The 2013 and 2014 data is provisional based on headline results from schools on Results day.

The historical A level data is sourced from NCER (National Consortium for Examinations Results) data. Grades A*, A, B, C, D, E and U are included in the % calculation for entries where students have completed 2 years of study i.e. end of KS5.

The historical AS level data is sourced from NCER (National Consortium for Examinations Results) data. (EPAS Criteria - TYD & Yr13/14)

Other qualifications data is as provided during the results headline collection in August each year.

The data is based on entries and not student numbers.

The above tables are based on two year session results relating to the snapshot academic year for Year 13 (and year 14) pupils.

The national comparator data is as published by the JCQ (Joint Council for Qualifications) on Results day and may include results of students outside the year 13/14 age range.

The A Level tables do not include a small minority of other A level qualifications like Applied GCE Double Awards and Applied GCE Single Awards.

The AS Level tables do not include a small minority of other AS level qualifications like Applied GCE AS Double Awards and Applied GCE AS Single Awards.

The Other Qualifications tables includes all other level 3 qualification including Applied Single, Applied Double, BTEC National Certificate and Diploma, VRQ, NVQs, etc.
