework, including monitors to measure improvement in addressing deprivation.

		<p>There are no indicators relating to health and wellbeing. For Community Infrastructure the indicator is no net loss. (LP1 17)</p> <p>Given the scale of population growth set out in the local plan and that much of the existing community and social infrastructure is poor quality this indicator needs to measure the provision of new and fit for purpose community infrastructure, or new /improved infrastructure by area. For successful delivery of the local plan infrastructure needs to be provided when and where it is needed.</p> <p>We suggest local performance indicators for Strategic Objectives G, H and I</p> <p><u>G Healthy and Safe Communities</u></p> <p>16. Measure (reduction) in health inequalities, particularly in geographic areas falling with the most deprived communities (IMD 2019).</p> <p>17. % of the street network meeting the Healthy Street principles or scoring X</p>	<p>be addressed by the revisions.</p>	
--	--	--	---------------------------------------	--

			<p>18. No /% of developments which meet the policy requirement (35/50%) genuinely Affordable Housing within a tenure blind design.</p> <p>19. Reduction in crime and fear of crime.</p> <p><u>H Securing the Timely Delivery of Infrastructure</u></p> <p>20. % of the infrastructure set out in the IDP delivered alongside with housing development</p> <p><u>I Ensuring High Quality Education, Health and Social Care</u></p> <p>22. Increase in residents accessing high quality education, health and social care facilities (baseline required to measure increase)</p>		
The St John's Society	4	DM 05	<p>There is a lack of measurable targets – how will Lewisham assess whether the Plan has been followed?</p> <p>Need 5 yearly targets and review.</p>	Noted.	Noted. The Local Plan monitoring framework has been reviewed and updated with additional monitors.
The St John's Society	4	Enforcement	<p>DELIVERY AND MONITORING</p> <p>The current planning enforcement needs to be stricter, tighter, and better funded. There needs to be</p>	Planning enforcement is outside the scope of the Local Plan.	Local Plan amended with a point about the use of planning enforcement in the delivery section.

			<p>much better enforcement with adequate resources and means to ensure much of the good work in the plan is realised. Without this deterrent, unplanned and even illegal development will continue.</p>	<p>However a point about the use of planning enforcement will be included in the delivery section.</p>	
Blackheath Society no 2	5		<p>App 2 Glossary: night-time economy (43 refs incl. re Blackheath) not defined here or in EC18. Appears to be 6pm-6am.6pm-12pm more appropriate for Blackheath which is not like Lewisham and Catford, which have more in common with central London. Design-led approach (54 refs) is not defined, although key to QD policies</p>	<p>Further details are set out in the London Plan. The council will use conditions to ensure operating hours are appropriate for the use and location.</p>	No change.
Blackheath Society no 2	5		<p>Sch 1 Strategic and local views, vistas and landmarks – few local views, none on/in/from Blackheath Village or Heath. Several needed, in all directions.</p>	<p>We are not considering more view within this version of the Local Plan</p>	No change

HopCroft Neighbourhood Forum	5	Section 21	Schedule 3 – non designated heritage assets should include Buckthorne Cutting in ASLC section.	Buckthorne Cutting is not designated as an ASLC	No change

Lewisham Local Plan

Regulation 18 consultation statement

Appendix 2 – Regulation 18 Draft Local Plan Written Responses Split Landowners

September 2022

Organisation (if relevant)	Part	Section, policy or paragraph	Comment	Council officer response	Action
L&Q Group	-	General	Moreover, at 865 pages, we consider the draft Local Plan is too long and could be shortened considerably. The Planning White Paper "Planning for the Future" (August 2020) directs that Local Plans should set clear rules rather than general policies for development, should be significantly shorter in length, and limited to no more than setting out site- or area-specific parameters and opportunities. In instances it is considered with appropriate checks in place via planning application requirements, could result in the removal of significant reduction in length of policies e.g. SD12 Ground Conditions; and number of design policies which are effectively repeats of the London Plan policies e.g. QC5 View Management and QD6 Optimising Site Capacity.	Noted. Policies have been included within the Local Plan where they provide useful local interpretation, to aid the implementation of the London Plan policies. It is acknowledged that there is some repetition of London Plan policies in parts of the plan however this is similar to approach taken by other London boroughs in their plans.	Local Plan reviewed and amended to reduce repetition and make more concise.
Artworks Creekside (Avison Young obo)	1	Vision and Strategic Objectives	<i>Relates to Part 3, LNA SA 16</i> Artworks Creekside support the Vision for Lewisham as set out in the draft Local Plan, that Deptford will emerge as a cultural hub and that the Council will supports local businesses, arts and cultural establishments, and where people thrive. The Strategic Objectives which accompany the Vision support the creation of inclusive, mixed and balanced neighbourhoods, making the best use of employment land to increase the number of jobs and provide suitable spaces for businesses, and making optimal use of land through the regeneration of Opportunity Areas.	Support noted.	No change.
Tribe Student Housing (Avison Young obo)	1	Vision and Strategic Objectives	<i>Relates to Part 3, LNA SA 06</i> Local Plan: Main Issues and Preferred Approaches Document The draft Local Plan sets out a shared vision for the future of the Borough through to 2040. The Plan identifies a number of strategic objectives for the borough over this timeframe, including meeting population growth and housing need, economic growth and job opportunities and creating healthy and safe communities. Our client supports the aspirations for the Local Plan.	Support noted.	No change.
Trundle's Road Ltd (Avison Young obo)	1	Vision and Strategic Objectives	<i>Relates to Part 3, LNA SA 06</i> Local Plan: Main Issues and Preferred Approaches Document The draft Local Plan sets out a shared vision for the future of the Borough through to 2040. The Plan identifies a number of strategic objectives for the borough over this timeframe, including meeting population growth and housing need, economic growth and job opportunities and creating healthy and safe communities. Our client supports the aspirations for the Local Plan.	Support noted.	No change.
Fifth State and (Avison Young obo)	1	Vision and Strategic	<i>Relates to Part 3, LNA SA 16</i> The Owners and Developer support the vision for Lewisham as set out in the draft Local Plan, in particular that Lewisham will continue to be a dynamic place	Support noted.	No change.

		Objectives	<p>which supports local businesses, arts and cultural establishments, and where people thrive.</p> <p>The Strategic Objectives which accompany the Vision support the creation of inclusive, mixed and balanced neighbourhoods, making the best use of employment land to increase the number of jobs and provide suitable spaces for businesses, and making optimal use of land through the regeneration of Opportunity Areas.</p>		
Freeths LLP (K/S Lewisham obo)	1	Vision	<p>K/S supports as a matter of principle the strategic growth aims of the Local Plan, particularly as they relate to Lewisham Town Centre where the Site is located. As a committed investor and manager in the Town Centre, K/S welcomes the direction and vision identified in the Plan as it is essential that there is a clear and ambitious set of objectives for the Town Centre so it can continue to evolve and grow particularly against the challenging economic and social backdrop.</p>	Support noted.	No change.
Tetra Tech Planning (John Lyon's Charity obo)	1	Vision	<p>The Vision for Lewisham Is there anything you would like to see changed from the Vision for Lewisham?</p> <p>The Council's website states that "The Local Plan presents a vision for how development should shape Lewisham over the next 20 years". We consider that "the Vision" (Page 48) as currently set out fails to do that, instead it makes generalised aspirations such as "We will give people the security and certainty they need so that everyone can live their best lives" and "A place that people want to visit and live in, and where they choose to stay and enjoy a good quality of life". The vision fails to articulate the proposed regeneration, growth and investment considered within Section 3 of the Local Plan; and therefore fails to reflect the "Good Growth Strategy". It fails to provide a direction of travel for the Plan period; and fails to demonstrate how the vision could be delivered through its planning policies. "The Vision" as worded could be describing any town in the UK.</p> <p>A vision needs to be clear, concise, aspirational but realistic. The Vision for Lewisham needs to reflect Lewisham's priorities, describe where and how change will happen and provide a clear sense of how the borough will look in 2040, while operating as a tool to measure the success of the Local Plan. As written, the Vision does not fulfil its requirements.</p>	Noted. The Vision is an overarching, aspirational statement. Further details to help give effect to the Vision are included in the Strategic Objectives. Policy OL1 builds on this to provide details of the spatial strategy and delivery throughout the plan year period. It is noted that each character area in Part 3 includes a more detailed vision, as indicated in the representation, which links to the Borough vision.	No change.
GHL (Leegate) Limited (Frank Knight obo)	1	Strategic Objectives	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Part 1 - Strategic Objectives and the Spatial Strategy The Council have identified that the overall strategic objective over the plan period to 2040 is to sustain and create inclusive neighbourhoods and communities that both reflect and reinforce the diversity and cultural heritage of Lewisham's people and places, by coordinating investment in such a way as to promote equality of opportunity for everyone to enjoy a good quality of life in Lewisham (Strategic Objective A.1). The Council will achieve this through providing housing tailored to the community with genuinely affordable homes (Strategic Objective B).</p> <p>The Council set out that the strategic objectives will be achieved by ensuring that the spatial strategy directly addresses the Local Plan objectives and provides a land use and planning framework to manage growth and guide investment over the next 20 years.</p>	Noted.	No change.

GHL (Leegate) Limited (Frank Knight obo)	1	Strategic Objectives	<p>The spatial strategy states that new investment will be directed to the borough’s strategic areas for regeneration, and other local areas for regeneration, to help tackle deprivation and ensure equality of opportunity. Indeed, GHL supports the Council’s vision and objectives for strategic regeneration. But, we note that proposed site allocations, such as Leegate Shopping Centre, should be regarded as a local area for regeneration such that they can perform a key role in meeting the Council’s overarching vision for the regeneration of the borough, recognising how on-going regeneration of site allocations can act as a catalyst for the improvement of areas such as Lee Green.</p> <p>As such, we request that the Council identifies site allocations as appropriate locations to direct regeneration. This approach would align with National Planning Policy, which promotes the effective use of land, stipulating that strategic policies should “<i>make as much use as possible of previously-developed or brownfield land</i>” (Paragraph 117 of the NPPF).</p> <p>In this regard it is noted that, through the redevelopment of their land interest, GHL is well placed to assist in delivering the Council’s strategic objectives and spatial strategy. Indeed, GHL’s commitment to the regeneration of the Leegate Shopping Centre is demonstrated through on-going engagement with the LPA and other key stakeholders.</p> <p>Overall, GHL supports the Council’s strategic objectives and spatial strategy for the regeneration of the borough and Lee Green District Centre, including the continued focus on making the best use of land and space, and prioritising the redevelopment of brownfield land for new housing, along with optimising the development of site allocations and other smaller sites across the Borough.</p>	Noted. The spatial strategy sets out areas for regeneration consistent with the London Plan and based on local evidence. The Local Plan makes clear the opportunities for regeneration and revitalisation within Lee Green area and the shopping centre site.	No change.
Tetra Tech Planning (John Lyon’s Charity obo)	1	Strategic Objectives	<p>Strategic Objectives Do you have any comments on the strategic objectives?</p> <p>The strategic objectives are clear and represent the key issues for the Council. The majority are locally distinctive. We note Strategic Objective H: “Securing the timely delivery infrastructure” and this includes the delivery of the Bakerloo Line Extension (BLE). The Charity commends the Council’s positive approach to its delivery, and in parallel, we also welcome the Council’s pragmatic approach to the BLE which is set out in the Spatial Strategy Options (please see below for further comments).</p>	Support noted	No change.
Tetra Tech Planning (John Lyon’s Charity obo)	1	Spatial Strategy Options	<p>Do you have any comments on the spatial (growth) strategy scenarios and associated options?</p> <p>Scenario 1, which depicts no BLE, is the “baseline scenario”. This scenario brings forward areas which are a “focus for growth” and a “focus for regeneration” across the Borough, which is fully supported by the Charity. Notwithstanding the absence of the BLE, we note that the Bell Green/Lower Sydenham area is “a focus for regeneration” and the “Site Allocations” outlined within Section 3 of the Regulation 18 Local Plan are taken forward, which is also welcomed and supported by the Charity.</p> <p>Scenario 2, which depicts BLE Phase 1 only, again brings forward those areas which are a “focus for growth” and a “focus for regeneration” which again is fully supported by the Charity.</p>	Support for the differing scenarios and a higher growth strategy should BLE Phase 2 come forward is noted. Agree with the need to ensure consistency between residential units between the Local Plan and the IIA.	Local Plan and IIA have been amended to ensure consistency in residential units. AECOM

			<p>Scenario 3, which depicts both BLE Phases 1 and 2, maintains the approach taken in Scenarios 1 and 2 and also brings forward “intensification in Bell Green”, and “additional intensification in Bell Green”. Frustratingly, there is no further detail provided on the three scenarios within this section of the Local Plan, with paragraph 3.18 stating that “The IIA should be referred for further details on the options as well as assessments of their likely social, environmental and economic impacts”. A review of the Integrated Impact Assessment (IIA) provides clarification on the further details of the scenarios. We note that the Council has undertaken initial work to understand the potential to achieve higher densities at the six Bell Green/Lower Sydenham sites under a scenario with BLE Phase 2; and this could provide as much as 200% uplift in development densities (we understand this to be the “additional intensification”), with 100% also considered appropriate (we understand this to be “intensification”). Table 5.7 within the IIA presents the reasonable growth scenarios in terms of housing numbers for each scenario. The baseline position (Scenario 1) provides for 1,540 units for the six sites and this remains unchanged under Scenario 2 (this figure is in line with the (minimum) “1,543 units” calculated for those six sites in the Site Allocations section of the Local Plan). However, Table 5.7 presents 3,090 units for the 100% uplift scenario and 4,630 units for the 200% uplift under Scenario 3. When adding the maximum indicative housing numbers from the six allocations, there is a total of 3,778 units, which is 851 units less than the 200% uplift number in the IIP. Further clarification is required on the change in unit numbers.</p> <p>The focus for growth and regeneration regardless of BLE is wholly supported and the ambition of the higher growth strategy should the BLE Phase 2 come forward, specifically the higher densities in Bell Green/Lower Sydenham is commended.</p>		
Tetra Tech Planning (John Lyon’s Charity obo)	1	Figure 3.8	The Proposed Growth Strategy (Figure 3.8) now presents “Growth Nodes” and “Regeneration Nodes” as opposed to “Focus for Regeneration” and “Focus for Growth” and the nodes represent wider areas. This Preferred Option presents both Phases 1 and 2 of the BLE.	Comments noted.	Section revised to provide clarity
Tetra Tech Planning (John Lyon’s Charity obo)	1	OL 01	<p>The Preferred Option, Policy OL1 (d) directs new investment to the Borough’s Strategic Area for Regeneration, and other local areas for regeneration, and the Charity supports this designation and the Regeneration Node assigned to Bell Green/Lower Sydenham.</p> <p>Policy OL1 (e) sets out that new and improved community and strategic transport infrastructure including the BLE, will be a catalyst for investment and will unlock the development potential of the Borough. The Charity fully agrees with this view but the absence of BLE Phase 2 should not preclude development or the potential for transformational change to the south of the Borough.</p>	Noted.	Local Plan amended to reflect that growth and development in the south of the borough is not contingent on the BLE but the BLE will help to improve accessibility and optimal use of land.
Transport for London Commercial Development	1	OL 01	<p>OL1 Delivering an Open Lewisham</p> <p>TfL CD supports Policy OL1 criterion Ad which directs new development to principal transport routes, nodes and interchanges. However, TfL CD consider that Policy OL1 should promote development in areas which are well-connected more generally and not just at ‘principal’ locations.</p>	Support noted.	Local Plan spatial strategy amended to promote development in areas which are well-connected.
Fifth State and (Avison Young obo)	1	OL 01	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy OL1 - Delivering an Open Lewisham (spatial strategy)</p> <p>The Owners and Developer of 5-9 Creekside strongly support the strategy to deliver an Open Lewisham as set out in draft Policy OL1. Ensuring that the growth and regeneration potential of Lewisham’s Opportunity Areas, including Deptford</p>	Support noted.	No change.

			Creek / Greenwich Riverside, are fully realised (part a), and promoting the optimisation and intensification of Strategic Sites (Part F) will ensure that development potential is able to be maximised and will encourage the most efficient use of land, in line with paragraph 122 of the NPPF. Fifth State also support Part G of the draft policy which requires development to be delivered through a design-led approach which is informed by an understanding of the local area character in order to secure liveable communities that are inclusive to all.		
L&Q Group	1 1	OL 01 Para 3.40	<i>Relates to Call for site</i> 3. Overview of Representations L&Q is supportive of the overall vision of London Borough Lewisham (“LBL”) and your aim to plan positively to meet identified development needs through the draft Local Plan. This includes supporting well integrated, higher density and mixed-use developments (para 3.40). However, there are some areas in the draft Local Plan where L&Q consider amendments and / or more detail is required to make the policies more usable and effective.	Support noted.	No change.
Yorkshire & Clydesdale Bank Trustees Ltd c/o CBRE Global Investors (Montagu-Evans obo)	1	OL 01	<i>Relates to Call for site</i> Policy OL1 Delivering an Open Lewisham (spatial strategy) Draft Policy OL1 sets out the Council’s strategic policy on delivering its core objectives for meeting development needs, which focuses on ensuring the growth and regeneration of Opportunity Areas are realised, as well as directing investment to Areas of Regeneration. Draft Policy OL1 goes on to note the Council will proactively seek to make the best use of land by prioritising the redevelopment of brownfield land for housing and workspace, including through intensification. We consider this approach to be logical and compliant with national policy, which requires optimisation of previously developed land for development, and patterns of growth to be focused on locations which are sustainable, thus reducing the need to travel and offering a choice of transport modes. Through application of these criteria, the Council identifies Deptford Creek / Greenwich Riverside Opportunity Area as a location that will accommodate a significant proportion of the Council’s growth, which is to be focused on site allocations in the emerging Plan. We support the general acknowledgement from the Council that high density, strategic scale development will be encouraged in such locations, which is consistent with the London Plan, but recommend that Policy OL1 explicitly supports opportunities to intensify and make more efficient use of designated employment land as this is fundamental to the deliverability of the emerging Plan. As a result it should be fed into the Plan’s overarching policy which then cascades through its employment policies where a number of designated employment sites are recommended for allocation.	Noted. The spatial strategy sets out principles for locations to direct growth and development, whilst making the optimal use of land. It does not necessarily distinguish between different types of uses. Making the optimal use of employment land is clearly set out in the Part 2 policies on Economy and Culture, which builds on the spatial strategy.	No change.
Albacore Meeting Room Trust (Lichfields obo)	1	OL 01	<i>Relates to Call for site</i> (b) Spatial Strategy Options: (OL1) Delivering an Open Lewisham (Spatial Strategy) Following from this, the Trust supports LBL’s intention to direct new investment to the strategic area for regeneration, which includes Beckenham Hill road (‘part b’). The Trust particularly supports part ‘f’ of OL1 which states the Borough’s intention, in line with National and London Plan Policy, to proactively seek to	Support noted. Optimising the use of brownfield sites is reflected in the spatial strategy and elsewhere in the plan.	No change.

			<p>make the best use of land and space and prioritise the redevelopment of brownfield land to meet local needs.</p> <p>Part 'g', which requires all new development to be delivered through the 'design-led approach', is also supported. It will be important to ensure that LBL optimises use of its brownfield land to assist with meeting development needs, including for community uses. This approach is supported by the NPPF (paras 117 and 118c).</p>		
GHL (Leegate) Limited (Frank Knight obo)	1	OL 01	<p>Policy OL1 (Delivering an Open Lewisham – Spatial Strategy) explains that the Council will promote a vibrant and diverse multi-centred borough by directing new residential, commercial, community, leisure and cultural development to Lewisham's town, district and local centres, in order to support their vitality and long-term resilience. LBL will ensure that district centres, such as Lee Green, retain their distinctive features, whilst evolving in their function as key hubs of community, cultural and commercial activity.</p> <p>GHL broadly supports the proposed strategic priorities and spatial strategy in the Lewisham Local Plan Review, and it is welcomed that the Council acknowledges, and intends to respond to, the need for flexibility of land uses within Lewisham's town, district and local centres.</p>	Support noted.	No change.
LaSalle Investment Management (Savills obo)	1	OL 01	<p><i>Relates to Part 3, LSA SA 10</i></p> <p>Part One: Vision, Strategic Objectives, and the Spatial Strategy</p> <p>OL1 Delivering an Open Lewisham</p> <p>LSIM support the Vision, Strategic Objectives and Spatial Strategy for the Borough. This specifically includes the intention to facilitate new development along the north-south A21 corridor (Lewisham High Street, Rushey Green and Bromley Road).</p> <p>To help realise these aspirations, LSIM would strongly advocate that the Council captures greater potential for the redevelopment and / or intensification of existing commercial 'brownfield sites' within the spatial strategy. Such sites provide an opportunity for intensification of quantum and diversification of uses, including residential, which may support the existing commercial operations that exist.</p> <p>The aspiration to evolve from single use areas to mixed use neighbourhoods, including the provision of higher densities, is essential in order to deliver the wider objectives relating to growth. Critical to the success of the transformation will be the integration of old and new and the Plan needs to establish some clear objectives to ensure that goal is achieved.</p>	Support noted.	No change.

				capacities for sites will be established at planning application stage through a design led approach.	
Artworks Creekside (Avison Young obo)	1	OL 01	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Comments on Local Plan Main Issues and Preferred Approaches Document</p> <p>A series of comments are provided below in respect of various sections of the Local Plan Main Issues and Preferred Approaches Document which are of relevance to the proposed redevelopment of 2 Creekside and 3 Creekside.</p> <p>Draft Policy OL1 - Delivering an Open Lewisham (spatial strategy)</p> <p>Artworks Creekside strongly support the strategy to deliver an Open Lewisham as set out in draft Policy OL1, in particular the strategic objective of ensuring that the growth and regeneration potential of Lewisham’s Opportunity Areas, including Deptford Creek / Greenwich Riverside, are fully realised (part a), and promoting the optimisation and intensification of Strategic Sites and brownfield land for new housing and workspace (Part f) will ensure that development potential is able to be maximised and will encourage the most efficient use of land.</p> <p>Artworks Creekside also support Part g of the draft policy which requires development to be delivered through a design-led approach which is informed by an understanding of the local area character in order to secure liveable communities that are inclusive to all.</p>	Support noted.	No change.
L&Q Group	2	Section 5	<p><i>Relates to Call for site</i></p> <p>4. Detailed Comments</p> <p>The following summarises L&Q’s comments on relevant policies of the Local Plan in turn.</p> <p>4.1 High quality design</p> <p>L&Q supports the Council’s ambition for new developments to be design led to deliver high-quality inclusive developments, which responds to the local context alongside considering the most optimal use for the land, to support the delivery of LBL spatial strategy.</p>	Support noted. Comments to additional representations set out elsewhere in the Consultation Statement.	No change.
Tetra Tech Planning (John Lyon’s Charity obo)	2	Chapter 05	<p>High Quality Design</p> <p>Do you agree that the Local Plan has identified all of the issues around design quality?</p> <p>Yes, the design chapter is very detailed, covers all expected areas and broadly accords with policies within the new London Plan (2021). The Charity supports a design-led approach to all development proposals.</p>	Support noted.	No change.
L&Q Group	2 2 2 2	QD 01 QD 04 Para 5.31 Figure 5.1	<p><i>Relates to Call for site</i></p> <p>Tall buildings</p> <p>This includes optimising the use of land through comprehensive redevelopment of strategic sites (i.e. site allocations) and recognising it may be necessary to build higher in some places, including tall buildings, so they can support the strategic objectives of the borough, and deliver wider public benefits such as genuinely affordable housing (para 5.31).</p> <p>The Lewisham Characterisation Study (2019) provides an analysis of the character of various areas within the borough. L&Q supports LBL’s recognition in Policy QD1 (Delivering high quality design in Lewisham) that proposals should</p>	Noted. Noted. In response to public consultation feedback on the Regulation 18 plan, it is considered necessary to update Policy QD4 to ensure conformity with the London Plan, and also taking into account the Tall Buildings Study Addendum (2022).	Policy QD4 amended throughout to ensure conformity with the London Plan, with revisions also informed by the Tall Buildings Study Addendum (2022). Policy QD4 amended to include reference to DM4 (Masterplans and

			<p>take account of the “prevailing and emerging form of development”. Taking that into account, L&Q agree it is appropriate that all of Deptford is considered suitable for tall buildings, as shown in Figure 5.1.</p> <p>Policy QD1 C) indicates that proposals for taller buildings will be considered having regard to the emerging context and criteria QD4.B(e)- QD4.B(f) above. However, item QD4.B(f) is missing from the text so we do not know what the final criteria is in this assessment.</p> <p>Policy QD1 G) states that tall buildings are to be delivered through masterplan process. More detail is required on what this entails and how it is capture in the planning application process.</p> <p>We note in the recent Secretary of State (SoS) direction on the London Plan, changes have been made in relation to higher density buildings (Policy D3). Notably, SoS states that design of development must optimise capacity and where there are existing clusters of high-density buildings, expansion of the clusters should be positively considered by Boroughs. This should be incorporated into the policy text.</p>		comprehensive development), which provides further details to support policy implementation.
GHL (Leegate) Limited (Frank Knight obo)	2	QD 01	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Part 2 – Development Management Policies</p> <p>1. High Quality Design</p> <p>The Council continues to promote the delivery of high-quality design in Lewisham through a design-led approach (Policy QD1, Delivering high quality design in Lewisham), stating that buildings and spaces must be welcoming, inclusive, safe and accessible to all, and that proposals should facilitate good physical and mental health. GHL supports the premise of Policy QD1 which reflects the Mayor’s vision for ‘Good Growth’ set out in the London Plan 2021.</p>	Support noted.	No change.
Artworks Creekside (Avison Young obo)	2	QD 01	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy QD1 – Delivering high quality design in Lewisham</p> <p>The draft policy advocates a design-led approach to development which ensures that the review of design options at an early stage of the development process are informed by an understanding of the local context. Our pre-application discussions with Council Officers to date have been undertaken on an iterative process and which has sought to understand the local context first, before then building a re-development strategy that responds to the specific characteristics found within Creekside.</p>	Noted.	Local Plan amended to emphasise local distinctiveness and site context within the design-led approach.
Fifth State and (Avison Young obo)	2	QD 01	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy QD1 – Delivering high quality design in Lewisham</p> <p>Whilst the Owners and Developer of 5-9 Creekside support, in principle, the draft policy which advocates a design-led approach to development, it is considered that in order to reflect London Plan Policy D3 (optimising site capacity through the design-led approach), <u>further text should be added which positively promotes optimising the capacity of sites, including site allocations, providing policy support for higher density developments in well connected locations.</u> In our view, the proposed amends would ensure the policy is consistent with national and strategic policy and would subsequently enable the delivery of sustainable development in accordance with the NPPF and London Plan.</p>	Noted. The draft Local Plan already includes policies which seek to make the best use of land and optimise the capacity of sites. However, it is acknowledged this could be included in the Policy OL1 to set a clear direction linked to the spatial strategy.	Policy OL1 amended to make a specific reference to making the optimal use of land.
Transport for London	2	QD 01	<p>QD1 Delivering High Quality Design in Lewisham</p> <p>TfL CD appreciate that local character is an important consideration in the design of new development schemes. However, it is considered that as currently written</p>	Noted. Policies have been included within the Local Plan where they provide	Local Plan reviewed and amended to reduce repetition and make

Commercial Development			<p>the policy could discourage innovation or change, which is not in line with paragraph 127 of the National Planning Policy Framework 2019 (NPPF) which states that:</p> <p><i>“planning policies and decisions should ensure that developments are sympathetic to local character and history, including the surrounding built environment and landscape setting, while not preventing or discouraging appropriate innovation or change (such as increased densities)”</i></p> <p>It is recommended that this policy is amended to reflect the sentiment of the above NPPF paragraph. It is also considered that criterion B and C are repetitive, and that B, C and D could be joined to make the policy more succinct.</p>	<p>useful local interpretation, to aid the implementation of the London Plan policies. It is acknowledged that there is some repetition of London Plan policies in parts of the plan however this is similar to approach taken by other London boroughs in their plans.</p>	<p>more concise, thereby shortening the length of the Local Plan.</p>
SGN (Quod obo)	2	QD 01	<p><i>Relates to Part 3, LSA SA 01</i></p> <p>Chapter 5 - High Quality Design</p> <p>5.4 SGN support the overarching design objective of ensuring that all new developments must follow a design-led approach in delivering high quality buildings in Lewisham. This is consistent with London Plan Policy D3. SGN recognise and support Lewisham’s aspirations at draft Policy QD1 ‘Delivery high quality design in Lewisham’ in ensuring that all new developments should respond positively to local distinctiveness; should put people at the centre of the design-led approach; should secure a coherent and well-function relationship with all land uses and spaces within the site and its surroundings and deliver high quality developments.</p>	<p>Support noted.</p>	<p>No change.</p>
Phoenix Community Housing (BPTW obo)	2	QD 01	<p>High Quality Design</p> <p>We support the shift to using a design-led approach to determining the most appropriate form of development and site capacity, set out in policies QD1 and QD6, and we will be commenting separately on the Small Sites Design Guide SPD which will be useful guidance filling the void left by the rescinding of the London Plan density matrix. It is agreed that the capacity of infrastructure should be an influencing factor on site capacity, with regard to individual and cumulative impacts of development. However, it should be noted that incremental development has a vital role to play in supporting the vitality of existing and viability of additional public and active transport infrastructure in more peripheral areas. This should be a positive factor on site capacity subject to appropriate measures being incorporated to maximise their uptake – for instance restricted vehicular parking and high quality, accessible and inclusive cycle parking.</p>	<p>Noted. The Local Plan broadly seeks to support the sensitive intensification of established residential and commercial areas. This is set out in Policy OL1 as part of the spatial strategy. Furthermore, draft Local Plan Policy housing policies give effect to this approach, for example, through promotion of small housing sites. The draft policies provide that new development should enable and encourage movement by walking, cycling and the use of public transport, and that new development must be appropriately supported by infrastructure.</p> <p>The preparation of the Small Sites SPD is outside the scope of the Local Plan.</p>	<p>No change.</p>
QUOD (Landsec obo - Lewisham)	2 2	QD 01 QD 02	<p>9 Chapter 5 High Quality Design</p>	<p>Support is noted.</p>	<p>No change.</p>

Shopping Centre)	2	QD 03	<p>9.1 Chapter 5 contains key policies on high quality design aiming to ensure that growth is character-led; promoting inclusive and liveable neighbourhoods; and making best use of land.</p> <p>Design Principles</p> <p>9.2 Landsec support the overarching design objective of ensuring that all new developments must follow a design-led approach in delivering high quality buildings in Lewisham. Landsec recognise and support Lewisham’s aspirations at draft Policy QD1 ‘Delivery high quality design in Lewisham’ in ensuring that all new developments should respond positively to local distinctiveness; should put people at the centre of the design-led approach; should secure a coherent and well-function relationship with all land uses and spaces within the site and its surroundings and deliver high quality developments.</p> <p>9.3 The design principles relating to inclusive and safe design (draft Policy QD2) and public realm and connecting places (draft Policy QD3) are also welcomed.</p>		
Lendlease (Lichfields obo)	2	QD 02	<p><i>Relates to Part 3, LNA SA 02</i></p> <p>High Quality Design</p> <p>Lendlease is supportive of Lewisham’s ambitions to ensure new development follows a design-led approach, and that both design and the public realm are accessible, inclusive and high-quality.</p> <p><i>Policy QD2 – Inclusive and Safe Design</i></p> <p>As noted above, much of this policy unnecessarily replicates existing 2021 London Plan policy and should be made more concise.</p> <p>Part E refers to the provision of communal private amenity space and facilities, noting that ‘<i>this should be made available for access by all residents occupying the development, regardless of tenure.</i>’ Lendlease note that in large developments management issues can often make this policy unfeasible, for example where rooftop space is provided as communal space.</p> <p>Although some communal spaces, such as play space, should be accessible to all, this policy would be better worded along the lines of ‘all residents should have access to the <u>same quality and standard of communal space across a development, regardless of tenure.</u>’</p>	Noted. Disagree with suggested policy wording as this is considered contrary to London Plan and the Government’s National Design Guide on tenure neutral housing. However it is acknowledged that the policy could be amended to provide more clarification around the need for appropriate management of any such private communal amenity space.	Local Plan Policy QD2 amended to include criterion on appropriate management of private and communal amenity space, along with a reference to Government’s National Design Guide and tenure neutral housing.
Barratt London and the Church Commissioners (Avison Young obo)	2	QD 02	<p><i>Relates to Part 3, LCA SA 20</i></p> <p>Chapter 5 High Quality Design</p> <p>Draft Policy QD2 Inclusive and safe design</p> <p>Barratt London and the Church Commissioners support the principles of this Draft Policy to contribute to delivering inclusive, accessible, safe and secure environments in Lewisham.</p> <p>Part B(b) and Part E refer to access to all buildings and spaces being made available to all residents occupying the development, with Part B(b) requiring buildings and spaces to be designed to be inclusive to all and ‘not unnecessarily restrict or prevent access and use, including by occupants of different tenure types’ (our underlining). The current wording of these parts of the Draft Policy could give rise to significant security and management issues at the occupation stage. Part B(e) is clear that development proposals must have regard to ‘Secured by Design’ principles and supporting para 5.14 states proposals will be expected</p>	Noted.	Local Plan Policy QD2 amended to include criterion on appropriate management of private and communal amenity space, along with a reference to Government’s National Design Guide and tenure neutral housing.

			<p>to demonstrate that they have engaged with the latest standing guidance on 'Secure by Design', and we highlight that Part B(b) and Part E in their current form conflict with this. In particular, the Secured by Design Homes Guide (2019) which sets out the current standards is clear at Para 27.29 that 'developments of over 25 flats, apartments, bedsits or bedrooms can suffer adversely from anti-social behaviour due to unrestricted access to all areas and floors of the building. SBD therefore seeks to prevent unlawful free movement throughout the building through the use of an access control system'. The Guide sets out that an acceptable approach is that each resident be assigned access to their floor only from lift/stairwells via an encrypted electronic key/fob, and access to stairwells from communal lobbies be restricted to residents only to reduce the risk of anti-social behaviour or criminal activities. The current wording of Part B(b) and Part E clearly conflicts with the Secured by Design Homes Guide (2019), and therefore also conflicts Part B(e) and supporting para 5.14 of Draft Policy QD2.</p> <p>In addition, large developments which contain many blocks or uses are often owned and/or managed by different parties who may have individual security and management requirements. Of note, affordable housing provision is most often managed separately to the wider housing offer by a Registered Provider (RP), and RPs will likely wish to ensure their residents are not subject to service charges of areas which they rarely use.</p> <p>We, therefore, request the Draft Policy is amended to be clear that 'appropriate restriction of access for management and/or security reasons would be acceptable' within new development schemes.</p>		
SGN (Quod obo)	2 3	QD 02	<p><i>Relates to Part 3, LSA SA 01</i></p> <p>5.5 The design principles relating to inclusive and safe design (draft Policy QD2) are also welcomed.</p>	Support noted.	No change.
Phoenix Community Housing (BPTW obo)	2	QD 02	<p>Accessible and inclusive housing is a cornerstone of PCH's operations, and accordingly the requirement for 10% M4(3) and remainder M4(2) provision in line with the London Plan is wholly supported. However we welcome the flexibility on this built into the supporting text, for instance discretionary lift provision on constrained infill sites. We would suggest the inclusion of further flexibility, for example for schemes that overprovide on affordable housing, or that enables Housing Associations to meet the accessibility requirements across a wider portfolio, given that some sites more easily lend themselves to wheelchair housing.</p>	Noted. Draft Local Plan Policy QD2 Paragraph 5.16 already provides flexibility and that individual site circumstances will be taken into account.	No change.
Lendlease (Lichfields obo)	2	QD 03	<p><i>Relates to Part 3, LNA SA 02</i></p> <p><i>Policy QD3 Public realm and connecting places</i></p> <p>Lendlease is supportive of Lewisham's ambitions for high-quality, design-led public realm. However, much of this policy replicates existing policies, such as London Plan 2021 Policy D8 (Public Realm). This policy should avoid unnecessary repetition and be made more concise.</p> <p>Part G of this policy sets out a number of specific requirements that provision should be made for in the public realm. It is unclear how these will be applied to individual schemes, as many of these requirements seem feasible only for a larger-scale public realm provision. More clarity on how this policy will be applied to individual schemes would be welcomed.</p>	Noted. Part G includes a list of indicative measures that could be incorporated into the public realm. The policy will be amended to reflect that measures should be considered on a case-by-case basis.	Local Plan policy QD3 Part G amended to provide clarity for implementation, making clear that the public realm measures should respond to the uses involved along with the location, nature and scale of development.
Cockpit Arts (The Planning Lab obo)	2	QD 03	<p><i>Relates to Part 3, LNA SA 14</i></p> <ul style="list-style-type: none"> Cockpit Arts (CA) is an international leader in craft and design. We are particularly supportive of specific policy that promotes high standards for 	Support noted.	No change.

			<p>new/enhancement of existing public realm, which emphasises inclusivity, safe streets, connectivity, legibility, and permeability.</p> <ul style="list-style-type: none"> We are also supportive of the drive to promote sustainability in design and construction of public realm. 		
SGN (Quod obo)	2	QD 03	<p><i>Relates to Part 3, LSA SA 01</i></p> <p>5.5 The design principles relating public realm and connecting places (draft Policy QD3) are also welcomed.</p>	Support noted.	No change.
Fifth State and (Avison Young obo)	2	QD 04	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy QD4 – Building heights</p> <p>Figure 5.1 identifies locations which are suitable for tall buildings. The Owners and Developer of 5-9 Creekside welcome and support the identification of Creekside as a location which is suitable for the development of tall buildings. This reflects its position within the Deptford Creek / Greenwich Riverside Opportunity Area.</p> <p>Part C of the draft policy refers to criteria QD4.B(e) – QD4.B(f) however there is no criterion B(f) and <u>so further clarification is required to ensure Part C aligns with the relevant sections of Part B.</u></p> <p>We consider that Part D of the policy which defines what a tall building is in specific localities aligns with London Plan Policy D9 Part A and is supported.</p>	Noted. In response to public consultation feedback on the Regulation 18 plan, it is necessary to update Policy QD4 to ensure conformity with the London Plan, and also taking into account the Tall Buildings Study Addendum (2022).	Policy QD4 amended throughout to ensure conformity with the London Plan, with revisions also informed by the Tall Buildings Study Addendum (2022).
Fifth State and (Avison Young obo)	2	QD 04	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Part F of the draft policy lists assessment criteria for tall buildings, with F(c) referring to heights being sensitive to the site’s immediate and wider context. We consider that <u>this criterion should also refer to the emerging immediate and wider context, given that most areas identified for tall buildings are also subject to emerging site allocations for development and therefore the context will change as these allocations are realised.</u> This will ensure the most efficient use of land in these locations, such as Deptford Creekside.</p>	Noted. Agreed that the emerging local context should also be taken into account.	Draft Local Plan QD1 amended to provide clarification that development proposals should have regard to existing and emerging context, recognising that the character of sites and areas may evolve over time in accordance with the spatial strategy. Policy QD4 includes a cross-reference to QD1, which ensures this will be a consideration determining appropriate building heights.
Lendlease (Lichfields obo)	2	QD 04	<p><i>Relates to Part 3, LNA SA 02</i></p> <p>Policy QD4 Building heights</p> <p>Figures 5.1 and 5.2 show the suitability and sensitivity of sites in Lewisham for tall building development. We consider the shading and legend for these plans to be unclear, which makes the policy difficult to interpret. It would be simpler and more accessible to designate areas where tall buildings are appropriate, and clearly display these on a plan.</p>	Noted.	Local Plan amended to make clear the locations that are suitable for tall buildings, with clear boundaries. This will be reflected in Map 5.1 and set out in the associated Policies Map.
Barratt London and the Church Commissioners	2 2	QD 04 Figure 5.1	<p><i>Relates to Part 3, LCA SA 20</i></p> <p>Draft Policy QD4 Building heights</p> <p>Barratt London and the Church Commissioners are strongly supportive of the Plassy Island site, and the wider Catford Town Centre, being identified within Figure 5.1 as a location considered acceptable for tall buildings.</p>	Support noted. Agree that the emerging local context should also be taken into account.	Draft Local Plan QD1 amended to provide clarification that development proposals should have regard to

(Avison Young obo)			Part F of Draft Policy QD4 lists assessment criteria for tall building proposals, with F(c) referring to heights being sensitive to the site's immediate and wider context. We consider this criterion should also refer to the 'emerging immediate and wider context' given that most areas identified for tall buildings are also subject to emerging allocations for development and therefore the context will change as these allocations are realised. This will ensure that the best and most efficient use of land is secured in these locations, including within Catford Town Centre and on the Plassy Island site. This will also ensure Draft Policy QD4 aligns with Draft Policy LCA3 Part D which states 'development proposals should respond positively to the evolving urban scale and character of the town centre and its immediate surrounds'.		existing and emerging context, recognising that the character of sites and areas may evolve over time in accordance with the spatial strategy. Policy QD4 includes a cross-reference to QD1, which ensures this will be a consideration determining appropriate building heights.
Tetra Tech Planning (John Lyon's Charity obo)	2 2 2	QD 04 Figure 5.1 Figure 5.2	The Charity considers that Part D(b) (Tall Buildings) of Policy QD4 Building Heights requires greater clarity within the policy in defining "significantly taller" buildings, noting the definition within London Plan Policy D9 Tall buildings (Part A), which states that they "should not be less than 6 storeys or 18 metres measured from ground to the floor level of the uppermost storey". Figure 5.1 presents a "suitability plan" for tall buildings. The use of the coloured fading on the key is very difficult to read, however it appears that most areas within the South Strategic Regeneration Area are considered to be "less suitable" for tall buildings including those six site allocations within Bell Green/Lower Sydenham where there is the potential for a higher growth strategy (and potential 'Opportunity Area' designation). In addition, on review of the Draft Tall Buildings Study (2021) we note that the Bell Green/Lower Sydenham area is generally categorised as "less sensitive", which is confirmed in Figure 5.2 (Tall Buildings sensitivity plan), therefore we would question the "less suitable" designation of the area.	Noted. In response to public consultation feedback on the Regulation 18 plan, it is considered necessary to update Policy QD4 to ensure conformity with the London Plan, and also taking into account the Tall Buildings Study Addendum (2022).	Policy QD4 amended throughout to ensure conformity with the London Plan, with revisions also informed by the Tall Buildings Study Addendum (2022).
GHL (Leegate) Limited (Frank Knight obo)	2 2	QD 04 Figure 5.1	<i>Relates to Part 3, LEA SA 03</i> Policy QD4 (Building heights) and Figure 5.1 (Tall buildings suitability plan) sets out areas where tall buildings are considered acceptable in-principle, in accordance with London Plan Policy D9 (Tall buildings). Policy QD4 notes that tall buildings must be delivered through a masterplan process in order to ensure that they are appropriately located both within a site and wider locality, designed to a high standard and effectively managed. GHL broadly supports Policy QD4 and Figure 5.1, which identifies Leegate Shopping Centre as an area that is suitable for tall buildings. This is also supported within the Draft Tall Building's Survey (March 2021), an evidence document, where the site is identified as accommodating building heights of up to 16 storeys. Notwithstanding this, GHL is keen to understand how the application of this policy will determine appropriate building heights. It is recognised that tall buildings should be delivered to a high-quality design, but it is not a reasonable requirement that all tall building proposals need to undergo an extensive masterplan process exercise. Whilst GHL agrees that tall buildings require detailed design scrutiny, as set by the London Plan policy requirements (London Plan Supporting Paragraph 3.9.4), the requirement for a masterplan process is onerous and not fully justified or effective.	Noted. The draft Local Plan policy makes a distinction between masterplans required by the local authority and other requirements for proposals that hit the threshold to be referred to the Mayor of London. Given their scale and impact, it is considered appropriate to require tall buildings to be informed and delivered through the masterplan process.	Policy QD4 amended to provide further clarification around requirements for masterplan, with cross-reference to Policy DM4 (Comprehensive development and master planning). Tall building policy has been amended.
LaSalle Investment	2 2	QD 04	<i>Relates to Part 3, LSA SA 10</i> Part Two: Managing Development QD4 Building Heights	Following the Regulation 18 consultation, the site	No change.

Management (Savills obo)		Figure 5.1	<p>Policy QD4 states that ‘tall buildings’ will only be considered acceptable in-principle in the locations identified at Figure 5.1 as being appropriate for tall buildings.</p> <p>Whilst LSIM acknowledge the requirement to adopt a strategy for the delivery of tall buildings within the Borough the policy as currently drafted is considered to be overly restrictive and greater flexibility should be introduced to ensure the delivery of residential units can be optimised. This is particularly relevant for sites which are proposed to be allocated for residential-led mixed use development so as not to stifle innovative design.</p> <p>The appropriateness of the final level of density can only be judged on a site by site basis. This will need to take into consideration a range of matters linked to accessibility, quality of accommodation and place, amenity and social infrastructure.</p> <p>The strategic designation for the Homebase site on Bromley Road is for growth and intensification. In order to increase the development capacity on brownfield land and to ensure development viability at strategic sites, the policy should not look to unduly restrict building heights. The restriction on tall buildings without a proper consideration of design and assessment key views within the growth and intensification areas would undermine the opportunity to increase development capacity, which in turn affects the regeneration opportunity.</p> <p>LSIM request that Policy QD4 is revised to take account of those sites outside of the locations identified at Figure 5.1 and confirm support for redevelopment of these for higher densities where the criteria outlined at part F of the policy are demonstrated.</p> <p>This will ensure that the policy is sufficiently flexible to ensure that the strategic objectives and allocations to secure the Council’s development needs are deliverable.</p>	<p>capacities and mix of uses have been re-visited. This has taken into account the complexities of the Homebase/Argos, Bromley Road site – including that it is an out-of-centre retail site, the reduced demand for retail post-Covid, the need to protect the setting of the pond and to respond to the surrounding character and heritage assets. Based on these considerations, the land use mix and residential units have remained the same.</p> <p>However, agree that the appropriateness of the final level of density can only be judged on a site by site basis. Optimal capacities for sites will be established at planning application stage through a design led approach.</p> <p>Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham Tall Buildings Study which will inform amendments to the Part 2 Policy QD4 Building Heights and the suitability for tall buildings at the Homebase site.</p>	
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	2	QD 04	<p><i>Relates to Part 3, LNA SA 14</i></p> <p>Tall Buildings</p> <p>With regard to tall buildings in the Borough, our Client considers that greater flexibility should be afforded to the location of tall buildings, specifically within site allocations. While our Client is supportive of the Policy QD4 (Buildings heights) in that tall buildings should respond positively to the distinctive character of Lewisham’s neighbourhoods, London Plan Policy D9 (Tall buildings) states that tall buildings have a key role in facilitating regeneration opportunities and future growth.</p>	<p>Noted. Not all of the Local Plan site allocations will be suitable for tall buildings and therefore the proposed words could be misleading.</p> <p>In response to public consultation feedback on the Regulation 18 plan, it is considered necessary to</p>	No change.

			<p>Therefore, it is considered that in order to effectively deliver regeneration through provision of new homes and employment/commercial floorspace within site allocations and be consistent within the regeneration objectives of tall buildings within the London Plan and particularly brownfield sites such as Sun Wharf, Policy QD4 should afford greater flexibility to tall buildings within site allocations. As such, we request the following text be added to Policy QD4 (the additions are shown underlined):</p> <p><u>Proposals for new tall buildings within site allocations should be supported, provided that they meet the criteria of part B of this policy.</u></p> <p>Making these changes would ensure that the draft Local Plan is consistent with national policy and effective in its delivery.</p>	<p>update Policy QD4 to ensure conformity with the London Plan, and also taking into account the Tall Buildings Study Addendum (2022). This will make clear areas that are considered suitable for tall buildings.</p>	
Cockpit Arts (The Planning Lab obo)	2	QD 04	<p><i>Relates to Part 3, LNA SA 14</i></p> <ul style="list-style-type: none"> CA is in agreement with the areas identified as suitable for tall buildings in the Tall Buildings Suitability Plan. We endorse the stipulation for a masterplan process requirement for new tall buildings. See also our response to Site Allocation 14 (Sun Wharf), below. 	<p>Support noted. In response to public consultation feedback on the Regulation 18 plan, it is considered necessary to update Policy QD4 to ensure conformity with the London Plan, and also taking into account the Tall Buildings Study Addendum (2022). This will make clear areas that are considered suitable for tall buildings.</p>	<p>Policy QD4 amended throughout to ensure conformity with the London Plan, with revisions also informed by the Tall Buildings Study Addendum (2022).</p>
Artworks Creekside (Avison Young obo)	2	QD 04	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy QD4 – Building heights</p> <p>We note that the sites fall within locations which are suitable for tall buildings which is supported by Artworks Creekside. Given the changing context of Creekside, it is imperative that any reference to the “site’s context” within the Policy includes site allocations, locations of change and extant permissions within the vicinity of the site – as noted in para. 5.35 of the post-amble.</p> <p>We note that there is an inconsistency in the drafting in Part C of the Policy.</p>	<p>Noted. In response to public consultation feedback on the Regulation 18 plan, it is considered necessary to update Policy QD4 to ensure conformity with the London Plan, and also taking into account the Tall Buildings Study Addendum (2022).</p>	<p>Draft Local Plan QD1 amended to provide clarification that development proposals should have regard to existing and emerging context, recognising that the character of sites and areas may evolve over time in accordance with the spatial strategy. Policy QD4 includes a cross-reference to QD1, which ensures this will be a consideration determining appropriate building heights.</p>
Selkent Holdings (Daniel Watney LLP)	2	QD 04	<p><i>Relates to Part 3, LWA SA 09</i></p> <p>Draft Policy QD4 - Building Heights</p> <p>Draft Policy QD4 relates to tall buildings, including where they should be located within the Borough and the criteria that they must satisfy to be considered acceptable. The principle of including this policy within the Plan is supported in the context of the new London Plan Policy D9 requiring Local Plans to allocate suitable areas for the location of tall buildings.</p>	<p>Noted. In response to public consultation feedback on the Regulation 18 plan, it is considered necessary to update Policy QD4 to ensure conformity with the London Plan, and also taking into account the</p>	<p>Policy QD4 amended throughout to ensure conformity with the London Plan, with revisions also informed by the Tall Buildings Study Addendum (2022). However Willow Way</p>

		<p>Draft Policy QD4 states that tall buildings will only be considered acceptable in-principle in the locations identified in Figure 5.1. The figure, which is reproduced below, considers only those locations as being appropriate for tall buildings.</p> <p>The same draft policy defines tall buildings as “<i>buildings that cause a significant change to the skyline and which:</i></p> <p><i>a. Are 30 metres or more in height, except in the Thames Policy Area where they are buildings 25 metres or more in height; or</i></p> <p><i>b. Are significantly taller than the prevailing height of buildings in the immediate and surrounding area.</i></p> <p>As discussed latterly in this representation, Willow Way LSIS is earmarked for substantial redevelopment in the form of employment-led mixed-use development. However, when read alongside draft Policy QD4, there would not be support for any development which is significantly taller than the prevailing height of buildings in the immediate or surrounding area.</p> <p>The policy needs to align with the wider aspirations for strategic growth within the draft plan and not provide a potential barrier to development being brought forward on allocated sites.</p> <p><i>LB Lewisham officer note: an extract of Figure 5.1 is included in the original representation. It shows that Willow Way LSIS falls outside of the tall building zone.</i></p> <p>The emerging context is mixed as outlined at the outset of this letter however, when reading Part D(b) of Policy QD4 as currently drafted, any proposal for redevelopment on the Willow Way site would be unable to be ‘significantly taller’ than the prevailing height of buildings in the surrounding area.</p> <p>The supporting text at Paragraph 5.29 states that “<i>taller buildings are those that project above the prevailing heights of buildings and structures within a site’s immediate and surrounding area (normally, but not exclusively, to 2 to 3 storeys above</i>”.</p> <p>Whilst there is <i>some</i> flexibility for tall buildings on Willow Way offered through the wording listed above, we would contend that this does not go far enough to achieve the development objectives set through the site allocation discussed below.</p> <p>Given that Willow Way is identified as a site for redevelopment, and is of a scale that can genuinely deliver meaningful regeneration and substantial public benefit in terms of employment uses, residential accommodation, affordable housing and public realm, there needs to be sufficient flexibility with regards to building heights.</p> <p>There will be significant pressure on sites being brought forward within Willow Way due to the requirement to be employment-led mixed use development and provide necessary affordable housing and public realm. By restricting building heights to circa 6-7 storeys through the currently drafted Policy QD4, would risk any development across the area not being viable.</p>	<p>Tall Buildings Study Addendum (2022). This includes the designation of specific areas suitable for tall buildings. The Study does not support the designation of Willow Way LSIS as suitable for tall buildings.</p> <p>Should a development proposal for a tall building come forward at this site, this would be assessed against the relevant development plan policies, and any departure from these considered on the basis of material considerations in line with the Planning and Compulsory Purchase Act Section 28(6).</p>	<p>LSIS continues to be identified as a location that is not suitable for tall buildings.</p>
--	--	---	---	---

			<p>We would request that Figure 5.1 is updated to reflect that Willow Way would be a suitable location for a tall building. This is not to say that the area would be awash with skyscrapers, as the suitability of a tall building proposal will still be managed in development control terms through Policy QD4 (parts a and b) which provide stringent controls to such applications. It may be that a few ‘tall’ buildings across the wider development site with other buildings subservient and in keeping with the surrounding scale may be an appropriate route forward to assist with wayfinding to the local centre.</p> <p>By enabling a tall building to be considered on-site in principle, this could unlock the development potential of the entire site and allow the anticipated significant benefits to be achieved, i.e. additional affordable housing and meaningful public realm. Without the ability to deliver a tall building on Willow Way, there is a risk that developments are not viable to be brought forward and the benefits of the site allocation are never achieved.</p> <p>The concept of context evolution is briefly discussed at Paragraph 5.35 of the draft Plan noting that there may be certain areas within the Plan that evolve over time which influences the character of a site or area once implemented. This however is potentially insufficient to stimulate initial redevelopment as it relies on incremental change over time.</p>		
The Renewal Group (Carney Sweeney obo)	2 2	QD 04 Table 5.1	<p><i>Relates to Part 3, LNA SA 08</i> Policy QD4 Building Heights</p> <p>Firstly, this policy needs to have regard to the final changes to the new London Plan 2021 in relation to the definition of tall buildings and the final wording of policies relating to them.</p> <p>We note that part C of the policy refers to criteria QD4.B(e) - QD4.B(f) whereas in fact there is no (f). The policy needs to be amended in this regard.</p> <p>In relation to part B of the policy we consider that there is no basis for buildings to be of “<i>exceptional</i>” design and architectural quality. It is acknowledged that they should be of “<i>high quality</i>” design but the higher bar of “<i>exceptional</i>” is too high in this context. Also, we consider that the wording of B(e) should be altered to refer to “<i>unacceptable adverse impacts on the amenity of neighbouring properties</i>” (our emphasis) rather than just “<i>adverse impacts.....</i>”. Guidance documents in relation to such matters always refer to the need to take a flexible approach and the current wording does not facilitate this.</p> <p>Again, in relation to part C of this policy, flexibility should be incorporated to respond to emerging areas of infrastructure improvements over the whole plan period, which may not be anticipated at present. Appropriate wording should be incorporated in this regard.</p> <p>Having regard to some of the comments above, changes should also be made to the various criteria in part F of the policy.</p>	<p>Noted. In response to public consultation feedback on the Regulation 18 plan, it is considered necessary to update Policy QD4 to ensure conformity with the London Plan, and also taking into account the Tall Buildings Study Addendum (2022). This includes updates to the definition of tall buildings.</p> <p>The Council considers that the requirement for exceptional design quality is appropriate given the impact tall and taller buildings can potentially have.</p>	<p>Policy QD4 amended throughout to ensure conformity with the London Plan, with revisions also informed by the Tall Buildings Study Addendum (2022).</p> <p>Policy QD7 (Amenity) and Policy QD4 (Building heights) amended to refer to ‘unacceptable adverse impact’ as suggested.</p>
The Renewal Group (Carney Sweeney obo)	2 2	QD 04 Table 5.1	<p>Figure 5.1 comprises a Tall Buildings suitability plan. This plan does not take account of areas where the PTAL is planned to be increased over the plan period. For example, a new station on the Overground at Surrey Canal Road is planned imminently which will significantly improve the PTAL in this area. This is a highly</p>	<p>Noted. The Tall Buildings Study (2019) considered improvements in PTAL to</p>	<p>Policy QD4 amended throughout to ensure conformity with the London Plan, with</p>

			relevant consideration for planned growth and the suitability of tall buildings in this area. Figure 5.1 needs to be amended accordingly.	inform the tall buildings suitability areas. In response to public consultation feedback on the Regulation 18 plan, it is considered necessary to update Policy QD4 to ensure conformity with the London Plan, and also taking into account the Tall Buildings Study Addendum (2022).	revisions also informed by the Tall Buildings Study Addendum (2022).
SGN (Quod obo)	2 2	QD 04 Figure 5.1	<p><i>Relates to Part 3, LSA SA 01 Tall Buildings</i></p> <p>5.7 Policy QD4 (E) states that tall building will only be considered acceptable in principle in locations identified in Figure 5.1, which excludes the gas work site but contains the adjacent Site Allocations 2 (Bell Green Retail Park) and 3 (Sainsbury's Bell Green). If land adjacent to the site is identified as appropriate for tall buildings, then this designation should be extended to the west to include the gas works site to ensure a comprehensive redevelopment of the area can be achieved.</p> <p>5.8 Point C) outlines that where the prevailing height of buildings adjoining the site, as well as its immediate and surrounding area is expected to evolve in accordance with the spatial strategy for the Borough, proposals for taller building may be considered. In view of the strategic ambition for Bell Green and Lower Sydenham to become an Opportunity Area, and identification of the adjacent site allocations as appropriate for tall buildings in accordance with the emerging spatial strategy, there is clear justification for the gas work site allocation to be afforded similar tall building status.</p> <p>5.9 Point D) defines tall buildings as being 30 meters or more in height. The main policy text of draft Policy QD4 B & D, and Paragraph 5.29 should be amended so that it is consistent with London Plan Policy D9 'Tall Buildings' which now also defines tall buildings as those that are over 6-storeys or 18 metres in height. The reason for this late change to the new London Plan was to ensure that the tall building policy does not undermine the incremental densification of areas, which is considered to be an appropriate way to meet housing need.</p> <p>5.10 The following text to paragraph 5.29 should also be removed: <i>Taller buildings are those that project above the prevailing heights of buildings and structures within a site's immediate and surrounding area (normally, but not exclusively, 2 to 3 storeys above).</i></p>	<p>Noted. In response to public consultation feedback on the Regulation 18 plan, it is considered necessary to update Policy QD4 to ensure conformity with the London Plan, and also taking into account the Tall Buildings Study Addendum (2022).</p> <p>The Council disagrees that the policy proposals around 'taller' buildings should be removed. It is considered appropriate that policies are in place to manage building heights for developments which are not defined as tall.</p>	Policy QD4 amended throughout to ensure conformity with the London Plan, with revisions also informed by the Tall Buildings Study Addendum (2022).
SGN (Quod obo)	2	QD 04	5.11 Finally, point G states that <i>"Tall buildings must be delivered through a masterplan process in order to ensure that they are appropriately located both within a site and wider locality, designed to a high quality standard and effectively managed"</i> .	Noted. Given their scale and impact, it is considered appropriate to require tall buildings to be informed and delivered through the masterplan process.	Policy QD4 amended to provide further clarification around requirements for masterplan, with cross-reference to Policy DM4 (Comprehensive

			5.12 Again, we raise concern as to the soundness of this policy in absence of any Masterplan for Bell Green and Lower Sydenham, which as prescribed in draft Policy QD4 will guide future development.		development and master planning).
QUOD (Landsec obo - Lewisham Shopping Centre)	2	QD 04	<p>Building Heights</p> <p>9.4 Landsec support Reg 18 Plan Figure 5.1 which identifies the site as a location appropriate for tall buildings and specifically its unrestrictive nature in determining what heights (in storeys) would be acceptable.</p> <p>9.5 The Council published a draft tall buildings study (February 2021) as part of its evidence base to the Reg 18 plan which provides a methodology for determining the appropriate scale and location of tall buildings within Lewisham. This is based on site suitability and sensitivity. The site undoubtedly meets all the criteria, as follows:</p> <ul style="list-style-type: none"> ☑ High PTAL – PTAL 6; ☑ Proximity to Bakerloo Line Extension – Adjacent to transport cluster; ☑ Town Centre location – Located in a major town centre and potential for Metropolitan town centre classification; ☑ Opportunity area location – Located in an Opportunity area; ☑ Growth area location – Located in a Growth area; ☑ Characterised by building height and tall building clusters – Located in an existing tall building cluster; ☑ Proximity to Green and Open Space – Close to Green/Open Space; ☑ Good Cycling Transport Accessibility Level – Benefits from a reasonable level of accessibility to railway and London Underground stations by cycling; ☑ Site allocation – It is an allocated site; ☑ Outside a World Heritage Sites and Buffer Zone – Located outside World Heritage Site and Buffer Zone; ☑ Outside a Conservation Area – Located outside a Conservation Area; ☑ Outside an Area of Special Local Character – Located outside an Area of Special Local Character; ☑ Listed Buildings – Does not contain any listed buildings; ☑ LVMF viewing corridor and consultation areas – Outside the LVMF viewing corridor and consultation areas; ☑ Local landmarks and local view buffers – Outside the local landmarks, local views and local view buffer; ☑ Varied Surrounding Building Heights – Lewisham has one of the widest spectrums of building heights; and ☑ Lower ground (topography) – The site is located on areas of lower ground therefore is less sensitive to the impacts of tall building proposals. <p>9.6 Given the above, we believe that there should be no limit to building heights at this location.</p> <p>9.7 At draft Policy QD4 F (c) ‘Building Heights’, proposals for tall buildings will be required to demonstrate that the development is designed with building heights that are sensitive to the sites immediate and wider context having regard to figure 5.2 (sensitivity map). Although this map is a result of the layered sensitivity analysis carried out in respect to the draft tall buildings study, this map is unclear and confusing. It would assist if the legend is amended accordingly.</p>	Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham Tall Buildings Study which aligns with the London Plan. The Study will inform amendments to Policy QD4 Building Heights and relevant site allocations.	Local Plan amended to take account of the Tall Buildings Study as well as provide supporting text on tall buildings delivered through clusters of tall buildings.

			<p>9.8 We request that the main policy text of draft Policy QD4 B & D is amended so that it is consistent with London Plan Policy D9 'Tall Buildings' which now also defines tall buildings as those that are over 6 storeys or 18 metres in height. The reason for this late change to the new London Plan was to ensure that the tall building policy does not undermine the incremental densification of areas, which is considered to be an appropriate way to meet housing need.</p> <p>The following text to paragraph 5.29 should also be removed:</p> <p>Taller buildings are those that project above the prevailing heights of buildings and structures within a site's immediate and surrounding area (normally, but not exclusively, 2 to 3 storeys above).</p>		
Tribe Student Housing (Avison Young obo)	2	QD 06	<p><i>Relates to Part 3, LNA SA 06</i></p> <p>We also consider that the draft site allocation has underestimated the development potential of the site as a whole. A key objective (GG2) of the Publication London Plan is ensuring that development makes the best use of land by enabling the development of brownfield land, particularly in Opportunity Areas and proactively exploring the potential to intensify the use of land to support additional homes and workspaces including promoting higher density development. This is also consistent with the approach in the LBL draft Local Plan Policy QD6 which seeks a design-led approach to optimise site capacity.</p> <p>Therefore, on the basis that the Site comprises brownfield land in an identified Opportunity Area, high density development should be promoted in line with regional and local policy objectives. An increase in capacity (by following a design-led approach) beyond 189 units would also assist the Council in meeting their housing targets. The site allocation includes a parcel of land to the north of the Trundley's Road site, known as land at Juno Way. The current applications for the site are for the Trundley's Road site only. The residential application which is for 189 units, demonstrates that additional quantum could be achieved across both parcels of land.</p>	<p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. The capacities have been amended to reflect the planning consents granted for the site as well as the current pre-application.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	Surrey Canal Road and Trundleys Road LSIS site allocation amended by increasing residential units to 274 and increasing employment floorspace to 2,890m ² .
Trundley's Road Ltd (Avison Young obo)	2	QD 06	<p><i>Relates to Part 3, LNA SA 06</i></p> <p>We also consider that the draft site allocation has underestimated the development potential of the site as a whole. A key objective (GG2) of the Publication London Plan is ensuring that development makes the best use of land by enabling the development of brownfield land, particularly in Opportunity Areas and proactively exploring the potential to intensify the use of land to support additional homes and workspaces including promoting higher density development. This is also consistent with the approach in the LBL draft Local Plan Policy QD6 which seeks a design-led approach to optimise site capacity.</p> <p>Therefore, on the basis that the Site comprises brownfield land in an identified Opportunity Area, high density development should be promoted in line with regional and local policy objectives. An increase in capacity (by following a design-led approach) beyond 189 units would also assist the Council in meeting their housing targets. The site allocation includes a parcel of land to the north of the Trundley's Road site, known as land at Juno Way. The current applications for the site are for the Trundley's Road site only. The residential application which is for 189 units, demonstrates that additional quantum could be achieved across both parcels of land.</p>	<p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. The capacities have been amended to reflect the planning consents granted for the site as well as the current pre-application.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	Surrey Canal Road and Trundleys Road LSIS site allocation amended by increasing residential units to 274 and increasing employment floorspace to 2,890m ² .

Fifth State and (Avison Young obo)	2	QD 06	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy QD6 – Optimising site capacity</p> <p>The Owners and Developer of 5-9 Creekside support draft Policy QD6 which requires a design-led approach to be taken to optimise site capacity and establish an appropriate development density. This is considered to broadly align with London Plan Policy D3, however further advocacy of delivering higher density developments in appropriate locations should also be incorporated into this policy. Paragraph 5.46 of the draft Local Plan states that the policy seeks to ensure that <i>‘the limited supply of land is used effectively and efficiently [...] in order to meet the Borough’s future needs and to support the delivery of the spatial strategy, it will be necessary to facilitate higher density development in appropriate locations’</i>. As such, <u>support for higher density development should be explicitly expressed within the policy wording itself.</u></p> <p><u>In addition, it would be helpful if draft Policy QD6 could explain that the indicative development capacity figures proposed as part of all the draft Site Allocations are not intended to be a cap on development quantum, rather a broad indication of capacity. The policy wording should therefore state that the overall quantum will therefore be established through a design led approach to development to make most efficient use of land (in line with NPPF paragraph 122).</u></p>	<p>Noted. The Local Plan approach to establishing the optimal capacity of the site is considered to be in general conformity with the London Plan. It is not considered appropriate to explicitly state supporting higher densities in the policy, as higher density development may not always result in the most optimal use of land.</p> <p>The Plan clearly states that for the site allocations, “The site capacities are indicative only and should not be read prescriptively for the purpose of planning applications, where the optimal capacity of a site must be established on a case-by-case basis using the design-led approach, and having regard to relevant planning policies”.</p>	No change.
Notting Hill Genesis (Savills obo)	2	QD 06	<p><i>Relates to Call for site</i></p> <p>A mixed use redevelopment of the site could be achieved through making the best use of site and NHG therefore supports the principle of draft Local Plan Policy QD6 (Optimising Site Capacity) which sets out that development proposals must demonstrate that the design-led approach has been used to optimise a site’s capacity, in accordance with the London Plan Policy D3.</p>	Support noted.	No change.
Barratt London and the Church Commissioners (Avison Young obo)	2	QD 06	<p><i>Relates to Part 3, LCA SA 20</i></p> <p>Draft Policy QD6 Optimising site capacity</p> <p>Barratt London and the Church Commissioners are strongly supportive of a design-led approach to optimise site capacity and to establish an appropriate development density and consider this aligns with London Plan Policy D3.</p>	Support noted.	No change.
GHL (Leegate) Limited (Frank Knight obo)	2	QD 06	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>GHL strongly welcomes the Council’s approach to site optimisation through a design-led approach (Policy QD6, Optimising site capacity), which reflects the Government’s objective of <i>“significantly boosting the supply of homes”</i> (Paragraph 59 of the NPPF).</p>	Support noted.	No change.
Bellway Homes Ltd and Peabody Developments	2	QD 06	<p><i>Relates to Part 3, LNA SA 14</i></p> <p>With regard to Policy QD6 (Optimising site capacity) of the draft Local Plan, our Client is supportive of a design-led approach to optimising a site’s capacity. However, we would suggest that when considering comprehensive redevelopment proposals within site allocations, more flexibility should be</p>	Noted. Draft Local Plan policy QD6.B identifies the criteria used to determine optimal capacity of a site, which are considered to be	No change.

Ltd (Savills obo)			<p>afforded with regard to density. As such, we request the following text is added to Policy QD6 (the additions are shown underlined):</p> <p><u><i>A flexible approach to density guidance should be taken when considering comprehensive redevelopment proposals within site allocations, with the optimum density of a development resulting from a design-led approach.</i></u></p> <p>Making this change would provide flexibility and it will ensure that the draft Local is effective in its delivery.</p>	<p>in conformity with the London Plan. The Local Plan is not prescribing densities and therefore the approach is considered to be sufficiently flexible.</p> <p>Paragraph 13.9 of the draft Local Plan clearly states that for the site allocations that, “The site capacities are indicative only and should not be read prescriptively for the purpose of planning applications, where the optimal capacity of a site must be established on a case-by-case basis using the design-led approach, and having regard to relevant planning policies.”</p>	
Artworks Creekside (Avison Young obo)	2	QD 06	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy QD6 – Optimising site capacity</p> <p>As noted above, Policy QD6 must include explicitly emerging contexts as part of the appraisal process in ensuring a design-led approach to be taken to optimise site capacity and establish an appropriate development density. The post-amble of the Policy talks of undertaking a series of appraisal for establishing the optimum site capacity and our pre-application engagement with the Council to date has been through this iterative process.</p>	<p>Agree that the emerging local context should be taken into account in the design led approach.</p>	<p>Draft Local Plan policy QD1 and supporting text amended to provide clarification that development proposals should have regard to existing and emerging context, recognising that the character of sites and areas may evolve over time in accordance with the spatial strategy.</p>
Selkent Holdings (Daniel Watney LLP)	2	QD 06	<p><i>Relates to Part 3, LWA SA 09</i></p> <p>Policy QD6 – Optimising Site Capacity</p> <p>We welcome Policy QD6 relating to optimising site capacity particularly through demonstration that the design-led approach has been used to optimise such capacity. We feel this should influence the development parameters of individual site allocations and draft policies to understand their true potential which is why we request latterly in this representation that the capacities identified in the site allocation are made clear that they should be informed by more detailed assessments of capacity.</p>	<p>Noted. Paragraph 13.9 of the draft Local Plan clearly states for the site allocations that, “The site capacities are indicative only and should not be read prescriptively for the purpose of planning applications, where the optimal capacity of a site must be established on a case-by-case basis using the design-led approach, and having regard to relevant planning policies.”</p>	<p>No change.</p>
Transport for London	2	QD 06	<p>QD6 Optimising Site Capacity</p>	<p>Support noted.</p>	<p>No change.</p>

Commercial Development			TfL CD are supportive of Policy QD6 criterion Ac which requires development to consider “Public Transport Accessibility Levels, taking into account current levels and future levels expected to be achieved by the delivery of planned public transport infrastructure”.		
SGN (Quod obo)	2	QD 06	<i>Relates to Part 3, LSA SA 01</i> 5.6 SGN welcomes the design-led approach that Lewisham have taken in respect to optimising site capacity (draft policy QD6 ‘Optimising Site Capacity’) which includes the appraisal of design options as per the London Plan.	Support noted.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	QD 06	Optimising Site Capacity 9.9 Landsec welcomes the design-led approach that Lewisham have taken in respect to optimising site capacity (draft policy QD6 ‘Optimising Site Capacity’) which includes the appraisal of design options as per the London Plan.	Support noted.	No change.
GHL (Leegate) Limited (Frank Knight obo)	2	QD 07	<i>Relates to Part 3, LEA SA 03</i> Policy QD7 (Amenity and Agent of Change) states development proposals must demonstrate how they will protect and, wherever possible, enhance the amenity of existing and future occupiers, as well as the amenity of neighbouring properties. Part B sets out that development proposals will be required to positively address amenity through a design-led approach in order to achieve the following: a) Make appropriate provision of privacy both for users of the development and those in neighbouring properties, ensuring development does not result in unreasonable levels of overlooking; b) Ensure adequate provision for and seek to optimise outlook for users of the development; c) Ensure adequate levels of ventilation, daylight, sunlight and open aspects including provision of private amenity space where appropriate; and d) Minimise and appropriately mitigate disturbances associated with the construction and operation of the development including noise, vibration, odour, fumes, dust, artificial light and site waste. Whilst GHL acknowledges the importance of safeguarding residential amenity, it must be recognised that development may result in some impact on the amenity of neighbouring properties, particularly in urban contexts; not least within areas where higher density development is actively encouraged. As such, Policy QD7 should consider whether impacts of proposed development on amenity are acceptable within the physical and planning context of a site, and accounting for the wider benefits of the development and other policies contained within the Lewisham Local Plan Review. We therefore consider that part B of Policy QD7 should be reviewed.	Noted.	Local Plan policy on Amenity and Agent of Change amended to reflect that development should not have an unreasonable adverse impact on amenity.
SEGRO (CBRE Limited obo)	2	QD 07	<i>Relates to Part 3, LNA SA 04</i> 4. Agents of Change SEGRO are encouraged by the Council’s inclusion of Policy QD7 (Amenity and Agent of Change) as this will ensure development proposals do not compromise the operational capacity of existing impact generating uses, including industrial. We recommend that this policy explicitly references ensuring the 24/7 operation of SILs is not threatened by new development, and also recommend that this requirement is cross referenced within the site allocations for mixed use development surrounding SILs – for example Surrey Canal Road and Trundleys Road, Timber Yard, Evelyn Court and Neptune Wharf, which are all located in	Noted. It is agreed that the Local Plan should include additional Borough-wide policies around protection of SIL/LSIS in respect of amenity it is not necessary to include specifics for every site allocation. The Local Plan must be read as a whole.	Local Plan Part 2 Economy and Culture policies amended to include additional requirements on amenity specifically in relation to protecting the function and effectiveness of SIL and LSIS, and SIL on a 24-hour basis. This will work

			proximity to Deptford Trading Estate. The design requirements for residential elements of these development should require specific measures to be included such as high-performance acoustic glazing, mechanical ventilation and amenity spaces positioned well away from the SIL. These site allocations should also include a requirement for legal agreements, conditions and even noise easements that uphold the agents of change principles and protect existing uses from any potential conflicts created by incoming residents.		together with Amenity and Agent of Change policy.
Cockpit Arts (The Planning Lab obo)	2	QD 07	<i>Relates to Part 3, LNA SA 14</i> <ul style="list-style-type: none"> We query whether this policy sufficiently considers/protects the amenity of <i>future neighbouring</i> occupiers/uses where elements of a masterplan are being brought forward at different times by different owners/developers. Strengthening this policy in this regard will ensure that the development of parts of larger sites is not unduly stymied and ensure that the potential of development sites can be maximised in line with policy. 	Noted. The Draft Local Plan policy QD07 supporting text provides that proposals will be expected to take account of existing and proposed future uses, for example, by considering land use principles established by planning consents or site allocation policies.	To aid policy implementation, Policy QD07 supported text amended to refer to consideration given to unimplemented planning consents and site masterplans.
QUOD (Landsec obo - Lewisham Shopping Centre)	2 2 2	QD 07 QD 08 QD 09	Amenity Considerations 9.10 Landsec are supportive of draft policies QD7 'Amenity and Agent of Change'; QD8 'Noise and Vibration' and QD9 'External Lighting' (including the corresponding policy narrative) which are not tightly restricted by specific standards, rather they include flexibility that allows the optimisation of housing delivery whilst ensuring that good quality amenity is addressed.	Support noted.	No change.
The Renewal Group (Carney Sweeney obo)	2	QD 08	<i>Relates to Part 3, LNA SA 08</i> Policy QD8 Noise and Vibration In relation to part B of this policy, instead of stating that " <i>new noise and vibration generating development must be appropriately located away from noise sensitive uses and suitably demonstrate that measures will be implemented to mitigate any adverse impacts</i> ", we consider that the policy should read " <i>New noise and vibration generating development should be appropriately located away from noise sensitive uses and/or suitable demonstrate that measures will be implemented to mitigate any adverse impacts</i> " (<i>our emphasis</i>). There are many roads, rail lines and other noise generating developments/activities across the borough and such a change to the policy will ensure that these do not unnecessarily preclude development.	Noted. Agree that policy should be amended to continue to protect amenity whilst ensuring this does not unnecessarily preclude development from coming forward.	Local Plan Amenity and Agent of Change policy amended to better align with wording in London Plan. As well, policy amended to make clear noise sensitive development sited away from existing noise generating uses or activities, and if not possible providing suitable separation and acoustic design measures.
L&Q Group	2	QD 11	<i>Relates to Call for site</i> <i>Infill and backland sites, back gardens and amenity spaces</i> Draft LBL Policy QD11 on infill and back land sites, back gardens and amenity spaces is restrictive and could impact on the number of applications on small sites, particularly in relation to the blanket retention of trees. Sites should be assessed on a case by case basis, to assess the appropriateness of trees to be retained.	Noted. The draft policy QD11 is considered sufficiently flexible to allow development to come forward. To aid implementation, the policy requirement for tree retention on back gardens and amenity spaces cross-references the other Local Plan policy on Urban	No change.

				greening and trees - this encourages that trees are retained but it does not require all trees to be retained.	
GHL (Leegate) Limited (Frank Knight obo)	2	QD 11	<i>Relates to Part 3, LEA SA 03</i> Policy QD11 (Infill and backland sites, back gardens and amenity areas) sets out the approach proposed to development on infill and backland sites. The Council will support this type of development, where the proposed use is appropriate to the Site and compatible with land uses in the site's immediate vicinity; and the development has a clear urban design rationale. GHL supports this policy in principle, especially in relation to their development aspirations along Carston Close. This policy aligns with the national and regional approach of optimising the use of previously developed land.	Support noted.	No change.
Fifth State and (Avison Young obo)	2	HE 01	<i>Relates to Part 3, LNA SA 16</i> Draft Policy HE1 – Lewisham's historic environment The Owners and Developer of 5-9 Creekside support the thrust of draft Policy HE1 which seeks to preserve or enhance Lewisham's historic environment. Part B of the policy provides a simplified version of the assessment of potential impacts from the key heritage tests outlined in NPPF paragraphs 193 to 197, which will be the relevant tests against which planning decisions will be made should the proposed development lead to either substantial or less than substantial harm. The policy therefore aligns with the national and strategic framework and we have no further comment to make at this time.	Support noted.	No change.
Fifth State and (Avison Young obo)	2	HE 02	<i>Relates to Part 3, LNA SA 16</i> Draft Policy HE2 – Designated heritage assets We recognise that Conservation Areas are subject to statutory protection under Section 72(1) of the Planning (Listed Building and Conservation Areas) Act 1990, which states that <i>'special attention shall be paid to the desirability of preserving or enhancing the character or appearance of that area'</i> . The 1990 Act and NPPF paragraphs 200-201 also recognise that new development can benefit the character and appearance of a conservation area through enhancements. Part E of draft Policy HE2 states that <i>'the demolition of buildings or structures that make a positive contribution to the character or appearance of a conservation area will be resisted'</i> . Fifth State do not agree with the wording of this criterion as drafted as it fails to accurately reflect how the impact of development proposals on a conservation area should be assessed. The impact of development proposals on a conservation area must take into account the development proposals as a whole, i.e. the impact of demolition as well as the impact of the replacement proposals (as established through Dorothy Bohm v SSCLG (2017)). Even in cases where the building or feature proposed to be demolished is identified as making a positive contribution to the area, it is also necessary to consider the effect of the replacement proposals, as if the contribution made by the replacement is equivalent or better than existing, this would result in no harm or a heritage benefit. As such it is suggested that Part E of the policy is rephrased to better reflect the relevant heritage tests, as set out below: <i>'Buildings or structures that have been identified to make a positive contribution to the character or appearance of the conservation area should be retained'</i>	Disagree. There is no requirement to repeat guidance from the NPPF. The proposed wording relates specifically to the NPPF test for non-designated heritage assets and does not address the test for designated assets, i.e. Conservation Areas. The Local Plan provides a positive framework for preserving the historic environment and the policy seeks to avoid the demolition of buildings that have been identified to make a positive contribution to Conservation Areas.	No change.

			<i>wherever possible, and where buildings and structures are proposed to be demolished the impacts of the demolition should be balanced against the impacts of the replacement proposals.'</i>		
Artworks Creekside (Avison Young obo)	2	HE 02	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy HE2 – Designated heritage assets</p> <p>Section 72(1) of the Planning (Listed Building and Conservation Areas) Act 1990, which states that <i>'special attention shall be paid to the desirability of preserving or enhancing the character or appearance of that (conservation) area'</i>. The 1990 Act and NPPF paragraphs 200-201 also recognise that new development can benefit the character and appearance of a conservation area through enhancements. Given that 2 and 3 Creekside fall within a Conservation Area, it is imperative that draft Policy HE2 is compliant with the NPPF.</p> <p>Part C of draft Policy HE2 states that <i>'Proposals involving the retention, refurbishment and reinstatement of features that are important to the significance of a Conservation Area will be supported'</i>. Clearly, not all features can be retained within a redevelopment proposal within a Conservation Area. The post-amble differentiates between <i>'original or other features'</i>. The complexities of redevelopment schemes will require the Council to apply this Policy criteria with flexibility based upon the objectively understood importance of any such features.</p> <p>Part E of draft Policy HE2 states that <i>'the demolition of buildings or structures that make a positive contribution to the character or appearance of a conservation area will be resisted'</i>. Artworks Creekside do not agree with the wording of this criterion as drafted as it fails to accurately reflect how the impact of development proposals on a conservation area should be assessed.</p> <p>Given the Dorothy Bohm v SSCLG (2017)) judgement, it is also necessary to consider the effect of the replacement proposals, as if the contribution made by the replacement is equivalent or better than existing, this would result in no harm or a heritage benefit.</p>	Comments relating to Part C are noted. There is no requirement to repeat guidance from the NPPF. The Local Plan provides a positive framework for preserving the historic environment and the policy seeks to avoid the demolition of buildings that have been identified to make a positive contribution to Conservation Areas.	No change.
Fifth State and (Avison Young obo)	2	HE 03	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy HE3 – Non-designated heritage assets</p> <p>The Owners and Developer of 5-9 Creekside note that the wording of draft Policy HE3 Part A which identifies that <i>'development proposals will be supported where they preserve or enhance the significance of a locally listed building or other non-designated heritage asset, and the asset's setting'</i> goes beyond the NPPF Paragraph 197 test which states that <i>'the effect of an application on the significance of a non-designated heritage asset should be taken into account in determining the application. In weighing applications that directly or indirectly affect non-designated heritage assets, a balanced judgement will be required having regard to the scale of any harm or loss and the significance of the heritage asset'</i>. As outlined in our comments above, it will be necessary for a balancing exercise to take place to assess the impact of the loss of a designated or non-designated heritage assets which must be considered against the replacement development proposal, as well any public benefits which arise from the development proposals.</p> <p><u>We consider that Part B of draft Policy HE3 should be redrafted to reflect Paragraph 197 of the NPPF, which requires a balanced judgement to be taken</u></p>	Noted. The Plan is in line with NPPF paragraph 190 which states that plans should set out a positive strategy for the conservation and enjoyment of the historic environment. There is no need to replicate the tests in paragraph 197 of the NPPF as this will be taken into account when determining applications.	No change.

			(rather than specifically looking to preserve or enhance the significance of a non-designated heritage asset).		
Artworks Creekside (Avison Young obo)	2	HE 03	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy HE3 – Non-designated heritage assets</p> <p>Artworks Creekside note that the assessment criteria contained within draft Policy HE3 goes beyond the test of para. 197 of the NPPF which notes that ‘The effect of an application on the significance of a non-designated heritage asset should be taken into account in determining the application. In weighing applications that directly or indirectly affect non-designated heritage assets, a balanced judgement will be required having regard to the scale of any harm or loss and the significance of the heritage asset’.</p> <p>Instead, the draft Policy HE3 is requiring an assessment which goes above and beyond the requirements of the NPPF.</p>	Noted. The Plan is in line with NPPF paragraph 190 which states that plans should set out a positive strategy for the conservation and enjoyment of the historic environment. There is no need to replicate the tests in paragraph 197 of the NPPF as this will be taken into account when determining applications.	No change.
Phoenix Community Housing (BPTW obo)	2	HE 03	<p>Heritage</p> <p>In our previous representations we objected to the inclusion of a policy that identifies and protects Areas of Special Local Character, considering that Conservation Area designations provide a comprehensive level of policy protection for sites which meet the necessary criteria and which are considered appropriate for designation. A new level of protection for sites not considered suitable for Conservation Area designation could inhibit the ability for development, particularly in areas where the majority of potential sites are on previously developed or infill sites. This concern is exacerbated by the higher housing requirement figures dictated by the New London Plan and so we strongly re-iterate that this and any policy which could discourage development on previously developed land should be avoided. The policy requirements set out under ‘High Quality Design’ should be sufficient to ensure proposals suitably integrate with the surrounding context and character. Many of the proposed ASLCs are in South Lewisham, where such designations would detract from the area’s potential for ‘sensitive intensification’, thus reducing the effectiveness of the spatial strategy for this part of the borough.</p>	Areas of Special Local Character already exist within the adopted Local Plan and are covered in the draft plan in policy HE3 (D) and paragraph 6.33. Paragraph 39 of the Planning Practice Guidance Historic Environment allows local authorities to identify non-designated heritage assets which can be buildings, monuments, sites, places, areas or landscapes which have a degree of heritage significance meriting consideration in planning decisions, but which do not meet the criteria for designated heritage assets. Areas of Special Local Character fall within this category and sensitive intensification will not be prohibited by their identification.	No change.
L&Q Group	2	Section 7	<p><i>Relates to Call for site</i></p> <p>4.3 Housing</p> <p><i>Meeting Lewisham’s housing needs</i></p> <p>L&Q supports LBL’s commitment to meet and exceed the London Plan target of 1,667 net completions a year over the next 10 years. We also support LBL priority for genuinely affordable housing through directing development to those areas identified in the spatial strategy in the Borough, including the allocations of strategic sites.</p>	Support noted.	No change.

Tribe Student Housing (Avison Young obo)	2 2	HO 01 HO 08	<p><i>Relates to Part 3, LNA SA 06</i></p> <p>Policy HO1 sets out that Lewisham is required to meet the draft London Plan housing targets of at least 16,670 net housing completions between 2020-2030 (or 1,667 net completions per year).</p> <p>Moreover, draft Policy HO8 sets out that PBSA can contribute towards LBL achieving its housing targets where 2.5 PBSA bedspaces is equivalent to 1 conventional residential unit. This is consistent with the approach in the draft London Plan. We support this approach on the basis that PBSA is providing a type of accommodation for which there is a growing need. The provision of PBSA also helps free-up the conventional housing stock, further assisting the borough in meeting its housing target.</p>	Support noted.	No change.
Trundley's Road Ltd (Avison Young obo)	2 2	HO 01 HO 08	<p><i>Relates to Part 3, LNA SA 06</i></p> <p>Policy HO1 sets out that Lewisham is required to meet the draft London Plan housing targets of at least 16,670 net housing completions between 2020-2030 (or 1,667 net completions per year).</p> <p>Moreover, draft Policy HO8 sets out that PBSA can contribute towards LBL achieving its housing targets where 2.5 PBSA bedspaces is equivalent to 1 conventional residential unit. This is consistent with the approach in the draft London Plan. We support this approach on the basis that PBSA is providing a type of accommodation for which there is a growing need. The provision of PBSA also helps free-up the conventional housing stock, further assisting the borough in meeting its housing target.</p>	Support noted.	No change.
L&Q Group	2	HO 01	<p><i>Relates to Call for site</i></p> <p>In respect to the Part C (b) Policy HO1 sets out proposals on allocated sites must comply with site allocation requirements and will be resisted where they do not. Whilst welcomed, we consider the Part C (b), and any other policies governing site allocations, should clearly recognise the capacities are indicative and that proposals may exceed these indicative capacities whilst still broadly complying with site allocations. i.e. capacities should not be taken as upper development limits. A failure to do so could limit housing, particularly affordable housing, being delivered on the site and be out of step with the Council's overall aspiration to optimise sites capacity (Policy QD6).</p>	<p>Noted. The policy requirement is considered necessary to ensure the delivery of the spatial strategy.</p> <p>Part 3 of the draft Local Plan makes clear that with respect to the site allocations, the site capacities are indicative only and should not be read prescriptively for the purpose of planning applications, where the optimal capacity of a site must be established on a case-by-case basis using the design-led approach, and having regard to relevant planning policies.</p>	No change.
L&Q Group	2	HO 01	<p><i>Relates to Call for site</i></p> <p>L&Q welcomes the flexibility being applied to studio flats (Policy HO1 E), recognising their suitability as part of larger schemes, in highly accessible areas, where a wider mix of units (including family housing), can be offered.</p>	Support noted.	No change.
(Avison Young obo)	2	HO 01	<p><i>Relates to Part 3, LCA SA 25</i></p> <p>Policy and Site Allocation Review</p>	Despite an increase in the London Plan housing	Local Plan amended to appropriately refer to

			<p>Policy HO1: Meeting Lewisham's Housing Needs The emerging Plan should be prepared in accordance with the policies detailed within the NPPF (Paragraph 35). As such, policies relating to housing growth and the identified of housing need should be underpinned by the standard methodology as detailed in Paragraph 60, unless a justified alternative approach is agreed. The calculation is confirmed in the national planning guidance.</p> <p>Notwithstanding this, the strategic framework (London Plan, 2021) sets out the housing targets for the London Borough's over the next 10 years. The London Plan was prepared during the transitional arrangements associated with the introduction of the standard methodology and is therefore based on the London Strategic Housing Market Assessment underpinning the Plan. The policy wording associated with the emerging local context should be updated to reflect the adopted London Plan's targets: 1,667 per year.</p> <p>We note that the Council's housing trajectory detailed in the latest Authority Monitoring Report (January 2021) is applied against the previous London Plan's (2016) housing targets (1,385) and therefore does not meet their latest strategic target.</p> <p>Indeed, the Council recognise at Paragraph 2.7.10 of the AMR (2021) that: <i>"The Council will need to work with developers and its partners to find an additional supply of longer term sites to bridge the gap between the supply that is currently anticipated and the adopted London Plan target. This will become ever more important as the annual housing target for Lewisham is set to increase significantly to 1,667 per annum, once the Draft London Plan is adopted."</i></p> <p>The proposed development site therefore presents an important opportunity to assist in the Council's housing delivery against Lewisham's identified strategic housing need, as set out in the remainder of these representations (see Identification of Sites for Co-Location section).</p>	target, the Regulation 19 Local Plan identifies specific deliverable and developable sites with capacity to meet the Borough's strategic housing target over the plan period. The council can demonstrate a five year housing land supply and has included a Housing Trajectory within the Plan.	the London Plan (2021), its borough-level housing target for Lewisham and period with which this takes effect. In addition, the plan has been amended to remove references to the Local Housing Need (LHN) figure and the standard methodology. Local Plan amended to include an up-to-date Housing Trajectory and five year housing land supply.
Yorkshire & Clydesdale Bank Trustees Ltd c/o CBRE Global Investors (Montagu-Evans obo)	2	HO 01	<p><i>Relates to Call for site</i></p> <p>Policy HO1 Meeting Lewisham's Housing Needs Draft Policy HO1 sets out the Council's strategic housing target, under which the Council outlines two housing targets. The first is the now adopted London Plan (2021) minimum target of 16,670 net housing completions between 2020 and 2030, which is equivalent to 1,667 per year. The second is the Local Housing Need (LHN) figure calculated in the 2019 Lewisham Strategic Housing Market Assessment (SHMA) (2019), which establishes a minimum annual need of 2,334 net units per annum. We also note that the revised standard methodology was published by the Government on 16 December 2020, which identifies an annual need of 4,178 dwellings.</p> <p>We would recommend the Council refers to a single strategic housing target, so that the Plan is unambiguous. This should also be expressed for the total Plan period. This is important for monitoring the Council's performance in housing delivery once the Plan is adopted and to ensure the target is achieved.</p> <p>The supportive text to Draft Policy HO1 states that: <i>"We have identified specific large sites which have the potential capacity to deliver approximately 25,000 net new homes. When combined with trend-based</i></p>	Despite an increase in the London Plan housing target, the Regulation 19 Local Plan identifies specific deliverable and developable sites with capacity to meet the Borough's strategic housing target over the plan period. The council can demonstrate a five year housing land supply and has included a Housing Trajectory within the Plan.	Local Plan amended to appropriately refer to the London Plan (2021), its borough-level housing target for Lewisham and period with which this takes effect. In addition, the plan has been amended to remove references to the Local Housing Need (LHN) figure and the standard methodology. Local Plan amended to include an up-to-date Housing Trajectory and five year housing land supply.

			<p><i>windfall delivery rates in the Borough, there is sufficient capacity to meet and exceed the draft London Plan housing target over a 15-year period; however the phasing of development will be an important consideration. Meeting the NPPF Local Housing Need figure poses a significant challenge, given Lewisham's unique circumstances, particularly the need for strategic transport infrastructure to unlock development potential in areas, and to optimise the capacity of sites".</i></p> <p>The above makes clear that the Council has not identified sufficient land to meet the minimum housing target that has now been imposed through the adoption of the London Plan across the Plan period. We note that for a Plan to be found sound it must be positively prepared, which means a Plan should seek to meet the area's objectively assessed needs. This has not been achieved by the Regulation 18 Plan. We remind the Council that the NPPF (Paragraph 123) makes clear that where there is an anticipated shortage of land for meeting identified housing needs such as in this case, policy-makers must: <i>"Ensure that developments make optimal use of the potential of each site. In these circumstances... plans should contain policies to optimise the use of land in their area and meet as much of the identified need for housing as possible".</i></p> <p>In order for the Plan to contribute to achieving sustainable development, and for the Council to meet its substantial minimum housing targets, it is incumbent on LBL to properly assess and make allocations for appropriate redevelopment sites through the Local Plan. This should be reflected in an acknowledgement that the Council must focus on allocating additional land for residential development, including on designated employment land given it represents the largest stock of brownfield land to meet the forecast unmet need. The Council must re-consider its policy approach to address this and we comment on specific employment policies below.</p>		
Notting Hill Genesis (Savills obo)	2	HO 01	<p><i>Relates to Call for site Residential</i></p> <p>New homes is a key priority for the Mayor of London. As such, Table 4.1 of the London Plan sets out a minimum 10 year housing target for Lewisham of 16,670 new homes over a 10 year period (2019/20 to 2028/29) which equates to 1,667 per annum. We note this is reflected in Policy HO1 of the draft Local Plan, and sets out that the Council will ensure that the London Plan minimum ten-year housing target is met and exceeded. Whilst NHG strongly supports the delivery of new homes in Lewisham, we note that the Standard Methodology Housing Need (published 16 December 2020 by MHCLG) outlines a considerably higher local housing need in Lewisham of 4,178 new homes per annum. It goes to follow that there is a significant opportunity for a mixed use redevelopment at the site which could contribute to these ambitious housing targets.</p> <p>NHG also strongly support the delivery of new affordable homes within Lewisham. NHG acknowledges the Council's threshold approach to viability in accordance with the London Plan Policy H5 and the principle of increased affordable housing, and for new homes to be genuinely affordable, subject to viability. Again, it goes to follow that there is a significant opportunity for a mixed use redevelopment at the site to deliver new affordable homes which could contribute to Lewisham's affordable homes target.</p>	Despite an increase in the London Plan housing target, the Regulation 19 Local Plan identifies specific deliverable and developable sites with capacity to meet the Borough's strategic housing target over the plan period. The council can demonstrate a five year housing land supply and has included a Housing Trajectory within the Plan.	Local Plan amended to appropriately refer to the London Plan (2021), its borough-level housing target for Lewisham and period with which this takes effect. In addition, the plan has been amended to remove references to the Local Housing Need (LHN) figure and the standard methodology. Local Plan amended to include an up-to-date Housing Trajectory and five year housing land supply.

			We note that draft Local Plan Policy HO1 (Parts D and F) seek to provide a mix of unit sizes and housing choice with reference to the Council's Housing Strategy or other strategies.		
Barratt London and the Church Commissioners (Avison Young obo)	2	HO 01	<p><i>Relates to Part 3, LCA SA 20</i></p> <p>Chapter 7 Housing Draft Policy HO1 Meeting Lewisham's housing needs</p> <p>Barratt London and the Church Commissioners are strongly supportive of Part A of Draft Policy HO1 which requires development proposals to make the best use of land and optimise the capacity of housing sites in order to ensure the London Plan housing target is met and exceeded, and delivery against Lewisham's Local Housing Need figure is maximised.</p> <p>Barratt London and the Church Commissioners are also supportive of Part D of this policy which requires development to deliver an appropriate mix of housing within the site and locality having regard to individual site circumstances (including location, character, and nature and scale of development proposed). We request the criteria listed under Part D for consideration of housing mix be expanded to acknowledge the following parts of London Plan Policy H10 Part A which state that applicants and decision-makers should have regard to:</p> <ul style="list-style-type: none"> the nature and location of the site, with a higher proportion of one and two bed units generally more appropriate in locations which are closer to a town centre or station or with higher public transport access and connectivity. the role of one and two bed units in freeing up existing family housing <p>We consider this will ensure an appropriate mix of housing can be secured, which contributes to the Borough's housing target and need.</p>	Support noted. The Council has prepared an updated SHMA that has considered the need for family housing and smaller units. The results of the study have influenced the policies in the Local Plan.	<p>Local Plan amended with new target size mix for affordable housing.</p> <p>Local Plan amended to clarify locations where a higher proportion of 1 and 2 bed units may be appropriate, in accordance with the London Plan and as suggested.</p>
GHL (Leegate) Limited (Frank Knight obo)	2	HO 01	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>2. Housing</p> <p>The Lewisham strategic housing target is set by the London Plan, which stipulates a ten-year target of 16,670 net housing completions over the period 2020 to 2030 (Policy HO1 Meeting Lewisham's housing needs). Policy HO1 suggests that delivery against Lewisham's Local Housing Need figure will be maximised.</p> <p>The Council explains that the LPA will increase housing supply by allocating strategic sites for new housing development and ensure that all development proposals make the best use of land and optimise the capacity of housing sites, in line with proposed Policy QD6 (Optimising site capacity).</p> <p>GHL strongly supports the housing delivery strategy and reminds the LPA that Lewisham's centres, such as Lee Green District Centre, have a number of locations where a significant number of homes could be delivered. These homes would be in sustainable locations close to shops, services, amenities and public transport. The homes could be delivered across a range of unit sizes and include affordable housing. The Leegate Shopping Centre is being promoted by GHL to provide increased residential units, and GHL reminds the Council that the associated increase in residential units in the Lee Green District Centre would also enhance the centre's long-term viability, which is a significant planning benefit.</p>	Support noted.	Local Plan amended to appropriately refer to the London Plan (2021), its borough-level housing target for Lewisham and period with which this takes effect. In addition, the plan has been revised remove references to the Local Housing Need (LHN) figure and standard methodology.
GHL (Leegate) Limited	2	HO 01	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Policy HO1 adds that a provision of a mix of unit sizes is required to meet local need, including the target unit size mix that is set out in the Council's Housing</p>	Noted. The Council has prepared a SHMA Update (2022) that has considered	Local Plan policy HO1 amended to provide further clarification

(Frank Knight obo)			<p>Strategy. Furthermore, LBL requires the delivery of family housing units (3+ bedrooms) on schemes of 10 or more dwellings and LBL states that they will resist proposals where they comprise an overconcentration of 1 or 2 bedroom units. Policy HO1 does propose a number of instances where deviations from the preferred housing mix will be acceptable, such as areas benefitting from high PTAL, or sited in a locality that benefits from good provision of larger and family sized units; or the proposal is the only housing format deliverable owing to site constraint (studios proposed are of an exceptional design quality).</p> <p>GHL seeks further clarification as to what the Council would define as an 'overconcentration' of 1 or 2 bedroom units in Lewisham.</p> <p>GHL acknowledges the need for a mix of house types, sizes and tenures to meet identified needs. However, it is important that those policies of the Lewisham Local Plan Review provide sufficient flexibility and avoid stifling the delivery of new homes as the result of overly prescriptive and restrictive policies. Any such policy would not be deliverable over the plan period, and therefore not be effective. There should also be an allowance within the policies for diversification of residential mix to come forward, which can contribute significantly towards the Borough's housing offer overall.</p> <p>GHL recognises the Council's evidence, provided by the Strategic Housing Market Assessment. However, the interpretation of this evidence is resulting in an overly prescriptive policy which can potentially affect a schemes viability, especially in respect of private housing. GHL can confirm there is demand for a mix of housing typologies, generally for smaller units than larger units, and we encourage the Council to engage with the developers to understand this demand. In the interests of providing balanced communities, understanding market conditions, will help inform a more aspirational yet flexible policy approach.</p> <p>It is therefore very important that any policies relating to housing mix allow for the final mix to be agreed between the applicant and Council on a site-by-site basis. This would reflect paragraph 11 of the NPPF, which promotes a flexible approach to housing mix, recognising that needs and demand will vary from area to area and site to site; ensures that the scheme is viable; and provides an appropriate mix for the location.</p>	<p>the need for smaller units and identifies a target mix of unit sizes and informed the policy in the Regulation 18 document. It is acknowledged that further clarifications could be provided to make clear that housing mix will be considered on a case by case basis, and to provide further policies and guidance around the issue of overconcentration.</p>	<p>around how overconcentration will be assessed.</p> <p>Local Plan policy HO1 amended to make clear that appropriate housing mix will be considered on a case-by-case basis.</p>
LaSalle Investment Management (Savills obo)	2	HO 01	<p><i>Relates to Part 3, LSA SA 10</i></p> <p>HO1 Meeting Lewisham's housing needs</p> <p>Policy HO1 identifies that "...development proposals must make the best use of land and optimise the capacity of housing sites in order to ensure:</p> <p>a. draft London Plan minimum ten-year target of 16,670 net housing completions over the period 2020 to 2030 (or 1,667 net completions per year) is met and exceeded; and</p> <p>b. That delivery against Lewisham's Local Housing Need figure is maximised".</p> <p>LSIM support the intention to facilitate an increase in housing supply within Lewisham through the allocation of sites in order to help meet the strategic target for the Borough. It is noted that such targets are not a ceiling and are encouraged to be exceeded.</p>	Support noted.	No change.

			<p>Policy HO1 also states that the Council will keep under review the Local Plan strategic housing target to ensure conformity with the London Plan.</p> <p>LSIM welcomes the Council's commitment to such a review and would advocate that the Local Plan should respond appropriately to take account of any evidence of unmet housing needs within the Borough.</p>		
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	2	HO 01	<p><i>Relates to Part 3, LNA SA 14</i> Residential Our Client is fully supportive of Site Allocation 14 providing new homes (C3).</p> <p>We also note that new homes is a key priority for the Mayor of London. As such, Table 4.1 of the London Plan sets out a minimum 10 year housing target for Lewisham of 16,670 new homes over a 10 year period (2019/20 to 2028/29) which equates to 1,667 per annum. We note this is reflected in Policy HO1 of the draft Local Plan, and sets out that the Council will ensure that the London Plan minimum ten-year housing target is met and exceeded. Whilst our Client strongly support the delivery of new homes in Lewisham, we note that the Standard Methodology Housing Need (published 16 December 2020 by MHCLG) outlines a considerably higher local housing need in Lewisham of 4,178 new homes per annum. It goes to follow that there is a significant opportunity for a residential-led mixed use redevelopment at the site which could contribute to these ambitious housing targets.</p>	Noted.	Local Plan amended to appropriately refer to the London Plan (2021), its borough-level housing target for Lewisham and period with which this takes effect. In addition, the plan has been revised remove references to the Local Housing Need (LHN) figure and standard methodology.
Tavern Propco (Savills obo)	2	HO 01	<p><i>Relates to Part 3, LSA SA 11</i> Housing Need and Delivery The adopted London Plan (January 2021) has a target of 52,000 homes per annum across London over the plans ten-year period.</p> <p>On 29 January 2021, the Secretary of State (The Rt Hon Robert Jenrick MP) issued the Mayor of London (Sadiq Khan) with a letter confirming that he is content for the London Plan to be formally published, but set out a strong message to the Mayor of London that housing supply across London needs to be improved. In his letter to the Mayor of London, the Secretary of State commented: "...you still have a very long way to go to meet London's full housing need, something your plan clearly and starkly fails to achieve. Londoners deserve better and I will be seeking to work with those ambitious London Boroughs who want to deliver over and above the housing targets you have set them; something that would not have been possible without my earlier directions."</p> <p>Given the above, it is clear that the London Plan is unambitious with its adopted housing targets and boroughs, including Lewisham, should be seeking to exceed the minimum targets of the London Plan to achieve the GLA's identified need of 66,000 homes over the ten-year period. It is considered that this provides strong justification for amendments to the housing supply targets set out in emerging Policy HO.1 and discussed below.</p> <p>Emerging Policy HO1 'Meeting Lewisham's Housing Needs' Emerging Policy HO1 states that development proposals must make the best use of land and optimise the capacity of housing sites in order to ensure that the draft London Plan minimum ten-year target of 16,670 net housing completions</p>	Noted. Since the Regulation 18 consultation closed, the London Plan 2021 has come into force. This established the Borough's strategic housing requirement.	Local Plan amended to appropriately refer to the London Plan (2021), its borough-level housing target for Lewisham and period with which this takes effect. In addition, the plan has been revised remove references to the Local Housing Need (LHN) figure and standard methodology.

			<p>over the period 2020 to 2030 (or 1,667 net completions per year) is met and exceeded.</p> <p>The adopted London Plan's yearly housing targets for Lewisham (1,667) are significantly below the Standard Methodology Housing Need figure of 4,178 per annum. This represents an uplift of 150.6% above the housing target in the London Plan.</p> <p>Requested Amendment: It is strongly considered that Lewisham should be working to achieve the housing need figures identified within the Standard Methodology and that emerging Policy HO1 should be amended with an increased housing target to reflect this. The Lewisham's South Area Site Allocation 11: Downham Coop can help contribute to the increased supply of housing in Lewisham over the plan period by setting the number of residential units development of the site should deliver as a minimum of 42 units.</p>		
The Renewal Group (Carney Sweeney obo)	2	HO 01	<p><i>Relates to Part 3, LNA SA 08</i></p> <p>Policy HO1 Meeting Lewisham's Housing Needs</p> <p>This policy needs to refer to Build to Rent housing and include support for it, in line with the London Plan. Build to Rent developments have a vital role to play in meeting London's housing needs and should be actively supported in Lewisham.</p>	Agree.	Local Plan Policy HO1 amended to reference Build to Rent.
SGN (Quod obo)	2	HO 01	<p><i>Relates to Part 3, LSA SA 01</i></p> <p>Chapter 7 - Housing</p> <p>5.13 SGN supports the need to significantly increase housing delivery in Lewisham as set out in draft Policy HO1 'Meeting Lewisham's housing needs' and supports the requirement for Councils to work positively and proactively with key stakeholders and development industry partners. This aligns with NPPG guidance (Para. 59) that sets out the Government's objective of significantly boosting the supply of homes.</p> <p>5.14 The inclusion of the London Plan minimum ten-year target of 16,670 net additional homes in draft Policy HO1 is supported. We would however also urge the Council to review its minimum housing requirement in light of the NPPF standard methodology for Local Housing Need. It is considered that the Standard Methodology housing need figure based on the adopted London Plan (2,964 net additional homes) should be included in the main policy text of draft Policy HO1. SGN propose an amendment to draft Policy HO1 A (a and b) as follows:</p> <p>5.15 "A The draft London Plan minimum ten-year housing delivery target of 16,670 net housing completions over the period 2020 to 2030 (or 1,667 net completions per year) is met and exceeded a starting point and delivery exceeding this level should be encouraged. This is in order to maximise housing delivery against the NPPF Standard Methodology target of 2,964 net homes per annum.</p>	Noted. The NPPG clearly states that the London Plan is responsible for establishing London-wide need and disaggregating this to individual Boroughs. Therefore, the current position for the borough is a minimum housing need figure of 1,667 based on the 2021 London Plan target.	Local Plan amended to appropriately refer to the London Plan (2021), its borough-level housing target for Lewisham and period with which this takes effect. In addition, the plan has been revised remove references to the Local Housing Need (LHN) figure and standard methodology.
SGN (Quod obo)	2	HO 01	<p>5.16 Point C) of draft Policy HO1, outlines that in increasing housing supply new residential development will be directed to Opportunities Areas, that Lewisham will support new housing development on site allocations and will make the best use of land and optimise housing site capacities. SGN is fully supportive of Policy HO1 C) but again reinforce that the full optimisation of the gas works site cannot be realised in absence of allocation of the site as an appropriate location for tall buildings.</p>	Noted.	Tall building policies and suitability zones changed
Phoenix Community	2	HO 01	<p>Housing</p> <p>PCH strongly support the Council's aspirations of maximising the supply of additional homes in the Borough to meet and exceed the annual housing target set out in the New</p>	Noted. The Local Plan is seeking to boost the	No change.

Housing (BPTW obo)			London Plan. A concentration of these in Opportunity Areas defined by the London Plan is supported, however the proportion to be directed to 'strategic corridors...consistent with the spatial strategy for the borough' (as per draft policy HO1) will need to be re-assessed following the Bakerloo line extension postponement. In the interim period, this plan should direct a greater proportion to sensitive intensification of residential areas, small sites, and estate renewal and regeneration. To that end, policy HO2 (Small Sites) should at least echo the London Plan's target of 379 homes per year on small sites in Lewisham as minimum, and should consider upping this target given that it is premature to allocate strategic-scale sites on the future Bakerloo line.	delivery of small housing development beyond the historic delivery levels, aiming not only to meet the London Plan small sites target but to exceed it. The Borough's small sites target is signposted in the policy supporting text.	
Phoenix Community Housing (BPTW obo)	2	HO 01	The New London Plan stipulates that boroughs should only set prescriptive dwelling size mix requirements (no. bedrooms) for low-cost rent homes, however the consultation document is not prescriptive on this, and this flexibility is welcomed by PCH.	Noted.	Local Plan amended to set a target size mix for affordable homes, informed by the SHMA Update.
Tetra Tech Planning (John Lyon's Charity obo)	2	HO	Housing Do you agree that the Local Plan has identified all of the issues around housing? We note the absence of a specific policy considering "Build-to-Rent" schemes. The private rented sector is growing in the Borough and across London and it would not be prudent to dismiss this sector. In accordance with London Plan Policy H11, a stand-alone policy for this sector should be included.	Disagree that a new stand-alone policy on Build to rent is needed although there is merit in referring to this tenure within the Local Plan	Local Plan Policy HO1 amended to make reference to Build to rent.
Phoenix Community Housing (BPTW obo)	2	HO 01	Part E of policy HO1 restricts the subdivision of 3+ bedroom units into smaller units subject to a number of caveats. We would suggest the inclusion of 'smart lettings' into this list, as piloted by PCH at its Hazelhurst Court development and proposed in the Council's draft Housing Allocations Policy, to reflect the role of new 1 and 2-bed housing in freeing up underused family housing on other sites within a management portfolio. There should be greater flexibility to enable some of these re-found family units to be subdivided into further affordable housing if meeting the other design criteria set out in the policy.	Noted. Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham SHMA. This makes clear the local need for family sized housing units. Given recent housing delivery records which suggest a significant number of 1-2 bed units coming forward, it is considered appropriate to guard against the loss of existing family sized housing units of 3+ beds.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	HO 01	Housing Mix 10.6 Landsec are concerned that draft Policy HO1 E does not go far enough to provide sufficient flexibility on housing mix for sites located in sustainable locations such as Town Centres. 10.7 Policy H10 'Housing Size and Mix' of the London Plan provides greater clarity on where smaller unit developments might be supported (e.g. at Part 6 of the London Plan, it considers that one and two bed units are generally more appropriate in locations which are closer to a town centre) with the emphasis on the applicant to demonstrate acceptability.	Disagree. Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham SHMA. This has informed the content of the Local Plan and now includes a target unit size mix for affordable housing. There is clear evidence that the majority of demand is for family sized housing.	No change.

L&Q Group	2	HO 02	<p><i>Relates to Call for site</i> <i>Optimising the use of small housing sites</i></p> <p>Policy H2 London Plan specifies that increasing the rate of housing delivery from small sites is a strategic priority and boroughs are advised to proactively support well designed homes on small sites.</p> <p>Under Policy HO2, LBL recognise the potential contribution of small housing sites to housing supply, including affordable homes. Whilst L&Q is supportive of this, the policy needs to recognise that viability of smaller schemes is often very finely balanced, considering the high cost of development vs the level of units that can be delivered on a site. As such, some of the development requirements in Policy HO2 could be onerous for small sites (such as the requirement to provide green infrastructure measures and maximising urban greening) and can make the difference on whether a scheme can be progressed. The LBL needs to maintain flexibility to allow innovative design solutions on small sites.</p> <p>We therefore welcome more bespoke guidance, which recognises that smaller sites have a distinct set of issues compared to larger sites and require a more flexible approach to bring these sites forward.</p>	<p>Support noted. The Council has adopted a Small Sites SPD to support the implementation of the development plan, and to boost the delivery of small sites in Lewisham.</p> <p>The Local Plan Viability Assessment indicates that the requirements can viability be delivered. Planning proposals will need to submit Viability Assessments where it is considered the policies cannot be satisfied.</p>	No change.
GHL (Leegate) Limited (Frank Knight obo)	2	HO 02	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Policy HO2 (Optimising the use of small housing sites) remarks that development of small sites will play an important role in increasing housing supply in Lewisham and supporting provision for a wide range of high quality and affordable homes. This policy outlines that the Council will prepare a suite of Supplementary Planning Documents to guide the sensitive intensification of small sites. GHL supports the proposals set out in Policy HO2 (Optimising the use of small housing sites).</p>	Support noted.	No change.
GHL (Leegate) Limited (Frank Knight obo)	2	HO 02	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>GHL supports the provision of different housing types but requests that when drafted, the policy allows for flexibility and takes account of scheme viability on a site-by-site basis. In addition, the affordable housing tenure might change overtime in response to local needs, affordable housing policy / legislation and funding.</p>	<p>The policy incorporates flexibility by using words such as appropriate mix, target mix, reasonable proportion etc. Development proposals that do not to meet the target mix in terms of unit sizes and affordable housing can demonstrate their approach via viability assessments.</p>	No change.
L&Q Group	- 2	General HO 02	<p>We understand LBL are consulting on a Residential Small Sites SPD until 1 June 2021. We will submit detailed comments to the consultation itself, but note several key hurdles to small site developments which L&Q has faced including:</p> <ul style="list-style-type: none"> • Additional planning requirements, which are appropriate on larger sites / schemes, often have an impact on viability / likelihood of planning application being implemented on smaller sites since margins can be less; • A blanket approach to requirements that can have longer term maintenance issues on smaller sites e.g. green roofs can lead to difficulties of maintenance for landlord and ultimately lead to increased service charge for residents; • Access arrangements to small sites – specifically in relation to devising appropriate fire and refuse strategies. 	Noted. The preparation of the Small Sites SPD is outside the scope of the Local Plan.	No change.

<p>QUOD (Landsec obo - Lewisham Shopping Centre)</p>	<p>2</p>	<p>HO 02</p>	<p>10Chapter 7 Housing</p> <p>10.1 Chapter 7 of the Reg 18 Plan contains key policies on housing focusing on securing more genuinely affordable homes, boosting housing delivery and tailor housing to local communities.</p> <p>Housing Delivery / Meeting Local Need</p> <p>10.2 Landsec supports the need to significantly increase housing delivery in Lewisham as set out in draft Policy HO1 'Meeting Lewisham's housing needs'. Landsec also supports the requirement for Councils to work positively and proactively with key stakeholders and development industry partners. This aligns with NPPG guidance (Para. 59) that sets out the Government's objective of significantly boosting the supply of homes.</p> <p>10.3 Landsec supports the inclusion of the London Plan minimum ten-year target of 16,670 net additional homes in draft Policy HO1. Landsec acknowledges the importance of aligning local policy to the requirements in the London Plan. We would however also urge the Council to review its minimum housing requirement in light of the NPPF standard methodology for Local Housing Need. It is considered that the Standard Methodology housing need figure based on the London Plan (2,964 net additional homes) should be included in the main policy text of draft Policy HO1.</p> <p>Landsec proposes an amendment to draft Policy HO1 A (a and b) as follows: <i>"a The draft London Plan minimum ten-year housing delivery target of 16,670 net housing completions over the period 2020 to 2030 (or 1,667 net completions per year) is met and exceeded a starting point and delivery exceeding this level should be encouraged. This is in order to maximise housing delivery against the NPPF Standard Methodology target of 2,964 net homes per annum.</i> <i>b That delivery against Lewisham's Local Housing Need figure is maximised"</i></p> <p>10.4 As set out in draft Policy HO1, Landsec strongly supports the requirement to direct new residential development to Opportunity Areas, town centres and other well-connected and sustainable locations. In accordance with London Plan guidance, Landsec proposes that the wording around town centre development is strengthened. The London Plan sets out in detail the requirement for the development of town centres to be encouraged, particularly town centres that are undergoing transformative change, have projected declining demand or significant infrastructure planned (Policy SD9 'Town Centres: Local partnerships and implementation'). London Plan Policy SD6 'Town Centres and High Streets' also states that Council's should promote town centres by "identifying locations for mixed-use or housing-led intensification to optimise residential growth potential."</p> <p>10.5 Landsec proposes the inclusion on an additional paragraph to draft Policy HO1 C, specifically for Town Centre development: <i>"C i. Encouraging the development of town centres, particularly town centres that are undergoing transformative change, have projected declining demand or significant infrastructure planned. The Council will work with strategic partners to promote town centres by identifying locations for mixed-use or housing-led intensification to optimise residential growth potential."</i></p>	<p>Support is noted. Disagree that the standard method should be referred to in the policy and disagree with the proposed wording. Disagree with the precise wording but agree acknowledgement should be given to mixed use led growth in town centres.</p>	<p>No change.</p>
--	----------	--------------	--	---	-------------------

L&Q Group	2	HO 03	<p><i>Relates to Call for site</i> <i>Genuinely affordable housing</i></p> <p>L&Q is supportive of LBL's approach to affordable housing, including support for schemes which deliver 35% affordable housing, in line with the Fast Track route set out in the London Plan.</p> <p>The Council's preferred tenure split of 70% per cent genuinely affordable (social rent or London Affordable Rent) and 30% per cent intermediate (London Living Rent or Shared Ownership) is noted (HO3 E (b)). We consider that where an applicant is bringing forward significant levels of affordable housing on a site, suggested as 35% of higher, weight should be given to the overall affordable offer to allow greater flexibility on this tenure split. This should be reflected in the considerations at HO3 L, in addition to the current drafting which requires consideration on the existing level of housing tenure and mix in the area.</p>	<p>Support noted. Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham SHMA Update. It recommends a 70:30 tenure split, given the affordability pressures in the borough. Officers therefore disagree that the 70/30 tenure split should differ on sites where more than 35% of the units will be affordable housing.</p> <p>However, the Local Plan does provide flexibility to consider housing and tenure mix on a case-by-case basis. Draft Local Plan policy HO3 (Part L) sets out that the Council may seek to alter the tenure and/or mix of affordable housing provision on a case-by-case basis.</p>	No change.
L&Q Group	2	HO 03	<p>All L&Q schemes are designed to be tenure neutral and we welcome the principles of HO3 M. As part of this, L&Q ensures the standard of amenity, communal spaces and playspace are equal across tenures and that residents have access to these. It should be noted in some instances, design and management constraints may limit residents having access to amenities and communal spaces across an entire scheme and it may be necessary to break these down on a block by block basis. For example, where courtyards are created on a block basis and access through the block is required to access that space, we may seek to limit access to just residents of that particular block in order to reduce risk of anti-social behaviour issues from unrestricted access by large numbers. However, every block would then have access to their own communal amenity space which will provide the appropriate open and play spaces required. This also enables security, building management and maintenance costs to be managed, and in turn service charges. As above, we recognise new play space in the public realm should be available for public access.</p>	<p>Support noted. The issues around management and access to spaces is noted and will be addressed through amendments to Policy QD2 on Inclusive and safe design.</p>	<p>Local Plan Policy QD2 amended to include criterion on appropriate management of private and communal amenity space, along with a reference to Government's National Design Guide and tenure neutral housing.</p> <p>In addition, HO3 amended to include a signpost to Policy QD2.</p>
Tetra Tech Planning (John Lyon's Charity obo)	2	HO 03	<p>The Charity fully supports the principle of affordable housing provision in new developments and its importance in creating successful communities.</p>	<p>Support noted.</p>	No change.
Lendlease (Lichfields obo)	2	HO 03	<p><i>Relates to Part 3, LNA SA 02</i> Housing <i>Policy HO3 Genuinely affordable housing & HO5 High Quality Housing Design</i></p> <p>While Lendlease is supportive of Lewisham's ambitions for high quality housing design, we note that significant parts of these policies are unnecessarily replicated from London Plan 2021 policy and supplementary guidance. In</p>	<p>Noted. The draft Local Plan policies have been included where they provide useful local interpretation, to aid the implementation of national policy or London</p>	<p>Local Plan reviewed and amended where appropriate to reduce repetition, thereby shortening the length of the Local Plan.</p>

			particular, HO3 Part F is replicated from the London Plan 2021 Policy H5 (Threshold Approach to Applications). Much of HO5 is replicated from London Plan 2021 Policy D6 (Housing Requirements).	Plan policies. It is acknowledged that there is some duplication, however this is the approach also taken by other London Boroughs.	
Notting Hill Genesis (Savills obo)	2	HO 03	<i>Relates to Call for site</i> We also note that Policy HO3 (Part L) may seek to alter the tenure and/or mix of affordable housing provision on a case-by-case basis. NHG is supportive of the need to deliver a range of housing types, and is supportive of policies which adopt a flexible approach to housing mix. This will ensure that the draft Local Plan is effective and deliverable .	Support noted.	No change.
Barratt London and the Church Commissioners (Avison Young obo)	2	HO 03	<i>Relates to Part 3, LCA SA 20</i> Draft Policy HO3 Affordable Housing Barratt London and the Church Commissioners broadly support the alignment of this Draft Policy with the threshold approach to viability set out in London Plan Policy H5 and the Mayor's Affordable Housing and Viability SPG. Part E of Draft Policy HO3 currently identifies that, on large sites, affordable housing should be delivered at a tenure split comprising '70% genuinely affordable' and '30% intermediate (London Living Rent)', however, does later acknowledge that <i>"the Council may seek to alter the tenure and/or mix of affordable housing provision on a case-by-case basis"</i> . Barratt London and the Church Commissioners strongly support the need for flexibility concerning these matters and support the principle of affordable housing tenure being determined on a case-by-case basis, and subject to site-specific considerations.	Support noted.	No change.
LaSalle Investment Management (Savills obo)	2	HO 03	<i>Relates to Part 3, LSA SA 10</i> HO3 Genuinely affordable housing Policy HO3 states that "the strategic target is for 50 per cent of all new homes delivered in Lewisham to be genuinely affordable". It should be recognised that the 50% figure is a strategic target to include affordable housing from all sources and not just that secured through planning obligations. A starting point of 35% provision would not fetter the Council's ability to negotiate for a higher level of provision where individual site circumstances justify such an approach.	Noted. This is reflected in the policy and the supporting text. The Local Plan specifies that a strategic target for 50 per cent of all new homes delivered in the Borough to be genuinely affordable. This is based on evidence of need, as set out in the SHMA Update 2022. We disagree that the starting point should be 35%. Instead, the Council seeks the maximum amount of genuinely affordable housing to be delivered on new housing developments, but acknowledges that proposals that achieve a minimum 35% affordable housing will be acceptable,	No change.

				in line with the London Plan threshold approach to viability.	
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	2	HO 03	<p><i>Relates to Part 3, LNA SA 14</i></p> <p>The Clients also supports delivery of new affordable homes within Lewisham. The Client acknowledges the Council's threshold approach to viability in accordance with the London Plan Policy H5 and the principle of increased affordable housing, and for new homes to be genuinely affordable, subject to viability.</p> <p>We note that draft Local Plan Policy HO1 seeks to provide a mix of unit sizes and housing choice with reference to the Council's Housing Strategy or other strategies. We also note that Policy HO3 may seek to alter the tenure and/or mix of affordable housing provision on a case-by-case basis. Our Client is supportive of the need to deliver a range of housing types. To ensure flexibility, we consider the following text should be added to Policy HO1 (the additions are shown underlined): <u><i>A flexible and end-user driven approach to housing mix should be taken when considering comprehensive redevelopment proposals.</i></u></p> <p>Making this change would provide flexibility and it will ensure that the draft Local Plan and site allocation can be effective in its delivery.</p> <p>We note that Policy HO3 (Genuinely affordable housing) sets out thresholds and criteria in the provision of affordable homes. Our Client's support the policy's approach that the provision of affordable homes is subject to viability.</p>	Support noted. Local Plan will be amended to reflect that housing mix considered on a case by case basis, but not using the suggested text.	Local Plan amended to reflect that appropriate level of housing mix to be determined on a case-by-case basis.
Transport for London Commercial Development	2	HO 03	<p>HO3 Genuinely Affordable Housing</p> <p>TfL CD is committed to delivering at least 50% affordable housing across its development portfolio in London and looks forward to working with the borough to bring forward appropriate levels of affordable housing on sites in our ownership.</p>	Noted.	No change.
The Renewal Group (Carney Sweeney obo)	2	HO 03	<p><i>Relates to Part 3, LNA SA 08</i></p> <p>Policy HO3 Genuinely Affordable Housing</p> <p>Affordable housing provided as part of Build to Rent developments in line with Policy H11 of the London Plan should be supported and needs to be set out in the Lewisham Local Plan.</p>	Noted.	Local Plan Policy HO1 amended to reference Build to Rent.
SGN (Quod obo)	2	HO 03	<p><i>Relates to Part 3, LSA SA 01</i></p> <p>5.17 SGN support the strategic principles of Policy HO3. Point J) outlines that small sites of less than 10 dwelling units will be required to make a financial contribution towards the delivery of affordable housing and should seek to deliver this on-site. This requirement is contrary to Paragraph 63 of the NPPF and should be removed.</p>	Noted. The Lewisham SHMA indicates a significant and acute need for more genuinely affordable housing in the borough. To help address this need, the Local Plan requires that new housing developments delivering less than 10 dwellings should seek to deliver on-site affordable housing wherever practical and feasible. Where provision	Local Plan amended with further details on affordable housing contributions for small sites.

				cannot be delivered on-site, a financial contribution will be sought. The Local Plan Viability Assessment indicates that the small sites contribution will not adversely impact on viability. Local Plan policy HO3 will be amended to provide further clarity on how the small sites contributions.	
Phoenix Community Housing (BPTW obo)	2	HO 03	<p>The setting of affordable housing requirements and thresholds in line with the London Plan and the Mayor's threshold approach to viability is, of course, supported. The 70:30 tenure mix split between genuinely affordable and intermediate housing products is also supported, however there should be explicit policy support for maximising the genuinely affordable proportion.</p> <p>The NPPF definition of Affordable Rent as up to 80% of local market rent is unaffordable to many Londoners and so we would prefer to see the term 'low cost homes for Londoners on low incomes' (or similar) used instead of 'genuinely affordable' to describe the 70% portion. Clarity on rent levels and clearer definitions in the Plan would be welcomed by PCH residents. PCH is aware that Bellingham members are responding to the draft Plan and supports their proposal that genuinely affordable social rents are required.</p> <p>Similarly to wheelchair housing, we would welcome the insertion of flexibility that enables Housing Associations / Registered Providers to meet the 70:30 split across a portfolio of sites, given that site specific circumstances can often justify the introduction of shared ownership in such areas that meet the housing need of certain households with low annual incomes, whereas other areas may never be truly affordable to purchase. Further, there are long-term management cost savings in being able to wholly retain and manage, or wholly sell an affordable scheme.</p> <p>A more radical way of equipping Housing Associations to compete with major developers would be the introduction of building credits for over-provision of affordable housing that could be sold on to private schemes. In any case, we would encourage some additional policy recognition where affordable housing schemes deliver over and above the policy target. For example greater flexibility on mix of units (subject to demonstrating local housing need), or acknowledgment that any overprovision could be taken off-set at other developments within close proximity, enabling concentration of affordable units on the most appropriate sites within a wider estate infill strategy.</p>	Support is noted. Rent levels are beyond the scope of the Local Plan. The Local Plan already seeks the maximum amount of genuinely affordable housing to be delivered on new housing developments. There is no need to change the definition of genuinely affordable as the Local Plan already acknowledges this to be social rent or London Affordable Rent only. Disagree with the need for building credits or for a 70:30 split across a portfolio of sites as the Local Plan already allows for flexibility as there can be alterations to the tenure and/or mix of affordable housing provision on a case-by-case basis, having regard to the existing levels of housing tenure and mix in the area, along with development viability.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	HO 03	<p>Affordable Housing</p> <p>10.8 Landsec supports the threshold approach to affordable housing and viability aligned to the London Plan as set out in draft Policy HO3 G 'Genuinely affordable housing'. However, at present the text regarding the benchmark existing use value does not make clear that a premium should be added to incentivise land to be released for redevelopment. Paragraph 4.5.3 of the London Plan states that the <i>"benchmark land value is based on the current use value of a site plus an appropriate site premium"</i>. Landsec proposes that draft Policy HO3 G be amended as follows:</p>	Noted	H03 Affordable Housing Policy amended to better reflect higher level policy

			<p><i>"G Where the Viability Tested Route is used and a viability assessment is submitted to support the level of affordable housing provision made by a proposal, this must be based on a standard residual valuation approach, with the benchmark existing use value of the land taken as the existing (plus an appropriate premium to the landowner) /alternative use value..."</i></p> <p>10.9 As set out in draft Policy HO3 M, Landsec agrees that new affordable housing development must be designed to a high-quality standard and homes should be indistinguishable from market units. Landsec however notes that, in line with leasehold law, private residents cannot subsidise amenities for affordable housing residents. The text should be amended to state that affordable residents will be given the option to access amenities if they are able / want to pay the service charge. Landsec propose the following revision to draft Policy HO3 M:</p> <p><i>"M ...Development should be sensitively integrated into the site and its surroundings, with affordable housing units being indistinguishable from market units in terms of quality of design and materials, space standards and access and amenity provision. All residents should be given the option to access onsite amenities."</i></p> <p>10.10 Landsec agrees that for genuinely affordable housing (i.e. London Affordable Rent / SocialRent) residents should be provided with lifetime tenancies (Para. 7.34). Landsec seeks clarification that this does not apply to intermediate tenures which cannot have the same tenancy agreements as social rent (but do of course have other tenancy protections governed by separate law and policy). Landsec proposes the following amendment to Paragraph 7.34: <i>"7.34 ... For genuinely affordable homes, we will seek that residents are provided with lifetime tenancies, ideally in perpetuity."</i></p> <p>10.11 Landsec agrees that Shared Ownership housing costs should be demonstrably affordable (Para. 7.43). Landsec notes that Shared Ownership income thresholds should be linked to the London Plan and London Plan AMR. The London Plan AMR states in paragraph 3.74 that the Shared Ownership income threshold will be reviewed / updated on an annual basis. It is also considers that the affordability calculation be aligned to the formula in the London Plan AMR (annual housing cost should be no greater than 40% of a household's net income). Landsec proposes the following amendment to Paragraph 7.43. <i>"7.43 ... Shared ownership products may also be an acceptable form of tenure, where the total monthly costs are demonstrably affordable. The affordability threshold for intermediate tenures should be aligned to the London Plan Annual Monitoring report which is updated annually. For dwellings to be considered affordable, annual housing costs, including mortgage payments (assuming reasonable interest rates and deposit requirements), rent and service charge, should be no greater than 40 per cent of a household's net income."</i></p>		
L&Q Group	2	HO 04	<p><i>Relates to Call for site Housing estate maintenance, renewal and regeneration</i></p> <p>As a long-term landlord of the homes we develop, L&Q is committed to high quality living environments that can be maintained at decent standards whilst</p>	Support noted.	No change.

			keeping services changes for residents' low. L&Q strongly support the aspirations of Policy H04.		
The Renewal Group (Carney Sweeney obo)	2	HO 05	<i>Relates to Part 3, LNA SA 08</i> Policy HO5 High Quality Housing Design Part G of this policy states that proposals for single aspect dwellings will be resisted and should only be considered in exceptional circumstances, where it can be suitably demonstrated that it will provide for a more appropriate design solution than a dual aspect dwelling. This policy goes further than the London Plan and associated design guidance, which seeks to avoid <i>north facing</i> single aspect dwellings (our emphasis), rather than all single aspect dwellings. There is no justification for resisting single aspect dwellings which face east, west and south and this policy needs to be amended accordingly.	Noted. Agree that the policy should be amended to provide greater flexibility for considering single aspect dwellings, whilst ensuring high standard of design and amenity.	Local Plan amended to remove 'exceptional circumstances' clause and make clear the requirements on single aspect dwellings, also signposting need to avoid north facing single aspect dwellings in line with London Plan guidance.
SGN (Quod obo)	2	HO 05	<i>Relates to Part 3, LSA SA 01</i> 5.18 SGN are generally supportive of draft Policy HO5 'High Quality Housing Design', although are concerned that the requirements of Part G are overly restrictive and exceed the requirement of the London Plan and its Housing Guidance. The draft policy includes requirements which may limit development unnecessarily and this should be reviewed.	Noted. Agree that the policy should be amended to provide greater flexibility for considering single aspect dwellings, whilst ensuring high standard of design and amenity.	Local Plan amended to remove 'exceptional circumstances' clause and make clear the requirements on single aspect dwellings, also signposting need to avoid north facing single aspect dwellings in line with London Plan guidance.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	HO 05	Housing Standards 10.14 Landsec are generally supportive of draft Policy HO5 'High Quality Housing Design', although are concerned that the requirements of Part G are overly restrictive and exceed the requirement of the London Plan and its Housing Guidance. The draft policy includes requirements which may limit development unnecessarily. Landsec would like to work with the Council to explore further flexibility with regards this policy.	Part G has been amended to make the reference to single aspect dwellings more flexible, in line with the London Plan, and has been moved to a new policy QD8.	Local Plan Policy QD8 amended to make the wording more flexible.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	HO 06	Care Home Accommodation 10.12 In respect of Policy H06 (Accommodation for older people) Landsec supports the requirement for specialist older person's accommodation where it meets an unmet local housing need. Such accommodation can play a valuable role in improving older persons' quality of life and contributing to mixed and balanced communities. Landsec however notes that the policy should recognise the challenges of delivering specialist older persons / care home accommodation compared to conventional housing. This includes larger space standards, additional fit out costs, and a less efficient net:gross ratio. The policy should be amended to acknowledge that, in order to secure older persons housing and the benefits it brings, flexibility may be needed in other policies including affordable housing. The requirement for flexibility is recognised in the London Plan which states that 'the tenure split requirement for specialist older persons housing may differ' from conventional housing (paragraph 4.13.11). 10.13 It is proposed that Policy H06 should be amended to include an additional paragraph stating the following:	Disagree that there should be a trade-off between affordable housing and other forms of housing.	No change.

			<p><i>“The challenges of delivering accommodation for older people are recognised. Development proposals for this type of housing will be assessed on a case-by-case basis, and policy flexibility will be considered where necessary (including for affordable housing). Consideration will be given to the level of managed care provision, and onsite facilities.”</i></p>		
Tribe Student Housing (Avison Young obo)	2	HO 08	<p><i>Relates to Part 3, LNA SA 06</i></p> <p>The draft site allocation is for comprehensive employment-led redevelopment. Co-location of compatible commercial, residential and complementary main town centre uses. We consider there should be greater flexibility in the site allocation to reflect the suitability of other uses on the site, including PBSA.</p> <p>Draft Policy HO8 sets out that development proposals for PBSA must be appropriately located. The Trundley’s Road site represents an appropriate location for PBSA as follows:</p> <ul style="list-style-type: none"> • The site has a current PTAL rating of 2 but this is expected to improve to PTAL 3 upon completion of the New Bermondsey Station, situated along Surrey Canal Road which is 400m north-west of the Site. At present, the nearest rail stations are at New Cross and New Cross Gate, located approximately 1.2km south of the Site. These provide access to London Overground and National Rail services. Deptford and South Bermondsey stations are also located approximately 1.5km of the Site (east and west respectively) providing further access to National Rail services. The nearest bus stop which provides access to Route 225 are located adjacent to the Site on Trundley’s Road; ▪ There are good walking, cycling and public transport links to nearby town and district centres which provide a good range of local services and amenities – as shown below: <p><i>LB Lewisham officer note: Table 1 and Figure 1: Proximity of the site to nearby town and district centres are included in the original representation. The table and figure show the location of, and details about, the centres at Lewisham, Deptford, New Cross and New Cross Gate.</i></p> <ul style="list-style-type: none"> ▪ The site is situated in a location where a number of committed developments are coming forward which include a significant amount of non-residential floorspace at ground floor. Therefore, in the emerging context the site will be in a location that benefits from good provisions of shops, services, leisure and community facilities appropriate to the student population – as shown below: <p><i>LB Lewisham officer note: Table 2: Committed developments in the vicinity of the site is included in the original representation. The table lists details about Timberyard Deptford Landings, Anthology Deptford Foundry, Convoys Wharf and Grinstead Road.</i></p> <ul style="list-style-type: none"> ▪ The provision of PBSA would not lead to an overconcentration in this location and would help create mixed and balanced communities when provided as part of a mixed-use development; and 	<p>The supplementary information is noted. Responses to other comments supporting this representation set out elsewhere in the Consultation Statement.</p> <p>Where a Local Plan site allocation makes provision for housing/residential uses, it does not normally specify the nature of this use. This will be established through the planning approvals process. Exceptions are made, for instance, with gypsy and traveller accommodation.</p>	<p>Surrey Canal Road and Trundleys Road site allocation updated to reflect the planning consented granted for the site.</p>

			<p>▪ The site is located in proximity to a number of Higher Education Institutions both within and outside the borough, including:</p> <p><u>Higher Education Providers within a 1 mile radius of the site (15 minutes or less travel time by public transport):</u></p> <ul style="list-style-type: none"> ○ Goldsmiths College, University of London; and ○ Coventry University International Study Centre. <p><u>Higher Education Providers within a 2.5 mile radius of the Site (40 minutes or less travel time by public transport):</u></p> <ul style="list-style-type: none"> ○ The University of Greenwich (main campus); ○ Ravensbourne University London (main campus); ○ Trinity Laban Conservatoire of Music and Dance (main campus); ○ Kings College London (Guy’s campus and Denmark Hill campus); ○ University of Sunderland (London campus); ○ University of Gloucestershire (London campus); ○ University of Cumbria (East India Dock Road campus); and ○ Queen Mary University of London (Whitechapel campus). <p>In line with the above, the site has been identified by the University of London as a good location for student accommodation to serve Goldsmiths College, which has resulted in the planning application for student accommodation on the site.</p> <p>Moreover, the provision of PBSA on the site would free-up conventional housing stock for local people whilst contributing towards London-wide targets for PBSA bedspaces and overall housing need in the borough. There is an unmet demand for student accommodation and this is expected to increase due to COVID-19 and therefore the provision of PBSA will become more important in order to protect the existing conventional housing stock in the borough for family accommodation. We therefore consider the draft site allocation should be amended to include PBSA as an acceptable use on the site.</p>		
Fifth State and (Avison Young obo)	2	HO 08	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy HO8 – Purpose built student accommodation</p> <p>The NPPF Paragraph 11 requires that: a) plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change; and b) that strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses. NPPF Paragraph 61 goes on to state that <i>‘the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including [...] students).’</i></p> <p>London Plan Policy H15 considers purpose-built student accommodation (PBSA) and requires Boroughs to ensure that local and strategic need for PBSA is addressed. The overall strategic requirement for PBSA in London is for 3,500 bed spaces to be provided annually over the plan period. Borough level targets for PBSA bed spaces are not provided as it is acknowledged that the location of need</p>	Noted. The approaches in the draft Local Plan regarding PBSA are considered to be justified. The Lewisham SHMA points to the significant amount of PBSA recently delivered in the Borough including the proliferation of off-campus accommodation. Some 1,686 units were delivered and consented from 2016 to 2021, or an average of 337 per year. Additional	Local Plan supporting text amended to cross-reference London Plan policy H15 and details around Fast Track and Viability Tested routes for student housing.

		<p>will vary over the plan period in line with higher education institution growth and expansion plans, together with the availability of appropriate sites.</p> <p>The Draft Local Plan is underpinned by the Lewisham Strategic Housing Market Assessment (2019) which considers the need for different types of accommodation and affordable housing needs drawing on demographic data and information provided from LBL and stakeholder consultation.</p> <p>The main finding in respect of student housing is that <i>‘there is a significant student population in Lewisham that is partly housed in the private rented sector. The future housing requirements for this group is uncertain due to global economic issues and Brexit. Whilst pressure on the private rented sector from students has been mitigated by purpose built student housing, the sector will continue to be subject to extreme levels of demand from students unable to afford purpose built housing and the growing trend of non-student households being able to afford home ownership and being ineligible for social housing.’</i> The recommendation goes on to state that 35% of student housing should be provided as affordable units to help meet the needs of students.</p> <p>Whilst the SHMA provides an overview of student accommodation provided at Goldsmiths University and the University of Greenwich, no conclusion is drawn on the need for the delivery of PBSA in Lewisham. The SHMA acknowledges that there will continue to be pressure on the private rented sector to accommodate students, but does not identify how much PBSA is needed to address future need and demand. As such we question whether the NPPF requirement to objectively assess need for student housing has been adequately fulfilled by this assessment. As such, we would recommend transparency around student housing need is provided within the Draft Local Plan.</p> <p>Notwithstanding concerns regarding the evidence base, draft Policy HO8 provides a supportive basis for assessing development proposals for PBSA. The policy wording broadly reflects London Plan Policy H15 requirements for PBSA, which Fifth State endorses.</p> <p>Supporting paragraph 7.7 recognises that Lewisham is home to a number of further and higher education providers, particularly in north Lewisham which is home to Goldsmiths College, Trinity Laban Conservatory of Music and Dance and Lewisham College, as well as the nearby Greenwich University. As such it is considered that applications for PBSA coming forward in the north of the borough will be able to satisfactorily demonstrate that they will help to meet an identified strategic need for student accommodation (meeting policy requirement HO8 Part A(a)).</p> <p>Fifth State acknowledge that the Borough’s main strategic requirement is for genuinely affordable, conventional housing, and that PBSA will be counted as delivering homes against the Borough’s strategic housing target and will be counted on a 2.5:1 basis (i.e. two and half PBSA bedrooms to one unit of conventional housing).</p> <p>In respect of affordable student housing, Fifth State note that the London Plan policy (now H15) will be applied, which requires 35% affordable student</p>	<p>student bedspaces have been consented since then. The London Plan sets out an overall target for London of 3,500 PBSA units per annum across all boroughs. In this context, Lewisham is making a significant contribution to meeting London’s needs for PBSA. A carefully managed approach to additional capacity is therefore required. Development proposals must clearly demonstrate that the provision will not lead to a harmful overconcentration of PBSA. It is also critical that they do not compromise or suppress the delivery of conventional housing, for which need in Lewisham is greatest. The London Plan makes clear that meeting the requirement for PBSA should not undermine policy to secure mixed and inclusive neighbourhoods.</p>	
--	--	---	---	--

			<p>accommodation in order to meet the Fast Track Route. Where this affordable target is not met, applications must follow the Viability Tested Route. However, paragraph 7.80 of the draft Local Plan states that <i>'at least 35% of PBSA should be secured as affordable housing'</i> but does not provide any further guidance on circumstances where 35% affordable student accommodation is not proposed. We request that this sentence is amended to read: <i>'London Plan Policy H15 provides that at least 35% of PBSA should be secured as affordable housing in order to follow the Fast Track Route (whereby no financial viability assessment is required to be submitted with the application). Should the proposals not meet the threshold of 35% affordable housing, applications must follow the viability tested route.'</i></p>		
QUOD (Landsec obo - Lewisham Shopping Centre)	2	HO 08	<p>Student Accommodation</p> <p>10.17Landsec supports the inclusion of a specific policy (draft Policy HO8 'Purpose Built Student Accommodation') for purpose-built student accommodation.</p> <p>10.18Landsec does not support the need for priority to be given to sites located in proximity to the education institution(s) (draft Policy H08 B (c) (ii)). Whilst accessibility is an important test for student accommodation, this should not simply be measured by proximity – regard should also be had to other factors such as transport connections. The policy should be aligned with the London Plan which states <i>"Boroughs, student accommodation providers and higher education providers are encouraged to develop student accommodation in locations well-connected to local services by walking, cycling and public transport, as part of mixed-use regeneration and redevelopment schemes"</i> (Policy H15 'Purpose-built student accommodation'). Landsec proposes that draft Policy H08 paragraph B (c) (ii) be removed.</p> <p>10.19Landsec supports the definition of affordable student accommodation being aligned to the London Plan at draft Policy H08 A (c). It is however proposed that the ability for a student led scheme to be 'Fast Track' is included in the main policy text. The London Plan (Policy H15) states <i>"to follow the Fast-Track Route, at least 35 per cent of the accommodation must be secured as affordable student accommodation or 50 per cent where the development is on public land or industrial land"</i>. Landsec proposes an amendment to draft Policy H08 A (c) as follows: <i>"A (c) Make provision for affordable student accommodation, including the ability to follow the Fast-Track route, in line with draft London Plan Policy H15 H17 (Purpose-built student accommodation)."</i></p>	Disagree that sites in proximity to educational institutions should not be prioritised. No need to replicate policy from the London Plan regarding the fastrack route.	Local plan amended to make reference to maximum level of accommodation secured as affordable student accommodation.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	HO 09	<p>Large-Scale Purpose-Built Shared Accommodation</p> <p>10.15Landsec supports the requirement in Policy H09 'Housing with shared facilities (Houses in Multiple Occupation)' that large scaled shared living accommodation development should only be permitted where it can be suitably demonstrated that there is a local need. Landsec notes that housing need should be assessed on a borough wide level and not just on a more local level. It is also noted that demand and not just need for this type of housing should be given material consideration. Landsec also proposes that the negative policy wording (Part D) to resist developments of this type should be removed. This is to align to Policy H9 'Ensuring the best use of stock' / Policy H16 'Large-scale purpose-built</p>	Noted.	Local plan amended by removing negative policy wording and referring to local market demand.

			<p>shared living’ of the London Plan which seeks to ensure the best use of stock, expects boroughs to take into account the role of HMOs / shared living accommodation in meeting local and strategic needs and to promote the role of this type of housing in reducing pressure on other elements of the housing stock.</p> <p>10.16Landsec proposes to amend Policy H09 D as follows: <i>“Large-scale purpose-built shared living accommodation in the Sui Generis Use Class will generally be resisted as this type of use compromises opportunities to deliver conventional housing in the Borough. Development proposals will only be permitted where it is suitably demonstrated that:</i> <i>(a) They meet an identified local need or demand for the type of housing proposed...”</i></p>		
(Avison Young obo)	2	Chapter 7	<p>Chapter 7 confirms the approach to housing growth within Lewisham over the Plan period. Policy HO1 states “Development proposals must make the best use of land and optimise the capacity of housing sites in order to ensure: <i>a. The draft London Plan minimum ten-year target of 16,670 net housing completions over the period 2020 to 2030 (or 1,667 net completions per year) is met and exceeded; and</i> <i>b. That delivery against Lewisham’s Local Housing Need figures is maximised.”</i></p> <p>Paragraph 7.5 confirms the Draft Plan was prepared at a time when confirmation over the approach to calculating housing need for the London Borough’s had not been confirmed by the London Mayor and consequently the London Plan. Lewisham have therefore calculated local housing need in line with the NPPF’s standard methodology (set out in the Strategic Housing Market Assessment).</p> <p>Paragraph 5.27-5.31 of the Strategic Housing Market Assessment 2019 provides a summary of the local housing need calculations underpinning the Local Plan. Paragraph 5.30 confirms that due to the substantial need identified as a result of applying the NPPF’s standard methodology a cap based on current housing targets is introduced. This is applied to the housing need target based on the 2016 adopted local plan (1,939 dwellings per annum) and the 2017 draft London Plan (2,964 dwellings per annum).</p> <p>Paragraph 7.8 of the Draft Local Plan confirms that one of the aims of this Regulation 18 consultation is to better understand whether there are any additional sites that could feasibly be delivered within the Plan period and whether the strategic sites (site allocations) include in Part 3 of the Local Plan are deliverable and developable, particularly according to the indicative capacities of and timeframes set out.</p>	Following the Regulation 18 consultation, and the adoption of the London Plan, the SHMA has been updated. It recognises that the London Plan is responsible for establishing London wide need and disaggregating this to London Boroughs. Therefore the current position for Lewisham is a minimum housing need figure of 1,667 p.a., based on the adopted London Plan.	Local Plan amended in line with the findings of the updated SHMA.
QUOD (Landsec obo - Lewisham Shopping Centre)	-	New policy Build to Rent	<p>Build to Rent</p> <p>10.20Landsec notes that there is no specific policy for Build to Rent. The importance and popularity of Build to Rent has grown significantly over recent years with London Plan (Policy H11 ‘Build to Rent’) stating that <i>“Boroughs should take a positive approach to the Build to Rent Sector”</i>. The London Plan identifies that Build to Rent developments can make a positive contribution to increasing housing supply by attracting inwards investment, accelerating delivery, and ensuring investment / placemaking through single ownership. The Build to Rent sector also provides better management standards and better-quality homes than much of the mainstream private rented sector.</p>	Comments are noted.	Local Plan Policy HO1 amended to reference Build to Rent.

			<p>10.21 It is also important for the Reg 18 Plan to include some recognition of the fact that Build to Rent operates a different model to Build to Sale. Build to Rent relies on income through rent over a number of years, rather than an upfront return on sales. Because of this, in some circumstances Build to Rent may not be able to compete for land on an equal footing with speculative Build for Sale, as it may generate lower initial land values (London Plan Para.4.11.2).</p> <p>10.22 The viability constraints of Build to Rent are clearly defined in the draft Local Plan Viability Assessment (BNPP, 2019) which states <i>“that the viability of build to rent schemes is challenging”</i>. The viability testing shows that in a significant number of cases, Build to Rent schemes are unable to provide any affordable housing.</p> <p>10.23 The site has been tested as part of this assessment and shows a maximum provision of between 0% and 10% affordable housing. The BNPP report states that viability testing excludes all ‘exceptional costs’ i.e. abnormal costs that are over and above standard build costs. It can therefore be assumed that the viability testing overstates the viable quantum of affordable housing that can be delivered on the site.</p> <p>10.24 Landsec proposes that a specific policy for Build to Rent be included in the Reg 18 Plan, aligned to Policy H11 in the London Plan. The key inclusions are as follows: - Affordable housing offer can be solely Discounted Market Rent (DMR). - The homes are held as Build to Rent under a covenant for at least 15 years. - To follow the Fast-Track Route, Build to Rent schemes must deliver 35% affordable housing with 30% of DMR homes to be provided at London Living Rent levels and 70% as a range of genuinely affordable rents.</p>		
SEGRO (CBRE Limited obo)	-	Employment Land Study	<p><i>Relates to Part 3, LNA SA 04</i></p> <p>5. Deptford Trading Estate</p> <p>As there is a positive policy context for intensification on existing industrial sites, we are surprised the Lewisham Employment Land Study provides a Site Assessment for the Blackhorse Road SIL, which includes Deptford Trading Estate, as “this cannot be expanded”. It is not clear whether this refers to the boundaries of the SIL or its capacity for intensification. If the latter, we note that the exercise undertaken to come to this conclusion is clearly a very high level one and is not qualified by any feasibility testing or environmental assessment. Although SEGRO are not actively promoting intensification of the site at this time, based on our significant development experience in London, we suspect this will be feasible subject to detailed matters including highways and design.</p> <p>Whilst this evidence does not form part of the development plan and will not form the basis of any decision making, we thought it prudent to highlight this point in our representations.</p>	Noted. The Employment Land Study considered whether there was scope for expansion of selected employment land sites, taking into account surrounding land uses.	No change.
Tetra Tech Planning (John Lyon’s Charity obo)	2	Chapter 08	The “Economy” policies should also remove reference to the revoked Use Classes within A and B and make reference to the new Use Class E where appropriate.	Noted. The Local Plan will be amended to reflect and respond to these changes.	Local Plan Part 2 Economy and Culture section amended throughout to reflect and in response to changes to the Use

					Classes Order, including the new Class E.
Fifth State and (Avison Young obo)	2	EC 01	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy EC1 – A thriving and inclusive local economy</p> <p>Support and promotion of cultural and creative industries in the borough and the creation of the Lewisham North Creative Enterprise Zone (CEZ) covering the Lower Creekside area is strongly supported by Fifth State.</p>	Support noted.	No change.
Cockpit Arts (The Planning Lab obo)	2	EC 01	<p><i>Relates to Part 3, LNA SA 14</i></p> <ul style="list-style-type: none"> • CA broadly endorses this policy and the link to Policy EC1 which specifically protects existing cultural venues and uses. • CA is generally supportive of policy that recognises and supports development that strengthens the local economic base. • We strongly support policy that requires provision of genuinely affordable workspaces for creative industries, independent makers, etc. We encourage LB Lewisham to consider the need to retain specific maker space (i.e. dirty/messy/noisy light industrial creative space) which has different requirements from digitally-driven creative businesses. • CA is supportive of the creation of Lewisham North Creative Enterprise Zone (see also response to LNA3) and policies that seek to protect and enhance creative industries in the borough. 	Support noted.	No change.
Artworks Creekside (Avison Young obo)	2	EC 01	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy EC1 – A thriving and inclusive local economy</p> <p>Support and promotion of cultural and creative industries in the borough and the creation of the Lewisham North Creative Enterprise Zone (CEZ) covering the Lower Creekside area is strongly supported by Artworks Creekside.</p>	Support noted.	No change.
The Renewal Group (Carney Sweeney obo)	2	EC 01	<p><i>Relates to Part 3, LNA SA 08</i></p> <p>Policy EC1 A Thriving and Inclusive Local Economy</p> <p>We note that Part B(a) of this policy protects existing cultural venues and uses. It is important that such venues are only protected where they are viable and where this is a reasonable approach, having regard to other objectives. It is also important that meanwhile cultural venues and uses are not protected so as to prevent wider and final development proposals coming forward. It is important that the policy is adjusted to provide clarity on the matters raised above.</p>	Noted. The Local Plan will be amended to reflect the importance of viability as key consideration for protection of cultural venues.	Local Plan amended to provide further clarification on protection of cultural venues and development proposals involving their loss, with viability of the venue a key consideration.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	EC 01	<p>11.1 Chapter 8 of the Reg 18 Plan contains key policies on the Economy and Culture focusing on protecting and revitalising industrial areas; making town centres more vibrant places and securing high quality affordable workspace.</p> <p>A thriving and inclusive local economy</p> <p>11.2 Landsec welcome and support Lewisham’s intention in draft policy EC1 ‘A thriving and inclusive local economy’ to ensure access to high quality education, training and job opportunities and help facilitate the continued growth and development of local cultural, creative and digital industries. This aligns with Landsec’s key priorities.</p> <p>11.3 The Reg 18 Plan acknowledges the <i>“pressing need to reduce inequality and the negative consequences of deprivation in the Borough, and to ensure equality of opportunity, especially for those living in the Borough’s most deprived areas”</i> (Para 2.18). The plan includes various references to ensuring equality of</p>		

			opportunity through new development. Landsec welcome this and would seek to work with Lewisham to ensure this is the case.		
Notting Hill Genesis (Savills obo)	2	EC 02	Lewisham Local Plan Regulation 18 Stage Main Issues And Preferred Approaches Document –representations	Noted. Responses to additional representations set out elsewhere in the Consultation Statement.	No change.
	2	Table 8.1	The draft Local Plan proposes that the site be subject to the following emerging planning policy designation: Forms part of a Locally Significant Industrial Estate (LSIS).		
	2	Figure 18.2	We note the draft Local Plan references or illustrates the site and the wider Malham Industrial Estate in: Figure 3.9 (Borough-wide Spatial Strategy Plan); Table 8.1 (Lewisham’s Employment Land Hierarchy) – LSIS; Figure 8.1 (Employment Land Hierarchy); Figure 18.2 (West Area Key Diagram); and Schedule 4 (Designated employment land).		
Tribe Student Housing (Avison Young obo)	2	EC 02	<i>Relates to Part 3, LNA SA 06</i>	Noted. It is acknowledged that changes to the Local Plan are required for conformity with the London Plan. Specifically, to reflect that SIL sites are not suitable for co-location. Sites released from SIL through the plan-led process will be re-designated as LSIS, reflecting the draft Local Plan approach that such sites are important employment sites and development should ensure there is no net loss of industrial capacity.	Local Plan amended to reflect that SIL sites are not suitable for co-location. Sites released from SIL through the plan-led process will be re-designated as LSIS.
	2	Table 8.1	Draft Policy EC2 sets out the approach to the protection of employment sites and delivery of new workspace. Part D confirms that proposals for the co-location of employment and other compatible uses will only be supported at selected SIL sites, and where it can be suitably demonstrated that the requirements of draft London Plan policies E5 and E7 and other relevant Local Plan policies, are satisfied. This includes the Trundley’s Road site currently within the Surrey Canal Road SIL, which is proposed to be de-designated from SIL (as discussed further below). On the basis that the Trundley’s Road site is to be de-designated from SIL, Policy EC2 should clarify that the Trundley’s Road site no longer forms part of the Surrey Canal Road SIL. For clarity, an additional row could be included in Table 8.1 specifically for such ‘co-location sites’.		
Trundley’s Road Ltd (Avison Young obo)	2	EC 02	<i>Relates to Part 3, LNA SA 06</i>	Noted. It is acknowledged that changes to the Local Plan are required for conformity with the London Plan. Specifically, to reflect that SIL sites are not suitable for co-location. Sites released from SIL through the plan-led process will be re-designated as LSIS, reflecting the draft Local Plan approach that such sites are important employment sites and development should ensure there is no net loss of industrial capacity.	Local Plan amended to reflect that SIL sites are not suitable for co-location. Sites released from SIL through the plan-led process will be re-designated as LSIS.
	2	Table 8.1	Draft Policy EC2 sets out the approach to the protection of employment sites and delivery of new workspace. Part D confirms that proposals for the co-location of employment and other compatible uses will only be supported at selected SIL sites, and where it can be suitably demonstrated that the requirements of draft London Plan policies E5 and E7 and other relevant Local Plan policies, are satisfied. This includes the Trundley’s Road site currently within the Surrey Canal Road SIL, which is proposed to be de-designated from SIL (as discussed further below). On the basis that the Trundley’s Road site is to be de-designated from SIL, Policy EC2 should clarify that the Trundley’s Road site no longer forms part of the Surrey Canal Road SIL. For clarity, an additional row could be included in Table 8.1 specifically for such ‘co-location sites’.		

Fifth State and (Avison Young obo)	2	EC 02	<p><i>Relates to Part 3, LNA SA 16</i> Draft Policy EC2 – Protecting employment sites and delivering new workspace</p> <p>Draft Policy EC2 seeks to safeguard land for commercial and industrial uses through retaining employment capacity within Strategic Industrial Locations (SIL) and Locally Significant Industrial Sites (LSIS). We note that Lower Creekside is identified as a LSIS which are identified in Table 8.1 as providing for the borough’s ‘main local concentrations of commercial and industrial uses, which perform a niche role to support the functioning of the sub-regional and local economy. They provide workspace for micro, small and medium sized businesses, including the cultural, creative and digital industries. Protected for commercial and industrial uses, with priority given to Class B1 commercial and light industrial uses.’</p> <p>Whilst forecast need has been identified for 21,800 sqm of net additional employment floorspace, it is noted that this refers to previous Use Class B1. This has since been replaced by Use Class E(g) (Use Classes Order 1987 as amended in September 2020). <u>Draft Policy EC2 and the supporting text should be updated to reflect the latest use classes.</u></p>	Noted. The Local Plan will be amended to reflect and respond to these changes.	Local Plan Part 2 Economy and Culture section amended throughout to reflect and in response to changes to the Use Classes Order, including the new Class E.
Fifth State and (Avison Young obo)	2	EC 02	<p><i>Relates to Part 3, LNA SA 16</i> Part B(a) of draft Policy EC2 states that within SIL and LSIS locations industrial capacity should be retained ‘ensuring no net loss of floorspace and operational yard space along with intensifying employment development, including by facilitating the co-location of employment and other compatible uses through the plan-led process’. The supporting explanatory text advises that safeguarding of employment land includes ‘floorspace, yard space for operations and servicing space’.</p> <p>Whilst the Owners and Developer of 5-9 Creekside support the principle of intensifying employment development and the ability to co-locate employment uses alongside other uses, they do not agree with an approach which seeks to protect yard space. London Plan Policy E7 supports efficient use of employment land to create additional industrial capacity, whilst having regard to operational requirements (including servicing). Figure 6.2 of the London Plan illustrates how existing industrial sites with large areas of yard space can be intensified through appropriate development.</p> <p><u>It is requested that the no net loss principle in draft Policy EC2 Part B(a) for floorspace and operational yard space is removed. This reflects the removal of the ‘no net loss’ approach from the draft London Plan E7, which has now been removed in the adopted version of the London Plan, which has been replaced for a requirement for intensification to provide additional capacity.</u></p> <p><u>The provision of ‘additional capacity’ could relate to the provision of replacement or additional floorspace or indeed an increase in the number or jobs or improvements to the quality of the workspace proposed.</u></p> <p><u>In respect of yard space, retention of existing yard space should not be sought as the delivery of necessary yard space and adequate servicing arrangements should be considered as part of the development proposals, depending on the type of employment space proposed (in line with draft</u></p>	<p>Noted. The London Plan provides that Local Plans can include provisions to retain SIL, LSIS and other industrial sites / capacity, taking into account local evidence. The Employment Land Study makes clear that Lewisham has experienced a significant loss of capacity and recommends that remaining capacity be retained. The no net loss principle is therefore considered to be justified and in conformity with the London Plan.</p> <p>However it is acknowledged that the draft Local Plan definition of industrial capacity should be amended for conformity with the London Plan.</p>	Local Plan amended to provide new definition of industrial capacity and removal of 65% plot ratio.

			<p><u>Policy EC3). The requirement for operational yard space varies between typology, use class and operator and to protect all operational yard space is overly restrictive and does not allow successful intensification of designated employment sites and also limits opportunities for co-location.</u></p> <p>It is noted that the explanatory text to Policy EC3 refers to the no net loss principle and a 65% plot ratio benchmark for assessing industrial capacity. Again <u>the reference to the 65% plot ratio has been removed from the adopted version of the London Plan (following direction from the Secretary of State) and so these references should also be omitted from the draft Local Plan as they are not in conformity with the adopted policy position.</u></p>		
The Arch Company Properties LP (Turley obo)	- 2 2	General EC 02 Table 8.1	<p>THE LEWISHAM DRAFT LOCAL PLAN (REGULATION 18, JANUARY 2021) & PROPOSED CHANGES TO THE ADOPTED POLICIES MAP (DECEMBER 2020) WRITTEN REPRESENTATIONS ON BEHALF OF THE ARCH COMPANY PROPERTIES LP</p> <p>We write on behalf of The Arch Company Properties LP (“The Arch Company”) with respect to the Public Consultation on the emerging Lewisham ‘Pre-Publication’ Draft Local Plan (Regulation 18, January 2021) [hereafter: “Draft Local Plan”] and Proposed Changes to the adopted Policies Map (December 2020), specifically with regard to the proposed addition of the Bermondsey Dive Under area to the Surrey Canal Road Strategic Industrial Location (“SIL”).</p>	Noted. Responses to additional representations set out elsewhere in this Consultation Statement.	No change.
The Arch Company Properties LP (Turley obo)	- 2 2	General EC 02 Table 8.1	<p><i>The Arch Company & LB Lewisham Portfolio</i></p> <p>It is considered that it will be helpful to provide some background information on The Arch Company nationally and their portfolio within the borough. The Arch Company acquired Network Rail’s former commercial estate business in 2019. It is the landlord for more than 4,000 businesses across England and Wales, making it the UK’s largest small business landlord, working with thousands of business owners, from car mechanics to bakeries and restaurants, who make a unique and vital contribution to the UK economy.</p> <p>In regard to the potential implications of the emerging Draft Local Plan it is of importance to identify that The Arch Company has substantial land holdings within the borough, specifically in the Bermondsey Dive Under area and the land proposed to be designated as an addition to the Surrey Canal Road SIL in order to release other parts of this designation for redevelopment, namely sites at Evelyn Court, Trundleys Road and the Apollo Business Centre. Being the majority land owner in this area and taking account of the full scale of The Arch Company’s portfolio in the borough (totalling approx. 760,000 sq ft of business and employment space/land including, but not limited to, hundreds of railway arches), the potential implications of the Draft Local Plan are of significant importance.</p> <p><i>LB Lewisham officer note: Annex 1: The Arch Company’s landholdings in and around Bermondsey Dive Under and the wider borough is included in the original representation. The map shows the sites along the railway line.</i></p> <p>The Arch Company’s portfolio includes a large number of railway arches and associated land located to the south of Silwood Street within the Bermondsey Dive Under area. The railways arches and land in question have a lawful use of Classes E(g), B2 and B8 and, for the avoidance of doubt, for the planned leasing</p>	Noted. Responses to additional representations set out elsewhere in this Consultation Statement.	No change.

			<p>of this land our client will shortly be confirming this position via a Certificate of Lawfulness submission.</p> <p>As such, our client has a strong interest in ensuring that the Draft Local Plan creates a strong, flexible and ambitious, but at the same time realistic planning framework in order to facilitate the sustainable growth the borough requires.</p>		
The Arch Company Properties LP (Turley obo)	- 2 2	General EC 02 Table 8.1	<p>Purpose of London’s Strategic Industrial Locations and their typical requirements/attributes</p> <p>For the avoidance of doubt, there are approximately 7,000 hectares of industrial land in London, of which approx. 50 per cent are designated as SIL1. Paragraph 6.5.1 of the London Plan describes SILs as “<i>the capital’s main reservoir of land for industrial, logistics and related uses</i>” which are therefore given strategic protection because they are critical to the operation of the capital’s economy.</p> <p>Policy E4(A) of the London Plan seeks to ensure “[a] sufficient supply of land and premises in different parts of London to meet current and future demands for industrial and related functions should be provided and maintained, taking into account strategic and local employment land reviews, industrial land audits and the potential for intensification, co-location and substitution”. Policy E5 further sets out the purpose and preferred uses for SILs (as specified in Policies E4(A) and E5(C) and listed below) as well as its overall purpose which is “to sustain [SILs] as London’s largest concentrations of industrial, logistics and related capacity for uses that support the functioning of London’s economy”.</p> <p>The London Plan also identifies other characteristics which are typical to SILs, in terms of the types of uses and locations summarised in Table 1 below.</p> <p><i>LB Lewisham officer note: Table 1: Typical Characteristics and Requirements for SIL Designations is included in the original representation. The table provides extracts from the London Plan relating to Types of Uses, Location and Logistics Function.</i></p> <p>Relevance for the Draft Local Plan & Recommendation/Suggested Amendments</p> <p>As set out above, the primary purpose of SILs, according to the London Plan, is to ‘support the functioning of London’s economy’ and its role and function can be summarised in the following way:</p> <ul style="list-style-type: none"> • Make provision for “<i>industrial-type activities</i>” which includes Use Classes B1b/c (or Class E(g)(ii)/(iii)), B2, B8, waste management, utilities, transport, markets, low-cost industrial and related space for micro, small and medium-sized enterprises and R&D uses; • Activities which “<i>can raise tensions with other land uses, particularly residential development</i>”; and • Support sustainable movement of goods through being located “<i>close to the strategic road network and many are also well-located with respect to rail, river, canals and safeguarded wharves</i>”. 	Noted. Responses to additional representations set out elsewhere in this Consultation Statement.	No change.
The Arch Company Properties LP (Turley obo)	- 2 2	General EC 02 Table 8.1	<p>It is further considered that the vision and policies contained in the Draft Local Plan have the potential to meet the Council’s ambitions of delivering good, sustainable growth in the borough during the plan period. Our client and we are more than happy to engage in positive and pro-active discussions with LB Lewisham if this is considered to assist the Council in preparing a sound and</p>	Noted. Responses to additional representations set out elsewhere in this Consultation Statement.	No change.

			<p>deliverable new Local Plan, and to bring forward new development across their portfolio over the coming years.</p> <p>Please do not hesitate to contact Turley should you require any further information or wish to discuss these representations.</p>		
The Arch Company Properties LP (Turley obo)	2 2 -	EC 02 Table 8.1 Proposed Changes to the adopted Policies Map para 5.5	<p>Draft Policy EC2 (Protecting employment sites and delivering new workspace), Table 8.1 & Proposed Changes to the adopted Policies Map (December 2020)</p> <p>Chapter 8 of the Draft Local Plan sets out the Council’s ambition for a thriving economy and the protection and/or potential of employment and industrial land. To this extent, it is noted that the Council proposes the release of three individual sites (Evelyn Court, Trundleys Road and the Apollo Business Centre) from the overarching Surrey Canal Road SIL for redevelopment to provide a mix or <i>co-location</i> of uses including employment and/or residential. Given the protection of SIL and requirements contained in the London Plan (i.e. Policy E4) for its release and/or substitution, the emerging Local Plan and associated proposed changes to the adopted Policies Map seek to increase the boundary of the SIL to the north-west to include the Bermondsey Dive Under area (see Figure 1) which includes one of our client’s most significant land holdings (i.e. the land to the south of Silwood Street) in the borough (as set out in Figure 2 and Annex 1).</p> <p><i>LB Lewisham officer note: Figure 1: Existing vs. Proposed SIL Boundary is included in the original representation. The maps shows the Bermondsey Dive Under area circled in blue.</i></p> <p><i>LB Lewisham officer note: Figure 2: The Arch Company’s land holdings to the south of Silwood Street is included in the original representation. The map shows an extract from an OS Map.</i></p> <p>It is important to note that The Arch Company is fully aware of (1) the South Bermondsey Dive Under Masterplan (2019) prepared by Lyndon Goode Architects on behalf of Network Rail, LB Southwark and LB Lewisham which represents one of many possible redevelopment scenarios for the area as well as (2) the recently approved mixed use redevelopment of the <i>Land at Silwood Street</i> comprising four blocks with building heights of five to nine storeys providing flexible light industrial/office/retail/cafe/community floorspace (Use Classes B1a/B1c/A1/A3/D1) at ground/first floor levels and 61 residential units on the upper floors (LPA ref. DC/20/116783). This site sits directly adjacent to our client’s land holding and shares a boundary with the main access road to a number of railway arches and the proposed SIL designation (with access to land component running past the frontage of the site).</p> <p>For the avoidance of doubt, our client wishes to clarify that it considers that its land holding at Bermondsey Dive Under, including the railway arches and all associated yard space, can continue to play an important role in providing employment-generating uses in this part of the borough. However, it is not considered that a simple extension of the SIL boundary is <i>justified</i> in this instance (or in accordance with Paragraph 35 of the NPPF) and will therefore not secure the optimum future use of the area.</p>	<p>Disagree. To be compliant with the London Plan, co-location at Evelyn Court, Trundleys Road and the Apollo Business Centre requires that these sites are released from SIL and that compensatory SIL is designated elsewhere. The Bermondsey Dive Under Site has been identified as the only suitable compensatory SIL site in proximity to the Surrey Canal SIL. To recognise the constraints associated with this site, the site allocation has a dual designation, with the majority of the land designated as SIL but the Railway Arches part of the site designated as LSIS. It also limits the types of industrial uses suitable for the site and recognises that residential properties will be built at the adjacent Silwood Street site allocation.</p>	<p>Bermondsey Dive Under site allocation added to the Plan, with a dual designation of SIL and LSIS.</p>

			<p>In fact, neither the <i>Lewisham Local Economic Assessment (December 2018)</i> nor the subsequent <i>Lewisham Employment Land Study (March 2019)</i>, both prepared by CAG Consultants, (or the 2019 Masterplan referred to above) assessed the Bermondsey Dive Under area in relation to its suitability as a potential replacement SIL or considered alternative sites for this purpose. It is therefore neither clear nor justified on what basis this site has been selected to be designated as SIL with relevant changes to the Policies Map and/or as specified in Table 8.1 of the Draft Local Plan therefore considered unsound.</p> <p>The Council's intention to 'substitute' land released from the SIL for alternative uses by including other land within this designation (i.e. in order to ensure that area-wise there is no net loss) is acknowledged. However, it is not considered that the Bermondsey Dive Under area is a suitable SIL replacement site.</p>		
The Arch Company Properties LP (Turley obo)	2 2 -	EC 02 Table 8.1 Proposed Changes to the adopted Policies Map para 5.5	<p>As such, the Council needs to be fully aware that any such designation means that it should make provision for the varied operational requirements of any of the above uses within the area including the railway arches adjacent to the approved mixed use residential development on Silwood Street (LPA ref. DC/20/116783) and its main access road running to the rear of the approved residential uses.</p> <p>At this stage, the evidence base published by the LPA is not considered to be sufficient and/or sound in order to justify the designation of the area as 'new' SIL (also see London Plan Policy E5(B)). It is also seen as problematic to grant planning permission for a residential-led development prior to designating the adjacent land as SIL, as proposals "<i>adjacent to SIL should not compromise the integrity or effectiveness of these locations in accommodating industrial-type activities and their ability to operate on a 24-hour basis</i>" (Policy E5(d)).</p> <p>Reiterating what has been set out above, our client considers that their land holding is well-suited to provide a continued (and lawful) range of employment uses (including 'softer' non-SIL uses within the outward facing railway arches which can co-exist with surrounding and emerging residential uses), however, from a planning policy perspective this site should continue to be treated as a Non-Designated Industrial Site or, if robustly justified, as LSIS, as its setting, constraints and surroundings are not deemed suitable to support and/or justify a SIL designation. This will be reflective of the current lawful uses on the site and adjacency to residential properties.</p> <p>It is therefore strongly recommended to amend the Draft Local Plan accordingly (i.e. Table 8.1 and the Proposed Changes to the adopted Policies Map) in order to ensure that it is robustly prepared, justified and sound in relation to this matter – and can therefore be fully supported by our client forming a strong framework for future development in the Bermondsey Dive Under area.</p>	Comments are noted. Our response is set out above.	No change.
The Arch Company Properties LP (Turley obo)	- 2 2	General EC 02 Table 8.1	<p>Conclusion</p> <p>Overall, and as set out above, The Arch Company is supportive of the general direction of the Draft Local Plan and relevant emerging policies contained within it, but strongly disagrees with the addition of their land holding at Bermondsey Dive Under to the Surrey Canal Road SIL and considers that this designation is unjustified and will undermine future development opportunities within the area and/or negatively impact upon surrounding residential uses. Through the granting of planning permission ref. DC/20/116783, the LPA have confirmed that</p>	Comments are noted. Our response is set out above.	No change.

			the character and context of Silwood Street has evolved to be that of a mix of uses and therefore a SIL designation is not deemed appropriate.		
L&Q Group	2	EC 02	<p><i>Relates to Call for site</i></p> <p>4.4 Employment use MELS are earmarked for comprehensive, mixed use development and the Council's aspiration is to include new modern workspaces in these schemes. L&Q welcomes LBL's recognition under Policy EC2 that it will need to take a broader view to planning for its future employment floorspace, given the wide range of users and their workspace needs.</p>	Support noted.	No change.
(Avison Young obo)	2	EC 02	<p><i>Relates to Part 3, LCA SA 25</i></p> <p>Executive Summary</p> <p>Draft Policy EC2 of the emerging Lewisham Local Plan seeks to protect employment sites and floorspace in line with the employment land hierarchy. Strategic Industrial Locations form the highest tier of the hierarchy, above Locally Significant Industrial Sites, Mixed-use Employment Locations and non-designated employment sites. The proposed policy seeks to identify three SIL sites where the co-location of employment and other compatible uses will be supported. Our client's site (the proposed development site) is not included in those sites identified.</p> <p>Our client's site is identified as an employment allocation within Chapter 14 of the draft Local Plan (Lewisham's Central Area). The site comprises Allocation 25: Randlesdown Road and Bromley Road, detailed on page 555 of the consultation material. The basis of the allocation is to deliver a comprehensive employment-led redevelopment with compatible commercial and ancillary main town centre uses, together with public realm enhancements, including to the Bellingham station approach.</p> <p>We have reviewed the available evidence underpinning the emerging Local Plan. These representations conclude the following:</p> <ul style="list-style-type: none"> • Draft Policy EC2 has not been prepared in accordance with the tests of soundness set out in the National Planning Policy Framework (2019) (Paragraph 36). In our view the policy is not justified and is not based on proportionate evidence. Further, the Employment Land Review demonstrates that the preparation of the policy hasn't taken account of the reasonable alternatives nor does it make any viable conclusions on the clients site. This should be reviewed and the policy wording updated to reflect the recommendations of these representations i.e. that the policy should include be drafted to ensure that all SIL sites, or at least the clients part of the Bromley Road SIL, can accommodate the colocation of residential uses <p>In addition to the above, we understand the site has been allocated (Allocation 25, page 555) for employment-led development. The principles of redevelopment for solely industrial and commercial uses has been tested at appeal and (APP/C5690/A/13/2192356 and APP/C5690/A/14/2223342). In both appeal cases, this was considered to be an unviable development option for the site. Supporting uses will be required to support the redevelopment of the site for industrial and commercial uses, and subsequently enhance the quality of the existing stock within the Bromley Road SIL.</p> <ul style="list-style-type: none"> • We have demonstrated through these representations that the site presents a suitable, achievable and available development opportunities for the re-provision 	<p>Noted. The land referred in the response is located within London Plan designated Strategic Industrial Land (at Bromley Road SIL). The London Plan makes clear that SIL should be safeguarded. It sets parameters for the co-location of uses on SIL, and that this must be progressed through the plan-led process. Where SIL land is proposed to be rationalised to enable co-location, substitute industrial capacity for SIL must designated elsewhere in the Borough. Officers do not consider that there is land elsewhere in the Borough that could feasibly provide for replacement capacity, should this site be de-designated from SIL. It is noted that the representation does not put forth any suggested sites which could be considered for substitute SIL.</p> <p>Whilst the draft Local Plan makes proposals for new SIL to be designated at the Bermondsey Dive Under, this is required to provide substitute capacity for SIL land to be reconfigured at Trundleys Road, Apollo Business Centre and Evelyn Court.</p>	Land at Randlesdown Road and Bromley Road site allocation has been removed from the Plan.

			<p>of commercial uses, ensuring no loss and instead, an increase in employment opportunities, underpinned by the delivery of residential development. The co-location of these uses is supported by both the London Plan (2021) and NPPF (2019).</p> <ul style="list-style-type: none"> • On the basis of our conclusions drawn in relation to Draft Policy EC2, we require the policy wording associated with the site’s allocation (Allocation 25) to be updated to include references to the co-location of residential uses and the inclusion of a realistic indicative residential capacity. <p>These representations provide further details on the matters raised above.</p>	<p>The Council acknowledges the aspirations for the site, and that a future development could potentially deliver net gains in industrial capacity along with residential uses. However, this would not be sufficient to satisfy the London Plan requirements. As the site allocation (which was proposed for solely non-residential uses) is considered to be undeliverable by the landowner, it will be removed from the Local Plan.</p>	
(Avison Young obo)	2	EC 02	<p><i>Relates to Part 3, LCA SA 25</i> <i>Policy EC2: Protecting Employment Sites and Delivering New Workspace</i></p> <p>We have assessed the evidence base underpinning Draft Policy EC2, namely the Employment Land Study (March 2019) and specifically the assessment criteria for identifying SIL for intensification and co-location of alternative uses such as residential, and the recommendations for employment site assessment summaries (Table 5.1). We are of the view that the assessment results, the recommendations and the requirements for industrial land are inconsistent.</p> <p>Para. 5.33 concludes that “<i>the size of the site allows for a masterplan approach to take place to allow intensification through a carefully planning mixed use development safeguarding this area for employment</i>”, whereas the recommendation for C9 – Bromley Road is that it is “<i>safeguarded for employment uses & intensify where possible</i>”.</p> <p>The conclusions within the Council’s Employment Land Review for safeguarding employment sites, including mixed-uses and co-locating uses through a masterplan process are therefore inconsistently applied within the Policy EC2.</p>	<p>Noted. The Employment Land Study is an evidence base document which has informed the Local Plan. Table 5.1 of the study summarises the report recommendations for industrial land management, which for Bromley Road SIL (Cluster C9 in the study) it states: “safeguard for employment uses”.</p>	No change.
(Avison Young obo)	2	EC 02	<p><i>Relates to Part 3, LCA SA 25</i></p> <p>The Site Allocations background paper (January 2021) explains that site allocations were identified through 6 criteria;</p> <ol style="list-style-type: none"> 1. The London-wide Strategic Housing Land Availability Assessment (SHLAA) 2. Lewisham ‘Call for Sites’ 3. Existing site allocations 4. Development pipeline 5. Evidence base (including the Employment Land Study (2019) 6. Officer review <p>The Council appear to have nominated the site following an officer review and have disregarded three representations for mixed-use development on the basis that the site is ‘safeguarded employment land’. As noted, the Employment Land</p>	<p>The land is identified as Strategic Industrial Land and is therefore inappropriate for mixed-use development in accordance with London Plan policies.</p>	<p>Land at Randlesdown Road and Bromley Road site allocation has been removed from the Plan.</p>

			<p>Review itself is inconsistent in its conclusions for the site, and it does not reflect the viability of an employment only intensification – as previous established through earlier appeals.</p> <p>Ultimately, this represents an inconsistent approach to identifying sites for co-location as applied by Lewisham and as a result draft Policy EC2 is not appropriately justified and based on proportionate evidence. The proposed policy does not consider reasonable alternatives, as required by Paragraph 35 (b) of the NPPF.</p> <p>In addition, by requiring there to be no net loss of floorspace and operational yard space, and the references to a 65% plot ratio, the principle of EC2 is inconsistent with the wording of London Plan Policy E7 which suggests that selected part of SIL could be intensified to provide additional industrial capacity, and that this would facilitate the consolidation of SIL to support the delivery of residential and other uses. On this basis, we are of the view that the proposed policy EC2 is not consistent with national policy with regard to enabling the delivery of sustainable development and is therefore unsound.</p> <p>The preparation of this policy should therefore be reviewed in line with the tests for soundness set out at Paragraph 35 of the NPPF. This should be reflected in the next iteration of the Local Plan, to which we reserve the right to make further comment.</p>		
(Avison Young obo)	2	EC 02	<p><i>Relates to Part 3, LCA SA 25</i></p> <p>Summary We have reviewed the Borough of Lewisham’s Regulation 18 consultation material, including the Main Issues and Preferred Approach document. We have concluded that there are inconsistencies within the conclusions of the Employment Land Study. On this basis, we are of the opinion that the Policy EC2 is not justified, inasmuch that it is not based on proportionate evidence and does not take into account the reasonable alternatives, in line with the tests sets out in the NPPF at Paragraph 35 for preparing new Local Plans.</p> <p>In addition it is not consistent with national and strategic planning policy and does not enable the delivery of sustainable development in accordance with the policies in the Framework. On this basis we are of the view that the Plan and specifically draft Policy EC2 cannot in its present form be found sound.</p> <p>In addition, we would recommend that the draft wording is amended to specify alternative uses, including those relating to the provision of residential development, in line with Policy E7 of the London Plan which identifies such residential uses as being appropriate uses within a intensified and consolidated SIL. As presently worded, the Site Allocation and Policy EC2 are inconsistent with strategic policy.</p> <p>We have recommend that the policy wording be updated to provide flexibility to support the colocation of compatible uses within this part of the Bromley Road SIL, including where the proposals would not result in an increase in employment opportunities; where the proposals would provide betterment to the overall public realm; and assist in regenerating a site which contributes poorly to the</p>	<p>Noted. The Employment Land Study is an evidence base document which has informed the Local Plan. Table 5.1 of the study summarises the report recommendations for industrial land management, which for Bromley Road SIL (Cluster C9 in the study) it states: “safeguard for employment uses”.</p> <p>The land is identified as Strategic Industrial Land and is therefore inappropriate for mixed-use development in accordance with London Plan policies.</p>	No change.

			local area. We are not seeking the co-location of residential uses on parts of the SIL that are outside of our client's ownership.		
Yorkshire & Clydesdale Bank Trustees Ltd c/o CBRE Global Investors (Montagu-Evans obo)	2	EC 02	<i>Relates to Call for site</i> Policy EC2: Protecting Employment Sites and Delivering New Workspace Draft Policy EC2 sets out the Council's strategic policy on employment land. It identifies a need for 21,800 sqm of net additional employment floorspace (Class B1) up to 2038, which will be focused in Strategic Industrial Locations (SIL) and Locally Significant Industrial Sites (LSIS), through retaining industrial capacity by ensuring no net loss of floorspace and operational yard space. We note that the Council should ensure all references to land uses are consistent with the changes to the Use Class Order that came into effect on 1 September 2020. This is necessary to ensure its land use policies can be easily interpreted. This is relevant to the Plan as a whole.	Noted. The Local Plan will be amended to reflect and respond to these changes.	Local Plan Part 2 Economy and Culture section amended throughout to reflect and in response to changes to the Use Classes Order, including the new Class E.
Yorkshire & Clydesdale Bank Trustees Ltd c/o CBRE Global Investors (Montagu-Evans obo)	2 2 3 5	EC 02 Table 8.1 Figure 15.2	<i>Relates to Call for site</i> Table 8.1 accompanies Policy EC2 and sets out Lewisham's Employment Land Hierarchy. It identifies Evelyn Street as LSIS (which replaces its current LEL designation). We support the change in terminology for consistency with the London Plan. However, we note that Figure 15.2 of the Draft Plan is inconsistent with Table 8.1 and Schedule 4 as it wrongly identifies the Site as SIL. This should be addressed by the Council at Regulation 19 stage to ensure the Site is not inadvertently designated as SIL.	Support noted. Mapping error noted and Figure 15.2 will be amended for accuracy.	Local Plan amended so that Figure 15.2 designates the site as LSIS (and not SIL).
Notting Hill Genesis (Savills obo)	2 2 2	EC 02 Table 8.1 Figure 8.1	<i>Relates to Call for site</i> <i>Commercial and Mixed Use Redevelopment</i> It is acknowledged that under the adopted Local Plan, the site is currently designated as a Local Employment Location (LEL) which seeks to protect B Use Class Employment Uses. Table 8.1 (Lewisham's Employment Land Hierarchy) and corresponding Figure 8.1 of the draft Local Plan proposes to designate Malham Road Industrial Estate as a Locally Significant Industrial Site (LSIS), which is protected for commercial and industrial uses, with priority given to B1 commercial and light industrial uses. As part of the reform to the Town and Country Planning (Use Classes) (England) Regulations (as amended) ("the Use Classes Order"), from 1 September 2020, the former Use Class B1 now falls into the new Use Class E (Commercial Business and Service) which covers a broad range of uses, including: retail, restaurant, office, financial/professional services, indoor sports, medical, gym and nursery uses along with any other services which it is appropriate to provide in commercial, business or service locality. As such, subject to no previous restrictions such as planning conditions, any former B1 units located at Malham Road Industrial Estate could change between any of the uses described within the Use Class E i.e. the change no longer constitutes development and as such, no longer requires planning permission. The draft Local Plan must take into account this new legislation, and the government's intent to adopt more flexible commercial uses.	Noted. The Local Plan will be amended to reflect and respond to these changes in planning legislation.	Local Plan Part 2 Economy and Culture section amended throughout to reflect and in response to changes to the Use Classes Order, including the new Class E.
Notting Hill Genesis (Savills obo)	2	EC 02	<i>Relates to Call for site</i> We also note that draft Local Plan Policy EC2 (Protecting employment sites and delivering new workspace) sets out that the Council will ensure that there is no net loss of floorspace or operational yard space within LSIS. Whilst this approach was previously reflected in the Intend to Publish London Plan, this was rejected by the Secretary of State (SoS). In the SoS's letter to the Mayor of London (dated	Noted. The London Plan provides that Local Plans can include provisions to retain SIL, LSIS and other industrial sites / capacity, taking into account local	Local Plan amended to provide new definition of industrial capacity and removal of 65% plot ratio.

			<p>13 March 2020), the SoS stated this approach was not realistic and was inconsistent with the National Planning Policy Framework, which requires that sufficient land of the right type is available in the right places and at the right time to support growth and innovation and was an over-restrictive stance to hinder Boroughs’ abilities to choose more optimal uses for industrial sites where housing is in high demand.</p> <p>We therefore consider that the Council’s current approach to ‘no net loss’ on existing industrial land set out in Policy EC5 and EC2 is not consistent with national policy and not consistent with the London Plan. It could also have the effect of unnecessarily constraining development and would therefore not be effective in its delivery. As such, we request that any policy references relating to “no net loss of industrial capacity” are deleted. This would ensure that the draft Local Plan is consistent with the London Plan and national policy.</p>	<p>evidence. The Employment Land Study makes clear that Lewisham has experienced a significant loss of capacity and recommends that remaining capacity be retained in order to help meet identified needs over the plan period. The no net loss principle is therefore considered to be justified and in conformity with the London Plan.</p> <p>However it is acknowledged that the draft Local Plan definition of industrial capacity should be amended for conformity with the London Plan.</p>	
Barratt London and the Church Commissioners (Avison Young obo)	2	EC 02	<p><i>Relates to Part 3, LCA SA 20</i> Chapter 8 Economy and Culture Draft Policy EC2 Protecting employment sites and delivering new workspace and Draft Policy EC7 Non-designated employment sites</p> <p>We request clarification within the wording of Draft Policy EC2 and EC7 that non-designated employment sites are limited to smaller commercial and industrial sites, i.e. those in Class E(g) (formally B1), B2, and B8 uses, and would not include major redevelopment sites within town centres and/or sites in retail use.</p>	<p>Noted. Disagree with the suggested change. The draft Local Plan broadly seeks to protect industrial capacity, including on non-designated employment sites, irrespective of its location. The approach is informed by the evidence base, including the Employment Land Study and monitoring. In light of the comment, the plan will be amended to provide more clarity as to what constitutes a non-designated site.</p>	<p>Local Plan amended to make clear the definition of non-designated employment land.</p>
SEGRO (CBRE Limited obo)	2	EC 02	<p><i>Relates to Part 3, LNA SA 04</i> Executive Summary It is important that the draft plan recognises and plans for the continued growth of the industrial and logistics sector, and the structural shift in society to e-commerce which has only been accelerated by the Covid-19 pandemic. SEGRO therefore welcomes the continued identification of Deptford Trading Estate as a designated Strategic Industrial Location (hereafter “SIL”), and the direction of travel within the plan which seeks to protect and intensify employment uses in these locations.</p>	<p>Support noted.</p>	<p>No change.</p>
SEGRO (CBRE Limited obo)	2	EC 02	<p><i>Relates to Part 3, LNA SA 04</i></p>	<p>Comments are noted. The Plan seeks to provide a balance between providing</p>	<p>No change.</p>

			<ul style="list-style-type: none"> •Draft policies should allow new industrial capacity to come forward within and beyond designated employment sites to ensure the plan is sufficiently flexible to react to changes in industrial demand throughout the plan period. •Mixed use site allocations near to SILs should explicitly reference the SIL as a constraint to future development to ensure the future of this essential employment land supply is not jeopardised. As a minimum, the allocations should reference that no residential development will be approved that will prevent the ability for the SIL to operate on a 24/7 basis. •The assessment of the Blackhorse Road SIL (which includes Deptford Trading Estate) as a site which “cannot be expanded” in the evidence base is not qualified. Although SEGRO are not actively promoting intensification at this time, we suspect this will be feasible subject to detailed matters including highways and design. 	sufficient employment land to meet needs whilst protecting local amenity by directing storage and warehouse uses to designated employment sites. The Local Plan also allows co-location in a select number of locations, as part of a strategy to intensify employment uses on these sites, in line with the London Plan. Relevant site allocations also note that development must not compromise the function of SIL and LSIS and/or reference the ability to function on a 24 hour basis.	
SEGRO (CBRE Limited obo)	2	EC 02	<p><i>Relates to Part 3, LNA SA 04</i></p> <p>Response to the Consultation: On behalf of SEGRO, CBRE Limited has reviewed the content and evidence base to the LB Lewisham Local Plan. Our key observations and comments are summarised below.</p> <p>1. Plot Ratios Whilst we welcome LB Lewisham’s objective to protect existing industrial capacity across the borough, we do not support the requirement for new industrial development to achieve a 65% plot ratio. This policy has been removed from the London Plan (2021) following a direction from the Secretary of State because it was not considered to be an effective tool for managing industrial capacity. SEGRO provided extensive evidence to the London Plan examination on this point, demonstrating that a 65% plot ratio does not provide adequate yard space for many of its customers, who on average operate their businesses most efficiently at plot ratio of 40-50%.</p> <p><i>LB Lewisham officer note: Appendix 1: Plot Ratios Evidence is included in the original representation.</i></p> <p>To ensure general conformity with the London Plan, all references to the 65% plot ratio should be removed from the draft plan.</p>	Noted.	Local Plan amended to provide new definition of industrial capacity and removal of 65% plot ratio.
SEGRO (CBRE Limited obo)	2	EC 02	<p><i>Relates to Part 3, LNA SA 04</i></p> <p>3. Industrial Land Supply</p> <p>The Lewisham Employment Land Study (2019) acknowledges that there has been a net loss of industrial land capacity in recent years, and further loss is expected as a result of development proposals in the pipeline - the cumulative loss of industrial supply expected across the plan period (between 2018 and 2018) is 12.4ha. This is very concerning for SEGRO when coupled with very low vacancy</p>	Noted. The Local Plan seeks to provide a balance between protecting employment land to support the function of the wider London economy, whilst also seeking to meet identified needs for employment floorspace,	Local Plan Part 2 Economy and Culture policies amended to set out stronger support for storage and warehousing uses within SIL to support London’s economy, along with providing more flexibility

			<p>rates of 3% across the borough, which is widely accepted to reflect an inefficient and unhealthy real estate market.</p> <p>The plan's strategy for industrial land management is to protect some existing designated industrial sites, release others for 'co-location' (mixed use development) and prevent additional supply of logistics outside of employment sites.</p> <p>Whilst we acknowledge that co-location can maintain existing levels of industrial capacity if appropriately designed, it does constrain the ability of established industrial locations to intensify their activities to respond to increases in demand, which will result from an increased population and greater pressure on the 'last mile' of the supply chain. This, together with a policy that prevents new logistics opportunities coming forward outside of designated industrial sites, will prevent the creation of additional supply now and in the future. We believe this is needed to reserve the impact of recent losses and allow vacancy rates to increase to a healthier level.</p> <p>On this basis, we question whether the proposed strategy of only protecting some industrial land and allowing the rest to be developed for a mix of commercial and residential uses is justified and achieves the objectives of the NPPF to deliver 'sustainable development'. We recommend two solutions for the plan to better address current and future industrial need:</p> <ol style="list-style-type: none"> 1. Part B(d) of Policy EC2, which states that proposals consist solely or predominantly of storage and warehousing uses outside of SIL should be resisted the redevelopment, should be removed; and 2. Proposals for new sensitive uses, such as residential, near to SILs should be very carefully managed and designed to ensure that existing uses in SILs and their ability to intensify and operate on a 24/7 basis are not compromised – see next section of these representations for further discussion. 	<p>which in Lewisham are primarily for Class E(g) business uses, as set out in the Employment Land Study. Accordingly, the draft Local Plan sets out a strong position to safeguard existing industrial capacity, whilst also enabling the co-location of employment and other uses in a select number of locations, as part of a strategy to intensify employment uses on these sites, in line with the London Plan.</p> <p>However, it is recognised that the plan could better address the need to support London's wider economy including the CAZ, such as for logistics and last-mile delivery. The plan will therefore be amended to provide more flexibility for storage and warehousing, whilst continuing to seek to carefully manage these uses, recognising they are not the principal identified local needs as far as employment provision is concerned.</p>	<p>for these uses in LSIS and non-designated employment areas.</p> <p>Local Plan amended with additional requirements on amenity, specifically in relation to protecting the function and effectiveness of SIL and LSIS, and SIL on a 24-hour basis. This will work together with Amenity and Agent of Change policy.</p>
Cockpit Arts (The Planning Lab obo)	2	EC 02	<p><i>Relates to Part 3, LNA SA 14</i></p> <ul style="list-style-type: none"> • CA is supportive of policies that seek to protect important employment locations, including those designated as MELs. • We query how LB Lewisham plans to ensure the mixed-use development permitted in MELs achieves an appropriate balance between employment and other uses? Will this be achieved via specific quotas, and how will this be monitored/enforced? It will be important that this balance includes retention/provision of specific maker space (i.e. dirty/messy/noisy light industrial creative space) which has different requirements from digitally-driven creative businesses, or other artist workspace. • CA is supportive of other policies in the Plan that require MELs to be progressed according to masterplans to ensure the responsibility of providing employment floorspace is approached pragmatically between owners/developers within the MEL. 	<p>Support noted. The draft Local Plan does not prioritise residential uses above other land uses in MELs. The Local Plan also requires a balanced approach through the use of masterplans to demonstrate an appropriate mix of uses on sites. Draft Policy EC6.C sets out new approaches to protecting new employment capacity</p>	<p>No change.</p>

			<ul style="list-style-type: none"> We would advocate that demands for other competing priority uses (e.g. residential) are not prioritised in these areas, over employment floorspace. 	delivered on MELs through the masterplan process. The Council will monitor the implementation and effectiveness of policies through the Authority Monitoring Report process.	
Artworks Creekside (Avison Young obo)	2	EC 02	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy EC2 – Protecting employment sites and delivering new workspace</p> <p>Draft Policy EC2 seeks to safeguard land for commercial and industrial uses through retaining employment capacity within Strategic Industrial Locations (SIL) and Locally Significant Industrial Sites (LSIS). We note that Lower Creekside is identified as a LSIS which are identified in Table 8.1 as providing for the borough’s ‘main local concentrations of commercial and industrial uses, which perform a niche role to support the functioning of the sub-regional and local economy. They provide workspace for micro, small and medium sized businesses, including the cultural, creative and digital industries. Protected for commercial and industrial uses, with priority given to Class B1 commercial and light industrial uses.’</p> <p>Whilst forecast need has been identified for 21,800 sqm of net additional employment floorspace, it is noted that this refers to previous Use Class B1. This has since been replaced by Use Class E(g) (Use Classes Order 1987 as amended in September 2020) and draft Policy EC2 and the supporting text should be updated to reflect the latest use classes.</p>	Noted. The Local Plan will be amended to reflect and respond to these changes in planning legislation.	Local Plan Part 2 Economy and Culture section amended throughout to reflect and in response to changes to the Use Classes Order, including the new Class E.
Artworks Creekside (Avison Young obo)	2	EC 02	<p>Part B(a) of draft Policy EC2 states that within SIL and LSIS locations industrial capacity should be retained ‘ensuring no net loss of floorspace and operational yard space along with intensifying employment development, including by facilitating the co-location of employment and other compatible uses through the plan-led process’. The supporting explanatory text advises that safeguarding of employment land includes ‘floorspace, yard space for operations and servicing space’.</p> <p>The principle of intensifying employment sites and the ability to co-locate employment uses alongside other uses is supported and London Plan Policy E7 supports efficient use of employment land through delivering higher plot ratios, whilst having regard to operational requirements (including servicing). London Plan Policy E7 is clear insofar as it required intensification to provide additional capacity.</p> <p>However, the principle of ‘no net loss’ and the 65% plot ratio was omitted from the adopted London Plan and there is no requirement for LSIS locations to consider the loss of floorspace and operational yardspace. If applied to 2 Creekside, the requirement to protect all operational yard space would be overly restrictive and would not allow successful intensification of designated employment sites and the opportunities for co-location that the wider employment Policies seek to achieve.</p>	<p>Noted. The London Plan provides that Local Plans can include provisions to retain SIL, LSIS and other industrial sites / capacity, taking into account local evidence. The Employment Land Study makes clear that Lewisham has experienced a significant loss of capacity and recommends that remaining capacity be retained in order to help meet identified needs over the plan period. The no net loss principle is therefore considered to be justified and in conformity with the London Plan.</p> <p>However it is acknowledged that the draft Local Plan definition of industrial capacity should be amended for</p>	Local Plan amended to provide new definition of industrial capacity and removal of 65% plot ratio.

				conformity with the London Plan.	
Big Yellow Storage Company Limited (DWD obo)	2	EC 02	<p>Policy EC2 (Protecting employment sites and delivering new workspace) Big Yellow supports part A of this policy, which seeks to safeguard employment sites and floorspace for commercial and industrial uses. However, Big Yellow strongly objects to part Ad of this draft policy, which states: <i>“Outside of SIL, resisting the redevelopment of employment land and sites where proposals consist solely or predominantly of storage and warehousing uses.”</i></p> <p>Part D would therefore apply to the redevelopment of sites located anywhere other than in Strategic Industrial Locations (SILs), including LSISs and non-designated employment sites. No explanation is provided for this approach. More importantly, Part Ad would apply to the redevelopment of existing storage and warehousing uses located in LSISs or on non-designated employment sites.</p> <p>Storage and warehouse uses are universally accepted as key industrial land uses that make a significant contribution to the function of both Strategic Industrial Locations (SILs) and Locally Significant Industrial Sites (LSISs) across London boroughs.</p> <p>Part Ad would prevent existing self-storage facilities from being redeveloped and intensified, if they are located within LSISs or on non-designated employment sites, unless the redevelopment proposal involves a greater proportion of other employment uses. This is an unreasonably onerous approach and likely to result in the loss of industrial floorspace when there could be opportunities to secure intensification of these sites for both self-storage (an industrial use) and other employment uses.</p> <p>The Site is located within an LEL and the existing self-storage facility performs well. If Big Yellow sought to redevelop and intensify the Site, Part Ad places a restriction that would likely mean redevelopment would be unviable.</p> <p>Therefore, we request that greater flexibility is provided in the wording of Part Ad and suggest that it is amended to read as follows: <i>“Outside of SIL, resisting the redevelopment of employment land and sites where proposals consist solely or predominantly of storage and warehousing uses, unless:</i> <ul style="list-style-type: none"> • Sites are presently in sole or predominantly of storage and warehousing use; and • Redevelopment proposals comprise intensification of storage and warehousing floorspace; and • The introduction of other employment uses.” <p>These amendments provide flexibility for existing self-storage facilities to redevelop their sites to re-provide self-storage floorspace, providing the floor area is intensified and other employment uses are integrated.</p> </p>	Noted.	Local Plan amended to provide greater flexibility for development proposals in existing storage and distribution use, as recommended.
The Renewal Group (Carney Sweeney obo)	2	EC 02	<p><i>Relates to Part 3, LNA SA 08</i></p> <p>Policy EC2 Protecting Employment Sites and Delivering New Workspace This policy should be updated to reflect the amendments to the London Plan prior to its final adoption and publication. The policy also needs to be updated to take into account new Use Class E and the imminent amended permitted</p>	Noted.	Local Plan reviewed throughout to reflect changes to and ensure conformity with the London Plan (2021).

			development rights later this year. The Inspector considering the Westminster Local Plan in 2020 made clear the importance of this.		
(Avison Young obo)	2 -	Chapter 8 EC 02	<p>Chapter 8 identifies the main issues relating to the Lewisham’s economy and culture, including: making the best uses of land and striking the right balance between the delivery of homes and space for business; the role of out-of-centre retail parks; inclusive economy; affordable workspace; design quality; and responding to the challenge facing the high street.</p> <p>Draft Policy EC2 provides support for the protection of commercial and industrial uses within the Borough. Point A notes that proposals for new development should be commensurate with the type and function of land sites within the hierarchy detailed in Table 8.1 (and replicated below).</p> <p>Point B confirms the level of net additional employment floorspace with Class B1 required within the Plan period (21,800 sqm) and how this will be met. Point Ba. confirms the approach to delivery will be focused on ensuring no net loss of floorspace and operational floor space within Strategic Industrial Locations (SILs) and Locally Significant Industrial Sites (LSIS). This is plainly now out of date as a result of the direction from the Secretary of State and the removal of the ‘no net loss’ principle and the reference to plot ratios from the adopted London Plan (2021).</p> <p>Furthermore, the intensification of these sites including the co-location of other employment and compatible uses will only be supported on identified sites (as per those listed in Point D).</p> <p>Point C of the draft policy wording confirms that development proposals on sites within SILs must not adversely impact on the function and integrity of the SIL or prejudice the continued operations of existing uses.</p> <p>Point D confirms three sites where the co-location of other compatible uses will be supported, including: Apollo Business Centre (Surrey Canal Road SIL); Trundleys Road (Surrey Canal Road SIL); and Evelyn Court (Surrey Canal Road SIL). Our clients site is not included within the policy wording for the co-location of compatible uses.</p> <p><i>LB Lewisham officer note: Figure 2: Lewisham’s Employment Hierarchy is included in the original representation. It provides details relating to SIL, LSIS, MEL, and Non-designated employment sites.</i></p>	Disagree that the plan is out of date. Co-location can only take place where SIL is released and compensatory provision of SIL is designated elsewhere. Bromley Road SIL is not included in point D as it has no compensatory SIL sites.	No change.
	2	EC 02	<p><i>Relates to Part 2, LNA SA 06</i></p> <p>Site context and background</p> <p>The site is located at 164-196 Trundleys Road and 1-9 Sanford Street, Deptford SE8 5JE. The site lies southwest of Deptford Park, adjacent to Folkestone Gardens and extends to approximately 0.38 ha. The site is bound by Trundley’s Road to the east, Sanford Street to the south, railway lines and a TfL operations building (substation) to the west and Juno Way to the north. The site benefits from a long frontage to Folkestone Gardens.</p>	<p>Noted. An additional row in Table 8.1 is not necessary.</p> <p>Table 8.1 has been amended to show that Trundleys Road is designated as LSIS.</p> <p>Schedule 4 also recognises that Trundleys Road has been de-designated from</p>	The Local Plan now reflects the approved planning application for Trundleys Road

			<p>A planning application was submitted for the Site for an employment-led scheme with residential above for 189 units in May 2018 and is pending determination by LBL (ref DC/18/106941). A second application was also submitted in August 2020 for an employment-led scheme with residential and student accommodation above and is also pending determination by LBL (ref 20/117886).</p> <p>Uses will only be supported at selected SIL sites, and where it can be suitably demonstrated that the requirements of draft London Plan policies E5 and E7 and other Local Plan policies, are satisfied. This includes the Trundley's Road site currently within Surrey Canal SIL, which is proposed to be de-designated from SIL (as discussed further below).</p> <p>On the basis that the Trundley's Road site is to be de-designated from SIL, Policy EC2 should clarify that the Trundley's Road site no longer forms part of the Surrey Canal Road SIL. For clarify, an additional row could be included in Table 8.1 specifically for such co-location sites.</p>	<p>SIL and re-designated as LSIS.</p> <p>The Surrey Canal Road and Trundleys Road site allocation also mentions that it is a re-designated LSIS site.</p>	
Tetra Tech Planning (John Lyon's Charity obo)	2 2 2	EC 02 EC 03 Table 8.1	<p>Economy & Culture Do you agree that the Local Plan has identified all of the issues around economy and culture?</p> <p>We consider that Policies EC2, Table 8.1 and EC3 should include a reference to Site Allocations within the Employment Land Hierarchy.</p>	Noted. The Local Plan should be read as a whole.	No change.
Fifth State and (Avison Young obo)	2	EC 03	<p><i>Relates to Part 3, LNA SA 16</i> Draft Policy EC3 – Location and design of new workspace</p> <p>The Owners and Developer of 5-9 Creekside strongly support draft Policy EC3 which outlines a number of criteria to promote the delivery of high quality, flexible and suitable workspaces for micro, small and medium-sized businesses.</p>	Support noted.	No change.
L&Q Group	2	EC 03	<p><i>Relates to Call for site</i></p> <p>Policy EC3 (C), includes several provisions that new employment development should consider. L&Q disagree that commercial fit out to shell and core only is not appropriate. Rather, we consider providing units to shell and core enables us to attract the greatest number of potential occupiers and provide flexibility in the type of workspace that can be delivered on site, especially given the new wider E use class. Moreover, full internal fit out will add considerably to build costs and we consider this should not be prioritised over other benefits, such as affordable housing. We work closely with local agents through the design process to establish the type of users that would be attracted to the location and consider this as part of our overall strategy for the site, including implications for local amenity, servicing requirements and interplay with the public realm. L&Q note the LBL's preference for employment locations to include a range of premises available, in terms of both type and size but also an appropriate range of rents.</p>	Noted. It is accepted that the policy could be amended to require that development proposals provide an appropriate level of fit out (rather than full fit out) and will be considered on a case-by-case basis. However retaining position that shell and core only is unacceptable in principle.	Policy amended to require that development proposals provide an appropriate level of fit out, to be assessed on a case-by-case basis.
GHL (Leegate) Limited (Frank Knight obo)	2	EC 03	<p><i>Relates to Part 3, LEA SA 03</i> 3. Economy and Culture</p> <p>The Council has set out to ensure that the Local Plan continues to support the success and future growth ambitions of Lewisham. Policy EC3 (Location and design of new workspace) states new employment development will be directed to sites in Lewisham's employment land hierarchy.</p>	Noted.	No change.
Artworks Creekside	2	EC 03	<p><i>Relates to Part 3, LNA SA 16</i> Draft Policy EC3 – Location and design of new workspace</p>	Support noted.	No change.

(Avison Young obo)			As demonstrated to the Council through our emerging development proposals, we are seeking to create high quality, flexible and suitable workspaces for micro, small and medium-sized businesses. We therefore support Policy EC3.		
QUOD (Landsec obo - Lewisham Shopping Centre)	2 2 2	EC 03 EC 04 EC 09	<p>Workspace</p> <p>11.4 Landsec generally support draft workspace policies EC3 'Location and design of new workspace' and EC4 'Providing suitable business space and affordable workspace', albeit would like to work with the Council to better understand the justification for the provision of 10% of proposed employment floorspace comprising affordable workspace (EC4E).</p> <p>11.5 The narrative to this policy requires further justification for the 10% requirement. The Lewisham's Employment Land Study (2019) and Local Economic Assessment (2019) does not justify the policy. This approach conflicts with London Plan Policy E3 'Affordable workspace' which requires that <i>"Boroughs, in their Development Plans, ... consider detailed affordable workspace policies in light of local evidence of need and viability."</i> Policy EC4 E should be viability tested.</p> <p>11.6 Policy EC9 C 'Workplace training and job opportunities' requires new development that results in a net loss of employment floorspace to make contributions towards local employment and training initiatives. Town centre regeneration resulting in mixed use development will result in changes in different types of floorspace and the new E class is designed to facilitate that. Rather than having a formulaic approach, the Council could agree bespoke agreements with strategic development in order to ensure that development can maximise the benefits for local people through future employment opportunities.</p>	Disagree. The Local Plan Viability Assessment has tested the viability of the requirements around affordable workspace. On the basis of this evidence, the requirement is considered to be viable and justified.	Local Plan amended to provide further information on how affordable workspace requirements will be implemented.
Fifth State and (Avison Young obo)	2	EC 04	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy EC4 – Providing suitable business space and affordable workspace</p> <p>The Owners and Developer of 5-9 Creekside broadly support the principle of the proposed draft Policy wording which seeks major developments to provide at least 10% of new employment floorspace as affordable workspace.</p> <p>Part E of the draft Policy states that further details will be set out in the Council's Planning Obligations SPD. The supporting text states that <i>'affordable workspace is workspace that is provided at rents maintained below the market rate. This type of workspace is important to support business start-ups, particularly in the cultural and creative sectors'</i>.</p> <p>As currently drafted there is no confirmation of the specific heads of terms or discount levels which are envisaged to be imposed through the Planning Obligations SPD to secure the provision of affordable workspace. As such a detailed response on the viability of such a requirement cannot be provided, but the principle of such a mechanism is supported. Fifth State request that the proposed affordable workspace discount is specified within this policy so that it can be appropriately viability tested at the plan making stage, as required by the NPPF.</p>	Noted. The Local Plan Viability Assessment has tested the viability of the requirements around affordable workspace. On the basis of this evidence, the requirement is considered to be viable and justified.	Local Plan amended to provide further information on how affordable workspace requirements will be implemented.

			Fifth State reserve the right to make further comment in relation to the specific heads of terms at the appropriate time.		
The Arch Company Properties LP (Turley obo)	2	EC 04	<p><i>Draft Policy EC4 Providing suitable business space and affordable workspace</i></p> <p>Whilst our client is generally supportive of the Council's objective to secure (suitable and) affordable workspace, it is important to:</p> <p>a) Highlight that the provision of such floorspace will have to be subject to viability testing (especially in designated industrial land within which redevelopment projects already have to deal with significant pressures on viability, particularly in co-location schemes, and therefore affordable workspace may result in a conflict with the provision of affordable housing or other infrastructure). To this extent, it is acknowledged that para. 8.23 of the Draft Local Plan refers to a viability tested route, however, to be clear and transparent this should be recognised in the main policy wording in order for the provision of affordable workspace (on/off-site) to be justified; and</p> <p>b) In relation to railway arches (Part D(d)), the same comments as set out in relation to Draft Policy EC8 above apply where it relates to railway arches.</p>	<p>Noted. The Local Plan Viability Assessment has tested the viability of the requirements around affordable workspace. On the basis of this evidence, the requirement is considered to be viable and justified.</p> <p>The draft Local Plan EC04 supporting text provides that flexibility may be applied where the requirement cannot be met for reasons of viability. This point will be elevated to the policy for clarification.</p>	Local Plan policy EC04 amended to provide clarification around viability considerations for affordable workspace.
L&Q Group	2	EC 04	<p><i>Relates to Call for site</i></p> <p>Notably, Policy EC4 D states that within MEL's, where there is existing provision of affordable workspace on-site, proposals will be required to retain or re-provide this workspace in any future redevelopment unless it can be demonstrated that the affordable workspace has been provided on a temporary basis (meanwhile use). Whilst L&Q agree that proposals should include premises with an appropriate range of rents, it may not be possible or appropriate in all cases to match the affordable workspace, especially if as part of the comprehensive redevelopment of the site, the premises re-provided are of a substantially better quality. This should be acknowledged by LBL in the supporting text.</p> <p>In addition, L&Q are of the view that subsidised workspaces should be balanced against other requirements for the site, some of which may also be subsidised i.e. quantum of affordable housing. This needs to be considered as part of the feasibility exercise reference at EC 4(e), which should be expanded to include the viability of subsidised workspace as well as feasibility.</p>	<p>The Local Plan Viability Assessment has tested the viability of the requirements around affordable workspace. On the basis of this evidence, the requirement is considered to be viable and justified.</p> <p>The draft Local Plan EC04 supporting text provides that flexibility may be applied where the requirement cannot be met for reasons of viability. This point will be elevated to the policy for clarification.</p>	Local Plan policy EC04 amended to provide clarification around viability considerations for affordable workspace.
L&Q Group	2	EC 04	<p><i>Relates to Call for site</i></p> <p>However, L&Q's concerns regarding the appropriateness of new and re-provided affordable workspace, both in terms of the finish of units and rent levels, raised above on Policy EC4, apply to this policy.</p>	Noted. Responses to further detailed representations set out elsewhere in the Consultation Statement.	No change.
Notting Hill Genesis (Savills obo)	2	EC 04	<p><i>Relates to Call for site</i></p> <p>Notwithstanding the above, NHG supports the overall principles of draft Local Plan Policy EC4 (Providing suitable business space and affordable workspace) as it relates to the delivery of new and re-purposed workspace designed to accommodate micro, small and medium sized businesses to complement and support existing clusters of cultural and creative businesses. NHG also support, in principle, the provision of affordable employment floorspace, subject to viability.</p>	Support noted.	No change.

GHL (Leegate) Limited (Frank Knight obo)	2	EC 04	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Furthermore, Policy EC4 (Providing suitable business space and affordable workspace) adds that new major commercial development, including major mixed-use development, will be required to provide at least 10% of new employment floorspace as affordable workspace (on site where feasible).</p> <p>GHL broadly supports the economic development policies set out in Chapter 8 (Economy and Culture) but reminds the Council to ensure the policies are justified and that Policy EC4 has been informed by appropriate evidence which determines why affordable workspace is required on all major mixed-use developments. It is suggested that this policy is informed by relevant evidence base and is tested through a viability route. Policy EC4 will need to be further scrutinised to ensure that any additional costs being placed on development, does not impact upon scheme feasibility and viability.</p>	Noted. The Local Plan Viability Assessment has tested the viability of the requirements around affordable workspace. On the basis of this evidence, the requirement is considered to be viable and justified.	Local Plan policy EC04 amended to provide clarification around viability considerations for affordable workspace
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	2	EC 04	<p><i>Relates to Part 3, LNA SA 14</i></p> <p>Suitable business space and affordable workspace</p> <p>We note the approach of Policy EC4 (Providing suitable business space and affordable workspace) is that major development proposals commercial development proposals should ensure provision is made for suitable types and sizes of units, at an appropriate range of rents, with part E stating that new major commercial development, including major mixed-use development incorporating commercial floorspace will be required to provide at least 10% new employment floorspace as affordable workspace where feasible.</p> <p>Whilst the principle of providing commercial floor space is supported, any provision of affordable workspace must be considered on a case by case basis, having regards to the overall benefits that a major mixed use scheme would deliver to ensure it does not jeopardise the overall effective delivery of a comprehensive mixed use redevelopment site allocation. As such, the drafting should be amended to ensure the provision is considered on a case by case basis, and/or subject to viability. Currently the text makes reference to “where feasible” but this should be updated to “where viable”. Making this change would provide flexibility and it will ensure that the draft Local is effective in its delivery.</p>	Noted. The Local Plan Viability Assessment has tested the viability of the requirements around affordable workspace. On the basis of this evidence, the requirement is considered to be viable and justified.	Local Plan policy EC04 amended to provide clarification around viability considerations for affordable workspace
SEGRO (CBRE Limited obo)	2	EC 04	<p><i>Relates to Part 3, LNA SA 04</i></p> <ul style="list-style-type: none"> The draft affordable workspace policy needs to be justified by evidence that it is both necessary and viable, and needs to be clearly drafted to provide certainty to developers regarding exactly under what circumstances affordable workspace should be provided; how much should be provided; and on what terms. 	Noted. The Local Plan Viability Assessment has tested the viability of the requirements around affordable workspace. On the basis of this evidence, the requirement is considered to be viable and justified.	Local Plan policy EC04 amended to provide clarification around viability considerations for affordable workspace
SEGRO (CBRE Limited obo)	2	EC 04	<p><i>Relates to Part 3, LNA SA 04</i></p> <p>6. Affordable Workspace</p> <p>We note that the London Plan 2021 (Policies E2 and E3 specifically) provides a policy framework for local affordable workspace policies to come forward where there is an identified need. The examination of the London Plan policy indicated a number of considerations that would be important to testing whether such a</p>	Noted. The Local Plan Viability Assessment has tested the viability of the requirements around affordable workspace. On the basis of this evidence,	Local Plan policy EC04 amended to provide clarification around viability considerations for affordable workspace.

			<p>policy would be sound, including ensuring the policy is sufficiently clear in its requirements and ensuring these requirements are justified by the appropriate evidence.</p> <p>In this context we have the following observations and recommendations for draft policy EC4 (Providing suitable business space and affordable workspace):</p> <ul style="list-style-type: none"> • As a general point, we recommend that an evidence-based assessment of need is undertaken to establish where the market is failing to deliver a certain type of workspace and why such workspace is necessary to be supported in planning terms. This will help the policy to be justified and effective in achieving its objectively assessed needs. •Part A talks about provision being made for ‘suitable types and sizes of units, at an appropriate range of rents’ – the definition of ‘suitable’ and appropriate is not included and so it is not clear what is expected and how a development would be assessed against this policy. We recommend that the Council refers to the inspectors’ comments on Policy E2 of the Draft London Plan which was submitted for examination for a discussion on the soundness of this language and approach. •Part C requires development to retain or re-provide existing provision of low-cost or affordable workspace on-site – as above, we recommend that the Council refers to the inspectors’ comments on Policy E2 of the Draft London Plan. •Part E requires new major commercial development, including major mixed-use development incorporating commercial floorspace, to provide at least 10% of new employment floorspace as affordable workspace. This should be provided on site wherever feasible. Further details will be set out in the Council’s Planning Obligations Supplementary Planning Document. The NPPF requires viability testing to be undertaken at the plan making stage, so we believe it is necessary for the local plan policy to at least set out the expected level of discount below market rent to be specified. •In relation to Part E, we also recommend that this policy is only applied to net additional business floorspace to ensure that investment into existing buildings or replacing them with more sustainable ones is not dis-incentivised. 	<p>the requirement is considered to be viable and justified.</p> <p>The council is also preparing an affordable workspace strategy.</p>	
Cockpit Arts (The Planning Lab obo)	2	EC 04	<p><i>Relates to Part 3, LNA SA 14</i></p> <ul style="list-style-type: none"> • CA endorses policy that requires provision of genuinely affordable workspaces for all creative industries, including independent makers and crafts (not just ‘arts’). Again, we reiterate that it is important that these workspaces include specific maker space (i.e. dirty/messy/noisy light industrial creative space) which has different requirements from digitally-driven creative businesses. 	Support noted. The draft Local Plan provides flexibility for a wide range of uses to locate within employment locations, with detailed requirements around amenity to ensure industrial uses are not prejudiced.	No change.
Artworks Creekside (Avison Young obo)	2	EC 04	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy EC4 – Providing suitable business space and affordable workspace</p> <p>Artworks Creekside, having been involved in affordable workspaces on both sites for a number of years, broadly support the principle of the proposed draft Policy wording which seeks major developments to provide at least 10% of new employment floorspace as affordable workspace.</p>	Noted. The Local Plan Viability Assessment has tested the viability of the requirements around affordable workspace. On the basis of this evidence,	Local Plan policy EC04 amended to provide clarification around viability considerations for affordable workspace

			Part E of the draft Policy states that further details will be set out in the Council's Planning Obligations SPD. Clearly, Artworks Creekside reserve the right to make further comment in relation to the SPD at the appropriate time.	the requirement is considered to be viable and justified.	
Transport for London Commercial Development	2	EC 04	EC4 Providing suitable business space and affordable workspace TfL CD acknowledge the need to provide affordable workspace in the right locations. However, it is considered that criterion a is ambiguous and overlaps with criterion E. It is suggested that criterion A is reviewed to ensure it is not repeating other criteria and that it is clear what is expected of a developer.	Noted. Criterion A sets a general approach for development proposals to consider how provision for SMEs and micro businesses can be delivered. The remainder of the policy sets out details for specific types of workspace.	No change.
The Renewal Group (Carney Sweeney obo)	2	EC 04	<i>Relates to Part 3, LNA SA 08</i> Policy EC4 Providing Suitable Business Space and Affordable Workspace Clarity needs to be provided as to whether 10% of new employment floorspace being provided as affordable workspace is to take priority over the provision of affordable housing in mixed use developments. On many occasions, viability assessments need to be provided to demonstrate the maximum amount of affordable housing and the Council need to be clear as to whether 10% affordable workspace needs to be taken into account in appraisals prior to the assessment of the maximum amount of affordable housing. This is critical as on many development sites viability is constrained.	Noted. The Local Plan Viability Assessment has tested the viability of the requirements around affordable workspace. On the basis of this evidence, the requirement is considered to be viable and justified.	Local Plan policy EC04 amended to provide clarification around viability considerations for affordable workspace
Fifth State and (Avison Young obo)	2	EC 05	<i>Relates to Part 3, LNA SA 16</i> Draft Policy EC5 – Locally Significant Industrial Sites (LSIS) – formerly LEL The Owners and Developer of 5-9 Creekside have already provided commentary to draft Policy EC2 which requests that the principle of no net loss and the 65% plot ratio should be removed from the draft Local Plan, in order to be consistent with the adopted London Plan. Aside from this point, they broadly support the aims of draft Policy EC5 which supports the co-location of employment and other compatible uses at selected LSIS locations (including Lower Creekside). <u>Part E of the draft Policy refers to LSIS listed in Part B; this should be corrected to Part C which provides the list of LSIS sites where co-location is supported.</u>	Support noted. Policy cross-reference is an editorial error that will be rectified. Responses to representations on plot ratio set out elsewhere in the Consultation Statement.	Local Plan amended to appropriately cross-reference policy requirements.
Fifth State and (Avison Young obo)	2	EC 05	<i>Relates to Part 3, LNA SA 16</i> Part E states that where proposals come forward on LSIS co-location sites where an approved site-wide masterplan is not in place, Criteria in Parts F and G of the policy will apply. Part F(a) of this policy states that residential uses would not be supported, which conflicts with the proposed Site Allocation 16 (discussed later in this representation) which identifies that residential uses are considered to be compatible and suitable as part of a co-location scheme at Lower Creekside. The explanatory text on page 266 states that proposals for non-employment uses in LSIS would be resisted if a site wide masterplan has not been agreed or approved because the Council want to 'ensure that the employment generating function of LSIS land remains intact and is not eroded by the piecemeal introduction of non-employment uses'. This approach is contrary to the aspirations of the London Plan, which states at Policy E7 that 'Development Plans and development proposals should be proactive and encourage the intensification	Noted. The Council considers that masterplans are necessary to ensure certainty over the delivery of outcomes for LSIS sites where co-location is supported in principle. It is acknowledged that sites with multiple landowners and leaseholders may add complexity to the masterplan process. However, the requirement will ensure that the function of LSIS is not compromised through piecemeal development of	No change.

			<p><i>of business uses, inter alia.</i> Further, Part D of Policy E7 sets out the principles for which developments proposing the co-location of uses must consider.</p> <p><u>We are of the view that it is unreasonable to restrict the principle of delivering residential uses within LSIS co-location schemes in the absence of a site wide masterplan being in place.</u> Whilst we are working with adjacent land owners at 2 and 3 Creekside, this imposes a harmful policy control which is contrary to good planning practices. <u>Notwithstanding this, where a number of sites are being brought forward as part of the wider regeneration of an area which include co-locating factors, the requirement for comprehensive masterplanning may be compromised by land ownerships etc. and ultimately delay the delivery of much needed accommodation, both employment and residential for the borough.</u></p> <p><u>As such we request that draft Policy EC5 acknowledges that a masterplan approach will not be necessary where sites have already been identified for co-location by virtue of a Site Allocation, which we consider will satisfy London Plan Policy E7 (as the co-location proposed is being plan-led). As such draft Policy EC5 Part E should be removed.</u></p>	parcels of land within the LSIS, particularly where non-employment uses such as housing are introduced.	
Fifth State and (Avison Young obo)	2	EC 05	<p><u>We consider that the requirement for quality design and placemaking principles are already secured via the relevant draft policies contained in Chapter 5 of the draft Lewisham Local Plan and would therefore request that Part F(a) is removed.</u></p>	Disagree. Part F(a) does not relate specifically to quality of design and place making.	No change.
Fifth State and (Avison Young obo)	2	EC 05	<p>Within the explanatory text on page 266, the draft Local Plan states that schemes which result in a net loss of industrial capacity will only be considered in very exceptional circumstances and goes on to state that <i>'proposals will be required to provide a minimum of 50 per cent of genuinely affordable housing on the residential element'</i>. Whilst this position is understood and reflects the London Plan position where there is a loss of industrial capacity, <u>we consider it would be helpful to provide further clarity within the policy wording for proposals that would result in no net loss of industrial capacity schemes would be required to provide a minimum of 35% of genuinely affordable housing on the residential element (to qualify for the Fast Track Route in accordance with London Plan Policies H5 and E7).</u></p>	Noted. The policy is relating specifically to proposals involving the loss of industrial capacity. The requirements for affordable housing are set out in Policy HO3. The plan must be read as a whole.	No change.
Yorkshire & Clydesdale Bank Trustees Ltd c/o CBRE Global Investors (Montagu-Evans obo)	2	EC 05	<p><i>Relates to Call for site</i></p> <p>Policy EC5: Protecting Employment Sites and Delivering New Workspace</p> <p>Draft Policy EC5 relates specifically to LSIS land and states that LSIS will generally be protected for a range of Class B and appropriate sui generis uses. It goes on to state that the co-location of employment and other compatible uses (including residential) will only be supported at selected LSIS locations that are proposed for allocation under Part C of Draft Policy EC5. This does not include our client's Site.</p> <p>The Council's decision making process for identifying some LSIS sites for mixed use allocation is not clear and as a result the policy approach is disputed. The Council notes that the proposed allocations for co-location are made having regard to the Lewisham Employment Land Study (2019) which assesses employment land supply in the Borough. The Study states that:</p> <p><i>"Opportunities and constraints for redevelopment, intensification, extension, and refurbishment are considered, and if there is an opportunity, how much developable land is available. If there are constraints, we have outlined these and stated if they are likely to be, or can be, resolved within the plan period"</i>.</p>	We are not adding site allocations at this stage of the plan process. This site may be considered through a plan review in due course.	No change

			<p>The Study provides an assessment of all designated employment sites against these criteria. We enclose the site assessment for Evelyn Street with these representations. The site assessment makes a series of broad brush statements about the Site, including that because of a lack of availability there are no opportunities for redevelopment, intensification and extension over the Plan period. The Study also states that because the Site is in a built up area it cannot be expanded. These statements cannot reasonably be used by the Council to make the judgement that the Site is not appropriate for co-location. This presents a soundness issue in so far as the Council's approach is not justified nor based on sufficient evidence.</p> <p>By way of example our client's Site measures 1.2 hectares and therefore is much larger than several other sites where the Employment Land Study suggests co-location would be appropriate. Table 1 below identifies several sites presented in the Study where clearly opportunities for co-location would be more challenging given their size, when also taking account of the policy requirement to ensure no net loss of industrial capacity.</p> <p><i>LB Lewisham officer note: Table 1: Employment Land Recommendations is included in the original representation. It shows recommendations in relation to Blackheath Hill, Evelyn Street, Perry vale and Clyde Vale.</i></p> <p>In light of the Council's substantial housing needs it should be looking to exhaust all opportunities to deliver development. The Council must therefore encourage the masterplan approach for other LSIS sites not identified in the Regulation 18 Plan.</p> <p>In the case of Evelyn Street, the Site could deliver a substantial mixed use development, that could also re-provide employment use and ensure no net loss of industrial capacity, whilst also delivering other strategic objectives including housing delivery (which could include affordable housing). The Site is also considered a suitable location for tall building development in the emerging Plan and is in a location where tall buildings are commonplace, including Deptford Wharves and Convoys Wharf.</p> <p>There are no designated heritage assets in its vicinity that would limit its suitability as a location for high density, mixed use development. The potential for impacts on the surrounding area could be dealt with through a sensitive design response as part of the masterplan process, without needing to stymy development of the Site through an overly restrictive policy approach based on insufficient evidence.</p>		
Notting Hill Genesis (Savills obo)	2	EC 05	<p><i>Relates to Call for site</i></p> <p>The Council's approach to the co-location of industrial uses and residential uses is set out within Policy EC5 (F) (a) of the draft Local Plan and states the following: <i>"Within LSIS proposals for non-employment uses (i.e those outside of the B Use Class) will only be supported where they; (a) Are not residential uses;..."</i></p> <p>Policy E7 (Industrial Intensification, co-location and substitution) of the London Plan states that intensification of industrial capacity in selected parts of LSIS could be considered as part of a plan-led process of intensification and</p>	Comments are noted. The designation of Malham Road Industrial Estate as an LSIS has been informed by the Lewisham Employment Land Study that identifies the site as a successful employment site with low vacancy rates and high	No change.

			<p>consolidation, and this process could be used to facilitate the delivery of residential and other uses (our emphasis). In LSIS, the scope for co-locating industrial uses with residential and other uses may be considered, but this should also be part of plan-led or masterplanning process, and should not come forward through ad-hoc planning applications.</p> <p>We therefore consider that draft Local Plan Policy EC5 is not consistent with Policy E7 of the London Plan, which sets out that development plans and proposals should be proactive and encourage the intensification of business uses to facilitate the consolidation of an identified LSIS to support the delivery of residential and other uses as part of a masterplanning process. It is also not consistent with national policy which requires planning policies support development that makes efficient use of land. As such, we respectfully request that the wording of Policy EC5 (F) is amended as follows (additions are identified as underlined and deletions have a strikethrough, as illustrated below):</p> <p>“Within LSIS proposals for non-employment uses (i.e those outside of the B Use Class) will only be supported where they (a) are not residential uses.”</p> <p><u>“Within LSIS, proposals for non-employment uses (including residential uses) will be supported where a comprehensive, design-led redevelopment scheme can be demonstrated; this could include the scope for collocating industrial uses with residential and other uses as set out Policy E7(D) of the London Plan.”</u></p> <p>LBL’s Employment Land Study (2018) identifies that the existing units within Malham Road Industrial Estate are generally dated and that some units are coming towards the end of their economic life. The study further states that there is an opportunity to redevelop the more dated units to provide better quality units that meet modern occupier requirements. However, the current drafting of the policies are overly-prescriptive and insufficiently flexible, and therefore unlikely to support the site’s full redevelopment potential. The draft Local Plan is therefore not effective and not consistent with national policy because it does not promote and support the development of under-utilised land and buildings.</p>	<p>demand for employment uses. Fragmentation of the site, through co-location, will restrict the operational nature of the employment uses, undermine the viability of this important LSIS and will be contrary to ensuring sufficient industrial land and capacity to meet the Borough’s future needs.</p>	
Stoken Properties Ltd (Boyer obo)	2	EC 05	<p><i>Relates to Call for site</i></p> <p>It is understood that the site will be designated as a Locally Significant Industrial Location (LSIS) in the emerging Local Plan. Emerging Policy EC5 (Locally Significant Industrial Sites) aims to protect the employment capacity of such sites but recognises that there is potential for the co-location of uses, including residential, providing there is no significant reduction in industrial capacity.</p>	<p>Noted. Responses to additional representations set out elsewhere in Consultation Statement.</p>	<p>No change.</p>
Stoken Properties Ltd (Boyer obo)	2	EC 05	<p><i>Relates to Call for site</i></p> <p><u><i>Response to Draft Policy EC5 (Locally Significant Industrial Sites (LSIS) – formerly LEL)</i></u></p> <p>In response to Draft Policy EC5, firstly it is noted that the policy refers to <i>Class B Uses</i>. Existing Class B Uses are to be replaced with Class E uses and so we would seek clarity on this point.</p> <p>Whilst the overall objective of the policy to protect industrial capacity is supported, a clear distinction between industrial floorspace and people employed on site is needed. In the current and changing climate, it is felt that it is</p>	<p>Noted</p> <p>Our amended policy on LSIS is in accordance and supported by higher level policy and our Evidence base.</p>	<p>Local Plan will be updated to refer to new Use Class Order.</p>

		<p>unreasonable to class floorspace as “capacity”. Working practices have changed and there is no longer such a need for large industrial units, particularly in built up areas. Instead, there is a preference for smaller, more efficient workshops/offices that, whilst smaller in terms of floorspace, can provide a greater number of jobs than the previous operation which required a large floorspace. There therefore needs to be a clear distinction between floorspace and number of employees as if capacity in this regard relates to floorspace, it could restrict development and cause sites to become vacant and underutilised.</p> <p>In particular, Part D of the Policy confirms that proposals for the co-location of uses on the listed LSIS sites, which result in the net loss of industrial capacity, will only be permitted in exceptional circumstances. It is felt that a more pragmatic and reasonable understanding of “capacity” in the context of older industrial sites is needed and the policy made more flexible.</p> <p>Similarly, in Part D of the Policy whilst we support that provision should be made for at least 50 per cent affordable housing on any residential element of development, it is felt that viability should be taken into consideration.</p> <p>In some instances, especially in the case of older industrial units, the units are no longer fit for purpose and a significant amount of work and investment is required to bring them up to modern standards. Where this is the case, a residential element may be necessary in order to facilitate the overall development and given the significant costs, it may not be viable to provide 50 per cent affordable housing and so flexibility is required.</p> <p><i>Policy Wording</i> We set out below our response to specific parts of the policy and how the policy should be worded. For consistency, throughout this letter, anything underlined is our proposed wording to the policy.</p> <p>Part A of the Policy states: <i>Locally Significant Industrial Sites will be protected for a range of Class B Uses (B1, B2 and B8) along with appropriate Sui Generis uses, with priority being given to Class B1 uses.</i> We would urge that this is amended to reflect the new planning use classes and reads as <i>“Locally Significant Industrial Site will be protected for a range of <u>Class E uses and B2 and B8 uses</u>, along with appropriate Sui Generis uses.”</i></p> <p>Part D of the Policy states: <i>Proposals for the co-location of uses on LSIS sites listed in (C) above which result in the net loss of capacity will be strongly resisted and only permitted in exceptional circumstances...</i> We challenge the use of “capacity” when referring to the existing industrial use. We suggest that this is replaced with <i>“no net loss of <u>on-site employees</u>.”</i> This will provide clarity and will not act as a barrier for development proposals coming forward.</p> <p>Criterion d. of Part D advises that proposals for the co-location of uses should, amongst other things:</p>		
--	--	--	--	--

			<p><i>d. Makes provision of at least 50 per cent affordable housing on the residential element of the site.</i></p> <p>We suggest that criterion d. reads “<i>provision of at least 50 per cent affordable housing on the residential element of the site unless it can be robustly demonstrated that this is not viable.</i>” This would ensure that potential redevelopment of older industrial sites are not discouraged due to high development costs and 50 per cent affordable housing not being achievable.</p>		
Artworks Creekside (Avison Young obo)	2 2	EC 05 Page 266	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy EC5 – Locally Significant Industrial Sites (LSIS) – formerly LEL As with the commentary on Policy EC2, the principle of no net loss and the 65% plot ratio has been omitted from the adopted version of the London Plan and Policy EC5 D should be updated accordingly to reflect the requirement of the London Plan to ensure that within LSIS’ intensification can also be used to facilitate the consolidation of an identified SIL or LSIS to support the delivery of residential and other uses. Notwithstanding this, Artworks Creekside support the principle that co-location is allowed within the Creekside LSIS.</p>	<p>Noted. The London Plan provides that Local Plans can include provisions to retain SIL, LSIS and other industrial sites / capacity, taking into account local evidence. The Employment Land Study makes clear that Lewisham has experienced a significant loss of capacity and recommends that remaining capacity be retained in order to help meet identified needs over the plan period. The no net loss principle is therefore considered to be justified and in conformity with the London Plan.</p> <p>However it is acknowledged that the draft Local Plan definition of industrial capacity should be amended for conformity with the London Plan.</p>	Local Plan amended to provide new definition of industrial capacity and removal of 65% plot ratio.
Artworks Creekside (Avison Young obo)	2 2	EC 05 Page 266	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy EC5 – Locally Significant Industrial Sites (LSIS) – formerly LEL Part E of the draft Policy refers to LSIS listed in Part B; this should be corrected to Part C which provides the list of LSIS sites where co-location is supported.</p>	Noted. This is an editorial error that will be rectified.	Local Plan amended to make appropriate policy cross-reference.
Artworks Creekside (Avison Young obo)	2 2	EC 05 Page 266	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy EC5 – Locally Significant Industrial Sites (LSIS) – formerly LEL Part E states that where proposals come forward on LSIS co-location sites where an approved sitewide masterplan is not in place, Criteria in Parts F and G of the policy will apply. Part F(a) of this policy states that residential uses would not be supported, which conflicts with the proposed Site Allocation 16 (discussed later in this representation) which identifies that residential uses are considered to be compatible and suitable as part of a co-location scheme at Lower Creekside.</p>	Noted. The Council considers masterplans are necessary to ensure certainty over the delivery of outcomes sought on site allocations, including the selected LSIS sites where co-location is acceptable in principle.	Local Plan amended to delete Policy EC5.E.

			<p>The explanatory text on page 266 states that proposals for non-employment uses in LSIS would be resisted if a site wide masterplan has not been agreed or approved because the Council want to <i>'ensure that the employment generating function of LSIS land remains intact and is not eroded by the piecemeal introduction of non-employment uses'</i>.</p> <p>It is unclear whether this is agreed as part of a pre-application process, as part of a Site Allocation or requires a single planning application to consolidate all sites within a masterplan. In this latter scenario, this is a wholly restrictive and inappropriate control over the development of individual sites. Whilst we are working with adjacent land owners at 5-9 Creekside, this imposes a harmful policy control which is contrary to good planning practices.</p> <p>Furthermore, this approach is contrary to the aspirations of the London Plan, which states at Policy E7 that <i>'Development Plans and development proposals should be proactive and encourage the intensification of business uses, inter alia.'</i> Further, Part D of Policy E7 sets out the principles for which developments proposing the co-location of uses must consider.</p> <p>As with the Council's previous approach to 1 Creekside, if the proposals for alternative uses, specifically residential, meet the requirements of Policy E7 of the London Plan, and would intensify industrial use, the overarching policy requirement will still be met and adjacent sites, whether in retained industrial use or otherwise, are still considered as part of this determination process. Where a number of sites are being brought forward as part of the wider regeneration of an area which include co-locating factors, the requirement for comprehensive masterplanning that has been agreed or approach may be compromised by land ownerships etc. and ultimately delay the delivery of much needed accommodation, both employment and residential for the borough.</p> <p>The Council has extensive policy requirements to secure a design-led response to redevelopment and the requirement to ensure placemaking principles and the impact upon adjacent sites would therefore request that Part F(a) is removed.</p>	<p>However, it is acknowledged that Policy EC5.E could lead to confusion over the acceptability of uses with LSIS and should be deleted. This will provide more clarity for policy implementation, where criterion F deals exclusively with sites where co-location on LSIS is not supported.</p>	
Artworks Creekside (Avison Young obo)	2	EC 05	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Summary Paragraph 35 of the National Planning Policy Framework (NPPF) (2019), confirms the examination tests which will be applied to new Local Plans and spatial development strategies to ensure they have been prepared in accordance with legal and procedural requirements. Plans will be found 'sound' if they are positively prepared, justified, effective and consistent with national policy. Paragraph 36 of the NPPF states that the tests of soundness will be applied to non-strategic policies in a proportionate way, taking into account the extent to which they are consistent with relevant strategic policies for the area.</p> <p>For the reasons set out above, we have particular concern that the direction for LSIS' are not consistent with the relevant strategic policies within the recently adopted London Plan. The current drafting of the draft Local Plan reflects a previous iteration of the Intend to Publish London Plan (2019) which was subject to a direction from the Secretary of State on 13th March 2020. In the absence of</p>	<p>Noted. Comments to detailed representations set out elsewhere in the Consultation Statement.</p>	<p>No change.</p>

			the revision to the draft Lewisham Local Plan policies accordingly, alongside those other comments above, the Local Plan is considered unsound.		
Big Yellow Storage Company Limited (DWD obo)	2	EC 05	<p>Policy EC5 (Locally Significant Industrial Sites – formerly LEL) Big Yellow strongly objects to Part B of this policy and requests that it is deleted. Part B states: <i>“Within LSIS, proposals for self-storage and larger format storage and warehousing facilities will only be supported in exceptional circumstances where:</i> <i>a. There is a demonstrable local need for this type of use;</i> <i>b. The use cannot be reasonably located in a Strategic Industrial Location; and</i> <i>c. The development will include provision of an element of floorspace for micro, small or medium sized businesses.”</i></p> <p>The explanation for this approach is set out as follows: <i>“In order to make the best use of land there will need to be a managed process of employment site intensification. The Lewisham Employment Land Study (2019) provides that the Borough’s future requirements are primarily for Class B1 uses. We will therefore seek to resist proposals in LSIS that are solely for self-storage or larger format warehousing and storage facilities (normally included in the B8 Use Class). The built formats of warehousing units or self-storage facilities often do not provide for flexible re-use and are characterised by low employment densities, with limited opportunities for jobs compared to other development typologies. We need to ensure that these larger scale storage uses do not predominate on what is, in Lewisham, a very limited supply of employment land. However, it is acknowledged that storage facilities can help to support the wider regional economy, particularly the logistics sector. They also provide valuable space for smaller businesses and businesses requiring additional off-site provision. We will therefore consider proposals where applicants can show there is a local demand for the warehousing or storage use. Proposals must also demonstrate that there are no suitable or available sites in SIL where this type of development can be more appropriately located. This should include a detailed site survey investigating availability of sites both within and in proximity to Lewisham, including its neighbouring Boroughs and in those in the London southeast sub-region. All proposals for large format storage and warehousing should deliver an element of flexible workspace to meet needs of micro, small and medium sized business.”</i></p> <p>Big Yellow would like to make two points: 1. Big Yellow disagrees with the reductive assertion in the explanation that self-storage facilities are characterised by low employment densities. It is acknowledged that direct employment associated with self-storage facilities is low but there is a common misconception with respect to their overall contribution to supporting employment indirectly.</p> <p><i>LB Lewisham officer note: Appendix B: Big Yellow Employment Survey is included in the original representation. It provides details of a survey carried out in February 2018 and collates the responses of 545 responses received.</i></p> <p>Big Yellow has undertaken a survey (attached as Appendix B) of their existing stores to establish the employment impact of a Big Yellow store. This survey showed that the majority of customers of a store will be domestic, with the remaining 16% being business customers. Proportionally however, business</p>	<p>Noted. It is agreed that storage and warehousing uses can contribute positively to the local and wider regional economy. The Local Plan will therefore be amended to provide stronger support for the Class B8 Uses within SIL, which are considered the most appropriate locations for these uses.</p> <p>However officers do not consider that the policy should be deleted, as suggested. The Lewisham Employment Land Study (2019) identifies that the Borough’s future requirements are primarily for Class B1 or similar commercial and industrial uses, and not B8. It will therefore seek that future development on LSIS helps to meet this identified need as a priority. The policy will be amended to provide that B8 uses may be acceptable where there is a demonstrable need or also ‘market demand’ for the use – this will provide greater flexibility for B8 uses to come forward.</p>	<p>Policy EC5.B amended to provide that B8 uses may be acceptable where there is a demonstrable need or ‘market demand’ for the use.</p> <p>Supporting text amended to reflect that Class B8 uses make a contributions to London’s economy and do not necessarily result in low employment densities.</p>

			<p>customers usually occupy a greater area of floorspace, at 28% of the average store. This survey also showed that the main employment impact is not from direct employment (approx. 3 people per store). Instead, the main employment impact comes from the large number of jobs created by the business occupiers.</p> <p>The average Big Yellow store is home to 105 business customers, and the average business customer employs around three people directly because of their space in Big Yellow. This means that the average Big Yellow store directly accounts for over 300 jobs.</p> <p>The local economic benefit of this is significant – the jobs in the average Big Yellow generate a local Gross Value Added (GVA) of around £17m a year.</p> <p>This level of employment compares very favourably with many alternative employment uses. Allowing for non-business occupiers, and all the non-lettable space (like corridors, lifts, toilets and reception), it works out on average as one job for every 28 square metres gross internal area (GIA) across the whole store. This is a significantly higher job density than, for example, Class B2 Manufacturing at 36sqm GIA per job, or B8 storage/distribution at 70-95sqm per job.</p> <p>This means that a three-storey Big Yellow store would typically create four times as many jobs as a single-storey industrial unit of the same footprint.</p> <p>Across Britain, Big Yellow is home to over 7,700 businesses, and 23,000 jobs (assuming an average of 315 jobs per store). The businesses in Big Yellow together generate a GVA contribution to the national economy of over £1bn a year. Big Yellow is therefore a small-business landlord and startup incubator on a huge scale.</p> <p>On this basis, it is clear that self-storage uses provide a significant employment contribution and the view taken by the Borough to limit their development is not positive plan making and does not accord with paragraph 11 of the National Planning Policy Framework.</p>		
Selkent Holdings (Daniel Watney LLP)	2	EC 05	<p><i>Relates to Part 3, LWA SA 09</i></p> <p>Policy EC5 – Locally Significant Industrial Sites We welcome the introduction of Policy EC5 relating to Locally Significant Industrial Sites (LSIS) and the redefinition of these sites from Local Employment Locations (LELs) to ensure compatibility with the new London Plan. We accept the approach to being employment-led development and strongly welcome the approach taken through Part (C) which supports co-location of employment and other compatible uses at selected LSIS locations, including Willow Way.</p> <p>This co-location approach is appropriate for the Willow Way LSIS and aligns with the aspirations of the new London Plan, and the pre-application engagement undertaken by our client on their site, and therefore this designation should be retained.</p> <p>We are currently concerned over Part (E) of draft Policy EC5 as currently worded which states the following:</p>	<p>Noted. The Council considers masterplans are necessary to ensure certainty over the delivery of outcomes sought on site allocations, including the selected LSIS sites where co-location is acceptable in principle.</p> <p>However, it is acknowledged that Policy EC5.E could lead to confusion over the acceptability of uses with LSIS and should be deleted. This will provide more</p>	<p>Local Plan amended to delete Policy EC5.E.</p>

		<p><i>“For LSIS listed in (B) above [including Willow Way], where an approved site-wide masterplan is not in place, proposals for non-employment uses will be assessed against the criteria in (F) and (G) below, which also apply to all proposals for all other LSIS locations (i.e. not listed in (B) above).”</i></p> <p>Parts (F) and (G) of the draft policy then go on to consider a range of restrictions including, but not limited to, a restriction on any residential uses in these locations.</p> <p>The supporting text then goes on to consider that <i>“in the interim period where a site-wide masterplan has not been approved or agreed by the Council, proposals for non-employment uses within LSIS will be resisted unless they meet the criteria of Policy EC5(E). This is to ensure that the employment generating function of LSIS land remains intact and is not eroded by the piecemeal introduction of non-employment uses.”</i></p> <p>The definition of site-wide masterplan needs to be elaborated upon here, due to the current ambiguity and barrier this could cause to development on such sites.</p> <p>Whilst we recognise the importance of individual schemes being designed in a way which does not prejudice or compromise its neighbours being brought forward for redevelopment in the future, particularly in wider site allocations, the explicit requirement for a site-wide masterplan could cause problems without a more refined definition.</p> <p>Given the numerous landowners within the Willow Way LSIS, there are varying levels of interest in redeveloping the entire site, from those landowners who are actively pursuing the option and engaging with the Council, to those who do not currently have the intention to redevelop.</p> <p>It will be impossible to have a single masterplan agreed by all landowners with a single planning application being brought forward for that masterplan across the whole site.</p> <p>We acknowledge that schemes would need to be cognisant of important masterplanning principles but believe this can be done through individual applications where necessary through detailed design measures and appropriate detailing, such as sufficient set-backs from neighbouring sites, positioning of units and windows to avoid future overlooking, and ensuring each sites takes its fair share of specific land uses including employment accommodation, residential accommodation, affordable housing, public realm and so forth.</p> <p>We would welcome the opportunity to discuss the definition of ‘site wide masterplan’ with policy planners ahead of the next stage of the Local Plan being issued. Our client is in early discussions with neighbouring landowners throughout the Willow Way LSIS so is acutely aware of the different levels of interest in bringing redevelopment forward. We would appreciate the opportunity to discuss how schemes can be brought forward using masterplanning principles and within a “site-wide masterplan” remit but not restricting landowners from bringing forward their own planning applications as and when they are ready to do so.</p>	<p>clarity for policy implementation, where criterion F deals exclusively with sites where co-location on LSIS is not supported.</p>	
--	--	---	--	--

Big Yellow Storage Company Limited (DWD obo)	2	EC 06	<p>2. Thirdly, London Plan Policy E6 (A) (2) states that development plans should make it clear that the range of industrial and related uses that are acceptable in LSIS include, where appropriate, hybrid or flexible B1c/B2/B8. This does not reference all Class B1 uses (such as Class B1a offices) as is presently supported by Part A. On this basis, it is our opinion that Policy EC5 does not accord with the London Plan.</p>	<p>Disagree. The London Plan policy EC6 provides that Local Plans make clear the range of industrial and related uses that are acceptable in LSIS including, where appropriate, hybrid or flexible B1c/B2/B8. Officers do not consider the policy precludes office uses where there is evidence of need for this.</p> <p>The land use principles for LSIS are informed by the Lewisham Employment Land Study, which states that the borough's principal needs are for office and light industrial uses, formerly in the Class B1 (now Class E(g)).</p>	No change.
Millwall Football Club (CBRE Ltd obo)	2	EC 06	<p><i>Relates to Part 3, LNA SA 08</i></p> <p>(7) Mixed Use Employment Locations (MELs)</p> <p>The Surrey Canal Triangle is identified as a Mixed-Use Employment Allocation (Draft Policy EC6). The requirements of parts A and B + C of this policy pull in different directions when the practicalities of implementing the policy is considered. Part (A) requires that <i>'all development within MELs must be delivered in accordance with relevant site allocation policies and a sitewide masterplan.'</i> This approach is sensible and provides a framework around which to consider the application proposals at Surrey Canal Triangle.</p> <p>However, Part B and Part C both require that development proposals will be required to maximise the amount of Class B1 employment floorspace through site redevelopment. They further state that proposals will be expected to make provision for new modern workspace and associated operational land. Furthermore, Part C states that all future proposals involving the redevelopment or change of use of land or floorspace must:</p> <ul style="list-style-type: none"> ▪ Retain, and wherever possible seek to increase the proportion of industrial capacity (including Class B floorspace) across the MEL, as originally approved in the masterplan; and ▪ Ensure that there is no net loss of existing industrial capacity. <p>The ability to meet this objective is likely to present conflict with the requirements to expand and improve the stadium and the stadium land should be identified as being exempt from these policy requirements. Any requirement to co-locate employment development alongside expansion to the stadium is likely to introduce additional conflicts (compared to other uses) for the safe</p>	<p>Support for part A is noted. Agree that proposed works to the stadium will not be required to provide industrial floorspace where it can be demonstrated that it would be incompatible with the use of the stadium. This will be assessed through the Development Management process.</p>	Local Plan amended by referring to the operational requirements of differing land uses and the Agent of Change principle.

			<p>access and egress of fans on matchdays. It is likely that the commercial attractiveness of any employment development in close proximity to the stadium could be limited by the need for matchday/weekend controls on employment uses which could limit the way businesses can use the units and ultimately how attractive the units are. This attractiveness of development that is provided alongside the stadium expansion is a key consideration when set against the previous comments raised with respect to the stadium expansion and redevelopment being delivered by enabling development.</p> <p>A simple amendment is required to the site allocation policy and/or Draft Policy E6 to confirm that the proposed works to the stadium will not need to comply with the requirements set out in E6.</p>		
L&Q Group	2	EC 06	<p><i>Relates to Call for site</i></p> <p>This should also be reflected in Policy EC6 which should be updated to accord with the most up to date Use Classes Order, including the new wider E class use. As part of the final amendments to the London Plan, the SoS is clear that the aspiration in the NPPF is that Local Plans ‘provide’ sufficient industrial land, rather than simply ‘retain’ it, taking account of the need of both residential and business communities.</p>	Noted.	Local Plan amended to reflect the changes to the Use Class Order, including the new Class E.
L&Q Group	2	EC 06	<p><i>Relates to Call for site</i></p> <p>Within the supporting text of Policy EC6, there is a lot of detail on the evidence required to demonstrate the uplift in jobs through re-provided commercial use. Notably jobs during the construction period will not be considered as part of the uplift. We note that the quality of the employment provision will also be taken into consideration – more clarity is required about what this entails.</p>	Noted. It is considered that the supporting text provides sufficient detail to address requirements around jobs uplift. However it is recognised that there may be implementation issues with respect to job quality, and as such this criterion will be removed.	Local Plan Policy EC6 amended to provide clarifications on requirements for jobs associated with new workspace delivered in MELs.
Lendlease (Lichfields obo)	2	EC 06	<p><i>Relates to Part 3, LNA SA 02</i></p> <p>Economy and Culture</p> <p><i>Policy EC6 Mixed-use Employment Locations (MEL)</i></p> <p>Lendlease has concerns about the restrictive nature of parts B and C(a) of this policy. In particular, part B states that development proposals ‘will be required to maximise the amount of Class B1 employment floorspace through site redevelopment, along with providing a demonstrable and significant uplift in the number and quality of jobs’. More flexibility should be applied here, requiring that the uplift in number and quality of jobs is secured through ‘a range of commercial uses’, rather than the restriction to B1 floorspace.</p> <p>The site allocation for Deptford Landings (paragraph 15.27) refers to the ‘provision of commercial floorspace in line with Policy EC 6’, however as mentioned above, Policy EC6 refers specifically to B1 floorspace. It is therefore requested that EC6 is updated in line with the site allocation. Furthermore, it is unclear if Part B applies to sites such as Deptford Landings which have an approved masterplan.</p>	<p>Noted. Agree that more flexibility should be applied to the range of uses specified given role of MELs.</p> <p>Officers disagree that the policy should refer instead to net loss of jobs. MELs are designated employment land and therefore it is considered appropriate to retain industrial capacity.</p> <p>The policy is considered flexible enough to address revisions to masterplans and revisions to planning consents, as these will all be considered through the</p>	Noted. Policy for MEL amended to provide support for a range of commercial uses, including workspace (with priority given to office and light industrial where workspace is delivered).

			Part C(a) is similarly restrictive and does not allow for revisions to approved masterplans over time, due to changing economic circumstances or shifting demand. This is particularly important in the current economic climate and the implications which have been presented by Covid-19. It is considered that the wording of this policy should be amended to permit a caveat which states that where changes of circumstance require a revision of the masterplan, or there is a benefits case for alternative uses to come forward, the loss of employment land may be acceptable provided that job creation figures are maintained. Rather than referring to a 'net loss of existing industrial capacity', the policy should refer to a ' <u>net loss of jobs</u> ', allowing for more flexibility while securing the economic benefits of development.	planning approvals process.	
Notting Hill Genesis (Savills obo)	2	EC 06	<i>Relates to Call for site</i> In addition to the above, it is noted that the wider Malham Road Industrial Estate has a wide range of existing uses outside of commercial and light industrial use, including a place of worship, hot food takeaways and residential. In light of the wide range of existing uses, including those Use Class E units (which benefit from Permitted Development within the Use Class) as well as the underutilised nature of the industrial units, as set out within LBL's Employment Land Study (2018), it is considered that the site should be designated as a Mixed- Use Site Allocation to include industrial and residential uses, which would be more fitting to its function. There is a significant opportunity for the site (and potentially the wider Malham Industrial Estate) to meet a range of priorities for Lewisham. There is the opportunity the site could deliver a mixed use redevelopment which could include the delivery of an enhanced employment provision, new homes and new affordable homes.	Noted. The designation of Malham Road Industrial Estate as an LSIS has been informed by the Lewisham Employment Land Study that identifies the site as a successful employment site with low vacancy rates and high demand for employment uses. Fragmentation of the site, through co-location, will restrict the operational nature of the employment uses, undermine the viability of this important LSIS and will be contrary to ensuring sufficient industrial land and capacity to meet the Borough's future needs.	No change.
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	2	EC 06	<i>Relates to Part 3, LNA SA 14</i> Policy EC6 Mixed-use Employment Locations We note that in relation to Mixed-use Employment site allocations, Policy EC6 states that: <i>"A) The comprehensive redevelopment of Mixed-use Employment Locations will be supported in order to facilitate their renewal and regeneration and to secure provision of new modern workspace. All development within MELs must be delivered in accordance with relevant site allocation policies and a site wide masterplan.</i> <i>B) All new development will be expected to protect and enhance the employment generating function of MEL land. Development proposals will be required to maximise the amount of Class B1 employment floorspace through site redevelopment, along with providing a demonstrable and significant uplift in the number and quality of jobs."</i> Paragraph 22 of the NPPF states that long-term protection of sites for employment uses should be avoided where there is no reasonable prospect of the site being used for allocated employment uses. We therefore consider the	Noted. The suggestion to incorporate homes in the policy text is noted, however the policy is dealing principally with MELs as designated employment land and focusses on employment provision. Notwithstanding this, the policy makes clear that MELs include provision for a mix of uses. In principle support for residential uses is established through corresponding site allocations.	No change.

			<p>requirements of the above policy are not consistent with national policy. This could also have an effect on unnecessarily constraining development and would therefore not be effective in its delivery. As such, we request that the wording of Policy EC6 be amended as follows (the additions are shown underlined):</p> <p><i>A) The comprehensive redevelopment of Mixed-use Employment Locations will be supported in order to facilitate their renewal and regeneration and to secure provision of new modern workspace and homes. All development within MELs must be delivered in accordance within the relevant site allocation policies and a site wide masterplan where there is demand for the proposed uses.</i></p> <p>Making these changes would ensure that the draft Local Plan is consistent with national policy and effective in its delivery.</p>		
Cockpit Arts (The Planning Lab obo)	2	EC 06	<p><i>Relates to Part 3, LNA SA 14</i></p> <ul style="list-style-type: none"> • CA is generally supportive of the MEL designation that covers the Sun Wharf site allocation, and the emphasis on protecting and enhancing the employment-generating function of this land. However, we note conflicts with this policy and the Sun Wharf allocation (SA14) – which do not reflect current/live development proposals for residential led development and that could render the policies out of date prior to adoption. • We strongly endorse the requirement for development within MELs to be delivered in accordance with a masterplan. This is needed to ensure that non-employment uses brought forward within a MEL do not stymie future employment-led development within that area. • We note that the new Plan recognises that the requirement in the previous version for development in MELs to deliver 20% of new floorspace as office floorspace was not being met. How will delivery against the requirement for development proposals to ‘maximise the amount of employment floorspace’ be assessed/measured/enforced? • How will this policy be applied to applications already under consideration in MELs which do not meet these policy requirements, including in terms of delivering according to a masterplan or in terms of maximising floorspace? • What steps will LB Lewisham take where different developments are coming forward within a MEL - at different times and by different owners - to ensure each is shouldering the right level of responsibility in terms of the provision of employment space? 	Noted. All MELs have corresponding site allocations, which necessitate that development must be delivered through the masterplan process. The Part 4 policy on masterplans and comprehensive development provides further details. Planning applications will be considered in accordance with the development plan unless material considerations indicate otherwise.	No change.
The Renewal Group (Carney Sweeney obo)	2	EC 06	<p><i>Relates to Part 3, LNA SA 08</i></p> <p>Policy EC6 Mixed Use Employment Locations (MEL) Again, policy EC6 needs to be updated to reflect final changes to the London Plan prior to its adoption and publication, changes to the use classes order, in particular the new Use Class E and the imminent amended permitted development rights later this year. The Inspector considering the Westminster Local Plan in 2020 made clear the importance of this.</p>	Noted.	Local Plan amended to reflect and respond to changes to permitted development rights and the Use Class Order, including the new Class E.
Big Yellow Storage Company Limited (DWD obo)	2	EC 07	<p>Policy EC7 (Non-Designated Employment Sites) Big Yellow supports part A of this policy, which seeks to resist development proposals that result in the net loss of viable industrial capacity.</p>	Support noted.	No change.

			Big Yellow also supports parts B and C of this policy on the understanding that they simply provide in principle support for employment-led, mixed use development on these sites, and do not place a requirement for such proposals.		
The Arch Company Properties LP (Turley obo)	2 2	EC 08 Paras 8.21 and 8.44	<p>Draft Policy EC8 (Railway Arches)</p> <p>As one of the majority land owners of railway arches in the borough, our client welcomes that the Council recognises that <i>“there are opportunities to maximise the use of the space of [railway] arches and the ancillary land adjacent to them”</i> (para. 8.44). As set out above, operating a vast number of railway arches across London, The Arch Company considers that these can cater for a wide range of uses and occupiers and be a significant contributor to the Council’s ambition of building a strong economy. Railway arches further have the potential to positively contribute to the vitality and vibrancy of an area and to promote its resilience through a diversity of uses, particularly within or in close proximity to town centres.</p> <p>Depending on their location and surrounding uses/occupiers, railway arches should therefore be able to cater for a wide range of uses including industrial, commercial, community (i.e. gyms), economic (i.e. workspace) and/or storage and distribution uses, but also wider town centre and leisure uses (where appropriate), in order to provide the flexibility that is required by (potential) occupiers when adapting to market needs/demand and to ensure that they actually meet their full potential.</p> <p>At present, the draft policy wording is unfortunately considered to be somewhat unclear and potentially restrictive to future development, thereby limiting the use of railway arches where this may lack flexibility and in turn be detrimental from an economic (recovery) perspective. Similar to what is reflected in other (emerging) railway arch policies across London, it is recommended to refine the draft wording in order for it to:</p> <ol style="list-style-type: none"> 1. Be fully effective; 2. Be responsive in respect of the impacts of the COVID-19 pandemic and our economic recovery; 3. Provide (small/local) businesses and future occupiers with the flexibility as well as clarity required to invest in an area; and 4. Ensure that railway arches can accommodate a wide range of (acceptable) uses. <p>As such, our client recommends the following amendments to the draft policy wording: <i>“A. Development proposals involving railway arches will be supported where:</i></p> <p><i>a1. The principal use is for an appropriate commercial (including town centre, community, leisure and/or business uses) or industrial use (Class E(g)(ii)/(iii), B2 and B8), certain sui generis uses in appropriate locations where these do not cause harm to the amenity of surrounding uses and occupiers, or otherwise for an operational use associated with the railway;</i></p>	Agree that there could be further clarity and flexibility in how railway arches can cater for a diversity of land uses.	Policy supporting text amended to make clear that appropriate uses will be considered on a case-by-case basis having regard to Local Plan policies which set parameters for land uses in specific locations (e.g. town centres, designated employment areas and non-designated employment sites).

			<p>a2. In designated employment [or industrial] areas (i.e. LSIS, SIL) or Non-Designated Industrial Land, the principal use shall be limited to appropriate Class E(g), B2, B8 uses and/or related sui generis or other uses that relate to, and support, the industrial nature and operation of the area, or otherwise for an operational use associated with the railway, unless where they form part of a masterplan-led redevelopment (see Part B);</p> <p>[...]”</p> <p>Part a2 has been added to provide clarity on acceptable uses within railway arches in designated employment areas and/or industrial land (i.e. LSIS, SIL, MEL or Non-Designated Industrial Land). It is important to differentiate between designated industrial and other locations to provide businesses and occupiers with the clarity they need.</p>		
The Arch Company Properties LP (Turley obo)	2	EC 08	Our client is supportive of establishing a new railway arches policy (Draft Policy EC8), but has proposed suggestions to ensure it is clear and effective in order to provide the flexibility required to operate these arches in the best possible way which adequately reflects occupier demand, day-to-day operational/letting requirements and market conditions.	Noted. Responses to other detailed representations set out elsewhere in the consultation statement.	No change.
The Arch Company Properties LP (Turley obo)	2 2	EC 08 EC 04	<p>In relation to Part A(e), it is recognised that a number of railway arches may offer low-cost business space, however, these are market levels and reflective of their (often) lower specification and non-prime locations (as acknowledged in para. 6.2.4 of the London Plan and elsewhere in the Draft Local Plan, i.e. para. 8.21). Similarly, there is a significant difference between open arches accommodating a simple storage function and those that are (subsequently) refurbished to a higher specification attracting different types of uses and occupiers.</p> <p>As such, it is first of all important to differentiate between existing low-cost (i.e. as described above) and affordable (i.e. as secured through a Section 106 Agreement) business space. Where such a Section 106 Agreement exists for a site or where railway arches form part of a wider (comprehensive) redevelopment, it is considered acceptable to link it to the requirements of <i>Draft Policy EC4 (Providing suitable business space and affordable workspace)</i>, however, in all other cases the nature of a proposed development will need to be fully considered, as future investment in or upgrading existing railway arches may otherwise be constrained or undermined (i.e. if such future rent levels would not be reflective of their higher quality specification or a change of use).</p> <p>It will therefore be important to avoid a misconception in this area with wider policies in the Draft Local Plan (i.e. Draft Policy EC4 referred to above) and it is recommended to (1) remove reference to ‘lower-cost’ workspace from Part A(e) of the draft policy wording and (2) to cover the provision of affordable workspace in Draft Policy EC4 only (see comments/suggestions below). However, the supporting text to Draft Policy EC8 may clarify that railway arches often provide low-cost business space (as set out above and in the London Plan) which may be re-provided if the nature of the proposals remain comparable and/or that Draft Policy EC4 applies where railway arches form part of a wider comprehensive redevelopment.</p>	Disagree that low cost workspace and railway arches should be removed from EC 08 Part A(e) and EC 04 Part D but that there is merit in providing greater clarity when affordable workspace can be retained.	No change to policy EC 04. Local Plan (EC 08 part Ae) has been amended to provide greater clarity on retaining or re-providing affordable workspace.
The Arch Company	2	EC 08	Whilst we recognise the importance of consultation with key stakeholders prior to the submission or during the determination of a planning application, it is considered that Part C of the draft policy wording may be onerous for future	Agree that there should be more flexibility in terms of	Local Plan (EC 08 part C) has been amended to provide greater

Properties LP (Turley obo)			applicants. Network Rail and Transport for London (“TfL”) may not both have an interest in the railway lines above respective arches and/or their asset(s) and/or TfL-managed roads may not be affected by the nature of the development proposals (i.e. a simple change of use). The policy wording should therefore be amended to state that: <i>“Network Rail and/or Transport for London should be consulted on development and design options where appropriate and required to ensure that development will not adversely impact on the public highway and rail network, or preclude the delivery of planned transport infrastructure”</i> .	consulting with transport stakeholders.	flexibility when consulting with transport stakeholders.
GHL (Leegate) Limited (Frank Knight obo)	2	EC 09	<i>Relates to Part 3, LEA SA 03</i> Policy EC9 (Workplace training and job opportunities) explains that all proposals for major development will be required to provide job and training opportunities to Lewisham residents, including apprenticeships, secured by way of planning conditions or S106 obligations.	Noted.	No change.
Barratt London and the Church Commissioners (Avison Young obo)	2	EC 10	<i>Relates to Part 3, LCA SA 20</i> Draft Policy EC10 Town centres at the heart of our communities Barratt London and the Church Commissioners strongly support this Draft Policy which focuses future growth and investment within and around town centres, particularly to optimise the use of land. The delivery of an appropriate mix and balance of residential and main town centre uses within town centres is also strongly supported.	Support noted.	No change.
WSP (Sainsbury’s Supermarkets Ltd obo)	3 2	LNA SA 09 EC 10	81. For these reasons the loss of the Sainsbury’s store will directly conflict with the new Local Plan Policy EC10: Town Centre at the Heart of Our Communities. 82. In summary, the detailed technical work that has been undertaken on behalf of the developers confirms that the retail impact of the loss of the Sainsbury’s store and existing retail warehouses will have substantial negative short-, medium- and long-term implications for the local community. These findings are supported by the Council’s own retail evidence base. 83. The impact of the closure of the Sainsbury’s store and the existing retail warehouses on New Cross/ New Cross Gate District Centre is a legitimate planning concern that must be taken into consideration as part of the new Local Plan process.	Comments are noted. The routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	EC 10	Retail 11.7 The Reg 18 Plan includes a set of new draft retail policies (EC10 to EC14 inclusive are relevant). 11.8 Draft policy EC10 ‘Town centres at the heart of our communities’ reflects the approach of the London Plan and national policy in seeking to focus development in existing town centres. This policy highlights that town centres will be managed positively in order to ensure they are attractive and vibrant places that are resilient and adaptable to future challenges. These are identified to include those presented by new technology and changes in consumer behaviour. Reflecting future changes, the supporting text to this Policy (para. 8.53) highlights that: <i>“Whilst online shopping is affecting the retail sector, traditionally a stronghold of town centres, this has opened opportunities for the re-use of buildings.</i>	Support noted. We believe the Local Plan provides the appropriate balance between protecting the retail function of the town centre whilst providing flexibility in town centre uses to allow them to adapt.	No change.

			<p><i>Complementary cultural, leisure and community uses are increasingly taking up space in town centres, helping to attract visitors. Furthermore, town centres are now becoming a focal point for higher-density mixed use development, including housing. Whilst protecting the retail function of the Borough's town centres is crucial, we will seek to ensure that centres are able to evolve and adapt over time, so that they continue to support the communities in which they are situated."</i></p> <p>11.9 This approach is supported by Landsec, however following our conclusions set out in Chapter 5 and 7 of this report, we would urge the Council to strengthen this objective through the site allocations and town centre policies.</p> <p>11.10 To achieve the long-term vitality and viability of Lewisham's town centres, draft Policy EC10 states that this will be secured through a number of measures. This includes delivering an appropriate mix and balance of residential and main town uses in order to attract visitors and ensure people have good access to a competitive range of services and facilities by seeking to define a broad range of matters that comprise vitality and viability. The draft policy also recognises that there is a need to ensure that town centres remain resilient and adaptable to change over the long-term.</p> <p>11.11 Within this context, whilst protecting the retail function of the Borough's town centres is crucial, the ability for town centres to evolve and adapt over time, so that they continue to support the communities in which they are situated is welcomed.</p>		
Canada Life Ltd (Williams Gallagher obo)	2 2	EC 11 Table 8.2	<p><i>Relates to LCA SA 22</i></p> <p>Other Comments</p> <p>Policy EC11: Town centre network and hierarchy - We support this policy in combination with Figure / Table 8.2 which includes Site 22 within the Catford Town Centre Boundary.</p>	Support noted.	No change.
Barratt London and the Church Commissioners (Avison Young obo)	2	EC 11	<p><i>Relates to Part 3, LCA SA 20</i></p> <p>Draft Policy EC11 Town centre network and hierarchy</p> <p>Barratt London and the Church Commissioners broadly support the Draft Policy but request it acknowledge that housing can be a complementary use within town centres. The Council clearly supports mixed use development in Catford Town Centre as demonstrated by Draft Policy EC10 and the emerging allocations which seek housing alongside town centre uses including on the Plassy Island site (further details concerning this matter are included in below sections of this Representation).</p>	Noted. The policy already recognises the need to deliver an appropriate mix and balance of residential and main town centre uses. Land use principles are also established in the site allocation policies.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	EC 11	<p><i>EC11</i></p> <p>11.12 Policy EC11 'Town centre network and hierarchy' seeks new development to support and reinforce Lewisham's town centre network and hierarchy. This Policy specially refers to the Borough's future retail needs over the period 2020 to 2030, which is identified to be 5,300 sqm (net), and that this should be focused in Lewisham and Catford town centres in the first instance. For the reasons set out above, the forecast needs of the borough will need to be updated through a new evidence base and household survey.</p> <p>11.13 The supporting text (para. 8.60) outlines that this floorspace requirement is derived from the findings of the LRCSU. Notwithstanding that the LRCSU (and</p>	We believe that the evidence base prepared for the Local Plan reflects a proportionate response in accordance with higher level policy.	No change.

			<p>Local Plan Policy and text) needs to be updated by utilising up-to-date survey evidence and applying the latest data available, further clarity is provided on what this floorspace represents. The policy wording does not clarify that any future retail need is in the convenience retail sector only and that there is no capacity for further comparison floorspace. As currently worded, the Policy could be interpreted as suggesting that there is a requirement to deliver 5,300 sqm of retail floorspace(i.e. both convenience and comparison goods floorspace) between 2020 and 2030. Further clarity within the wording of Policy is therefore required.</p> <p>11.14Furthermore, part (c) of draft Policy EC11 needs to be amended to reflect the position of the London Plan and make reference to the ‘potential’ future reclassification of Lewisham as a Metropolitan Centre. <i>“EC11(C) Development of Lewisham town centre and its surrounds will be proactively managed in order to secure its potential future reclassification as a Metropolitan centre....”</i></p> <p>11.15The supporting text identifies that Lewisham town centre is a key focal point of the Borough and is its principal shopping and leisure destination as well as a major transport hub. Whilst Lewisham is currently defined as a Major centre, it is undergoing significant transformation and offers the potential to be reclassified as a Metropolitan centre in the future, as indicated by the London Plan. The town centre already benefits from excellent public transport links, and the proposed Bakerloo Line Extension (BLE) route with a key interchange at the centre would further entrench the sub-regional importance of the centre. The Reg 18 Plan will supersede the LTCLP (2014) in setting the strategic framework to deliver the vision for a Metropolitan centre. This should conform to the London Plan and refer to the ‘potential’ for Metropolitan classification in respect to paragraph 8.58.</p>		
QUOD (Landsec obo - Lewisham Shopping Centre)	1 2	Strategic Objective 7 EC 11	<p>7 Strategic implications for Lewisham Town Centre</p> <p>7.1 The Council has had a longstanding aspiration to elevate Lewisham town centre to metropolitan status. The adopted Core Strategy (2011) promotes Lewisham Town Centre to Metropolitan status by 2026. The LTCLP repeats this vision and contains policies to deliver Metropolitan status.</p> <p>7.2 The emerging Local Plan maintains the policy aspiration for Lewisham town centre to achieve Metropolitan classification – Strategic Objective 7. Likewise, the London Plan states that Lewisham will grow in function and population and has ‘potential’ to become a town centre of Metropolitan importance.</p> <p>7.3 Draft Policy EC11 ‘Town centre network and hierarchy’ states that Lewisham town centre will be proactively managed in order to secure its future reclassification as a Metropolitan centre. This includes <i>“supporting investment and facilitating delivery of strategic infrastructure necessary to ensure the centre can effectively serve a local and wider subregional catchment”</i>.</p> <p>7.4 The London Plan also states that Lewisham will grow in function and population and has ‘potential’ to become a town centre of Metropolitan</p>	The approach taken in the Local Plan aligns with the findings of the Retail Impact Assessment and Town Centre Trends Study and is in conformity with the London Plan, that identifies Lewisham as a having the potential to become a Metropolitan Centre in the future.	Local Plan amended to expand upon how the town centre will evolve to become Metropolitan status.

		<p>importance. The potential for further growth at Lewisham will be supported by the arrival of the Bakerloo line at Lewisham Interchange to bring enhanced access to central London and encourage the delivery of employment, leisure, service and community uses that serve the local and sub-regional population.</p> <p>7.5 Public realm and environmental enhancements of the town centre and surrounding employment, mixed-use and residential re-developments will continue to be delivered and will assist the continued transformation of Lewisham into a high performing and vibrant retail hub with excellent leisure services.</p> <p>7.6 The Reg 18 Plan seeks to deliver this potential by aspiring to be a Metropolitan Town Centre by 2040 with the arrival of the Bakerloo line extension together with the modernisation of Lewisham Interchange.</p> <p>7.7 Landsec recognise this potential and supports Lewisham’s ‘aspiration to be a Metropolitan Centre’. However, Landsec would urge a degree of caution. The Reg 18 Plan whilst being aspirational should also be deliverable. It should reflect the London Plan’s objective of the ‘potential’ for Metropolitan status. However, due to the challenges of delivery and the structural change of town centres summarised in these submissions, the full implications for town centres are not yet fully understood thereby necessitating a degree of flexibility.</p> <p>7.8 Historically, local planning policy identified that the vision to achieve Metropolitan status was based on a requirement for considerable growth in comparison retail floorspace. This position was reached within a different retail context, namely one where the available retail evidence (published in 2009) suggested that there was substantial scope for further retail floorspace in Lewisham town centre.</p> <p>7.9 As outlined above, there has been a fundamental shift in the retail sector in recent years meaning that it is no longer the case that there is substantial capacity for further retail floorspace. Instead, there is very limited capacity (or commercial demand) for expansion of Lewisham town centre and there is an identified oversupply of retail floorspace together with substantial vacant floorspace (including in the primary shopping area). This position is not unique to Lewisham and is reflected across for town centres in London and elsewhere in the UK.</p> <p>7.10 As a result of this permanent and irreversible shift in the retail sector there is a need for Lewisham to consolidate its existing town centre offer, rather than looking for substantial expansion, if the Council’s aspiration for maintaining the viability of the town centre is to be achieved. The creation of substantial new retail floorspace when there is no demand, will simply duplicate the existing offer, diluting Lewisham’s overall offer, and will not improve the overall offer.</p> <p>7.11 The London Plan includes a historic definition of a Metropolitan Town Centre. It serves wide catchments which can extend over several boroughs and into parts of the Wider South East, typically containing at least 100,000 sqm of retail, leisure and service floorspace. The evidence</p>		
--	--	--	--	--

			<p>base for the Reg 18 Plan does not yet support such a position for Lewisham town centre in meeting the Council's objective of achieving metropolitan status. The Council's aspiration was to achieve Metropolitan Town centre status by 2026. This has now been pushed back in the Reg 18 Local Plan to 2040. At the same time the Council's town centre floorspace growth forecasts have reduced significantly over the past decade, and it is not expected that these will improve over the life of the development plan.</p> <p>7.12 Given the fundamental change in the retail sector it is necessary to rethink how Lewisham town centre moves forward over the Plan period, and how future growth can be secured. This needs to be reflected in the Reg 18 Plan. It is no longer viable or appropriate to seek to achieve Metropolitan status based purely on increasing retail floorspace within Lewisham town centre – as was the approach advocated by adopted local planning policy. In any event, such an approach is not advocated by strategic policies, or supported by the evidence base.</p> <p>7.13 The London Plan identifies that the 'potential' for Lewisham to become a town centre of Metropolitan importance is linked to its function and population. Specifically, the London Plan identifies significant residential developments around the town centre coming forward, such as Lewisham Gateway, and the arrival of the Bakerloo line at Lewisham Interchange as factors that could contribute to elevating Lewisham's status. Significantly, the London Plan does not explicitly refer to the need for additional floorspace, but the creation of a 'high performing' and 'vibrant' retail hub.</p>		
QUOD (Landsec obo - Lewisham Shopping Centre)	1 2 3 3 3	OL 01 EC 11 LCA LCA SA 01 LCA SA 02	<p>7.14 Within this context, to deliver the ambition for Metropolitan status, we consider that the following adjustments would assist the Council in the soundness of the plan making process.</p> <ul style="list-style-type: none"> - The Reg 18 Plan should conform to the London Plan and refer to the 'potential' for Metropolitan classification (OL1; EC11; Chapter 14; LCA1; LCA2). - The Reg 18 Plan should conform to the London Plan and align itself with the qualitative growth aspirations set out in paragraph 2.1.19 - further growth supported by the arrival of the Bakerloo line at Lewisham Interchange; enhanced access to central London; encourage the delivery of employment, leisure, service and community uses that serve the local and sub-regional population; public realm and environmental enhancements; surrounding employment, mixed-use and residential re-developments; the continued transformation of Lewisham into a high performing and vibrant retail hub; with excellent leisure services. - The Reg 18 Plan should refer to the need to apply the London Plan Annex 1 definition of Metropolitan Town Centre flexibly to reflect the changing nature of town centres. The forecast role and function of town centres is unlikely to relate to traditional numeric definitions of floorspace quantum's, rather one based on public transport accessibility, retail performance and vibrancy – as acknowledged in the London Plan. More floorspace is not always better as the Mayor of London reports in his 'High Streets and Town Centres Adaptive Strategies' (2019). 	Agree that the redevelopment of Lewisham Shopping Centre will act as a catalyst. The approach taken in the Local Plan is in conformity with the London Plan, that identifies Lewisham as a having the potential to become a Metropolitan Centre in the future.	Local Plan amended to expand upon how the town centre will evolve to become Metropolitan status.

			<ul style="list-style-type: none"> - The outcomes that are secured through investment in a town centre such as jobs, homes, businesses, health and wellbeing, safety, permeability, building beautiful, carbon reduction, accessibility, culture, happiness and urban greening are likely to become the new ingredients for success and ambition of potential Metropolitan status. - The Council should work with the GLA to revise the current definition of Metropolitan town centres to reflect their changing nature. There is a clear ambition to adapt, survive and thrive. - The Reg 18 Plan should support the consolidation of retail floorspace as an objective which aids vitality and viability and which can achieve the wider ambition of Metropolitan status. <p>7.15 The future of Lewisham Shopping Centre is clearly a catalyst to achieving these outcomes as the largest most central site in Lewisham town centre. Landsec is keen to work proactively with the Council in seeking to achieve the aspirations of growth in a flexible and deliverable way.</p>		
GHL (Leegate) Limited (Frank Knight obo)	2	EC 12	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Policy EC12 (Location of new town centre development) promotes a town centre approach. GHL broadly supports this approach but requests that these policies be amended to reflect the flexibility envisaged by the new Use Class E, which effectively removes the Council's ability to control changes of use within Use Class E. It is accepted that with the changes to the Use Class Order and notably through the introduction of Use Class E which permits the change of use from existing retail floorspace to other commercial uses. These changes were introduced to enable flexibility required for businesses to respond to the COVID-19 pandemic, it's impacts or benefits aren't yet fully understood in light of national lockdowns, but should be supported to maintain town centre viability and viability, alongside other 'main town centre uses'. Therefore, planning policies need to promote flexibility of land uses, and support other 'town centre uses' within Lewisham's town, district and local centres.</p>	Noted.	Local Plan amended to reflect and respond to changes to the Use Class Order, including the new Class E.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	EC 12	<p><i>EC12</i></p> <p>11.16 Whilst not directly related to the shopping centre Policy EC12 refers to demonstrating a 'need' for town centre floorspace. There is no longer any policy requirement to demonstrate need for retail and leisure proposals. The wording of Policy EC12 should be revised to reflect this.</p>	Noted.	This policy has been removed from the plan to make it more concise
Freeths LLP (K/S Lewisham obo)	2	EC 13	<p>K/S welcomes Policy EC13 relating to optimising the use of town centre land and floorspace. When assessed against this draft policy, the Site is well-suited to redevelopment to contribute towards the strategic needs of the Town Centre.</p>	Support noted.	No change.
GHL (Leegate) Limited (Frank Knight obo)	2	EC 13	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Policy EC13 (Optimising the use of town centre land and floorspace) adds that development proposals should optimise the use of land and floorspace within town centres by delivering new mixed-use schemes. GHL supports this ambition.</p> <p>Equally, while Lewisham's town, district and local centres are the main retail, leisure and recreation destinations within the borough, they face a number of significant challenges, notably the changing nature of retail that has been hastened by the COVID-19 pandemic. GHL strongly supports the continued focus of retail, leisure and recreation development within district centres. However, it should be acknowledged that successful centres in a post pandemic world will</p>	Support noted. The draft Local Plan is considered to provide sufficient flexibility for a wide range of uses to support town centre vitality and viability. It is acknowledged that changes to the plan are required to reflect new planning legislation.	Local Plan amended to reflect and respond to changes to the Use Class Order, including the new Class E.

			<p>need to be more than just retail focused with an appropriate balance struck with other town centre uses.</p> <p>GHL also supports the Council's remarks that the diversification of uses in Lewisham's town, district and local centres, including where appropriate residential development, will be encouraged. GHL welcomes the Council's reference to diversification and highlights the important role that mixed-use development will perform in the evolution of Lee Green District Centre, including the role of complementary uses in securing the vitality of the centre. These complementary uses, and other main town centre uses, will perform a key role in responding swiftly to the changing economic climate and occupier demands, ensuring the long-term vitality and viability of Lee Green District Centre.</p>		
QUOD (Landsec obo - Lewisham Shopping Centre)	2	EC 13	<p><i>EC13</i></p> <p>11.17Policy EC13 should be redrafted so that it does not apply to site allocations.</p> <p>11.18Policy EC13 'Optimising the use of town centre land and floorspace' (B) advises that proposals for new mixed-use development, including development involving the expansion, reuse or reconfiguration of existing floorspace will be considered having regard to a number of criteria. This includes the role and function of the centre, and the impact on town centre vitality and viability. The thrust of this policy is inconsistent with Government advice which recognises the need for greater flexibility in the reuse of town centre floorspace. It is also inconsistent with NPPF paragraph 86 (sequential test) and 89 (retail impact) which omits proposals which are in accordance with an up-to-date local plan. Part (B) should not apply to site allocations.</p> <p>11.19Part (C) appears overly restrictive and inflexible. National policy recognises that residential development often plays an important role in ensuring the vitality of centres, and residential development should be encouraged. Residential development should be encouraged to enhance the vitality and viability of town centres.</p> <p>11.20Within this context, we believe that draft Policy EC13 is not justified, effective or consistent with national policy, and EC13B should be deleted and re-drafted.</p>	<p>11.17 Disagree</p> <p>11.18 The plan provides sufficient flexibility for town centres and proposals will be assessed through the Development Management process on a site by site basis with reference to the relevant policies and site allocations.</p> <p>11.19 Disagree</p> <p>11.20 Disagree. We are confident that the policy is in line with national policy and provides sufficient flexibility for our town centres.</p>	No change
Barratt London and the Church Commissioners (Avison Young obo)	2	EC 14	<p><i>Relates to Part 3, LCA SA 20</i></p> <p>Draft Policy EC14 Major and District Centres</p> <p>Part G of Draft Policy E14 resists residential units at ground floor level within town centres. Whilst we are supportive of the aspiration to create active frontages at ground levels within new development blocks, we highlight that such activation should not solely be delivered through ground level retail and/or commercial floorspace. Indeed, this could also be achieved through delivering a residential use at ground level which is complementary to other uses and may be the most suitable use to be brought forward in certain instances.</p> <p>We, therefore, request that Part G of this policy be amended to set out that the acceptability of ground floor residential use would be based on an assessment and consideration of site-specific circumstances.</p>	Noted.	Policy EC14 amended to clarify that in major and district centres positive frontages should be delivered in the wider town centre area, with active ground floor frontages in the Primary Shopping Area.
GHL (Leegate) Limited	2	EC 14	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Policy EC14 (Major and District Centres) states that proposals for residential units on the ground floor level or below, both within Primary Shopping Areas and the</p>	Disagree, it is appropriate to designate the majority of Leegate	policy EC 14 has been amended to clarify that retail use only

(Frank Knight obo)			<p>wider town centre area, are inappropriate and will be strongly resisted. Annex 2 Proposed Changes to the adopted Policies Map Document (December 2020) shows that the Lewisham Local Plan Review proposes to change and increase the area of the Primary Shopping Area to include the majority of the Leegate Shopping Centre regeneration site.</p> <p>GHL welcomes the continued emphasis placed on Lewisham's town, district and local centres as the focus for future development within the borough. However, it is strongly contended that the area proposed to be allocated as a Primary Shopping Area within the Site is not justified. The increased area covers a number of existing non-retail, commercial and community uses. Therefore, the primary shopping area boundary should be amended to cover areas where retail development is and should be directed.</p> <p>Furthermore, GHL does not agree that residential units should be resisted at ground floor in the Primary Shopping Area and wider town centre area. Residential development performs an important role in securing the long-term viability and vitality of a town centre, by increasing its permanent population. The delivery of housing alongside town centre uses needs to be considered on a site-by-site basis, as to appropriate level of integration.</p> <p>As such, GHL respectfully requests that the proposed Primary Shopping Area boundary is amended to remove the areas at the Site which are not currently in retail use and that proposed Policy EC14 removes the overly restrictive policy requirement for the Primary Shopping Area and wider town centre area to allow sufficient flexibility and to ensure residential development is supported, enabling appropriate integration.</p>	<p>District Centre as a Primary Shopping Area for the following reasons:</p> <ul style="list-style-type: none"> • The town centre is currently comprised of retail mostly. • Leegate town centre is planned for comprehensive regeneration. • There is no master plan for the town centre at present. 	<p>relates to ground floor level as well as providing greater flexibility through applying a 50% threshold with regards to retail use. An updated retail study has informed this policy approach</p>
QUOD (Landsec obo - Lewisham Shopping Centre)	2	EC 14	<p><i>EC14</i></p> <p>11.21Policy EC14 'Major and District Centres' establishes policies for the Primary Shopping Areas, the locations where retail uses are concentrated. Part (C) seeks to ensure that in Lewisham major town centre, development proposals should ensure that <i>Class A1</i> (retail) uses in Primary Shopping Areas are maintained at a minimum of 50 per cent, as a proportion of all units. The policy sets out 6 exceptions to this. We would welcome clarification from the Council that this relates to ground floor units and / or floorspace. This part of the policy will also require revision to refer to the Government's Use Classes Order revision (Class E Commercial, Business and Service uses) which should replace reference to Class A1.</p> <p>11.22Part (G) of the policy stipulates that proposals for residential units on the ground floor level or below, both within the Primary Shopping Areas and the wider town centre area, are inappropriate and will be strongly resisted. Such an approach provides little flexibility in the reuse or redevelopment of underutilised or vacant floorspace, is inconsistent with the position now being adopted by Government, and the NPPF. We therefore recommend that Criterion G is removed, or excludes strategic development coming forward as part of a site allocation.</p>	Noted	<p>policy amended to clarify that retail use only relates to ground floor level and provides greater flexibility by applying a 50% threshold with regards to retail use, which has been informed by an updated retail study</p>
Tetra Tech Planning (John Lyon's Charity obo)	2	EC 16	<p>Policy EC16 should also clarify that the loss of Class A1 retail uses would also be accepted where this is supported by a Site Allocation.</p>	Noted. The Local Plan will be amended to reflect changes to planning legislation, which provide	Local Plan amended to reflect and respond to changes to the Use Class

				more flexibility for changes between Class E uses. Site allocations make provision for appropriate main town centre uses.	Order, including the new Class E.
McDonald's Restaurants Ltd (Planware Ltd obo)	2	EC 17	<p>Planware Ltd on behalf of McDonald's Restaurants Ltd Objection Response to Lewisham Local Plan Main Issues and Preferred Approaches Jan 2021 Policy EC17 – Concentration of uses</p> <p>1 Introduction</p> <p>1.1 We have considered proposed Policy EC17 Concentration of uses – with regard to the principles set out within the Framework. We fully support the policy's aim of promoting healthier living and tackling obesity. However, the proposed policy approach is unsound and fails to provide an evidence-based way of achieving the policy's objective. It has also been found unsound by several planning inspectors. It is too restrictive and prevents local planning authorities from pursuing more positive policy approaches. The London Borough of Waltham Forest has had such a policy in place for over a decade and its application has proven ineffective in tackling obesity to date.</p> <p>1.2 Within these broad points we have the following policy objections to draft Policy EC17:</p> <ul style="list-style-type: none"> A. The 400m exclusion zone is inconsistent with national planning policy B. The policy is inconsistent, discriminatory and disproportionate. C. Examination of other plans have found similar policy approaches to be unsound. D. There needs to be further exploration into policies that are more positive, have a reputable evidence base and that comply with the Framework. <p>1.3 1.3 In summary, Planware Ltd consider there is no sound justification for a policy such as Policy EC17, which imposes a blanket ban on restaurants that include an element of hot food takeaway "located at least 400 metres away from the boundary of a primary or secondary school".</p> <p>However, as stated in the opening paragraph, Planware Ltd supports the aim of promoting healthier living and tackling the obesity crisis. We acknowledge that planning can have a role in furthering these objectives. We would therefore welcome and support any studies between obesity and their relationship with development proposals, including examination of how new development can best support healthier lifestyles and tackling the obesity crisis. When a cogent evidence base has been assembled, this can then inform any appropriate policy response. This has still not emerged.</p> <p>1.5 Given the lack of any clear agreement between experts on the indices of obesity or poor health, analysing the evidence is a necessary part of this objection by way of background. This will all be highlighted in the below text.</p> <p>2 Contribution of McDonald's UK to the United Kingdom</p> <p>2.1 This section of the objection sets out some background context relating to McDonald's own business, its contribution to United Kingdom, and information</p>	Noted. The 400m exclusion away from primary and secondary schools is established by the London Plan policy E9. The additional local thresholds in town and local centres are established by the Council's adopted Development Management DPD, which are proposed to be carried over into the Local Plan. The Council considers there is sufficient evidence to merit retaining the policy.	Local Plan amended to refer to 400m exclusion zone from entrances and exits of existing or proposed primary or secondary school (rather than boundary) in accordance with the London Plan.

		<p>on the nutritional value and healthy options of the food that it offers in its restaurants. This evidence is relevant to understanding the adverse and unjustified impacts of the blanket ban approach proposed under draft Policy EC17.</p> <p>Economic and Environmental Benefits</p> <p>2.2 The first store in the United Kingdom was first opened in 1974 in Woolwich, London. The store is still opened and was interestingly the 3,000th store across the world.</p> <p>2.3 With over 36,000 McDonald's worldwide, it operates in over 100 countries and territories. Approximately 120,000 people are employed by McDonald's UK, compared to just over 1 million employees worldwide.</p> <p>2.4 McDonald's and its franchisees have become important members of communities in the United Kingdom: investing in skills and developing our people, supporting local causes and getting kids into football.</p> <p>2.5 Nationally, the company operates from over 1,300 restaurants in the UK. Over 80% of restaurants are operated as local businesses by franchisees, that's around 1,100 franchised restaurants.</p> <p>2.6 McDonald's is one of few global businesses that continues to anchor itself in high streets and town centres across the United Kingdom. Not just serving the general public but creating jobs and seeking to improve the communities around them.</p> <p>2.7 All McDonald's restaurants conduct litter picks covering an area of at least 100 metres around the site, at least three times a day, picking up all litter, not just McDonald's packaging.</p> <p>2.8 McDonald's is a founding member of the anti-littering campaign, Love Where You Live. As part of this, our restaurants regularly organise local community litter picks. The campaign has grown and in 2017, 430 events took place across the UK with around 10,000 volunteers involved. Since the campaign started, 2,600 events have taken place with around 80,000 volunteers involved.</p> <p>2.9 McDonald's restaurants are operated sustainably. For example, their non-franchised restaurants use 100% renewable energy, combining wind and solar and use 100% LED lighting which means we use 50% less energy than fluorescent lighting. All of their used cooking oil is converted into biodiesel for use by delivery lorries. Their entire fleet of lorries runs on biodiesel, 40% of which comes from McDonald's cooking oil. This creates over 7,500 tonnes fewer CO2 emissions than ultra-low sulphur diesel.</p> <p>2.10 All new McDonald's restaurants in the United Kingdom are fully accessible and we are working toward delivering this same standard for all existing restaurants.</p>		
--	--	---	--	--

		<p>2.11 McDonald's restaurants provide a safe, warm and brightly lit space for people, especially those who may feel vulnerable or threatened waiting for a taxi or outside.</p> <p>2.12 Many of their toilets are open to all members of the public. They are one of few night time premises that offer this service and given the fact restaurants are located in some of the busiest parts of the country, McDonald's are helping to keep the United Kingdom cleaner.</p> <p>Nutritional Value of Food and Healthy Options</p> <p>2.13 McDonald's offers a wide range of different food at its restaurants.</p> <p>2.14 Nutritional information is easy to access and made available online, and at the point of sale on advertising boards, as well as in tray inserts. Information is given on calorie content and key nutritional aspects such as salt, fat and sugar content. This enables an individual is able to identify and purchase food items and combinations that fit in with their individualised calorie or nutritional requirements.</p> <p>2.15 The menu offer includes a range of lower calorie options.</p> <p>2.16 The restaurants now suggest meal bundles to assist customers in making informed, healthier choices. McDonald's have suggested "favourites" meal bundles, across the breakfast and main menu that enable the choice of low-calorie options to be made even more easily. These 3-piece meal combinations will all be under 400kcal on the breakfast menu, and all under 600kcal on the main menu (with many options under 400kcal on the main menu also), and all individual items on these menu bundles will be either green (low) or amber (medium) on the Food Standards Agency traffic light system for food labelling.</p> <p>2.17 Examples of low calorie (less than 400kcal) breakfast options (where no single item is red for FSA) include any combination of the following:</p> <ul style="list-style-type: none"> • Egg & Cheese McMuffin / Egg & cheese snack wrap / bagel with Philadelphia / porridge; with fruit bag; and a medium black coffee, or espresso or regular tea or water. <p>2.18 Examples of low calorie (less than 600kcal) main menu options (where no single item is red for FSA) are included in the table below. Some 90% of our standard menu is under 500 calories.</p> <p><i>LB Lewisham officer note: a table is included in the original representation. It shows a range of lower calorie options for main meal, side options and drinks.</i></p> <p>2.19 Those specifically wanting a meal low in either fat, salt, or sugar, can tailor their choices accordingly. Any combination of menu items sold at McDonald's can be eaten as part of a calorie controlled nutritionally balanced diet. Customers alternatively eat anything from the menu allowing for this within their overall daily, or weekly nutritional requirements.</p> <p>Quality of Ingredients and Cooking Methods</p>		
--	--	--	--	--

		<p>2.20 McDonald's are always transparent about both their ingredients and their processes and strive to achieve quality. Their chicken nuggets are made from 100% chicken breast meat, burgers are made from whole cuts of British and Irish beef. Coffee is fair trade and their milk is organic. McDonald's want their customers to be assured about what they are consuming. The 'Good to Know' section on our website - https://www.mcdonalds.com/gb/en-gb/good-to-know/about-our-food.html - provides a range of information about their processes and where produce is sourced from.</p> <p>Menu Improvement and Reformulation</p> <p>2.21 McDonald's is actively and continuously engaged in menu reformulation to give customers a range of healthier options. Louise Hickmott, Head of Nutrition, at McDonald's UK, has provided a letter giving examples of the steps that have been taken in recent years. The information is summarised below.</p> <p>2.22 In recent years McDonald's has made great efforts to reduce fat, salt and sugar content across their menu.</p> <ul style="list-style-type: none"> • 89% of their core food and drink menu now contains less than 500 kcals. • Supersize options were removed from their menu in 2004; • 72% of the Happy Meal menus are classified as not high in fat, salt or sugar according to the Government's nutrient profile model; • Since October 2015, 50% of the options on the drinks fountain have been no added sugar (Diet Coke, Coke Zero and Sprite Z); • Recent years have seen the introduction of new items, offering more choice that has included porridge, salads, grilled chicken wraps, carrot sticks, fruit bags including apple and grape, pineapple sticks, and melon chunks, as well as orange juice, mineral water and organic semi-skimmed milk; • Customers can swap fries for fruit bags, carrot sticks or shake salad on the main menu, or the hashbrown for a fruit bag or carrot sticks on the breakfast menu, at no additional cost; • In 2014, McDonald's introduced "Free Fruit Fridays" resulting in 3.7 million portions of fruit being handed out. Since then, discounted fruit is now available with every Happy Meal. <p>Fat</p> <p>2.23 A recent meta-analysis and systematic review of 72 studies (45 cohort studies and 27 controlled trials) demonstrated that with the exception of Trans Fatty Acids (TFA), which are associated with increased coronary disease risk, there was no evidence to suggest that saturated fat increases the risk of coronary disease, or that polyunsaturated fats have a cardio-protective effect, which is in contrast to current dietary recommendations (Chowdrey et al, 2014).</p> <p>2.24 However, UK guidelines currently remain unchanged; men should consume no more than 30g of saturated fat per day, and women no more than 20g per day (NHS Choices, 2013). It should be remembered that all fats are calorie dense (9kcal/g) and that eating too much of it will increase the likelihood of weight gain and therefore obesity, indirectly increasing the risk of coronary heart disease, among other co-morbidities.</p> <p>2.25 What have McDonald's done?</p>		
--	--	---	--	--

		<ul style="list-style-type: none"> • Reduced the saturated fat content of the cooking oil by 83%; • Signed up to the Trans Fats pledge as part of the Government’s “Responsibility Deal”; • The cooking oil has been formulated to form a blend of rapeseed and sunflower oils to reduce levels of TFA to the lowest level possible; • They have completely removed hydrogenated fats from the vegetable oils; • Reduced the total fat in the milkshakes by 32% per serving since 2010; • Organic semi-skimmed milk is used in tea/coffee beverages and in Happy Meal milk bottles, with lower saturated fat levels compared with full fat variants. <p>Sugar</p> <p>2.26 Dietary carbohydrates include sugars, starches and fibre, and each has approximately 4kcal/g.</p> <p>2.27 The Scientific Advisory Commission on Nutrition (SACN) currently recommends that approximately 50% of total dietary energy intake should be from carbohydrates (SACN Report, 2015). In 2015 SACN recommended that the dietary reference value for fibre intake in adults be increased to 30g/day (proportionally lower in children) and that the average intake of “free sugars” (what used to be referred to as non-milk extrinsic sugars) should not exceed 5% of total dietary energy, which was in keeping with the World Health Organisation (WHO) recommendations.</p> <p>2.28 Current average intake of free sugars far exceeds current recommendations, and excess intake is associated with dental issues and excess calorie intake which can lead to weight gain and obesity.</p> <p>2.29 Over the last 10 years our reformulation work has resulted in 787 tonnes less sugar across our menu in 2017 versus 2007. What have McDonald’s done?</p> <ul style="list-style-type: none"> • Reducing the sugar in our promotional buns, this removed 0.6 tonnes of sugar. • Their Sweet Chilli Sauce has been reformulated to reduce sugar by 14% this equates to 155 tonnes of sugar removed • Their Festive Dip has removed 4 tonnes of sugar • Their famous McChicken Sandwich Sauce has reduced in sugar 45% • Their Tomato Ketchup has reduced in sugar by 20% which equates to 544 tonnes of sugar removed from the system • Their Chucky Salsa has reduced in sugar by 28% • Since 2016 they have reduced the sugar content of Fanta by 54% • The Toffee Syrup in their Toffee Latte has been reformulated to remove 20% of the sugar • McDonald’s have also reformulated their Frozen Strawberry Lemonade this has led to 8% sugar reduction per drink <p>Salt</p> <p>2.30 A number of health-related conditions are caused by, or exacerbated by, a high salt diet. The strongest evidence links high salt intake to hypertension, stroke and heart disease, although it is also linked with kidney disease, obesity and stomach cancer (Action on Salt website).</p>		
--	--	--	--	--

		<p>2.31 Salt is often added to food for either taste or as a preservative, and in small quantities it can be useful. Adults in the UK are advised not to exceed 6g of salt per day, but the average intake at a population level is consistently higher than this.</p> <p>2.32 Salt does not directly lead to obesity; however, it does lead to increased thirst, and not everyone drinks water or calorie-free “diet” beverages. If our thirst increases and leads to increased consumption of calories from extra fluid intake, then this may lead to increased weight and obesity. 31% of fluid drunk by 4-18-year-old children is sugary soft drinks (He FJ et al, 2008), which has been shown to be related to childhood obesity (Ludwig DS et al, 2001).</p> <p>2.33 What have McDonald’s done?</p> <ul style="list-style-type: none"> • The salt content across the UK menu has been reduced by nearly 35% since 2005; • Customers can ask for their fries to be unsalted; • The salt added to a medium portion of fries has been reduced by 17% since 2003; • The average Happy Meal now contains 19% less salt than in 2006 • Chicken McNuggets contain 52% less salt than in 2003. <p>2.34 The process continues. McDonald’s have recently made the following changes to further improve their menu</p> <ul style="list-style-type: none"> • Making water the default drink in the Happy Meals; • Making it easier for people to understand the existence of a wide range of under 400 and 600 calorie meal options that are available. <p>Third Party Opinions of McDonald’s</p> <p>2.35 McDonald’s regularly receive supportive comments from independent third parties.</p> <p>2.36 Professor Chris Elliott, of the Department for Environment, Food & Rural Affairs’ independent Elliott Review into the integrity and assurance of food supply networks: interim report, December 2013: <i>“Each supply chain is unique, showing that there is no single approach to assuring supply chain integrity. The review has seen many examples of good industry practice that give cause for optimism. There is not space within this final report to reference all the good industry practices but those that have stood out include McDonald’s and Morrisons.”</i></p> <p>2.37 Jamie Oliver, the TV chef, food writer and campaigner speaking in January 2016 at the Andre Simon Food & Drink Book Awards to the Press Association: <i>“Everyone always liked to poke at McDonald’s. McDonald’s has been doing more than most mid and small-sized businesses for the last 10 years. Fact. But no one wants to talk about it. And I don’t work for them. I’m just saying they’ve been doing it - 100% organic milk, free range eggs, looking at their British and Irish beef.”</i></p>		
--	--	--	--	--

		<p>2.38 Raymond Blanc, the TV chef and food writer, speaking in 2014, after having presented McDonald's UK with the Sustainable Restaurant Association's Sustainability Hero award: <i>"I was amazed. All their eggs are free-range; all their pork is free-range; all their beef is free-range. [They show that] the fast-food business could change for the better. They're supporting thousands of British farms and saving energy and waste by doing so. I was as excited as if you had told me there were 20 new three-star Michelin restaurants in London or Manchester."</i></p> <p>2.39 Marco Pierre White, TV chef and food writer, speaking in 2007: <i>"McDonald's offers better food than most restaurants and the general criticism of the company is very unfair. Their eggs are free range and the beef is from Ireland, but you never hear about that. You have to look at whether restaurants offer value for money, and they offer excellent value."</i> These comments below represent independent opinions.</p> <p>Supporting Active and Healthy Lifestyles among Employees and Local Communities</p> <p>2.40 McDonald's is focused on its people and is proud to have been recognised for being a great employer. For example:</p> <ul style="list-style-type: none"> • Great Place to Work 2017 'Best Workplaces' – McDonald's are ranked 4th on the Great Place to Work 2017 'Best Workplaces' list (large organisation). This is our 11th year on the list. • The Sunday Times Best Company to Work for List 2017 - we have made The Sunday Times 30 Best Big Companies to Work for list for the seventh consecutive year, achieving 6th position. • Workingmums.co.uk Employer Awards 2017- Innovation in Flexible Working - in November 2017, we were awarded the Top Employer for Innovation in Flexible Working by workingmums.co.uk. The judges specifically recognised our approach to Guaranteed Hours contracts. • The Times Top 100 Graduate Employers - the Times Top 100 Graduate Employers is the definitive annual guide to Britain's most sought after employers of graduates. • Investors in People Gold - Investors in People accreditation means we join a community of over 15,000 organisations across 75 countries worldwide and it is recognised as the sign of a great employer. • School leavers Top 100 Employers - McDonald's UK has been certified as one of Britain's most popular employers for school leavers in 2017, for the third consecutive year. An award voted for by 15-18 year olds in the UK. <p>2.41 In April 2017, McDonald's began to offer employees the choice between flexible or fixed contracts with minimum guaranteed hours. This followed trials in 23 restaurants across the country in a combination of company owned and franchised restaurants. All of their employees have been offered this choice and around 80% have selected to stay on flexible contracts.</p> <p>2.42 Over the past 15 years, McDonald's has been proud partners with the four UK football associations: The English Football Association; The Scottish Football Association; The Football Association of Wales; and The Irish Football Association.</p>		
--	--	---	--	--

		<p>2.43 This partnership has seen them support over one million players and volunteers. In London since 2014, more than 1,000 people have attended their Community Football Days and have distributed 3,328 kits to accredited teams in the Capital. Of the 171 McDonald's restaurants within the M25, approximately 88 are twinned and actively supporting a local football club. This serves as an example of the company's willingness to confront the obesity crisis by a multitude of different approaches.</p> <p>2.44 McDonald's do this work because increasing standards will ultimately create a better experience for young footballers, leading to increased participation and retention of children and young people in sport.</p> <p>2.45 Their Community Football programme helps to increase participation at all levels. McDonald's remain absolutely committed to it and are in the final stages of planning a new programme for future years.</p> <p>Marketing</p> <p>2.46 As a business, McDonald's are committed to ensuring their marketing will continue to be responsible and will be used as a positive influence to help our customers make more informed choices.</p> <p>2.47 McDonald's recognise that marketing has a part to play in influencing customers' choices. They comply, and go beyond, the UK's stringent regulations on marketing to children and use their marketing to help families understand more about the range of food options they have to offer.</p> <p>2.48 McDonald's never market products classified as high in fat, salt or sugar to children in any media channel, at any time of the day. They are committed to ensuring that marketing is always responsible as well as informative, and that it reinforces positive food messages.</p> <p>2.49 In addition, they go beyond the regulations in a lot of cases. For example, when advertising a Happy Meal, they only ever do so with items such as carrot sticks, a fruit bag, milk or water to ensure McDonald's are not marketing HFSS food to children. This has been done voluntarily since 2007.</p> <p>Summary</p> <p>2.50 In the light of the above it is clear that McDonald's restaurants offer the district considerable and substantial economic benefits, are supportive of active and healthy lifestyles. They also enable customers to make informed, healthy decisions from the wide-ranging menu options available. It is important that this is acknowledged, given the assumption in proposed Policy EC17, that all hot food takeaways uses should fall under a blanket ban if within 400m of the boundary of a primary or secondary school. Given the policy aim – which McDonald's supports – of promoting healthier lifestyles and tackling obesity, other alternatives would be more effective than allowing blanket bans in school areas, which in turn will have negative land use consequences.</p> <p>We turn now to the main points of the objection.</p>		
--	--	---	--	--

		<p>3 The 400m Exclusion Zone is Inconsistent with National Policy</p> <p>Introduction</p> <p>3.1 This section of the objection considers the proposed policy against national policy. The lack of evidence to support the policy is also discussed in the next section.</p> <p>3.2 National policy contains no support for a policy approach containing a blanket ban or exclusion zone for hot food takeaways (or indeed any other) uses. Such an approach conflicts sharply with central planks of Government policy such as the need to plan positively and support economic development, and the sequential approach that seeks to steer town centre uses – which include hot food takeaways - to town centres.</p> <p>3.3 Planware Ltd feel that restricting hot food takeaways within 400m of the boundary of a primary or secondary school is in direct conflict with the framework as the approach is not positive, justified, effective or consistent. The policy, as currently worded, provides no flexibility in accordance with town centre sites, thus conflicting with the sequential approach. These points are further explained in this objection.</p> <p>Practical Impacts</p> <p>3.4 The practical impacts on a 400m exclusion zone from the boundary of a local primary or secondary school would have unacceptable negative land use consequences.</p> <p>3.5 Consideration should be given to school rules in terms of allowing children outside of the school grounds at lunch times. This is overly restrictive on secondary schools, where a some of pupils will be legally classed as an adult and have access to a car. Additionally, primary school children are unlikely to be unsupervised before and after school and do not have access outside of school at lunchtimes.</p> <p>3.6 No consideration is given to how the 400m is measured from the boundary. Guidance should be provided as to whether this is a straight line or walking distance, as this can vary greatly.</p> <p>3.7 The Framework does not support the use of planning as a tool to limit people’s dietary choices. In addition to this, other E class uses can provide unhealthy products, therefore, there is limited justification for the proposed Policy EC17 to focus exclusively upon hot food takeaways.</p> <p>Conflict with National Policy</p> <p>3.8 The local policy team do not appear to have fully assessed the potential impact of the policy. It essentially creates a moratorium against hot food takeaways uses leaving limited reasonable space for them to locate.</p> <p>3.9 Restricting the location of new hot food takeaway proposals through a 400m exclusion zone is not a positive approach to planning, thus failing to comply with the Framework.</p>		
--	--	--	--	--

		<p>3.10 The suggested restriction within proposed Policy EC17, takes an ambiguous view of hot food takeaways in relation to the proximity to all primary and secondary schools. The policy would apply an over-generic approach to restrict hot food takeaway development with little sound planning reasoning or planning justification. This is contrary to paragraph 11 of the Framework that advises authorities to positively seek opportunities to meet development needs of their area.</p> <p>3.11 Thus, is consistent with paragraph 80-81 of the Framework.</p> <p>3.12 Para 80 states: <i>“Planning policies and decisions should help create the conditions in which businesses can invest, expand and adapt. Significant weight should be placed on the need to support economic growth and productivity, taking into account both local business needs and wider opportunities for development. The approach taken should allow each area to build on its strengths, counter any weaknesses and address the challenges of the future.”</i></p> <p>3.13 Para 81 states: Planning policies should: <i>“a) set out a clear economic vision and strategy which positively and proactively encourages sustainable economic growth, having regard to Local Industrial Strategies and other local policies for economic development and regeneration; b) set criteria, or identify strategic sites, for local and inward investment to match the strategy and to meet anticipated needs over the plan period; c) seek to address potential barriers to investment, such as inadequate infrastructure, services or housing, or a poor environment; and d) be flexible enough to accommodate needs not anticipated in the plan, allow for new and flexible working practices (such as live-work accommodation), and to enable a rapid response to changes in economic circumstances.”</i></p> <p>3.14 As explained in this objection, there is a lack of evidence to demonstrate the link between fast food, school proximity and obesity. The need for evidence is emphasised in paragraph 31 of the Framework that states that each local plan should be based on adequate, up-to-date and relevant evidence. Neither the policy nor the supporting text address this point. Policy needs to be based on evidence and the lack of evidence should highlight a red flag concerning the draft policy.</p> <p>3.15 The policy is likely to be damaging to the district’s economy due to the fact that it is restricting hot food takeaways to an unprecedented level without regard to the local area or the economy.</p> <p>3.16 The Framework cannot be interpreted to provide generic restrictions on a particular use class. There is no basis for such a blanket ban approach in the Framework or Planning Practice Guidance. In fact, the Planning Practice Guidance emphasises that planning authorities should look at the specifics of a particular proposal and seek to promote opportunity rather than impose blanket restrictions on particular kinds of development. In the section on “Health and Wellbeing”:</p>		
--	--	---	--	--

		<p>3.17 Paragraph: 002 (Reference ID: 53-002-20140306) states that in making plans local planning authorities should ensure that: <i>“opportunities for healthy lifestyles have been considered (eg. planning for an environment that supports people of all ages in making healthy choices, helps to promote active travel and physical activity, and promotes access to healthier food, high quality open spaces, green infrastructure and opportunities for play, sport and recreation);”</i></p> <p>3.18 Paragraph: 006 (Reference ID: 53-006-20170728) says that a range of criteria should be considered, including not just proximity to schools but also wider impacts. It does not support a blanket exclusion zone. Importantly, the criteria listed are introduced by the earlier text which states: <i>“Local planning authorities can have a role in enabling a healthier environment by supporting opportunities for communities to access a wide range of healthier food production and consumption choices.”</i></p> <p>3.19 The above guidance serves to emphasise why it is important to look at particular proposals as a whole, rather than adopting a blunt approach that treats all proposals that include a Sui Generis use as being identical</p> <p>4. The Policy is Inconsistent, Discriminatory and Disproportionate</p> <p>4.1 The policy aims to address obesity and unhealthy eating but instead simply restricts new development that comprises an element of Sui Generis use. Yet Class E retail outlets and food and drink uses can also sell food that is high in calories, fat, salt and sugar, and low in fibre, fruit and vegetables, and hot food from a restaurant unit can be delivered to a wide range of locations, including schools. This means that the policy takes an inconsistent approach towards new development that sells food and discriminates against operations with an Sui Generis use. It also means that the policy has a disproportionate effect on operations with an Sui Generis use.</p> <p>4.2 The test of soundness requires that the policy approach is “justified”, which in turn means that it should be the most appropriate strategy when considered against the reasonable alternatives and based on proportionate evidence (paragraph 35 of the Framework).</p> <p>4.3 Given the objectives of the policy, it ought to apply equally to all relevant food retailers. It is unclear how the policy would be implemented and work in a real life scenario.</p> <p>4.4 The table below shows the kind of high calorie, low nutritional value food that can be purchased from a typical A1 high street retailer at relatively low cost. It is contrasted with the kind of purchase that could be made at a McDonald’s.</p> <p><i>LB Lewisham officer note: a table is included in the original representation. It shows high calorie food that can be purchased at a high street retailer.</i></p>		
--	--	--	--	--

		<p><i>LB Lewisham officer note: Appendix 1 Food in the School Fringe Tends to be Purchased in Non-Hot Food Takeaway Properties is included in the original representation. It provides evidence that confirms that 70% of purchases by students in the school fringe were not purchased in a hot food takeaway.</i></p> <p>4.5 If the policy is to be based on Use Classes, then the proposed policy should place restrictions on other use classes in addition to hot food takeaways. In fact, by restricting hot food takeaway uses only, the policy would encourage food purchases at other locations and allows for the overarching objectives to be compromised.</p> <p>4.6 Finally, it is important that for the majority of days in the year (weekends and school holidays combined) schools are not open at all. Research by Professor Peter Dolton of Royal Holloway College states that “At least 50% of the days in a year kids don’t go to school if we count weekends and holidays and absence. They are only there for 6 hours and all but 1 are lessons. So only around 2-3% of the time can [children] get fast food at school.”</p> <p>4.7 For the minority of the year when schools are open, it is important to recognise that many schools have rules preventing children from leaving the school grounds during the school day, and in any event proximity to schools has no conceivable relevance outside of the particular times when children are travelling to or from school in circumstances where their route takes them past the development proposal.</p> <p>4.8 The policy’s blanket approach fails to acknowledge that the opportunity for children to access hot food takeaways, as part of a school day, is extremely limited. The complete ban is wholly disproportionate to the circumstances when the concern underlying the policy might become a more prominent matter.</p> <p><i>LB Lewisham officer note: Appendix 2 Food Purchases made on School Journeys is included in the original representation. It shows that limited purchases of food are made at hot food takeaways on journeys to and from school.</i></p> <p>5 The Policy is not Justified because of a Lack of an Evidence Base</p> <p>5.1 The test of soundness requires policy to be evidence based. There is no evidence of any causal link between the presence of hot food takeaways within 400m of the boundary of a local primary or secondary school. Also, with no basis to indicate over-concentrated areas gives rise to obesity or poor health outcomes, justification is evidently incomplete. In fact, the studies that have considered whether such a causal connection exists [between proximity of a hot food takeaway and poor health outcomes], have found none.</p> <p>5.2 Public Health England (PHE), which is part of the Department of Health and Social Care, expressly accept that the argument for the value of restricting the growth in fast food outlets is only “theoretical” based on the “unavoidable lack of evidence that can demonstrate a causal link between actions and outcomes.”</p>		
--	--	--	--	--

		<p>5.3 A systematic review of the existing evidence base by Oxford University (December 2013), funded by the NHS and the British Heart Foundation ‘did not find strong evidence at this time to justify policies related to regulating the food environments around schools.’ It instead highlighted the need to ‘develop a higher quality evidence base’.</p> <p>5.4 The range of US and UK studies used to support many beliefs about obesity, including the belief that the availability of fast food outlets increased obesity, was comprehensively reviewed in papers co-written by 19 leading scientists in the field of nutrition, public health, obesity and medicine. Their paper “Weighing the Evidence of Common Beliefs in Obesity Research” (published in the Critical Review of Food, Science and Nutrition (Crit Rev Food Sci Nutr. 2015 December 6; 55(14) 2014-2053) found that the current scientific evidence did not support the contention that the lack of fresh food outlets or the increased number of takeaway outlets caused increase obesity (see pp16-17 of the report).</p> <p>5.5 There appears to have been no critical assessment of whether the underlying evidence supports the proposed policy approach.</p> <p>5.6 In this context, it is important to consider the evidence from the Borough of Waltham Forest, which introduced a school proximity policy in 2008 – about a decade ago. Over that period, the Public Health England data for the borough shows that there has been no discernible impact on childhood obesity rates – with these worsening in recent years. The borough’s Health Profile for 2017 records childhood obesity (year 6) at 26.1% up from 20.3% in 2012, the year London hosted the Olympic Games.</p> <p>5.7 While it is accepted that the causes of obesity are complex, it is clear that the school exclusion zone policy had no discernible effect in Waltham Forest. More research and investigation is needed before such a policy approach can be justified by evidence.</p> <p>6 Similar Policies Have Been Found Unsound When Promoted in Other Plans</p> <p>6.1 The lack of evidence between proximity of takeaways to local schools and its impact on obesity has been confirmed in a number of planning decisions.</p> <p>6.2 In South Ribble the Planning Inspectorate raised concerns about a similar 400m school proximity restriction on fast food, stating ‘the evidence base does not adequately justify the need for such a policy’, and due to the lack of information, it is impossible to ‘assess their likely impact on the town, district or local centres’.</p> <p>6.3 Similarly, research by Brighton & Hove concluded that ‘the greatest influence over whether students choose to access unhealthy food is the policy of the individual schools regarding allowing students to leave school premises during the day’.</p> <p>6.4 The recent Inspectors response to the London Borough of Croydon (January 2018) regarding a similar prohibition on hot food takeaways, (where a similar campaign to persuade takeaway proprietors to adopt healthy food options</p>		
--	--	---	--	--

		<p>existed) confirmed that the councils own 'healthy' plans would be stymied by the proposed policy, as would purveyors of less healthy food. The policy failed to distinguish between healthy and unhealthy takeaway food, and "confounds its own efforts to improve healthiness of the food provided by takeaway outlets" and failed to "address the demand for the provision of convenience food". The Inspector concluded that because the reasons for the policy do not withstand scrutiny, they must be regarded as unsound.</p> <p>6.5 The inspector at Nottingham City Council stated "<i>There is insufficient evidence to support the link between childhood obesity and the concentration or siting of A3, A4 and A5 uses within 400m of a secondary school to justify the criterion of policy LS1 that proposals for A3, A4 and A5 uses will not be supported outside established centres if they are located within 400m of a secondary school unless it can be clearly demonstrated that the proposal will not have a negative impact on health and well-being the criterion and justification should therefore be deleted/amended</i>".</p> <p>6.6 The inspector at Rotherham stated "<i>Policy SP25 sets out various criteria against which proposals for hot food takeaways will be assessed. One of the criteria is designed to prevent hot food takeaways within 800 metres of a primary school, secondary school or college when the proposed site is outside a defined town, district or local centres. Having carefully considered the material before me and the discussion at the Hearing I do not consider there is sufficient local evidence to demonstrate a causal link between the proximity of hot food takeaways to schools and colleges and levels of childhood obesity. Although I accept that levels of childhood obesity need to be tackled by both local and national initiatives I do not consider there are sufficient grounds at the present time to include this particular aspect of land use policy in the RSPP</i>".</p> <p>6.7 In Guildford, the inspector stated "<i>Finally, the submitted Plan contains a requirement common to Policy E7 Guildford town centre, E8 District Centres and E9 Local Centres and isolated retail units that resists proposals for new hot food takeaways within 500 metres of schools. However, the evidence indicates that childhood obesity in Guildford is lower than the average for England. Childhood obesity may be a product of a number of factors, not necessarily attributable to takeaway food; takeaways often sell salads as well as nutritious foods; not all kinds of takeaway food are bought by children; children have traditionally resorted to shops selling sweets and fizzy drinks, which would be untouched by the policy; and the policy would have no bearing on the many existing takeaways. In this context there is no evidence that the requirement would be effective in safeguarding or improving childhood health. It would be an inappropriate interference in the market without any supporting evidence and would therefore be unsound</i>".</p> <p>6.8 The proposed 400m school exclusion zone and restriction of hot food takeaways developments in 'over-concentrated areas are two policies that we cannot agree to. The proposed approach is in direct conflict with the Framework. As mentioned in the above text, there is enough reputable information to demonstrate a current evidence base that fails to demonstrate the link between fast food and school proximity. There is also a clear absence of evidence to suggest restricting hot food takeaway use in 'over-concentrated' outside of town</p>		
--	--	--	--	--

		<p>and district centres will lead to healthier lifestyles or influence an individual's dietary choice.</p> <p>7 Alternative Approaches</p> <p>7.1 Planware Ltd considers there is no sound justification for point C of the proposed Policy EC17 which imposes commercial restrictions on restaurants that include an element of hot food takeaways within a 400m radius from a primary or secondary school. Point C should therefore be removed to provide consistency and to abide by the Framework.</p> <p>7.2 Planware Ltd would welcome and support proposals for a wider study of the causes of obesity and their relationship with development proposals, including examination of how new development can best support healthy lifestyles and the tackling of obesity. When a cogent evidence base has been assembled, this can then inform an appropriate policy response. That time has not yet been reached.</p> <p>7.3 It is considered until such a time has been reached, point C should be removed.</p> <p>8 Conclusion</p> <p>8.1 McDonald's supports the policy objective of promoting healthier lifestyles and tackling obesity. It does not consider that the proposed Policy EC17 is a sound way of achieving those objectives. The underlying assumption in the policy is that all hot food takeaways (and any restaurants with an element of takeaway use) are inherently harmful to health. In fact, this is not supported by evidence. McDonald's own business is an example of a restaurant operation which includes takeaway but which offers healthy meal options, transparent nutritional information to allow healthy choices, and quality food and food preparation. The business itself supports healthy life styles through the support given to its staff and support given to football in the communities which the restaurants serve.</p> <p>8.2 In addition, the policy fails to acknowledge the wider benefits that restaurants can have, including benefits relevant to community health and wellbeing. McDonald's own business is an example of a restaurant operation that supports sustainable development through the use of renewable energy, the promotion of recycling, the use of energy and water saving devices. The economic benefits of its restaurants in supporting town centres and providing employment opportunities and training are substantial, and important given that improved economic circumstances can support improved health.</p> <p>8.3 The policy fails to acknowledge that food choices which are high in calories and low in nutritional value are made at premises trading with Class E consents and can be delivered from the latter. The policy makes no attempt to control these uses.</p> <p>8.4 For the reasons given in this objection the proposed policy is very clearly inconsistent with government policy on positive planning, on supporting economic development and the needs of businesses, on supporting town centres, and on the sequential approach. There is no justification in national</p>		
--	--	---	--	--

			<p>policy for such restrictions to be applied to hot food takeaways. The effect of the policy had it existed in the past would have been to exclude restaurants such as McDonald's from major commercial and tourist areas.</p> <p>8.5 For the reasons given in this objection the proposed policy lacks a credible evidence base, and similar policies have been found to be unsound by inspectors who have examined other plans. In the one London Borough that has had a similar policy, concerning a school exclusion zone, for around a decade (LB Waltham Forest). It has had no discernible effect on obesity levels, which have in fact increased since its introduction.</p> <p>8.6 Given the overall objective of improving lifestyles and lowering obesity levels, restrictive policy regarding hot food takeaway development is a narrow-sighted approach. There is no mention of other possible reasons behind the national high levels of obesity. To discriminate against hot food takeaways alone is worrying and using the planning system to influence people's daily lifestyle choices is not acceptable.</p>		
Cockpit Arts (The Planning Lab obo)	2	EC 18	<p><i>Relates to Part 3, LNA SA 14</i></p> <ul style="list-style-type: none"> • CA is supportive of policy that recognises and seeks to protect and enhance creative and cultural uses within the borough. • We consider it vitally important to preserve and enhance the existing, distinctive cultural activities in Lewisham through <i>meaningful</i> designation of the Cultural Quarters. This represents an opportunity for Lewisham to retain and develop its rich cultural and creative identity, so much of which has been lost elsewhere in London; and support a meaningful legacy of its status as Borough of Culture 2022. • We strongly support the statement that "Cultural Quarters include Locally Significant Industrial Sites and it is vital that the functional integrity of the LSIS is secured and not compromised. • We endorse the protection the policy confers to creative (<i>not just</i>) arts-led institutions as development takes place around them and as they consider their own development. 	Support noted.	No change.
Tetra Tech Planning (John Lyon's Charity obo)	2	Chapter 06 EC 18	<p>Part Two – Managing Development</p> <p>Do you agree with the broad topic areas proposed to be covered in Part 2: Managing Development?</p> <p>Yes, the topic areas cover the key themes for any Local Authority in producing its Local Plan, however we consider that "Culture" should be dealt with alongside Heritage and not within the Economy topic.</p> <p>Heritage</p> <p>Do you agree that the Local Plan has identified all of the issues around heritage?</p> <p>A more comprehensive approach to Heritage would be to include those policies related to "Culture" (Policies EC18-EC22) within this topic area.</p>	Noted. It is acknowledged that there is overlap within the plan and some policy topic areas are cross-cutting, such as culture. However it has been included in the EC chapter for organisational purposes. The Local Plan should be read as a whole.	No change.
GHL (Leegate) Limited (Frank Knight obo)	2	EC 19	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Policy EC19 (Public houses) sets out a presumption in favour of the retention of public houses in Lewisham, consistent with London Plan Policy DC7 (Protecting public houses). The policy adds that development proposals involving the replacement or re-provision of a public house must ensure the replacement facility is of comparable character and quality as the existing public house and has an appropriate amount and configuration of floorspace to enable the continued viability of the public house. The supporting policy text states where</p>	Noted. Disagree. The Council considers that evidence should be provided to demonstrate that options to retain the existing public house in-situ have been considered prior to proposing a replacement	No change.

			<p>sites are redeveloped (including through comprehensive redevelopment), the priority is to retain pubs and keep them in situ.</p> <p>GHL recognises the need to protect public houses in London. However, it should be recognised that there will be instances where replacement or re-provision of a pub is necessary, and as long as the replacement facility is provided to ensure continued social, economic, or cultural viability and vitality will be retained, there should be no requirement to demonstrate that options have been considered to retain the pub in-situ. Clarification is sought on this approach.</p>	<p>facility. The policy is considered to provide sufficient flexibility to enable development to come forward where retention cannot be feasibly met.</p>	
Tavern Propco (Savills obo)	2	EC 19	<p><i>Relates to Part 3, LSA SA 11</i></p> <p>Emerging Policy EC19: Public Houses</p> <p>Emerging policy EC19 limits the loss of a public house that has heritage, economic, social or cultural value to the community, including through change of use or redevelopment, unless there is robust and authoritative evidence to demonstrate otherwise. Part A subsection (b) of this emerging policy requires redevelopment proposals to demonstrate that:</p> <p><i>“The public house is not financially viable and there is no reasonable prospect of the premises remaining in this use, or an alternative community use, in the foreseeable future as evidenced through attempts at different business models and management, and an active marketing exercise of a minimum continuous period of three-years”.</i></p> <p>Tavern Propco is supportive of the Council’s commitment to the protection and retention of public houses within Lewisham. However, it is considered that the restrictive and onerous nature of emerging Policy EC19 is incompatible with the post Covid-19 high street and viability of public houses.</p> <p>As the high street begins to recover from the effects of the Covid-19 Pandemic, the high street will go through a period of consolidation and rationalisation. This has already been seen, with some shops, retailers, restaurants and pubs not re-opening, or assessing their longer-term viability. As a result of the pandemic and the long period of closure, it is unfortunate that some pubs have already become or about to become unviable. Therefore, despite marketing attempts, the viable use of some pubs will never be achieved. Therefore, it is considered that the requirement for an active marketing exercise of three years is overly onerous and will leave pubs on the high street empty and falling into disrepair reducing the ability for certain pub sites to come forward for suitable redevelopment.</p> <p>Requested Amendment: Emerging Policy EC19 requires a minimum continuous marketing exercise of three years before an alternative use of the site can come forward. It may become apparent that another use of public house building could successfully and viably operate within these premises. In order to assist and accelerate the recovery of the High Street, it is requested that LBL amend Policy EC19 by removing the minimum marketing period for public houses of three years.</p>	<p>The Council considers that the marketing requirement whilst rigorous is proportionate given the policy objectives around the retention of public houses, evidence of loss of public houses over the years, and recognition they are community infrastructure in accordance with national planning policy.</p>	No change.
Artworks Creekside (Avison Young obo)	2	EC 19	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy EC19 – Public houses</p> <p>Artworks Creekside has reviewed the draft Policy EC19 and notes that there is a presumption in favour of retention of public houses. The proposals retain the public house and any future planning application will be accompanied by robust</p>	<p>Noted. Disagree that Policy EC17.C should be deleted. However amendments will be made to ensure the policy regarding replacement facilities the</p>	<p>Local Plan policy EC17.C amended to make clear the focus is on high quality design and responding positively to local character.</p>

			<p>evidence on the viability of the current and future pub operation. The Birds Nest PH is a locally listed building – commentary is provided on the associated Policy elsewhere – and the Council’s requirement to ensure that development does not detract from the character and appearance of the building is noted.</p> <p>Policy EC19.C is noted and the requirement to provide an appropriate amount and configuration of floorspace to enable the continued viability of the public house is supported. However, the requirement to ensure the replacement facility is of a comparable character and quality is questioned, given that such an assessment is a subjective judgement against which no measurement can be made in planning terms. It is suggested that this is omitted.</p> <p>The post-amble has been reviewed and it appears inconsistent with the policy requirements. The post-amble notes that ‘<i>proposals will be required to demonstrate that they have considered all reasonable options for retaining the pub in situ</i>’. This is not part of the Policy. Only the loss of public house through the change of use or redevelopment has this requirement. The post-amble should be revised accordingly.</p> <p>Artworks Creekside note the commentary about marketing evidence requirement that are expected to be appended to the Local Plan and suggest that this should be applied only where the public house use is being lost, and not where the public house is being re-provided.</p>	<p>focus is on high quality design rather or ‘comparable character and quality’. This will address uncertainties and ambiguity around the implementation of the policy.</p> <p>Appendix amended to provide that flexibility on market requirements may be applied on a case by case basis.</p>	
GHL (Leegate) Limited (Frank Knight obo)	2	EC 20	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Lastly, Policy EC20 (Markets) remarks that development proposals should protect and seek to enhance existing markets and that all proposals for markets and market space must demonstrate that there will not be an unreasonable adverse impact on the amenity of adjoining and neighbouring properties, or have a detrimental effect on the functioning of the local road network. As much as GHL supports the principle of this policy, it is unclear as to what is defined as an ‘existing market’. If markets used to exist, but haven’t done so for years, is there justification to re-provide a market. Clarification is sought on this approach.</p>	Noted. Agreed that clarification will be useful.	Local Plan policy amended to clarify markets include those that are authorised or licenced for use.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	EC 20	<p>Markets</p> <p>11.23Draft policy EC20 ‘Markets’ seeks to protect and seek to enhance existing markets. Proposals for new markets or market space should be directed to appropriate town centre locations. Proposals for new development affecting existing markets within town centres will only be considered having regard to demonstrable demand and the impact on town centre vitality and viability. Landsec are supportive of this policy.</p>	Support is noted.	No change.
The Renewal Group (Carney Sweeney obo)	2	EC10 – EC17	<p><i>Relates to Part 3, LNA SA 08</i></p> <p>Policies EC10 – EC17 Town Centre Policies</p> <p>These policies need to be updated to have regard to the new Use Classes Order especially in relation to the new Use Class E and the imminent amended permitted development rights later this year. The Inspector considering the Westminster Local Plan in 2020 made clear the importance of this.</p>	Noted.	Local Plan has been amended to accord with changes to the Use Classes Order and permitted development rights.
QUOD (Landsec obo - Lewisham Shopping Centre)	-	Retail Evidence Base	<p><i>LB Lewisham officer note: Chapter 5 of the submitted response provides an in-depth analysis of the retail capacity needs of Lewisham Town Centre and a review of the retail evidence base.</i></p>	Following the Regulation 18 Consultation, the Council and Litchfields has prepared a	Local Plan amended to take account of the changes arising in town centres from the new Use Class E.

		<p>5.60 Although the Council published updated retail evidence in September 2019 (the LRCSU) to inform the Reg 18 Plan, there are substantial concerns regarding the robustness of the assessment undertaken.</p> <p>5.61 The LRCSU relies on a household telephone survey undertaken in November 2015. Such survey evidence is over five years old and fails to provide an up-to-date understanding of existing shopping patterns in the local area, or a robust basis to understand future retail capacity requirements, including those being promoted in the Reg 18 Plan. Given the age of the survey evidence only limited weight can be given to the findings of the LRCSU.</p> <p>5.62 Notwithstanding our concerns regarding the robustness of the survey evidence, the LRCSU relies on population and expenditure data published in 2015 and 2018 respectively. This data was published before the ongoing COVID-19 pandemic, which has accelerated the previously forecast fundamental shift in retailing, led largely by the growth of online shopping.</p> <p>5.63 A simple update of the LRCSU demonstrates that applying the latest data now available, this substantially reduces the retail capacity for additional floorspace in Lewisham town centre, particularly for comparison goods. Indeed, this assessment identifies there to be an oversupply of retail floorspace in the Town Centre, together with a high level of vacant floorspace.</p> <p>5.64 Central Government has recognised the need for flexibility due to the decline of the retail sector through the introduction of the new Class E use class, and proposals in respect of permitted development in relation to allowing the change of use from retail to residential without the need for planning permission.</p> <p>5.65 The recognised shift in the retail sector has major implications for retail town centres, and one that should be reflected by local planning policy in order to ensure that the Council’s approach to town centres is effective and justified.</p> <p>Future Leisure Needs</p> <p>5.66 Whilst the LRCSU provided revised retail capacity figures, this did not provide an up-to-date assessment of future leisure needs. As such, the most up-to-date assessment of future retail needs remains the Lewisham Retail Capacity Study 2017.</p> <p>5.67 The 2017 Study identified that there was an absence of a large multiplex cinema in the Borough, and that Lewisham town centre should be the focus for this (now proposed at Lewisham Gateway). The Study also concluded that Lewisham town centre is under provided for in terms of other commercial leisure uses, in particular the food and beverage (‘F&B’) sector.</p> <p>5.68 Like the retail sector, the commercial leisure sector is also going through transitional change even before the impact of the COVID-19 pandemic. As such demand continues to be limited.</p> <p>Office Development</p>	<p>Retail Impact Assessment and Town Centre Trends Study in response to considerable feedback on the draft Local Plan (Regulation 18) document concerning future retail demand and the changing nature of town centres. The findings have fed into the Local Plan.</p>	
--	--	---	--	--

			<p>5.69 National planning policy requires local planning authorities to assess future need for office floorspace, which is also identified as a main town centre use.</p> <p>5.70 The Reg 18 Plan (para, 2.16) identifies a requirement for up to 21,800 sqm (net) of additional employment (office) floorspace in the Borough by 2038. This floorspace requirement has been derived from the Lewisham Employment Land Study (March 2019) prepared by CAG Consultants.</p> <p>5.71 Landsec would like to work with the Council to understand how this requirement has been affected by the COVID-19 pandemic, and its specific implications for Lewisham Town Centre.</p>		
L&Q Group	2	Section 9	<p><i>Relates to Call for site</i></p> <p>4.2 Community Infrastructure L&Q is supportive of the flexible approach to delivering community infrastructure that is being proposed, which allows for both on-site provision and / or financial contributions where appropriate.</p>	Support noted.	No change.
Tetra Tech Planning (John Lyon's Charity obo)	2	Chapter 09	<p>Community Infrastructure Do you agree that the Local Plan has identified all of the issues around community infrastructure?</p> <p>No comments.</p>	Noted.	No change.
Albacore Meeting Room Trust (Lichfields obo)	- 2	Summary Document CI 01	<p><i>Relates to Call for site</i></p> <p>Community Use Needs and Benefits The Council's 'Summary Document' on Community Infrastructure¹ indicates that LBL residents have voiced concerns via the local plan review process regarding the existing poor condition and possible closure of some older community facilities in Lewisham Borough as well as concerns regarding whether there will be sufficient community facilities (such as surgeries and schools) to meet extra demand as the borough grows.</p> <p>In the document, the Council recognises that Lewisham's projected population growth will create extra demands for community facilities and services (including education, health and social care), which will need to be managed. The Council intend to prepare an Infrastructure Delivery Plan to identify and monitor needs in the Borough and ensure these are provided in the right places and also intend to ensure the Borough's needs for such uses are met via making the best use of existing facilities but also via and securing and providing high quality new facilities.</p> <p>As part of this review and preparation of evidence base documents, the Council will need to consider appropriate and sustainable sites to meet identified needs. The Brethren Meeting Hall site is suitable and available to meet identified community needs and offer associated substantial benefits to the Local Community.</p> <p>It is also relevant to consider the GLA's Stage 12 report on the Citygate Church Application for demolition of the vacant place of worship and creation of new church space and associated development on the site. The GLA officers note the</p>	The supplementary information is noted. Our response to the call for site for Brethren Meeting Hall is set out at the back end of this table.	No change

			<p>proposed building to be materially larger than the existing building on the site given it seeks to increase the building footprint and height that is permitted (see table at paragraph 24 of the Stage 1 report). The assessment is therefore made in context of the proposal being inappropriate development within the MOL that requires demonstration of 'Very Special Circumstances'.</p> <p>However, sections of the GLA report are relevant to the 'Exceptional Circumstances' case for removing the Brethren Meeting Hall site from the MOL for community uses. The GLA supports the replacement and enhancement of social infrastructure on the site. Officers consider the key benefits of the Citygate proposal would be: provision of a secured connection for adjacent Sedgehill School children to the playing fields across the site to avoid travelling along the main road; the community use of the building; and, potential improvement to the MOL via enhancing soft landscaping on site.</p> <p>The GLA support the intention to provide for community uses on the site, in line with Policy S1 of the London Plan, and paragraph 5.1.11 which states that that voluntary and community groups often find it difficult to find premises suitable for their needs. In this context, the GLA ask for elements of the community use proposed, including availability for use by the adjacent school for large events and other community groups, to be secured by legal agreement in order to secure the benefit to the local community.</p> <p>In particular, the GLA support the part of Citygate's VSC case which identifies there to be a lack of alternate options available for the development (i.e. of this size, type and location). The GLA recognises Citygate's case that the community use cannot compete for other urban sites given the size of the site required for its purposes and the more competitive prices that urban land would generate for this community use. In their assessment, the GLA acknowledge that <i>"the existing site is vacant and available, and the proposed use would be policy compliant in land use terms for the site. The site is therefore of an appropriate scale and designation for the proposed use"</i>.</p> <p>The GLA's comments also are positive with regard to the design and appearance of the proposed Citygate scheme, noting it to be an improvement from the existing Meeting Hall on the site, the Stage 1 report states: <i>"The design and appearance of the building has aimed to reduce its visual impact and a substantial portion of the floorspace would be below ground. Glass and transparent materials are also proposed, which would improve views into the site compared to the existing solid and derelict building... The visualisations and materials submitted demonstrate that the proposal will have an increased visual impact on the openness of the MOL. This harm has been minimised and mitigated by the applicant through reductions made to the size of the building, use of below ground structure, landscaping proposed and use of materials..."</i></p> <p>This demonstrates that development of the Brethren Meeting Hall site to meet identified community infrastructure needs could be achieved with limited visual impact to the MOL.</p>		
Albacore Meeting Room	2	CI 01	<i>Relates to Call for site</i>	Support noted. The comments regarding the site's development	No change.
	2	CI 02	(c) Community Infrastructure: (CI1) Safeguarding and Securing Community		

Trust (Lichfields obo)			<p>Infrastructure and (CI2) New and Enhanced Community Infrastructure</p> <p>The Trust supports LBL’s intention to work collaboratively with Stakeholders to identify current and projected future requirements for community infrastructure including for healthcare, education, recreational and other community service needs in the Borough, and secure the necessary provision of this infrastructure (CI1 a). Identification of suitable and available sites should follow this assessment/evidence base, and subsequently appropriate sites, such as the Brethren site, should be allocated to meet identified needs.</p> <p>In particular, the Council’s encouragement of innovative approaches to community infrastructure provision, “including new models of community infrastructure provision (such as multi-use and shared use facilities, or co-location of uses)” (para 9.3) is supported. This aligns with national policy as it will provide opportunities to make better use of land and assets.</p>	contributing to this policy are noted.	
The Renewal Group (Carney Sweeney obo)	2	CI 01	<p><i>Relates to Part 3, LNA SA 08</i></p> <p>Policy CI1 Safeguarding and Securing Community Infrastructure</p> <p>Firstly, this policy needs to make clear that it does not seek to protect short term meanwhile uses.</p>	Policy CI1 does not need to refer to short term meanwhile uses as the Local Plan contains a specific policy that supports meanwhile uses, but only where it will be temporary in nature and will not preclude the future redevelopment of the site in question.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	CI 01	<p>12 Chapter 9-12 Community Infrastructure, Green Infrastructure, Sustainable Design & Infrastructure and Transport</p> <p>Community Infrastructure</p> <p>12.1 Chapter 9 contains key policies on Community Infrastructure focusing on ensuring that neighbourhoods are well supported with facilities and services; making the best use and securing facilities; and providing high quality facilities.</p> <p>12.2 Community facilities and social infrastructure are critical for creating successful places and enabling new development. There is some uncertainty about future demographics in the borough and therefore the demand for community facilities, and in particular future schools’ places, over the longer term is unclear. Landsec therefore supports the Councils’ plan and monitor approach as set out in the Infrastructure Development Plan.</p> <p>12.3 For large scale developments, the Council should ensure that policies can be sufficiently flexible to enable development, and recognise the practicalities requires of doing so, including the need for bespoke planning and agreement.</p> <p>12.4 Policy CI1 ‘Safeguarding and securing community infrastructure’ advises at part D that new development will be supported where it safeguards and enhances community infrastructure. In respect to the loss of an existing community facility, or land and buildings formerly in community use, it is unclear the reasoning behind the 12-month continuous marketing time period which has</p>	Comment Noted	No change.

			<p>not been justified in the Reg 18 Plan or its relevant evidence base (Draft Infrastructure Delivery Plan (November 2020)).</p> <p>12.5 Part E advises that payment-in-lieu would only be acceptable where the existing or alternative community use is not viable. This should be decided on a case by case basis including consideration of the need (and recent use) for the facility and whether it is the best use of land.</p>		
QUOD (Landsec obo - Lewisham Shopping Centre)	2	CI 02	<p>12.6 Policy CI2 'New and enhanced community infrastructure' stipulates requirement for new infrastructure. Community infrastructure is sometimes planned to meet specific needs and / or with specific occupiers in mind, but at other times is planned with flexibility to meet future needs and therefore the occupiers are not yet known.</p>	Comment noted.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	CI 03	<p>12.7 Landsec welcomes Lewisham's intention to meet the London Plan Policy S4 'Play and Informal Recreation' requirement at Policy CI3 'Play and informal recreation' to incorporate well designed and high-quality formal play provision of at least 10 square metres per child. This is supported.</p>	Support is noted.	No change.
L&Q Group	2	CI 03	<p><i>Relates to Call for site</i></p> <p>Policy CI3 (Play and informal recreation) provides welcome guidance regarding the Council's expectations for the provision of children's play space, in accordance with the principles contained within the London Plan (2021). Part C of Policy CI3 states that all new play space and provision for informal recreation should be designed and managed with "unrestricted public access". This is not feasible where play space is provided within communal amenity space designed specifically for residents of the scheme, such as within a podium courtyard. If the play space within these spaces were required to be publicly accessible, this would raise concern from both a security, building management and maintenance perspective and is likely to significantly increase maintenance, and in turn service, charges. We suggest that "unrestricted public access" is removed from Policy CI3 C a) in respect to communal amenity spaces. For the avoidance of doubt, we recognise new play space in the public realm should be available for public access.</p>	Noted.	Local Plan amended as suggested, to ensure that public access encouraged and not unreasonably restricted, in line with Secure by Design Principles.
Barratt London and the Church Commissioners (Avison Young obo)	2	CI 03	<p><i>Relates to Part 3, LCA SA 20</i></p> <p>Draft Policy CI3 Play and informal recreation</p> <p>Barratt London and the Church Commissioners support the London Plan benchmark of 10 sqm per child as the standard sought by Draft Policy CI3.</p> <p>Part B of this Draft Policy refers to play space provision being made accessible to all children in the development irrespective of housing tenure. Part C then refers to play space having unrestricted public access. The current wording of these parts of the Draft Policy could give rise to security and management issues at occupation stage. Draft Policy QD2 is clear that development proposals must have regard to 'Secured by Design' principles, and we highlight that Part B and Part C of Draft Policy CI3 in their current form potentially conflict with this. As referred to previously, large developments which contain many blocks or uses are often owned and/or managed by different parties who may have individual security and management requirements. Of note, affordable housing provision is most often managed separately to the wider housing offer by an RP (which</p>	Noted.	Local Plan amended as suggested, to ensure that public access encouraged and not unreasonably restricted, in line with Secure by Design principles.

			<p>would likely wish to ensure its residents are not subject to service charges of areas which they rarely use).</p> <p>We, therefore, request that Part B of this policy be amended to seek play space provision being made accessible to all children 'where possible subject to other considerations such as design, security and future management arrangements'. The Policy could also be amended to remove reference to all children accessing all spaces and instead require demonstration at application stage of adequate provision of play space for each block or phase of a development. This approach will help to ensure that equitable play space provision is provided to meet the needs of future occupiers, and these spaces can be appropriately managed at occupation stage.</p> <p>In addition, there may be instances where play is provided within communal gardens accessible to future residents and not the wider public, such as within courtyard blocks. We request that Part C of Policy CI3 therefore be amended to seek play space having unrestricted public access where possible, subject to other considerations such as design, security and future management. This approach will help to ensure appropriate flexibility for future development schemes to come forward with housing typologies that optimises development and responds to the character and context of the site and wider area.</p>		
Austringer Capital Ltd (Tetlow King Planning obo)	2	CI 05	<p><i>Relates to Call for site</i></p> <p>Policy CI5: Burial Space</p> <p>4.15 Policy CI5 explains the Council's approach to securing sufficient burial space to meet the needs of its communities, maintaining access to existing spaces for new burials and supporting the delivery of new cemetery sites. Part B of policy CI5 provides for new sites to come forward where these meet the needs of various groups within the Borough. In general terms, policy CI5 provides a suitable framework for burial spaces to come forward.</p> <p>4.16 Paragraph 9.22 notes the existing evidence base for cemetery provision in Lewisham which includes the 2011 GLA Audit. However, paragraph 9.23 notes that the Council is preparing an updated assessment of local burial space capacity. The Council's decision to review burial space capacity is welcomed since the existing evidence base is dated and, based upon the FOI response we have received, indications are that there is a pressing need for burial space.</p> <p>4.17 Whilst the general tenor of policy CI5 is welcome, we are concerned that the Local Plan currently only allows for the retention of existing burial space and for any new burial space to be identified on an 'ad hoc' basis through the planning application process. We recommend that in order to be positively prepared, the Local Plan seeks opportunities to allocate sites for burial provision. This will ensure the Council is able to match the supply of spaces with demand, ensuring a supply of burial space can be maintained throughout the Plan period.</p> <p>4.18 As discussed at section 3 of these representations, the former Willow Tree Riding Establishment could provide a cemetery to deliver a potential 6,700 burial plots subject to detailed design.</p>	<p>The Infrastructure Delivery Plan acknowledges that following short-term upgrades to existing cemeteries there will be sufficient burial capacity in the medium to longer term. This position will be reviewed through future updates to the IDP. At this point, it is not considered that specific sites need to be allocated in the Local Plan for burial provision.</p> <p>Our response to the call for site for the former Willow Tree Riding Establishment is set out at the back end of this table.</p>	No change.

L&Q Group	2	Section 10	<p><i>Relates to Call for site</i></p> <p>4.5 Green Infrastructure The draft Local Plan reiterates the requirements set out in the London Plan for maximising green infrastructure (including biodiversity net gain and urban greening factor targets) which L&Q supports in principle.</p>	Support noted.	No change.
Tetra Tech Planning (John Lyon's Charity obo)	2	Chapter 10	<p>Green Infrastructure Do you agree that the Local Plan has identified all of the issues around green infrastructure? The Charity generally supports the approach taken to managing and securing green infrastructure. Green infrastructure required for the proposed site allocation at Bell Green Retail Park should be informed by a Masterplan for the Site. The need for a Masterplan is discussed in our answers on Part Three below.</p>	Support noted.	No change.
Albacore Meeting Room Trust (Lichfields obo)	2	GR 01	<p><i>Relates to Call for site</i></p> <p>(d) Green Infrastructure The Trust notes the importance of open space and the Council's network of green and open spaces, which make an important contribution to the local character of the Borough as well as encourage healthy lifestyles and social benefits. It is agreed that development proposals should maximise opportunities to provide green infrastructure on site (GR1).</p> <p>However, it is important that land should only be designated as MOL if it meets the criteria for designation.</p> <p>To do otherwise risks preventing redevelopment and enhancement of otherwise sustainable, previously developed sites, such as the site at Beckenham Hill. In fact, our representations at part 1 (including Appendix 1) demonstrate how such release of the site from the MOL and subsequent allocation for community use development could work to the benefit of the wider MOL swathe, in particular to enhance the existing site's (absent) contribution to the designated South East London Green Chain.</p>	Support noted. The comments regarding the designation of MOL land and contribution to the South East London Green Chain are noted.	No change.
Austringer Capital Ltd (Tetlow King Planning obo)	2	GR 02	<p><i>Relates to Call for site</i></p> <p>Policy-Specific Comments Section 4 4.1 This section provides our comments on the policy content of the emerging Local Plan.</p> <p>Policy GR2: Open Space and Lewisham's Green Grid 4.2 This policy seeks to achieve several objectives in relation to open space and green infrastructure, which include protection of existing open spaces, provisions for reconfiguration and ancillary uses, and the achievement of improved connectivity for active travel.</p>	Noted.	No change.

			<p>4.3 The policy as drafted takes a rigid approach in seeking no net loss of open space. Part C of the policy sets a presumption against development that results in a loss of open space, noting that such proposals will be ‘strongly resisted’. In a similar vein, part D seeks to avoid a net loss of open space in re-configuring open space.</p> <p>4.4 Whilst the protection of open space is a laudable principle, the ‘no net loss’ requirement is unduly restrictive and could prevent meaningful improvements to poor quality open spaces. For example, the open space designations across the Borough include private land to which there is no public access (indeed, this is the case at the former Willow Tree Riding Establishment site) and currently offer little benefit to residents. There may also be opportunities to achieve ecological enhancements, or linear walking routes, however these may need to come forward in the context of some development to allow them to occur – and indeed policies LEA4 and LEA5 recognise this in the context of the vision for the East area. As drafted, the emerging Local Plan makes it difficult to secure qualitative improvements to poor-quality open space where this would require some quantitative loss of open space. Yet, a loss of open space in quantitative terms might be able to support a meaningful improvement to the remaining open space in social and environmental terms. Conversely, without development some existing poor-quality or publicly inaccessible open space may remain so, offering little benefit as open space.</p> <p>4.5 National planning policy does not require a ‘no net loss’ approach. Policy G4 ‘Open Space’ of the London Plan seeks that ‘<i>Development proposals should not result in the loss of protected open space</i>’ but also encourages the creation of ‘<i>publicly accessible open space, particularly in areas of deficiency</i>’. Table 8.1 of the London Plan sets out that open spaces may include ‘Linear Open Space’ alongside infrastructure routes but in contrast to other forms of open space may include elements of private land.</p> <p>4.6 Clearly, there are tensions between maintaining the existing quantity of open space, and other objectives of improving quality and public access. We therefore recommend that the draft policy is revised to allow a more nuanced balance of the loss of poor quality open spaces with the potential for qualitative enhancements.</p>		
Austringer Capital Ltd (Tetlow King Planning obo)	2 2	GR 02 Figure 10.2	<p><i>Relates to Call for site</i> Figure 10.2: Open Spaces</p> <p>4.7 Figure 10.2 accompanies policy GR2 and illustrates the open spaces in Lewisham and their typology. Whilst this is an overarching plan for the entire borough, it nonetheless offers a reasonable degree of detail on specific sites. For example, the Willow Tree Riding Establishment site is identified as part of a Green Corridor but the existing areas of hardstanding are excluded.</p> <p>4.8 There is the opportunity, through the production of more detailed Policies Maps, to review the open space designations for specific sites. It may be possible to exclude certain areas from sites which offer poor quality open space (e.g. areas of hardstanding or built form, or other parts of the site which are of limited ecological value) which may open more opportunities for development and changes of use to occur and support the enhancement of areas of greater open space or ecological value elsewhere at the site.</p>	Noted. Following the Regulation 18 consultation the Council has undertaken additional evidence base work on Open Spaces, which together with public consultation responses, has informed revisions to the Open Spaces policy. This will set a clear hierarchy of open spaces and policies to support their protection.	Local Plan amended to clarify the different typologies of open space within an open space hierarchy and the level of protection afforded to each. This include clarification between green open spaces and other open spaces (e.g. hardstanding but part of public realm).

<p>Albacore Meeting Room Trust (Lichfields obo)</p>	<p>2</p>	<p>GR 02</p>	<p>Lichfields corresponded with London Borough of Lewisham (LBL) Council Officers in Autumn 2020 obo the Trust, principally in respect of the limited contribution the existing site makes to the MOL and, as a consequence, the scope for full or partial release of the land. The Trust considers the site should be removed from the MOL and requests that it is allocated for redevelopment to provide a new flexible community use building.</p> <p>Accordingly, representations are first made in respect of the LBL Metropolitan Open Land Review, 5 March 2020 and justification is provided for allocating the site (Part 1), as well as to the following policy areas (Part2) of the draft Local Plan:</p> <ul style="list-style-type: none"> a. Lewisham’s South Area (LSA2) b. Spatial Strategy Options (OL1) c. Community Infrastructure (CI1) d. Green Infrastructure (GR1/GR2) <p>(Part 1) Metropolitan Open Land and Proposed Allocation Exceptional Circumstances Policy Test</p> <p>Overarching MOL Policy is established through the London Plan (2021), Policy G3, which requires boroughs to designate the extent of MOL in their local plans with any changes to the existing boundaries to be undertaken through the local plan process. MOL is afforded equal status as Green Belt and the principles of national Green Belt policy apply to MOL.</p> <p>As such, the removal from the MOL and allocation of the Brethren site would need to be justified by ‘exceptional circumstances’ as per paras 137 – 139 of the NPPF. London Plan Policy G3 confirms that <i>‘MOL boundaries should only be changed in exceptional circumstances when this is fully evidenced and justified, taking into account the purposes for including land in MOL as set out in Part B’</i>.</p> <p>The MOL criteria at ‘Part B’ are:</p> <ul style="list-style-type: none"> A <i>“it contributes to the physical structure of London by being clearly distinguishable from the built-up area;</i> B <i>it includes open air facilities, especially for leisure, recreation, sport, the arts and cultural activities, which serve either the whole or significant parts of London;</i> C <i>it contains features or landscapes (historic, recreational, biodiversity) of either national or metropolitan value;</i> D <i>it forms part of a Green Chain or a link in the network of green infrastructure and meets one of the above criteria”.</i> <p>LBL MOL Review Evidence Base: Lichfields Review</p> <p>Lichfields has undertaken a review and assessment of the LBL Review of MOL in Lewisham, prepared by Arup in March 2020. The review is attached to these representations at Appendix 1. Our review assesses the contribution the existing Meeting Hall site currently and potentially could make to the MOL and, as a consequence, the scope for full or partial release of the land.</p> <p>The site lies within a wider swathe of designated Metropolitan Open Land, defined by Arup in its March 2020 review as ‘Area 15’. A wider area of MOL land exists to the south comprising Beckenham Place. Arup’s MOL Review concludes that Area 15 should be retained in the MOL, assessing it overall to fulfil its role for MOL purposes – meeting Criterion A but scoring weakly against other MOL</p>	<p>Lichfield’s MOL assessment of this site is noted. However the Council has prepared its own MOL review using independent consultants and will use this as the basis for Local Plan decisions.</p>	<p>No change</p>
---	----------	--------------	---	---	------------------

			<p>criterion, principally due to the area's limited public access, recreational value and performance in the Green Chain.</p> <p>The Lichfields MOL assessment builds on the LBL Arup Assessment and looks at both the site and wider MOL Area 15 in which the site is situated, having considered Arup's assessment approach and method. It finds that, whilst it is appropriate for Arup to have considered the site as part of a larger swathe of MOL, it is clear that there is a very weak case for retention in terms of the existing site's performance (on its own) against the MOL criteria – it does not meet the MOL designation criteria, save for criterion A (see above) in a 'very weak', partial sense.</p> <p>The site is developed and urban in nature, is private and entirely fenced off and does not include any features of national or metropolitan value. It is therefore requested that Area 15 should instead be considered for release from the MOL and partial enhancement of the retained open space as part of a new development allocation in the draft new local plan.</p>		
SGN (Quod obo)	2	GR 02	<p><i>Relates to Part 3, LSA SA 01</i></p> <p>Chapter 10 - Green Infrastructure</p> <p>5.19 SGN supports Policy GR2 ambition to maximise opportunities for new publicly accessible open space to all new major developments in order to mitigate the identified open space deficiencies across Lewisham and enhance the existing network of open spaces across the borough.</p>	Support noted.	No change.
Phoenix Community Housing (BPTW obo)	2	GR 02	<p>Green Infrastructure</p> <p>The sanctity of the All London Green Grid Framework and its strategic role in the GLA's vision of a National Park City is agreed, and its proposed policy protection is strongly supported, as is the ambition to deliver net gains in biodiversity in all development. We are particularly pleased to see policy protection afforded to the Bellingham sports ground and the Temple land opposite Beckenham Place Park. However, for the more local open space and biodiversity assets such as allotments, SINC, pocket parks and non-designated green spaces etc. we would request that greater flexibility is built into part D of policy GR2, which allows the reconfiguration of open space. Rather than no net loss of space, we propose that 'no net loss of functionality' is a more appropriate test. This would be more consistent with national policy, given the NPPF's recognition that open space can be multifunctional (e.g. play space, biodiversity, active travel, sustainable drainage, UGF), meaning that the benefits of open space can be expanded within a smaller area. Further, we suggest that Housing Associations with large management portfolios of existing estates as well as infill and brownfield opportunities would benefit greatly from added flexibility to allow reconfiguration of localised green infrastructure across the portfolio following careful consideration and in consultation with local residents. This would allow for a re-balancing of provision between areas of abundant greenery and areas of scarcity, raising the standard of provision in general across the portfolio, and means affordable housing can forward in the most appropriate locations available.</p>	Noted. Following the Regulation 18 consultation the Council has undertaken additional evidence base work on Open Spaces, which together with public consultation responses, has informed revisions to the Open Spaces policy. This will set a clear hierarchy of open spaces and policies to support their protection, including consideration of amenity open spaces such as those on housing estates.	Local Plan amended to clarify the different typologies of open space within an open space hierarchy and the level of protection afforded to each. This include clarification between green open spaces and other open spaces (e.g. hardstanding but part of public realm).
QUOD (Landsec obo - Lewisham Shopping Centre)	2	GR 02	<p>Green Infrastructure</p> <p>12.8 Chapter 10 contains key policies on green infrastructure and biodiversity, ensuring that spaces and natural sites are protected and enhanced; improving public access to spaces and promoting urban green spaces.</p> <p>12.9 Policy GR2 'Open space and Lewisham's green grid' seeks to ensure that all development proposals maximise opportunities to introduce new publicly accessible open space and that any loss will be strongly resisted. To avoid ambiguity between the Reg 18 plan and the London Plan, all references to open</p>	Noted.	Policies on designated open spaces have been amended.

			space in parts C-G of the draft Policy GR2 should include the word “ <i>protected</i> ” in its terminology to reflect Part B of London Plan Policy G4 ‘Open Space’. A definition of protected open space should also be included in the glossary.		
QUOD (Landsec obo - Lewisham Shopping Centre)	2	GR 03	12.10Landsec is supportive of Lewisham’s intended approach to net gains in biodiversity as detailed at draft Policy GR3 ‘Biodiversity and access to nature’, as well as its affirmation of the urban green factor (UGF) in accordance with Policy G5 of the London Plan.	Support is noted.	No change.
L&Q Group	2	GR 04	<i>Relates to Call for site</i> Policy GR4 (D) requires development proposals to maximise the use of living roofs and walls. Whilst L&Q supports this policy direction in principle, as a housing association we are concerned about the cost of long-term maintenance and management of living roofs and walls and the impact this could have on service charges for future residents. As such, we request that affordability of new homes be taken into consideration when demonstrating whether it is feasible to include living roofs and walls in forthcoming development proposals.	Noted. The draft Local Plan does not set specific requirements in this regard, and encourages developments to maximise opportunities. Development feasibility and viability will be considered on a case-by-case basis.	No change.
SEGRO (CBRE Limited obo)	2	GR 04	<i>Relates to Part 3, LNA SA 04</i> SEGRO’s key recommendations for the draft plan comprise: Requirements for an urban greening factor of 0.3 and a minimum plot ration of 65% for warehousing development should be removed to ensure general conformity with the London Plan 2021.	Noted.	Local Plan amended to reflect that target UGF for predominantly commercial development excludes B2 and B8 uses. Local Plan amended to provide new definition of industrial capacity and removal of 65% plot ratio.
SEGRO (CBRE Limited obo)	2	GR 04	<i>Relates to Part 3, LNA SA 04</i> 2. Urban Greening SEGRO prides itself on its commitment to sustainable design, which includes finding creative and high-quality solutions to biodiversity enhancement its new developments, and so the principle of urban greening policies is supported. At present, Part C of draft plan policy GR4 (Urban Greening) sets a target urban greening factor (hereafter “UGF”) score of 0.3 for commercial development. As currently drafted, this policy is not consistent with the London Plan which requires 0.3 UGF target for commercial except B2 and B8 developments. The London Plan applied this exclusion for warehousing development in response to SEGRO’s examination evidence which demonstrated that the policy would not be sound, due to the unique design and viability challenges of achieving a UGF score of 0.3 in warehousing development. One such challenge is the significant increase in embodied carbon within the building’s structure that would be required to take the load of a green roof. Again, SEGRO’s evidence to the London Plan on this point is appended for reference.	Support is noted. Agree that the Local Plan should be consistent with the London Plan, which now states a target score of 0.3 for predominately commercial development (excluding B2 and B8 uses).	Local Plan amended to reflect that target UGF for predominantly commercial development excludes B2 and B8 uses.

			<p><i>LB Lewisham officer note: Appendix 2: Urban Greening Evidence is included in the original representation.</i></p> <p>To ensure conformity with the London Plan, draft policy GR4 should be updated so that the requirement for a UGF score for commercial excludes B2 and B8 uses.</p>		
L&Q Group	2	GR 05	<p><i>Relates to Call for site</i></p> <p>Policy GR5 (Food growing) encourages major development proposals to include provision of space for community gardening and food growing. We would welcome further guidance regarding the priority to be given to community gardening and food growing provision over other spatial requirements, such as children's play space, to ensure that we are able to make best use of space as part of future development projects.</p>	Noted. Disagree. The London Plan sets standards for housing, including children's play space and indoor/outdoor amenity space. The suggested change would represent a departure from the London Plan.	No change.
Tetra Tech Planning (John Lyon's Charity obo)	2	Chapter 11	<p>Sustainable Design and Infrastructure</p> <p>Do you agree that the Local Plan has identified all of the issues around sustainable design infrastructure?</p> <p>No comments.</p>	Noted.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	SD 01	<p>Sustainable Design & Infrastructure</p> <p>12.11Chapter 11 addresses sustainable design and infrastructure. Lewisham were one of the first local authorities to declare a climate emergency. This plan will play an important role in helping the borough to respond to the climate emergency. It provides the strategic framework for climate change mitigation and adaption in respect of the future use and management of land within the borough.</p> <p>12.12Draft policy SD1 'Responding to the climate emergency' sets out the council's broad framework to become a net zero borough by 2050. This policy establishes principles to help deliver environmental sustainability, reflecting the importance of green and open spaces, biodiversity, urban greening; flood risk and resilience; air quality and net waste self-sufficiency. A plan, manage and monitor process will be used to support the successful transition to a net zero carbon Borough. The borough will regularly assess performance against their strategic objectives through the Authority Monitoring Report process, which will enable the plan to be kept up to date to reflect the latest requirements and standards at the regional and national levels. Landsec is supportive of this policy, having published their own net zero pathway in December 2020.</p> <p>12.13Draft policy SD1 is proposed alongside more specific policies for sustainable design (SD2), minimising greenhouse gases (SD3) and design to support a circular economy (SD12), which taken as a whole, will support the transition to net zero through spatial planning and design standards.</p>	Comments noted.	No change.
Fifth State and (Avison Young obo)	2	SD 02	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy SD2 - Sustainable Design</p> <p>Part D of the draft Policy requires new non-residential development of 500 sqm or more to achieve a BREEAM 'Excellent' rating. At present this wording does not allow for any site specific technical constraints which may mean that an 'Excellent' rating cannot be achieved. We therefore request that the policy wording is amended to seek to achieve (rather than require) developments to achieve an 'Excellent' rating, with appropriate justification to be provided at</p>	Noted. Disagree that the policy should seek to achieve, rather than require, although agree that a justification should be provided where this cannot be met.	Local Plan amended to clarify that development proposals must meet the requirement unless it can be demonstrated that this is not feasible.

			planning application to explain the rating that is possible for the development to meet.		
L&Q Group	2	SD 02	<i>Relates to Call for site</i> Policy SD2 (C) requires major residential domestic refurbishment proposals to achieve a certified 'Excellent' rating under the BREEAM Domestic Refurbishment 2014 scheme, or future equivalent. Whilst L&Q supports reducing the environmental impact of refurbished buildings, as a housing association we are concerned that an 'Excellent' rating will not be achievable in every case and may impact the ability to deliver affordable housing due to prohibitive costs. To allow flexibility, we suggest this policy be reworded to encourage the achievement of an 'Excellent' rating as an aspiration rather than an expectation.	Noted. The Local Plan Viability Assessment demonstrates that the requirement can be viably delivered. However it is recognised there may be technical feasibility issues.	Local Plan amended to clarify that development proposals must meet the requirement unless it can be demonstrated that this is not feasible.
Barratt London and the Church Commissioners (Avison Young obo)	2	SD 02	<i>Relates to Part 3, LCA SA 20</i> Chapter 11 Sustainable Design & Infrastructure Draft Policy SD2 Sustainable design Part B of the Draft Policy requires residential development to achieve the BRE Home Quality Mark. Given the BRE Home Quality Mark is a relatively new standard within the industry and may be subject to future change, we request the policy wording is amended to 'seek' /'target' rather than 'require' development to achieve the BRE Home Quality Mark, with consideration given to site specific circumstances. Part D of the Draft Policy requires new non-residential development of 500 sqm or more, to achieve a BREEAM 'Excellent' rating. At present this wording does not acknowledge there may be site specific technical factors that mean an 'Excellent' rating cannot be achieved. We therefore request the policy wording is amended to 'seek' or 'target' rather than 'require' development to achieve a BREEAM 'Excellent' rating, with appropriate justification to be provided at the application stage to explain the rating level the development would meet.	Noted. The Local Plan Viability Assessment demonstrates that the requirement can be viably delivered.	Local Plan amended to state that proposals should seek to achieve the Home Quality Mark.
Cockpit Arts (The Planning Lab obo)	2	SD 02	<i>Relates to Part 3, LNA SA 14</i> • CA is supportive of policies which require a sustainable approach to development, particularly a reduction in carbon emissions to reach net zero. Our makers are also committed to these principles, and to the circular economy generally, and can play a key role including in terms of local production, innovative use of waste materials, supporting repair and development of skills in the local economy, and as role models/exemplars.	Support noted.	No change.
Artworks Creekside (Avison Young obo)	2	SD 02	<i>Relates to Part 3, LNA SA 16</i> Draft Policy SD2 - Sustainable Design Part D of the draft Policy requires new non-residential development of 500 sqm or more to achieve a BREEAM 'Excellent' rating. At present this wording does not allow for any site specific technical constraints which may mean that an 'Excellent' rating cannot be achieved. We therefore request that the policy wording is amended to seek to achieve (rather than require) developments to achieve an 'Excellent' rating, with appropriate justification to be provided at planning application to explain the rating that is possible for the development to meet.	Noted. The Local Plan Viability Assessment demonstrates that the requirement can be viably delivered. However it is recognised there may be technical feasibility issues.	Local Plan amended to clarify that development proposals must meet the requirement unless it can be demonstrated that this is not feasible.
Transport for London	2	SD 02	SD2 Sustainable design	Noted. The Local Plan Viability Assessment	Local Plan amended to state that proposals

Commercial Development			It is noted that criterion B requires new residential development to achieve the BRE Home Quality Mark. The ministerial statement in March 2015 indicated that local planning authorities would not be able to require any standards above the regulatory minimum for new dwellings apart from those set out in the new national options and it is considered that the requirement for the BRE Home Quality Mark would not accord with this.	demonstrates that the requirement can be viably delivered.	should seek to achieve the Home Quality Mark.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	SD 02	12.14Draft policy SD2 lists various design requirements for new and existing development. It is noted at part B that proposals for new self-contained major and minor residential development will be required to achieve the BRE Home Quality Mark. Supporting text identifies that 'proposals are strongly recommended to achieve a minimum 3-star rating' but is not prescribed in policy. This flexibility is welcomed.	Support noted.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	SD 03	12.15Draft policy SD3 relates to minimising greenhouse gases and reflects the London Plan requirements for carbon reduction. Policy SD3 C states that major development proposals will be required to achieve a minimum on-site reduction of at least 35 per cent (beyond the baseline of Part L) of the current Building Regulations. Part D of the policy confirms that under exceptional circumstances where it is clearly demonstrated that the zero-carbon target cannot be fully achieved on-site, development proposals will be required to make contributions to address the identified shortfall through a cash-in-lieu contribution to Lewisham's carbon offset fund; or appropriate off-site measures where these can be demonstrated to be deliverable. This requirement indicates that in general net zero should be achieved on sites, unless there are exceptional circumstances, albeit it appears to contradict part C, which states that a minimum 35% will be obtained. It is recognised that the intent of the policy should be to maximise carbon savings on site, however clarification is recommended with regards to Part C and D of this policy.	Noted.	Policy SD3 revised to provide more clarity.
L&Q Group	2	SD 04	<i>Relates to Call for site</i> Policy SD4 (G) requires major housing proposals to submit an estimated heat unit supply price, annual standing charges, and projected annual maintenance costs for their proposed Energy Strategy. We note that this is a high level of detail (over and above that required by the London Plan) to be provided at planning submission stage and figures will be subject to change upon the completion of fully co-ordinated technical design at RIBA Stage 3, which typically occurs post-planning. We therefore request that the level of detail able to be provided at planning submission stage not be a barrier to receiving planning approval, and consider the energy performance of new buildings would be more appropriately controlled through the application of appropriately worded planning conditions and / or the building control regime.	Noted. Agree that there should be flexibility regarding the timing for submitting this information and that they can be controlled through planning obligations or Building Control.	Policy amended using proposed wording
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	2	SD 09	<i>Relates to Part 3, LNA SA 14</i> Water management We note that Policy SD9 (Water management) relates to watercourses and flood defences. The supporting text in paragraph 11.53 states prescriptive relief (set back distances) between new development and river frontages – unless otherwise agreed by the Council and Environment Agency, with buffer zones left free of permanent structures and integrated into a new development to enhance their amenity value. It states as follows: <i>In order to ensure there is no adverse impact of the natural functioning of a watercourse, or the integrity of a flood defence, all new development must maintain an undeveloped buffer zone with an adequate set back distance from the watercourse. A relief of 8 metres from a main river and 5 metres from an</i>	Noted. The Local Plan sets these benchmark requirements on the advice of the Environment Agency, and already provides flexibility to other distances provided these are agreed by the Council and EA.	No change.

			<p><i>ordinary watercourse should be secured, unless otherwise agreed by the Council and the Environment Agency. Buffer zones should be left free of permanent structures, ensure adequate access for the maintenance of flood defences and be sensitively integrated into development in order to enhance their amenity value...” (Our Emphasis.)</i></p> <p>It is considered that the drafting of the policy is currently overly prescriptive and would unnecessarily constrain redevelopment. This would not be effective and could restrict the delivery of future redevelopment and any associated full benefits, including new homes, new affordable homes and new jobs.</p> <p>We consider that each site must be considered on its own merits and any relief (set back distance) between new development and the frontage to be agreed with the Council and the Environment Agency on a case by case basis, having regards to all relevant technical matters, site specific constraints and development that would be brought forward, including the overall planning and public benefits.</p> <p>Whilst it is acknowledged that the current drafting includes the following text: <i>“unless otherwise agreed by the Council and the Environment Agency”</i> – and could potentially allow an alternative set back distance to be agreed with the Council and Environment Agency, we consider the policy should be updated as follows (the deletions are shown as strikethrough, the additions are shown underlined):</p> <p><i>A relief of 8 metres from a main river and 5 metres from an ordinary watercourse should be secured, unless otherwise agreed by the Council and the Environment Agency.</i></p> <p><u><i>A relief from a main river or ordinary watercourse should be secured and agreed by the Council and the Environment Agency.</i></u></p> <p>This would ensure that the policy is effective and deliverable.</p>		
L&Q Group	2	SD 12	<p><i>Relates to Call for site</i></p> <p>Policy SD12 (E) requires that all new proposals for multi-storey flatted residential development make provision for “sensitively designed storage and collection systems at each floor”. It is industry practice that space is provided within the flat and then either at ground / basements; it is not considered appropriate to provide additional storage within common areas at each floor level. This will create the need to larger cores and circulation space, likely increasing the bulk and massing of buildings. Moreover, it will create additional management and management requirements and associated increased service charges.</p> <p>Part E also requires that design options for basement servicing be investigated before considering the use of forecourts or ground floor internal storage. It is considered inappropriate to promote basements above the use of forecourt or ground floor internal storage. Basements are costly and often, in highly contaminated areas, inappropriate for excavation for public health reasons. We therefore request that greater flexibility be offered when consideration the most appropriate servicing strategy, taking into account site-specific constraints. Basements should not be the preferred starting point.</p>	Noted.	Local Plan amended by providing more flexibility to waste management design for new developments.

Barratt London and the Church Commissioners (Avison Young obo)	2	SD 12	<p><i>Relates to Part 3, LCA SA 20</i></p> <p>Draft Policy SD12 Design to support the circular economy</p> <p>Barratt London and the Church Commissioners support the application of the London Plan circular economy approach in Part A of the Draft Policy.</p> <p>Part E of the Draft Policy states new multi-storey flatted residential development, including mixed-use development, must make provision for sensitively designed storage and collection systems on each floor. This does not reflect how waste is collected from the majority of new build schemes delivered in the borough or across London. The approach to waste collection should be determined with regard to technical and design considerations and in discussion with the Council's Waste and Highways Officers, to ensure development makes the most efficient use of land and satisfies other requirements such as Secured by Design and Building Regulations, where necessary.</p> <p>We therefore request Part E is amended to remove reference to a requirement for 'storage and collection systems at each floor' to be delivered.</p>	Noted.	Local Plan amended by providing more flexibility to waste management design for new developments.
QUOD (Landsec obo - Lewisham Shopping Centre)	2	SD 12	12.16Draft Policy SD12 'Design to support the circular economy' requires that major development proposals aim to be net zero-waste and are required to submit a Circular Economy Statement, as part of the Sustainable Design Statement. Landsec are supportive of this approach.	Support is noted.	No change.
L&Q Group	2	Section 11	<p><i>Relates to Call for site</i></p> <p>4.6 Sustainable Design & Infrastructure</p> <p>L&Q recognise the need for sustainable design principles in new developments. The London Plan now requires the submission of Circular Economy Statements and Whole Life-cycle Carbon Assessments, as well as Urban Greening Factor and Biodiversity Net Gain information. For consistency, we consider that Lewisham's local requirements should be brought into line with those of the adopted London Plan, and that the requirements of a Sustainable Design Statement will already be covered by these planning deliverables.</p>	Noted. The Local Requirements List is outside the scope of the Local Plan. This will be amended in line with the extant Development Plan.	No change.
L&Q Group	2	Section 12	<p><i>Relates to Call for site</i></p> <p>4.7 Transport & Economy</p> <p>L&Q welcomes the LBL's approach of giving consideration to future planned Public Transport Accessibility Levels when assessing new development proposals, given the key role the Bakerloo Line Extension would play in the Borough should this project come forward.</p>	Support noted.	No change.
Transport for London Commercial Development	- 2	General TR 01	<p>RE: LEWISHAM LOCAL PLAN MAIN ISSUES AND PREFERRED APPROACHES REGULATION 18</p> <p>Thank you for providing the opportunity to comment on the Lewisham Local Plan Main Issues and Preferred Approaches Regulation 18. Please note that our representations below are the views of the Transport for London Commercial Development (TfL CD) planning team in its capacity as a landowner in the borough only and are separate from any representations that may be made by TfL in its statutory planning role and / or as the strategic transport authority for London. Our colleagues in TfL Spatial Planning have provided a separate response to this consultation in respect of TfL-wide operational and land-use planning / transport policy matters as part of their statutory duties.</p>	Noted. Comments to additional representations set out elsewhere in the Consultation Statement.	No change.

			<p>TfL CD have previously submitted the following representations: –Lewisham Call for Sites (October 2018)</p> <p>Please note that our attached representations are the views of the Transport for London Commercial Development planning team in its capacity as a landowner in the borough only and are separate from any representations that may be made by TfL in its statutory planning role and/or as the strategic transport authority for London.</p>		
Transport for London Commercial Development	- 2	General TR 01	<p>Concluding Remarks</p> <p>We hope that these representations are helpful but if you need any further information or would like to discuss any of the points raised in our representations, please do not hesitate to contact me. We look forward to being kept up to date with your programme going forwards.</p>	Noted.	No change.
Transport for London Commercial Development	2	TR 01	<p>TR1 Sustainable transport and movement</p> <p>Criterion a. of this policy is strongly supported.</p>	Support noted.	No change.
Notting Hill Genesis (Savills obo)	2	TR 01	<p><i>Relates to Call for site</i></p> <p><i>Other Matters</i></p> <p>NHG supports the Council’s approach to sustainable transport through encouraging a shift away from car use to more sustainable transport modes as set out within the draft Local Plan Policy TR1. This policy further states that development proposals should make the most effective use of land and optimise the capacity of sites by taking into account connectivity and accessibility to existing and planned future public transport. NHG supports the Council’s approach to optimising site capacity, which is in accordance with the London Plan.</p>	Support noted.	No change.
GHL (Leegate) Limited (Frank Knight obo)	2	TR 01	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>4. Transport and Connectivity</p> <p>Policy TR1 (Sustainable transport and movement) remarks that the integration of land use and transport, along with an effective public transport network, are essential to delivering inclusive, healthy, liveable, walkable and sustainable neighbourhoods in Lewisham. Policy TR1 adds that priority should be given to reducing car use and improving opportunities for movement by walking, cycling and the use of public transport.</p> <p>GHL strongly supports Policy TR1 and recommends that the supporting policy text emphasises the importance of sustainable alternatives, in accordance with Chapter 9 (Promoting sustainable transport) of the NPPF and Policy T1 (Strategic approach to transport) of the London Plan.</p>	Support noted. Disagree that additional supporting text is needed as the policy already clearly sets out the importance of sustainable forms of transport.	No change.
Tetra Tech Planning (John Lyon’s Charity obo)	2	TR 02	<p>Transport and Connectivity</p> <p>Do you agree that the Local Plan has identified all of the issues around transport connectivity?</p> <p>We support the inclusion of Policy TR2 ‘Bakerloo Line Extension’ and the requirement for development proposals to optimise the use of land and capacity of sites taking into account the BLE and future improvements to public transport.</p>	Support noted.	No change
SGN (Quod obo)	2 2	TR 02 Figure 12.2	<p><i>Relates to Part 3, LSA SA 01</i></p> <p>Chapter 12 – Transport and Connectivity</p>	Agree that the Local Plan should reference the adopted version of the London Plan. Agree that reference should be made	Local Plan amended to reflect proposed wording and to remove “Draft” from the

			<p>5.20 Policy TR2 is fully supported by SGN to which it is acknowledged that the upgrade of the Bakerloo is fundamental to the realisation of Lewisham’s strategic objectives.</p> <p>5.21 Point C) outlines development proposals on sites within 400m of a new Bakerloo stations will be subject to close scrutiny so that it does not preclude the delivery of the Bakerloo line extension. Figure 12.2 shows the proposed route of the line and potential stations, however, with respect of the stations between Lewisham and Lower Sydenham, the locations of new stations are yet to be confirmed. Accordingly, the following text should be included: <i>Development proposals on sites located within 400 metres of a proposed Bakerloo line station or safeguarded location will be closely scrutinised to ensure that development does not preclude the delivery of the Bakerloo line extension, and further optimises the future accessibility provided by its introduction into the local area. This may include provision for new or improved public realm and infrastructure enhancements.</i></p> <p>5.22 Finally, the Plan refers to the ‘draft London Plan’ throughout. This should be updated following adoption of the London Plan in February 2021.</p>	to safeguarding locations for the BLE.	<p>references to the London Plan.</p> <p>Local Plan amended to reflect BLE safeguarding directions.</p>
WSP (Sainsbury’s Supermarkets Ltd obo)	2	TR 02	<p>Amendments to the Local Plan</p> <p>84. As it will be at least 10 years before BLE considered for funding, there is a strong case for reference to the BLE to be removed from the Local Plan, given that it will blight regeneration and redevelopment that will otherwise come forward in the next 10 years.</p>	Disagree that reference to the BLE should be removed from the Local Plan. The planned growth within the Local Plan is not predicated solely on the delivery of the BLE. Julia???	No change.
L&Q Group	2	TR 04	<p><i>Relates to Call for site</i></p> <p>Whilst we recognise the environmental benefits of ‘car-free’ development, there are parts of the Borough with poor public transport accessibility where greater flexibility for parking should be allowed. We have experienced at the Excalibur where limited car parking in the area of low PTAL (level 1b) has impacted sales rates and values, with knock-on impacts on the scheme viability.</p> <p>Moreover, for estate regeneration proposals in particular, regard needs to be given to re-provision of car parking spaces for existing residents who will be re-housed. This criteria is not included in the sequential approach under Policy TR4(D). To assist with this approach, we suggest that a flexible approach as set out in the London Plan be adopted, which prioritises disabled persons parking but allows other parking provision to come forward subject to further assessment / justification.</p>	Noted. The draft Local Plan parking standards will need to be updated to align with those in the London Plan.	Local Plan parking policies amended to ensure conformity with the London Plan.
Barratt London and the Church Commissioners (Avison Young obo)	2	TR 04	<p><i>Relates to Part 3, LCA SA 20</i></p> <p>Chapter 12 Transport and Connectivity Draft Policy TR4 Parking</p> <p>Barratt London and the Church Commissioners support the application of the London Plan cycle parking standards for all uses and the residential car parking standards as sought by Part B of the Draft Policy.</p>	Noted. The draft Local Plan parking standards will need to be updated to align with those in the London Plan.	Local Plan parking policies amended to ensure conformity with the London Plan.

			<p>With respect to car parking for non-residential uses, Part B also applies the London Plan standard which is car free (with the exception of accessible spaces) for schemes in areas of PTAL 5-6. The Plassy Island site currently provides car parking to serve the existing retail uses, and there may be a commercial and operational need for parking to be re-provided to serve the future occupiers of the new retail/commercial floorspace.</p> <p>We, therefore, request the Draft Policy is amended to state that <i>'whilst London Plan car parking standards are sought for retail and commercial uses, site specific circumstances will be taken into account including existing parking provision, future commercial and operational needs, and contribution of parking to support wider town centre objectives'</i>.</p> <p>Part E of the Draft Policy states major development proposals should investigate opportunities to integrate space for cycle hubs to accommodate the provision of cycle hire schemes, as well as space for cargo bikes.</p> <p>Part K of the Draft Policy states development proposals for residential and commercial uses will be expected to investigate opportunities to implement rapid electric vehicle charging points, having regard to the Council's Low Emissions Vehicle Charging Strategy.</p> <p>The current wording of Part E and K is supported as it provides adequate flexibility for schemes to come forward with the most appropriate transport provision determined by relevant site-specific considerations.</p>		
GHL (Leegate) Limited (Frank Knight obo)	2	TR 04	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Policy TR4 (Parking) states that development proposals will be assessed against the parking requirements set in the London Plan 2021, and parking standards will be considered against existing and future planned Public Transport Accessibility Level (hereinafter 'PTAL'). Policy TR4 adds a sequential approach will be applied to development proposals for housing where they require the provision of parking.</p> <p>GHL considers that it is inappropriate to set further parking requirements over and above the London Plan Policy T6 (Car parking). Car parking requirements should be determined on a site-by-site basis, as such, justification will be required for the sequential approach to ensure the policy is effective and deliverable.</p> <p>In sustainable locations such as Lee Green District Centre, a reduction or at least consolidation of car parking could be supported. Furthermore, the amount of parking required for new development should be considered carefully in the context of the Government seeking to reduce car ownership and travel. Policies should be encouraging the use of public transport and other forms of sustainable travel, reducing the reliance on private cars.</p> <p>GHL considers that all development proposals in places that are (or are planning to be) well-connected by public transport should minimise the amount of new car parking delivered; this not only encourages use of public transport but also ensures a more efficient use of land. We suggest that the Council adopts a</p>	Noted. The draft Local Plan parking standards will need to be updated to align with those in the London Plan.	Local Plan parking policies amended to ensure conformity with the London Plan.

			flexible approach to car parking which takes account of site-specific circumstances.		
GHL (Leegate) Limited (Frank Knight obo)	2	TR 04	<p><i>Relates to Part 3, LEA SA 03</i></p> <p>Lastly, Policy TR4 states major development proposals that are likely to generate significant number of visitors should review opportunities for space for cycle hubs to accommodate the provision of cycle hire schemes, as well as space for cargo bikes. GHL supports the provision of short-stay cycle spaces in accordance with the London Plan minimum cycle parking standards (Policy T5, Cycle Parking). This further cycle parking requirement first needs to define what LBL considers is a 'significant number of visitors' and should also be justified in viability terms. It is GHL's understanding that there is no justification in the evidence base for an alternative approach to the London Plan. If additional cycle parking requirements are to be set these need to be justified through robust evidence.</p>	Noted. The draft Local Plan parking standards will need to be updated to align with those in the London Plan.	Local Plan parking policies amended to ensure conformity with the London Plan.
Tesco Stores Ltd (Lichfields obo)	2 2	TR 04 Para 12.21	<p><i>Relates to Part 3, LCA SA 06 and LCA SA 19</i></p> <p>Retail Car Parking (Policy TR4) Draft Lewisham Local Plan Policy TR4 B and explanatory para 12.21 state that development proposals should meet the parking requirements and standards set out in the 'draft' London Plan. This reference will require updating now The London Plan 2021 (LP) has been published. More significantly, <u>the approach to retail parking in the LLP must now reflect the change at limb G of LP policy T6.3</u>, arising from a policy modification required by the SoS to enabling a less restrictive approach to retail car parking to apply in specified circumstances. Specifically, TC6.3G states: <i>"G. Boroughs may consider amended standards in defined locations consistent with the relevant criteria in the NPPF where there is clear evidence that the standards in Table 10.5 would result in:</i> <i>a. A diversion of demand from town centres to out of town centres, undermining the town centres first approach.</i> <i>b. A significant reduction in the viability of mixed-use redevelopment proposals in town centre."</i></p> <p>Over time, there are likely to be reductions in parking demand associated with large scale food retail sites, and a rise in online deliveries. Despite this, pre-pandemic, more than 80% of UK shoppers still carried out a weekly/fortnightly main food shop. The volume of purchases made at a typical weekly/fortnightly shop often means that transporting goods on foot, cycle or by public transport is unfeasible. Therefore, whilst there remains a public desire to shop in this way, it will be necessary to provide appropriate levels of car parking for large food stores to remain viable.</p> <p>A reduction in car parking demand, the use of alternative modes of travel and increase of on-line shopping over time has been evident at the Tesco large stores in Lewisham and Catford. However, car borne main food shopping trips do continue to comprise a sizeable proportion of each store's turnover. Tesco would not proceed with redevelopment of either store to achieve significant development intensification, if it meant any required replacement store in these town centre PTAL 5-6 locations had to be served by a level of car parking provision less than that required by expected customer demand. To do so would</p>	Noted. The parking standards will need to be updated to align with those in the London Plan.	Local Plan parking policies amended to ensure conformity with the London Plan.

			<p>undermine both the store's trading and redevelopment viability to the detriment of the Tesco business, shoppers and the vitality and viability of town centres.</p> <p>Accordingly, we <u>recommend an additional paragraph is added to the explanation of policy TR4B(f) on Retail Parking to address the above.</u></p> <p>It is noted that the development guidelines for both Site Allocation SA6 and SA19 include specific guidelines for car parking provision. Specific representations are made on each of these in the sections below.</p>		
QUOD (Landsec obo - Lewisham Shopping Centre)	2	TR 04	<p>Transport and Connectivity</p> <p>12.17Chapter 12 contains key policies in relation to Transport and Connectivity.</p> <p>12.18Policy TR4 B 'Parking' confirms the Council's approach to car free development (for residential and retail) in locations with a PTAL score of 5-6 in line with the standards set out in London Plan Policy T6 'Car Parking'.</p> <p>12.19Whilst Landsec are supportive of sustainable transport initiatives and the Council's ambition for car free development in high PTAL locations, Landsec also recognises that there can be a practical requirement to deliver on-site car parking for family housing in such locations. We consider that Policy TR4 B could include support for on-site parking for family housing, which could negate the risk of overspill parking that could be created by these users who require access to a vehicle.</p>	Noted	Car parking requirements have been amended to reflect those within the London Plan.
Kier Property (Carter Jonas obo)	3 3	Section 13 Table 13.1	<p><i>Relates to Call for site</i></p> <p>Table 13.1 of the Local Plan outlines that a Background Paper has been produced to outlines indicative site capacities. We recommend that with the inclusion of our client's land, the site allocation is revised and the proposed indicative range outlined in the site allocation is clearly expressed as a <i>minimum</i> to allow for a design-led development that maximises the opportunity available.</p>	Disagree. Table 13.1 states that the figures are indicative. Optimal capacity for the site will be established at planning application stage through a design led approach.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	3	Table 13.1	<p>13 Part Three – Chapter 13 and 14 Lewisham Central Area</p> <p>13.1 Part three of the Reg 18 Plan considers Lewisham's neighbourhoods, celebrating Lewisham's diversity and valuing its distinctiveness. To assist with understanding and appreciating Lewisham's local distinctiveness, and to establish 'place-based' priorities for guiding investment and sensitively managing growth and new development, Part 3 of the Reg 18 Plan is organised around five-character areas.</p> <p>Table 13.1</p> <p>13.2 Table 13.1 includes indicative capacities for housing; workspace (gross m²); and town centre use floorspace (gross m²). A net additional requirement is also included (excluding consented development) of 38,327m² workspace and 24,361m² town centre uses.</p> <p>13.3 For consistency workspace should be replaced with employment to reflect the site allocations. For the reasons set out in previous sections of this report, the Reg 18 Plan is not yet supported by an evidence base to support the net additional floorspace figures in Table 13.1.</p>	The Local Plan is supported by an evidence base that is proportionate and responds to higher level policy.	Table 13.1 amended.

Tesco Stores Ltd (Lichfields obo)	3	LCA 01	<p><i>Relates to Part 3, LCA SA 06 and LCA SA 19</i></p> <p>Lewisham Central Area (Policy LCA1) Tesco welcomes the vision and spatial objectives for Lewisham’s Central Area <u>Place Principles</u>, including its focus on the linked but complementary town centres of Lewisham and Catford.</p> <p><u>Tesco supports the ambition of both Policy LCA1B (b) to support “Lewisham major centre’s transition to a metropolitan centre of sub-regional significance” and of LCA1B (c) to support “The comprehensive regeneration of Catford major centre, reinforcing its role as the Borough’s principal civic and cultural hub”.</u></p>	Support noted.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	3	LCA 01	<p>LCA1 Central Area place principles</p> <p>13.4 Chapter 14 Vision and LCA1 for Lewisham’s Central Area confirms that by 2040 development of key strategic sites along with the arrival of the Bakerloo line extension together with the modernisation of Lewisham interchange will have a transformative effect, and will shape Lewisham major town centre into a <i>potential</i> metropolitan centre of exceptional quality (LCA1(B)).</p>	Comments noted.	No change.
Freeths LLP (K/S Lewisham obo)	3	LCA 02	<p>The strategic objectives of Policy LCA2 relating to development requirements in the major centre are also supported and well suited to the Site.</p>	Support noted.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	3	LCA 02	<p>LCA2 Lewisham major centre and surrounds</p> <p>13.5 Policy LCA2(A) Lewisham major centre and surrounds seeks continued investment in Lewisham major centre to enable its transition to a <i>potential</i> metropolitan centre of sub-regional significance in London, and a gateway to the south east, a strategic priority. The policy seeks to ensure that a complementary mix of uses, including new housing, should be delivered “<i>whilst ensuring that the centre’s predominant commercial role is maintained and enhanced</i>”. Landsec would like to explore this objective further with the Council. Maintaining and enhancing the predominant commercial role of Lewisham Town Centre may not represent the necessary flexibility required to secure its vitality and viability.</p> <p>13.6 Policy LCA2(H) seeks “<i>an appropriate mix of main town centre uses at the ground floor level</i>”. Landsec supports this. <i>‘Retail uses should be concentrated within the Primary Shopping Area, forming the main use across the shopping frontages, and supported with a wider range of complementary commercial, leisure and cultural uses elsewhere.’</i> Landsec supports the objective that retail should form the main uses across the shopping frontage.</p> <p>13.7 Landsec also recognise that retail uses may not comprise the main use across the Primary Shopping Area at ground floor level. The reason for this might be due to the capacity for retail floorspace in the Primary Shopping Area; urban design requirements; Class E which broadens the range of uses; and an evolving understanding of town centre vitality and viability.</p>	We believe the Local Plan strikes the appropriate balance between maintaining the retail function of the town centre whilst providing a degree of flexibility to ensure its vitality and viability.	No change.
Canada Life Ltd (Williams Gallagher obo)	3	LCA 03	<p><i>Relates to LCA SA 22</i></p> <p>Policy LCA3: Catford major centre and surrounds - We support the principles of the policy with the exception of Criteria H which will need to include flexibility around the deculverting the Ravensbourne River for the reasons set out above.</p>	Support noted. Enhancing the river environment is an integral part of improving Catford major centre and surrounds. The policy already provides flexibility as Part H does not require	No change

				deculverting of the River Ravensbourne but rather says development proposals must maximise opportunities to do so.	
Transport for London Commercial Development	3	LCA SA 01	Lewisham's Central Area: Site Allocation 1 - Lewisham Gateway TfL CD are broadly supportive of the 'Lewisham Gateway Site' and consider the allocation for "comprehensive mixed-use redevelopment comprising compatible main town centre, commercial, community and residential uses" to be appropriate. TfL CD recognise that the redevelopment of the 'Lewisham Gateway Site' has commenced. TfL property interests comprise the Thurston Road Bus stand, which has recently been safeguarded for the BLE, the bus facility at Conington Road, the DLR station and TLRN highway land. In operational terms TfL are also interested in the taxi rank and bus stops and stands on Station Road and bus stops on borough highway.	Comments noted.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02 General	<i>LB Lewisham officer note: The comments below provide an abridged version of the 72 page submission.</i> <i>LB Lewisham officer note: Chapter 1 of the submitted response provides an Executive Summary. It's content summarises the more detailed points below.</i>		The supplementary information is noted. Our response is set out below.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02 General	<i>LB Lewisham officer note: Chapter 2 of the submitted response provides an Introduction. In summary, Landsec:</i> <ul style="list-style-type: none"> - welcomes the opportunity to engage with Lewisham Council. - supports the Council's ambition for growth and renewal across the borough and within Lewisham Major Town Centre. - undertook a feasibility assessment to rethink the future of Lewisham Shopping Centre. - engaged with Lewisham Council, the GLA, community groups and organisations, market traders, residents, shoppers, and political stakeholders. - recognises challenges - town centres and the way we shop have been rapidly changing due to the growth of online shopping, structural change accelerated by COVID-19, established high street retailers have gone into administration and how town centres are used by local people and retailers will now change forever. - has an ambition to secure a vibrant and vital future for Lewisham Shopping Centre, it may have to be achieved in a new and innovative way supported by a flexible development plan. 		The supplementary information is noted. Our response is set out below.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02 General	2.7 Landsec undertook a listening exercise in 2020, focussed on the following six key themes: town centre experience, town centre living, arts and culture, employment, local environment, getting around. 2.8 The consultation involved a six-week consultation period; 10,000 newsletters; contact with 115 community groups and organisations; a consultation website; Facebook advertising to promote the consultation process; two virtual village halls; and street canvassing.		The supplementary information is noted. Our response is set out below.	No change.

		<p>2.9 Landsec received an excellent response with 2,231 website visits; 732 consultation responses of which 25% responses were from BAME other ethnic groups.</p> <p>2.10 A summary of what people told us is set out below.</p> <ul style="list-style-type: none"> ☑ 60% visited the town centre once a week or less. ☑ Change is wanted: people want a cleaner, safer town centre, redesigned shopping centre, and more pedestrian areas. ☑ More independent retailers, cafes & restaurants are sought. ☑ Lewisham market is popular, but there are strong views about the way it is managed. ☑ 71% said new arts and cultural space would improve the town centre. ☑ Adding more shops ranked lowest as a positive impact. <p>2.11 There is a strong desire for it to become a vibrant and exciting place again, with recognition for change. Lewisham Shopping Centre is key to that new start with a desire to see more in the town centre than retail, with a strong focus on cultural and other uses such as community and Food & Beverage (“F&B”).</p>		
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02 General	<p><i>LB Lewisham officer note: Chapter 3 of the submitted response provides Landsec’s Vision. In summary it explains:</i></p> <ul style="list-style-type: none"> - <i>how Landsec is a market leader in reimagining and growing development in London and the UK,</i> - <i>that rethinking the future of Lewisham Shopping Centre presents a significant opportunity to contribute to the long-term wellbeing of local people by thinking carefully about jobs, skills, business, health, and the environment, creating and implementing social value.</i> - <i>the need for diversification and that Landsec’s reaction to the fundamental changes facing town centres was already in motion prior to the pandemic.</i> 	The supplementary information is noted. Our response is set out below.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02 General	<p>3.12 Lewisham Shopping Centre has been at the heart of the town centre for over 40 years and is in need of renewal.</p> <p>3.13 Lewisham Shopping Centre was opened in 1977 as the Riverdale Centre, the largest building in Lewisham town centre. The centre comprised 70 shops set over 3 floors, an 800-space car park, offices, a large internal service road and a disused leisure centre.</p> <p>3.14 The disused leisure centre has been closed for at least 21 years and offered sports facilities such as gymnastics, a five-a-side football, and badminton as well as an indoor crown green bowls court, bar area and function rooms. On the ground floor was the Riverdale Hall, the Obelisk pensioners day centre and Spotlights bar. The Hall hosted a variety of events including an Elvis Presley exhibition, a Christmas ice rink, tea dances, antiques markets, and a Saturday morning cinema club.</p> <p>3.15 The design of the shopping centre (as a covered mall) results in a 100% plot ratio which offers limited opportunities for permeability and urban greening. It is an inclusive and enclosed environment solely reliant on retail occupancy and customer footfall to generate vitality and vibrancy. Without sustained long term</p>	The supplementary information is noted. Our response is set out below.	No change.

		<p>retail occupancy, there is no reason for the local community to visit the centre. It will have an adverse impact on vitality and viability of Lewisham as a whole.</p> <p>3.16 Landsec has tried to keep the centre as occupied as possible however this has its challenges due to the restructuring of the retail sector and in the long term is not a sustainable optimum solution for Lewisham Town Centre. Covid has created a greater issue by accelerating the structural change in retail, and through the loss of many high street retailers has removed current and future tenants. There simply are not the quantity and quality of tenants available to occupy the floorspace in a way which benefits the town centre in the long term.</p> <p>3.17 Lewisham Shopping Centre comprises c.28,000 sqm (NIA) of floorspace of which over a third is vacant; at risk of vacancy; or a short term let/concession. 70% of the floorspace is at ground floor, with 30% at first or second floor. Most of the centre is in retail use, with only a very limited food and beverage offering.</p> <p>3.18 There is also c.6,800sqm of vacant buildings comprising the former Riverdale Hall (c.1,700sqm) and former leisure centre (c.4,500sqm) both of which are disused and have been vacant for many years.</p> <p>3.19 Adjacent to the shopping centre is the popular Lewisham market. Home to a range of stalls selling fruit, vegetables, food and clothing, it has been running since 1906. Immediately to the south of the centre is the Model Market, opened in the 1950s selling model toys it closed in the 2000s, but re-opened to host Street Feast offering pop up drinking and dining experiences.</p> <p>3.20 In 2022 London Borough of Lewisham will be London's Borough of Culture. To celebrate, the borough will curate a year of arts, cultural events and activities. The borough is home to a number of arts and cultural organisations, of which many are based in the town centre.</p> <p>3.21 Lewisham is a diverse borough with residents who have stories from around the world, Landsec want to make the town centre a place where this diversity is celebrated. Landsec want to find out more about Lewisham's evening economy and explore opportunities to create a more active town centre later in the day.</p> <p>3.22 The Migration Museum exemplifies the Landsec and the borough's shared commitment to diversity and openness and already performs an important role for the town centre which could be explored further.</p>		
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02 General	<p>3.23 Landsec's vision for Lewisham Shopping Centre is set out below. <i>Located as the heart of Lewisham town centre, the sustainable and mixed-use transformation of Lewisham Shopping Centre will re-integrate the place within its surrounding fabric, weaving the old and the new to create a layered living neighbourhood above a high performing and vibrant commercial centre. To secure Lewisham's future, healthy living and flexible working will come together around a diverse leisure and retail offer that caters for all. Increased opportunities for new connections will open the site up to bring the nature in. The place-shaping process will be inclusive and informed by public engagement to build upon what already makes the place special, and ensure the place grows organically over time.</i></p>	The supplementary information is noted. Our response is set out below.	No change.

		<p>3.24 This vision draws on the need for structural change in our town centres to maintain and enhance vital and viable town centres; the views of those consulted during 2020; and the clear policy direction set out in National Policy and the recently adopted London Plan.</p> <p><i>LB Lewisham officer note: Para 3.25 of the submission provides a finer context to this vision, using seven place pillars: rooted, connected, mixed use, multi-cultural, green, healthy and flexible.</i></p> <p>3.33 To achieve this vision, a balanced and flexible approach to planning policies will be required. To achieve a successful ground floor, with active and animated frontages, existing floorspace will have to be removed to make way for new streets and green spaces. Buildings will have to get taller to limit the amount of built footprint at ground floor, creating news spaces that are publicly accessible and engaging, for public benefit.</p>		
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02 General	<p><i>LB Lewisham officer note: Chapter 4 of the submitted response provides an overview of national planning policy and London Plan policy with a specific focus on adaption and diversification of town centres and that the changing role of town centres should be proactively managed.</i></p> <p><i>It also acknowledges the London Plan approach for Lewisham town centre with high residential growth potential, high commercial growth potential protecting small office capacity and strategic night time function and that it forms part of the New Cross/Lewisham/Catford Opportunity Area.</i></p> <p><i>Landsec supports the following findings within the Mayor’s report “Adaptive Strategies for high street renewal” including that there is significant value in London High Streets, the resilience of high streets varies across the city and that high streets are good places for residential intensification.</i></p>	The supplementary information is noted. Our response is set out below.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02 Soundness	<p><i>LB Lewisham officer note: Chapter 6 of the submitted response provides an overview of soundness, that plans should apply a presumption in favour of sustainable development and should seek opportunities to meet development needs of their area and be sufficiently flexible to adapt to rapid change.</i></p>	The supplementary information is noted. Our response is set out below.	No change.
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02	<p>8.1 In accommodating future growth, the Reg 18 Plan allocates a number of sites for development, including Lewisham Shopping Centre (Site Allocation 2). Within this chapter, we comment specifically on the relevant parts of Site Allocation 2 as they are set out in the Reg 18 Plan.</p> <p>Site Allocation</p> <p>8.2 The allocation comprises Lewisham shopping centre, owned by Landsec, and land outside of the Shopping Centre, including Lewisham House, 25 Molesworth Street and Lewisham High Street, which includes Lewisham market.</p> <p>8.3 Site Allocation 2 is allocated for comprehensive mixed-use redevelopment comprising compatible main town centre, commercial, community, and residential uses.</p> <p>8.4 Landsec support this allocation and whilst the area identified includes more land than Lewisham Shopping Centre, it is felt that this is a positive approach in</p>	Support is noted.	No change.

		securing a comprehensive approach to redevelopment of this important 6.38ha town centre site.		
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02	<p>Indicative Development Capacity</p> <p>8.5 The indicative capacity of the site for 1,579 homes, and gross non-residential floorspace of 20,097 sqm employment and 60,291 sqm main town centre will require further analysis.</p> <p>8.6 Landsec would like to work with Lewisham Council to inform the indicative capacity of the site further and better link this capacity to the objectively assessed needs; deliverability taking into account other policies of the Reg 18 plan; and the urban design principles being promoted which will naturally break up the existing 100% plot ratio reducing the amount of ground floor that will be available for commercial floorspace.</p> <p>8.7 The Council's site allocation background paper confirms that the indicative site capacities have been derived from the London-wide SHLAA methodology, rather than a needs assessment, or indeed pre-application discussions. This has assumed that Lewisham town centre (Lewisham shopping centre and immediate surrounds) should reflect the need for provision of a significant amount of main town centre uses within the Primary Shopping Area, also commensurate with the objective for Lewisham to be designated a Metropolitan Centre. As discussed above, this 'potential' objective must be considered in context. Table 7.1 of the background paper assumes a general mix of 60% residential; 30% main town centre; and 10% employment.</p> <p>Appendix A Table A.2 identifies a slightly different capacity mix of 55% residential; 30% main town centre; and 10% employment; and 5% other.</p> <p>8.8 As this is a significant and complex site, we feel that pre-application discussions represent the most appropriate route to defining indicative site capacity. Whilst SHLAA methodology is a useful starting point, it is a crude land use model which, understandably, is unable to test viability; needs; and site context.</p> <p>8.9 Our initial assessment is that the indicative residential development capacity for the site (1579 homes) results in an under-utilisation of the site. While the Site allocation background paper confirms that the indicative capacities should not be read prescriptively, they may unintentionally raise local communities' expectations around the appropriate capacity prior to any design analysis. The actual development capacity of a site will ultimately need to be determined through the detailed design and planning approval process and this should be made clearer in the Reg 18 Plan itself.</p> <p>8.10 As a PTAL 6 central location, the London Plan encourages much greater residential densification, certainly given the potential for metropolitan status. London Plan Policy H1 'Increasing housing supply' requires boroughs to optimise the potential for housing delivery on all suitable and available brownfield sites in order to ensure that housing targets are met. Sites within existing or planned PTALs of 3-6 which are located within 800m of a tube or rail station or town centre boundary are identified as key sources of capacity.</p>	<p>At this time, the pre-application is likely to evolve prior to the submission of a planning application, and so cannot be relied upon to provide a design led capacity for this site. In these instances the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including that the site needs to accommodate significant amounts of non-residential floorspace commensurate with its role within the major town centre, the aspiration to become a Metropolitan town centre and the need to transition appropriately in scale down to the established 3-4 storey that exists along Lewisham High Street and nearby Conservation Area. Based on these considerations, the capacity remains appropriate and should remain the same.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	No change.

		<p>8.11 As the upper end of the former London Plan density matrix (405dph) would equate to 2,584 homes across Site Allocation 2, we would expect the site to achieve more homes to fully optimise housing delivery, and therefore an indicative capacity of 2,584 homes would be more appropriate.</p> <p>8.12 The London Plan sets out a design-led approach to determining the optimum development capacity of sites. To accommodate the growth identified in this Plan in an inclusive and responsible way, every new development needs to make the most efficient use of land by optimising site capacity. Policy D1 B (3) 'London's form, character and capacity for growth' is clear that boroughs should follow the design-led approach (set out in Policy D3 'Optimising site capacity through the design-led approach') to establish optimised site capacities for site allocations. Landsec welcomes the opportunity to enter discussions to inform this approach.</p> <p>Paragraph 3.3.4 of Policy D3 acknowledges that this should be through a consultative design led approach that allows for meaningful engagement and collaboration with local communities, organisations and businesses.</p> <p>8.13 With regards to the indicative capacity of 20,097 sqm employment and 60,291 sqm main town centre uses, from our early assessment of future needs, and the Council's own evidence base since 2009, this suggests that there is an oversupply of retail floorspace in Lewisham town centre. We believe that there will need to be an adjustment to these indicative figures.</p> <p>8.14 There will also need to be an adjustment to reflect urban design principles promoted by the Reg 18 Plan. Lewisham Shopping Centre has a site coverage of 100%. To break the centre up, and create new, green permeable routes, there will need to be a reduction in ground floor commercial floorspace to make way for these routes. Owing to the let ability of commercial floorspace, there may be limited scope to replace this floorspace at upper levels across level 1, 2 or 3 for example as retail floorspace does not operate effectively above the ground floor.</p>		
QUOD (Landsec obo - Lewisham Shopping Centre)	LCA SA 02	<p>Opportunities</p> <p>8.15 Landsec agrees that the site forms the heart of Lewisham and will play an important role in the enhancement of the town centre. Landsec also agrees that any redevelopment of the site will require significant upfront infrastructure, for example new public realm and transport connections, subject to phasing, necessity, and viability.</p> <p>8.16 The site allocation does not reference the viability challenges of incurring significant upfront cost in the early phases of redevelopment and the potential need to explore grant funding opportunities or flexibility in other policy areas to ensure a viable scheme. The Mayor's Affordable Housing & Viability SPG (2017) states "<i>it is understood that development proposals on particular sites may not be able to meet affordable housing requirements due to the requirements for significant investment in other contributions to support growth, particularly for public transport (but also for schools and hospitals, cultural venues, affordable work space etc.)</i>".</p>	<p>Agree with some, but not all, of the points raised in relation to the Opportunities text. Do not agree with the words "should seek to" as securing the long-term future of the market is a pre-requisite to re-developing the site.</p> <p>Policy DM2 already provides an approach for dealing with infrastructure funding and seeks planning obligations on a case by</p>	<p>Lewisham Shopping Centre site allocation amended to refine some of the Opportunities text.</p>

		<p>8.17 The viability constraints of Lewisham Shopping Centre and other sites in the borough is clearly set out in the Local Plan Viability Assessment (BNPP, 2019). The testing identifies that the Lewisham Shopping Centre would be able to deliver between 0% and 30% affordable housing dependent on achievable sales values. The viability testing also excludes any site abnormal costs which will significantly impact viability.</p> <p>8.18 On this basis, Landsec broadly supports the opportunities for development subject to the following. <i>“This site forms the heart of Lewisham major centre and includes the Lewisham Market. It is dominated by the shopping centre, built in the 1970s, and the Lewisham House office block. Renewal and modernisation of the shopping centre, will enhance the quality of town centre and help it to achieve metropolitan centre status. Comprehensive redevelopment of the site will enhance the quality of the town centre and will help the Council towards its ambition for potential Metropolitan Town Centre status. Through diversification, redevelopment can deliver a significant amount of new housing on upper floors to contribute towards vitality and viability of the town centre. together with Modern retail and employment space, leisure, cultural and community facilities to will support the long-term vitality and viability of the town centre. Development can also enable transformative public realm enhancements to improve connections throughout the wider town centre area and should seek to secure the long-term future of the market.</i></p> <p><i>Delivery of significant upfront infrastructure and the placemaking costs associated with redeveloping the town centre may impact the viability of development and the ability to deliver a policy compliant level of affordable housing. The Council will work with developers to explore grant funding opportunities and other policy flexibilities.”</i></p>	<p>case basis, taking into account necessary mitigation and site viability. The Plan should be read as a whole.</p>	
<p>QUOD (Landsec obo - Lewisham Shopping Centre)</p>	<p>LCA SA 02</p>	<p>Development Guidelines</p> <p>8.19 The Council’s evidence base demonstrates that the site is an excellent location for tall buildings. It is situated in one of the most suitable and less sensitive locations for tall buildings in the Borough. For this reason, there should be no limit to building heights at this location.</p> <p>8.20 Landsec therefore propose the following amendments to bullet six:</p> <p>(Bullet six) <i>“The design of development must respond positively to a site’s position in the wider site allocation area, and to the scale and function of the High Street. The southern end of the site should operate as a transitional zone with more moderately scaled development. Comprehensive redevelopment, including the Beatties Building and Model Market, should establish a new southern anchor to encourage visitors into the heart of the town centre, and help to support pedestrian movement up the length of the High Street. Taller buildings elements may be appropriate across the site but will be encouraged at the northern end of the site and to the west along Molesworth Street.”</i></p> <p>8.21 Landsec supports and encourages visitors into the heart of the town centre and pedestrian movement along the High Street. This can be achieved in many ways, and it would be inflexible to promote a new southern anchor to achieve</p>	<p>Agree with some, but not all, of the points raised in relation to bullet six. Agree to remove the text relating to a new southern anchor, in order to provide some flexibility.</p> <p>Disagree that a new bullet needs to be added to the Development Guidelines. The site is located within an Opportunity Area. Opportunity Areas are key sources of housing supply in London. They are, by their nature, complex to bring forward and often require significant investment in</p>	<p>Lewisham Shopping Centre site allocation amended to refine some of the wording for bullet six.</p>

		<p>this. The concept of an anchor is also prescriptive, and following the structural change in town centres, as a concept may no longer be relevant and should therefore be removed.</p> <p>8.22 Landsec proposes that the challenge of delivering a site in an opportunity area be recognised, aligned to GLA policy. The Mayor’s Affordable Housing & Viability SPG states that <i>“Opportunity Areas and Housing Zones are key sources of housing supply in London. They are, by their nature, complex to bring forward and often require significant investment in infrastructure. They are also of a scale that can create fundamentally new places and communities.”</i></p> <p>8.23 The site allocation should provide an element of flexibility to affordable housing provision as set out in the Mayor’s Affordable Housing & Viability SPG. The SPG states <i>“when considering Opportunity Areas, Housing Zones and industrial land, LPAs may wish to apply a localised affordable housing threshold for the Fast-Track Route”</i>.</p> <p>8.24 Landsec therefore proposes the inclusion of a new bullet point: (Bullet Twelve) <i>“The site is located within an Opportunity Area. Opportunity Areas are key sources of housing supply in London. They are, by their nature, complex to bring forward and often require significant investment in infrastructure. The Council will take into consideration the viability challenges of the site when assessing the requirements under affordable housing and other policies.”</i></p>	<p>infrastructure. Policy DM2 already provides an approach for dealing with infrastructure funding and seeks planning obligations on a case by case basis, taking into account necessary mitigation and site viability. The Plan should be read as a whole.</p>	
<p>QUOD (Landsec obo - Lewisham Shopping Centre)</p>	<p>LCA SA 02 General</p>	<p><i>LB Lewisham officer note: The submitted response is also accompanied by Appendix 1: Retail tables</i></p> <ul style="list-style-type: none"> - <i>Table 1a: Population</i> - <i>Table 1b: Convenience and Comparison Expenditure per person 2019</i> - <i>Table 1c: Convenience and Comparison Expenditure</i> - <i>Table 2a: Market Shares and Turnover – Convenience Goods 2020</i> - <i>Table 2b: Market Shares and Turnover – Convenience Goods 2021</i> - <i>Table 2c: Market Shares and Turnover – Convenience Goods 2025</i> - <i>Table 2d: Market Shares and Turnover – Convenience Goods 2030</i> - <i>Table 2e: Market Shares and Turnover – Convenience Goods 2035</i> - <i>Table 2f: Market Shares and Turnover – Convenience Goods 2040</i> - <i>Table 3a: Market Shares and Turnover – Comparison Goods 2020</i> - <i>Table 3b: Market Shares and Turnover – Comparison Goods 2021</i> - <i>Table 3c: Market Shares and Turnover – Comparison Goods 2025</i> - <i>Table 3d: Market Shares and Turnover – Comparison Goods 2030</i> - <i>Table 3e: Market Shares and Turnover – Comparison Goods 2035</i> - <i>Table 3f: Market Shares and Turnover – Comparison Goods 2040</i> - <i>Table 4: Trading Performance of Existing Convenience Floorspace</i> - <i>Table 5: Retail Capacity Lewisham Borough (Constant Market Share)</i> - <i>Table 6: Retail Capacity Lewisham Town Centre Only (Constant Market Share)</i> 	<p>The supporting information is noted.</p>	<p>No change.</p>
<p>Freeths LLP (K/S Lewisham obo)</p>	<p>General LCA SA 02</p>	<p>K/S is also supportive of the identification of the Site within the wider proposed allocation of the Lewisham Shopping Centre (Site 2 – page 498-499). Although the Site is allocated within this wider town centre allocation, K/S has also submitted the Site’s availability for development as part of the Call for Sites consultation. This is to be clear on its suitability and availability for development.</p>	<p>Support noted. Agree that delivery of the site is reliant on the cooperation of all land owners across the site.</p>	<p>No change.</p>

		Due to the position of its Site, K/S is committed to playing its part in the regeneration and redevelopment of the Site based on its availability and development potential. To deliver regeneration in this location, it is essential that the requirements and objectives of all landowners and operators are heard and factored into the policy to ensure it is sufficiently flexible and capable of delivery.		
Freeths LLP (K/S Lewisham obo)	General LCA SA 02	To ensure compliance with the NPPF paragraph 35 soundness requirements and particularly that it is an effective and justified allocation, we identify the following: - Evidence Base justification for the development requirements of the allocation. This does not appear to have been tested via any published feasibility / design evidence and requires greater flexibility. Greater flexibility is also needed to allow short-medium term works to buildings in the masterplan area where they otherwise meet the objectives of the Plan (i.e. re-use /conversion of the upper floors for offices).	Comments noted.	No change.
Freeths LLP (K/S Lewisham obo)	LCA SA 02	Development Requirements & Evidence Base We note this allocation is presented based on achieving comprehensive mixed-use development. The opportunity presented by the Site and the allocation is clear and K/S as an important landowner in the allocation is willing and enthusiastic to play its part in working with the Council and Land Securities in delivering the allocation. The Development Requirements outlined in the allocation are detailed and clear in their objectives and requirements. This sets a positive framework for formulating a scheme and promoting development through the planning process. Before the requirements are set and enshrined in the Development Plan, to comply with NPPF paragraph 35 b) it is however important that they are formulated and tested based on a justified and appropriate strategy which has taken into account the reasonable alternatives and based on proportionate evidence. We note that other areas in the Local Plan are based on Opportunity Studies and/or Masterplans (e.g. Catford and New Cross). No Masterplan or Opportunity Study has been prepared by the Council to inform the detailed requirements that are currently proposed. We note the publication of the Draft Tall Buildings Study (Allies and Morrison, February 2021) and the Lewisham Characterisation Study (Allies and Morrison, June 2019). These helpfully identify the allocation area as being capable of intensification including for tall buildings, but neither document provides the direct evidence or link to the actual development requirements proposed for this Site. As a minimum we would expect a companion document to these studies to identify the key development parameters and principles to be used in informing the Site Allocation. These should be tested and then selected based on an assessment of the allocation area and its immediate surroundings together with potential options and alternatives. This is particularly important step in the Evidence Base process where the Allocation extends to such a significant part of the Town Centre and onto plots such as our client's beyond the majority ownerships of the Shopping Centre itself. The guidelines as presently drafted appear to offer the opportunity for increased density and height onto the Shopping Centre elements on the northern	Agree that landowners should work in partnership and in accordance with a masterplan, to ensure the appropriate co-ordination and balance of uses across the site. Policy DM3 already provides an approach for dealing with masterplans and comprehensive development. The Plan should be read as a whole. Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham Tall Buildings Study which will inform amendments to Policy QD4 Building Heights and the suitability for tall buildings at the Lewisham Shopping Centre site. Agree that this site allocation could be worded more flexibly in relation to tall buildings. Agree that reference should be given to plots of land falling outside of the ownership of Lewisham Shopping Centre and how	Lewisham Shopping Centre site allocation amended to make reference to partnership working, masterplan, Policy DM3, that tall buildings may be appropriate across the site, especially at the north and west of the site and plots of land that do not fall within the ownership of the shopping centre.

			<p>and western parts of the allocation without fairly considering how development and intensification can be located on the central and eastern parts of the allocation including our client's Site. This needs to be more transparently and fairly tested through a clear and robust evidence base to support the selection of the development guidelines and the overall soundness of the allocation.</p> <p>In the absence of such evidence base, the development guidelines need to be more flexibility worded such that the opportunities and options are considered before a development choice is made. Such an option is identified for the Lewisham House block for example but otherwise decisions on taller building locations have been made without consideration and fair assessment.</p> <p>Our client's site is for example strategically positioned in the Site and is capable of accommodating additional height and density to support mixed-use including residential. This can for example provide high quality architecture and active frontages which will offer visual interest and identity to enliven and regenerate this particular part of the High Street. It will also positively link with and engage the market and any associated improvements to the Town Centre's built environment/public realm in this particular location.</p> <p>The potential for this and how the Site can play its part needs to be considered further as part of the evidence base so a clear and sound allocation can be set.</p>	<p>they will be integrated into the wider site allocation.</p> <p>The council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	
Transport for London Commercial Development	3	LCA SA 06	<p>6 - Land at Conington Road and Lewisham Road (Tesco) As stated in the TfL Spatial Planning response Redevelopment of 'Land at Conington Road and Lewisham Road' would require the retention and/or re-provision of the bus stop and stand facility, including driver facilities, which is currently provided within this site allocation.</p>	Agree that existing bus infrastructure should be re-provided.	Land at Conington Road and Lewisham Road (Tesco) site allocation amended by making reference to the re-provision of bus infrastructure.
Tesco Stores Ltd (Lichfields obo)	3 2	LCA SA 06 Para 14.36	<p>Site Allocation 6 : Land at Conington Road and Lewisham Road (Tesco) <u>Tesco supports the proposed 1.53 ha site allocation</u> (para 14.36).</p> <p>Indicative Development Capacity The site is identified as having an indicative development capacity of 380 net residential dwellings alongside 3,802 sqm of gross employment floorspace and 7,604 sqm of gross main town centre use floorspace, following the '<i>standard method + sensitivity</i>' approach explained in the Site Allocations Background Paper (SABP) (at para 6.3, tables 6.1 and 7.1 and Appendix A.1 in particular).</p> <p>We appreciate and agree that the development capacity is indicative and is a matter to be determined through detailed design and planning processes (SABP para 6.2). We anticipate that any replacement retail store would not use all of the indicative main town centre use floorspace capacity indicated. Furthermore, the transitional location of the site (explained at LLP para 14.33) makes it less appropriate for the scale of indicative capacity of other town centre uses and employment uses to reflect other town centre sites.</p> <p>Conversely, we anticipate the indicative residential capacity to be much greater than 380 homes. Your 'standard method' for an Opportunity Area site with a central setting and 5-6b PTAL, indicates a capacity of (1.53 ha x 450 dwellings/ha) 689 homes. We appreciate there are site specific considerations to address,</p>	<p>The pre-application is likely to evolve prior to the submission of a planning application, and so cannot be relied upon to provide a design led capacity for this site. In these instances the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including that the site</p>	Land at Conington Road and Lewisham Road (Tesco) site allocation amended by increasing net residential units to 407 and reducing employment floorspace to 1,901m ² .

			<p>including the retention of vehicular access through to the Conington Road site (SA5), but would expect 600 dwellings to be a more appropriate indicative sensitivity figure. (NB. The current planning status of SA5 is that the SoS granted full planning permission for 365 residential dwellings and associated development in January 2020).</p> <p><u>We recommend the indicative development capacity is revised accordingly:</u></p> <table border="1"> <tr> <td>INDICATIVE DEVELOPMENT CAPACITY</td> <td>Net residential units 380- 600</td> <td>Gross non-residential floorspace Employment < 3,802 Main town centre < 7,604</td> </tr> </table>	INDICATIVE DEVELOPMENT CAPACITY	Net residential units 380- 600	Gross non-residential floorspace Employment < 3,802 Main town centre < 7,604	<p>needs to accommodate a replacement large supermarket, vehicular access and Silk Mills Path, and that it is an edge of centre site that needs to transition appropriately in scale down to the established low rise properties along Conington Road. Based on these considerations, the amount of employment floorspace and residential has been amended to reflect the transitional nature of the site.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	
INDICATIVE DEVELOPMENT CAPACITY	Net residential units 380- 600	Gross non-residential floorspace Employment < 3,802 Main town centre < 7,604						
Tesco Stores Ltd (Lichfields obo)	3 2	LCA SA 06 Para 14.37	<p>Opportunities</p> <p>Tesco agrees the redevelopment of the Tesco superstore, its car park and petrol-filling station, has the potential to provide a significant number of new homes and non-residential floorspace within a highly sustainable town centre location, one lying in a “<i>transitional position from the surrounding residential area leading into the heart of Lewisham major centre ...</i>” (para 14.37). Such mixed-use redevelopment would allow for the repurposing of the retail store site, so as to provide an appropriately sized modern replacement foodstore.</p> <p>Accordingly, <u>we recommend the third sentence of para 14 .37 is revised to read: “ Comprehensive redevelopment and intensification, along with the replacement of the existing retail store or introduction of a wider range of uses, will provide a more optimal use of land to support the long-term viability of the town centre.”</u></p>	<p>Agree that a replacement retail store should be accommodated on-site.</p>	<p>Land at Conington Road and Lewisham Road (Tesco) site allocation amended using the wording proposed.</p>			
Tesco Stores Ltd (Lichfields obo)	3 2	LCA SA 06 Para 14.39	<p>Development Requirements and Guidelines</p> <p>Tesco welcomes the Council’s ambition to make the best use of the land available in line with both NPPF (Chapter 11) and the London Plan (Policies GG2 and D3).</p> <p>Tesco concurs with the appropriateness of the SA6 Development Requirements, save for the detail (not the principle) of the last two bullets on public realm and ecology and amenity value. The detailed provision is matter for the Development Guidelines, explaining how the requirements might be achieved, mindful that there will be alternative ways to do so and that is matter to be determined through masterplanning as part of the design and planning processes.</p> <p>Specifically, <u>we recommend: “including A new public square linked to Silk Mills Path; River restoration and a riverside walk” and “including a riverside walk incorporating the existing bridges with an attractive and robust embankment“</u></p>	<p>Disagree that references to the riverside walk should be moved to the Development Guidelines, as interconnectivity with, and improving, the river is an essential part of redeveloping the site.</p>	<p>No change.</p>			

			are removed from Development Requirements para 14.38 and included in Development Guidelines para 14.39.		
Tesco Stores Ltd (Lichfields obo)	3 2	LCA SA 06 Para 14.39	<p>The <u>Development Guidelines</u> (at para 14.39) give some acknowledgement that an appropriate balance will need to be struck with regards to replacement retail parking with the penultimate bullet point noting ‘<i>Car parking should be the minimum required, reflecting the high level of public transport accessibility of the site</i>’.</p> <p>It is however recommended that this bullet point is amended to give greater clarity in relation to parking associated with any replacement large foodstore as follows: “<i>Car parking should be the minimum required, reflecting the high level of public transport accessibility of the site, whilst recognising the need to provide appropriate levels of car parking to ensure uses are viable, in particular any replacement retail use.</i>”</p>	Comments noted but this text is now proposed for deletion, in order to reduce repetition and ensure clarity in implementing the car parking standards contained in Policy TR4.	All site allocations amended by removing references to car parking.
L&G (Avison Young obo)	- 3	General LCA SA 08	<p>Representation to Lewisham Local Plan Regulation 18 Stage “Main Issues and Preferred Approaches” (Dated January 2021) – Lewisham Retail Park, Loampit Vale</p> <p>We write on behalf of our client, L&G, to submit a representation to the London Borough of Lewisham (LBL) in response to Local Plan: Main Issues and Preferred Approaches consultation document (dated January 2021). The consultation period for this document closes on 11th April 2021. This representation is made specifically in relation to the draft Site Allocation 8: Lewisham Retail Park, Loampit Vale. This letter contains an overview of the site and policy context before making representations on the proposed site allocation.</p> <p>Site Context and Background</p> <p>The site comprising Lewisham Retail Park is situated to the west of Lewisham Town Centre. At present, the site comprises a retail park with four retail units in a linear terrace and associated car parking. The retail park is bound by the A20 and Loampit Vale, which form part of the TfL Road Network, Thurston Road to the east and Jerrard Street to the west.</p> <p>The site is very well served by public transport and has a PTAL rating of 6b (‘Excellent’) due to its proximity to Lewisham DLR and train station, and Lewisham Bus Station.</p> <p>The original planning permission for the retail park was granted in 1989 (ref: DC/02/29055). Since this time, there has been a number of applications for amendments to the retail park including signage applications and applications to amend the amount of food retail floorspace permitted.</p> <p>Most recently, planning permission was granted in March 2019 (ref: DC/16/097629) for: <i>“The comprehensive redevelopment of the Lewisham Retail Park and Nos. 66 – 76 Loampit Vale including the demolition of all buildings on site to facilitate the provision of 4,343sqm of non-residential floorspace comprising (A1) Shops, (A2) Financial & Professional Services, (A3) Restaurants & Cafés, (B1) Business, (D1) Non-Residential Institutions and (D2) Assembly & Leisure uses and 536 residential units in buildings ranging from 4 – 24storeys in height with private and communal</i></p>	The supplementary information is noted. Our response is set out below.	No change.

			<p><i>open spaces, on-site energy centre, car and cycle parking, and associated landscaping and public realm works.”</i></p> <p>The planning permission includes both the Lewisham Retail Park site and nos. 66-77 Loampit Vale which comprise a row of two storey terrace properties. The permission (ref: DC/16/097629) has the following condition attached (Condition 3) which requires the developer to gain control of third party land prior to any works commencing on site: <i>“No development (other than the Enabling Works) shall be carried out under this permission on any land unless and until all legal and equitable interests in the land at 66-76 Loampit Vale have been bound to the provisions of the S106 agreement and title in respect of such interests has been deduced to the LPA.”</i></p> <p>Since planning permission was granted, L&G has successfully secured the acquisition of 66 and 76 Loampit Vale and 68 Loampit Vale has been secured under offer. Despite reasonable attempts, L&G has so far been unable to secure the remaining owning interests in Loampit Vale being:</p> <ul style="list-style-type: none"> • 68 Loampit Vale – Leasehold • 70-72 Loampit Vale – Freehold • 74 Loampit Vale – Freehold <p>L&G has been in discussions with the Council regarding the CPO of the third party land, however due to delays associated with COVID this has not been progressed. Meanwhile, L&G are continuing their efforts to secure the remainder of the units.</p> <p>Current Policy Position Within the adopted Lewisham Local Plan, the site falls within the Loampit Vale Policy area as defined in the Lewisham Town Centre Local Plan (LTCLP). As per Policy LTC4, the sites S3a and S3b (which comprise Lewisham Retail Park and the Carpetright site respectively, as shown in Figure 1) have the following site specific requirements:</p> <ul style="list-style-type: none"> • <i>“The Council require a comprehensive masterplan endorsed by all landowners for these sites and their surrounds</i> • Taller elements of new development should address Loampit Vale • <i>Building lines may need to be set back to accommodate a dedicated bus lane for turning from Loampit Vale into Jerrard Street and the resultant required depth of pavement</i> • <i>Accessibility to Lewisham transport interchange should be enhanced wherever possible.”</i> <p><i>LB Lewisham officer note: Figure 1: Extract from the Adopted Lewisham Town Centre Local Plan is included in the original representation. It shows the site boundaries located south of Lewisham railway station.</i></p>		
L&G (Avison Young obo)	3	LCA SA 08	<p>Comments on the Local Plan Main Issues and Preferred Approach Document</p> <p>We welcome the opportunity to comment on the draft Local Plan and particularly the draft site allocations contained within this. Overall, L&G are supportive of the inclusion of the draft site allocation for Lewisham Retail Park, Loampit Vale (site allocation 8) and the principle of redevelopment for this site.</p>	Support noted. Policy DM3 already provides advice regarding site masterplans in relation to not prejudicing the future development of other parts of the site and adjoining land, that there should be a	Lewisham Retail Park site allocation amended to make reference to partnership working, masterplan and Policy DM3.

			<p>We note that the draft site allocation contains different parcels of land within multiple ownerships. This includes:</p> <ul style="list-style-type: none"> • Lewisham Retail Park – owned by L&G; and • The row of terrace properties at 66-76 Loampit Vale – multiple ownership as set out above. <p>For this reason, we consider the wording of the draft site allocation is overly prescriptive in requiring comprehensive mixed-use redevelopment for the site as a whole. There are a number of practical implications of delivering comprehensive redevelopment for the Site as a whole and as such, we consider the site allocation should be more flexible to allow the two parcels of land to come forward separately. We consider the site allocation should explicitly acknowledge that individual sites within the allocation can come forward within their ownership restrictions, provided that they have the necessary regard to potential future development on adjacent sites.</p> <p>In order to allow this, we suggest the draft site allocation is more akin to the wording of the currently adopted Policy LTC4 which, as above, requires a comprehensive masterplan endorsed by all landowners in relation to the Carpetright site, Lewisham Retail Park and the row of terrace properties at 66-76 Loampit Vale. In light of this, we consider the site allocation should be amended to require mixed-use redevelopment as part of a masterplan approach in conjunction with current owners, where possible. This would ensure that the site could come forward in phases, if necessary owing to land ownership restrictions, without prejudicing adjacent sites from coming forward.</p>	<p>masterplan covering multiple sites in order to demonstrate the acceptability of the scheme both in terms of its immediate and wider context and that there should be active engagement with the landowners and occupiers of the site along with those in other parts of the allocated site. The Plan should be read as a whole.</p>	
L&G (Avison Young obo)	3	LCA SA 08	<p>The draft site allocation includes an indicative development capacity of 536 net residential units. We acknowledge that this reflects the quantum of residential units as part of the extant planning permission for the site (DC/16/097629). However, this planning permission was granted in 2019 and since this time, there has been a shift in policy and more recent development in the vicinity which have changed the surrounding context.</p> <p>Firstly, within the new London Plan there is a move away from prescribed density ranges and a shift towards a more flexible approach to density. This is reflected in Policy D3 which sets out that all development must make the best use of land by following a design-led approach that optimises the capacity of sites. This approach is also reflected in Policy QD6 of the draft Lewisham Local Plan which states development proposals must demonstrate that the design-led approach has been used to optimise a site’s capacity.</p> <p>In order to demonstrate a design-led approach has been used to optimise a site’s capacity, regard should be had to the site context. Since the original application was granted, there has been a change in the context surrounding the site in terms of the quantum of development and consented building heights. The adjacent Carpetright scheme secured an increase of height to 20 and 35 storeys respectively by way of planning permission DC/19/110610. Further, the former Tesco’s car park site at 209 Connington Road (ref DC/17/101621) has planning permission for mixed-use development in buildings up to 34 storeys in height. A design-led approach to density should also take into account the fact that the site is location within an Opportunity Area, Metropolitan Town Centre and has a very high public transport accessibility level (PTAL rating 6b).</p>	<p>The indicative site capacities reflect the latest planning consent that has been granted. In instances where the extant permission will not be implemented, the site allocation capacity has remained the same unless advanced pre-application discussions have been held with regard to an updated scheme.</p> <p>As this is a town centre site, non-residential floorspace will be an essential component of the development, in order to support the long-term vitality and viability of the town centre.</p> <p>Optimal capacity for the site will be established at planning application stage</p>	Lewisham Retail Park site allocation capacities amended to reflect planning consent granted for the site.

			As such, we do not consider that a restrictive quantum of residential units to be delivered on the site is appropriate nor in line with the design-led approach to optimising site capacity as set out in the London Plan and emerging Lewisham Local Plan. There may be potential to further optimise the capacity of the site in line with the new policy approach and this should follow a design-led approach rather than being restricted by the site allocation.	through a design led approach.	
L&G (Avison Young obo)	3	LCA SA 08	<p>The draft site allocation also includes an indicative development capacity for gross non-residential floorspace of 2,171sqm employment floorspace and 2,171sqm main town centre floorspace, which reflects the quantum secured in the extant planning permission.</p> <p>L&G are pleased to see that the requirement for non-residential floorspace reflects the changes to the Use Class Order and specifically the introduction of Class E by allowing for a broad range of main town centre uses on the site. However, since the original planning permission was granted there has been a series of changes in the retail market, particularly more recently due to COVID which has accelerated the decline in interest for large-scale non-food retail. Conversely, there is demand for smaller format food retailing as well as other types of commercial floorspace. Therefore, we do not think it is appropriate for the site allocation to merely reflect the quantum of non-residential floorspace previously consented, but instead introduce flexibility to take into account the changing retail market and ensure that the most economically viable solution for this site can be secured.</p> <p>L&G are broadly supportive of the other development requirements and development guidelines included within the draft site allocation.</p>	Comments noted. Our response is set out above.	No change.
L&G (Avison Young obo)	- 3	General LCA SA 08	<p>Next Steps</p> <p>We understand that the comments received as part of this consultation will inform the 'Proposed Submission' version of the Local Plan, which will be published for public consultation (Regulation 19 stage). We look forward to continued engagement with the Council through the Local Plan preparation process.</p> <p>We look forward to confirmation of receipt of these representations at the earliest opportunity. If you have any queries, please do not hesitate to contact us.</p>	Comments noted. Our response is set out above.	No change.
Eden Park Properties (BPTW obo)	- 3	General LCA SA 17	<p>Re: Representations to the Regulation 18 Lewisham Local Plan 110-114 Loampit Vale, SE13</p> <p>BPTW have been instructed by Eden Park Properties to prepare representations to the Regulation 18 Lewisham Local Plan, relating to 110-114 Loampit Vale, SE13. For context, Eden Park Properties are a family run business which place high-quality design at the centre of their developments. The site has been within EPP's ownership for many years, and they now wish to progress and work with the Council on achieving a high-quality development in this location.</p> <p>Following the submission of the site to the Lewisham Call for Sites consultation in October 2018, the site has now gained an allocation within the Regulation 18 draft Plan for a mixed-use redevelopment incorporating main town centre, commercial and residential uses (Allocation 17 at Page 533 of the draft Plan). This allocation of the site is supported and welcomed, and we look forward to</p>	Support noted.	No change.

			working with the Council to deliver much needed high-quality housing alongside employment floorspace in the Borough.		
Eden Park Properties (BPTW obo)	3	LCA SA 17	<p>Notwithstanding this, we consider the full extent of the site's potential has not been recognised within the draft allocation, particularly the number of residential units envisioned (c.29 units). We consider that the site has potential to deliver a high quantum of development than set out within the draft Plan due to the following reasons;</p> <ul style="list-style-type: none"> • The site is currently an underutilised brownfield site, within a highly sustainable location (i.e. within 200m of Lewisham DLR Station / PTAL of 6B). The need for housing within London has never been greater, and sites such as this one should be fully optimised to support the long-term vitality and viability of Lewisham Town Centre. • The site has few planning designations; the existing buildings on site are not locally nor statutorily listed and the site does not fall within a Conservation Area. Given this, the site represents a prime opportunity to enhance development in this location. • The site is located on the edge of Lewisham Town Centre, therefore is located in close proximity to services and facilities. • There are a number of large-scale regeneration schemes within the immediate surroundings of the site including Thurston Industrial Estate. Most of these schemes are now built out, or are currently under construction and provide a clear precedent for height and massing within the area. The site represents an opportunity to provide a transitional massing between the terraces to the west and the taller buildings to the east. • The principle of development for residential uses was previously supported through the previous application on site (LPA Reference: DC/20/118304). <p>Based on the above, we welcome the Council's conclusion that the site is suited towards a mixed-use development, and to clarify, EPP are committed to re-providing the appropriate employment floorspace on site to achieve the aspirations of the allocation. However, we consider that given the surrounding context of development, and the increasing need for both affordable and market housing within Lewisham, the site should be fully optimised and a higher density development could be supported.</p> <p><i>LB Lewisham officer note: a map is included in the original representation showing the boundary of the site.</i></p> <p>To conclude, we wish to reiterate that EPP are keen to work with the Council to achieve a mixed-use development in line with the aspirations of the New Lewisham Local Plan at 110-114 Loampit Vale. However, to ensure the scheme is viable and fully optimises this brownfield site, we consider that a higher quantum of development can be provided which still takes into consideration the site's constraints. The site is extremely well connected to public transport and is situated within an area considered suitable for increased development density. The current buildings on site are of low architectural quality, therefore the site offers a prime opportunity to contribute towards meeting the increasing housing targets through the optimisation of a brownfield site.</p>	<p>Where no pre-application discussions have taken place, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Ste Allocations Background Paper.</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the re-provision of some employment floorspace on this non designated employment site but also flexibility to introduce town centre uses and the need to transition in this edge of town centre location by continuing the building line to the west of the railway. Based on these considerations, the residential capacity has only marginally increased by 1 unit, although the mix of land uses has changed.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	110-114 Loampit Vale site allocation amended by increasing net residential units to 30, reducing employment floorspace to 298m ² and raising town centre floorspace to 596m ² .
Eden Park Properties (BPTW obo)	- 3	General	The Council should note that EPP are also committed to delivering development at this site. Since the submission of the Call for Sites form back in October 2018, EPP have been in discussion with BPTW regarding the possible quantum of	Comments noted.	No change.

		LCA SA 17	<p>development on site. Internal discussions have progressed within the Project Team, and EPP now wish to progress towards pre-application within the next month, with the Council. Following this, EPP wish to progress towards a full planning application around Summer 2021.</p> <p>We look forward to working with the Council and delivering the aspirations of the New Local Plan. If you have any queries relating to the representations, then please do not hesitate to get in touch.</p>		
Royal London Mutual Insurance Society Limited (Montagu Evans obo)	- 3	General LCA SA 18	<p>LEWISHAM LOCAL PLAN – CONSULTATION ON MAIN ISSUE AND PREFERRED APPROACHES (REGULATION 18)</p> <p>RAVENSBOURNE RETAIL PARK</p> <p>On behalf of our client, Royal London Mutual Insurance Society Limited (“RLMIS” / “Client”), we write to submit representations for the “Consultation on Main issues and preferred approaches” (Regulation 18) in relation to Ravensbourne Retail Park (the “Site”).</p> <p><i>LB Lewisham officer note: a site location plan is included in Appendix 1 in the original representation.</i></p> <p>These representations are in support of the Lewisham Central Area Allocation 18: Ravensbourne Retail Park and we support the site’s inclusion in the final Local Plan once adopted for the reasons set out in this letter. Notwithstanding this, we consider that there are further refinements to be made to ensure that the site allocation better reflects the recent shifts in planning policy, as well as the local market.</p>	Support noted. Our response is set out below.	No change.
Royal London Mutual Insurance Society Limited (Montagu Evans obo)	- 3	General LCA SA 18	<p>Site Context and Background</p> <p>The Site is located circa 290m north of Bellingham Station. The Site falls outside of the Bromley Road SIL which is located adjacent to the north-western and southern boundaries. The Site also abuts residential development to the north-east, east and west. The Site itself covers an area of 2.71 hectares comprising units one to five of Ravensbourne Retail Park, along with the associated hardstanding car park. These units are currently in use for Retail and Leisure (Gym) purposes totalling 6,729 sqm (GIA), with the split outlined in Figure 1 below.</p> <p><i>LB Lewisham officer note: Figure 1: Split of Uses and Areas is included in the original representation. The table lists the retail and leisure uses (GIA sqm) present in the retail park.</i></p> <p>The Site is well connected, with good access to public transport, which is reflected by its PTAL rating of 4.</p> <p>The buildings on Site are not listed nor is the Site located in close proximity to any listed buildings. A small section of the eastern part of the Site falls within the Curlverley Green Conservation area.</p> <p>The Site was first put forward in the 2015 call for Sites and was subsequently assessed in the London SHLAA (2017) and by the Lewisham Strategic Planning Team (2019). Following this, the Site was given a draft allocation in the Main</p>	Comments noted. Our response is set out below	No change.

			<p>Issues and Preferred Approaches document (Regulation 18) which these representations are submitted in response to.</p> <p>RLMIS has also met with the Lewisham Regeneration Team to discuss the development potential of the Site.</p>		
Royal London Mutual Insurance Society Limited (Montagu Evans obo)	3	LCA SA 18	<p>Emerging Allocation - Lewisham Central Area 18: Ravensbourne Retail Park</p> <p><u>Principle of the Allocation</u> As explained above, the Site has a draft allocation which these representations have been submitted in support of.</p> <p>The allocation promotes the comprehensive mixed-use development of the retail park comprising residential, main town centre and commercial uses. To support these uses, the allocation includes public realm and environmental enhancements, such as new public open space and river restoration. RLMIS is supportive of the draft uses in principle, along with the aforementioned enhancements.</p> <p>RLMIS is keen to ensure that its vision for the redevelopment of the Site is consistent with the objectives of the emerging allocation, as well as the wider borough and the GLA. Likewise, RLMIS supports the identification of the potential of the Site to deliver new jobs and homes in the early phases of the London Plan. We consider that this would contribute to the delivery of much-needed homes and jobs whilst having a positive impact on the surrounding area.</p> <p>The allocation currently shows an indicative capacity as follows:</p> <ul style="list-style-type: none"> • 343 Residential Units; and • 12,786 sqm of Main Town Centre Floorspace. <p>Whilst we are supportive of the emerging allocation and the principle of the uses proposed, the draft allocation proposes almost double the amount of town centre use floorspace compared to the existing provision (6,729 sqm). We are of the view that this draft quantum of town centre floorspace is excessive and does not align with national, regional and local objectives. In addition, such provision does not reflect the character of the prevailing area or the local market. Secondly, we are of the view that in light of the shift in planning context, the Site could be further optimised to provide a greater quantum of both market and affordable residential units. We explain this in greater detail below.</p> <p>Following research into the local market, RLMIS has commissioned an architect to undertake a massing and capacity study to establish the Site's redevelopment potential. This study demonstrates that the Site can comfortably deliver circa 750 units (circa 300 DPH), along with approximately 2,000 sqm of town centre uses at the lower levels. The massing of this scheme has been advanced based on initial Sunlight/Daylight testing, along with analysis of the neighbouring buildings and an assessment of the public realm and amenity space. Although we have not submitted the detailed studies as part of these representations, we have included an overview of the draft scheme at Appendix 2.</p>	<p>The pre-application is likely to evolve prior to the submission of a planning application, and so cannot be relied upon to provide a design led capacity for this site. In these instances the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Site Allocations Background Paper.</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. We agree that the draft quantum of non-residential floorspace was excessive and we have reduced the employment floorspace element of it accordingly. The indicative capacity has also been tested through the A21 Development Framework that has been endorsed by the council and found that the capacity of residential units is reasonable, taking account of the existing character of the area whilst optimising the site.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach. -</p>	<p>Ravensbourne Retail Park site allocation amended to show 367 residential units, 7749m2 gross employment floorspace and 1937m2 gross (-5,719m2 net) town centre floorspace.</p>

			<p><i>LB Lewisham officer note: Appendix 2: Initial Sketch Proposal is included in the original representation. The sketch shows multiple buildings accommodating 750 new homes and 2,000m2 of non-residential development.</i></p> <p>We will submit the detailed supporting information to Lewisham Planning Department in order to arrange a pre-application meeting in due course.</p>		
Royal London Mutual Insurance Society Limited (Montagu Evans obo)	3	LCA SA 18	<p><u>Town Centre Uses</u></p> <p>Firstly, in terms of the indicative quantum of town centres uses, it is pertinent to note that the Site is not located in a Town Centre and falls outside of the adjacent Bromley Road SIL, with the majority of the surrounding area predominately being used for residential purposes. Of particular relevance to this, in the consultation document, part b of the Central Area place principles (LCA1) points out that new employment development is to be concentrated within town centres and the Bromley Road Strategic Industrial Location.</p> <p>In addition, the London Plan takes a strong “town centre first” approach, explaining at paragraph 2.7.1 that: <i>“Out-of-centre development can be particularly detrimental to town centres, undermining their economic performance, local character, and the accessibility they provide to a broad range of services, and encouraging increased trips by car”.</i></p> <p>The Plan also explains at paragraph 2.7.5 that: <i>“Redevelopment of retail and leisure parks to deliver housing intensification is encouraged, as set out in Policy H1 Increasing housing supply. This should not generally result in an increase of retail or leisure floorspace, taking account of the town centres first approach, the sequential approach to town centre uses, and impact assessments where appropriate.”</i></p> <p>In addition to the above policy context, JLL Retail Agency has undertaken a review of the retail market which has confirmed that retail property in Lewisham is suffering many of the same national oversupply issues. There has been structural change ongoing in the retail sector for over a decade, principally driven by the increasing trend for online shopping. This is resulting in a massive reduction in the requirement by retailers for retail property floorspace. JLL research has estimated (pre-pandemic) that the oversupply requires a reduction of circa 80,000 UK retail units before the supply demand finds its balance again. The COVID crisis has accelerated this change, with a significantly increased demand for online retailing and substantial reduction in the demand for physical retail accommodation.</p> <p>Turning specifically to Ravensbourne Retail Park, the situation is the same. Falling rents reflect the falling demand by tenants who want to rent the space. Tenants are both downsizing their retail footprints and closing stores completely. This has been evidenced on site with the last two lettings being as a result of retail downsizing or closure. Most recently with Harveys going into administration and the new tenant seeking terms at much lower rents. Prior to that, the former</p>	<p>The supplementary information is noted. Our response is set out above.</p> <p>Since the Regulation 18 plan was published, the council has carried out additional studies to consider the impact of Covid-19, including a Town Centres and Retail Study. Findings have informed the Regulation 19 plan.</p>	<p>Ravensbourne Retail Park site allocation amended to reflect a revised land use mix.</p>

			<p>Carpetright unit was let to a health and fitness operator on reduced rental terms, but also with little demand from retailers for the space. This is expected to continue, and whilst tenant failure is still fairly uncommon, we expect tenants to close their stores on lease expiry rather than renegotiate a new lease on similar terms. This situation is unviable for retailers and also for the landlord. Therefore, alternative solutions for the site need to be identified ahead of the leases expiring in 2024.</p> <p>Although we feel that an element of town centre use re-provision is appropriate, we are of the view that given the considerations outlined above, this quantum should be reduced significantly from the current indicative figure to circa 2,000 sqm (which reflects JLL's market research). Instead, town centre uses should be concentrated in town centre locations as stipulated by regional policy and supported by market research. In turn, this would allow an optimum delivery of much needed market/affordable residential development on the Site, which we feel is a more appropriate use, as explained in greater detail below.</p>		
Royal London Mutual Insurance Society Limited (Montagu Evans obo)	3	LCA SA 18	<p><u>Residential Development</u></p> <p>As outlined above, we support the principle of residential development which has been included in the draft allocation for the Site. However, we consider that given the shift in planning context, the Site should be further optimised to ensure that it <i>"makes as much use as possible of previously developed land"</i> in accordance with Paragraph 117 of the NPPF.</p> <p>From a market perspective, the Site is an exceptional residential location when you consider the transport connectivity, local amenities and lack of competing development. Bellingham station is just a 6-minute walk from the site, with direct services to Central London in less than 30 minutes making it ideal for commuters and working families.</p> <p>Numerous public parks, schools and facilities are located nearby and the site already boasts an attractive green area separating the site from Bromley Road. The River Ravensbourne flows directly west of the site. The surroundings are predominantly residential and would make an ideal neighbourhood for a flourishing new community. New residents would also benefit from their proximity to the amenities of Catford town centre.</p> <p>The scale of the site presents a compelling opportunity to deliver the first major scheme in Catford since the redevelopment of the former Greyhound Stadium. The lack of competing schemes means we would anticipate significant demand in this location from first-time buyers and families.</p> <p>Looking explicitly at housing targets in the Borough, the recently published Annual Monitoring Report 2019-2020 (January 2021) identifies that the Borough has the following Five Year Housing Land Supply:</p> <ul style="list-style-type: none"> • Housing Supply – 7,359 dwellings • Five Year Housing Target (London Plan 2016) – 6,925 dwellings (1,385 per annum) • Five Year Housing Target + 5% buffer – 7,271 (1,454 per annum) • Five Year Housing Target + 20% buffer – 8,310 (1,662 per annum) • Five Year Housing Land Supply (5% buffer) – 5.06 Years • Five Year Housing Land Supply (20% buffer) – 4.43 Years 	The supplementary information is noted. Despite an increase in the London Plan housing target, the Regulation 19 Local Plan identifies specific deliverable and developable sites with capacity to meet the Borough's strategic housing target over the plan period. The council can demonstrate a five year housing land supply and has included a Housing Trajectory within the Plan.	Local Plan amended to appropriately refer to the London Plan (2021), its borough-level housing target for Lewisham and period with which this takes effect. In addition, the plan has been amended to remove references to the Local Housing Need (LHN) figure and the standard methodology. Local Plan amended to include an up-to-date Housing Trajectory and five year housing land supply.

			<p>It should be noted that since the above was published the London Plan 2021 was adopted on 2 March 2021. With the Plans adoption, Lewisham’s housing target was increased to 1,667 dwellings per annum, which when substituted into the above calculation results in the following:</p> <ul style="list-style-type: none"> • Five Year Housing Land Supply (5% buffer) – 4.2 Years • Five Year Housing Land Supply (20% buffer) – 3.6 Years <p>It is evident that with the adoption of the New London Plan there is increasing pressure on Lewisham to deliver housing, with the new requirement resulting in a lack of a Five Year Housing Land Supply. In addition to this, a revised standardised methodology was published by the government on 16 December 2020, with the updated annual figure for Lewisham being 4,178 dwellings, which further exacerbates housing pressure in the Borough.</p> <p>It is important to note Lewisham’s housing targets in the wider London-wide context, for which the Strategic Housing Market Assessment (“SHMA”) (that informs the London Plan) identified the need for 66,000 additional homes per year. For the purpose of the London Plan, London is considered as a single housing market area, with a series of complex and interlinked sub-markets (see supporting paragraph 4.1.2). The Mayor recognises that the delivery of homes of this scale will require not just an increase in the applications approved, but also a fundamental transformation in how new homes are delivered.</p> <p>Therefore, it is clear that sustainable, previously developed sites should be maximised in order to meet the increased housing pressures in the borough and wider-London. This is outlined in London Plan Policy GG2 (Making the Best Use of Land) which promotes higher density development, particularly in locations that are well-connected to jobs, services, infrastructure and amenities by public transport, walking and cycling. As previously explained, the Site is well connected to public transport and is also located in close proximity to a mix of services and amenities.</p> <p>Overall, we consider that there is a clear need for the draft allocation to further optimise the Site in order to maximise the quantum of market and affordable residential units that can be delivered, which in turn would help meet growing housing pressures. The massing and capacity study that we have undertaken indicates that circa 750 units are achievable. Not only would this increased quantum better reflect the uses of the prevailing area and the market forces at play, but also align more closely with the recent shift in planning policy which places an emphasis on making best use of previously developed land.</p>		
Royal London Mutual Insurance Society Limited (Montagu Evans obo)	3	LCA SA 18	<p>Summary</p> <p>These representations are submitted on behalf of RLMIS in respect of Ravensbourne Retail Park.</p> <p>RLMIS is currently exploring options to redevelop the Site, with the intention of entering into pre-application discussions shortly. As such, we are writing to support the draft Lewisham Central Area Allocation 18 in principle.</p>	The supplementary information is noted. Our response is set out above.	No change.

			<p>However, we consider that there are some tweaks to the quantum necessary in order to more closely align with the shift in planning context and the local market.</p> <p>Firstly, whilst we agree that some level of retail re-provision is suitable, we are of the view that the indicative amount of town centre floorspace is not reflective of the Site's out of town centre location and omission from the Bromley Road SIL. When combined with the market research we have undertaken, this outlines that a reduced provision of town centre uses is more appropriate in this location, with our research suggesting a quantum of 2,000 sqm.</p> <p>As identified by the Council, the Site is suitable for residential development. However, the additional feasibility work that we have undertaken demonstrates that the Site is capable of delivering greater density (circa 750 units), which would align with the NPPF and the shift of regional policy. This would also better contribute to the growing housing targets in Lewisham and wider-London, as well as helping to facilitate the potential for an increased number of affordable units.</p>		
Royal London Mutual Insurance Society Limited (Montagu Evans obo)	3	General LCA SA 18	We welcome the opportunity to discuss the content of these representations further with the London Borough of Lewisham and are keen to be involved in the forthcoming examination process. In the meantime, should you wish to discuss any of the above please do not hesitate to contact us.	Comments noted. Our response is set out above.	No change.
Phoenix Community Housing (BPTW obo)	3	LCA SA 18	18 & 25 – Ravensbourne Retail Park and other SIL Land at Bellingham growth node (Central Area) – PCH offers its support to the inclusion of residential development here as part of the appropriate mix of uses.	Support noted. Agree with mixed uses at Ravensbourne Retail Park but disagree with residential uses at Bromley Road SIL. Co-location can only take place where SIL is released and compensatory provision of SIL is designated elsewhere.	No change.
Tesco Stores Ltd (Lichfields obo)	3 2	LCA SA 19 Para 14.97	<p>Site Allocation 19: Catford Shopping Centre and Milford Towers</p> <p>Tesco supports the inclusion of its large supermarket and the adjoining multi-storey car park within the 3.42 ha site allocation (para 14.96), comprising compatible retail, leisure, commercial, community and residential uses.</p> <p>Opportunity</p> <p>Tesco agrees that the site forms the heart of the Catford Major Centre and that its transformation should <i>“act as a major catalyst for regeneration, as part of a comprehensive masterplan framework”</i> (LLP para 14.97).</p> <p>The existing Tesco supermarket provides an anchor role within the existing shopping centre, helping to drive footfall into the centre. As such the provision of a modern replacement store, better integrated within the wider town centre,</p>	Support noted. Agree that a replacement retail store should be referenced in the policy.	Catford Shopping Centre and Milford Towers site allocation be amended by referencing a replacement large supermarket.

			<p>should be a key component of the successful regeneration of the site. The draft allocation currently lacks an explicit reference to this, notwithstanding that the Catford Town Centre Framework (Oct 2020) (CTCF) makes several references to the retention of the anchor foodstore.</p> <p><u>We therefore suggest that the penultimate sentence of the para 14.97 be amended</u> as follows: <i>“Comprehensive redevelopment will deliver a significant amount of new housing together with modern retail (including a replacement large supermarket) and employment space, leisure, community and cultural facilities to support long term vitality and viability, and reinforce its role as a civic and cultural hub.”</i></p>		
Tesco Stores Ltd (Lichfields obo)	3 2	LCA SA 19 Para 14..49	<p>Development Requirements and Guidelines</p> <p>Tesco note that the Site Allocation Development Requirements (para 14.98) state that redevelopment of the site <i>“must be in accordance with the Catford Town Centre Masterplan”</i>. That cannot be a requirement of new development if the Masterplan is not part of the LLP and its formal consultation process. This should, <u>we recommend, be a (the first) Development Guideline instead</u>: one indicating <i>“Development should be delivered in accordance with the principles of the Catford Town Centre Masterplan”</i>.</p> <p>It is understood that the CTCF represents an early draft of this Masterplan. That Framework includes multiple references to the retention of an anchor foodstore, including (at para 3.7.4) that the <i>“central location and relatively large plot sizes make the Lanes a suitable location for... an improved anchor food store to serve existing and new residents.”</i></p> <p><u>We therefore suggest that the fourth bullet point of the Development Guidelines</u> (at para 14.99) be revised to read: <i>“Buildings should provide for a range of footprint sizes to accommodate a variety of town centre commercial and community uses, including a replacement large supermarket, and be designed to provide flexibility to enable subdivision of units.”</i></p>	<p>Disagree that text relating to Catford Town Centre Masterplan should be amended or swapped from Development Requirements to Development Guidelines.</p> <p>Agree that a replacement large supermarket should be referenced in the site allocation.</p>	Catford Shopping Centre and Milford Towers site allocation amended by referencing a replacement large supermarket.
Tesco Stores Ltd (Lichfields obo)	3 2	LCA SA 19 Para 14..49	<p>The Development Guidelines (at para 14.99) note that <i>‘Car parking should be the minimum required to maintain the viability of the town centre, whilst also reflecting the high level of public transport accessibility’</i>. Tesco notes that the CTCF includes indicative layouts and cross sections (on pages 78 and 80) that show a large foodstore with a pedestrian entrance facing Rushey Green and lower ground level car parking accessed from Holbeach Road.</p> <p>To provide clarity and consistent with the CTCF approach, <u>we suggest this Development Guideline is revised</u> as follows: <i>“Car parking should be the minimum required to maintain the viability of the town centre, including that of any replacement large supermarket, whilst also reflecting the high level of public transport accessibility.”</i></p>	Comments noted but this text is now proposed for deletion, in order to reduce repetition and ensure clarity in implementing the car parking standards contained in Policy TR4.	All site allocations amended by removing references to car parking.
Barratt London and the Church Commissioners (Avison Young obo)	- 3	General LCA SA 20	<p>Representation to Lewisham Local Plan Regulation 18 Stage “Main Issues and Preferred Approaches” (Dated January 2021) Barratt London and the Church Commissioners</p> <p>We write on behalf of Barratt London and the Church Commissioners in representation to the Lewisham Local Plan Regulation 18 Stage “Main Issues and</p>	Support and comments noted. Our response is set out below.	No change.

			<p>Preferred Approaches” (Dated January 2021). This document was published for consultation by the London Borough of Lewisham (LBL) in January 2021.</p> <p>Broadly, Barratt London and the Church Commissioners support LBL’s aspiration to proactively respond to population growth and help to meet London’s housing need by positively managing the delivery of new homes across the Borough, and through ensuring that town centres support growth, including in retail, business and cultural activities. We have identified a number points following review of the Main Issues and Preferred Approaches Document which we set out below. We request that LBL consider these matters during the future consultation and preparation stages of its new Local Plan.</p> <p>Context of Representation</p> <p>Barratt London and the Church Commissioners are in the process of working together to jointly prepare redevelopment proposals for the Plassy Island site within the east of Catford Town Centre (please see appended Location Plan for further details). Initial pre-application discussions have been held with Planning Officers.</p> <p>Given that the Plassy Island site comprises an important strategic and brownfield redevelopment opportunity within Catford Town Centre (as identified within the current Draft Catford Town Centre Framework (CTCF)), the emerging Local Plan is hugely relevant to Barratt London and the Church Commissioners’ development aspirations at this stage.</p> <p>Comments on Local Plan Main Issues and Preferred Approaches Document</p> <p>We set out a series of comments below concerning various sections of the Local Plan Main Issues and Preferred Approaches document for your consideration. We follow the general order of topics within the document and respond to pertinent points of particular relevance to our client.</p>		
Barratt London and the Church Commissioners (Avison Young obo)	- 3	General LCA SA 20	<p>Next Steps</p> <p>We would like to thank you for the opportunity to be involved in the ongoing preparation of the Local Plan. We trust that the above comments are clear and helpful.</p> <p>We request that we are kept updated concerning any future consultation stages concerning the Local Plan document.</p> <p>Please do not hesitate to contact us should you require any additional details, or should you wish to discuss any of the above, at this stage.</p>	Comments noted. Our response is set out below.	No change.
Barratt London and the Church Commissioners (Avison Young obo)	3	LCA SA 20	<p>Chapter 14 Lewisham’s Central Area Site Allocation 20. Plassy Road Island Site</p> <p>Barratt London and the Church Commissioners strongly support the principle of mixed use, residential-led development on the Site. We consider the Site to be an integral and important redevelopment opportunity within Catford Town Centre which will ultimately be key to delivering sustainable and long-lasting regeneration benefits locally.</p>	Support noted. Part 3 of the Plan already specifies that they are indicative capacities and that optimal capacity for the site will be established at planning application	Catford Island site allocation amended to make reference to tall buildings.

			<p>The indicative development capacity of 602 residential units, 6,206 sqm of employment and 6,206sqm main town centre uses provides useful context, however, we request the allocation clearly acknowledge that these figures are indicative only, and that the <i>'final development quantum should be determined through a design-led approach to make the best use of land and optimise development in accordance with the Council's Draft Local Plan Policy QD6 and London Plan Policy D3'</i>.</p> <p>This approach will ensure that the future development proposals deliver an appropriate level of development for the Site, taking account of the existing and emerging context of the town centre, contributing to its vitality and viability, and the Borough's housing target. In addition, this will provide flexibility for the design to develop in consultation with planning, design and highways officers at pre-application stage.</p> <p>The development requirements for the draft allocation set out that development must be delivered in accordance with the Catford Town Centre Masterplan. The Draft Catford Town Centre Framework (September 2020) indicates the Site is earmarked for delivery of high-density development including a centrally located taller marker building. We request the draft allocation is amended to refer to this established principle of a taller central marker building, to help ensure consistency between these policy documents.</p>	<p>stage through a design led approach.</p> <p>Agree that a taller building should be located centrally.</p>	
Transport for London Commercial Development	3	LCA SA 20	<p>20 - Plassy Road Island</p> <p>Lewisham Council's site allocation of 'Plassy Road Island', at present, includes several TfL-owned landholdings including 1 – 19 Sangley Road, and 14 (a/b) Brownhill Road. TfL CD recommend that the site allocation boundary be extended to incorporate TfL's landholding at '201 - 205 Rushey Green' – see image below for TfL landholdings. You should note that the Plassy Road Island site is bounded by TLRN, namely parts of Brownhill Road, Plassy Road, Sangley Road and Rushey Green.</p> <p><i>LB Lewisham officer note: a map showing TfL's landholdings in the vicinity of the Catford Island site is included in the original representation.</i></p>	<p>Comments noted.</p> <p>Following the Regulation 18 consultation, the site allocation boundary has been re-visited.</p>	<p>Catford Island site allocation boundary has been amended to include TFL owned land at 201-205 Rushey Green (corner plot of Rushey Green and Sangley Road).</p>
Canada Life Ltd (Williams Gallagher obo)	- 3	General LCA SA 22	<p>Williams Gallagher act for Canada Life Limited and are instructed to provide comments to the Lewisham Local Plan Regulation 18 Consultation.</p> <p>I would be grateful for confirmation of receipt of these comments.</p> <p>Canada Life owns a large part of Site Allocation 22 (Wickes and Halfords, Catford Road) and have been in dialogue with Lewisham Council to confirm our general support for the development principles set out within the Catford Masterplan and which are in turn reflected within Site Allocation 22 of the Lewisham Local Plan. However, by email dated 5th March 2021 we raised the following matters which the emerging Catford Masterplan and also the emerging Lewisham Plan should take into account:</p>	<p>Comments noted.</p>	<p>No change.</p>
Canada Life Ltd (Williams Gallagher obo)	3	LCA SA 22	<p><i>"Having reviewed the draft document, we wanted to raise some minor points which it would be helpful if the Masterplanning team could take into consideration. We are supportive of the general approach set out in the Masterplan and note that it will be used as evidence to the emerging replacement Lewisham Local Plan which is currently out for Regulation 18 Consultation until 11th April 2021.</i></p>	<p>The site allocation already provides flexibility. The Development Guidelines state that development should maximise</p>	<p>Local Plan amended to make reference to the updated Use Classes.</p>

			<p>Catford Town Centre Framework 2020 Comments:</p> <ul style="list-style-type: none"> • p105 - The potential to uncover the Ravensbourne River is supported. However, at this time there is no information to confirm that the statutory bodies for the river support this approach nor has there been a viability exercise to assess the costs of the works. Our client has instructed an engineering consultancy to review both matters and we will report back to the council once the information is available. We do therefore consider that at this stage there should be recognition in the Masterplan principles that if the opening up of the river cannot be achieved due to restrictions by statutory bodies or it is makes development unviable (through robust viability assessment) it will not then be a pre-requisite of the scheme. To be clear, we do consider opening up the river is an important and integral part of the placemaking principles for the site meaning it should only fall away as a pre-requisite where the landowner and council have explored all reasonable solutions to secure delivery. • P106 - The key on the building heights plan does not reflect the colouring on the plan. We believe the dark blue would logically be the 17-20 storey annotation and the colour grading should be corrected in the legend. • p107 - The annotation on the lower level uses need to be updated to reflect the new E Use Class and its associated sub categories (a)-(e) excluding E(g)(iii) industrial processes. A5 would also still need to be included as this is not covered by the Class E." <p>In summary, Canada Life is in the process of assessing the costs associated with deculverting the Ravensbourne River and meeting all other policy requirements for delivery of the emerging Local Plan - including reducing flood risk, safe emergency planning and biodiversity gains. The policy should therefore recognise that if de-culverting the river is not physically / technically possible / viable, this would not preclude the delivery of the site for a high density, residential led mixed-use community.</p>	opportunities to enhance the river, <i>including</i> (but not restricted to) de-culverting.	
(Avison Young obo)	- 3	General LCA SA 25	<p>LEWISHAM LOCAL PLAN: REGULATION 18 CONSULTATION: WRITTEN REPRESENTATIONS OBO FRANK GRIFFITHS</p> <p>These representations are made on behalf of our client, Frank Griffiths, in relation to the Regulation 18 Local Plan Consultation: Main Issues and Preferred Approach to Proposed Changes to the Adopted Policies Map being undertaken by the London Borough of Lewisham. The consultation material comprises:</p> <ul style="list-style-type: none"> • Local Plan: Main Issues and Preferred Approaches; • Proposed Changes to the Adopted Policies Map; • Integrated Impact Assessment and Non-Technical Summary; • Habitats Regulation Assessment; • Draft Infrastructure Delivery Plan; and • Relevant Evidence Base, including the Employment Land Review (2019), Site Allocations background paper (2021) and Residential Density Technical Paper (2020). <p>These representations do not intend to respond to all of the policies proposed in the draft Local Plan, rather those that are relevant to the proposed development site at this stage, in particular;</p> <ul style="list-style-type: none"> • Site Allocation 25: Land at Randlesdown Road and Bromley Road; and 	Comments noted. Our response is set out below.	No change.

			<p>• Draft Policy EC2: Protecting Employment Sites and Delivering New Workspace.</p>		
(Avison Young obo)	- 3	General LCA SA 25	<p>Site Context The site is located at the junction of Randlesdown Road and Bromley Road, Lewisham. It comprises a number of existing buildings and uses as set out in Table 1, below.</p> <p><i>LB Lewisham officer note: Table 1: Existing uses at Randlesdown Road is included in the original representation. It lists the categories of use that current exist on the site.</i></p> <p>The site is well contained at present. It is bordered:</p> <ul style="list-style-type: none"> • to the north by Stagecoach Catford Garage (a storage facility for Stagecoach buses) with Bromley Retail Park and residential development beyond; • to the east by the A21, beyond which is a parade of shops and existing residential dwellings; • to the south by a parade of shops adjacent to Randlesdown Road; and • to the west by the Ravensbourne River and Franthorne Way, which provides access to the Bellingham Trading Estate. <p>The shop frontage along Randlesdown Road is located outside of the site boundary. We note that this is being excluded from the proposed SIL designation as per the consultation material, however part of this frontage is within the same ownership and should be included within the Allocation accordingly.</p> <p><i>LB Lewisham officer note: Appendix 1 site plan is included in the original representation. It includes land which has not been included within the draft proposed Allocation area.</i></p> <p>The site is currently accessed from the A21, or alternatively, access can be taken from Franthorne Way via an existing service yard.</p> <p>The frontage of the site is approximately 200m away from Bellingham Train Station (equivalent to a 5-minute walk).</p> <p>The site is located less than 100m from the Bellingham Road bus stop (north) which provides access to a number of services including 54, 136, 208, 320, N136 and N199. Bellingham Road bus stop (south) is located approximately 100m to the site frontage and provides access to the same level of services.</p> <p>The site has a PTAL rating of 4.</p> <p>There are no statutory listed historic assets within, or adjacent, to the site boundary. The nearest heritage assets are approximately 100m to the west and include the Fellowship Inn Pub and attached hall (Grade II), together with a number of residential dwellings to the south east (Grade II). The proposed development is unlikely to result in adverse impacts on these heritage assets.</p> <p>The site is located in Flood Zone 2 and is therefore subject to a medium probability of flooding.</p>	Comments noted. Our response is set out below.	No change.
(Avison Young obo)	-	General	<p>Planning History <i>The proposed development site's planning history is detailed in the Appendix II.</i></p>	The supplementary information is noted.	Randlesdown Road and Bromley Road site

	3	LCA SA 25	<p>The planning history of the site includes three development proposals which have been through two appeal processes. In August 2013, the land at 202 – 210 Bromley Road was subject to an appeal (APP/C5690/A/13/2192356) against the Council refusal to grant planning permission in January 2013 (DC/12/080231/X) for the redevelopment of part of the site for a hotel.</p> <p>In conclusion, the Inspector stated that the development would not harm the future redevelopment of the bus garage, but that the development would harm the supply of industrial land within the Borough. It was noted that the redevelopment for existing land values and development costs refurbishment of the existing buildings or re-development for industrial or storage purposes is not viable.</p> <p>A subsequent appeal process concluded in June 2015 (APP/C5690/A/14/2223342 and APP/C5690/A/14/2223348) against the Council's refusal to grant planning permission in May 2014 and June 2014 for hotel (DC/14/86542) and residential-led (DC/14/87384) developments respectively.</p> <p>In conclusion, the Inspector states that the development would not be undertaken as part of strategically co-ordinated release from SIL and that the whole range of potential employment uses of the site had not been tested – albeit that five scenarios for employment re-development had been shown to be non-viable.</p> <p>We are also aware that the site has been subject to pre-application advice from Lewisham in respect of its redevelopment to provide an intensification of SIL floorspace, with residential units above (Pre-application Reference: PRE/17/100975). The proposed scheme intended to provide 115 residential units of 4-10 storeys, with parking under a podium, together with 850 sqm of SIL compatible spaces, artists workshops, SME offices. The represented an uplift of 75sqm of SIL floorspace.</p> <p>Lewisham concluded that the development site had a high occupancy level, indicating that it is meeting an identified need and there is ongoing demand for commercial premises in this location.</p> <p>Further, that the site is providing employment and contributing to meeting the Borough's and London's economic needs in a sustainable location.</p> <p>Nevertheless, the then London Plan and the adopted Lewisham Local Plan did not support residential development on SIL, a position that has subsequently changed. Furthermore, the Council has subsequently commissioned an Employment Land Review which concludes that the site is poor quality and could be redeveloped.</p>	<p>Mixed-use development is not suitable or deliverable on this designated SIL, as there has been no comprehensive approach to warrant the release of this SIL and no compensatory SIL is being provided elsewhere. Residential use on this site would also compromise the operational use of the adjacent bus garage.</p> <p>The Council is supportive of redeveloping the site for non-residential uses, appropriate to its SIL designation.</p>	allocation has been removed from the Plan.
(Avison Young obo)	- -	General LCA SA 25	<p>Planning Policy Context <i>National Planning Policy Framework (NPPF) (2019)</i> The NPPF (2019) sets out the purpose of the planning system, that is to contribute to the achievement of sustainable development. This will be met through three overarching objectives, which are interdependent of each other:</p>	The supplementary information is noted. Our response is set out above.	No change.

		<p>a. “an economic objective – to help build a strong, responsive and competitive economy, by ensuring that sufficient land of the right types is available in the right places and at the right time to support growth, innovation and improved productivity; and by identifying and coordinating the provision of infrastructure;</p> <p>b. a social objective – to support strong, vibrant and healthy communities, by ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations; and by fostering a well-designed and safe built environment, with accessible services and open spaces that reflect current and future needs and support communities’ health, social and cultural well-being; and</p> <p>c. an environmental objective – to contribute to protecting and enhancing our natural, built and historic environment; including making effective use of land, helping to improve biodiversity, using natural resources prudently, minimising waste and pollution, and mitigating and adapting to climate change, including moving to a low carbon economy.”</p> <p>Chapter 3 of the NPPF states that the planning system should be genuinely planned and that up-to-date development plans should provide a positive vision for the future of each area; a framework for addressing housing needs and other economic social and environmental priorities; and a platform for local people to shape their surroundings.</p> <p>Paragraph 31 confirms that the preparation and review of all planning policies should be underpinned by relevant and up-to-date evidence: <i>“This should be adequate and proportionate, focused tightly on supporting and justifying the policies concerned, and take into account relevant market signals.”</i></p> <p>Paragraph 35 confirms the examination tests which will be applied to new Local Plans and spatial development strategies to ensure they have been prepared in accordance with legal and procedural requirements. Plans will be found ‘sound’ if they are:</p> <ul style="list-style-type: none"> • “Positively prepared – providing a strategy which, as a minimum seeks to meet the area’s objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development; • Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence; • Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and • Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.” <p>Paragraph 36 confirms that these tests of soundness will be applied to non-strategic policies in a proportionate way, taking into account the extent to which they are consistent with relevant strategic policies for the area.</p> <p>Chapter 5 of the NPPF (2019) supports the Government’s objective of significantly boosting the supply of homes. It confirms, that in order to do this <i>“it is important that a sufficient amount and variety of land can come forward where it is needed”</i> (Paragraph 59). Further, Paragraph 67 confirms that <i>“Strategic</i></p>		
--	--	---	--	--

			<p><i>policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking account of their availability, suitability and likely economic viability.”</i></p> <p>Chapter 6 of the NPPF (2019) supports planning policies and decisions that help create the conditions in which businesses can invest, expand and adapt.</p> <p>Chapter 8 supports the promotion of sustainable transport, noting that <i>“In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that:</i></p> <ul style="list-style-type: none"> <i>a. Appropriate opportunities to promote sustainable transport modes can be – or have been taken up, given the type of development and its location;</i> <i>b. Safe and suitable access to the site can be achieved for all users; and</i> <i>c. Any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable level.”</i> <p>Chapter 11 considers how to make the most efficient use of land.</p> <p>Paragraph 118 confirms that policies should give sustainable weight to the value of using suitable brownfield land within settlements for homes and other identified needs. It also promotes the development of underutilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained, and available sites could be used more effectively.</p> <p>Paragraph 120 states that policies <i>“need to reflect changes in the demand for land. Inter alia, where the local planning authority considers there to be no reasonable prospect of an application coming forward for the use allocated in a plan:</i></p> <ul style="list-style-type: none"> <i>a. They should as part of plan updates, reallocate the land for a more deliverable use that can help to address identified needs (or, if appropriate deallocate a site which is underdeveloped);</i> <i>and</i> <i>b. In the interim, prior to updating the plan, applications for alternative uses on the land should be supported where the proposed use would contribute to meeting an unmet need for development in the area.”</i> 		
(Avison Young obo)	- 3	General LCA SA 25	<p><i>Planning Practice Guidance</i></p> <p>The NPPF (2019) is underpinned by the Planning Practice Guidance (PPG). It was first published in 2012 as an online resource and has been updated in line with recent iterations of the adopted Framework.</p> <p>Paragraph 34 of the ‘Plan-making’ Guidance (Reference ID: 61-039-20190315) confirms that authorities should prepare their local plans to address future needs and opportunities for their area, explore and identify options for addressing growth and then set out a preferred approach.</p> <p>The ‘Plan-making’ Guidance provides further direction on assessing the suitability, availability and achievability of potential developments sites so as to</p>	The supplementary information is noted. Our response is set out above.	No change.

			<p>understand whether it can be considered for allocation and would be deliverable over the Plan period.</p> <p>This is expanded within the ‘Housing and economic land availability assessment’ Guidance. This sets out the criteria for making a judgement as to whether a site can be considered deliverable within the next five years, or developable over a longer period.</p> <p>The PPG is important when considering site specific allocations, as we discuss in our representations below.</p>		
(Avison Young obo)	- 3	General LCA SA 25	<p><i>Strategic Policy - London Plan 2021</i></p> <p>The London Plan was adopted in March 2021 and provides the strategic planning framework for development within London and the Greater London Area. The Plan considers good growth; spatial development patterns; design; housing; social infrastructure; economy; heritage and culture; green infrastructure and natural environment; sustainable infrastructure; and transport.</p> <p>With regards to employment and commercial land (including industrial, logistics and other services to support London’s economic function), the London Plan confirms at Policy E4 the three tiers for these uses which Local Authority’s should bear in mind during the plan making process. These include:</p> <ul style="list-style-type: none"> • Strategic Industrial Locations (SIL) • Locally Significant Industrial Sites (LSIS) • Non-Designated Industrial Sites <p>Policy E5 confirms Strategic Industrial Locations (SILs) should be “managed proactively through a plan-led process to sustain them as London’s largest concentrations of industrial, logistics and related capacity for uses that support the functioning of London’s economy.” Furthermore, the policy wording confirms that opportunities through the plan-making process for the intensification of SIL and co-location of alternative uses should be explored.</p> <p>Policy E7 provides the policy support for the intensification of SIL, noting that Development Plans should encourage the intensification of business uses. The policy wording confirms that <i>“Intensification can also be used to facilitate the consolidation of an identified SIL or LSIS to support the delivery of residential and other uses, such as social infrastructure, or to contribute to town centre renewal.”</i></p> <p>The London Plan therefore promotes and supports the intensification of alternative uses at SIL locations across the Boroughs. It is noted that the intensification of uses should not compromise the industrial and related activities on-site and in surrounding part of the SIL.</p> <p>Figure 6.2 provides a simplified illustration of the approach to the intensification and co-location of alternative uses at SIL (see overleaf). The “After Intensification” section demonstrates how residential uses can be introduced alongside Class B uses such as commercial, B1c and B8 uses.</p>	The supplementary information is noted. Our response is set out above.	No change.

			<i>LB Lewisham officer note: Figure 1: London Plan 2021 approaches to SIL Intensification is included in the original representation. The diagrams show how to intensify sites.</i>		
(Avison Young obo)	- 3	General LCA SA 25	<p><i>Local Plan: Main Issues Document 2021</i></p> <p>Lewisham's Draft Local Plan sets out a shared vision for the future of Lewisham, together with the planning and investment framework to support its delivery through to 2040. The main objective of the Plan is to achieve 'An Open Lewisham as part of an Open London', reflecting the Council's commitment to positively manage growth. The aspirations of the new Local Plan are to respond to significant changes to the wider planning context, including the adopted of the NPPF (2019) and London Plan (2021); respond to the climate change emergency; realise the objective of an Open Lewisham; meet local needs for genuinely affordable housing, jobs and community facilities; and secure the delivery of the Bakerloo Line extension.</p> <p>Part Two of the Local Plan forms a key part of the Council's approach to managing new development across the Borough. It includes policies that will help to facilitate the delivery of Good Growth whilst ensuring Lewisham's distinctness is recognised.</p>	Comments noted. Our response is set out above.	No change.
(Avison Young obo)	3	LCA SA 25	<p>The proposed development site comprises Allocation 25: Land at Randlesdown Road and Bromley Road. This encompasses only part of the wider Bromley Road SIL. The allocation wording confirms the indicative development capacity as being 0 residential units, 3,780sqm gross employment non residential floorspace and 945sqm gross main town centre uses floorspace. The policy wording confirms the current use of the site as being industrial and does not acknowledge the existing residential use on the site, nor the detail of the uses on each of the plots.</p> <p>The supporting text confirms that development must not result in the net loss of industrial capacity, or compromise the functional integrity of the employment location in line with Policy EC2; commercial and industrial uses must be the principal use, supported by ancillary main town centre uses appropriate to the industrial location; development must be delivered in accordance with the A21 Corridor Intensification and Development SPD; form positive frontage along Bromley Road and Randlesdown Road; and deliver new and improved public realm in accordance with a site-wide public realm strategy, including public realm enhancements along Bromley Road and Randlesdown Road.</p>	Comments noted. Our response is set out above.	No change.
(Avison Young obo)	3	LCA SA 25	In the first instance, the Allocation must detail the current uses on site including the 4no. C3 residential units. Furthermore, the draft wording of Policy EC2 is out of date, having been superseded by the omission of the 'no net loss' principle from the adopted London Plan (2021).	Comments noted. Our response is set out above.	No change.
(Avison Young obo)	- 3	General LCA SA 25	<p><i>Lewisham's 5 Year Housing Land Position</i></p> <p>The Council's 5 Year Housing Land Supply position is confirmed in the Council's Authority Monitoring Report (January 2021). Paragraph 2.7.7 identifies the Council's committed housing supply that is likely to come forward in the next five years and assesses whether this will be sufficient to meet Lewisham's identified house requirement. Major and strategic sites, together with small windfalls are likely to provide 7,359 dwellings.</p> <p>Table 6 considers whether this is sufficient to meet the adopted London Plan (2016) targets of 6,925 over five years (1,385 per annum). Table 6 is replicated</p>	Despite an increase in the London Plan housing target, the Regulation 19 Local Plan identifies specific deliverable and developable sites with capacity to meet the Borough's strategic housing target over the plan period. The council	Local Plan amended to appropriately refer to the London Plan (2021), its borough-level housing target for Lewisham and period with which this takes effect. In addition, the plan has been amended to remove references to

			<p>below for ease of reference and demonstrates that the Council's land supply reduces as the proposed buffers (set out in the NPPF, in line with previous delivery) increase.</p> <p><i>LB Lewisham officer note: Figure 3: Lewisham AMR Housing Supply against London Plan (2016) target is included in the original representation. It shows the number of deliverable years against varying buffers.</i></p> <p>The Council's land supply position is assessed against the previous version of the London Plan. The new London Plan (2021) confirms the Council's 10-year housing delivery targets as being 16,670 dwellings. This equates to 1,667 dwellings per year, an increase of 282 dwellings against the previous target. This will therefore reduce the Council's land supply position below the figures stated.</p> <p>In addition, we note that the Housing Delivery Test measurements indicate a score of 88% for Lewisham over the past 3 years. As a result of this score the Council are required to prepare an Action Plan.</p> <p>Our analysis of the Council's draft housing policies and current 5 year housing land supply position confirms, there is a significant need to identify further sites for housing delivery within the emerging policy context, supported by the intensification of existing sites and co-location of uses.</p>	<p>can demonstrate a five year housing land supply and has included a Housing Trajectory within the Plan.</p> <p>A Housing Delivery Test Action Plan was published in July 2021 and will be updated during Summer 2022.</p>	<p>the Local Housing Need (LHN) figure and the standard methodology. Local Plan amended to include an up-to-date Housing Trajectory and five year housing land supply.</p>
(Avison Young obo)	- 3	General LCA SA 25	<p>We would like to thank the Borough Council for the opportunity to comment of the Regulation 18 version of the Local Plan and would welcome continued engagement with the Council in respect of the proposed development site and plan-making process.</p> <p>Please could you confirm receipt of these representations at the earliest opportunity.</p> <p>Should you required any further information in relation to the site and / or the comments made in these representations then please do not hesitate to contact me</p>	<p>Comments noted. Our response is set out above.</p>	<p>No change.</p>
(Avison Young obo)	3	LCA SA 25	<p><i>Conclusions</i></p> <p>The sites planning history and discussions with our client confirm the existing uses on site range from those included with Class B supported by appropriate Sui Generis uses, together with existing residential (Class C3) uses. The principle of co-locating commercial uses and residential uses as set out in the London Plan 2021 (see below) is therefore already established and are a material consideration in any future Allocation.</p> <p>Our review of the site's planning history, namely the appeal decision relevant to the site, demonstrate that:</p> <ul style="list-style-type: none"> • Given the existing land values and development costs refurbishment of the existing buildings or re-development solely for industrial or storage purposes is not viable. • The principle of intensified Class C development would not compromise the principle future re-development of the adjoining Catford Bus Garage. In this regard, intensified Class C development would not stymie development of the adjoining site. 	<p>The supplementary information is noted. Our response is set out above.</p>	<p>No change.</p>

			In addition to the above, it should be noted that the strategic policy has been updated since the consideration and determination of these applications, which were decided at a time when the colocation of uses was not permitted. The London Plan 2021 strongly supports these principles in order to deliver the identified growth required across the London Borough's.		
(Avison Young obo)	3	LCA SA 25	<p><i>Site Allocation – Main Town Centre Uses</i></p> <p>The Council includes town centre uses within the draft Site Allocation and has suggested that these are necessary for a 'continuous commercial / shopping frontage at the Bellingham station approach'. It is assumed that the inclusion of main town centre uses refers to 'other compatible uses' as explained in Policy EC2 D.</p> <p>The inclusion of town centre uses in the draft Site Allocation is consistent with the requirements of Policies E5 and E7 of the London Plan. However, the inclusions of residential uses are given the same weight as main town centre uses in the aforementioned policies. Given that there is no differentiation in principle, the draft Site Allocation should be revised to include the potential for main town centre uses and / or residential uses on this site.</p> <p>Notwithstanding this, the inclusion of main town centre uses in the Allocation is inconsistent with the Employment Land Review conclusions which itself is inconsistent with its commentary and conclusions for the site.</p>	Comments noted. Our response is set out above.	No change.
(Avison Young obo)	3	LCA SA 25	<p>Site Allocation Methodology</p> <p>In combination with the Site Allocations background paper (2021), the PPG (Plan-making and Housing and economic land availability assessment) provides the basis for examining the proposed development site's suitability for inclusion within the draft policy wording. The Site Allocations background paper (2021) provides further 'screening criteria' in Table 5.1 and the criteria are integrated below</p> <p><i>Existing site allocation or consented scheme</i></p> <p>The site does not have an existing allocation nor a consented scheme.</p> <p><i>Site Size</i></p> <p>The site is at least 0.25 hectares and is considered strategic in size. The Allocation area is currently incorrectly drafted and should be amended to include 4 Randlesdown Road. For clarification, the extent of the site boundary is included in Appendix I.</p> <p><u>Suitability</u></p> <p>Paragraph 18 of the PPG states that:</p> <p><i>"A site or broad location can be considered suitable if it would provide an appropriate location for development when considered against relevant constraints and their potential to be mitigated."</i></p> <p>The guidance goes on to state that the following can inform plan-making decisions for allocating sites, including:</p> <ul style="list-style-type: none"> • National planning policy; • Appropriateness and likely market attractiveness for the type of development proposed; • Contribution to regeneration priority areas; 	The supplementary information is noted. Our response is set out above.	No change.

		<ul style="list-style-type: none"> • Potential impacts including the effect upon landscape features, nature and heritage conservation. <p>In the first instance, the proposed approach to development at the land north of Randlesdown Road (our client’s site) is compliant with the NPPF with regard to sustainable development, namely the re-use of brownfield sites to meet future development needs. As we set out in the planning policy context section of these representations, the Framework identifies a holistic approach to sustainable development as a core purpose of the planning system. It requires the system to perform three distinct and interrelated roles: economic, social and environmental.</p> <p>Our planning policy assessment further identifies the NPPF’s aspiration to support sustainable development which seeks to provide a choice of high-quality homes, support the continued growth of the economy, and improve the conditions in which people live and enjoy leisure through high quality design. Section 11 states that it is a core planning principle to efficiently reuse land which has previously been developed, promote an effective use of land in meeting the identified growth needs of an authority area.</p> <p><i>Employment Land</i> The continued employment and commercial uses at our client’s site are no longer suitable, given their size, viability and condition. They are considered to be of poor-quality stock to the remainder of the Bromley Road SIL (see the conclusions drawn in the Employment Land Study, 2019). Para. 5.32 of the Employment Land Review states that a masterplanned approach to the site could see a carefully planned mixed use development safeguarding this area for employment. However, there are no reasonable option for refurbishing or redevelopment the employment uses on site as this is unviable (as demonstrated in the relevant appeals (APP/C5690/A/13/2192356 and APP/C5690/A/14/2223342).</p> <p>To secure the re-development of the site for employment generating use, the appropriate policy wording drafted in the emerging Local Plan (Policy EC2 and Allocation 25) would need to be updated to positively reflect the co-location of residential uses at this site. This is directed by the London Plan. Indeed, the approach to the intensification and co-location of alternative uses at SIL, as demonstrated in Figure 6.2 of the recently adopted London Plan is entirely characteristic of the development site, given the proximity to other non-employment uses, at the edge of a wider SIL designation and in close proximity to a public transport link, i.e. Bellingham rail station. The reference to the ‘net loss of industrial capacity’ has been removed from the adopted London Plan and instead the direction of the Allocation should be towards ensuring the functional integrity of the SIL is maintained with compatible residential accommodation.</p> <p>This principle can be achieved through the protection afforded the SIL area not within the Site Allocation, i.e. this can come forward for intensification throughout the plan period, but for the Site Allocation to consolidate industrial uses within a mixed-use redevelopment.</p>		
--	--	--	--	--

			<p>Furthermore, the principle of these uses has already been established by virtue of 4 residential dwelling forming part of the existing permitted uses at the site. Our client is amenable to securing continued employment opportunities on the site through alternative, more suitable and employment uses, akin to those underpinning SIL designations, rather than those currently there. This however would have to be underpinned by the co-location of residential development,</p> <p>The proximity to neighbouring employment sites does not preclude the co-location on this site. It has been previously demonstrated at appeal that non-industrial uses can be located adjacent to retained SIL land. In this instance, the site bounds a 24-hour bus garage, however any noise and disturbance can be mitigated through design. The statement in para. 5.32 of the Employment Land Review is entirely disputed. Furthermore, if this adjacent site were to come forward at a future date for redevelopment, any residential scheme within the Allocation would be designed to ensure that the development potential of the bus garage site is not extinguished. In either scenario, the residential use and development would be accommodated in a manner which accords with Policy E5 D of the London Plan.</p> <p>As we demonstrate above (Planning Policy Context) support for residential land is provided within the NPPF.</p> <p>The London Plan further recognises the land capacity issues across the London Boroughs in relation to both employment and housing growth. Indeed, the Mayoral introduction confirms that <i>“dealing with such levels of growth is undoubtedly one of the biggest challenges of our times, putting pressure on land, housing and infrastructure and the environment.”</i> Support for the co-location of uses therefore forms one of the fundamental elements of delivering “Good Growth” in the London Plan.</p> <p>Proposals for the co-location of employment and other compatible uses is therefore supported at a strategic and national level. More broadly, the proposed redevelopment of the site to provide improved commercial and industrial facilities, supported by residential development would be consistent with the Council’s strategic policies for delivering housing and employment growth within Lewisham, and the strategic direction in Policy E5 of the London Plan. Point D of Policy EC2 which confirms general support for co-locating uses, but the principles must be extended to include this part of the Bromley Road SIL and the proposed Site Allocation.</p> <p>Ultimately, the revision of the Site Allocation to include residential development is entirely consistent with the strategic policy for such SIL designations, would achieve the objectives of the Site Allocation, i.e. the intensification and modernisation of the commercial activities on site, would align with the Employment Land Review direction to intensify and safeguard the employment use of the site and would maintain the employment capacity within the Borough.</p>		
(Avison Young obo)	3	LCA SA 25	The below commentary considers in detail the potential impacts of co-locating residential uses at our client’s site, together with the re-provision of existing commercial uses. This indicates that there are no physical or environmental constraints that would preclude the proposed development. We have considered	The detailed assessment of the use of the site for co-location, including viability considerations, is	No change.

		<p>12 criteria to which the suitability of the site should be considered. Taking each in turn.</p> <p><i>Flood Zone</i> The site is located in Flood Zone 2 and is therefore subject to a medium probability of flooding. Less vulnerable uses are defined in the PPG (Paragraph 66 Reference ID: 7-066-20140306) as follows: buildings used for shops; financial, professional and other services; restaurants, cafes and hot food takeaways; offices; general industry, storage and distribution; non-residential institutions not included in the 'more vulnerable' class; and assembly and leisure.</p> <p>The proposed development would provide commercial and industrial uses on the lower floors with more vulnerable uses (residential) located above. Any subsequent planning application would be accompanied by a Flood Risk Assessment which will demonstrate no increase in flood risk onsite or within the vicinity.</p> <p><i>Open space</i> The site does not comprise protected open space.</p> <p><i>Community infrastructure</i> The site does not include any strategic community infrastructure.</p> <p><i>Cultural institutions</i> The site does not include any strategic cultural institutions.</p> <p><i>Heritage Designations</i> There are no statutory listed historic assets within, or adjacent, to the site boundary. The nearest heritage assets are approximately 100m to the west and include the Fellowship Inn Pub and attached hall (Grade II), together with a number of residential dwellings to the south east (Grade II).</p> <p>Given the poor visual and townscape quality of the existing structures on site, the proposed development is unlikely to result in adverse impacts on these heritage assets.</p> <p>A subsequent planning application would be accompanied by a Heritage Assessment which will demonstrate that the development will maintain, and wherever possible enhance the setting of the identified heritage asset(s).</p> <p><i>Strategic infrastructure</i> The site does not include any strategic infrastructure, or any such safeguarded land use designations.</p> <p><i>Air Quality</i> The Council's Air Quality Action Plan 2016 confirms the Bromley Road as being located in AQMA 5. This is one of 5 focus areas, although it is noted that this relates solely to Bromley Road and not the surrounding areas (see screenshot below). AQMA 1-6 cover much broader assessment areas.</p>	<p>acknowledged. Our response is set out above.</p>	
--	--	---	---	--

		<p>Any redevelopment of the site would be accompanied by an Air Quality Assessment which will demonstrate that the future occupier of the development will be protected from existing poor air quality in the Borough and the new development satisfactorily minimises further contributions to existing concentrations of particulates and NO2.</p> <p><i>Health and Safety</i> Our review of the Council's Proposals Map does not indicate that the site falls with any relevant health and safety related zones.</p> <p><i>Social housing estates</i> The site does not form part of a social housing estate.</p> <p><i>Other housing</i> The sites does not include HMOs.</p> <p><i>Biodiversity</i> The Council's Proposals Map and the Greenspace Information for Greater London website² have been accessed. The former does not indicate that there are any policy constraints associated with biodiversity. Whilst the Greenspace Information website does not provide guidance on biodiversity matter, it does indicate that the site falls within the broader Inner London National Character Area. The associated profile states that "<i>Overall the biodiversity resource is fragmented. Large part of the NCA are deficient in access to nature.</i>" It suggests that this situation is not specific to the site and is equally applicable to the all of the sites located identified for development within the Borough.</p> <p>Given the nature of existing development, the site is considered to be in an area of low biodiversity sensitive. The site is in close proximity to Bellingham Leisure Centre (0.48km to the west) and associated open space, together with Bellingham Children's Park (0.48km to the west). Forster Memorial Park is located 1.23km to the east.</p> <p>Any future development of the site will be supplemented by a desk-based study and ecological site walkover as part of a Preliminary Ecological Assessment which will include consultation with non-statutory wildlife organisations. This will determine whether there are any records of protected species or important habitats on site, or within a 2km radius which may be impacted by the proposals. In the event that any impacts are identified, an appropriate scheme of mitigation will be identified. The current landowner is happy to enhance the ecological quality of the site by virtue of the scheme's redevelopment.</p> <p><i>Contamination</i> The use of the site for existing commercial uses would suggest the potential for there to be a level of contamination risk. Any future development would be supported by a desk-based contamination study, which would provide future recommendations and feed into a full remediation strategy to ensure future occupiers would not be subject to harmful contamination.</p> <p><i>Accessibility (PTAL)</i></p>		
--	--	--	--	--

		<p>The TfL PTAL Calculator³ confirms the site has a PTAL rating of 4. This demonstrates the site is highly sustainable with good access to Bellingham Train Station (400m to the east of the site frontage) and 7 bus stops within close proximity of the site. The site on this basis is in a highly accessible location and could support a low-car development supporting the aspirations of the emerging Local Plan with regard to the introduction of low emission vehicles and the targets attributed to reducing carbon emissions. These aspirations are also supported by both the strategic policy context (London Plan) and national policy context (NPPF).</p> <p><i>Other Matters</i> In addition to the above, we conclude that the site is within a sustainable location and set in a wider residential context. It is highly accessible with regards to public transport, together with existing amenity.</p> <p>The redevelopment of the site for industrial and commercial uses is unlikely to be achievable without the support of other uses, namely residential. This would be provided through a collocated scheme with ground floor uses designated for employment purposes and upper floors designated for residential uses. The precedent for tall buildings in this location has been tested at appeal (Ref: 13/2192356), with Paragraph 36 of the decision notices confirming that the previous proposals were of a comparable height to the existing buildings to the south of Randisbourne Garden and Delamare Court.</p> <p>Future proposals would take this into consideration and demonstrate a building of suitable scale and massing to the surrounding context. As demonstrated above, the future development of our client's site would not undermine development proposals associated with the adjacent bus garage. This would be further supported by careful and sensitive masterplanning.</p> <p>Furthermore, the development would accord with the principles A21 Corridor Intensification and Development SPD (when consulted upon and adopted), would align with the Council's strategic principles for development within an Area of Regeneration (Policy LSA2), and through a design-led approach, would provide a positive frontage along Bromley Road and Randlesdown Road and deliver new and improved public realm in accordance with a site-wide public realm strategy, including public realm enhancements along Bromley Road and Randlesdown Road.</p> <p>We must also reiterate that the principle of residential uses has already been established at the site and thus co-location with commercial and industrial uses, by virtue of 4 existing residential flats contained within the existing site boundary.</p> <p><i>Availability</i> Paragraph 19 of the Guidance (Reference ID: 3-019-20190722) states that: <i>"A site can be considered available for development, when, on the best information available (confirmed by the Call for Sites and information from land owners and legal searches where appropriate), there is confidence that there are no legal or ownership impediments to development. For example, land controlled</i></p>		
--	--	--	--	--

		<p><i>by a developer or landowner who has expressed an intention to develop may be considered available.”</i></p> <p>The site is being promoted through this iteration of the Local Plan consultation for the co-location of alternative uses, including residential, on a SIL designated site. Frank Griffiths is the existing landowner and is actively seeking the site’s redevelopment.</p> <p>As demonstrated in the commentary contained within these representations, there are no constraints relating to availability which would preclude the proposed redevelopment of the site to include residential use.</p> <p>The landowner has no intention of redeveloping the site in the manner proposed within the draft Allocation and as currently proposed, the site is not available. In the event that the allocation is carried through without residential use included within the accepted use, the Plan is unsound.</p> <p><i>Safeguarded for Alternative Uses</i> The consultation documentation confirms the site is not within or adjacent to any existing or potential safeguarded sites.</p> <p><i>Ownership</i> The site, as demonstrated in Appendix I and as requested to be amended within the Allocation, is within the single ownership of Frank Griffiths and there are no legal or ownership issues which would prevent the site from being delivered within the first five years of the Plan period.</p> <p><i>Existing Uses</i> The site is currently in active use, as set out in the introductory sections of this letter. Notwithstanding this, these uses do not make a substantial or valuable contribution to the SIL and could be re-provided elsewhere within the Borough to more appropriate locations.</p> <p><i>Planning Status</i> We have assessed the Council’s online planning records and understand that there are no live or permitted planning applications associated with the site.</p> <p><i>Potential Delivery Dates</i> Assuming the proposed redevelopment opportunities were to be permitted no later than Q1 of 2022, it is expected that the site would have a potential commencement date no later than Q1 of 2023. This would be within the first five years of the Development Plan and within a timeframe which would help the Council address their five year housing land supply position.</p> <p><i>Achievability</i> Paragraph 20 of the PPG states that: <i>“A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of a site, and the capacity of the developer to complete and let or sell the development over a certain period of time.”</i></p>		
--	--	---	--	--

		<p><i>Site Capacity</i></p> <p>The Site Allocation background paper proposes a 80% : 20% land use mix between employment and main town centre uses in Table A.2 and this ratio is reflected in the proposed Allocation. The Council has no methodology for this ratio, nor does it appear to have been tested via any viability method. In Table A.1, the Council states that the site development capacity has been calculated using the SHLAA methodology, but no such assessment for sites retained in industrial use is included within the SHLAA.</p> <p>In this respect, the Council is Allocating the site without any understanding of the economic viability specifics of the site over the plan period, nor is it based upon any sound methodology.</p> <p>Notwithstanding the above, the Council's general assumptions for capacity of sites requiring the re-provision of employment floorspace within a SIL co-location site is 67% residential and 33% employment. Clearly, this ratio would need to be tested on this site to ensure that the quantum of relevant floorspaces are viable.</p> <p>Furthermore, much of the existing site is open without any existing floorspace to benchmark against. The Council refers to the 65% plot ratio and the inclusion of floorspace and service yards being included for the purposes of existing employment capacity, however this principle has been omitted from the adopted London Plan. It is instead suggested that the quantum of employment floorspace in any re-development co-location scenario provides the same or more employment opportunities currently provided for on-site, in order to achieve the intensification that is required by the London Plan Policy E7.</p> <p>In assessing the capacity of the site, the Council considers that a density of 225 dwellings per hectare is assumed for a site with a PTAL 4-6 in an urban setting – where there are no sensitives to consider. This figure is contradicted by the average residential density on schemes permitted by the Council within 400m of Bellingham railway station which, according to the Council's Residential Density Technical Paper (2021) was 396 dwellings.</p> <p>Given the proximity to the railway station, and the local context and character, any residential density would be expected to be significantly higher than 225 units per hectare, and we consider that the stringent application of the Council's indicative development capacity in a co-location scenario would result in a capacity significantly lower than what could reasonably be delivered through the redevelopment of the site taking a design-led approach to site optimisation.</p> <p>In any event, any indicative residential and non-residential development capacity must be clear in that the figure provided is in no way a cap on development potential.</p> <p><i>Viability Considerations</i></p> <p>The site has been tested at appeal (APP/C5690/A/13/2192356 and APP/C5690/A/14/2223342), the conclusions of which confirm that given the existing land values and development costs associated with the refurbishment or redevelopment of the existing buildings would not be viable.</p>		
--	--	---	--	--

			Any proposals including residential development would be subject to the same viability process as other, similar development proposals. There are no known potential or significant viability constraints on the site associated with co-locating residential uses.		
(Avison Young obo)	3	LCA SA 25	<p>Planning Benefits A range of planning benefits would accrue as a result of the proposed redevelopment of the site. In the context of the three objectives underpinning sustainable development set out in the NPPF, these benefits will include:</p> <p>Objective Planning Benefits</p> <p>Economic</p> <ul style="list-style-type: none"> • The redevelopment of the site would seek to re-provide the same level of commercial and industrial opportunities currently existing on site. • The redevelopment of existing stock would create betterment in terms of quality and enhance the SIL designation associated with the site. • An improvement in the quality of commercial building stock would increase the opportunity for new businesses to relocate to the area bringing new jobs for existing residents. • The co-location of residential uses would provide an opportunity to increase spending within the local economy that would support existing and future business. <p>Social</p> <ul style="list-style-type: none"> • The site has the capacity to deliver a high proportion of housing in the early phases of the emerging Plan Period which will make an important contribution to meeting the Council's and the GLA housing figures. • A broad mix and size of units will be incorporated into the final proposals which reflect local needs and provide choice for future residents. <p>Environmental</p> <ul style="list-style-type: none"> • There are no known biodiversity related constraints associated with the site. • The site's redevelopment provides an opportunity to remediate potentially contaminated land and support and increase in access to amenity areas such as terrace areas and private balconies. <p>As we have demonstrated, the redevelopment of the site for employment uses, together with the co-location of alternative uses such as residential would be an effective and efficient use of land and would represent a form of sustainable development which aligns with the principles and objective of the NPPF and London Plan.</p> <p>There are a number of tangible economic, social and environmental benefits associated with the proposed development site. It further provides an appropriate and sustainable opportunity to deliver a balanced approach to housing and employment infrastructure provision that is a betterment to the existing provision currently provided on site. In addition, there is a significant opportunity to provide employment uses that align better with the objectives of the SIL designation.</p>	The planning benefits associated with redeveloping this site are acknowledged. Our response is set out above.	No change.
(Avison Young obo)	3	LCA SA 25	<p>Conclusions For the above reasons, we conclude that the site is suitable for the redevelopment of commercial uses, supported by the co-location of residential uses. The latter would underpin the former, which as noted would not be otherwise deliverable due to viability constraints.</p>	Comments noted. Our response is set out above.	No change.

			The site allocation should therefore be updated to reflect our conclusions and the principle of co-locating residential uses within the SIL designation.		
(Avison Young obo)	3	LCA SA 25	<p>In addition, we are of the view that the draft allocation wording for Allocation 25: Land at Randlesdown Road and Bromley Road should be updated to reflect the co-location of residential. At present and as demonstrated, the current Allocation renders the Local Plan unsound.</p> <p>As demonstrated in these representations, the site is suitable, achievable and available within the Plan period for the proposed mix of uses, inclusive of residential, and therefore meets the criteria tests set out in the Planning Practice Guidance. The Council has erred in both the principles of future uses on the site and the ratios of uses. The site presents an important opportunity in meeting the Council's identified housing needs for the Plan period.</p> <p>By making the suggested changes, the intensification of the SIL is achieved via a plan-led process and is entirely consistent with national and strategic policies.</p>	Comments noted. Our response is set out above.	No change.
Millwall Football Club (CBRE Ltd obo)	3	LNA	<i>Relates to Part 3, LNA SA 08</i>	Comments noted.	No change.
	3	Spatial Objective 3	<p>Our overriding comment is one of support for the principle of what the allocation seeks to achieve. There are, however, amendments that we consider are required to the site allocation to ensure that the key spatial objectives of the Draft Plan are met. Specifically, we refer to Page 561 of the Draft Plan which states that a key spatial objective (3) is to:</p> <p><i>'Secure the future of Millwall Football Club in the Borough with a modern stadium as part of a new leisure and community destination, supported by a new Overground station.'</i></p>		
Fifth State and (Avison Young obo)	3	LNA	<i>Relates to Part 3, LNA SA 16</i>	Support noted. Agree that the site is not SIL and should be relabelled accordingly.	Local Plan Figure 15.2 amended by relabelling the site as LSIS.
		Vision and Spatial Objectives	<p>Comments on Lewisham's North Area Draft North Area Vision and Spatial Objectives The Council's vision for Lewisham North Area is strongly supported by the Owners and Developer of 5-9 Creekside. The vision re-imagines Deptford Creek to provide a well integrated employment area and mixed-use neighbourhood. In addition the Creative Enterprise Zone will cement Lewisham's position as a leader in the creative and cultural industries which will feature modern and affordable workspace, including artist studio space, building on the presence of Goldsmith's College, Trinity Laban and Albany Theatre. The objective to establish a Creative Enterprise Zone at Deptford Creekside fits well with the development aspirations Fifth State have for 5-9 Creekside.</p> <p><u>We note that Lower Creekside (Site Allocation 16) is incorrectly labelled as a Strategic Industrial Location in Figure 15.2. This should be amended to reflect the correct designation: Locally Significant Industrial Site.</u></p>		
Artworks Creekside (Avison Young obo)	3	LNA	<i>Relates to Part 3, LNA SA 16</i>	Support noted.	No change.
		Vision	<p>Comments on Lewisham's North Area Draft North Area Vision and Spatial Objectives The vision for the North Area explains that this area will benefit from continued renewal of older employment sites which will influence the areas evolving</p>		

			<p>character whilst helping to improve its environmental qualities. Deptford Creek to provide a well integrated employment area and mixed use neighbourhood.</p> <p>In addition the Creative Enterprise Zone (CEZ), and that the Deptford Creekside Cultural Quarter will grow, and will cement the Borough's position as one of London's leaders in the creative, cultural and digital industries the renewal of industrial sites such as 2 and 3 Creekside.</p> <p>Artworks Creekside have long since supported these principles in their current operations at the two sites and continue to support the Council's ambitions.</p>		
Fifth State and (Avison Young obo)	3	LNA 01	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy LNA1 – North Area place principles The Owners and Developer of 5-9 Creekside support Part A of the draft policy which seeks to facilitate Good Growth, regeneration and intensification and renewal of industrial sites in order to promote cultural and creative industries. Whilst Fifth State agree that heritage-led regeneration will be important within the North Area, particularly for areas identified in Part E(a) to (c) (including Royal Naval Dockyard, Grand Surry Canal and Deptford High Street and New Cross High Street), where sites are identified to accommodate growth to support the Council's objectively assessed needs, heritage considerations must be considered alongside public benefits as part of the overall planning balance (this has already been mentioned in response to draft Policies HE2 and HE3).</p>	Agree that heritage considerations should form part of the overall planning balance.	Local Plan amended to include the need for a balanced judgement to be taken.
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	3	LNA 01	<p><i>Relates to Part 3, LNA SA 14</i></p> <p>Lewisham's North Area and Creative Enterprise Zone (CEZ) We note the thrust of Policy LNA1 (North Area place principles) and Policy LNA3 (Creative Enterprise Zone) seeks to deliver regeneration benefits for the locality, including the delivery of creative uses which is supported by our Client.</p>	Support noted.	No change.
Cockpit Arts (The Planning Lab obo)	3	LNA 01	<p><i>Relates to Part 3, LNA SA 14</i></p> <ul style="list-style-type: none"> CA is generally supportive of these principles which reflect aspects of other Plan policies in their application to the North Area, especially those concerning delivery of new employment floorspace and the promotion of creative industries within the Lewisham North Creative Enterprise Zone (see below). 	Support noted.	No change.
Artworks Creekside (Avison Young obo)	3	LNA 01	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy LNA1 – North Area place principles Artworks Creekside support Part A of the draft policy which seeks to facilitate Good Growth, regeneration and intensification and renewal of industrial sites in order to promote cultural and creative industries. Part A (c) of Policy LNA1 is strongly supported, whereby the opportunities to provide new and improved workspace through intensification of sites and renewal of employment land is encouraged. The over-arching requirement for comprehensive regeneration of strategic sites to deliver new urban localities, bringing a significant amount of new housing and workspace will ensure that the regeneration potential of the Opportunity Area within which 2 and 3 Creekside are location, will occur.</p> <p>Having met with Council Officers in pre-application discussion, we can appreciate the Council's desire for heritage-led regeneration however this requires a clear</p>	Agree that there should be a balance between heritage led regeneration and other policy objectives.	Local Plan amended to include the need for a balanced judgement to be taken.

			balance against other Policies and objectives contained with the development plan, and ultimately, the planning balance for any redevelopment proposals.		
Fifth State and (Avison Young obo)	3	LNA 03	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy LNA3 – Creative Enterprise Zone The creation of a new Creative Enterprise Zone (CEZ) covering the Lower Creekside area is strongly supported by the Owners and Developer of 5-9 Creekside.</p>	Support noted.	No change.
L&Q Group	3	LNA 03	<p><i>Relates to Call for site</i></p> <p>4.8 North Character Area The North Character Area, as described in Chapter 15 of the Local Plan, is one undergoing change. Containing much of the Borough’s employment stock, several larger industrial sites have undergone regeneration, and contemporary mixed use residential and employment schemes have been introduced, including larger tower blocks with taller elements situated on landmark sites. L&Q supports LBL’s vision that regeneration of larger brownfield sites in the area will deliver a significant amount of new housing.</p> <p>L&Q supports North Deptford being included in the Creative Enterprise Zone (Policy LNA3).</p>	Support noted.	No change.
SEGRO (CBRE Limited obo)	3	LNA 03	<p><i>Relates to Part 3, LNA SA 04</i></p> <ul style="list-style-type: none"> Revising the Creative Enterprise Zone Policy to not apply, or to be applied flexibly, within the SILs to ensure that these locations can continue to accommodate businesses that are not necessarily ‘creative’ but which play an essential role in servicing the borough’s other businesses and communities. 	Noted	No change.
SEGRO (CBRE Limited obo)	3	LNA 03	<p><i>Relates to Part 3, LNA SA 04</i></p> <p>7. Cultural Enterprise Zone The points made in part 6. above regarding low cost and affordable workspace apply equally to Policy LNA3 (Lewisham North Creative Enterprise Zone).</p> <p>Part D of Policy LNA3 resists development proposals involving the loss of B1 Use Class workspace that is currently occupied by, or suitable for, uses in the creative and cultural industries, including artists’ workspace. Whilst we support ‘creative’ industries and consider a number of our customers to be defined as such, we are concerned that this requirement in SILs will limit the amount of land that is available for warehousing/logistics facilities that are more difficult to incorporate into mixed use development and so rely heavily on SILs to provide sufficient supply. As such, we recommend that a further test is added to part D to allow this policy to be applied flexibly in SILs where new development is meeting the needs of occupiers who play an essential role in servicing the borough’s other businesses and communities, and who cannot be easily accommodated in existing available premises in the borough or emerging mixed use developments.</p>	Disagree as the Local Plan seeks the continued growth and evolution of the creative and cultural industries in the north of the borough. SIL will only being released where compensatory provision of SIL can be delivered elsewhere.	No change.
Cockpit Arts (The Planning Lab obo)	3	LNA 03	<p><i>Relates to Part 3, LNA SA 14</i></p> <ul style="list-style-type: none"> Cockpit Arts enjoys an international profile and reputation in its field, which we suggest should be recognised in the plan (alongside other listed organisations). We regularly deliver overseas programmes and welcome visitors from around the globe wanting to learn from our model. 	Support noted. Agree that maker space has different requirements from digitally driven creative businesses but this does not need to be specified in policy. Also	Local Plan amended by clarifying the requirement of maker space in LNA 03 and by clarifying that masterplanning must

			<ul style="list-style-type: none"> • We endorse this policy, specifically the protection and enhancement of workspace provision at Deptford Creekside and the commitment to ensure a wide range of creative workspaces and affordable employment floorspace comes forward (not just 'arts'). • We query how this policy will be applied to applications already under consideration in the CEZ which do not meet the policy requirements, with specific reference to the Sun Wharf scheme under consideration, which does not appear to deliver on this policy's expectations around employment floorspace. • How will this policy be retrospectively applied to applications already under consideration in the CEZ which have the potential to limit the growth of specific creative workspaces e.g. the Sun Wharf scheme/Cockpit Arts. • We query what is meant by 'high quality' in relation to new workspace and would emphasise that, whilst there are minimum requirements for all types of spaces (proper heating, facilities, etc.) this differs for maker space vs. office space for creative businesses. 	agree with the points made about masterplanning and co-ordination of applications.	ensure that initial phases of development do not hinder the latter phases.
Artworks Creekside (Avison Young obo)	3	LNA 03	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy LNA3 – Creative Enterprise Zone Artwork Creekside support the principles within draft Policy LNA3 for the designation of a Creative Enterprise Zone. The client reserves the right to comment further upon 'an appropriate range of rents', in the same manner that it awaits guidance in an Affordable Workspace SPD.</p>	Support and comments noted.	No change.
The Renewal Group (Carney Sweeney obo)	3	LNA 03	<p><i>Relates to Part 3, LNA SA 08</i></p> <p>Policy LNA3 Creative Enterprise Zone This policy needs to be updated to have regard to the changes to the London Plan prior to its final adoption and publication. It also needs to be updated to have regard to the changes to the Use Classes Order, in particular new Use Class E and the imminent amended permitted development rights later this year. The Inspector considering the Westminster Local Plan in 2020 made clear the importance of this.</p>	Agree that the Local Plan needs to align with national and regional policy.	Local plan amended to make consistent references to new use classes and permitted development rights, and to align with the adopted version of the London Plan.
Artworks Creekside (Avison Young obo)	3	LNA 04	<p><i>Relates to Part 3, LNA SA 16</i></p> <p>Draft Policy LNA4 – Thames Policy Area and Deptford Creekside The pre-application discussions to date in relation to 2 Creekside have considered the relationship to Deptford Creek. Artwork Creekside appreciate the benefit of a positive relationship with the Creek; however it must not be an explicit requirement to provide public access to the Creek within a development site. The caveat to ensure accessible public space, 'where possible', must be maintained throughout the Plan process.</p> <p>Furthermore, it appears unnecessary to ensure that special regard is paid to the significance of heritage assets and their setting under this Policy. The impact upon designated and non-designated assets are appropriately dealt with under the respective Policies.</p>	Disagree, public access along Deptford Creek and the maritime and industrial heritage of the area are important features of this riverfront area and it is important that this policy makes reference to these attributes.	No change.
SEGRO (CBRE Limited obo)	- 3	General LNA SA 04	<p>SEGRO RESPONSE - REGULATION 18 DRAFT LOCAL PLAN CONSULTATION CBRE Limited is instructed by SEGRO to make representations to the London Borough of Lewisham Local Plan (Main Issues and Preferred Approaches) Regulation 18 consultation (hereafter "draft plan"). We set out below our overarching comments on the draft plan and our specific comments relating to the Deptford Trading Estate, which SEGRO owns and manages.</p>	Comments noted.	No change.

SEGRO (CBRE Limited obo)	- 3	General LNA SA 04	<p>SEGRO SEGRO is a UK Real Estate Investment Trust (REIT), and a leading owner, manager and developer of modern warehouses and light industrial property. It owns or manages 6.4 million square metres (69 million square feet) of space, serving customers from a wide range of industry sectors.</p> <p>In Greater London, its portfolio extends to over 12.5 million square feet of light industrial and urban logistics space and is home to over 420 customers operating from 55 estates across the capital. These customers, which include major businesses such as Rolls Royce, Brompton Bike, British Airways, Ocado, John Lewis, DHL, employ over 20,000 people and operate in a range of sectors from e-retailing to manufacturing, TV and media to aerospace and automotive to food production.</p> <p>In February 2017, SEGRO launched its ‘Keep London Working’ report to highlight the importance of industrial land to London’s economy and productivity, the structural changes the sector is experiencing and the challenges it faces with the excessive release of industrial land for high value uses, such as housing.</p> <p>The report focussed in particular on urban logistics, which involves the movement of goods and services across the City. Urban logistics is a key element of London’s industrial sector, including in LB Lewisham, where such facilities are needed to ensure that the borough’s residents and businesses have timely access to the goods they need to thrive. Demand for these facilities will increase with the growth in the population and business that is planned for the next 15 years. The report can be accessed here.</p>	The supplementary information is noted.	No change.
Lendlease (Lichfields obo)	- 3	General LNA SA 02	<p>Lewisham Local Plan Regulation 18 Consultation- April 2021 We write on behalf of our client, Lendlease, in response to the above consultation. Lendlease welcome the opportunity to engage with London Borough of Lewisham (LBL) on the new Local Plan.</p> <p>Lendlease is committed to bringing forward a high quality and deliverable scheme on the Deptford Landings development site (formerly known as Timber Yard/Deptford Wharves) which was granted Hybrid Planning Permission in March 2016 (ref. DC/15/92295). This site is allocated within the draft Local Plan as North Area Site Allocation 2, Timberyard, Deptford Wharves.</p> <p>This letter sets out Lendlease’s response to the Regulation 18 stage ‘Main Issues and Preferred Approaches’ version of Lewisham’s draft Local Plan dated January 2021. Following some general comments, the response will be organised in accordance with the themes set out on the consultation webpage.</p> <p>Background</p> <p>On 23 March 2016, hybrid planning permission was granted by LBL for the comprehensive mixed use redevelopment of land bounded by Oxestalls Road, Grove Street, Dragoon Road and Evelyn Street (excluding Scott House, 185 Grove Street) formerly known as The Timberyard and now named Deptford Landings. The scheme comprises six Plots, including detailed planning permission for the first phase of development, Plots 1, 2 and 3 (ref. DC/15/92295).</p>	Support, comments and supplementary information are noted.	No change.

			<p>This permission was granted for up to 10,413sqm of non-residential floorspace (A1/A2/A3/A4/A5/B1/D1/D2 and an energy centre) and up to 1,132 residential units in buildings ranging from 3 storeys to 24 storeys in height, including detailed planning permission for up to 562 residential units and up to 5,692sqm of non-residential floorspace (A1/A2/A3/A4/A5/B1/D1/D2) in buildings ranging 3 storeys to 24 storeys in height. The detailed part of the hybrid planning permission covers Plots 1, 2 and 3.</p> <p>The planning permission has subsequently been amended by several non-material amendment (NMA) applications. Lendlease is currently proposing a number of amendments to the approved masterplan for the site and has engaged in pre-application discussions with the Council in relation to optimisation of the site. Lendlease therefore welcome the opportunity to engage in the local plan process and are supportive of LBL's aspirations for the Borough.</p> <p>Below is a summary of the key areas which Lendlease would like to comment on.</p>		
Lendlease (Lichfields obo)	- 3	General LNA SA 02	<p>Ease of use</p> <p>Overall, at 870 pages in length, the draft Local Plan contains a huge breadth of detailed guidance and in some places is repetitive or duplicates existing London Plan 2021 or national policy. National Planning Practice Guidance states that <i>'all plans need to be as focused, concise and accessible as possible'</i> (para. 002 ref. 61-002-20190315). The plan would form a more usable and accessible document if it was more concise and did not seek to unnecessarily repeat information provided elsewhere.</p> <p>The National Planning Policy Framework (2019) states that plans should <i>'serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area'</i> (para. 16). The London Plan 2021 and NPPF form part of Lewisham's Development Plan, therefore, it is not necessary to repeat the requirements contained in these documents in the Local Plan. To give one example, much of Local Plan Policy QD2 (Inclusive and Safe Design) replicates existing London Plan 2021 policies D5 (Inclusive Design) and D7 (Accessible Housing). More examples are highlighted in the following response; however, this is not a comprehensive list and we recommend a thorough review of the plan to remove unnecessarily duplicated policy.</p> <p>The aspirations of the White Paper 'Planning for the Future' (August 2020) should also be taken into consideration when preparing the Lewisham Local Plan. One of these aspirations being that local plans significantly reduce in size, by at least two thirds, following a defined template, with the NPPF becoming the primary source of policies for Development Management and local plan policies restricted to clear and necessary site or area specific requirements.</p>	Policies have been included within the Local Plan where they provide useful local interpretation, to aid the implementation of national policy or London Plan policies. However, agree to review the plan to identify unnecessary duplication.	Local Plan amended to reduce repetition thereby shortening the length of the Local Plan.
Lendlease (Lichfields obo)	- 3	General LNA SA 02	<p>Summary</p> <p>Lendlease welcome the opportunity to comment on the emerging Lewisham Local Plan and are keen to continue to engage especially in relation to the Deptford Landings site. Lendlease's views and comments should be carefully considered and addressed, to ensure that the delivery of high-quality development at Deptford Landings continues smoothly.</p>	Comments noted.	No change.

			<p>Lendlease is supportive of Lewisham’s aspirations in the Local Plan, particularly in relation to design quality, inclusive design, placemaking and public realm, and driving sustainability standards. However, changes to the document are necessary to ensure it is concise and accessible, avoiding unnecessary repetition of existing policies. Furthermore, Lendlease’s comments with the site allocation for the Deptford Landings site have been detailed above and need to be addressed.</p> <p>Should you wish to discuss comments within these representations further please do not hesitate to contact us.</p>		
Lendlease (Lichfields obo)	3	LNA SA 02	<p>Lewisham’s North Area North Area Site allocation 2 – Timber Yard, Deptford Wharves</p> <p>This policy refers to the site owned by Lendlease where development is ongoing in accordance with the approved masterplan Catford1 (DC/15/092295). Overall Lendlease support the development guidelines and requirements, and these reflect Lendlease’s objectives for the site. However, it is questioned whether this site allocation is necessary considering the site has an extant planning permission secured by the Hybrid Planning Permission which contains the development parameters and masterplan for the site. Therefore, the site allocation is duplicating this information. This should be reviewed in due course as part of the Local Plan preparation in the context of the amended proposals coming forward for the site and the timing of their delivery.</p> <p>Assuming the allocation remains, Lendlease request that the Local Plan refers to the site as ‘Deptford Landings’ for clarity and consistency with the name of the development currently being used. It could be added that the site was previously referred to as Oxestalls Road in the Core Strategy.</p> <p>Other comments on this policy:</p> <p>1 The ‘Site Details’ section refers to the current use of the site as Industrial. However, the planning permission has been implemented and is partly in residential use. The policy should therefore also note that the current use of the site is therefore partly in residential use.</p> <p>2 The ‘Planning Status’ section should be updated to note that Hybrid rather than Outline Planning Permission has been secured, construction has commenced, and Plot 2 is completed and occupied.</p> <p>3 The policy should clearly state that the Hybrid Planning Permission provides the approved masterplan for this site allocation.</p> <p>4 Due to the applications that are coming forward it should be noted that the total non-residential floorspace for the site is up to 10,840 sqm (including currently proposed alterations that are coming forward).</p> <p>5 The remaining Plots will be delivered between 2021-2026.</p> <p>6 Paragraph 15.24 is incomplete and needs to be completed with reference to the Reserved Matters approval for Plot 4 and Plot 6.</p> <p>7 Paragraph 15.27 states that ‘development must be in accordance with a masterplan to ensure coordination of uses across the site’. It should be noted that the Hybrid Planning Permission secured the masterplan for this site and therefore this should be referred to.</p>	<p>Support is noted. Agree that the site be called Deptford Landings (previously known as Oxestalls Road). Disagree that the site allocation should be removed from the Local Plan as it will be delivered in phases over the Plan period and forms one of the most important strategic development sites in the borough. Agree with the other comments that seek updates to the text to align with the current position.</p>	<p>Local Plan amended by changing the name of the site allocation to Deptford Landings and to provide updates regarding the site’s planning, masterplan and delivery status.</p>
SEGRO	-	General	<p>Conclusion</p>	<p>Comments noted.</p>	<p>No change.</p>

(CBRE Limited obo)	3	LNA SA 04	We believe there will be sustainable solutions to addressing these comments and welcome the opportunity to discuss these matters with you. We trust that these representations are clear and would be grateful if you could confirm receipt. If there is any queries or point of clarification, please contact me		
SEGRO (CBRE Limited obo)	3	LNA SA 04	With regards to Evelyn Court specifically, we note that the Lewisham Employment Land Study 2019 recommends that this site is not released for housing and continues to be protected for industrial capacity. The allocation of this site for residential uses is therefore not justified.	The site has an extant prior approval for conversion of office to residential. It is therefore deemed that the SIL is compromised and that a site allocation that supports co-location of uses can help bring about a high quality, mixed use development that will be preferable to a prior approval scheme.	No change.
Vision Develop (Q Square obo)	3	General LNA SA 04	Draft Lewisham Local Plan – Regulation 18 Stage Representations on behalf of Vision Develop We write to you on behalf of Vision Develop in respect of the Regulation 18 Stage of the Draft Lewisham Local Plan. Vision Develop specifically has an interest in land identified as Site Allocation 4 (Evelyn Court), within the Lewisham North Area. They are working collaboratively with Lewisham Homes, who also have an interest in the Site, to deliver a masterplan scheme across the Site Allocation. Comments specifically relating to this Draft Site Allocation are provided and some further comments in relation to specific planning policies are also included. In general, Vision Develop support the emergence of the new Local Plan and support the Council in progressing the document towards adoption.	Support noted. Responses to further detailed representations set out elsewhere in this Consultation Statement.	No change.
Vision Develop (Q Square obo)	3	LNA SA 04	Site Allocation 4 – Evelyn Court at Surrey Canal Road Strategic Industrial Location Vision Develop support the release of the site for co-location development, including employment and residential uses. However, our comments relate to some of the specific wording within the draft designation, including: <ul style="list-style-type: none"> We are supportive of the proposed removal of the Site from the Surrey Canal Strategic Industrial Land (SIL) designation, as identified on the Draft Local Plan “Proposed Changes to the adopted Policies Map”; On the basis that the Site is proposed to be removed from the Surrey Canal SIL designation, we consider that the title of the draft Site Allocation should remove reference to the current SIL designation; In terms of the indicative capacity from a residential units perspective, we consider that this should be a range which better reflects the development potential of the site (i.e. from 80 to 130 new homes). We have been undertaking pre-application discussions with the Council which have informed this range; The draft Site Allocation also states that the redevelopment of the site should be ‘employment led’. We consider that it should be clarified that the redevelopment should be employment led from “...a design perspective...” to ensure that any proposal reflects this; 	Is this a landowner? Support noted. Agree that the site title and policy reference needs amending. The council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Site Allocations Background Paper Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including that it has been re-designated from SIL to LSIS, taking account of the	Name of site allocation amended to remove SIL and to refer instead to LSIS. Evelyn Court LSIS site allocation amended to refer to LSIS policy and tall buildings. Site capacity amended with residential increased to 102 units and employment floorspace increased to 2,381m ² .

			<ul style="list-style-type: none"> We consider that reference to the potential for a taller or tall building could be included within the draft Site Allocation. This is on the basis that the Site is within the context of taller buildings at the adjacent Timberyard site. In addition, Figure 5.1 of the Draft Local Plan indicates that the Site is within a 'more suitable' location for a tall / taller building and Figure 5.2 indicates that it is within a 'less sensitive' location for a tall / taller building. The Site is also not within any strategic or local views. In this context, we consider that the wording of the draft Site Allocation could be updated to indicate this potential; Under the 'Development Requirements' section of the draft Site Allocation, there is cross reference to Draft Policy EC2. However, we consider that, with the de-designation of the Site from SIL, that the reference should instead be made to draft Policy EC7. 	<p>existing character of the area and pre-application discussions for this site.</p> <p>-Based on these considerations, the land use mix and residential units have been amended.</p> <p>Disagree that the words "a design perspective" should be included as optimal capacity for the site will be established at planning application stage through a design led approach.</p> <p>Agree that tall buildings should be referenced and that the site allocation should refer to the LSIS policy, not SIL policy.</p>	
Tribe Student Housing (Avison Young obo)	- 3	General LNA SA 06	<p>Representation on Lewisham Local Plan: Main Issues and Preferred Approaches and Proposed Changes to the Adopted Policies Map (Regulation 18 Consultation).</p> <p>We write on behalf of our client, Tribe Student Housing Ltd, to submit a representation to the London Borough of Lewisham (LBL) in response to the following consultation documents:</p> <ul style="list-style-type: none"> Local Plan: Main Issues and Preferred Approaches; and Proposed Changes to the Adopted Policies Map. <p>The consultation period on both of these documents closes on 11th April 2021. This letter contains an overview of the Site being promoted by Tribe Student Housing Ltd before making representations on the Local Plan and Proposed Changes to the Adopted Policies Map in relation to the proposed site allocation.</p>	Comments noted.	No change.
Tribe Student Housing (Avison Young obo)	- 3	General LNA SA 06	<p>Site Context and Background</p> <p>The Site is located at 164-196 Trundley's Road and 1-9 Sanford Street, Deptford SE8 5JE. The site lies southwest of Deptford Park, adjacent to Folkestone Gardens and extends to approximately 0.38ha. The site is bound by Trundley's Road to the east, Sanford Street to the south, railway lines and a TfL operations building (substation) to the west and Juno Way to the north. The site benefits from a long frontage to Folkestone Gardens.</p> <p>A planning application was submitted for the Site in August 2020 and is pending determined by LBL (ref 20/117866) for the following description of development: <i>"Demolition of existing buildings and redevelopment of the site for two new buildings comprising flexible commercial floorspace (Use Class B1c/B2/B8) at ground and mezzanine floors and residential units (Use Class C3) and purpose-built student accommodation bedspaces (Use Class Sui Generis) above, with associated access and highway works, amenity areas, cycle, car parking and</i></p>	The supplementary information is noted.	No change.

			<p><i>refuse/recycling stores at 164-196 Trundleys Road and 1-9 Sanford Street, SE8 5JE.”</i></p> <p>The determination of this application has been delayed until the LBL regulation 18 draft Local Plan is published. Within the adopted LBL Local Plan, the Site falls within the wider Surrey Canal Strategic Industrial Location (SIL) which protects industrial uses. However, it was confirmed by LBL that the Site would be allocated for co-location of commercial and residential uses in the emerging Local Plan, rendering the development proposals acceptable in principle. This is now reflected in the draft Local Plan (as discussed in this letter) as the site is allocated for comprehensive employment-led redevelopment and co-location of compatible commercial, residential and complementary main town centre uses and de-designated from SIL.</p> <p>The planning application includes conventional residential as well as Purpose-Built Student Accommodation (PBSA). The Site is located within proximity of surrounding Higher Education Institutions and there is an increasing need for PBSA in the Borough and in London generally. In particular, the site is well located to serve Goldsmiths College, University of London, Trinity Laban Conservatoire of Music and Dance and Ravensbourne University London.</p> <p>The redevelopment of this site for employment-led mixed-use development will generate a number of key public benefits:</p> <ul style="list-style-type: none"> • Redevelopment of an underused brownfield site (in line with the NPPF); • An increase in industrial capacity through the provision of new high quality flexible industrial floorspace; • Provision of conventional residential units, including affordable housing, contributing towards borough and London-wide housing targets; • New student bedspaces, contributing to a local and national need for student accommodation and freeing-up the conventional housing stock for local people; • Creation of new jobs associated with the commercial floorspace, plus additional jobs during the construction phase of the development and within the wider economy; • Improvements to the public realm and pedestrian environment near Folkestone Gardens; • A sustainable scheme including connection to SELCHP; and • CIL and s106 contributions towards local infrastructure improvements. 		
Tribe Student Housing (Avison Young obo)	- 3	General LNA SA 06	<p>We understand that the comments received as part of this consultation will inform the ‘Proposed Submission’ version of the Local Plan, which will be published for public consultation (Regulation 19 stage). We look forward to continued engagement with the Council through the Local Plan preparation process.</p> <p>We look forward to confirmation of receipt of these representations at the earliest opportunity. If you have any queries, please do not hesitate to contact us.</p>	Comments noted.	No change.

Trundley's Road Ltd (Avison Young obo)	- 3	General LNA SA 06	<p>Representation on Lewisham Local Plan: Main Issues and Preferred Approaches and Proposed Changes to the Adopted Policies Map (Regulation 18 Consultation)</p> <p>We write on behalf of our client, Trundley's Road Ltd, to submit a representation to the London Borough of Lewisham (LBL) in response to the following consultation documents:</p> <ul style="list-style-type: none"> • Local Plan: Main Issues and Preferred Approaches; and • Proposed Changes to the Adopted Policies Map. <p>The consultation period on both of these documents closes on 11th April 2021. No change.
Trundley's Road Ltd (Avison Young obo)	- 3	General LNA SA 06	<p>Site Context and Background</p> <p>The Site is located at 164-196 Trundley's Road and 1-9 Sanford Street, Deptford SE8 5JE. The site lies southwest of Deptford Park, adjacent to Folkestone Gardens and extends to approximately 0.38ha. The site is bound by Trundley's Road to the east, Sanford Street to the south, railway lines and a TfL operations building (substation) to the west and Juno Way to the north. The site benefits from a long frontage to Folkestone Gardens.</p> <p>A planning application was submitted for the Site in May 2018 on behalf of Trundley's Road Ltd and is pending determined by LBL (ref DC/18/106941) for the following description of development: <i>"Demolition of the existing buildings and construction of a basement, double height commercial plinth at ground floor and two buildings, one of part 6, part 9 storeys and one of part 11, part 15 storeys to provide 2,220 sqm (GIA) of flexible commercial space (use classes B1c/B2/B8) at ground and mezzanine floors with 189 residential dwellings above, together with provision of associated access and highway works, amenity areas, cycle, disabled and commercial car parking (within the basement), and refuse/recycling stores."</i></p> <p>The determination of this application has been delayed until the LBL regulation 18 draft Local Plan is published. At the time of submission, the Site fell within the wider Surrey Canal Strategic Industrial Location (SIL) which protects industrial uses. However, it was confirmed by LBL that the Site would be allocated for co-location of commercial and residential uses in the emerging Local Plan, rendering the development proposals acceptable in principle. This is now reflected in the draft Local Plan (as discussed in this letter) as the site is allocated for comprehensive employment-led redevelopment and co-location of compatible commercial, residential and complementary main town centre uses and de-designated from SIL.</p> <p>The redevelopment of this site for employment-led mixed-use development will generate a number of key public benefits:</p> <ul style="list-style-type: none"> • Redevelopment of an underused brownfield site (in line with the NPPF); 	The supplementary information is noted.	No change.

			<ul style="list-style-type: none"> • An increase in industrial capacity through the provision of new high quality flexible industrial floorspace; • Provision of conventional residential units, including affordable housing, contributing towards borough and London-wide housing targets; • The creation of new jobs associated with the commercial floorspace, plus additional jobs during the construction phase of the development and within the wider economy; • Improvements to the public realm and pedestrian environment near Folkestone Gardens; • A sustainable scheme including connection to SELCHP; and • CIL and s106 contributions towards local infrastructure improvements. 		
Trundley's Road Ltd (Avison Young obo)	- 3	General LNA SA 06	<p>We understand that the comments received as part of this consultation will inform the 'Proposed Submission' version of the Local Plan, which will be published for public consultation (Regulation 19 stage). We look forward to continued engagement with the Council through the Local Plan preparation process.</p> <p>We look forward to confirmation of receipt of these representations at the earliest opportunity. If you have any queries, please do not hesitate to contact us.</p>	Comments noted.	No change.
	3	General LNA SA 06	<p>I write with regard to the site 164-196 Trundleys Road and 1-9 Sanford Street, Deptford SE8 5JE which I am the landowner to submit a representation to the London Borough of Lewisham (LBL) in response to the following consultation documents:</p> <ul style="list-style-type: none"> - Local Plan: Main Issues and Preferred Approaches; and - Proposed Changes to the Adopted Policies Map <p>This letter contains an overview of the site currently being promoted, which currently has two planning applications pending determination (due to be heard at the Strategic Planning Committee March 23rd 2021) before making representations on the Local Plan and Proposed Changes to the Policies Map in relation to the proposed site allocation.</p>	Comments noted.	No change.
	3	General LNA SA06	<p>I understand that the comments received as part of this consultation will inform the 'Proposed Submission Version' of the Local Plan, which will be published for public consultation (Regulation 19 stage). Tribe Student Housing (Avison Young obo)	3	LNA SA 06	<p>As above, Trundley's Road is the subject of a draft site allocation (no. 6 – Strategic Industrial Land (SIL) at Surrey Canal Road and Trundley's Road). This draft allocation is for "Comprehensive employment-led redevelopment. Co-location of compatible commercial, residential and complementary main town centre uses". The draft site allocation sets out the following: <i>"The site is situated within the Surrey Canal Road Strategic Industrial Location, on the south side of Surrey Canal Road and adjacent to Folkestone Gardens. The site functions in isolation of the remaining SIL land by virtue of a railway line that creates a physical barrier at the western edge. It is occupied by a mix of industrial</i></p>	Co-location is generally not appropriate within SIL. However, the Employment Land Study identifies this site as appropriate for co-location. Therefore de-designation of the SIL is being sought so as to help with the delivery of	Surrey Canal Road and Trundleys Road site allocation amended by de-designating SIL and re-designating as LSIS, where co-location is allowed. A new site allocation has been added for Bermondsey

			<p><i>units and associated yard space, a scrap yard, and a small terrace of retail and residential uses at the southernmost end along Trundley's Road. Redevelopment and site intensification, along with the co-location of commercial and other uses, will deliver high quality workspace that forms part of a new employment-led mixed use quarter, together with the Apollo Business Centre SIL and Neptune Wharf MEL sites. Replacement provision of SIL land will be made at the Bermondsey Dive Under site. Development will also enable public realm enhancements to improve the walking and cycle environment as well as the amenity of Folkestone Gardens and neighbouring residential areas."</i></p> <p>Overall, the client is supportive of the de-designation of the Trundley's Road site from SIL. However, in the first instance, we maintain our position that a mixed-use development including residential use could come forward on the site even without the de-designation from SIL. This is on the basis that the site is not a typical SIL site in terms of its existing land uses, location and context. Firstly, the site is currently occupied by a range of uses, including a row of vacant terraced shops with residential accommodation above. Moreover, this part of the SIL designation has been identified to be amongst the poorest quality in terms of environment and functionality. Therefore, the principle of mixed-use development including residential on the site should be considered acceptable given the site's current characteristics.</p> <p>Notwithstanding this, the client is supportive of the draft site allocation and overall approach to industrial land, including the designation of compensatory SIL land at the Bermondsey Dive Under.</p>	employment-led mixed uses on this site. To compensate Bermondsey Dive Under will be designated as SIL.	Dive Under, designated as both SIL and LSIS.
Tribe Student Housing (Avison Young obo)	3	LNA SA 06	There are multiple ownerships within site allocation no. 6. As such, it is likely that development on the site will come forward in phases. Therefore, we consider the site allocation should explicitly acknowledge that individual sites within the allocation can come forward within their ownership restrictions, provided that they have the necessary regard to potential future development on adjacent sites.	Noted. Policy DM3 already deals with multiple ownerships and phasing of sites.	Surrey Canal Road and Trundleys Road site allocation amended by referring to partnership working, phasing and policy DM3.
Tribe Student Housing (Avison Young obo)	3	LNA SA 06	In summary, we are supportive of the draft site allocation no. 6 and aspiration for the Trundley's Road site to deliver a comprehensive employment-led redevelopment and co-location of compatible commercial, residential and complementary town centre uses. However, as set out in this representation, we consider a number of amendments could be made to ensure that the development capacity of the site is optimised and a suitable mix of uses is sought in order to enhance and deliver growth in this key location whilst helping the borough meet its housing targets.	Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the de-designation from SIL and the introduction of co-location on this site. Based on these considerations, the capacities have been amended to reflect planning consent granted for the site and the pre-application for the remainder of the site. Optimal capacity for the Juno Way part of the site	Surrey Canal Road and Trundleys Road site allocation capacities amended to increase residential to 274 (using ratio of 2.5:1 for PBSA) and increase employment to 2,890m ² .

				will be established at planning application stage through a design led approach.	
Trundley's Road Ltd (Avison Young obo)	3	LNA SA 06	<p>As above, Trundley's Road is the subject of a draft site allocation (no. 6 – Strategic Industrial Land (SIL) at Surrey Canal Road and Trundley's Road). This draft allocation is for "Comprehensive employment-led redevelopment. Co-location of compatible commercial, residential and complementary main town centre uses". The draft site allocation sets out the following:</p> <p><i>"The site is situated within the Surrey Canal Road Strategic Industrial Location, on the south side of Surrey Canal Road and adjacent to Folkestone Gardens. The site functions in isolation of the remaining SIL land by virtue of a railway line that creates a physical barrier at the western edge. It is occupied by a mix of industrial units and associated yard space, a scrap yard, and a small terrace of retail and residential uses at the southernmost end along Trundley's Road. Redevelopment and site intensification, along with the co-location of commercial and other uses, will deliver high quality workspace that forms part of a new employment-led mixed use quarter, together with the Apollo Business Centre SIL and Neptune Wharf MEL sites. Replacement provision of SIL land will be made at the Bermondsey Dive Under site. Development will also enable public realm enhancements to improve the walking and cycle environment as well as the amenity of Folkestone Gardens and neighbouring residential areas."</i></p> <p>Overall, the client is supportive of the de-designation of the Trundley's Road site from SIL. However, in the first instance, we maintain our position that a mixed-use development including residential use could come forward on the site even without the de-designation from SIL. This is on the basis that the site is not a typical SIL site in terms of its existing land uses, location and context. Firstly, the site is currently occupied by a range of uses, including a row of vacant terraced shops with residential accommodation above. Moreover, this part of the SIL designation has been identified to be amongst the poorest quality in terms of environment and functionality. Therefore, the principle of mixed-use development including residential on the site should be considered acceptable given the site's current characteristics.</p> <p>Notwithstanding this, the client is supportive of the draft site allocation and overall approach to industrial land, including the designation of compensatory SIL land at the Bermondsey Dive Under.</p>	Disagree. Co-location is generally not appropriate within SIL. However, the Employment Land Study identifies this site as appropriate for co-location. Therefore de-designation of the SIL is being sought so as to help with the delivery of employment-led mixed uses on this site. To compensate Bermondsey Dive Under will be designated as SIL.	Surrey Canal Road and Trundleys Road site allocation amended by de-designating SIL and re-designating as LSIS, where co-location is allowed. A new site allocation has been added for Bermondsey Dive Under, designated as both SIL and LSIS.
Trundley's Road Ltd (Avison Young obo)	3	LNA SA 06	<p>The draft site allocation is for comprehensive employment-led redevelopment. Co-location of compatible commercial, residential and complementary main town centre uses. We consider there should be greater flexibility in the site allocation to reflect the suitability of other uses on the site, including PBSA. The site is a good location for student accommodation due to the proximity and accessibility of the site to higher education institutions such as Goldsmiths College and the University of London. The provision of PBSA on the site would free-up conventional housing stock for local people whilst contributing towards London-wide targets for PBSA bedspaces and overall housing need in the borough. There is an unmet demand for student accommodation which is expected to increase due to COVID-19 and therefore the provision of PBSA will become more important in order to protect the existing conventional housing stock in the borough for family accommodation. We therefore consider the draft</p>	Agree that the site is a suitable location for purpose built student accommodation.	Surrey Canal Road and Trundleys Road site allocation amended to make reference to purpose built student accommodation and to reflect planning consent granted for the site.

			site allocation should be amended to include PBSA as an acceptable use on the site.		
Trundley's Road Ltd (Avison Young obo)	3	LNA SA 06	There are multiple ownerships within site allocation no. 6. As such, it is likely that development on the site will come forward in phases. Therefore, we consider the site allocation should explicitly acknowledge that individual sites within the allocation can come forward within their ownership restrictions, provided that they have the necessary regard to potential future development on adjacent sites.	Noted. Policy DM3 already deals with multiple ownerships and phasing of sites.	Surrey Canal Road and Trundleys Road site allocation amended by referring to partnership working, phasing and policy DM3.
Trundley's Road Ltd (Avison Young obo)	3	LNA SA 06	In summary, we are supportive of the draft site allocation no. 6 and aspiration for the Trundley's Road site to deliver a comprehensive employment-led redevelopment and co-location of compatible commercial, residential and complementary town centre uses. However, as set out in this representation, we consider a number of amendments could be made to ensure that the development capacity of the site is optimised and a suitable mix of uses is sought in order to enhance and deliver growth in this key location whilst helping the borough meet its housing targets.	Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the de-designation from SIL and the introduction of co-location on this site. Based on these considerations, the capacities have been amended to reflect planning consent granted for the site and the pre-application for the remainder of the site. Optimal capacity for the Juno Way part of the site will be established at planning application stage through a design led approach.	Surrey Canal Road and Trundleys Road site allocation capacities amended to increase residential to 274 (using ratio of 2.5:1 for PBSA) and increase employment to 2,890m ² .
	3	LNA SA06	As above, Trundley's Road is the subject of a draft site allocation (no. 6 Strategic Industrial Land (SIL) at Surrey Canal Road and Trundely's Road). The draft allocation is for "Comprehensive employment-led development. Co-location of compatible commercial, residential and complementary main town centre uses". The draft site allocation sets out the following: <i>The site is situated within the Surrey Canal Road Strategic Industrial Location, on the south side of Surrey Canal Road and adjacent to Folkestone Gardens. The site functions in isolation of the remaining SIL land by virtue of a railway line that creates a physical barrier at the western edge. It is occupied by a mix of industrial units and associated yard space, a scrap yard, and a small terrace of retail and residential uses at the southernmost end along Trundleys Road. Redevelopment and site intensification, along with the co-location of commercial and other uses, will deliver high quality workspace that forms part of a new employment-led mixed use quarter, together with the Apollo Business Centre SIL and Neptune Wharf MEL sites. Replacement provision of SIL land will be made at the Bermondsey Dive Under site. Development will also enable public realm enhancements to improve the walking and cycle environment as well as the amenity of Folkestone Gardens and neighbouring residential areas.</i>	Comments are noted. Mixed use development is deemed acceptable on this co-location site. Support for de-designation of SIL and re-designation as LSIS at Trundleys Road is noted. Support for compensatory SIL at Bermondsey Dive Under is noted.	Site allocation has been amended to state: co-location of compatible commercial, residential and purpose built student accommodation – to reflect the granted permission for the site.

			<p>Overall I am supporting of the de-designation of the Trundley’s Road site from SIL. However in the first instance I maintain the position that a mixed-use development including residential could come forward on the site even without the de-designation from SIL. This is on the basis that the site is not a typical SIL site in terms of its existing land uses, location and context. Firstly, the site is currently occupied by a range of uses, including a row of vacant terraced shops with residential accommodation above. Moreover, this part of the SIL designation has been identified to be amongst the poorest quality in terms of environment and functionality. Therefore the principle of mixed-use development including residential on the site should be considered acceptable given the site’s current characteristics.</p> <p>Notwithstanding this, I am supportive of the draft site allocation and overall approach to industrial land, including the designation of compensatory SIL at Bermondsey Dive Under.</p> <p>The draft site allocation is for comprehensive employment-led redevelopment. Co-location of compatible commercial, residential and complementary main town centre uses. I consider there should...[The remaining text to this representation could not be located at the time this document was published]</p>		
Millwall Football Club (CBRE Ltd obo)	- 3	General LNA SA 08	<p>LEWISHAM LOCAL PLAN - REGULATION 18 STAGE “MAIN ISSUES AND PREFERRED APPROACHES” (JAN 2021)</p> <p>CBRE is appointed by Millwall Football Club (‘MFC’), in respect of their land interest which falls within the adopted Surrey Canal Triangle Mixed-use Employment Location, to submit representations to the Lewisham Local Plan - Regulation 18 stage “Main Issues and Preferred Approaches” (Jan 2021) – hereafter ‘the Draft Plan.’</p> <p>We appreciate that the Draft Plan is at a relatively early stage in respect of the formulation of detailed policy requirements for individual site allocations. We trust that the comments set out in this response will be taken into consideration as the detail of the site allocation evolves, and we look forward to working with Officers to achieve this.</p> <p>At this stage of the plan-making process we have not provided a detailed response on the individual Development Management policies within the Draft Plan but reserve the right to comment on these as they are further refined at the Regulation 19 stage.</p>	Support and comments noted.	No change.
Millwall Football Club (CBRE Ltd obo)	- 3	General LNA SA 08	<p>As stated above, the principal response from MFC is one of support for the Draft Plan insofar as assisting in providing guidance and direction on a complex regeneration project. The overriding theme of the comments below is to ensure that the development potential of the site is maximised whilst ensuring that this does not compromise the ability for MFC to continue to operate at the site.</p>	Comments noted.	No change.
Millwall Football Club (CBRE Ltd obo)	- 3	General LNA SA 08	<p>We trust that the comments set out in this response are useful for evolving the detail of the site allocation. We would be grateful if you could confirm receipt of these representations and, as a major stakeholder within the Draft Plan area, would welcome further discussion with you to address the comments raised in these representations ahead of the next iteration of the Draft Plan.</p>	Comments noted.	No change.

Millwall Football Club (CBRE Ltd obo)	- 3	General LNA SA 08	<p>Background to MFC</p> <p>MFC currently competes in The Championship, the second tier of English football. MFC has a long and established history, set up in 1885. From 1910 until 1993 MFC played at what is now known as 'The Old Den' in New Cross, before moving to its current home stadium, 'The Den', in South Bermondsey. Since their move to The Den over 25 years ago, MFC has played most of their competitive football between The Championship and League 1.</p> <p>The last few seasons have brought continued success for MFC, securing promotion to the Championship in 2016/17 and finishing just outside of the playoffs in two of the last three seasons. MFC's aspirations on the pitch are met with aspirations off the pitch with plans to expand, enhance and improve the existing stadium. At the time of writing, MFC is sitting in 10th place in the Championship and once again is pushing for promotion to the Premier League.</p> <p>In its current condition, The Den would not meet the requirements set by the Premier League Regulators and in this sense the aspiration of MFC on the pitch could be potentially stunted due to the current stadium infrastructure. To ensure that MFC remains competitive it is essential that it is able to expand and improve facilities to meet its growth potential and ambitions.</p> <p>Beyond the stadium itself, MFC has a long-established presence in the area and with the community, and strongly supports the principle of regeneration where this supports the needs of the football club and the local community.</p>	The supplementary information is noted.	No change.
The Renewal Group (Carney Sweeney obo)	- 3	General LNA SA 08	<p>Representations on behalf of The Renewal Group</p> <p>We act on behalf of The Renewal Group who are the developers of the New Bermondsey site (part of the Surrey Canal Triangle site) in the northern part of the London Borough of Lewisham. The representations below are made having regard to the development of this site.</p>	Comments noted.	No change.
The Renewal Group (Carney Sweeney obo)	- 3	General LNA SA 08	<p>We are very happy to liaise with you further in relation to the above representations as part of the evolution of the Local Plan.</p>	Comments noted.	No change.
Millwall Football Club (CBRE Ltd obo)	3 3	LNA SA 08 Paras 15.54 and 15.55	<p>Principal Comments on the Draft Plan</p> <p>(1) Importance of Enabling Development</p> <p>Bullet Point 2 of Paragraph 15.55 states '<i>development must capitalise on the opportunities presented by Millwall FC Stadium, including options for its re-provision and expansion, helping to secure the long-term future of the football club in the Borough</i>'. Whilst we fully support this principle, further clarity is required in the Draft Plan policy to guide how this will be achieved. For the avoidance of doubt, 'in the Borough' needs to be replaced with 'on this site', to avoid any ambiguity as to the location of the Club.</p> <p>A key part of the viable future for MFC is its ability to use its site to help drive additional income and revenue to support the required upgrades needed to the stadium. It thus is a fundamental aspect of the deliverability of the allocation (in terms of realising the long term future of the MFC) to ensure that as part of any stadium-led redevelopment MFC is able to also promote other uses (such as</p>	<p>Support is noted. Agree that the future location of the club should be clarified.</p> <p>The Local Plan already provides indicative site capacities that does not artificially constrain development. Optimal capacity for the site will be established at planning application stage through a design led approach.</p> <p>Disagree that Opportunities should</p>	<p>Surrey Canal Triangle site allocation amended by replacing "in the borough" with "on this site".</p>

		<p>residential and commercial) that act as <i>'enabling development'</i>. At present, the Draft Plan (and the site-specific SPD) provide no indication of how the indicative housing figure of 3,600 would be distributed across the allocation.</p> <p>The principle of <i>'enabling development'</i> is common in developments such as this, particularly for football teams outside of the top tier of English football. The GLA Stage II report¹ into the expansion of the Brentford Football Stadium refers to enabling development no fewer than 29 times, with the Stage II Report summarising <i>'the fact remains that the quantum and nature of the enabling housing development is required in the form proposed in order to create the level of revenue required to subsidise the cost of the stadium'</i>.</p> <p>Left unaddressed (i.e. if the Draft Plan remains silent on the distribution of housing across the allocation), the potential consequence is that the available capacity for other uses on the site (i.e. residential, commercial) is absorbed within the wider allocation, on land outside the control (and benefit) of MFC. This in turn introduces a risk of diluting MFC's ability to pursue its own enabling development works to subsidise and release the capital required to deliver the stadium works. MFC requires enabling development to fund the proposed works. A key requirement of the allocation is to support the long-term future of the Club, and it is therefore essential for the Draft Plan to expressly deal with the distribution of housing (and other uses) across the allocation, to provide for the enabling development. If development is not appropriately distributed across the landownerships in the allocation the required improvements to the stadium, itself a key centre piece of the wider regeneration, will not materialise.</p> <p>It is likely that the ambitions for the whole site will be secured by two or more schemes, so the distribution of land use and quantum needs to be considered carefully. Fundamentally, the residential quantum should be seen as indicative so as to not artificially constrain development across the whole site.</p> <p>In addition to being a benefit to MFC this is also required to provide clarity to other landowners within the allocation. The clarity provided through this revision will also be of benefit to Lewisham in assessing applications that come forward on the site and be consistent with Paragraph 16d of the NPPF (2019) which states: <i>'plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals.'</i></p> <p>The need for enabling development is inferred in Paragraph 15.54 in which it is stated <i>'with the creation of a new high-quality mixed-use quarter and leisure destination that will help to secure a viable future for Millwall FC within the Borough.'</i> However, a much more direct reference is required in the site allocation policy to ensure that the development capacity in the allocation can be utilised, at least in part, on the land interests held by MFC.</p> <p>We look forward to working with Officers to agree the exact wording to capture this but suggest that as a minimum, the text included below would represent an appropriate starting point. <i>15.54: Comprehensive redevelopment of the site is integral to supporting regeneration in the area, with the creation of a new high-quality mixed-use</i></p>	<p>specifically mention enabling development.</p> <p>Disagree that the redevelopment of the site should not seek to provide a policy compliant tenure split.</p>	
--	--	--	--	--

			<p><i>quarter and leisure destination that will help to secure a viable future for Millwall FC within the Borough. The delivery, distribution, tenure and quantum of land uses in the site allocation will facilitate enabling development to support works to the stadium.</i></p> <p>In respect of soundness tests the change is required to ensure that the policy is effective in meeting the strategic priorities of the Plan.</p> <p>The emphasis in the allocation on the need for enabling development to facilitate delivery of the required works to the stadium also allows for this to be considered, alongside competing policy requirements, as part of the overall planning balance. For example, in delivering the objectives to improve the stadium it may be difficult to viably do this whilst simultaneously providing a policy compliant tenure split. The reference to tenure as suggested above would allow considerations such as this to be considered in the overall planning balance and against the objectives of what the allocation (and Draft Plan more broadly) seeks to achieve.</p>		
Millwall Football Club (CBRE Ltd obo)	3	LNA SA 08	<p>In addition, as a strategic site allocation the need to be clear on the viability position for the policy (through express reference to the need for enabling development) is consistent with the approach taken in the Planning Practice Guidance2:</p> <p><i>Why should strategic sites be assessed for viability in plan making? It is important to consider the specific circumstances of strategic sites. Plan makers can undertake site specific viability assessment for sites that are critical to delivering the strategic priorities of the plan. This could include, for example, large sites, sites that provide a significant proportion of planned supply, sites that enable or unlock other development sites or sites within priority regeneration areas.</i></p> <p>Initial viability work that has been undertaken to support the proposed works to the site has emphasised the criticality of a required quantum of development to be associated with the MFC proposals if it is to be viable. Ahead of the publication of the Regulation 19 version of the Local Plan we would welcome the opportunity to further test this with Officers so that the wording used in the strategic allocation can be informed by the specific circumstances of this strategic site, consistent with the PPG.</p>	Prior to the Regulation 19 version of the Local Plan the council has met with the landowners to discuss potential development of the site.	No change.
Millwall Football Club (CBRE Ltd obo)	3 3	LNA SA 08 Para 15.55	<p>1) Relationship to the SPD</p> <p>MFC has previously submitted representations to the Surrey Canal Triangle SPD. Bullet Point 1 of Paragraph 15.55 of the Draft Plan states that development ‘<i>must be delivered through a site wide masterplan, in accordance with the Surrey Canal Triangle SPD.</i>’ Whilst we support the principle of the SPD to guide the development proposals on site, it in itself is not a Development Plan document. However, the language used in the Draft Plan (itself a Development Plan document) elevates the level of conformity expected in the SPD with it stated that the masterplan must be delivered in accordance with the SPD.</p> <p>The Planning Practice Guidance (PPG) is clear on the relationship between SPDs and Local Plans. As stated: <i>‘Supplementary planning documents (SPDs) should build upon and provide more detailed advice or guidance on policies in an adopted local plan. As they do not</i></p>	Agree that clarity is needed in relation to the SPD.	Surrey Canal Road MEL site allocation amended by referring to proposals having regard to the overarching vision and development principles set out in the SPD, instead of stating they must be in accordance with it.

			<p><i>form part of the development plan, they cannot introduce new planning policies into the development plan. They are however a material consideration in decision-making. They should not add unnecessarily to the financial burdens on development.'</i></p> <p>Additional flexibility should be introduced in the text to state that the relationship between the Development Plan policy and SPD guidance is clear. The policy can refer to the need for any proposals to have regard to the principles/ overarching vision of the SPD but should stop short of requiring that they 'must be' in accordance with it.</p>		
Millwall Football Club (CBRE Ltd obo)	3 3	LNA SA 08 Para 15.56	<p>(3) Club's Future</p> <p>We welcome reference within the site allocation that <i>'the layout of the site should ensure that Millwall FC Stadium can continue to function as a large spectator destination on a long-term basis. This includes appropriate arrangements for access, servicing and evacuation'</i>. We suggest that in the next iteration of the Draft Plan that this is expanded upon to provide further context on this point.</p> <p>The ability for MFC to operate safely and securely is paramount. The need for safe operations at the stadium has been heightened following proactive and conscious efforts recently to reduce terrorism risk associated with large spectator events. In addition, the current Covid-19 pandemic has further heightened the need for additional measures to be introduced in order to ensure the safe operations of football stadiums. Both of these components are integral parts for how development is progressed at New Bermondsey. It will be essential that forthcoming applications in the site allocation are considered in respect of these issues to ensure that MFC can continue to function as a large spectator destination on a long-term basis. The nuances of planning development around a football stadium are unique and not typically captured in more general planning policies or development management policies; this highlights the need for the site allocation to be clear on the operational needs of MFC from the outset to ensure that development is brought forward in a manner that preserves the key objective to ensure that MFC can continue to function as a large spectator sport on a long term-basis.</p> <p>As drafted the policy could be misinterpreted as simply requiring the current functions in respect of access, servicing and evacuation to be maintained on a longer-term basis. In reality the policy needs to address (if it is to deliver upon its objective) the need for appropriate land/routes to be safeguarded to ensure that the longer-term expansion and improvements to The Den are not precluded or prejudiced in any way. This primarily centres around ensuring that the stadium has the ability to become 'Premier League Compliant' (which it is not currently). Given that this is core to policy and its implementation, the policy should include reference in its supporting text to the need to ensure that proposals brought forward in response to the site allocation must not prejudice the ability of any future stadium expansion to be realised.</p> <p>In addition to providing clarity in respect of access, servicing and evacuation, it is important that the policy provides clear direction as to what will be considered through the development management process. Whilst tall buildings are</p>	Agree that that the longer-term expansion of the stadium should not be prejudiced and that construction and delivery on the site should assume the ongoing, continuous operation of the football club. No need to reference excessive shadowing and/or the wind tunnelling effects of tall buildings, as these will be assessed as part of planning applications.	Surrey Canal Road MEL site allocation amended by ensuring development must not prejudice the ability the f stadium to expand and to allow for the ongoing operation of the stadium during construction of the surrounding land.

			<p>supported in principle on site (see 'Development Quantum' below) at the application stage evidence should be provided to demonstrate that excessive shadowing and/or the wind tunnelling effects of tall buildings will not affect the operation of the football stadium/ football pitch. These are items that are not expressly covered in the adopted SPD and warrant inclusion in the site allocation given their strategic importance to how development on the site is progressed.</p> <p>It should also be written into the policy that the approach to the construction and delivery on the site should assume the ongoing, continuous operation of MFC at The Den with no requirement for them to relocate during the works. This is currently missing from the wording of the site allocation.</p>		
Millwall Football Club (CBRE Ltd obo)	3 2	LNA SA 08 Paras 15.53 and 15.55	<p>(4) Consistency of Proposals</p> <p>The future Draft Plan should be clear on what is anticipated for the stadium. At Paragraph 15.55 the expansion of the stadium is appropriately noted, whereas 15.53 simply refers to '<i>retention or re-provision of the football stadium.</i>' The site allocation should be clear that its aspiration is for the retention, enhancement and expansion of the football stadium in this location.</p>	Agree that the site allocation should refer to retention, enhancement and expansion of the football stadium.	Surrey Canal Triangle MEL site allocation amended by referring to retention, enhancement and expansion of the stadium.
Millwall Football Club (CBRE Ltd obo)	3 3 2 2	LNA SA 08 Para 15.56 QD 04 QD 06	<p>(5) Development Quantum</p> <p>We support the inclusion in the site allocation that the proposed development quantum is indicative. This ensures consistency with draft policy DQD6 Optimising Site Capacity. We would, however, suggest that the text is amended as it relates to tall buildings. Whilst we agree that it is for the design-led process to inform the location of taller buildings on the site, the principle of tall buildings as a component of how the allocation is to be delivered must be acknowledged.</p> <p>Strategic Site Allocation 3 within the adopted Core Strategy (2011) provides for a strategic scale development that suggests the principle of tall buildings is acceptable in this location. Core Strategy Policy 18 identifies the location and design of tall buildings, and states (inter alia) that these may be appropriate in specific locations identified by the Lewisham Tall Buildings Study, and these locations include Surrey Canal Triangle. The principle of tall buildings is established within the adopted site-specific SPD (2020) which states on Page 52 that '<i>given its location within a Regeneration and Growth Area tall buildings are suitable within the SPD Area.</i>' The principle of height is also established through Renewal New Bermondsey Two Limited's consent.</p> <p>In December 2020, the Secretary of State issued (further) Directions to the Mayor in respect of the London Plan, which included to strengthen the need for Policy D9 (Tall Buildings) to ensure such developments are only brought forward in appropriate and clearly defined areas, as determined by the boroughs. The Mayor has now adopted the New London Plan (2021), including the requisite amendments, to reflect the principle that boroughs should determine the location of tall buildings (as defined locally), and identify these on maps in Development Plans.</p> <p>At present, Paragraph 15.56 states '<i>the potential for tall buildings should be explored through the design-led process, taking into account protected views and vistas, including the panorama of the Bridge over the Serpentine.</i>' For the avoidance of doubt, the site allocation needs to expressly confirm that it is an</p>	Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham Tall Buildings Study which will inform amendments to the Local Plan.	Local Plan amended to reflect Tall Buildings Study. Surrey Canal Triangle MEL site allocation amended to specifically refer to the site being a suitable location for tall buildings.

			appropriate location for tall buildings, and this is essential in order to achieve the strategic ambitions specific to this location, particularly taking into account the need to accommodate open space provision, stadium expansion, leisure development and so forth. This will help to ensure consistency with the New London Plan policy on tall buildings, and in the interests of ensuring a justified policy and one that is clear (consistent with Paragraph 16d of the NPPF 2019).		
Millwall Football Club (CBRE Ltd obo)	3 3	LNA SA 08 Para 15.55	(6) Infrastructure We suggest that the 3rd from last bullet point of 15.55 is updated to set out that it is expected, as per CIL 122 Tests, that reasonable and proportionate contributions will be made to this infrastructure project. At present the text currently reads <i>‘Provision for the new transport infrastructure, including a new Overground station at Surrey Canal Road and accompanying walking and cycle bridge.’</i> We assume that the text is referring to the fact that the provision of this infrastructure will be made for within the red line of the site allocation as opposed to a requirement for the site allocation to deliver this project (including its funding). This clarification should be provided for in the revised site allocation wording.	PROVIDE CLARIFICATION Agree that the current wording relating to contributions is ambiguous.	Surrey Canal Triangle MEL site allocation amended to clarify the transport infrastructure required on-site and that this is subject to partnership working with other providers.
Millwall Football Club (CBRE Ltd obo)	3 3	LNA SA 08 Para 15.55	(8) Millwall Community Trust The site allocation as drafted is silent on the Millwall Community Trust (MCT). The adopted SPD includes provisions for this use to be retained on site. Given the importance of the MCT to the local area we suggest that the requirement to safeguard this use is included as one of the key development requirements as set out under 15.55. At present the text states <i>‘Development proposals must demonstrate a comprehensive and coordinated approach to supporting healthy communities by integrating new and enhanced publicly accessible sports, leisure and recreation opportunities, including open spaces and community facilities, in line with Policy CI 1 (Safeguarding and securing community infrastructure)’</i> . We suggest that this is expanded to state that the development on site should demonstrably support the longer-term future of the MCT within the allocation. The need to provide for the long term future of the Millwall Community Scheme is included in the existing Core Strategy and should be brought forward into the New Local Plan.	Agree that Millwall Community Scheme should be referenced in the Local Plan.	Surrey Canal Triangle MEL site allocation amended by making reference to the long term future of the Millwall Community Scheme.
The Renewal Group (Carney Sweeney obo)	3	LNA SA 08	Site Allocation 8: Surrey Canal Triangle Mixed Use Employment Location The details in the allocation need to be updated, for example in relation to the following: <ul style="list-style-type: none"> The current use of the site is far more than just a football stadium and industrial uses. The full extent of uses on the New Bermondsey site is provided in Renewal’s recent planning application. A Section 73 application was granted in 2013. Renewal’s planning application is for 3,500 residential units plus a variety of employment floorspace. Development on the Millwall Football Club land and on the Lions Centre would be additional to this. The indicative development capacity figures need to be updated to reflect this. A <i>“clear north-south route linking South Bermondsey Station to Bridgehouse Meadows and the new Overground Station”</i> can only be fully achieved with land beyond the control of Renewal, MFC and the Council. The policy needs to clarify this and not require the developers of the site to provide it in full. 	Where no advanced pre-application has taken place, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Site Allocations Background Paper. Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the scale of	Surrey Canal Triangle MEL site allocation amended to increase the residential capacity beyond the 3,500 already consented to 4,089 units, (i.e. 589 for LBL land surrounding the stadium), to reduce employment floorspace to 14,253m ² and to increase main town centre floorspace to 46,469m ² . Surrey Canal Triangle MEL site allocation

			Finally, following final changes to the London Plan prior to its eventual adoption and publication, the allocation text needs to be very clear that this is a suitable location for tall buildings.	development resulting from the planning consent granted for the part of the site owned by Renewal and the need to have regard to the development principles set out in the Surrey Canal Triangle SPD. Based on these considerations, the capacity has been amended. Optimal capacity for the site will be established at planning application stage through a design led approach. Agree that Bridgehouse Meadows is located outside of the site. Following the Regulation 18 public consultation, additional work has been undertaken on the Lewisham Tall Buildings Study which will inform amendments to the Local Plan.	amended to reference existing site uses, the Section 73 application and improved connectivity to surrounding areas.
WSP (Sainsbury's Supermarkets Ltd obo)	General LNA SA 09	<p>1. We write on behalf of Sainsbury's Supermarkets Ltd (SSL) in response to the consultation of the new "Lewisham Local Plan: Main Issues and Preferred Approaches", under Regulation 18 of the Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>2. SSL owns the Sainsbury's store and petrol filling station at New Cross Gate, as well as the retail warehousing and associated car parking. SSL objects to the proposed current allocation in the new Local Plan as safeguarded land to accommodate the Bakerloo line Extension (BLE), including a new station. SSL have previously strongly objected to Transport for London's (TfL) consultations on the use of their site for the BLE, including the site's identification as a tunnelling worksite.</p> <p>3. We have reviewed the Regulation 18 "Lewisham Local Plan: Main Issues and Preferred Approaches" document and evidence base and have set out our comments below.</p>	The objection to this site being safeguarded to accommodate the BLE is noted.	No change.	
WSP (Sainsbury's Supermarkets Ltd obo)	LNA SA 09	<p>The Allocation of the Site</p> <p>4. The SSL site, referred to in the new Local Plan as the 'Former Hatcham Works, New Cross Road', is currently allocated for 912 residential units, 4,560sqm of employment floorspace and 18,240sqm of 'main town centre' floorspace. The</p>	The supplementary information is noted. The routing of the BLE, and the location of stations and required works sites associated with	No change.	

	<p>site is also allocated for “<i>new and improved transport infrastructure, including land and facilities required to accommodate the Bakerloo line extension</i>”.</p> <p>5. The identification of the site as the ‘Former Hatcham Works’ site is misleading as it does not reflect the current use of the site. The naming of the site appears to be a deliberate attempt to obfuscate the impact of the allocation on the retail that is fundamental to New Cross/New Cross Gate District Centre. We suggest that the site is renamed to the ‘New Cross Gate Retail Park’ in later versions of the Local Plan. For clarity, we refer to the site as New Cross Gate Retail Park in these representations.</p> <p>6. The proposed BLE has been promoted by TfL since 2017. The proposals have undergone three rounds of consultation. SSL has submitted representations to each of these consultations (dated April 2017, December 2018 and December 2019).</p> <p>7. Based on the published consultation information and supporting evidence, SSL strongly objected to the location of the new BLE station at New Cross Gate Retail Park and the use of the site for tunnel launching and as a works site. This objection still stands.</p> <p>8. SSL is deeply concerned at TfL’s lack of genuine consideration of the concerns raised and the rights of Sainsbury’s as the landowner and long-standing employer and business within the community. SSL has engaged with TfL at each formal consultation opportunity to identify issues and concerns regarding the BLE plans in respect of New Cross Gate Retail Park. Detailed objections have been submitted, supported by extensive technical evidence set out as follows:</p> <ul style="list-style-type: none"> ▪²A Socio-economic Assessment, prepared by WSP (formerly WSP Indigo) (Appendix A); ▪²A Retail Impact Assessment, prepared by WSP (formerly WSP Indigo) (Appendix B); ▪²Tunnel engineering advice provided by Dr Sauer and Partners (Appendix C); and ▪²A Transport Appraisal prepared by Intermodality (Appendix D). <p>9. In making detailed representations, SSL has previously identified fundamental short, medium and long-term adverse impacts that will affect their site at New Cross Gate and the New Cross/New Cross Gate District Centre and the credibility of the BLE proposals.</p> <p>10. The December 2019 consultation was the first time the location of the New Cross Gate station was explicitly included in the public consultation and TfL acknowledges that the store will have to close as a result of the BLE proposals. In previous public consultations, TfL indicated that the store could continue to trade.</p> <p>11. SSL remains firmly of the view that the previous TfL consultation responses were made based on misleading and incomplete information which failed to fully convey the impact of the new station being located at New Cross Gate Retail Park. It appears that the allocation in the new Local Plan reflects TfL’s preferred</p>	<p>constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.</p>	
--	--	--	--

		<p>strategy and has not considered the impacts of the permanent closure of the Sainsbury's store on (inter alia) the vitality and viability of New Cross/New Cross Gate District Centre and the socio-economic impacts of the associated job losses.</p> <p>12. The BLE is central to the new Local Plan and its spatial strategy. Therefore, in order for the Local Plan to meet the soundness tests required, the Council needs to be certain on the deliverability of the BLE and the sites TfL has chosen for stations and tunnelling.</p> <p>13. SSL has provided clear evidence which demonstrates, not only that there is no robust business case for the BLE, but that the choice of the New Cross Gate Retail Park for a station and as a tunnelling site will result in adverse impacts on the local community and area.</p>		
WSP (Sainsbury's Supermarkets Ltd obo)	LNA SA 09	<p>14. In summary, SSL's concerns are as follows:</p> <ul style="list-style-type: none"> ▪ There is no evidence of a robust and transparent business case for a capital intensive and disruptive infrastructure project such as the BLE. The project should be halted pending the publication of a robust business case; ▪ Since it is acknowledged that the delivery of a station at New Cross Gate Retail Park will force the closure of Sainsbury's store, the location of the station at New Cross Gate must be re-consulted upon. Previous consultations assumed that Sainsbury's could continue to trade; ▪ The selection of New Cross Gate Retail Park as a station and tunnelling worksite location has not been robustly justified and there has not been proper consideration of alternatives which will have less impact; ▪ The selection of New Cross Gate Retail Park as a station and tunnelling worksite has many disadvantages which have not been properly considered or articulated. For example, the closure of the Sainsbury's store will have significant socio-economic consequences for the future of the New Cross/New Cross Gate District Centre which have not been considered; ▪ TfL has not appropriately and robustly considered the consequential impact upon the regeneration/development potential of New Cross Gate Retail Park to provide over 1,000 new homes and a new Sainsbury's foodstore, maintaining the continuity of trading during construction and supporting the vitality and viability of New Cross Gate/New Cross District Centre; ▪ TfL does not appear to have fully considered other potentially viable options for locating New Cross Gate station, closer to the rest of the New Cross/New Cross Gate District Centre, including on the Goodwood Road site; ▪ TfL does not appear to have seriously considered alternative tunnelling worksites to New Cross Gate Retail Park. For example, the Wearside Road Depot is a more appropriate tunnelling worksite; ▪ The impact of the tunnelling worksite on a Site of Importance for Nature Conservation (SINC) has not been assessed; 	<p>The reasons for objecting to the BLE station and tunnelling works site being located on this site are noted.</p> <p>The routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.</p>	No change.

		<p>There is no evidence that a Strategic Environmental Assessment (SEA) has been prepared to holistically evaluate the effects of the BLE proposals on the environment and social, cultural and economic circumstances; and</p> <p>There is no evidence that TfL has undertaken a robust cost benefit analysis of the BLE proposal, or indeed that there is a robust business case that justifies the significant public expenditure.</p>		
WSP (Sainsbury's Supermarkets Ltd obo)	LNA SA 09	<p>Safeguarding of the Site for the BLE</p> <p>15. Through their ongoing engagement in the consultation process for the proposed BLE, SSL have reiterated their support in principle for the BLE, provided the business case is proven. However, SSL strongly object to their site being identified as a tunnelling worksite by TfL and the site's selection as the location for New Cross Gate Station.</p> <p>16. As explained, the allocation of the New Cross Gate Retail Park to accommodate the BLE will have significant and unacceptable consequences for the existing Sainsbury's store, its employees and the community which it serves. The allocation results in the loss of the regeneration opportunity presented by the site and the loss of any positive impact on the wider New Cross/New Cross Gate District Centre.</p> <p>17. The extent of this lost opportunity is demonstrated by the joint planning application that SSL submitted with London Property Developers, Mount Anvil in 2019. The planning application sought to deliver 1,161 homes on the site across two phases, as well as a replacement supermarket, commercial space, placemaking and infrastructure. The Council validated the planning application on 24 January 2020 (LPA Ref: DC/19/114283). However, the application was subsequently withdrawn on 27 February 2020 due to the ongoing uncertainty around the BLE which has blighted the site.</p> <p>18. Despite this, SSL remains committed to delivering new housing and investment immediately if the allocation for a new station and tunnelling worksite is lifted.</p> <p>19. As a substantial and highly accessible site, with a PTAL rating of 6, New Cross Gate Retail Park offers a valuable regeneration opportunity with excellent potential for contributing to the delivery of much-needed high quality housing. This is recognised in the emerging Local Plan through its allocation for approximately 912 units alongside employment and main town centre uses. SSL is confident that the site could accommodate more housing than the allocation proposes, given its experience elsewhere where densities in excess of 350 units per hectare have been achieved on sites with a lower PTAL than the New Cross Gate Retail Park site. SSL's proposals can deliver significant beneficial development and investment which will be lost should the site be safeguarded for BLE works.</p>	Comments are noted. The routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.	No change.
WSP (Sainsbury's Supermarkets Ltd obo)	LNA SA 09	<p>The Lack of a Business Case for the BLE</p> <p>20. SSL is concerned that TfL and Lewisham Council are using the new Local Plan to promote a major capital-intensive and disruptive infrastructure project, when no evidence has been provided to demonstrate a robust and transparent business case. SSL has repeatedly asked for information about overall</p>	Comments are noted. The routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have	No change.

	<p>development costs, including the costs of land acquisition and the wider socio-economic impacts on the community and New Cross/New Cross Gate District Centre, but TfL remains unwilling to discuss or disclose this. If the site is to be allocated and safeguarded in the new Local Plan, it is incumbent on the Council (with the support of TfL) to address this failing.</p> <p>21. Given that HS2 and Crossrail 1 are both significantly over budget and behind schedule, and Crossrail 2 has been removed as a spending priority for the next decade, it is difficult to understand why TfL continues to press ahead with the BLE without clear evidence of a business case. Indeed, now it is acknowledged that the Sainsbury's store will be forced to close, the effect this will have on the 'business case' should be open to scrutiny.</p> <p>22. As a result of the COVID-19 pandemic over the past 12 months, there has been a dramatic reduction in journeys on the TfL network which has caused a huge drop in revenue. The Mayor of London has had to request several emergency grants from Central Government in order to keep the capital's transport network running.</p> <p>23. The Comprehensive Spending Review, submitted to TfL's Finance Committee on 30 September 2020, notes that passenger income fell by more than 90% compared to the previous year. A total of £1.9 billion was given by the Government to help keep the transport network running up until October 2020. The Mayor then sought a commitment of at least £5.65 billion over the remainder of 2020/21 and 2021/22, with £4.9 billion needed to allow the network to keep running and £750 million for the delivery of Crossrail, however this was not granted.</p> <p>24. On 1 November 2020, TfL received a £1.8 billion bailout from the Government which secured funding until 31 March 2021. On 22 March 2021 an additional £485 million was secured up until 18 May 2021.</p> <p>25. As such, it is clear that TfL is currently living a "hand-to-mouth" existence, without the ability to secure funding for huge investment projects including the BLE.</p> <p>26. As part of this Spending Review, TfL has decided that the BLE will not form part of its spending priorities in the next decade. Therefore, there is still no funding secured for the construction of the BLE and the emerging Local Plan needs to account for this uncertainty.</p> <p>27. If the BLE is not to be delivered for at least the next 10 years (and with the best will, it is likely to be at least 15 years before it is under construction) then a large number of sites within Lewisham Borough will become sterile and will not be able to deliver much needed housing and regeneration in the Borough.</p> <p>28. Further, there is no guarantee that the BLE will progress after 10 years so development on these sites may be pushed back for 20 or more years which will severely inhibit investment and growth.</p> <p>29. Since the onset of the pandemic, there has been a significant change in travel patterns, with many people working from home. As normality returns, there will be a need to reassess public transport investment in light of reduced passenger</p>	<p>already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.</p>	
--	---	---	--

		<p>numbers and less pressure on peak travel as people are more flexible with commuting times.</p> <p>30. The December 2019 TfL consultation stated that an application to the Secretary of State for a TWAO (Transport and Works Act Order) will not be made before 2023. However, on 1 March 2021 the Department for Transport issued a safeguarding direction for the proposed route of the BLE. This includes 'Area of Surface Interest', which includes the whole of the Sainsbury's site and 'Area of Subsurface Interest' which includes the southwest corner of the site.</p> <p>31. The safeguarding direction does not contain any review or expiry date which creates great uncertainty for landowners, staff employed on the site and the local community, particularly when there is still uncertainty about funding for the BLE and its delivery, even in the long term.</p> <p>32. To prevent the redevelopment of an available and deliverable brownfield site is unacceptable. There is no certainty that the BLE will ever be delivered. It has no timescale for delivery and no funding.</p> <p>33. In short, the allocation for the BLE station should be removed until the business case is proven. The desire to accommodate the BLE should not prohibit the significant and immediate redevelopment of the site which would bring substantial benefits to the local community and the Borough as a whole.</p>		
WSP (Sainsbury's Supermarkets Ltd obo)	LNA SA 09	<p>The Location of New Cross Gate Station</p> <p>34. At paragraph 15.58 it is noted that the site can accommodate a new station for the BLE. There is simply no evidence or justification as to why the New Cross Gate Retail Park site is an appropriate site for a new station.</p> <p>35. The choice of New Cross Gate Retail Park is referred to in TfL's Stations Overview consultation document (2019) as follows:</p> <p><i>"In the 2017 consultation we consulted on our proposed site for the station being the site of the retail park lying on the west side of the existing New Cross Gate Rail station. A majority of respondents expressed support for this proposal."</i></p> <p>36. We can find no further or fuller explanation as to why New Cross Gate Retail Park has been chosen by TfL. There does not appear to be any strategic environmental assessment (SEA) undertaken by TfL or any in-depth evidence based analysis, including a cost/benefit analysis to justify this selection.</p> <p>37. Furthermore, it is misleading to state that a majority of respondents expressed support for the proposal. At that time, TfL did not acknowledge that the existing Sainsbury's store will need to close as a result.</p> <p>38. Several stakeholders including local councillors (Cllr Charlie Davis and Cllr Liz Johnston-Franklin) have expressed concern over the loss of the Sainsbury's store, particularly in conjunction with the Tesco store in Old Kent Road, including the increased journeys to other supermarkets and the impacts of the closures as local employers.</p> <p>39. London First, who represent a number of businesses, and Goldsmiths University have also expressed concern over the plans at New Cross Gate. The Civil Service Pensioners Alliance is concerned over the loss of the Sainsbury's</p>	Comments are noted. The routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.	No change.

		<p>store and the impact of a lack of large supermarkets in the area which would result from the works at this site.</p> <p>40. Finally, none of the TfL consultations have provided any information on how the buses which currently use the Sainsbury's site would be relocated during the construction period of the station. This is a matter about which local people will want to be informed.</p> <p>41. SSL does not believe that there has been adequate and effective consultation on the location of the station by TfL and the significant socio-economic and retail impacts of the loss of the Sainsbury's store have not been addressed. If the new Local Plan allocates the site for a new station, it will be incumbent upon the Council to undertake this work.</p> <p>42. The location of the station at New Cross Gate Retail Park as an interchange would be inefficient compared to the Goodwood Road site which is better located in relation to New Cross District Centre and Goldsmiths University, so reducing travel distances and journey times when changing trains.</p>		
WSP (Sainsbury's Supermarkets Ltd obo)	LNA SA 09	<p>A Tunnelling Worksite at New Cross Gate Retail Park</p> <p>46. TfL's preferred location for a tunnelling work site is the New Cross Gate Retail Park site. The new Local Plan does not mention this, only that the site is allocated for 'land and facilities required to accommodate' the BLE. If the intention is that the site is to be a tunnelling work site, this should be made clear in the new Local Plan. There has not been an objective and transparent assessment of the tunnelling worksite location alternatives.</p> <p>47. Leaving aside the socio-economic impacts of the site being used as a tunnelling work site, SSL also have technical concerns about the appropriateness of the New Cross Gate Retail Park site.</p> <p>48. A technical note from Dr Sauer and Partners (DSP) is provided at Appendix C. This addresses the tunnelling worksite proposals within the current consultation. It confirms that there is no over-riding technical reason as to why the worksite is 'best' located at New Cross Gate Retail Park. Indeed, the opposite is true as the opportunity to move spoil by rail from New Cross Gate Retail Park is very limited.</p> <p>49. However, DSP confirm that there is an option to accommodate the tunnelling worksite at the Wearside Road Depot, which has been dismissed by TfL due to its size (based upon an arbitrary size of 2.4ha). DSP demonstrate that the site could be expanded beyond the area considered by TfL to provide a suitably sized site, based on TfL's criteria. Indeed, due to the availability of more trains in this location, DSP also identify that the required site size at the Wearside Road Depot could be smaller than that proposed at New Cross Gate Retail Park, as the requirement for spoil stockpiling and storage of tunnel segments would be less with the enhanced accessibility by rail of the Wearside Road Depot site.</p> <p>50. DSP also confirm that the location of a tunnel launching site at the Wearside Road Depot could significantly reduce the tunnel boring construction programme as it provides far greater locational efficiencies in terms of the requirements for assembly and disassembly of tunnel boring machines.</p>	Comments are noted. Disagree that Wearside Road Depot should be safeguarded and allocated as a tunnelling site. The routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.	No change.

		<p>51. Further technical work has been undertaken by Intermodality. Intermodality have had regard to the implications on the rail network of the associated freight movements required to remove spoil and allow for the loading and unloading of materials. The Intermodality Assessment is provided in full at Appendix D.</p> <p>52. In summary, Intermodality have identified critical gaps in the consideration of worksite options by TfL which undermine the selection of New Cross Gate Retail Park as the primary preferred tunnelling worksite option and raise serious questions over the robustness of TfL's approach.</p> <p>53. The New Cross Gate Retail Park site sits within a heavily congested part of the London rail network, with very limited slack in the daily scheduling. Heavy freight movements are necessarily slow and have the potential to severely disrupt passenger services.</p> <p>54. Intermodality confirm that both Wearside Road Depot and Hither Green sites have the potential to be better worksite options because they are located where there is greater network capacity to accommodate freight movements and onward connections to facilitate the disposal of spoil.</p> <p>55. Furthermore, the capacity of the site to accommodate storage of spoil and other materials is not confirmed; and the risk of interruption to passenger services is far greater, with the associated implications for the surrounding network far more severe.</p> <p>56. Finally, the tunnelling worksite at New Cross Gate Retail Park will require development of a Site of Importance for Nature Conservation (SINC). The impact on this protected site has not been assessed.</p> <p>57. It is clear from this work that there are at least two more appropriate sites at Hither Green and Wearside Road. Both represent better alternatives with respect to surrounding rail network capacity and opportunity to overcome constraints.</p> <p>58. Wearside Road Depot is currently not allocated in the new Local Plan.</p> <p>59. The analysis by DSP and Intermodality confirms that the Wearside Depot is a better tunnelling worksite than the New Cross Gate site because:</p> <ul style="list-style-type: none"> ▪ it is located at the southern end of the BLE and thereby allowing the tunnel boring machines to have two drives rather than four if the tunnels were launched from New Cross Gate Retail Park. This has significant construction programme implications; ▪ it is better located to facilitate the removal of spoil by rail, being on a less congested part of the network; ▪ it would have fewer environmental impacts as trains would not be restricted to night-time movements only, and ▪ it would not sterilise a valuable regeneration site with advanced redevelopment plans. <p>60. For these reasons, if the new Local Plan does make allowance for the BLE, the Wearside Road Depot should be safeguarded and allocated as a tunnelling site.</p>		
WSP (Sainsbury's)	LNA SA 09	The Economic Impact of Closure of Sainsbury's	Comments and supplementary information	No change.

<p>Supermarkets Ltd obo)</p>	<p>61. The Stations Overview consultation document which formed part of the December 2019 TfL consultation, confirms that TfL is proposing a new station at New Cross Gate Retail Park. It goes on to confirm that:</p> <p><i>“At the last consultation we stated that there could be a potential loss of the Sainsbury’s supermarket during the construction period. As we have developed our plans for the site to incorporate the primary tunnelling worksite, it has become clearer that the current supermarket, other retailers and petrol station would not be able to remain operational on the site during construction.”</i></p> <p>62. It is clear that the allocation of this site for land and facilities to accommodate the BLE will mean that the businesses at New Cross Gate Retail Park will be forced to close. This will have significant negative impact on: Sainsbury’s business; the people currently employed on the site; the regeneration of the area in the short term; the wider community; and New Cross/New Cross Gate District Centre.</p> <p>63. The socio-economic implications of the loss of the Sainsbury’s store are explained in full technical detail at Appendix A.</p> <p>64. The socio-economic analysis confirms that the Sainsbury’s store and the area surrounding it is within Lewisham’s lower super-output areas (LSOAs) that have been assessed as some of the most deprived in England. The existing Sainsbury’s store is found to contribute positively to each of the seven domains which constitute the English Indices of Deprivation, including:</p> <ul style="list-style-type: none"> ▪ Income deprivation; ▪ Employment deprivation; ▪ Education, skills and training deprivation; ▪ Health deprivation and disability; ▪ Crime; ▪ Barriers to housing and services; and ▪ Living environment deprivation. <p>65. Given the level of deprivation experienced within the New Cross Gate area, it is apparent that the removal of the Sainsbury’s store in its current format will detrimentally impact the community and potentially worsen its relative deprivation.</p> <p>66. It is further estimated that the employment created by the existing Sainsbury’s store generates gross value added (GVA) of some £8.7million per annum. This is a permanent economic benefit which will be enjoyed in perpetuity if the store continues to trade and to employ the same number of staff members. This significant figure demonstrates the major contribution of the Sainsbury’s store to Lewisham’s economy.</p> <p>67. The analysis also estimates the additional value generated beyond labour productivity. This is referred to as social value, which represents a holistic evaluation of social, environmental and economic effects. Using a national</p>	<p>are noted. The routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.</p>	
------------------------------	---	---	--

	<p>framework for measuring social value, the socio-economic analysis estimates the social value of the store to be £4.8million per annum.</p> <p>68. These figures are noteworthy given the evident deprivation experienced in the immediate New Cross Gate area, demonstrating the positive contribution of the store to the local community. The removal of the Sainsbury's store in its current format at New Cross Gate will be detrimental and undoubtedly lead to negative socio-economic impacts within the local community.</p> <p>69. The importance of local retail and access to food has become even more stark during the COVID-19 pandemic. Whilst the pandemic has altered the way people shop and the demand for online retail is growing, we consider that the provision of a supermarket in this location is vitally important for the area and local community.</p> <p>70. The socio-economic analysis further identifies that there would be an opportunity cost of not delivering redevelopment proposals at the New Cross Gate Retail Park site which will be delayed indefinitely if the site is allocated for the BLE station. It quantifies this as follows:</p> <ul style="list-style-type: none"> ▪ Gross Added Value of £10.9million per annum, representing an increase of £2.2million per year compared to current operations. Consequently, the cessation of the redevelopment plans and removal of the current store operations would see a loss of over £11 million each year. This is a conservative figure as it fails to account for other jobs that would be lost from other businesses operating in the immediate area who rely on the Sainsbury's store as an 'anchor store' for the New Cross/New Cross Gate District Centre; ▪ The important contribution of the proposals to local housing need targets and the boost to local population which would generate circa £3.6 million for convenience expenditure and £6.5 million in comparison expenditure available to be spent within the New Cross/New Cross Gate District Centre; ▪ The boost to the New Cross/New Cross Gate District Centre turnover through an enhanced store, expanded Groceries Online (GOL) services and improved links with the adjoining District Centre. The enhanced GOL services (which have now been consented under LPA ref. DC/20/118401) are estimated to improve store turnover by £11m as well as having considerable sustainability benefits, including the reduction in car use and the flow on impacts of this on traffic, road incidents and air quality in the local area; ▪ Improvement in the shopping environment allowing for positive impacts on the New Cross/New Cross Gate District Centre; ▪ Continued promotion of active transport through the convenience offered by an accessible supermarket located within the surrounding neighbourhood; and ▪ Additional job creation through the construction required for the scheme. <p>71. In summary, the benefits associated with the regeneration of the New Cross Gate Retail Park site are extensive and would directly benefit the local economy,</p>		
--	--	--	--

		<p>increase the housing stock and enhance community accessibility to vital services and infrastructure.</p> <p>72. Following consideration of the published information relating to options assessments, including station site selection undertaken by TfL, the socio-economic assessment concludes that although work has been undertaken by TfL to assess the costs and benefits of the BLE project and the location of the New Cross Gate station, the research and subsequent analysis does not account for the wider value and contribution to the local community of the existing Sainsbury's store. In particular, it fails to capture the potential benefits of the Sainsbury's redevelopment proposals which seek to drive additional value to the local community as explained above.</p>		
WSP (Sainsbury's Supermarkets Ltd obo)	LNA SA 09	<p>The Retail Impact of Closure of Sainsbury's Store</p> <p>73. Concern over the loss of the retail facilities at the Sainsbury's site in New Cross Gate have been raised in previous TfL consultations, not only from SSL, but from members of public in response to the consultation process.</p> <p>74. This issue has been examined in greater technical detail by WSP (formerly WSP Indigo), who have undertaken a detailed Retail Impact Assessment (RIA) in October 2019. The RIA is appended in full at Appendix B.</p> <p>75. Assessing the impact of a number of scenarios, the RIA determines that the worst-case scenario for the New Cross/New Cross Gate District Centre is the loss of the Sainsbury's store for ten plus years. This would result in the reduction of the District Centre's turnover by some £55m, an impact of -73%. This is undoubtedly a significant adverse impact in terms of the performance of the District Centre that will fundamentally undermine its role and function within the retail hierarchy and seriously impact on its health, vitality and viability.</p> <p>76. Furthermore, the RIA identifies that the loss of the Sainsbury's store will have significant implications in terms of access to essential grocery needs for many local residents, particularly those who rely on public transport; loss of jobs, which will also largely be felt by local residents; the unsustainable shopping patterns it will create, and the adverse highways impacts as a consequence of the closure of a popular store, diverting demand and trips to more distant stores; and the loss of in-store facilities and opportunities, including the pharmacy, Explore Learning and the local charitable benefits that are delivered through Sainsbury's commitment to supporting their local communities.</p> <p>77. The pandemic has shown how important it is for the community to have access to affordable food and essential products, in close proximity to where they live. Stores such as the New Cross Gate Sainsbury's are more important than ever as they provide a huge range of products and are situated at the heart of the community, within the District Centre.</p> <p>78. The range and extent of quantitative and qualitative impacts identified represent a fundamental conflict with national and local planning policy (including the NPPF and the adopted London Plan) to support town centres, facilitating their growth, diversification and adaptation to meet the needs of their local communities.</p>	Comments and supplementary information are noted. The routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.	No change.

		<p>79. The Council's retail evidence base, the Lewisham Retail Capacity Study 2019 Update supports the findings of the RIA at Appendix B. The Retail Study Update recognises the importance of the existing Sainsbury's store in New Cross/New Cross Gate District Centre. Paragraph 2.20 of the Retail Study Update states that the household survey found that the Sainsbury's store was one of the most popular destinations for convenience goods shopping for residents in the survey area, recognising that it is a well-used store helping to meet the shopping needs of local residents. As such, the redevelopment of the site would mean that those residents who currently shop at the store would have to travel to stores further afield to undertake their main food shopping.</p> <p>80. Furthermore, Table 5 of the Retail Study Update highlights the importance of the Sainsbury's store to the vitality and viability of the New Cross/New Cross Gate District Centre. Table 5 shows that the current Sainsbury's store accounts for approximately 70% of the District Centre's convenience turnover. As such, the loss of the Sainsbury's store will significantly reduce the turnover of the District Centre and have a significant adverse impact upon it.</p>		
WSP (Sainsbury's Supermarkets Ltd obo)	LNA SA 09	<p>Former Hatcham Works, New Cross Road</p> <p>85. The site should be identified as New Cross Gate Retail Park, or the Sainsbury's site. The reference to the Former Hatcham Works is misleading for the reasons set out above.</p> <p>86. The reference to the BLE should be removed from the allocation. The site should be allocated for mixed use development to provide a new Sainsbury's store, a minimum of 912 new homes and employment and 'main town centre' floorspace for delivery in the first five years of the new Plan period.</p>	<p>Disagree. Hatcham is well recognised by the local community and is part of the heritage of the area, being reflected in the name of the nearby Conservation Area.</p> <p>Disagree that reference to the BLE should be removed from the Local Plan. Whilst the planned growth within the Local Plan is not predicated solely on the delivery of the BLE, the Council fully supports this important transport infrastructure project that will be critical to the borough in the future. Furthermore the routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government.</p>	No change.
WSP (Sainsbury's Supermarkets Ltd obo)	General LNA SA 09	<p>89. We trust that these representations will be fully considered by the Council, and that the next iteration of the new Local Plan amended accordingly to ensure that SSL's New Cross Gate Retail Park site can be brought forward for much needed regeneration in the short term.</p>	Comments noted.	No change.

WSP (Sainsbury's Supermarkets Ltd obo)	General LNA SA 09	<p><i>LB Lewisham officer note: The submitted response is also accompanied by four appendices.</i></p> <ul style="list-style-type: none"> - <i>Appendix A: Cost benefit Analysis for Bakerloo Line Extension.</i> - <i>Appendix B: Sainsbury's New Cross Gate, New Cross, Lewisham Retail Statement including Appendices 1, 2 and 3.</i> - <i>Appendix C: Review of tunnelling aspects presented in TFL's public consultation documents with a focus on New Cross Gate.</i> - <i>Appendix D: Review of proposed work sites for construction: rail accessibility.</i> 	The supplementary information is noted.	No change.	
WSP (Sainsbury's Supermarkets Ltd obo)	3	LNA SA 10	<p>Goodwood Road and New Cross Road</p> <p>87. If reference to the BLE is to be retained in the new Local Plan, the Goodwood Road and New Cross Road site should be allocated to accommodate a new station to serve the BLE.</p> <p>Wearside Road Depot.</p> <p>88. If reference to the BLE is to be retained in the new Local Plan, the Wearside Road Depot site should be safeguarded or allocated as a tunnelling work site for the BLE.</p>	<p>Comments are noted. Disagree that Wearside Road Depot should be safeguarded and allocated as a tunnelling site. The routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.</p>	No change.
WSP (Sainsbury's Supermarkets Ltd obo)	3	LNA SA 10	<p>The Goodwood Road Site</p> <p>43. Goodwood Road is allocated for a mixed-use scheme including 112 new houses. SSL are firmly of the view that this is a more appropriate and suitable site for a station for the BLE.</p> <p>44. Not only will the Goodwood Road site allow for a better interchange between the BLE and rail and bus services, it is a more appropriate station location because:</p> <ul style="list-style-type: none"> - it will have significantly less social and economic impacts, and less cost; - it has been vacant for many years and is deliverable; - it has better access to other services within the New Cross/New Cross Gate District Centre; - it will, through Goodwood Road, have an acceptable access route which would not undermine the surrounding highways network; - it will have the least impact in terms of job losses; - it will have the least impact on the local community because there will be no loss of key shopping facilities; - it will have the least impact in terms of the loss of delivery of new homes; - it will have the least impact upon the vitality and viability New Cross/New Cross Gate District Centre; and - it will allow a vital regeneration scheme to come forward at New Cross Gate Retail Park which will deliver a new Sainsbury's store (with no 	<p>Comments are noted. Disagree that Wearside Road Depot should be safeguarded and allocated as a tunnelling site. The routing of the BLE, and the location of stations and required works sites associated with constructing the BLE, have already been through a consultation carried out by TfL and have been safeguarded by Government. This falls outside of the scope of the Local Plan.</p>	No change.

			closure during the development phase). SSL's site will deliver at least 912 new homes compared to 112 at Goodwood Road. 45. In short, the most sustainable and appropriate location for a new station for the BLE is the Goodwood Road site. This site should be identified as the preferred location for a new BLE station.		
Cockpit Arts (The Planning Lab obo)	- 3	General LNA SA 14	Lewisham Local Plan January 2021 Consultation response from Cockpit Arts, 18-22 Creekside, Deptford SE8 3DZ Cockpit Arts, Creekside, Deptford, is pleased to respond to the consultation on Lewisham's new Local Plan (main issues and preferred options). We are a charity that provides studio spaces and business development support for makers at affordable rent levels. We have two principal sites; one in Holborn, and one in Deptford. We have occupied our Deptford site since 2001, where we accommodate more than 60 makers in our small workshop spaces. Cockpit Arts is a leading resident of the creative community of Lewisham, enjoying an international profile and reputation which sees us regularly delivering overseas programmes and welcoming visitors from around the globe who want to learn from our model.	The supplementary information is noted.	No change.
Cockpit Arts (The Planning Lab obo)	- 3	General LNA SA 14	Overall, Cockpit Arts is supportive of the aims of the plan and many of the specific policies, including those that aim to protect and enhance a wide range of creative and cultural uses in the borough. We have provided our responses in relation to individual topic areas/policies in a table, below.	Support noted.	No change.
Cockpit Arts (The Planning Lab obo)	- 3	General LNA SA 14	Notwithstanding this key concern, we suggest some ways – below - in which this and related policies in the new Plan could be strengthened to support the development of sites in line with policies in the Plan where different developers are involved on different timescales. We would be very happy to discuss any of the issues we have raised here further with Officers at LB Lewisham as the new Plan is progressed to the next stage.	Comments noted.	No change.
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	- 3	General LNA SA 14	LEWISHAM LOCAL PLAN REGULATION 18 STAGE MAIN ISSUES AND PREFERRED APPROACHES DOCUMENT FORMAL CONSULTATION REPRESENTATIONS SUBMITTED ON BEHALF OF BELLWAY HOMES LTD AND PEABODY DEVELOPMENTS LTD We are instructed by Bellway Homes Ltd ("Bellway") and Peabody Developments Ltd ("Peabody") to submit representations to the Lewisham Local Plan Regulation 18 'Main Issues and Preferred Approaches Document' January 2021 ("the draft Local Plan") in the context of their landownership and live planning application at Sun Wharf, Creekside, Deptford, London, SE8 3DZ ("the site"), located within the London Borough of Lewisham (LBL).	Comments noted.	No change.
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	3	LNA SA 14	These representations relate to the site at Sun Wharf which forms part of the proposed site allocation '14: Sun Wharf Mixed-use Employment Location' within the draft Local Plan. <i>LB Lewisham officer note: A site plan is included in the original representation. The plan shows the site outlined in red. (Drawing No. 3336A-PL(90)_00_P01).</i> These representations also relate to the wider policies of the draft Local Plan.	Support and comments noted.	No change.

			The site has significant redevelopment potential and we support the site allocation and the principle of development to deliver a mixed use redevelopment comprising new residential uses, including affordable housing and provision of high quality employment floorspace. We have set out our detailed comments in this letter.		
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	- 3	General LNA SA 14	<p>Background <i>Bellway Homes Ltd and Peabody Developments Ltd</i> Bellway is a major national house-builder, with considerable expertise in delivering homes that people want to live in. Bellway is committed to developing the site who have a track record of working in some of London's key regeneration areas. Bellway has delivered high quality mixed use redevelopment schemes within London and the South East. Bellway has established a particularly strong track record in London and deliver over 2,500 units per year across four divisions. Bellway Thames Gateway alone currently has over 30 active development sites. Whilst many in the development sector have been in financial difficulty in recent years, Bellway have emerged as a strong and well-run business with low debt.</p> <p>Peabody Developments Ltd, a wholly owned subsidiary of Peabody Trust, provides homes and services to more than 111,000 residents and 8,000 care and support customers. Peabody helps people make the most of their lives by providing good quality affordable homes, working with communities and promoting wellbeing. Increasing Peabody's organisational capacity means they will have a development pipeline of over 6,000 affordable homes by 2021.</p> <p>Bellway and Peabody formed a joint venture partnership to deliver the proposed redevelopment scheme at Sun Wharf.</p> <p><i>Site and Surroundings</i> The site measures approximately 0.73 hectares and is located in the northern part of Deptford. The site accommodates existing low-rise warehouse buildings currently in commercial use.</p> <p>The site is bound by Creekside (a local vehicle carriageway) and Cockpit Arts (a creative industries business incubator) to the west, railway arches to the south, Deptford Creek to the east, and Kent Wharf to the north. Kent Wharf is a mixed use scheme, also redeveloped by Bellway that has been completed and comprises 143 residential units and circa 1,300sqm of commercial floorspace.</p> <p>The site predominantly has a Public Transport Accessibility Level (PTAL) rating between 3 and 4 (moderate to good). However the site is better than the standard PTAL rating suggests since it is in close proximity to areas of PTAL 6a and is within walking distance to additional station and bus services.</p> <p>The Environment Agency's Flood Map for Planning indicates that the site is situated within Flood Zone 3, within an area benefiting from flood defences.</p> <p><i>Planning Policy Context</i> The site is subject to the following key adopted (current) planning policy designations:</p>	The supplementary information is noted.	No change.

			<ul style="list-style-type: none"> • Part of Site Allocation SA11 “Sun and Kent Wharf Mixed use Employment Location”; • Deptford Creek/Greenwich Riverside Opportunity Area as designated by the London Plan; • Deptford and New Cross Creative Enterprise Zone as designated by the London Plan; • Deptford Creekside Regeneration and Growth Area; • Air Quality Management Area; and • Archaeological Priority Area. <p><i>Current Application</i> In the latter part of 2020, Bellway and Peabody submitted a full planning application (Ref. DC/20/118229) for a residential-led, mixed use redevelopment at Sun Wharf proposing 251 homes and creative industry uses together with the delivery of new public realm and landscaping which would deliver on a range of planning and public benefits, including a minimum of 35% affordable housing.</p> <p>The description of development is as follows: “Demolition of all existing buildings and comprehensive redevelopment to provide 3 new buildings ranging in heights of 3 to 20 storeys to provide 251 residential units (C3 Use Class) and approximately 1,233 sqm flexible commercial floorspace (B1/B8 Use Class) plus 311sqm flexible commercial floorspace (B1/A3) in a container building, together with associated wheelchair accessible vehicle parking, cycle parking, landscaping, play areas, public realm, improvements to river wall and public riverside walkway and associated works.”</p> <p>The application remains under consideration and a determination will be issued by LBL in due course.</p>		
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	- 3	General LNA SA 14	<p>Lewisham Local Plan Regulation 18 Stage Main Issues And Preferred Approaches Document – representations</p> <p>We note that the key principles of the adopted Site Allocation is being carried over to the draft Site Allocation as set out in the draft Local Plan. We note the site is subject to the following key planning policy designations:</p> <ul style="list-style-type: none"> • Site Allocation 14: Sun Wharf Mixed-use Employment Location; • Deptford Creek/Greenwich Riverside Opportunity Area (as designated by the London Plan); • Deptford and New Cross Creative Enterprise Zone (as designated by the London Plan); • Deptford Creekside Cultural Quarter; • Waterlink Way; • Archaeological Priority Area; and • Air Quality Management Area. <p>We have noted the national planning context in preparing Local Plans, and have then commented on the draft Local Plan in detail, as set out below.</p>	Comments noted.	No change.
Bellway Homes Ltd and Peabody Developments	- 3	General LNA SA 14	<p><i>National Planning Policy Context</i></p> <p>Paragraph 35 of the NPPF (National Planning Policy Framework) states that Local Plans and spatial development strategies are examined to assess whether they</p>	Comments noted.	No change.

Ltd (Savills obo)			<p>have been prepared in accordance with legal and procedural requirements and whether they are sound. Plans are 'sound' if they are:</p> <p><i>a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs¹⁹; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;</i></p> <p><i>b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;</i></p> <p><i>c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and</i></p> <p><i>d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.</i></p> <p>These tests of soundness should also be applied to non-strategic policies in a proportionate way, taking into account the extent to which they are consistent with relevant strategic policies of the area.</p>		
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	- 3	General LNA SA 14	<p>Public Examination On behalf of our Client we consider it is necessary we attend the oral part of the Examination in Public. We would be grateful if you could keep us updated.</p> <p>Conclusion In summary, our Client supports the principle of the Site Allocation 14 for the redevelopment of the site which would provide significant public benefits including employment and new housing. However, with the suggested amendments we consider that the draft Local Plan would be sound.</p> <p>However, some of the items noted above in their current form would constrain potential redevelopment options and would therefore, not be effective in their delivery and would not be consistent with national policy. Therefore, it is considered that the draft Local Plan is not sound.</p> <p>Please do not hesitate to contact me to arrange a meeting and/or you have any further queries. In any event, we would be grateful if you could keep us updated of the progress with the new draft Lewisham Local Plan.</p>	Comments noted.	No change.
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	3	LNA SA 14	<p>Site Allocation 14: Sun Wharf Mixed-use Employment Location (“Site Allocation 14”) Fundamentally, our Client fully supports the principle of development for residential and employment/commercial uses for draft Site Allocation 14.</p> <p>Compared to the adopted Site Allocation, we note that the draft Site Allocation boundary has been amended to omit Kent Wharf. We have concluded this is likely to be because Kent Wharf has been redeveloped (by Bellway) and is now completed and occupied. On this basis, the boundary update appears reasonable. We note that the updated boundary for the site allocation therefore includes the remaining land parcels: the Site (i.e. Sun Wharf), as well as well as the adjacent Cockpit Arts site and the adjacent Network Rail arches. In the interests of clarity, the red line boundary and site address should be more explicit that the draft Site Allocation includes the area underneath the Network Rail arches.</p>	Support noted. Agree that the site name should be amended.	Local Plan amended to acknowledge Network Rail arches in site name.

Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	3	LNA SA 14	As part of the "Indicative Development Capacity" section on page 616 of the draft Local Plan, we note that it states 235 net residential units. Under the current submitted application, 251 residential units are proposed and has been developed via a design-led approach, taking into account the guidelines of the aspirations of the adopted Site Allocation and planning policies. We consider that the drafting should be updated to state 251 residential units, and that it is made explicit that the figure for the residential units is a minimum requirement, and/or starting point. This would ensure that the draft Local Plan is effective in its delivery of new homes, as well as affordable homes.	Where no advanced pre-application has taken place, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Site Allocations Background Paper. Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the scale of development resulting from the planning consent granted for the part of the site and current application as well as the need to protect the heritage setting of the site. Based on these considerations, the capacity has been amended. Optimal capacity for the site will be established at planning application stage through a design led approach.	Sun Wharf MEL site allocation amended to reduce residential capacity to 220 units and reduce employment floorspace to 1,443m ² .
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	3	LNA SA 14	We also note that the draft Site Allocation provides an indicative development capacity of gross-non-residential floorspace as " <i>Employment 1,933</i> ". The supporting policy text should make it clear that any quantum of commercial floorspace reflects a design-led approach, and/or that consideration will be also be given to employment densities.	The Local Plan provides indicative floorspace. Optimal floorspace for the site will be established at planning application stage through a design led approach.	Local Plan amended at the start of Part 3 to clarify floorspace is indicative and that employment densities should be taken into account.
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	3	LNA SA 14	We note that the PTAL states between 0 to 3. Whilst we consider that the site ranges between 3 and 4 for the Sun Wharf site, we would consider the text be updated to acknowledge that fundamentally the site has a better than the standard PTAL rating, since it is in close proximity to areas of PTAL 6a and is within walking distance to additional station and bus services and also the Deptford Town Centre.	Disagree, as the site's PTAL is already noted.	No change,
Bellway Homes Ltd and Peabody Developments	3	LNA SA 14	Under the "Site allocation" heading on page 617 of the draft Local Plan, it states " <i>Comprehensive mixed-use employment led redevelopment...</i> ". We consider that the drafting should be updated to state " <i>Comprehensive mixed-use residential-led redevelopment including residential and employment/commercial uses...</i> ". This would ensure it is consistent with the table on page 618 of the draft Local	Disagree. The focus of the site allocation is on employment-led redevelopment, in order to	No change.

Ltd (Savills obo)			Plan. It would also ensure that sufficient levels of new homes together with new creative industries/local commercial floorspace would promote and encourage vibrancy and activity for this locality and the future redevelopment. This will ensure that the draft Local Plan has been positively prepared and effective so that it can deliver the optimum number of residential units and commercial floorspace, together with associated new jobs.	support the Deptford Creekside Cultural Quarter	
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	3	LNA SA 14	We note the inclusion of Creative Enterprise Zone and Cultural Quarter. This is indeed reflective of the creative industries locality and would also align with the aspirations to deliver new creative industries floorspace at the site, and is supported by our Client. Our Client is also supportive of the overall development aspirations for the Site Allocation as set out in the supporting policy text on pages 617 and 618 of the draft Local Plan as they are considered that these aspects are important to the overall regeneration of the site.	Support noted.	No change.
Bellway Homes Ltd and Peabody Developments Ltd (Savills obo)	3	LNA SA 14	As it relates to tall buildings, we note that paragraph 15.83 states there the potential for taller building elements, and that the taller elements should be located in the south west corner of the site. Whilst this is reflective of the current planning application (and that the principle of tall buildings is supported), it is considered that the policy text is overly prescriptive and should be amended to ensure it is more flexibly drafted i.e. it should simply say that tall buildings and their precise location will be a design-led approach. This will ensure there is sufficient flexibility and that the site is deliverable , and would therefore be effective .	Agree that a design-led approach should be used when determining the location of tall buildings.	Sun Wharf MEL site allocation amended to incorporate "considered as part of a design-led approach".
Cockpit Arts (The Planning Lab obo)	3 2	LNA SA 14 EC 06	In addition to these responses, we are also keen to draw to LB Lewisham's attention to an apparent conflict between the emerging Local Plan and development activity/proposals within Site Allocation 14, Sun Wharf, in which Cockpit Arts' Deptford building sits. The Cockpit site is currently part of the adopted Local Plan (2013) site allocation SA11; and formerly part of a wider 2014 masterplan scheme that is now being progressed (only in part) by Bellway and Peabody. This includes the redevelopment of Kent Wharf (now delivered) and Sun Wharf, that is subject to a current planning application under consideration (ref DC/20/118229). Under various plans considered, prior to the submission of the current Sun Wharf application, provision was to be made for an expanded Cockpit in a larger and taller building on site. Following Bellway's decision to progress without Cockpit, we are now progressing our own plans for the development of the Cockpit Arts site, which accord with the aspirations of the masterplan and Site Allocation, and that we intend to bring forward in the near future. Nonetheless, we are concerned, having reviewed the draft new Local Plan, that the developments progressed (Kent Wharf) and currently under consideration (Sun Wharf, ref. DC/20/118229) do not reflect the aspirations of emerging Site Allocation 14 – Sun Wharf; or draft Policy EC6. Specific comments are set out in the table below. In summary, Cockpit Arts notes that the current Sun Wharf planning application is residential-led, which is fundamentally at odds with the mixed-use employment-led designation of Site Allocation 14 and Policy EC6. It is highly likely that this scheme will have been determined before the new Plan is significantly progressed, meaning that the redevelopment of the significant	Comments noted. Agree with the points made about co-ordination of applications.	Sun Wharf MEL site allocation amended by referring to partnership working, phasing and Policy DM3 (Masterplans and comprehensive development).

			<p>proportion of this site will not meet the aspirations of this site allocation, rendering it out of date before its adoption.</p> <p>The current Sun Wharf planning application is also not in accordance with the 2014 masterplan for the site, which again appears to conflict with the requirements of the emerging policy for development within Site Allocation 14 to be masterplan-led. This raises serious concerns for Cockpit Arts that development will be progressed that does not recognise/respect the potential for all parts of the site allocation, and which has the potential to limit future development within the site allocation by other owners/developers.</p> <p>Cockpit Arts is keen to understand more about how LB Lewisham plans to manage such conflicts, which could render Site Allocation 14 – and potentially others – null and void in advance of the new Plan being adopted.</p>		
Cockpit Arts (The Planning Lab obo)	3	LNA SA 14	<ul style="list-style-type: none"> • CA endorses the site allocation as mixed-use employment-led. • We are supportive of the requirement for masterplan-led development, but query how LB Lewisham will reconcile applications currently being determined within the site allocation, i.e. the Sun Wharf scheme, that are not in accordance with a masterplan in any meaningful way. • We would suggest that the specified development capacities are not truly reflective of employment-led development; rather, they are more residential-led and appear to be at odds with Policy EC6 for MELs. They are also unambitious, with a low capacity of employment floorspace envisaged (1,933m2), across the site allocation. This is a fraction of the residential development envisaged here. • How will the requirements of this site allocation be reflected in the determination of live planning applications which do not appear to conform, for example the current Sun-Wharf scheme which proposes residential-led development? CA is very concerned that the redevelopment of a large portion of this site is likely to have been delivered that will not meet the aspirations of this site allocation, rendering it out of date before its adoption. • We suggest that where proposals have already been delivered or are already under consideration by planning officers which do not meet the requirements for employment-led development as set out this site allocation, there needs to be more flexibility for other owners/developers within that area to develop in line with the overarching objectives in addition to safeguards to ensure there is not undue pressure on them to meet all of the shortfalls. • How does LB Lewisham define ‘positive frontage’ (the draft Plan refers to both ‘positive’ and ‘active’ frontages – what is the distinction between them?). • CA is supportive of the need for ‘compatible’ commercial, cultural, main town centre and residential uses and the guidelines for locating tall buildings in the south west corner of the site. • CA would highlight that the guidelines should ensure studio space of all types is provided, not just ‘artists’ studios’, to reflect and meet the need for space for all creative enterprises, including those not solely in the arts sector. This will help to ensure that the true, mixed creative identity of the area is both reflected and preserved. 	<p>Support and comments are noted. Agree with the points about co-ordination of applications.</p> <p>Active frontage is already mentioned in the site allocation.</p> <p>Agree that not just artist studios are provided.</p> <p>In terms of employment floorspace capacities, the Local Plan provides indicative site capacities. Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	Sun Wharf MEL site allocation amended by referring to to all types of studio space and Policy DM3 (masterplans and comprehensive development).
Fifth State and (Avison Young obo)	- 3	General LNA SA 16	<p>Representations to Regulation 18 Consultation on draft Lewisham Local Plan: Main Issues and Preferred Approaches dated January 2021</p> <p>Joint Representation on behalf of Laurence Cohen and Melanie Curtis (Freehold Landowners) and Fifth State Ltd (Developer of 5-9 Creekside, Deptford)</p>	Comments noted.	No change.

			<p>We write on behalf of Laurence Cohen and Melanie Curtis and Fifth State (the Owners and Developer) in representation to the draft Lewisham Local Plan 'Main Issues and Preferred Approaches' document (January 2021) prepared by the London Borough of Lewisham (LBL), under Regulation 18 of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended.</p> <p>Having reviewed the Regulation 18 version of the draft Local Plan and the accompanying evidence base documents, and attended the online engagement event focused on the North Area (held by LBL on 15 March), this letter provides a summary of the site and background, responses to individual policies as well as further comments on the development potential of the site (Site Allocation 16 Lower Creekside Locally Significant Industrial Site).</p> <p>We hope that the comments on the individual policies within the draft Local Plan provided below will assist the Council during the next round of consultation on the Local Plan.</p>		
Fifth State and (Avison Young obo)	- 3	General LNA SA 16	<p>Context of the Representation (5-9 Creekside) This section summarises the site and surrounding area and outlines the emerging scheme proposals at 5-9 Creekside.</p> <p>Site and Surrounding Area The site comprises an existing two storey building / part warehouse and servicing yard. The buildings are currently occupied by a wholesale alcohol distributor and cash and carry (Use Class B8) and artist studios (Use Class E). The total existing floorspace is 2,460 sqm.</p> <p>5-9 Creekside is bound to the east and south by Creekside Road. The northern boundary backs on to the Crossfields Estate and to the west of the site is 3 Creekside which comprises the Medina Works building which accommodates a mix of art gallery, studios and creative workspaces.</p> <p>The wider Deptford Creekside area is undergoing change, with nearby developments including The Fuel Tank employment space managed by Workspace, mixed-use commercial and residential developments at Kent Wharf, Sun Wharf and Faircharm Dock and the Trinity Laban Conservatoire of Music and Dance. 1 Creekside has received planning permission for an 8 storey building which will deliver 56 homes and 1,541 sqm of commercial space. In addition 2 and 3 Creekside are also going through the pre-application process and we are working collaboratively to develop the emerging proposals for all three sites.</p> <p>Emerging Development Proposals Fifth State are currently holding pre-application discussions with planning officers at LBL regarding the emerging proposals at 5-9 Creekside. The emerging scheme proposals seek to respond to the wider vision of the changing character of Creekside and neighbouring sites, as well as the wider Deptford area. The key principles of the emerging design include:</p> <ul style="list-style-type: none"> • Demolition of existing buildings to create replacement workspace on site which is being designed to respond to local market demand for employment space such as light industrial or creative industries and create an overall increase in jobs; • Delivering an employment-led mixed-use development including the introduction of co-location of student accommodation; 	The supplementary information is noted.	No change.

			<ul style="list-style-type: none"> • Providing high quality student accommodation and complementary facilities which are suitable with the continued employment operation of the site; • Working collaboratively with neighbouring landowners to develop a comprehensive design approach to the regeneration of the area; and Responding positively to the Deptford Creekside Conservation Area. • The above principles have been underpinned by the relevant technical and environmental assessments. 		
Fifth State and (Avison Young obo)	- 3	General LNA SA 16	<p>Comments on Local Plan Main Issues and Preferred Approaches Document</p> <p>A series of comments are provided below in respect of various sections of the Local Plan Main Issues and Preferred Approaches Document which are of relevance to the proposed redevelopment of 5-9 Creekside. Proposed policy changes or requests for amendments are underlined in the paragraphs below.</p>	Comments noted.	No change.
Fifth State and (Avison Young obo)	- 3	General LNA SA 16	<p>We reserve the right to make further comments in relation to the policy allocation at the next available opportunity.</p> <p>Next Steps</p> <p>We thank you for the opportunity to be involved in the on-going preparation of the Lewisham Local Plan and trust that our representations are helpful when preparing the next version of the Local Plan. The Owners and Developer of 5-9 Creekside are very keen to engage with LBL and wish to continue to be involved in subsequent consultations.</p> <p>Please do not hesitate to contact Avison Young should you wish to discuss any of the points raised above.</p>	Comments noted.	No change.
Artworks Creekside (Avison Young obo)	- 3	General LNA SA 16	<p>LEWISHAM LOCAL PLAN: REGULATION 18 CONSULTATION: WRITTEN REPRESENTATIONS</p> <p>OBO Artworks Creekside</p> <p>These representations are made on behalf of our client, Artworks Creekside, in relation to the Regulation 18 Local Plan Consultation: Main Issues and Preferred Approach to Proposed Changes to the Adopted Policies Map being undertaken by the London Borough of Lewisham. The consultation material comprises:</p> <ul style="list-style-type: none"> • Local Plan: Main Issues and Preferred Approaches; • Proposed Changes to the Adopted Policies Map; • Integrated Impact Assessment and Non-Technical Summary; • Habitats Regulation Assessment; • Draft Infrastructure Delivery Plan; and • Relevant Evidence Base, including the Employment Land Review (2019), Site Allocations background paper (2021) and Residential Density Technical Paper (2020). <p>Having reviewed the Regulation 18 version of the draft Local Plan and the accompanying evidence base documents, and attended the online engagement event focused on the North Area (held by LBL on 15 March), this letter provides a summary of the site and background, responses to individual policies as well as further comments on the development potential of the site (Site Allocation 16 : Lower Creekside Locally Significant Industrial Site).</p>	Comments noted.	No change.
Artworks Creekside (Avison Young obo)	- 3	General LNA SA 16	<p>Artworks Creekside make comment on the approach to industrial intensification within the LSIS – most particularly the inconsistent approach with the London Plan (2021), and the indicative development capacity of the draft Allocation. Further comment is also made on the draft Policy regarding Public Houses, and</p>	Comments noted.	No change.

			<p>how the Council will assess proposals affected designated and non designated heritage assets.</p> <p>We hope that the comments on the individual policies within the draft Local Plan provided below will assist the Council during the next round of consultation on the Local Plan.</p>		
Artworks Creekside (Avison Young obo)	- 3	General LNA SA 16	<p>Context of the Representation</p> <p>This section summarises the site and surrounding area and outlines the emerging scheme proposals at for the sites under the ownership of Artworks Creekside. The extent of these sites are shown in Appendix I.</p> <p><i>LB Lewisham officer note: Appendix 1: 2 Creekside and 3 Creekside Site Plan is included in the original representation. The plan shows the two site boundaries in red.</i></p>	Comments noted.	No change.
Artworks Creekside (Avison Young obo)	- 3	General LNA SA 16	<p>Site and Surrounding Area</p> <p>2 Creekside</p> <p>2 Creekside is a 4 storey building, known as The Birds Nest public house and the associated land. The building has a partial basement, and this space alongside the ground floor is used as the public house (Sui Generis). At first and second floor is an ancillary hostel / HMO which is accessed through via an internal stairway from the ground floor. The third floor is occupied by a flat which benefit from an external amenity space.</p> <p>The building is in a poor condition and has suffered from a lack of investment having been through various ownerships in the recent past. The public house trade has suffered from changing national trends and the Birds Nest has been affected by this.</p> <p>The land associated with the building is currently in a mixture of commercial and employment generating uses. The Big Red is a static double-decked bus which last operated as bar and pizzeria, and which made use of external seating between the building and the DLR railway viaduct which runs to the south of the site.</p> <p>The eastern portion of the site is occupied by 8no. shipping containers which accommodate a range of creative business enterprises, and which provide affordable and flexible small commercial premises.</p> <p>3 Creekside</p> <p>3 Creekside includes a 2 storey building and associated single storey structures and is locally known as Medina Works. The building and the land associated are current used by a mixture of business as an art gallery, studio, café, creative workspaces and social space for the local community. The building benefits from large internal volumes with open floor plans and floor-to ceiling heights.</p> <p>The site does not include the two-storey warehouse structure topped with a double gabled roof directly to the north of 3 Creekside, and this falls within separate ownership under the postal address of 5-9 Creekside. We are working with the development team on this adjacent site in order to bring forward a masterplan led redevelopment strategy.</p>	The supplementary information is noted.	No change.

			<p>Emerging Development Proposals</p> <p>Artworks Creekside are currently holding pre-application discussions with planning officers at LBL regarding the emerging proposals at both 2 and 3 Creekside. The emerging scheme proposals seek to respond to the wider vision of the changing character of Creekside and neighbouring sites, as well as the wider Deptford area.</p> <p>The key principles of the emerging proposals include:</p> <ul style="list-style-type: none"> • The creation of creative workspaces which align with their track record and approach to such spaces elsewhere: • The delivery of an employment-led mixed-use development that responds to the Council’s emerging policy designation and which deliver significantly more jobs than the existing site: • The integration of the development into the emerging Creative Quarter that the Council has identified for Creekside, and for the wider Deptford Area: • The successful integration of the Birds Nest public house into a development, and the provision of a viable public house which can act as a community hub: • A series of commercial and employment areas which are financially sustainable: • Residential development which assists in creating a vibrant community and achieves a successful mixed use development. 		
Artworks Creekside (Avison Young obo)	- 3	General LNA SA 16	<p>We would therefore suggest that the recommendations set out in these representations should be carefully considered and incorporated into the proposed policy wording in order for the allocation policy to be found sound. We reserve the right to make further comments in relation to the policy allocation at the next available opportunity.</p> <p>Next Steps</p> <p>We thank you for the opportunity to be involved in the on-going preparation of the Lewisham Local Plan and trust that our representations are helpful when preparing the next version of the Local Plan.</p> <p>Artworks Creekside strongly consider that the viability of redevelopment proposals should be understood by the Council in further drafting of Site Allocation 16, and as such are very keen to engage with Council and wish to continue to be involved in subsequent consultations. Please do not hesitate to contact us.</p>	Comments noted.	No change.
Fifth State and (Avison Young obo)	3	LNA SA 16	<p>Comments on draft Site Allocation 16 (Lower Creekside Locally Significant Industrial Site)</p> <p>The following sections assess the soundness of the draft Site Allocation 16 in accordance with Paragraph 35 of the National Planning Policy Framework (NPPF) (2019), which states that a Local Plan should be positively prepared, justified, effective and consistent with national planning policy.</p> <p><i>LB Lewisham officer note: Appendix 1 Draft Site Allocation 16 is included in the original representation.</i></p> <p>Site Allocation (Indicative Development Capacity)</p> <p>Site Allocation 16 comprises a number of development sites along Lower Creekside, including 5-9 Creekside which is bound by the road to the south and east.</p>	<p>Comments relating the Site Allocations Background Paper are noted.</p> <p>Where no advanced pre-application has taken place, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Site Allocations Background Paper.</p>	No change.

			<p>The summary page identifies that the whole site allocation comprises 1.1 ha, and has an indicative capacity for 160 residential units and 8,201 sqm of employment floorspace. We note that the site allocation has reduced from the 255 residential units previously identified in the March 2020 draft Local Plan (which was not consulted on).</p> <p>The Site Allocation Background Paper (January 2021) which underpins the draft Local Plan identifies that the indicative capacities should not be read prescriptively and the actual development capacity of a site will need to be established through detailed design. Indicative site capacities are based on either existing planning consents, pre-application stage proposals, masterplan studies or SHLAA density assumptions (taking account of sensitivity assumptions on heritage assets for example). On LSIS co-location sites, a general assumption of 33% employment floorspace and 67% residential uses is suggested.</p> <p>Appendix A of the Site Allocation Background Paper outlines that for Lower Creekside LSIS the standard method (SHLAA) plus sensitivity analysis was undertaken to establish the 160 residential unit capacity. We consider that in accordance with the SHLAA density assumptions, a site within an Opportunity Area with a PTAL of 4-6 could accommodate up to 355 homes (within an Urban location). <u>Whilst we acknowledge that there are heritage sensitivities within Lower Creekside, we consider that the indicative development capacity of 160 new homes is significantly lower than what could reasonably be delivered through the redevelopment of Lower Creekside taking a design-led approach to site optimisation.</u></p> <p>This position is evidenced through pre-application design development at 5-9 Creekside and neighbouring 2 and 3 Creekside sites which indicates that the site allocation may have a greater site capacity, taking into account heritage, townscape, environmental and technical considerations. In addition given that the development at 1 Creekside (LBL ref; DC/18/106708) was approved at a density of 350 units per hectare (with a site area of 0.1ha), the indicative development capacity of 160 residential units across the 1.1ha is significantly lower than what could reasonably be delivered through the redevelopment of Lower Creekside taking a design led approach.</p> <p><u>As such it is requested that the indicative development capacity is increased, or it is made clear that the figure provided is in no way a cap on development potential.</u></p>	<p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the scale of development resulting from the planning consent granted for the part of the site and current pre-application discussions as well as the need to protect the heritage setting of the site.. Based on these considerations, the capacity has remained the same.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	
Fifth State and (Avison Young obo)	3	LNA SA 16 Para 15.88	<p>Site Allocation (paragraph 15.88)</p> <p>The site is allocated for comprehensive employment led redevelopment. Co-location of compatible commercial, residential and complementary uses are supported within the current drafting. <u>Fifth State request that the proposed co-location uses also include PBSA, which is considered to be suitable in this location, subject to complying with London Plan Policy H15 and draft Local Plan Policy HO8.</u></p>	Support noted. Disagree as the SHMA has identified that Lewisham has already contributed a significant amount of student bed spaces and the greatest need in the Borough is for conventional housing.	No change.
Fifth State and (Avison Young obo)	3	LNA SA 16	<p>Opportunities (paragraph 15.89)</p> <p>The Owners and Developer of 5-9 Creekside support the opportunities provided in draft paragraph 15.89, but also consider that <u>reference to the site being</u></p>	Support noted. Agree that referencing the Deptford Creek / Greenwich	Lower Creekside LSIS site allocation amended to refer to the Deptford Creek / Greenwich

		Para 15.89	located in the Deptford Creek / Greenwich Riverside Opportunity Area should also be acknowledged, as this is envisaged to provide new jobs and homes through the plan period.	Riverside Opportunity Area will be useful.	Riverside Opportunity Area.
Fifth State and (Avison Young obo)	3	LNA SA 16 Para 15.90	Development requirements (paragraph 15.90) The Owners and Developer of 5-9 Creekside support the development requirements to not reduce industrial capacity or compromise the functional integrity of the employment location. The emerging development proposals seek to deliver new active frontages along Creekside which is also supported in this section of the allocation. We do however question the requirement that development must be delivered in accordance with a masterplan to ensure the appropriate co-location of employment and other uses across the site. <u>We suggest that this point is altered to state that designs for individual sites should demonstrate that they have been co-ordinated with neighbours.</u> The principle of mixed use development on the sites is already secured via the Site Allocation, and we consider the nature of the area and existing uses does not require a masterplan to be approved in order for the aspirations of the site allocation to be realised.	Support noted. Disagree, as masterplans should be used to bring forward a number of sites as part of the wider regeneration of an area. Masterplans are covered in Policy DM3 of the Local Plan.	Lower Creekside LSIS site allocation amended to refer to Policy DM3 (Masterplan and comprehensive development)
Fifth State and (Avison Young obo)	3	LNA SA 16 Para 15.91	Development guidelines (paragraph 15.91) We agree that non-employment uses, including residential uses, must be sensitively integrated into the development through considering operational requirements of future employment uses. Fifth State consider the 5-9 Creekside site is suitable to accommodate new workspace including artist studios and other SME accommodation. We understand that building heights will need to be designed having regard to designated and non-designated heritage assets, including St Paul's Church, Deptford Church Street, the Crossfields Estate and the Deptford Creek Conservation Area (and as such will be assessed against the relevant heritage legislation and policies as considered in further detail earlier in this letter). We support that new developments should be designed having regard to the character and amenity of the Trinity Laban Centre, the Faircharm site, the buildings opposite the Creek in Greenwich, development at the former Tidemill School and the elevated DLR. <u>We request that the development currently under construction at 1 Creekside (which forms part of the site allocation) is also added to the list of buildings which should be considered as part of the emerging character of the area. The development at 1 Creekside establishes a number of design principles which will inform the design approach for other sites within Site Allocation 16, including height and massing.</u>	Comments noted. Agree that the emerging building at 1 Creekside should be taken into account as part of the emerging character of the area.	Lower Creekside LSIS site allocation amended to make reference to the emerging buildings and the changing character of the area at 1 Creekside.
Fifth State and (Avison Young obo)	3	LNA SA 16	Summary The Owners and Developer of 5-9 Creekside are supportive of the draft allocation as a whole, however we request that PBSA is included within the proposed development uses. Notwithstanding this and based on our current assessment, we consider that the proposed indicative site capacity may be overly restrictive and so we question whether the allocation has been positively prepared in accordance with the requirements of the NPPF. We consider that the indicative site capacity is not supported by proportionate evidence and therefore does not seek to meet the area's objectively assessed needs. Indeed the design work that is currently being prepared by Fifth State in conjunction with other landowners and development plots adjacent to 5-9 confirms that the overall capacity of Lower Creekside has potential to be higher than proposed in the policy wording.	Disagree as the SHMA has identified that Lewisham has already contributed a significant amount of student bed spaces and the greatest need in the Borough is for conventional housing. Our response on site capacity is set out above.	No change.

			We would therefore suggest that the recommendations set out in these representations should be carefully considered and incorporated into the proposed policy wording in order for the allocation policy to be found sound.		
Artworks Creekside (Avison Young obo)	3	LNA SA 16	We note that Lower Creekside (Site Allocation 16) is incorrectly labelled as a Strategic Industrial Location in Figure 15.2. This should be amended to reflect the correct designation: Locally Significant Industrial Site.	Agree that this site is not SIL.	Local Plan Figure 15.2 amended to show site as LSIS.
Artworks Creekside (Avison Young obo)	3	LNA SA 16	<p>Comments on draft Site Allocation 16 (Lower Creekside Locally Significant Industrial Site)</p> <p>The following sections assess the soundness of the draft Site Allocation 16 in accordance with Paragraph 35 of the NPPF which states that a Local Plan should be positively prepared, justified, effective and consistent with national planning policy.</p> <p>Site Allocation (Indicative Development Capacity)</p> <p>Site Allocation 16 comprises a number of development sites along Lower Creekside, including 2 Creekside and 3 Creekside. The sites owned by Artworks Creekside and which fall within the Allocation are included in Appendix I.</p> <p>The Council identifies that the whole site allocation comprises 1.1 ha, and has an indicative capacity for 160 residential units and 8,201 sqm of employment floorspace. We note that the site allocation has reduced from the 255 residential units previously identified in the March 2020 draft Local Plan.</p> <p>The Site Allocation Background Paper (January 2021) which underpins the draft Local Plan identifies that the indicative capacities should not be read prescriptively, and the actual development capacity of a site will need to be established through detailed design. Indicative site capacities are based on either existing planning consents, pre-application stage proposals, masterplan studies or SHLAA density assumptions (taking account of sensitivity assumptions on heritage assets for example). On LSIS co-location sites, a general assumption of 33% employment floorspace and 67% residential uses is suggested. For the Lower Creekside LSIS, this ratio is 33% : 0% : 20% : 47% for employment : main town centre uses : other : residential uses. This has not been reflected in the Allocation.</p> <p>There is a clear inconsistency and the Council has no methodology for this ratio, nor does it appear to have been tested via any viability method or consider the re-provision of the public house. Whilst Artworks Creekside supports the principles of a co-located mixture of employment and residential uses, the indicative development capacity must include prior engagement with Artworks Creekside in order to demonstrate a viable redevelopment and therefore inform a viable and reasonable indicative development capacity.</p> <p>Furthermore, Appendix A of the Site Allocation Background Paper outlines that for Lower Creekside LSIS the standard method (SHLAA) plus sensitivity analysis was undertaken to establish the 160 residential unit capacity. Without the sensitivity analysis, a site within an Opportunity Area with a PTAL of 4-6 could accommodate up to 355 units (within an Urban location). The Council provides no explanation or methodology on how sensitivity analysis reduces a capacity.</p>	<p>Where no advanced pre-application has taken place, the council has used a SHLAA based method to determine indicative site capacities – more details can be found in the Site Allocations Background Paper.</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the scale of development resulting from the planning consent granted for the part of the site and current pre-application discussions as well as the need to protect the heritage setting of the site. Based on these considerations, the capacity has remained the same.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	No change.

			<p>Given that the development at 1 Creekside (LBL ref; DC/18/106708) was approved at a density of 350 units per hectare (with a site area of 0.1ha), the indicative development capacity of 160 residential units across the 1.1ha is significantly lower than what could reasonably be delivered through the redevelopment of Lower Creekside taking a design-led approach to site optimisation that reflects the Council's earlier Policies.</p> <p>As such it is requested that the indicative development capacity is increased following engagement with Artworks Creekside that establishes the viable quantum of development for sites within the Allocation, or it is made clear that the figure provided is in no way a cap on development potential.</p>		
Artworks Creekside (Avison Young obo)	3 3	LNA SA 16 Para 15.88	<p>Site Allocation (paragraph 15.88) The site is allocated for comprehensive employment led redevelopment. Co-location of compatible residential and complementary uses are supported by Artworks Creekside within the current drafting. It is requested that '<i>compatible commercial</i>' uses are clarified in the Site Allocation.</p>	Disagree, identifying specific commercial uses could limit the development potential of the site. Current wording provides flexibility.	No change.
Artworks Creekside (Avison Young obo)	3 3	LNA SA 16 Para 15.89	<p>Opportunities (paragraph 15.89) Artworks Creekside support the opportunities provided in draft paragraph 15.89, but also consider that reference to the site being located in the Deptford Creek / Greenwich Riverside Opportunity Area should also be acknowledged, as this is envisaged to provide new jobs and homes through the plan period.</p>	Agree.	Lower Creekside LSIS site allocation amended by referencing Deptford Creek / Greenwich Riverside Opportunity Area
Artworks Creekside (Avison Young obo)	3 3	LNA SA 16 Para 15.90	<p>Development requirements (paragraph 15.90) Artworks Creekside note the continued reference to 'no net loss of industrial capacity' and this should be removed as it no longer accords with the London Plan. The emerging development proposals seek to deliver new active frontages along Creekside which is also supported in this section of the allocation.</p> <p>As with the commentary to draft Policy LNA4, '<i>the new and improved public realm</i>' should not necessarily be located adjacent to Creek, whilst waterside access and amenity space should not be an explicit necessity, but as an option that should be tested via a design-led process.</p>	<p>Disagree, as our local evidence suggests that there is a need to retain industrial floorspace on sites that are being redeveloped...</p> <p>Disagree, as it is considered that public realm should be located adjacent to the Creek in order to enhance waterfront access.</p>	No change.
Artworks Creekside (Avison Young obo)	3 3	LNA SA 16 Para 15.91	<p>Development guidelines (paragraph 15.91) We agree that non-employment uses, including residential uses, must be sensitively integrated into the development through considering operational requirements of future employment uses.</p> <p>Artworks Creekside will consider whether either sites are suitable to accommodate new workspace including artist studios and other SME accommodation, however we seek to retain the rights to prioritise these workspace over other viable employment uses.</p> <p>We understand that development will need to be consider the impacts on designated heritage assets and understand that any new developments should be designed having regard to the character and amenity of the Trinity Laban Centre, the Faircharm site, the buildings opposite the Creek in Greenwich, development at the former Tidemill School and the elevated DLR.</p>	Comments noted. Agree that the development at 1 Creekside should be acknowledged.	Lower Creekside LSIS site allocation amended to recognise the development at 1 Creekside when considering the context of this site.

			The recently commenced development at 1 Creekside (which forms part of the site allocation) must also be considered as part of the emerging character of the area. The development at 1 Creekside establishes a number of design principles which will inform the design approach for other sites within Site Allocation 16, including density, height and massing.		
Artworks Creekside (Avison Young obo)	3	LNA SA 16	Summary We are supportive of the draft allocation, however Artworks Creekside consider that the proposed indicative site capacity for residential units is significantly lower than what could be reasonable achieved across the Allocation and is unreasonable restrictive. It has not been supported by proportionate evidence and having worked with adjacent landowners, the overall residential capacity of Lower Creekside has potential to be higher than proposed in the policy wording. For those reasons, the Allocation is not justified.	Our response on site capacities is set out above.	No change.
Austringer Capital Ltd (Tetlow King Planning obo)	3 3	LEA Spatial Objectives Para 6.6	<i>Relates to Call for site</i> East Area spatial strategy 4.9 The provision of Green Infrastructure and open space is a central part of the emerging Local Plan's strategy for the East Area of Lewisham: <ul style="list-style-type: none"> • Paragraph 6.6 articulates the vision for the East area, stating that "By 2040 the abundance of high quality parks and green spaces in the East area will make it a distinctive part of Lewisham." • Key Spatial Objective 8 seeks to "Protect and enhance the linear network of open and green spaces, along with improving public access to them." • Key Spatial Objective 9 focuses on connectivity by active travel, seeking to "Deliver a connected network of high quality walking and cycle routes that link open and green spaces, taking advantage of the Green Chain Walk" and to "Ensure these routes address existing barriers to movement, such as those caused by railways and major roads." 4.10 The Key Diagram identifies a Strategic Green Link running north-south through the area parallel to the railway, and passing alongside the former Willow Tree Riding Establishment site.	Comments noted.	No change.
GHL (Leegate) Limited (Frank Knight obo)	3	LEA 01	<i>Relates to Part 3, LEA SA 03</i> Part 3 – Neighbourhood and Places (Lewisham's East Area) GHL welcomes the Council's East Area and the Lee Green District Centre place principles, particularly the emphasis on delivering development to make the best use of land, including through the focused renewal of town centre and street sites. GHL also welcomes the Council's intention to identify and allocate additional sites to meet the increased needs within the borough.	Support noted.	No change.
Austringer Capital Ltd (Tetlow King Planning obo)	3	LEA 01	<i>Relates to Call for site</i> 4.11 Policy LEA1 'East Area Place Principles' gives effect to these objectives. Part J seeks the protection and enhancement of the network of Green Infrastructure	Comments noted.	No change.

			and part K seeks better walking and cycling connections including through Green Spaces.		
GHL (Leegate) Limited (Frank Knight obo)	- 3	General LEA SA 03	<p>Representations to Regulation 18 Main Issues and Preferred Approaches Consultation of the Lewisham Local Plan Review.</p> <p>On behalf of GHL (Leegate) Limited (hereinafter 'GHL'), Knight Frank hereby submit representations in respect of the Regulation 18 Main Issues and Preferred Approaches Consultation of the Lewisham Local Plan Review, which runs from 15th January 2021 to 11th April 2021.</p> <p>It is understood that the London Borough of Lewisham (hereinafter 'LBL') commenced the Local Plan Review in late 2015, with a consultation on the main issues for the Plan and since then, have carried out various engagement exercises on studies and other documents to help inform the Plan's preparation including the Lewisham Characterisation Study and Call for Sites exercise. These documents form part of the Local Plan evidence base.</p> <p>In addition to the Local Plan: Main Issues and Preferred Approaches Consultation, the Council are carrying out a further 'Call for Sites' exercise, to establish whether there are additional sites that are potentially available in the borough for development for housing, economic development and other uses. It is noted that GHL is not submitting any potential development sites for consideration through this process.</p> <p>GHL strongly supports the preparation of the Lewisham Local Plan Review and this letter provides responses to the Regulation 18 consultation.</p>	Comments noted.	No change.
GHL (Leegate) Limited (Frank Knight obo)	- 3	General LEA SA 03	<p>GHL (Leegate) Limited</p> <p>GHL has a major land interest within the borough through recently acquiring the Leegate Shopping Centre redevelopment site (hereinafter 'the Site'), which will be affected by those policies and allocations contained within the Lewisham Local Plan Review.</p> <p>The Site is currently allocated under ref. SA23 (Leegate Centre) within the LBL Site Allocations Local Plan (2013) for "<i>mixed use retail-led with housing, offices and hotel</i>". The timescales for the delivery of development on the Site is 2021-2026. An indicative housing capacity of 130 dwellings is stated. However, the principle of a greater quantum of residential has been established through a resolution to grant planning permission at the Site in 2016 (ref. DC/14/090032) and the draft emerging site allocation recognises that the current allocation is now out of date and insufficient to maximise the development potential of the Site.</p> <p>The Site has been the subject of on-going planning discussions for some time and the principles of regeneration and housing delivery have been supported by the LBL and the Greater London Authority (hereinafter 'GLA').</p> <p>Most notably, in 2016 LBL resolved to grant full planning permission, subject to the completion of a Section 106 Agreement for a retail-led, mixed-used development (including 229no. residential units and 36no. affordable housing units) on the Site (ref. DC/14/090032).</p>	The supplementary information is noted.	No change.

			<p>Subsequently, a revised application for an amended retail-led mixed-use proposal, which increased the quantum of residential to 393no. units, of which 64no. were affordable, was submitted to the LPA for consideration in June 2018 (ref. DC/18/107468). This application remains live pending formal decision. Furthermore, post-submission informal discussions between St Modwen, the LPA and the Mayor of Lewisham were undertaken in 2019 regarding potential for an enhanced scheme, with a greater number of units.</p> <p>Since acquiring the site, GHL has reviewed existing proposals to identify opportunities to optimise development proposals for a mixed use scheme that can support an increased affordable housing offer (35%) alongside other wider benefits. GHL is currently engaged in pre-application discussions with LBL, in parallel to on-going consultations with the local community and other stakeholders, regarding the comprehensive redevelopment of the Site.</p> <p>It is in this context that GHL submits this representation. GHL wishes to ensure that the new Lewisham Local Plan, which will shape the future of the borough and more specifically the regeneration of the Leegate Shopping Centre and Lee Green District Centre, is robust, flexible and capable of responding to future economic and demographic change.</p>		
GHL (Leegate) Limited (Frank Knight obo)	- 3	General LEA SA 03	<p>Main Issues and Preferred Approaches Consultation of the Lewisham Local Plan Review (Regulation 18)</p> <p>Paragraph 35 of the NPPF (which the Local Plan will be considered against) requires that any Plan submitted to the Secretary of State for Examination must be capable of being found both legally compliant and sound. This places various duties on the Council including, but not limited to, ensuring the Plan is:</p> <ul style="list-style-type: none"> • Positively prepared – seeking to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and is consistent with achieving sustainable development; • Justified – the most appropriate strategy, when considered against reasonable alternatives, based on proportionate evidence; • Effective – deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and • Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in the Framework. <p>If the Local Plan fails to accord with any of the above requirements, it is incapable of complying with the NPPF, which as a result of Section 19 of the Planning and Compulsory Purchase Act 2004, is a legal requirement.</p>	Comments noted. Agree that the legislative changes need to be taken into account in the Local Plan.	Local plan amended to make consistent references to new use classes.
GHL (Leegate) Limited (Frank Knight obo)	- 3	General LEA SA 03	<p>It is acknowledged that a number of legislative changes were introduced by the Government during August and September 2020. This includes significant changes to the Use Class Order, which allows greater flexibility to change uses within town and district centres through three new broad use classes. We understand that the Council have not specified how these legislative changes will be addressed and how they will inform future stages of the Local Plan Review. As such, we believe further consideration is required, explaining the implications of the legislation changes to the proposed policies and site allocations contained within the Lewisham Local Plan Review.</p>	Agree that the Local Plan should align with the Use Classes that were updated in September 2020.	Local plan amended to make consistent references to new use classes.

GHL (Leegate) Limited (Frank Knight obo)	- 3	General LEA SA 03	Overall, GHL supports the preparation of the Local Plan Review, and this representation sets out a number of observations and recommendations intended to ensure it is capable of delivering the Council's vision for the future regeneration of the Leegate Shopping Centre and Lee Green District Centre, in a rapidly changing economic climate.	Comments noted.	No change.
GHL (Leegate) Limited (Frank Knight obo)	- 3	General LEA SA 03	Conclusion The objectives and aspirations set out in the Lewisham Local Plan Review document form a sound basis to work from in the preparation of a new Local Plan. We therefore welcome the opportunity to make these representations at this early stage and look forward to working with the Council to progress the draft Plan, whilst also supporting the Council's vision for the comprehensive regeneration of the Leegate Shopping Centre. Should you have any queries or require further information at this stage, please contact us.	Comments noted.	No change.
GHL (Leegate) Limited (Frank Knight obo)	3	LEA SA 03	<p>Site Allocation 3 - Leegate Shopping Centre</p> <p>GHL strongly supports the continued allocation of the Leegate Shopping Centre for comprehensive mixed-use redevelopment of the existing shopping centre, comprising compatible main town centre, commercial, community and residential uses. Indeed, the redevelopment of the previously developed site will perform a key role in regenerating this district centre whilst also meeting housing needs within the borough and ease pressure on unallocated sites. GHL supports the allocation within the Lewisham Local Plan Review, where an indicative development capacity of 450 residential units, 805sqm of employment floorspace and 5,449sqm of main town centre floorspace is identified.</p> <p>The NPPF Paragraph 117 promotes the effective and efficient use of land in meeting the need for new homes and other strategic uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. NPPF Paragraph 118 identifies that decisions should give substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs, and that decisions should promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained and available sites could be used more effectively.</p> <p>Given the Site's District Centre location, it is considered that this Site should be considered for high density residential development, optimising the number of homes delivered in the urban area, in the most sustainable location. The Site and other site allocations in the area, can play a key role in achieving ambitious housing growth during the Plan period.</p> <p>Therefore, it is contended that the Council's proposed indicative development capacity and aspirations on unit numbers, could potentially significantly underestimate the role that the Site could perform in meeting a variety of needs. We feel that there shouldn't be an identified cap on unit numbers, other than recognition of high-density development delivered through high-quality design. Alternatively, we seek clarification on the Council's aspiration and require a justification as to how the proposed development capacity has been set. It is</p>	<p>Support and comments noted. .</p> <p>Where pre-application discussions are likely to evolve, the council has used a previous application to determine indicative site capacities – more details can be found in the Site Allocations Background Paper.</p> <p>Following the Regulation 18 consultation, the site capacities and mix of uses have been re-visited. This has taken into account the complexities of the site – including the scale of development considered suitable for the site, based on a previous application and the need to deliver non-residential floorspace appropriate to the District town centre. Based on these considerations, the capacity has remained the same.</p> <p>Optimal capacity for the site will be established at planning application stage through a design led approach.</p>	No change.

			<p>GHL's understanding that no technical feasibility studies have yet been undertaken by the Council to determine these indicative capacity figures.</p> <p>GHL supports the Government's aspiration for the effective and efficient use of highly sustainable previously developed sites and the role that increased densification of urban sites will perform in protecting settlements beyond the boundary. Indeed, as set out within the NPPF the Council should seek to achieve densities that take account of a range of factors. GHL encourages the Council to allow for greater densities within urban areas where appropriate, including within Lee Green District Centre.</p> <p>The quantum of uses should be defined through a design-led process, in collaboration with the LPA and GLA and should ultimately seek to effectively reuse and optimise previously developed land, and assist with the continued improvement, enhanced sustainability and long-term viability of the Lee Green District Centre. The precise number of units, mix of units type, size and affordability is therefore to be determined as part of a design-led exercise. This approach would be consistent with the London Plan Policy D3 (Optimising site capacity through the design-led approach) that requires all development to make the best use of land by following a design-led approach that optimises the capacity of sites, including site allocations.</p> <p>GHL is seeking to deliver increased residential units, which would make a significant contribution to the Council's housing and affordable housing targets and will also help to work towards achieving the national objective to provide 300,000 net housing additions each year in England.</p>		
GHL (Leegate) Limited (Frank Knight obo)	3	LEA SA 03	<p>Furthermore, the quantum of employment floorspace and main town centre floorspace needs to be reviewed in light of changes to shopping and potential future of the high street, in response to a post-COVID-19 world, resulting in Government's update to the Use Class Order, whilst ensuring the quantum of floorspace is provided to continue support of the vitality and viability of Lee Green District Centre.</p> <p>GHL assume that the identified quantum of employment and main town centre floorspace has been calculated by the in situ floorspace. However, clarification is sought by GHL as to what evidence the Council have used to inform the site allocation and whether assessment works been carried out to justify that such provisions are sustainable going forward.</p> <p>Furthermore, in light of the current challenges confronting the retail sector nationally, and within Lee Green District Centre more specifically, GHL strongly encourage the site allocation policy to allow sufficient flexibility to ensure that the wider centre area is attractive to potential retailers / occupiers, and do not result in empty and unlettable units. Indeed, it is concluded that the Lewisham Local Plan site allocation policy, must plan positively for those significant opportunities to ensure the vitality and viability of Lee Green District Centre is sustainable into the future.</p>	<p>Comments noted. Our response to site capacities is set out above.</p> <p>Agree that consideration should be given to changing town centres and retail in a post pandemic world.</p>	Local Plan amended to reflect the impact of the pandemic on town centres.
GHL (Leegate) Limited (Frank Knight obo)	3	LEA SA 03	<p>It is therefore requested that the proposed site allocation is reviewed in the context of the latest proposals presented by GHL. In addition, we respectfully request that the site allocation is structured in a way that seeks the optimisation of site capacity through a design-led approach and that the housing target is</p>	<p>Development proposals must make best use of land and establish optimal capacities rather than</p>	No change.

			expressed as a minimum to be achieved on site and also ensures that the quantum of employment and main town centre floorspace is appropriate and informed by evidence of need.	explicitly supporting higher density development. Recognition that site capacities are indicative and that optimal capacity for the site will be established at planning application stage through a design led approach is already included at the start of Part 3 of the Local Plan	
GHL (Leegate) Limited (Frank Knight obo)	3	LEA SA 03	GHL support the Council's aspirations set out in the 'development requirements' and 'development guidelines' supporting paragraphs. Nevertheless, GHL re-emphasise that the proposed designation of the Primary Shopping Area is key and needs to be carefully drawn, to ensure that there is no conflict with the aspirations set in the proposed site allocation.	Support noted. Agree that the primary shopping area boundary should be amended.	Local Plan amended with a revised primary shopping area.
GHL (Leegate) Limited (Frank Knight obo)	3	LEA SA 03	The proposed timeframe for delivery of any redevelopment is between 2020/21 to 2024/25. Subject to pre-planning discussions, GHL are confident that the development can commence in this timeframe with potential scope to be completed as well.	Comments noted.	No change.
GHL (Leegate) Limited (Frank Knight obo)	3	LEA SA 03	In light of the above, we would welcome an opportunity to review the proposed site allocation for the Leegate Shopping Centre with the Council as part of the Lewisham Local Plan Review, and in consideration of the emerging proposals at the site.	Comments noted.	No change.
Austringer Capital Ltd (Tetlow King Planning obo)	3 3	LEA 04 LEA 05	<i>Relates to Call for site</i> Policies LEA4 'Linear Network of Green Infrastructure' and LEA5 'East Lewisham Links' offer further detailed policy guidance on how these objectives might be achieved. 4.12 Policies LEA4 and LEA5 clearly contemplate development coming forward that supports these broad aims. For example, part A of policy LEA4 requires that "Development proposals should respond positively to the linear network of green infrastructure as a vital environmental asset within the Borough and defining feature of the Blackheath, Lee and Grove Park neighbourhoods". Part B sets out a series of criteria that developments should meet, and part C emphasises the role of effective management. 4.13 In this context, policies LEA4 and LEA5 rightly recognise the role of development and the benefits that it can deliver for the wider network of Green Infrastructure and active mode connectivity. This is a pragmatic approach that could secure meaningful improvements in respect of both issues. Yet other policies, particularly GI2 and its 'no net loss' requirement for open space, are more restrictive in their approach. 4.14 Overall, we consider the vision for the East Area is a positive one and is supported. It provides a policy framework that supports deliverable improvements to open space, Green Infrastructure and active travel links. In this	Specific redevelopment proposals to enable improvements to open spaces and help to achieve the vision for the East sub area will be considered on a site by site basis.	No change.

			<p>context, we recommend that the Council gives careful consideration to the role that the Former Willow Tree Riding Establishment can play in achieving these objectives. A restrictive approach risks the continued degradation of the site with no clear opportunities to secure its effective management and maintenance. However, with a site allocation and careful consideration of the opportunities for open space and environmental enhancement, a meaningful improvement in the open space and connectivity of the site can be achieved.</p>		
Transport for London Commercial Development	3	LEA SA 09	<p>Lewisham's East Area: Site Allocation</p> <p>9 - Sainsbury Local and West of Grove Park Station</p> <p>Given TfL's existing bus operations at Grove Park Bus Stand, TfL CD note the text in the development guidelines section which states that "<i>The bus garage is in operational use. Applicants should consult with Transport for London to investigate future options for the garage, including its continued use, which the site masterplan should address</i>". The part of the site owned by TfL is used as a bus stand and not a bus garage. TfL CD would be open to discussing potential for development which includes this site; this would need to safeguard TfL's operational function either as existing or as part of redevelopment of an accessible brownfield site, subject to meeting operational needs.</p> <p><i>LB Lewisham officer note: a map showing TFL's landholdings in the vicinity of the Grove Park station site is included in the original representation.</i></p>	Agree.	Sainsbury Local and West of Grove Park Station site allocation amended by referencing a bus stand instead of a bus garage and continued operational function of the bus stand.
Stoken Properties Ltd (Boyer obo)	3	LSA Vision	<p><i>Relates to Call for site</i></p> <p><i>Lewisham's South Area</i></p> <p>We are pleased to see that the Council has identified South Lewisham as a key area for regeneration and in particular are supportive of paragraph 17.7 which confirms that the "<i>regeneration of brownfield sites in Bell Green and Lower Sydenham will deliver a significant amount of new housing, including a high proportion of genuinely affordable housing, workspace and jobs, community facilities and open space. A new mixed-use neighbourhood will be created through the redevelopment of out-of-centre retail buildings, the former gasholders, industrial land around Stanton Way and other sites.</i>"</p> <p>It is encouraging and welcomed to see the Council realise the significant opportunity that the regeneration of brownfield sites in Bell Green and Lower Sydenham have in delivering high-quality, mixed-use neighbourhoods.</p> <p>A primary aim of planning policy is for development proposals to make the best and most efficient use of land. It is therefore welcomed and supported to see that the Council require development proposals to optimise the use of land and capacity of sites.</p> <p>In general we are supportive of the Council's aim and vision for Lewisham's South Area and provide comment on specific policies below.</p>	Support and comments noted.	No change.
Stoken Properties Ltd (Boyer obo)	3	LSA Vision	<p><i>Relates to Call for site</i></p> <p>Overall, we are supportive of the Council's vision and ambitions for Lewisham's South Area and the fact that they acknowledge the important role it will play in helping to deliver more inclusive and liveable neighbourhoods in the Borough.</p>	Support noted. Comments relating to stakeholder engagement in the masterplan are noted.	No change.

			<p>Whilst Lewisham’s South Area, and in particular Bell Green and Lower Sydenham, do have the potential to deliver a significant amount of growth over the plan period, it is encouraging to see that the Council understand that development may have to be phased and it may be the case that parts of some sites come forward in the first instance, which will facilitate the development of the wider site.</p> <p>Whilst we hope for clarity on the points raised above, we are generally in favour of the Council’s proposals and in particular the fact that the Council acknowledge that the Bell Green and Lower Sydenham area presents an excellent opportunity for the comprehensive redevelopment and regeneration of sites to deliver new high quality, mixed-use development.</p> <p>It is understood that the Council will be working with interested parties to prepare a masterplan for the regeneration of the Bell Green and Lower Sydenham area. As our client has an established interest in the area, owning part of the site identified as Stanton Square, we would be very interested in being involved in any future discussions concerning the masterplan and look forward to receiving details on how to become involved in this process in due course.</p>		
Tetra Tech Planning (John Lyon’s Charity obo)	3	LSA Vision	<p>Part Three – Lewisham’s Neighbourhoods: Chapter 17 - Lewisham’s South Area</p> <p>We respond to each of the questions in turn:</p> <p>How do you feel about the proposed vision for the (South) area?</p> <p>The Charity commends the Council for its bold and ambitious vision for the South Area, which provides a clear and detailed synopsis of how the Council envisage the area in 2040.</p> <p>Do you have any comments on the proposed vision?</p> <p>The Vision for any new Local Plan should be aspirational but also realistic. The proposed vision sets out an aspirational and positive approach to the regeneration and growth of the South area over the Local Plan period. We note that the Bakerloo Line extension is referred to in the Vision. Notwithstanding the Secretary of State’s safeguarding directions for the Bakerloo line in March 2021, the safeguarding directions only pertain to the first stage of the Bakerloo Line – from Elephant & Castle via Old Kent Road and New Cross Gate to Lewisham. TfL’s consultation on the Bakerloo Line extension in December 2019 sought “views” on potentially extending the line beyond Lewisham – to Hayes and Beckenham Junction, which could include a new station at Lower Sydenham; we would therefore reiterate that there is a need for pragmatism when discussing the Bakerloo Line, specifically Phase 2 and the development potential that it could offer to the South of the borough.</p> <p>The Vision refers to “a new mixed-use neighbourhood”, which will be created through “the redevelopment of out-of-centre retail buildings, the former gasholders, industrial land around Stanton Way and other sites” . The Bell Green Retail Park, and Trade City, and its associated surface car parking is a highly successful and popular destination in south-east London. The Vision correctly recognises the need for a Masterplan to guide these development proposals in</p>	Support and comments noted. Agree that there is a need to be pragmatic when referring to BLE and its development potential in south of the Borough	Local Plan amended to recognise that the BLE safeguarding direction relates only to the first stage of the Bakerloo Line – from Elephant & Castle via Old Kent Road and New Cross Gate to Lewisham and that Phase 2 in the south of the Borough should be considered pragmatic manner.

			<p>and around Bell Green and it is critical that this process starts in earnest as soon as possible with engagement from key stakeholders, including landowners, business owners and the local community.</p> <p>The Charity welcomes the creation of new homes, including genuinely affordable housing, the creation of new employment space and jobs, community facilities and green spaces, all of which are central to the success of mixed-use neighbourhoods.</p>		
Tetra Tech Planning (John Lyon's Charity obo)	3	LSA Key Spatial Objectives	<p>Do you have any comments on the proposed key objectives?</p> <p>The 12 key objectives reflect the vision in a clear and robust manner, and they set out how the Local Authority will deal with the key issues.</p> <p>The Charity does however reiterate its comments made in relation to the BLE and the need for a high degree of pragmatism when discussing the objective to "secure the delivery the Bakerloo line extension". The South Area falls within a potential Phase 2 of the BLE, which may not come forward during the Plan period, indeed, it may not come forward at all, however the overall designation as a "Strategic Area for Regeneration" alongside the local "Regeneration and Growth Nodes" should support and encourage transformative growth in the area regardless of Phase 2.</p> <p>The Charity welcomes and fully supports those tangible objectives which seek to "coordinate new investment in the Bell Green and Lower Sydenham area to enable it to become a London Plan Opportunity Area" ; and "deliver the regeneration of the former gasholders, Bell Green Retail Park and other sites nearby to create a new high quality residential-led mixed-use area that is well integrated with existing neighbourhoods and communities".</p> <p>The future designation of an Opportunity Area within the London Plan is for the Mayor of London and the GLA, however the Charity does welcome and support the Council's objective of coordinating new investment in the Bell Green and Lower Sydenham area to "enable" that to happen and would expect the highest levels of public engagement, with effective participation from key stakeholders, from the outset of the process.</p>	The support for an Opportunity Area at Bell Green/Lower Sydenham is noted and agree that public engagement will be a necessary part of this process. The Council is a strong advocate of the BLE and the benefits that this will bring to Lewisham residents. However the planned growth within the Local Plan is not predicated on the delivery of the BLE.	No change.
Tetra Tech Planning (John Lyon's Charity obo)	3 3 3	LSA SA 01 LSA SA 03 LSA SA 04	<p>Site Allocations 1 (Former Bell Green Gas Holders), 3 (Bell Green Sainsbury's) and 4 (Stanton Square) are adjacent to or within close proximity to Site Allocation 2 and this "Regeneration Node" will require an effective strategy to co-ordinate the significant regeneration in an effective manner.</p>	Agree that the four site allocations will need effective co-ordination. All four site allocations already mention "that development must be delivered in accordance with an area framework/masterplan for Bell Green and Lower Sydenham.	No change.
Tetra Tech Planning (John Lyon's Charity obo)	- 3	General LSA	<p>Conclusions</p> <p>Overall, the Charity, as a key stakeholder in the South Area, is supportive of the aims and objectives of the Regulation 18 Local Plan. Plans should be prepared positively, in a way that is aspirational but deliverable. The Charity welcomes and supports the borough's aspirational Local Plan, while recognising the pragmatism</p>	Support noted.	No change.

			needed in relation to the Bakerloo Line Extension. In accordance with the NPPF (paragraph 16c), the Charity endorses early and effective engagement with the Council to progress and shape the Plan prior to its Regulation 19 consultation.		
Phoenix Community Housing (BPTW obo)	- 3	General LSA	<p>I am writing on behalf of our client Phoenix Community Housing (PCH) to provide comments in response to the second Regulation 18 stage consultation document (<i>'Main Issues and Preferred Approaches'</i>) for the emerging Local Plan 2020-2040. These comments follow our previous representations on behalf of PCH submitted at the first Regulation 18 stage consultation, back in November 2015.</p> <p>Introduction PCH are a not-for-profit, residential-led housing association who own and manage more than 6,000 homes in Lewisham. Their primary areas of operation are Bellingham, Whitefoot and Downham, all within the south Lewisham area. PCH therefore represent a key stakeholder within this part of the borough and have a keen interest in the emerging documentation relation to the draft Local Plan which will have a major impact on the future operations of the association. Having reviewed the documentation, we would like to make comments</p>	Comments noted.	No change.
Phoenix Community Housing (BPTW obo)	- 3	General LSA	<p>General Strategy The consolidation of LBL's Core Strategy and various development plan documents into a single plan is welcomed. The delay since the previous Regulation 18 consultation in 2015 has been useful in enabling the Tier 1 New London Plan process to be completed ahead of advancing LBL's Tier 2 plan, noting that Lewisham's contribution to housing has been upped. This also enables the new Lewisham plan to respond to the contemporary matters of the climate crisis declared by the borough, the potentially permanent implications on patterns of living brought about by coronavirus, and to be consistent with the updated NPPF (2019), which placed a greater emphasis on making efficient use of land through sensitive intensification, brownfield sites and small sites. It is less fortunate, however, that since this consultation began TfL have put an indefinite hold on the Bakerloo line extension, casting doubt upon the deliverability of a fulcrum of all the spatial strategy options presented (and indeed the preferred approach) within the plan period.</p> <p>The extension is not cancelled, though, with Grant Shapps issuing safeguarding directions on the land proposed to be used for Stage 1 to Lewisham in order to ensure no other use of land will be permitted within the likely corridor. Making strategic allocations in this plan around future Bakerloo line stations could see major scale growth arrive before the required infrastructure. A more justifiable and effective strategy for this plan would be to focus strategic development around the short-medium term A21 Healthy Streets Corridor ('Lewisham Spine') initiative, existing public transport networks, and promoting to a greater extent sensitive intensification and regeneration in the more deprived areas of the borough. Deprivation in the south of the borough is being exacerbated by the pandemic as noted below and the Bakerloo Line extension would have assisted with regeneration and better employment options for the PCH community. Both need to be recognised and addressed in planning.</p>	Comments noted. The planned growth within the Local Plan is not predicated solely on the delivery of the BLE and the A21 Healthy Streets Corridor and sensitive intensification form an important element of the spatial objectives for Lewisham's south area. The vision also seeks to deliver improvements that address the causes of deprivation in the Borough's south.	No change.
Phoenix Community Housing (BPTW obo)	- 3	General LSA	<p>I trust that the above comments will be taken into account as part of the continuing development of the Local Plan and would of course welcome any further engagement on the issues that have been discussed.</p> <p>Should you require any further clarification on the issues discussed in this letter, please do not hesitate to contact me</p>	Comments noted.	No change.
Southern Gas Networks (Carter Jonas obo)	- 3	General LSA SA 01	<p>LEWISHAM LOCAL PLAN TO 2040 – MAIN ISSUES AND PREFERRED APPROACH REGULATION 18 CONSULTATION – SOUTHERN GAS NETWORKS REPRESENTATIONS</p> <p>On behalf of our client, Southern Gas Networks (SGN), we enclose representations to the London Borough of Lewisham's ('the Council') "Main</p>	Comments noted.	No change.

			<p>Issues and Preferred Approach” consultation on its emerging Local Plan to 2040. Our client is the sole, freehold owner of the Former Bell Green Gas Holders, Bell Green, SE26 4PX (hereafter known as ‘the Site’).</p> <p>The Site is included as a draft allocation in the emerging Local Plan (‘1: Former Bell Green Gas Holders) (details provided on Page 698-699). The Council have indicated that the Site has an indicative development capacity of 73-178 net residential units, alongside employment uses (782sqm) and main town centre uses (1,563sqm), with a timescale for delivery within the first 5 years of the plan (2020/21– 2024/25).</p> <p>Should you have any queries, please do not hesitate to contact Cater Jonas.</p>
