

HEALTHIER COMMUNITIES SELECT COMMITTEE			
Report Title	South East London Sustainability and Transformation Plan: Update		
Contributors	Our Healthier South East London Programme Team, Martin Wilkinson, Chief Officer, Lewisham CCG	Item No.	5
Class	Part 1	Date: 24 November 2016	
Strategic Context	The report provides an update on strategic planning processes for South East London		

1. Purpose

This report provides members of the Healthier Communities Select Committee with an update on the NHS South East London Sustainability and Transformation Plan. The report is for information.

2. Recommendation

Members of the committee are recommended to:

- Note the summary of the South East London Sustainability and Transformation Plan

3. Policy Context

Planning guidance was published on 22 December 2015 which set out the requirement for the NHS to produce five year Sustainability and Transformation Plans (STP). These are place based, whole system plans driving the Five Year Forward View.

4. STP submission

Building on work through 'Our Healthier South East London' (OHSEL), the SEL STP was submitted to NHS England for assurance on 21st October and has now been published. A summary of the STP is attached at Appendix A.

Following publication of the NHS Five Year Forward View, all NHS regions in England were required to work together with their local councils on an STP for local services. These plans describe how health and social care organisations will work together to produce a population based strategy to deliver financially and clinically sustainable services over the next five years.

The STP for south east London builds on work that was already taking place via the Our Healthier South East London programme. This was led by the six clinical commissioning groups in south east London but with the active engagement of other stakeholders. The models of care developed through this programme are the product of several years of partnership working between

clinicians, commissioners, council social care leads, local hospitals, and have been informed by wide engagement with local communities, patients and the public.

Our draft STP is, in effect, a development and expansion of the Our Healthier South East London strategy and will go through a national assurance process before it is finalised. Most of the STP ideas have already been discussed extensively with local people and you can read more about them on the OHSEL website (www.ourhealthiersel.nhs.uk).

5. Financial implications

The strategic plans reflects the financial plan and savings required to deliver a financially balanced position over the five year period.

6. Legal implications

Under Section 195 Health and Social Care Act 2012, health and wellbeing boards are under a duty to encourage integrated working between the persons who arrange for health and social care services in the area. This is recognised in the strategic priorities identified in the development process.

7. Crime and Disorder Implications

There are no specific crime and disorder implications arising from this report.

8. Equalities Implications

In order to ensure that the strategy is informed by the diverse population in south east London and to enable full understanding of the potential impact on communities with protected characteristics (as well as complying with the Equalities act 2010), carers and, the socially and economically deprived, equalities analyses will be conducted throughout the programme.

9. Environmental Implications

There are no environmental implications arising from this report.
