

London Borough of Lewisham

Baseline (2017/18) performance against common reporting metrics

Metric	Performance (2017/18)		Additional guidance and expectations
Total annual household waste per head (kgs/head)	328.71		Defra stats (Ex BVPI84a)
Total annual household residual waste collected per household (kgs/household)	616.22		Defra stats (Ex NI191)
Total annual household avoidable (edible) food waste (kgs/head)	77		Borough to estimate based on own or RL/WRAP food waste composition data. Estimates should be based on avoidable food waste produced (i.e. not just food waste collected).
Annual household waste recycling rate (% by weight)	21.7		Defra stats
Annual LACW recycling rate (% by weight)	20.2		Defra stats
Proportion (%) of properties receiving the Mayor's minimum level of service for household recycling:			
% of kerbside properties (all households on a kerbside collection) collecting six main dry materials and separate food waste	64		Borough to take from own info. Separate food waste does not include co-mingled with garden waste
% of flats (communal collections and flats within commercial buildings) collecting six main dry materials	98		Borough to take from own info
% of flats (communal collections and flats within commercial buildings) collecting six main dry materials and separate food waste	0		Borough to take from own info
Proportion (%) of waste fleet heavy vehicles that are ULEZ compliant (Euro VI diesel)			
Proportion (%) of waste fleet heavy vehicles that are ULEZ compliant (Euro VI diesel)	60		All HGVS Euro VI (diesel) compliant by April 2019 (central London) and October 2020 (throughout London). See www.tfl.gov.uk/modes/driving/ultra-low-emission-zone
Performance of LACW activities against the Mayor's EPS (tonnes of CO2eq per tonne of waste managed). Use tool found here: Waste policy London City Hall	0.01		Boroughs to set by uploading WDF data into the GLA tool. GLA will provide EPS training in early 2019
Set Common Performance Targets			
	Target years		Additional guidance and expectations
	2022	2025	
Total annual household waste per head (kgs/head)	280	250	Borough sets own targets, informed by RL/WRAP good practice
Total annual household residual waste collected per household (kgs/household)	480	450	Borough sets own targets, informed by RL/WRAP good practice
Total annual household avoidable (edible) food waste (kgs/head)	70	65	Based on estimated avoidable food waste produced. The focus should be on what communication/behaviour change activities will be undertaken to help residents reduce avoidable food waste. Borough to set own targets, informed by RL/WRAP good practice and support programmes (e.g. Trifocal). Boroughs are expected to become members to WRAP's Courtauld Commitment 2025 http://www.wrap.org.uk/content/courtauld-commitment-2025-signatories
Annual household waste recycling rate (% by weight)	35	45	Borough sets own targets, informed by RL/WRAP Route map modelling and other good practice. The GLA will use the borough recycling benchmarking table in the Route Map modelling as a reference point when assessing local authority targets set in the RRP process (See Appendix 2 of the London Environment Strategy, page 111: https://www.london.gov.uk/sites/default/files/les_appendix_2_-_evidence_base_0_0.pdf)
Annual LACW recycling rate (% by weight)	35	45	Borough sets own targets, informed by RL/WRAP good practice. Targets should at least match household recycling targets, going beyond the Mayor's 50 per cent LACW recycling target by 2025 where possible.
Proportion (%) of properties receiving the Mayor's minimum level of service for household recycling (by 2020):			
% of kerbside properties (all households on a kerbside collection) collecting six main dry materials and separate food waste	100		Borough sets own target, informed by RL/WRAP good practice
% of flats (communal collections and flats within commercial buildings) collecting six main dry materials	100		Borough sets own target, informed by RL/WRAP good practice. Separate food waste does not include co-mingled with garden waste
% of flats (communal collections and flats within commercial buildings) collecting six main dry materials and separate food waste	50		Borough sets own target, informed by RL/WRAP good practice
Proportion (%) of waste fleet heavy vehicles that are ULEZ compliant (Euro VI diesel)			
Proportion (%) of waste fleet heavy vehicles that are ULEZ compliant (Euro VI diesel)	100	100	All HGVS Euro VI (diesel) compliant by April 2019 (central London) and October 2020 (throughout London). https://tfl.gov.uk/modes/driving/ultra-low-emission-zone
Performance of LACW activities against the Mayor's EPS (tonnes of CO2eq per tonne of waste managed). Use tool found here: Waste policy London City Hall	-0.069	-0.085	Borough to run their own scenarios using GLA tool to determine planned service changes (DSO borough) or new contract options against the EPS for target years 2020/21 and 2025. See London Environment Strategy Proposal 7.3.2.b
