1. **Purpose**

This report provides members of the Health and Wellbeing Board with an update on performance against its agreed priorities within the Health & Wellbeing Strategy and the performance indicators for the Better Care Fund.

2. **Recommendations**

Members of the Health and Wellbeing Board are recommended to note performance as measured by health and care indicators set out in the attached dashboard at Annex A.

3. **Strategic Context**

3.1 The Health and Social Care Act 2012 established health and wellbeing boards as a forum where key leaders from the health and care system work together to improve the health and wellbeing of their local population and reduce health inequalities. The activity of the Health and Wellbeing Board is focused on delivering the strategic vision for Lewisham as established in Shaping our Future – Lewisham’s Sustainable Community Strategy, and in Lewisham’s Health and Wellbeing Strategy.

3.2 The work of the Board directly contributes to the priority outcome in Shaping our Future that communities in Lewisham should be Healthy, Active and Enjoyable – where people can actively participate in maintaining and improving their health and wellbeing.

3.3 The Health and Social Care Act 2012 placed a duty on local authorities and their partner clinical commissioning groups to prepare and publish joint health and wellbeing strategies to meet needs identified in their joint strategic needs assessments (JSNAs). Lewisham’s Health and Wellbeing Strategy was published in 2013.

3.4 The Health and Social Care Act also required health and wellbeing boards to encourage persons who arrange for the provision of any health or social services in the area to work in an integrated manner, for the purpose of advancing the health and wellbeing of the area.

4. **Background**

4.1 In response to the request from members of the Board, the Director of Public Health has worked alongside colleagues within Adult Social Care, Children’s Services and the Clinical Commissioning Group (CCG) to produce a dashboard of indicators which would assist members in monitoring health and wellbeing improvements across Lewisham and the effectiveness of the integrated adult care programme.
4.2 The dashboard also includes a number of indicators (including those on low birth weight, immunisation and excess weight) that are also included in the ‘Be Healthy’ priority of the Children and Young People’s Partnership Plan.

4.3 Since the board last saw the dashboard it has been streamlined to focus attention on key areas as well as introducing the performance metrics of the Better Care Fund.

5. Health and Wellbeing Board Performance Dashboard Update

5.1 The dashboard is based on metrics drawn from the Quality and Outcomes (Primary Care), Public Health, NHS and Better Care Fund Frameworks. These metrics have been selected to assist members in their assessment of the impact and success of the plans and activities in relation to the Health and Wellbeing Strategy.

5.2 Updated indicators that show a worsening position since the previous period of data availability (marked with a red arrow in the dashboard in Annex A) are highlighted below, together with a commentary on actions being taken to improve the position.

5.3 Overarching Indicators of Health & Wellbeing

No overarching indicators have deteriorated since the last dashboard was produced.

5.5 Priority Objective 1: Achieving a Healthy Weight

A new indicator has been added to the dashboard on Maternal Obesity. Maternal obesity (defined as obesity during pregnancy) increases health risks for both the mother and child during and after pregnancy and is a risk factor for childhood obesity. Statistics on the prevalence of maternal obesity are not collected routinely in the UK, hence this data is taken from information received from Lewisham and Greenwich Trust for women booked at Lewisham University Hospital. Therefore it should be noted that the data does not only refer to Lewisham residents. The proportion of women with excess weight in 2015-16 was 45.8%, which was higher than for 2014-15 (42.0%). However this latest data is still below figures seen between 2010 and 2012.

Actions to address maternal obesity include ensuring that all obstetricians and midwives at the Trust have been trained in how to raise the issue of healthy weight with pregnant women and in ensuring that all women with a possible problem are referred appropriately. Additionally the Lewisham Public Health Team have worked with Lewisham CCG and Lewisham Hospital to design an improved care pathway for overweight and obese women who choose to have their babies at the hospital. This has also been the subject of a CQUIN in 2015-16.

5.6 Priority Objective 2: Increasing the number of people who survive colorectal, breast and lung cancer for 1 and 5 years

The latest data for cervical cancer screening coverage has decreased to 71.7% in 2015, down from 73.7% in 2014. This level is significantly lower than the England average, but above the London figure. More smear tests were conducted in 2015 than in 2014, however due to the increasing population the percent uptake has decreased. A change in the service specification for Sexual Health Services, whereby they no longer offer routine smear tests is also likely to have impacted this indicator. This change was made due to the pressures on public health budgets and the fact that the financing of cervical screening is through the GP contract.
5.7 Priority Objective 3: Improving Immunisation Uptake

Figures for immunisation uptake are now provided as an average for the last four quarters to make the figures less susceptible to quarter by quarter fluctuation. However there was a substantial increase in MMR2 uptake in the last quarter of 2015/16. This relates to extensive work undertaken by the Lewisham Immunisation Coordinator who identified a problem with vaccination data recording by GP practices. Over a period of several months many Lewisham GP practices were using the wrong READ codes to record MMR2 vaccination after migrating to EMIS web. The Immunisation Coordinator has now corrected this problem. In addition, a GP registrar has been carrying out work with individual GP practices to ensure that children are invited for MMR1 and 2 vaccinations at the appropriate age.

However HPV vaccine uptake has declined notably from the previous period 73.4% in 2014/15 from 82.9% in 2013/14. This is also below the London average (an England average is currently not available). Public Health and School Nursing are developing an action plan to address the recent fall in HPV coverage. This decline appears to relate to increasing numbers of parents withholding consent for their daughters to be vaccinated, as well as changes to the dosage schedule and delivery in schools.

5.8 Priority Objective 4: Reducing Alcohol Harm

The rate of alcohol related admissions has increased since the previous reporting period, from 614 per 100,000 in 2013/14 to 644 per 100,000 in 2014/15. Alcohol Brief Intervention Training has been taking place throughout the year and has been well attended, this is likely to have a positive impact on reducing future admissions.

5.9 Priority Objective 5: Preventing the uptake of smoking among children and young people and reducing the numbers of people smoking

There is no deterioration of indicators with new data under this priority objective.

5.10 Priority Objective 6: Improving mental health and wellbeing

Prevalence of Serious Mental Illness has increased fractionally from 1.28% in 2014/15, compared to 1.27% in 2013/14. The rate remains higher than the England average but the increase is not statistically significant. Prevalence of Depression in Adults has risen from 5.90% in 2013/14 to 6.40% in 2014/15. This increase is statistically significant. Public Health will now raise this issue with Lewisham GPs to better understand and develop actions.

5.11 Priority Objective 7: Improving sexual health

No newly updated indicators show a decline in performance.

5.12 Better Care Fund Performance Metrics

The indicator regarding Patient Experience which looks at the proportion of people feeling supported to manage their long term conditions has declined on the previous year, from 59.1% in 2014/15 down to 56.0% in 2015/16. There are a number of schemes funded by the Better Care Fund with the objective of increasing such support including the Co-ordinated Care Service, neighbourhood community teams, community connections and dementia services. Continued evaluation of these schemes is necessary to ensure that an increase proportion of patients feel supported.
6. **Financial implications**

There are no specific financial implications arising from this report, however the board may wish to consider how resources are utilised in regards to poorly performing indicators.

7. **Legal implications**

As part of their statutory functions, members of the Board are required to encourage persons who arrange for the provision of any health or social services in the area to work in an integrated manner, for the purpose of advancing the health and well-being of the area and to encourage persons who arrange for the provision of health-related services in its area to work closely with the Health and Wellbeing Board.

8. **Crime and Disorder Implications**

There are no specific crime and disorder implications arising from this report or its recommendations.

9. **Equalities Implications**

There are no specific equalities implications arising from this report or its recommendations, but the dashboard highlights those areas where health inequalities exist in Lewisham and can be monitored.

10. **Environmental Implications**

There are no specific environmental implications arising from this report or its recommendations.

11. **Summary and Conclusion**

The increased uptake of the second dose of Measles Mumps and Rubella vaccine at five years being accurately reflected in performance has been a key break through. The Director of Public Health has written to GP Surgeries, Health Visitors and School Nurses to acknowledge this success.

Although there are a number of indicators that show a decline in performance, issues have been identified and actions are being taken forward.

If you have any difficulty in opening the links above or those within the body of the report, please contact Stewart Snellgrove (Stewart.Snellgrove@lewisham.gov.uk; 020 8314 9308), who will assist.

If there are any queries on this report please contact Dr Danny Ruta, Director of Public Health, Community Services Directorate, Lewisham Council, on 020 8314 8637 or by email danny.ruta@lewisham.gov.uk
Annex B: Definitions and Data sources

### 1a/1b. Life Expectancy at Birth (Male/Female)

**Definition**
The average number of years a person would expect to live based on contemporary mortality rates. For a particular area and time period, it is an estimate of the average number of years a newborn baby would survive if he or she experienced the age-specific mortality rates for that area and time period throughout his or her life. Figures are calculated from deaths from all causes and mid-year population estimates, based on data aggregated over a three year period. Figures reflect mortality among those living in an area in each time period, rather than what will be experienced throughout life among those born in the area. The figures are not therefore the number of years a baby born in the area could actually expect to live, both because the mortality rates of the area are likely to change in the future and because many of those born in the area will live elsewhere for at least some part of their lives.

**Numerator**
The number of deaths registered in the respective calendar years.

**Denominator**
ONS mid-year population estimates for the respective calendar years.

**Data source**
PHOF 0.1i [http://www.phoutcomes.info/public-health-outcomes-framework#gid/1000049/pat/6/ati/102/page/6/par/E12000007/are/E09000023](http://www.phoutcomes.info/public-health-outcomes-framework#gid/1000049/pat/6/ati/102/page/6/par/E12000007/are/E09000023)

### 2. Under 75 Mortality Rates from CVD

**Definition**
Mortality from all circulatory diseases (ICD-10 I00-I99 equivalent to ICD-9 390-459).

**Numerator**
Deaths from all circulatory diseases, classified by underlying cause of death (ICD-10 I00-I99, ICD-9 390-459 adjusted), registered in the respective calendar year(s).

**Denominator**
2011 Census based mid-year population estimates.

**Data source**
NHSIC - P00400

Data [https://www.indicators.ic.nhs.uk/download/NCHOD/Data/06A_076DRT0074_12_V1_D.csv](https://www.indicators.ic.nhs.uk/download/NCHOD/Data/06A_076DRT0074_12_V1_D.csv)

### 3. Potential Years of Life Lost (PYLL) from causes considered amenable to healthcare (DSR)

**Definition**
Directly age and sex standardised potential years of life lost to conditions amenable to healthcare in the respective calendar year per 100,000 CCG population.

**Numerator**
Death registrations in the calendar year for all England deaths based on GP of registration from the Primary Care Mortality Database (PCMD).

**Denominator**
Unconstrained GP registered population counts by single year of age and sex from the HSCIC (Exeter) Systems; supplied annually on 1 January for the forthcoming calendar year.

**Data source**
NHOF 1a (NHSIC P01559 – CCGOI 1.1)

Data [https://www.indicators.ic.nhs.uk/download/Clinical%20Commissioning%20Group%20Indicators/Data/CCG_1.1_I00767_D_V5.xls](https://www.indicators.ic.nhs.uk/download/Clinical%20Commissioning%20Group%20Indicators/Data/CCG_1.1_I00767_D_V5.xls)

### 4. Low birth weight of all babies

**Definition**
Percentage of live and stillbirths weighing less than 2,500 grams.

**Numerator**
Number of new born babies weighing less than 2500gms.

**Denominator**
Number of all births.

**Data source**

Priority Objective 2: Increasing the number of people who survive colorectal, breast and lung cancer for 1 and 5 years

10a. Cancer screening coverage - breast cancer

**Definition**
The percentage of women in the resident population eligible for breast screening who were screened adequately within the previous three years on 31 March

**Numerator**
Number of women aged 53–70 resident in the area (determined by postcode of residence) with a screening test result recorded in the previous three years

**Denominator**
Number of women aged 53–70 resident in the area (determined by postcode of residence) who are eligible for breast screening at a given point in time.

10b. Cancer screening coverage - cervical cancer

**Definition**
The percentage of women in the resident population eligible for cervical screening who were screened adequately within the previous 3.5 years or 5.5 years, according to age (3.5 years for women aged 25-49 and 5.5 years for women aged 50-64) on 31 March

**Numerator**
The number of women aged 25-49 resident in the area (determined by postcode of residence) with an adequate screening test in the previous 3.5 years plus the number of women aged 50-64 resident in the area with an adequate screening test in the previous 5.5 years

**Denominator**
Number of women aged 25–64 resident in the area (determined by postcode of residence) who are eligible for cervical screening at a given point in time.

Original Source: Health and Social Care Information Centre (Open Exeter)

10c. Cancer screening coverage - bowel cancer

**Definition**
The number of persons registered to the practice aged 60-69 invited for screening in the previous 12 months who were screened adequately following an initial response within 6 months of invitation.

**Rate of Proportion**
Screening uptake %: the number of persons aged 60-69 invited for screening in the previous 12 months who were screened adequately following an initial response within 6 months of invitation divided by the total number of persons aged 60-69 invited for screening in the previous 12 months.

Specification [https://www.cancertoolkit.co.uk/Profiles/PracticePublic/Documents](https://www.cancertoolkit.co.uk/Profiles/PracticePublic/Documents)

NB: Data in the performance indicator portal is local data from London Bowel Screening hub obtained via Open Exeter.

11. Early diagnosis of cancer

**Definition**
New cases of cancer diagnosed at stage 1 and 2 as a proportion of all new cases of cancer diagnosed (specific cancer sites, morphologies and behaviour: invasive malignancies of breast, prostate, colorectal, lung, bladder, kidney, ovary, uterus, non-Hodgkin lymphomas, and invasive melanomas of skin). This indicator is labelled as experimental because of the variation in data quality: the indicator values primarily represent variation in completeness of staging information.

**Numerator**
Cases of cancer diagnosed at stage 1 or 2, for the specific cancer sites, morphologies and behaviour: invasive malignancies of breast, prostate, colorectal, lung, bladder, kidney, ovary, uterus, non-Hodgkin lymphomas, and invasive melanomas of skin.
<table>

### 16. Uptake of Influenza vaccine in those over 65 years of age

**Definition**
Flu vaccine uptake (%) in adults aged 65 and over, who received the flu vaccination between 1st September and 31st January each financial year.

**Numerator**
Number of adults aged 65 years and over vaccinated between 1st September and 31st January of the financial year.

**Denominator**
Adults aged 65 years and over. The CCG is responsible for all adults registered with a GP whose practice forms part of the CCG, regardless of residency.

**Data source**
PHOF 3.03 [http://www.phoutcomes.info/public-health-outcomes-framework#gid/1000042/pat/6/ati/102/page/6/par/E12000007/are/E09000023](http://www.phoutcomes.info/public-health-outcomes-framework#gid/1000042/pat/6/ati/102/page/6/par/E12000007/are/E09000023)

---

### Priority Objective 4: Reducing Alcohol Harm

#### 17. Alcohol Specific Hospital Admission

**Definition**
The number of hospital admissions due to alcohol-specific conditions, directly age standardised rate per 100,000 population.

**Numerator**
The number of admissions involving an alcohol-related primary diagnosis or an alcohol-related external cause. See LAPE user guide for further details - [http://www.lape.org.uk/downloads/Lape_guidance_and_methods.pdf](http://www.lape.org.uk/downloads/Lape_guidance_and_methods.pdf)

**Denominator**
ONS mid year population estimates

**Data source**

### Priority Objective 5: Preventing the uptake of smoking among children and young people and reducing the numbers of people smoking

#### 18. Smoking Prevalence (18+)

**Definition**
Prevalence of smoking among adults aged 18+

**Numerator**
The number of persons aged 18+ who are self-reported smokers in the Integrated Household Survey. The number of respondents has been weighted in order to improve representativeness of the sample. The weights take into account survey design and non-response.

**Denominator**
The number of persons aged 18+ who are self-reported smokers in the Integrated Household Survey. The number of respondents has been weighted in order to improve representativeness of the sample. The weights take into account survey design and non-response.

**Data source**

Original Source: ONS Integrated Household Survey

#### 19. 4 week smoking quitters

**Definition**
This indicator relates to clients receiving support through the NHS Stop Smoking Services. A client is counted as a self-reported 4-week quitter if they have been assessed 4 weeks after the designated quit date and declares that he/she has not smoked even a single puff on a cigarette in the past two weeks. The indicator is a count of treatment episodes rather than people, so an individual who undergoes two treatment episodes and has quit at four weeks in both cases are counted twice.
20. Smoking at time of delivery

**Definition**
Number of women who currently smoke at time of delivery per 100 maternities. Data includes all women resident within the CCG’s boundary, and no data are available to break down the CCG denominators for different areas within the CCG.

**Numerator**
Number of women known to smoke at time of delivery.

**Denominator**
Number of maternities.

**Data source**
PHOF 2.03 [http://www.phoutcomes.info/public-health-outcomes-framework#gid/1000042/pat/6/ati/102/page/6/par/E12000007/are/E09000023](http://www.phoutcomes.info/public-health-outcomes-framework#gid/1000042/pat/6/ati/102/page/6/par/E12000007/are/E09000023)

NB: Latest available quarter data from NHS Stop smoking service database.

## Priority Objective 6: Improving mental health and wellbeing

21. Prevalence of Serious Mental Illness

**Definition**
The percentage of patients with schizophrenia, bipolar affective disorder and other psychoses as recorded on practice disease registers.

**Numerator**
Patients with schizophrenia, bipolar affective disorder and other psychoses.

**Denominator**
CCG responsible population.

**Data source**
National GP Practice Profiles [http://fingertips.phe.org.uk/profile/general-practice/data#mod,3,pyr,2013,pat,19,par,E38000098,are,-,sid1,2000003,ind1,-,sid2,-,ind2,-](http://fingertips.phe.org.uk/profile/general-practice/data#mod,3,pyr,2013,pat,19,par,E38000098,are,-,sid1,2000003,ind1,-,sid2,-,ind2,-)

22. Prevalence of Depression

**Definition**
The percentage of patients aged 18 and over with depression, as recorded on practice disease registers.

**Numerator**
Patients aged 18 and over with depression, as recorded on practice disease registers.

**Denominator**
CCG responsible population.

**Data source**

## Priority Objective 7: Improving sexual health

25. Rate of chlamydia diagnoses per 100,000 young people aged 15 to 24

**Definition**
Crude rate of chlamydia diagnoses per 100,000 young adults aged 15-24 based on their area of residence.

**Numerator**
The number of people aged 15-24 diagnosed with chlamydia.

**Denominator**
Resident population aged 15-24.

**Data source**
<table>
<thead>
<tr>
<th><strong>26. People presenting with HIV at a late stage of infection (%)</strong></th>
</tr>
</thead>
<tbody>
<tr>

<table>
<thead>
<tr>
<th>32. Total Non-Elective Admissions</th>
</tr>
</thead>
</table>
| **Definition** | Composite measure of:  
- unplanned hospitalisation for chronic ambulatory care sensitive conditions (all ages);  
- unplanned hospitalisation for asthma, diabetes and epilepsy in children;  
- emergency admissions for acute conditions that should not usually require hospital admission (all ages); and  
- emergency admissions for children with lower respiratory tract infection. |
| **Numerator** | Total avoidable emergency admissions for primary diagnoses covering those in all four metrics above, by local authority of residence (NB. This is not the same as adding admissions from the separate metrics as the four separate metrics overlap to some degree and this will therefore lead to ‘double counting’) |
| **Denominator** | Mid-year ONS population estimates |
| **Data source** | Better Care Fund Metric |
