E paul.j.jacklin@uk.gt.com

This paper provides the Audit Panel with a report on progress in delivering our responsibilities as your external auditors.

The paper also includes:

- a summary of emerging national issues and developments that may be relevant to you as a local authority; and
- includes a number of challenge questions in respect of these emerging issues which the Panel may wish to consider (these are a tool to use, if helpful, rather than formal questions requiring responses for audit purposes)

Members of the Audit Panel can find further useful material on our website, where we have a section dedicated to our work in the public sector. Here you can download copies of our publications www.grantthornton.co.uk ..

If you would like further information on any items in this briefing, or would like to register with Grant Thornton to receive regular email updates on issues that are of interest to you, please contact either your Engagement Lead or Engagement Manager.

Progress at September 2020

Prior year objections

We have recently concluded on our work on addressing local elector objections on the 2016/17 financial statements in regards to the Council's Private Finance Initiatives (PFIs) and Lender Option Borrower Option (LOBO). The Council are not required to take any action. We are intending to certify closure of the 2016/17, 2017/18 and 2018/19 audits in November 2020.

The fee variations for the cost of the work on the objections are required to be approved by Public Sector Audit Appointments. For information, the costs of the objections are £11,000 for the PFI and £13,000 for the LOBO objection.

Financial Statements Audit

We undertook our initial planning for the 2019/20 audit in December 2019, and interim audit in January to March 2020. We began our work on your draft financial statements in July.

In March we issued a detailed audit plan, setting out our proposed approach to the audit of the Council's 2019/20 financial statements.

We will report formally on our work in the Audit Findings Reports scheduled for the 4 November Audit Panel and aim to give our opinion on the Statement of Accounts by 30 November.

Covid-19

In addition to the audit risks communicated to those charged with governance in our Audit Plan on 12 March 2020, the Covid-19 pandemic led us to update our planning risk assessment and reconsider our audit and value for money (VfM) approach to reflect the unprecedented global response. On 16 April 2020 we issued an addendum to our audit plan, setting out a new significant financial statement risk in relation to Covid-19.

Financial Statements Audit Progress

Throughout the pandemic we held regular meetings with the Council's key finance staff to discuss the Covid-19 impact on the Council. We also discussed the financial implications in terms of asset valuations, going concern and provision for credit losses in advance of submission of the financial statements. This has assisted the Council in complying with the required accounting standards and ensuring that disclosures complied with the Code of Practice on Local Authority Accounting 2019-20.

The Council's finance team were well set up for remote working and there were no changes in key financial processes that impacted on our approach to the audit. Restrictions for non-essential travel have meant both teams are being flexible in approaches to sharing information. We are utilising video calling to watch the finance team run the required reports to gain assurance over the completeness and accuracy of information produced by the Council. We are making more use of conference calls and emails to resolve audit queries. Both teams are utilising a query log to track and resolve outstanding items which is shared by the audit team on a daily basis. Weekly meetings are being held with senior finance staff to highlight key outstanding issues and findings to date, ensuring that the audit process is as smooth as possible.

The audit is progressing to the revised timeframes. Management and officers have worked hard to ensure that information is provided in the required timeframes. Inevitably, working in remote conditions has led to some delays in obtaining responses to queries where a face to face meeting would have been more effective. We are still aiming to complete the remainder of our substantive testing by the end of September 2020. This is dependent on the Council providing the required outstanding information. Achieving this will be key to achieving the planned audit completion by the end of October 2020 and reporting to the Audit Panel on 4 November 2020.

Progress at September 2020 continued

Financial Statements Audit Progress (continued)

We are still completing our work in a few areas, but we are aiming to finalise our substantive testing by the end of September. The main areas that we are still working through are Property Plant and Equipment valuations and cut off expenditure testing. We have identified several presentational adjustments within the notes to the Council's financial statements. The number of proposed adjustments is in line with the previous year. Our key findings that impact on the main statements to date are as follows:

- Due to Covid-19 and its potential to impact on the value of the Council's land and buildings the Valuer has disclosed a material uncertainty within the Council's valuation reports in common with the majority of Councils. The Council has reflected the material uncertainty within note 4 of the accounts. We will reflect your disclosure within an "emphasis of matter" paragraph in our opinion. This is not a modification or qualification of the opinion.
- The Council had not obtained a year end valuation for all its surplus assets as required by International Financial Reporting Standards. The Council has since obtained a valuation for the assets that had not been revalued. The financial statements will need updating for these assets. The Council has calculated the potential reduction to the Net Book Value of assets of £10.2m. We are in the process of challenging the valuations as some of the assets do not appear to be valued at highest and best use in line with the accounting standards.

- The pension disclosures within the financial statements were prepared using the actuary estimate of the 31 March 2020 investment balances. Due to Covid 19, there was a significant difference between the estimated value of the investment balances and subsequent actual assets. The Council obtained an updated IAS19 report from their actuary to reflect the year end actual balances. The assets had decreased by £7.4m.
- Our expenditure cut off testing has identified invoices that were paid in 2020/21 that related to 2019/20 that had not been appropriately accrued for. The current error rate leads to an extrapolation of approximately £7million. We have extended our sample size and the Council are in the process of providing support for these additional items.

Our substantive testing of the pension fund financial statements is largely complete and we are currently undertaking our review and closure processes. At this stage the two key findings are:

- Our anticipated audit report opinion will be unqualified and will include an Emphasis of Matter paragraph, highlighting the material uncertainties caused by Covid-19 in the valuation of Pension Fund Private Equity investments held by Harbourvest, Infrastructure investments held by JP Morgan Infrastructure and Property Investments held by Schroders. The Emphasis of Matter is not a modified or qualified opinion and will just point readers of the accounts to the Pension Fund Accounting policy Note W where the Pension Fund has disclosed more details on the uncertainty.
- Subsequent to receipt of the draft financial statements, the Fund Manager Harbourvest provided updated 31 March 2020 capital statements which take into consideration impact on Covid 19. The valuations of the Harbourvest investments had fallen by £2,059k from the balance disclosed in the draft financial statements. Management has agreed the to adjust the pension fund financial statements.

Our Audit Findings Report on the Council and Pension Fund financial statements will be provided to the Audit Panel on 4 November 2020.

Progress at September 2020 continued

Value for Money

The scope of our work is set out in the guidance issued by the National Audit Office. The Code requires auditors to satisfy themselves that; "the Council has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources".

The guidance confirmed the overall criterion as: "in all significant respects, the audited body had proper arrangements to ensure it took properly informed decisions and deployed resources to achieve planned and sustainable outcomes for taxpayers and local people".

The three sub criteria for assessment to be able to give a conclusion overall are:

- Informed decision making
- Sustainable resource deployment
- Working with partners and other third parties

Details of our initial risk assessment to determine our approach will be included in our Audit Plan. Our value for Money work is in progress and we will report our work in the Audit Findings Report and aim to give our Value For Money Conclusion by 30 November 2020.

The NAO consultation on a new Code of Audit Practice (the "Code") has finished, and the new Code has completed its approval process in Parliament. It therefore came into force on 1 April 2020 for audit years 2020/21 and onwards. The new Code supersedes the Code of Audit Practice 2015, which was published by the National Audit Office (NAO) in April 2015.

The most significant change under the new Code is the introduction of an Auditor's Annual Report, containing a commentary on arrangements to secure value for money and any associated recommendations. The NAO public consultation is now underway and runs until 2 September 2020. It can be accessed through the NAO website:

<https://www.nao.org.uk/code-audit-practice/agn-03-vfm-consultation/>

Other areas

Certification of claims and returns

We certify the Council's annual Housing Benefit Subsidy claim in accordance with procedures agreed with the Department for Work and Pensions (DWP). The certification work for the 2019/20 claim is underway and we plan to be able to complete our work by the revised reporting deadline of 31 January 2021. We will report our findings to the Audit Panel in our Certification Letter in January 2021.

We certify the Council's annual Teachers' Pensions return in accordance with procedures agreed with Teachers' Pensions. The certification work for the 2019/20 claim is due to be completed in advance of the 30 November deadline.

We also certify the Council's annual Pooling of Housing Capital Receipts return in accordance with procedures agreed with the Ministry of Housing, Communities & Local Government. (MHCLG). The Council is in the process of finalising work on prior year claims prior to us being able to finalise the audit. We are yet to receive from MHCLG guidance for the certification work for the 2019/20 return.

Meetings

We met with Finance Officers in July as part of our quarterly liaison meetings and continue to be in discussions with finance staff regarding emerging developments and to ensure the audit process is smooth and effective. We are due to meet with your Chief Executive in September to discuss the Council's strategic priorities and plans.

Events

We provide a range of workshops, along with network events for members and publications to support the Council. Your officers attended our Financial Reporting Workshop in February, which helped to ensure that members of your Finance Team were up to date with the latest financial reporting requirements for local authority accounts.

Further details of the publications that may be of interest to the Council are set out in our Sector Update section of this report.

COVID-19 Update

Impact on working arrangements:

- Following the government's announcement on Monday 16 March 2020, we closed our Grant Thornton offices for the foreseeable future and your audit team are now working from home
- We have been working remotely during your accounts audit. Although there are some audit tasks which are best undertaken in person, we have been able to complete the majority of the audit remotely. This has unavoidably made the audit process longer. We continue to work closely with your finance team to make this different way of working as efficient as possible.
- There may need to be further changes to planned audit timings due to potential illness within the audit team or the finance team and due to the further developments of COVID-19.

Impact on accounts and audit opinions:

There are a number of key issues which your finance team will have had to consider as part of the year end closedown and accounts production:

- impact on reserves and financial health and whether the Council needs to provide additional disclosures that draw attention to a Material Uncertainty around Going Concern (this could also impact on the VfM conclusion) or asset valuations.
- valuation of Property, Plant & Equipment and assumptions made by valuers, particularly in respect of carrying value to current value assessment.
- impact on collectability of debt and assumptions made in bad debt provisions.
- impact on post-balance sheet events. The consequences of the virus post 31 March 2020 will generally be non-adjusting post balance sheet events but some form of disclosure may be needed.
- disclosure of impact in annual report.
- disclosure of critical judgements and material estimation uncertainties.
- impact on the content of the Annual Governance Statement, particularly with regards to risks, controls and mitigation.
- considerations in respect of service continuity and disaster planning arrangements (this could impact on the VfM conclusion).
- impact on reporting to those charged with governance and signing arrangements.

Changes to reporting requirements:

- The Secretary of State announced that for the 2019/20 accounting period he would be extending the period for publication of principal authority accounts to 30 August 2020.
- For principal authorities, this means that the whole chain of publication requirements will be amended. The audited financial statements are now to be published by 30 November 2020.
- IFRS 16 implementation has been delayed by 1 year to 1 April 2021. IAS 8 disclosures in respect of new accounting standards which have been issued but are not yet effective are still required for IFRS 16 (Leases) even though implementation is deferred to 2021/22.

Audit Deliverables

2019/20 Deliverables	Planned Date	Status
<p>Fee Letter</p> <p>Confirming audit fee for 2019/20.</p>	April 2019	Complete
<p>Audit Plan</p> <p>We are required to issue a detailed audit plan to the Audit Panel setting out our proposed approach in order to give an opinion on the Council's 2019-20 financial statements and a Conclusion on the Council's Value for Money arrangements.</p>	March 2020	Complete
<p>Interim Audit Findings</p> <p>We will report to you the findings from our interim audit and our initial value for money risk assessment within our Progress Report.</p>	March 2020	Complete
<p>Audit Findings Report</p> <p>The Audit Findings Report will be reported to the November Audit Panel</p>	November 2020	Not yet due
<p>Auditors Report</p> <p>This is the opinion on your financial statement, annual governance statement and value for money conclusion.</p>	By 30 November 2020	Not yet due
<p>Annual Audit Letter</p> <p>This letter communicates the key issues arising from our work.</p>	December 2020	Not yet due
<p>Whole of Government Accounts return</p> <p>Our audit of your Whole of Government Accounts return</p>	December 2020	Not yet due
<p>Housing Benefit, Teachers' Pensions and other claims and returns</p> <p>Our certification of your Housing Benefit and other claims and returns</p>	January 2021	Not yet due

Sector Update

Councils continue to try to achieve greater efficiency in the delivery of public services, whilst facing the challenges to address rising demand, ongoing budget pressures and social inequality.

Our sector update provides you with an up to date summary of emerging national issues and developments to support you. We cover areas which may have an impact on your organisation, the wider local government sector and the public sector as a whole. Links are provided to the detailed report/briefing to allow you to delve further and find out more.

Our public sector team at Grant Thornton also undertake research on service and technical issues. We will bring you the latest research publications in this update. We also include areas of potential interest to start conversations within the organisation and with audit committee members, as well as any accounting and regulatory updates.

Covid-19 update

Where are we now?

Over five months into lockdown and councils have moved from the initial emergency response phase to focus on recovery planning which is running in parallel with on-going responses to the pandemic, such as supporting vulnerable people, and managing the capacity challenges of delivering business as usual alongside covid-19 response.

The Government has confirmed three tranches of funding to support the impact of increase spend and reduced income directly attributed to Covid-19, and are in the process of confirming further support via the income compensation scheme.

Local Authority Income and Expenditure (England) 2018/19 to 2028/29

Source: Grant Thornton/CIPFA Financial Foresight

Financial Foresight forecast indicates that English local authorities have a funding gap of £1.9bn this financial year, rising to over £10bn in 2021/22. There is significant uncertainty as to whether the Government will provide further Covid-19 related funding, and what the medium-term funding for the sector will be following the Autumn's Comprehensive Spending Review. Our modelling currently assumes that government funding will remain broadly unchanged, with income being affected by ongoing reduction to Council Tax and Business Rates, both in terms of a reduction to these tax bases, alongside reduced payments as a consequence of the recession brought about by the pandemic.

and support the vulnerable, whatever scenarios play out in the medium term.

The uncertainty also impacts on future spending pressures and sales fees and charges income. For example, leisure centres and swimming pools can now be opened, but must follow Government guidelines on issues such as social distancing. Not all leisure services have been able to reopen, and those that have are not able to generate levels of income originally forecast pre-covid. Social care faces uncertainty in relation to future demand, for example most councils responsible for children's services are forecasting an increase in case load when children return to schools in September. For adults, where in some cases demand has fallen during the pandemic, there is uncertainty over future levels of demand. There is also concern over provider failure in relation to social care and other services such as leisure and transport, with many councils providing financial support and loans to some providers, which will not be sustainable in the medium term.

As place leaders, councils are managing the conflict between revitalizing footfall in high streets and keeping people safe, with some leading by example and encouraging council officers to spend some of the week in council offices. Use of public transport as a key mode of travel to get to work remains a particular challenge.

Lessons learned

All organisations, including councils, have been reflecting on the lessons learned from the pandemic, and are seeking to maintain the positive experiences as well as learn from the challenges, as part of recovery planning. There is a recognition that technology has enabled many people to successfully work remotely, and that this will have a fundamental impact on working patterns well after Covid-19 has passed. Councils are reviewing their property portfolios to understand the changes required in terms of future usage patterns, including how councils interact with their communities, whether parts of the municipal estate should be disposed, and whether alternate use of space can support income generation.

There will be demographic variations between places, meaning there is no "one size fits all" to economic recovery. For example, home to work geographies will vary, with some people who previously commuted into a council area for their work may now be considering office space closer to home, leading to a rise in demand for shared office space in some areas, that will in part counteract the fall in demand elsewhere.

Covid-19 update (cont'd)

Lessons Learned (Cont'd)

Many councils have recognized the improvement in community engagement and partnership working with the voluntary sector and other public sector organisations during the pandemic and are seeking to build on this, with a recognition that sharing responsibility for place-based recovery plans can help sustain the improvements gained. Although a shared view of place-based recovery takes an investment of time and resource that not all partner organisations are able to provide.

Wider learning relates to central vs local response to issues such as provision of PPE, housing the homeless and rough sleepers, and provision of food and equipment to the vulnerable. This is currently playing out on test and trace and how local lockdowns should be managed, with ongoing tension between national and local government.

Many councils understand the importance of data in supporting recovery planning decision making, to effectively understand where to prioritise resources and activity in the right way and at the right time to achieve the right outcomes.

The future?

Covid-19 has only increased volatility and uncertainty for local government, and when working with councils delivering Financial Foresight we have prioritized scenario planning to support strategic financial planning. Understanding best, worst and optimum case scenarios from the impact of the pandemic are critical in strategic discussion when setting next year's budget and updating the Medium-Term Financial Plan – impacts on the place and communities, as well as on the council services and the council as an organization. Some councils are more confident than others in being able to manage their financial position during 2020/21 but all are concerned about 2021/22 and beyond. And it is not just Covid-19 scenarios that need to be understood, but other global, national and local issues that will impact over the medium term, including the impact of a no deal Brexit trade deal, and new government policies such as those expected on devolution and health and social care integration.

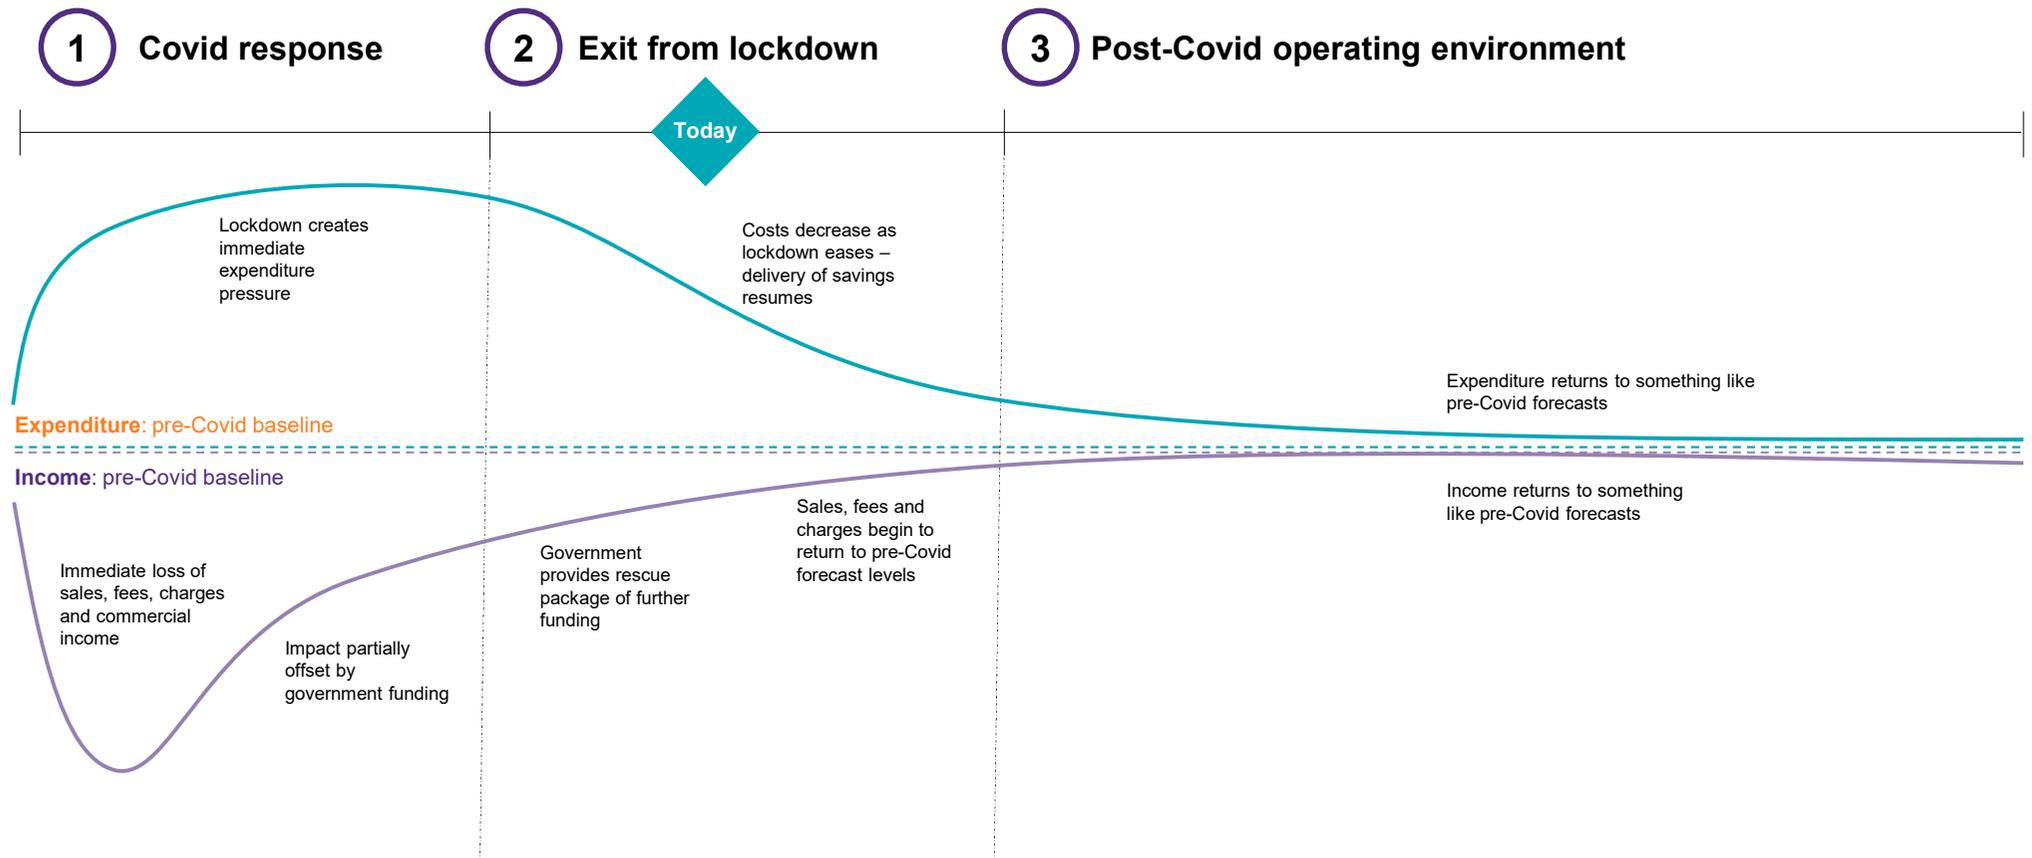

As already noted, places will vary depending on their socio-economic and demographic characteristics, but all councils are working through demand impacts arising from the ongoing pandemic and the associated recession, and ensuring their workforce continue to be supported to ensure they remain personally resilient.

Until a vaccine has been successfully produced and rolled out, the public health threat remains, and there are likely to be further local lockdowns, such as we have seen in Leicester and towns in the north west of England. There could be difficult trade offs for national and local politicians to consider to avert further waves of restrictions. For example to keep schools open after they return in September, will there be a need to increase restrictions elsewhere to ensure the cases of Covid-19 remain at a management level?

Local government has always demonstrated a remarkable resilience in managing significant challenges, including ten years of austerity, and being at the forefront of the pandemic response. And whilst much uncertainty remains, we are confident that councils will continue to demonstrate the capacity to lead places, deliver services

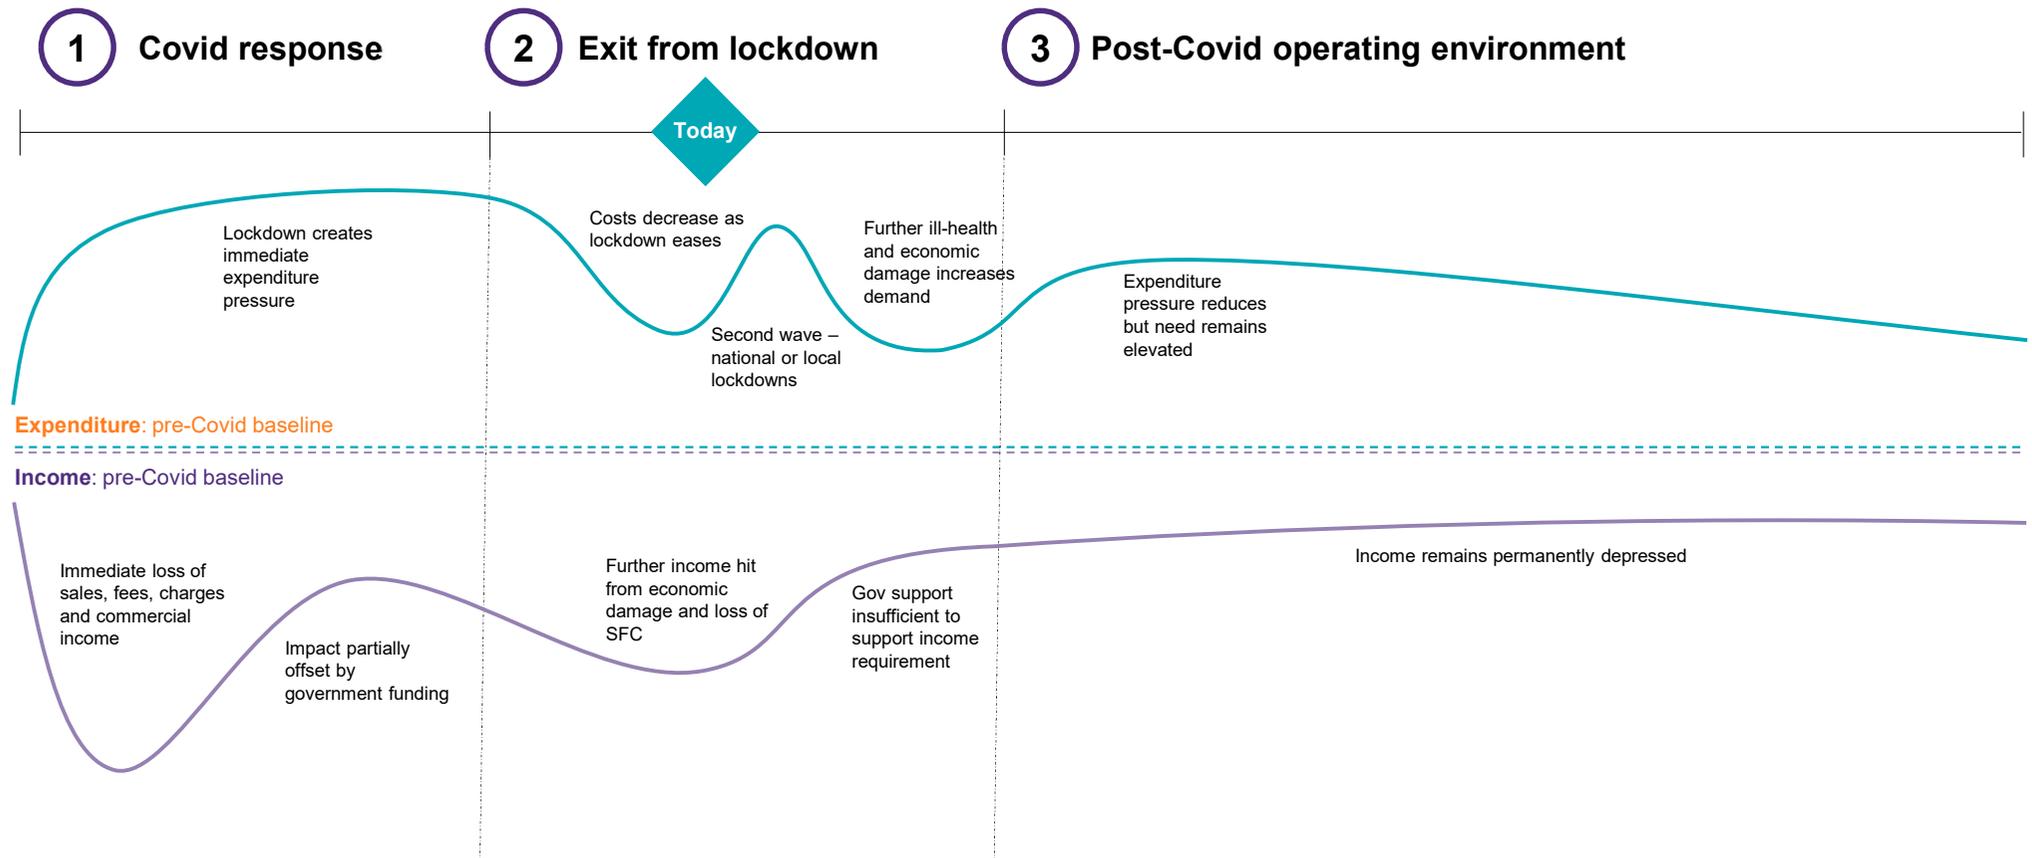

Example scenarios

Scenario 1 – swift return to normality

Example scenarios (Cont'd)

Scenario 2 – second wave and ongoing disruption

Scenarios and hypotheses

Local authority areas in 12-24 months?

Theme	Reasonable worst case	Reasonable best case
People & community	 <ul style="list-style-type: none"> Multiple lockdowns and ongoing disruption Community dependency and expectation of sustained response Turbulence and activism within the VCS Socio-economic inequality is compounded Failure of leisure and cultural services 	<ul style="list-style-type: none"> Smooth exit from lockdown to a “new normal” Community mobilisation is channelled into ongoing resilience Strengthened VCS relationships and focus Systemic response to inequality is accelerated Leisure and cultural services adapted to social distancing
Business & economy	 <ul style="list-style-type: none"> 16% reduction in GVA for 2020 based on OBR reference scenario Slow / uneven economic recovery and “long tail” on unemployment Central gov / BEIS focus investment on areas furthest behind Loss of tourist & student spend causes unmitigated damage 'V' shaped recovery results in 2-3 year recovery period 	<ul style="list-style-type: none"> 5-10% reduction in GVA Rapid economic recovery with employment levels close behind Central government “back winners” with investment Adaptation allows resumption of tourist and student economy Business base is weighted towards growth sectors
Health & wellbeing	 <ul style="list-style-type: none"> Increased demand and escalating need due to fallout from lockdown Newly-vulnerable cohorts place strain on the system Unit costs increase further as markets deteriorate and providers fail SEND transport unable to adapt to social distancing Imposed disruption of care system 	<ul style="list-style-type: none"> Positive lifestyle changes and attitudes to care reduce demand Needs of newly vulnerable cohorts met through new service models New investment in prevention and market-shaping manage costs New ways of working leading to stronger staff retention Locally-led reform of health and care system
Political & regulatory	 <ul style="list-style-type: none"> Local government side-lined by a centralised national recovery effort Unfunded burdens (e.g. enforcement and contact-tracing) Councils in the firing line for mismanaging recovery 	<ul style="list-style-type: none"> Local government empowered as leaders of place-based recovery Devolution and empowerment of localities Councils at the forefront of civic and democratic renewal
Environment	 <ul style="list-style-type: none"> Opportunity missed to capture and sustain environmental benefits The end of the high street / town centres Emissions and air quality worsened by avoidance of public transport Capital programmes stuck 	<ul style="list-style-type: none"> Ability to invest in transport modal shift and green infrastructure Changed working patterns rejuvenate town centres Sustained impact on emissions due to new behaviours New, shovel-ready infrastructure programmes
Organisational	 <ul style="list-style-type: none"> Inadequate funding forces fiscal constraint Working practices return to status quo – increased operating costs Imposed structural change within the place Austerity 2 Commercial portfolio becomes a liability 	<ul style="list-style-type: none"> Adequate funding enables a programme of targeted investment Learning and adaptation to new operating environment Energised system-wide collaboration and reform Fiscal reform and civic renewal Commercial portfolio reshaped for economic and social gain

What strategy is needed in response?

From response to recovery

Learn, adapt and prioritise

- Develop and test hypotheses around impact on place, services, operations, finances
- Design rapid interventions - implement, test and evaluate
- Learning from the response to lock in the good stuff – reflection on operations, services and the system
- Set priorities and principles – what is the Council's purpose in an uncertain context and where will it focus?

Mitigating the worst case

Consolidate and build resilience

- Ensure that emergency management and response structures are resilient for the long haul
- What is the minimum operating model to deliver this?
- Predict and model demand for social care and assess care market vulnerability
- Contingency plans for structural disruption
- Re-evaluate infrastructure pipeline

Steering towards the best case

Invest in renewal

- Programme of priority-based investment framed by recovery and renewal
- Focus on inequality, community resilience, targeted economic stimulus, skills and employment support and adapting public spaces
- Continued system leadership, pushing for positive reform and resilience

In-depth insight into the impact of Covid-19 on financial reporting in the local government sector – Grant Thornton

In June Grant Thornton published a report to help officers and elected members identify points they should consider when assessing and reporting the impact of Covid-19 on their authority. Each authority will be impacted in different ways and will need to make their own assessment of the impact on their financial statements. However, the report identified some of the key challenges for the sector, along with the potential financial reporting and regulatory impact, to support preparers of local authority accounts navigate through some of these key issues. The report also included a number of useful links to other resources.

The extraordinary events we are living through follow a decade of austerity, triggered by the financial crisis of 2008/09, which had already placed considerable strain on local authorities' finances. Increased demand for many local public services, directly related to the outbreak of the virus, has placed immediate pressure on authorities' cash flows and expenditure budgets. The longer-term consequences of recession and unemployment on demand for services have yet to be experienced.

At the same time, several important sources of local authority income including Council Tax, Non-domestic (business) rates, fees and charges, rents and investment returns have, to a greater or lesser extent, been subject to reduction or suspension. This perfect storm of conditions presents a real threat to the financial sustainability of the sector. Now, more than ever, strong political and executive leadership is needed to re-establish priorities, review strategies and medium-term financial plans and ensure that public funds are being used as efficiently and effectively as possible. A balance has to be struck between responding to the needs of residents and businesses in a timely manner, protecting the most vulnerable and ensuring appropriate measures and controls around financial management are in place to mitigate against future 'financial shock'. In doing so, iterative scenario planning will help officers and elected members to take informed decisions at key stages, revisiting and revising plans along the way.

The report considered:

- Operational challenges and the related financial reporting/regulatory impact
- Government support schemes – considering the accounting implications
- Significant financial reporting issues to consider
- Other sector issues and practicalities to consider
- Impact on audit work/external scrutiny process
- Engagement with experts

In terms of key financial reporting considerations for 2019/20, consideration should be given to:

Information published with accounts

- Does the Narrative Report reflect the urgency of the situation, the changes to Council services as a result of lockdown, the partnership arrangements in place, the impact of the pandemic on income and expenditure and possible future scenarios, the impact on savings programmes, the capital programme, treasury management, medium term financial plans and the Council's communications strategy (noting this is not an exhaustive list)?
- Does the Annual Governance Statement reflect significant developments between 31 March 2020 and the finalisation of the accounts? Does the AGS describe emergency governance arrangements for decision making, the postponement of elections, the transition to virtual meetings and plans for the return to normal democratic processes?

Non-current asset valuations

- There has been a significant increase in volatility and uncertainty in markets following the outbreak of Covid-19. RICS has issued a Valuation Practice Alert following the pandemic, and we are aware a significant number of valuers are including 'material valuation uncertainty' disclosures within their reports. Has the Council assessed the impact of such comments, reflected 'material valuation uncertainty' disclosures within the financial statements and taken account of the requirement of Code paragraph 3.4.2.90 to provide appropriate disclosure in their financial statements in relation to major sources of estimation uncertainty?

Non-current asset valuations

- The Council is required to make an assessment at the end of each reporting period as to whether there is any indication that assets may be impaired. There are several types of event or change in circumstance that could indicate an impairment may have occurred, including evidence of obsolescence or physical damage or a commitment to undertake a significant reorganisation. Has the Council assessed whether the impact of the pandemic may have triggered impairments?
- Has the Council considered these matters in relation to Investment Property held? Potentially more so for 2020/21, there may be significant declines in asset carrying values, especially for investments in retail or office premises.

Impairment of receivables

- IFRS 9 *Financial Instruments* introduced an expected credit loss model for financial assets which drives earlier recognition of impairments. Has the Council assessed the impact of the pandemic on its expectation of credit losses?
- Impairment of statutory Council Tax and Non-domestic rate debtor balances is also possible. Has the Council observed a measurable decrease in estimated future cashflow, for example an increase in the number of delayed payments? Has the Council considered whether recent historical loss experience across aged debt may also need revision where current information indicates the historical experience doesn't reflect current conditions? Experience following the 2008/09 financial crisis may prove to be a useful reference point, given the ensuing recession conditions.

Events after the reporting period

- By 31 March 2020 enough was known about the pandemic for accounts preparers and market participants to reflect and, if necessary, adjust assumptions and assessments. By the end of March 2020, it would be extremely difficult to say that the pandemic was not an event that existed and therefore any accounting impact that occurred after this date is not an adjusting event.
- Has the Council distinguished between subsequent events that are adjusting (i.e. those that provide further evidence of conditions that existed at the reporting date) and non-adjusting (i.e. those that are indicative of conditions that arose after the reporting date)? Has the Council got arrangements in place to assess events up to the date the final accounts are authorised for issue?

Sources of estimation uncertainty

Has the Council identified the assumptions required about the future and estimates at the end of the current reporting period that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year? Have these been appropriately disclosed in accordance with the requirements of IAS 1 paras 125-133?

2019/20 financial statements are being prepared in an environment of heightened uncertainty as a result of the pandemic and the situation is evolving and fast moving. We have drawn out some of the key considerations for local authority financial reporting here, but further details can be found in our full report available on the Grant Thornton website:

<https://www.grantthornton.co.uk/globalassets/1.-member-firms/uk/2020/impact-of-covid-19-on-financial-reporting-local-government-sector.pdf>

Guide for Audit and Risk Committees on Financial Reporting and Management during COVID-19 – National Audit Office

In June the National Audit Office (NAO) published a guide that “aims to help audit and risk committee members discharge their responsibilities and to examine the impacts on their organisations of the COVID-19 outbreak. It is part of a programme of work undertaken by the NAO to support Parliament in its scrutiny of the UK government’s response to COVID-19.”

The NAO report notes “Audit and risk committees are integral to the scrutiny and challenge process. They advise boards and accounting officers on matters of financial accountability, assurance and governance, and can support organisations, providing expert challenge, helping organisations focus on what is important, and how best to manage risk.

Each organisation will have existing risk management processes in place, but risk appetite may have changed as a result of COVID-19, for the organisation to operate effectively and respond in a timely manner. This may result in a weakening of controls in some areas, increasing the likelihood of other risks occurring. Organisations will need to consider how long this change in risk appetite is sustainable for.”

The NAO comment “This guide aims to help audit and risk committee members discharge their responsibilities in several different areas, and to examine the impacts on their organisations of the COVID-19 outbreak, including on:

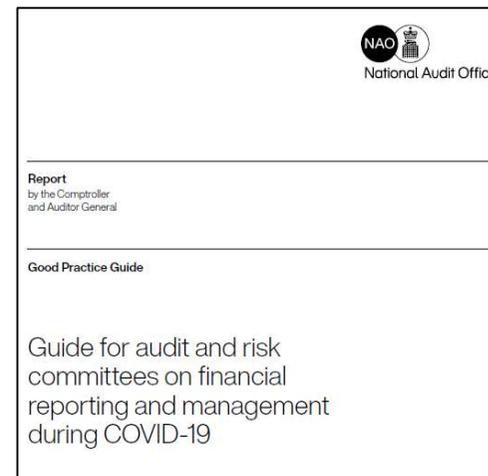

- annual reports;
- financial reporting;
- the control environment; and
- regularity of expenditure.

In each section of the guide we have set out some questions to help audit and risk committee members to understand and challenge activities. Each section can be used on its own, although we would recommend that audit and risk committee members consider the whole guide, as the questions in other sections may be interrelated. Each individual section has the questions at the end, but for ease of use all the questions are included in Appendix One.

The guide may also be used as organisations and audit and risk committees consider reporting in the 2020-21 period.”

The full report can be obtained from the NAO website:

Kickstarting Housing – Grant Thornton and Localis

In July Grant Thornton Head of Local Government, Paul Dossett, wrote an essay, included as part of a collection in the Localis report – “Building for renewal: kickstarting the C19 housing recovery”.

Paul asked “So how do we address “the housing crisis” in the context of an existential threat to the British economy? Just as importantly, how do we ensure our key workers, our new heroes of the Thursday night applause, are front and centre of such a response. Paul suggested that the housing response needs to move away from the piecemeal towards a comprehensive and strategic response, with five key pillars with the key worker demographic at its heart:

- **Public housebuilding.** This will involve more borrowing, but we need a bold and ambitious target to build at least one million new public sector properties at social rents by 2025. This should involve a comprehensive and deep partnership between Homes England and local authorities and underpinned by a need to minimise the carbon footprint.

- **Private sector housing needs a rocket boost** with massive Government supported investment in modern methods of construction and consideration of required workforce needed to meet capacity. This needs to go hand in hand with a major recruitment drive into all facets of the housing industries. This should include national and local training initiatives to support workers from the service sectors who are very likely to lose their jobs because of the pandemic.

- **Strategic authorities based on existing local government footprints** across the country to remove the inconsistent patchwork quilt of current arrangements so that there is consistency between local, county and national strategic priorities. They should be legally tasked and funded for development of comprehensive infrastructure plans to support housing initiatives in their areas with a strong remit for improving public transport, supporting green energy initiatives and developing public realms which create a sense of community and belonging.

- **Building on existing initiatives to improve security of tenure and quality of accommodation,** a new partnership is needed between landlord and tenants that provides a consistent national/regional footing to ensure that housing is a shared community responsibility. This should, like the response to the pandemic, be part of a shared community narrative based on state, business and local people.

- Putting key workers at the heart of the Housing strategy. The country appears to have discovered the importance of key workers. The people that keep the country running and whose contribution is never usually recognised financially or in terms of social esteem. There are several existing key worker accommodation initiatives, but they are local and piecemeal. We need a comprehensive strategy which focuses on key worker needs, including quality of accommodation, affordable mortgages/ rents, proximity to workplaces and above all , a sense of priority on the housing ladder for those who keep the country running in good times and bad and are the best of us in every sense.

Paul concluded “Housing is a basic need and if key workers feel valued in their place in housing priorities, we will have made a giant step forward.

Key workers are not the only group in need of help of course. Utilising the momentum behind keyworkers that their role in COVID-19 has brought into focus, could help kickstart housing initiatives that help all those in need.”

Place-Based Growth - 'Unleashing counties' role in levelling up England' – Grant Thornton

In March Grant Thornton launched a new place-based growth report 'Unleashing counties' role in levelling up England. The report, produced in collaboration with the County Councils Network, provides evidence and insight into place-based growth through the lens of county authority areas. It unpacks the role of county authorities in delivering growth over the past decade through: desk-based research, data analysis and case study consultations with 10 county authorities (Cheshire East, Cornwall, Durham, Essex, Hertfordshire, North Yorkshire, Nottinghamshire, Oxfordshire, Staffordshire, Surrey).

The report reveals:

- Growth, as measured by Gross Added Value (GVA), in county areas has lagged behind the rest of the country by 2.6% over the last five years. GVA in the 36 county areas has grown by 14.1% between 2014 and 2018, compared to 16.7% for the rest of England.
- In total, 25 of these counties have grown at a rate slower than the rest of the country. The research finds no north-south divide, as the county areas experiencing some of the smallest economic growth are Herefordshire (5.3%), Oxfordshire (5.6%) and Cumbria (8.2%), Gloucestershire (9.2%), and Wiltshire (9.7%) – showing that one size fits all policies will not work.
- Some 30 of the 36 county authority areas have workplace productivity levels below the England average. At the same time, counties have witnessed sluggish business growth, with county authorities averaging 7.9% growth over the last five years – almost half of that of the rest of the country's figure of 15.1% over the period 2014 to 2019.

To address these regional disparities in growth and local powers, the report's key recommendations include:

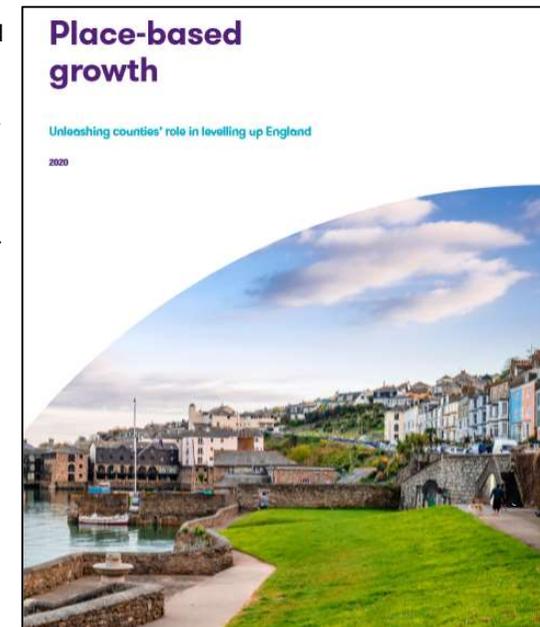

- Rather than a focus on the 'north-side divide', government economic and investment assessments should identify those places where the economic 'gap' is greatest – Either to the national average or between different places – and focus investment decisions on closing that gap and levelling up local economies.

- The devolution white paper must consider how devolution of powers to county authorities could assist in levelling-up the country. This should include devolving significant budgets and powers down to councils, shaped around existing county authorities and local leadership but recognising the additional complexity in two-tier local authority areas and whether structural changes are required.
- Growth boards should be established in every county authority area. As part of this a statutory duty should be placed on county authorities to convene and coordinate key stakeholders (which could include neighbouring authorities). These growth boards should be governed by a national framework which would cover the agreed 'building blocks' for growth – powers, governance, funding and capacity.
- Planning responsibilities should be reviewed with responsibility for strategic planning given to county authorities. In line with the recently published final report of the Building Better, Building Beautiful Commission, the government should consider how county authorities, along with neighbouring unitary authorities within the county boundary, could take a more material role in the strategic and spatial planning process.

- The National Infrastructure Commission should ensure greater consideration of the infrastructure requirements in non-metropolitan areas. Their national infrastructure assessments could consider how better investment in infrastructure outside metropolitan areas could link to wider growth-related matters that would help to level up the economy across the country.

CIPFA – Financial Scrutiny Practice Guide

Produced by the Centre for Public Scrutiny (CfPS) and CIPFA, this guide provides guidance to councils and councillors in England on how they might best integrate an awareness of council finances into the way that overview and scrutiny works.

The impact of the COVID-19 pandemic on council finances, uncertainty regarding the delayed fair funding review and future operations for social care – on top of a decade of progressively more significant financial constraints – has placed local government in a hugely challenging position.

For the foreseeable future, council budgeting will be even more about the language of priorities and difficult choices than ever before.

This guide suggests ways to move budget and finance scrutiny beyond set-piece scrutiny 'events' in December and quarterly financial performance scorecards being reported to committee. Effective financial scrutiny is one of the few ways that councils can assure themselves that their budget is robust and sustainable, and that it intelligently takes into account the needs of residents.

Scrutiny can provide an independent perspective, drawing directly on the insights of local people, and can challenge assumptions and preconceptions. It can also provide a mechanism to ensure an understanding tough choices that councils are now making.

This paper has been published as the local government sector is seeking to manage the unique set of financial circumstances arising from the COVID-19 pandemic. This has resulted, through the Coronavirus Act 2020 and other legislation, in changes to local authorities' formal duties around financial systems and procedures.

The approaches set out in this guide reflect CfPS and CIPFA's thinking on scrutiny's role on financial matters as things stand, but the preparation for the 2021/22 budget might look different. CfPS has produced a separate guide to assist scrutineers in understanding financial matters during the pandemic

Future Procurement and Market Supply Options Review – Public Sector Audit Appointments

Public Sector Audit Appointments (PSAA) has commissioned an independent review of the sustainability of the local government audit market. The review was undertaken by an independent consultancy, Touchstone Renard.

PSAA note that the report “draws on the views of audit firms active in the local authority market as well as others that are not. In doing so it identifies a number of distinctive challenges in the current local audit market. In particular it highlights the unprecedented scrutiny and significant regulatory pressure on the auditing profession; the challenges of a demanding timetable which expects publication of audited accounts by 31 July each year; and the impact of austerity on local public bodies and its effect on both the complexity of the issues auditors face and the capacity of local finance teams”.

Key findings in the report include:

- A lack of experienced local authority auditors as the main threat to the future sustainability of the market.
- It will be difficult to bring the non-approved firms into the market.
- Of the nine approved firms, only five have current contracts with PSAA.
- Almost all of the approved firms have reservations about remaining in the market.
- Firms perceive that their risks have increased since bids were submitted for the current contracts.
- The timing of local audits is problematic.

Key issues for the next procurement round include:

- Number of lots and lot sizes.
- Lot composition.
- Length of contracts.
- Price:quality ratio.

The report notes that “PSAA will need to balance the views of the firms with wider considerations including the needs of audited bodies and the requirement to appoint an auditor to every individual body opting in to its collective scheme”.

The full report can be obtained from the PSAA website:
