

To whom it may concern.

Thank you for giving me this opportunity to respond to your building proposal. I must say that the idea of building low-cost housing in the area is not a bad one. But would it not have been better to build social housing rather low-cost housing?

I would ver much like to know how you came up with the idea of low-cost housing rather than social housing. I was under the impression that this was a labour council rather than conservative.

Now building low-cost housing I do not really object to but your proposal to build new flats right up against the flats already here seems to me a little short sighted. It would present a number of problems, one of them being the number of cars the potential new tenants would bring in with them, reducing the green area and the potential of air pollution will increase.

I always thought that the idea was to lower pollution i.e. lowering CO2 emission (as per Transport for London) in the borough and not potentially increasing it which led to a fatality- (Ella Kissi – Debrah). Do we need to hear of another fatality before this is taken seriously?

You have lots of places you could build these new flats which are less built up, i.e. the Bridge on Kangley Bridge road.

I would surmise that most of the committee members who came up this proposal do not actually live in the borough or lives in a flat. I could be wrong but I doubt it.plm

Kind regards
