

Dear Sirs

I wish my Objection to be Noted to the above plans.

My main concerns are the loss Amenity Land Destruction of trees which are Home to Animals and Birds we have Woodpeckers & Jays Both of which are endangered.

You say you want to cut Down on Emissions in the city use a bike walk save the climate.

If you take down the trees it makes you're campaign a little hypocritical after all these trees filter the Air.

As for Building in the infills what security are you going to give us already refused us CCTV more street lighting. Have you not learnt anything from the past mistakes building large estates breed crime noise violence drugs.

There isn't enough Social Amenities to sustain you're plan are you building more Doctors surgeries? Where are you going to put all the extra cars as a Disabled person I treasure our car park the surrounding streets and Dacres Rd are already jam packed With cars.

Plus how will you maintain such devolopment I mean the present housing stock is beginning to make LEWISHAM Homes look like slum Landlords maybe invest in you're own stock before building more I and I hope this Devolopment is open and transparent and not held behind closed doors XXXXXXXX
